**Goldcorp June 30, 2016 Reserve and Resource Reporting Notes:**

1. All Mineral Reserves and Mineral Resources have been estimated in accordance with the CIM Definition Standards and NI 43-101 (see below for definition) or the JORC Code. The JORC Code has been accepted for current disclosure rules in Canada under NI 43-101. Subject to note 4 below, all Mineral Reserves, Ore Reserves and Mineral Resources set out in the tables above or elsewhere in this release have been reviewed and approved by Gil Lawson, P.Eng., Vice President of Geology and Mine Planning, Goldcorp, who is a qualified person as defined under National Instrument 43-101.
2. All Mineral Resources are reported exclusive of those Mineral Resources that were converted to Mineral Reserves.
3. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability.
4. Mineral Reserves and Mineral Resources are reported effective June 30, 2016, with the following conditions or exceptions:
  1. Mineral Reserves and Mineral Resources for Pueblo Viejo are as per information provided by Barrick Gold Corporation effective December 31, 2016.
  2. Mineral Reserves and Mineral Resources for Relincho and San Nicolas are as per information provided by Teck Resources Limited effective December 31, 2016.
  3. Mineral Reserves and Mineral Resources for Alumbraera are as per information provided by Glencore plc effective December 31, 2016.
  4. Mineral Reserves and Mineral Resources for Coffee are as per information provided by Kaminak Gold Corporation effective the transaction date of July 19, 2016.
  5. Mineral Reserves and Mineral Resources for Los Filos are effective December 31, 2016.
5. Mineral Reserves are estimated using appropriate recovery rates and US\$ commodity prices of \$1,200 per ounce of gold, \$18.00 per ounce of silver, \$2.75 per pound of copper, \$0.90 per pound of lead, and \$0.95 per pound of zinc, unless otherwise noted below:
  1. Alumbraera \$1,300/oz gold, \$2.31/lb copper
  2. Pueblo Viejo \$1,200/oz gold, \$16.50/oz silver, \$3.00/lb copper
  3. Relincho \$13.70/lb molybdenum, \$2.80/lb copper
6. Mineral Resources are estimated using US\$ commodity prices of \$1,400 per ounce of gold, \$20 per ounce of silver, \$3.00 per pound of copper, \$1.00 per pound of lead, and \$1.00 per pound of zinc, unless otherwise noted below;
  1. Alumbraera \$1,300/oz gold, \$3.06/lb copper
  2. El Morro \$1,200/oz gold, \$2.75/lb copper
  3. Pueblo Viejo \$1,500/oz gold, \$17.50/oz silver, \$3.25/lb copper
  4. Relincho \$13.70/lb molybdenum, \$2.80/lb copper
  5. San Nicholas \$1,275/oz gold, \$22.50/oz silver, \$2.75/lb copper, \$1.00/lb zinc

**Cautionary Note Regarding Reserves and Resources:**

Scientific and technical information contained in this table relating to Mineral Reserves and Mineral Resources was reviewed and approved by Gil Lawson, P.Eng., Vice President, Geology and Mine Planning for Goldcorp, and a “qualified person” as defined by National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”). All Mineral Reserves and Mineral Resources have been estimated in accordance with the standards of the Canadian Institute of Mining, Metallurgy and Petroleum (“CIM”) and NI 43-101, or the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves equivalent (“JORC”). All Mineral Resources are reported exclusive of Mineral Reserves. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. Information on data verification performed on the mineral properties mentioned in this table that are considered to be material mineral properties to the Company are contained in Goldcorp’s annual information form for the year ended December 31, 2015 and the current technical report for each of those properties, all available at [www.sedar.com](http://www.sedar.com).

*Cautionary Note to United States investors concerning estimates of measured, indicated and inferred resources:* This table has been prepared in accordance with the requirements of the Canadian securities laws which differ from the requirements of United States securities laws and uses terms that are not recognized by the United States Securities and Exchange Commission (“SEC”). The terms “Mineral Reserve”, “Proven Mineral Reserve” and “Probable Mineral Reserve” are Canadian mining terms as defined in accordance with the CIM Definition Standards adopted by CIM Council on May 10, 2014 (the “CIM Definition Standards”) which were incorporated by reference in NI 43-101. These definitions differ from the definitions in SEC Industry Guide 7 (“SEC Industry Guide 7”) under United States securities laws. Under SEC Industry Guide 7 standards, a “final” or “bankable” feasibility study is required to report reserves or cash flow analysis to designate reserves, and the primary environmental analysis or report must be filed with the appropriate governmental authority

In addition, the terms “Mineral Resource”, “Measured Mineral Resource”, “Indicated Mineral Resource” and “Inferred Mineral Resource” are defined in and required to be disclosed by NI 43-101; however, these terms are not defined terms under SEC Industry Guide 7 and are normally not permitted to be used in reports and registration statements filed with the SEC. United States investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves. “Inferred Mineral Resources” have a great amount of uncertainty as to their existence and their economic and legal feasibility. A significant amount of exploration must be completed in order to determine whether an Inferred Mineral Resource may be upgraded to a higher category. Under Canadian regulations, estimates of Inferred Mineral Resources may not form the basis of feasibility or pre-feasibility studies, except in rare cases. United States investors are cautioned not to assume that all or any part of an Inferred Mineral Resource exists or is economically or legally mineable. Disclosure of “contained ounces” in a resource is permitted disclosure under Canadian regulations if such disclosure includes the grade or quality and the quantity for each category of Mineral Resource and Mineral Reserve; however, the SEC normally only permits issuers to report mineralization that does not constitute “reserves” by SEC standards as in-place tonnage and grade without reference to unit measures.

Accordingly, information contained in this table containing descriptions of the Company’s mineral deposits may not be comparable to similar information made public by United States companies subject to the reporting and disclosure requirements under the United States federal securities laws and the rules and regulations thereunder.
