

## About ArcelorMittal Princeton

ArcelorMittal Princeton is a coal mine in Princeton, West Virginia, that specializes in surface and underground mining of coal to produce coke and pulverized coal injection (PCI). All production is consumed at ArcelorMittal facilities. ArcelorMittal took ownership of the Princeton mine on January 1, 2009. It is a 12,000 square foot facility with an annual production capacity of five million tons. Princeton primarily serves coke facilities, steel mills and utility markets.

### Princeton

<b>Plant leadership</b>	Michael Day, CEO
<b>Employees</b>	647
<b>Acreage</b>	120,000
<b>Building space</b>	12,000 sq. ft.
<b>Mining capacity</b>	Approximately 5 million tons
<b>Site founded</b>	1990
<b>Products</b>	Coking coal, pulverized coal injection (PCI)
<b>Markets served</b>	Primarily ArcelorMittal furnaces

## About ArcelorMittal

ArcelorMittal is the world's largest steel and mining company. In 2017, ArcelorMittal globally had sales of \$68.7 billion, steel shipments of 85.2 million net tons and crude steel production of 93.1 million net tons. ArcelorMittal employs nearly 200,000 people and has steelmaking operations in 18 countries on four continents.

In the United States, ArcelorMittal employs more than 18,000 at over 20 operations, with an additional 1,200 employees in research and development, corporate offices and sales centers. In 2017, ArcelorMittal USA produced approximately 15 million net tons of raw steel used to create flat, long, tubular and tailored blank steel products serving the automotive, construction, pipe and tube, appliance, container and machinery markets.

## Sustainability and corporate responsibility highlights

Our sustainability and corporate responsibility approach is driven by **10 sustainability outcomes** that we believe are essential not only for the long-term future of our business and our ability to deliver value for all stakeholders, but also for the role that steel has to play in creating high-quality, sustainable lifestyles for people all over the world. Highlights of five of these 10 outcomes, of which ArcelorMittal Princeton plays an important role, include:

- **Safe, healthy, quality working lives for all of our people:** The lost time injury (LTI) frequency rate in the U.S. in 2017 was .95 per million worker hours, a 23 percent improvement over 2016 and our best on record.
- **Efficient use of resources and high recycling rates:** 37 percent of each ton of steel produced at ArcelorMittal USA is from recycled scrap steel.
- **Responsible energy user that helps create a lower carbon future:** 36 energy projects resulted in \$17 million in energy savings, the equivalent of powering 12,400 homes for a year.
- **Trusted user of air, land and water:** Recognizing the importance of water within our business, we are a leader and the sole corporate funder of Sustain Our Great Lakes, a public-private partnership to protect fish, wildlife and habitat throughout the Great Lakes Basin. The program has made \$144 million in conservation investments in the region since 2006.
- **Active and welcomed member of the community:** Since 2008, ArcelorMittal USA and its employees have invested over \$70 million in nonprofit organizations across the United States. Our signature grantmaking initiative is investing in science, technology, engineering and math (STEM) programs at the local and national level.

## An example of sustainability at ArcelorMittal Princeton

ArcelorMittal Princeton is a major coal employer in the Welch area of West Virginia and operates both surface and deep coal mining activities. The facility has prioritized implementing clean technologies such as new conventional belt filters, slurry cells and state of the art plate and frame filtration technology. As a result, coal reserves have been conserved, water recyclability has increased to 95 percent and slurry pond impoundment has been avoided. Additionally, ArcelorMittal Princeton has created new direct and indirect jobs and maintained good business relationships in a region where coal mining has been the only major employer for several decades
