

RESPONSIBLY DEVELOPING NEWFOUNDLAND AND LABRADOR'S NEXT GOLD MINE

Corporate Presentation

November, 2020

CAUTIONARY STATEMENT

Certain information included in this presentation, including information relating to future financial or operating performance and other statements that express the expectations of management or estimates of future performance constitute "forward-looking statements". Such forward-looking statements include, without limitation, statements regarding copper, gold and silver forecasts, the financial strength of the Company, estimates regarding timing of future development and production and statements concerning possible expansion opportunities for the Company. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief are based on assumptions made in good faith and believed to have a reasonable basis. Such assumptions include, without limitation, the price of and anticipated costs of recovery of, copper concentrate, gold and silver, the presence of and continuity of such minerals at modeled grades and values, the capacities of various machinery and equipment, the availability of personnel, machinery and equipment at estimated prices, mineral recovery rates, and others. However, forward-looking statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by such forward-looking statements. Such risks include, but are not limited to, interpretation and implications of drilling and geophysical results; uncertainty as to whether mineral resources will ever be converted into mineral reserves once economic considerations are applied, uncertainty as to whether inferred mineral resources will be converted to the measured and indicated categories through further drilling, or into mineral reserves, once economic considerations are applied, estimates regarding timing of future capital expenditures and costs towards profitable commercial operations, estimates regarding timing of future capital expenditures and costs towards profitable commercial operations. Other factors that could cause actual results, developments or events to differ materially from those anticipated include, among others, the ability of the Company to continue to be able to access the capital markets for the funding necessary to acquire, maintain and advance exploration properties or business opportunities; global financial conditions, including market reaction to the coronavirus outbreak; competition within the industry to acquire properties of merit or new business opportunities, and competition from other companies possessing greater technical and financial resources; difficulties in advancing towards a development decision at Hammerdown and executing exploration programs at its Newfoundland and Labrador properties on the Company's proposed schedules and within its cost estimates, whether due to weather conditions, availability or interruption of power supply, mechanical equipment performance problems, natural disasters or pandemics in the areas where it operates, increasingly stringent environmental regulations and other permitting restrictions or maintaining title or other factors related to exploring of its properties, such as the availability of essential supplies and services; volatility in metals prices and demand; currency fluctuations; cash operating margins; cash operating cost per pound sold; costs per ton of ore; variances in ore grade or recovery rates from those assumed in mining plans; reserves and/or resources; the ability to successfully integrate acquired assets; operational risks inherent in mining or development activities and legislative factors relating to prices, taxes, royalties, land use, title and permits, importing and exporting of minerals and environmental protection. Accordingly, undue reliance should not be placed on forward-looking statements and the forward-looking statements contained in this press release are expressly qualified in their entirety by this cautionary statement. The forward-looking statements contained herein are made as at the date hereof and the Company does not undertake any obligation to update publicly or revise any such forward-looking statements or any forward-looking statements contained in any other documents whether as a result of new information, future events or otherwise, except as required under applicable security law. Larry Pilgrim, P.Geo. is the Qualified Person responsible for the technical content of this presentation.

For further information about the technical information and drilling results described herein, please see the National Instrument 43-101 – Standards of Disclosure for Mineral Projects compliant technical report prepared by WSP dated effective April 15, 2020, titled "Hammerdown Gold Project, Newfoundland and Labrador, Preliminary Economic Assessment" filed on SEDAR under the Company's issuer profile at www.sedar.com.

27	SUMMARY

MARITIME - KEY TAKEAWAYS

Two years of exploration and project de-risking have set the stage for a re-start of the high grade Hammerdown gold mine plus potential for additional gold resources at the Whisker Valley Project.

- Former Hammerdown gold mine, operated by Richmond Mines with a cut-off grade of 8.2 gpt and a head grade of 15.7 gpt during the early 2000's
- Newfoundland & Labrador ranked one of the top jurisdictions for mining
- NI 43-101 mineral resource of 521 k oz @ 5.64 gpt Au Measured & Indicated plus 466k oz @ 4.49 gpt Inferred
- 2020 Hammerdown PEA - **\$204M NPV/81% IRR after-tax** @ US\$1,650/oz with an average of 70,000 oz per year in the first 5 years of production
- Exploration upside along the 5 km Hammerdown trend and nearby Whisker Valley gold-rich VMS project
- Well funded with \$7.6 M in working capital. Major shareholders include Dundee Goodman Merchant Partners, Sprott and 1832 Asset Management

ENVIRONMENT & SUSTAINABILITY

Maritime is committed to maximizing value for shareholders through sustainable resource development by building positive legacies and minimizing the impacts of its activities on the environment.

We will strive to deliver employee and community prosperity, while developing a work culture that values human rights, equality, and diversity.

MARITIME RESOURCES

HAMMERDOWN PEA STUDY

- Open Pit & Underground mine development
- Hammerdown & satellite Orion deposit
- Ore sorting with X-Ray / Laser to minimize dilution that is hauled and processed
- Nugget Pond idle gold circuit with permitted tailings storage capacity
- Skilled local workforce and existing infrastructure

The next 12 months will focus on project de-risking and permitting:

- ✓ Q1 PEA on Hammerdown & Orion combined projects. \$204 M NPV_{5%}, 81% IRR at US\$1,650/oz Au
- Infill and grade control drilling for updated mineral resource estimate and Feasibility Study – *currently underway*
- Environmental studies, community consultation and Project Permitting – *currently underway*

EXPLORATION

HAMMERDOWN GOLD PROJECT

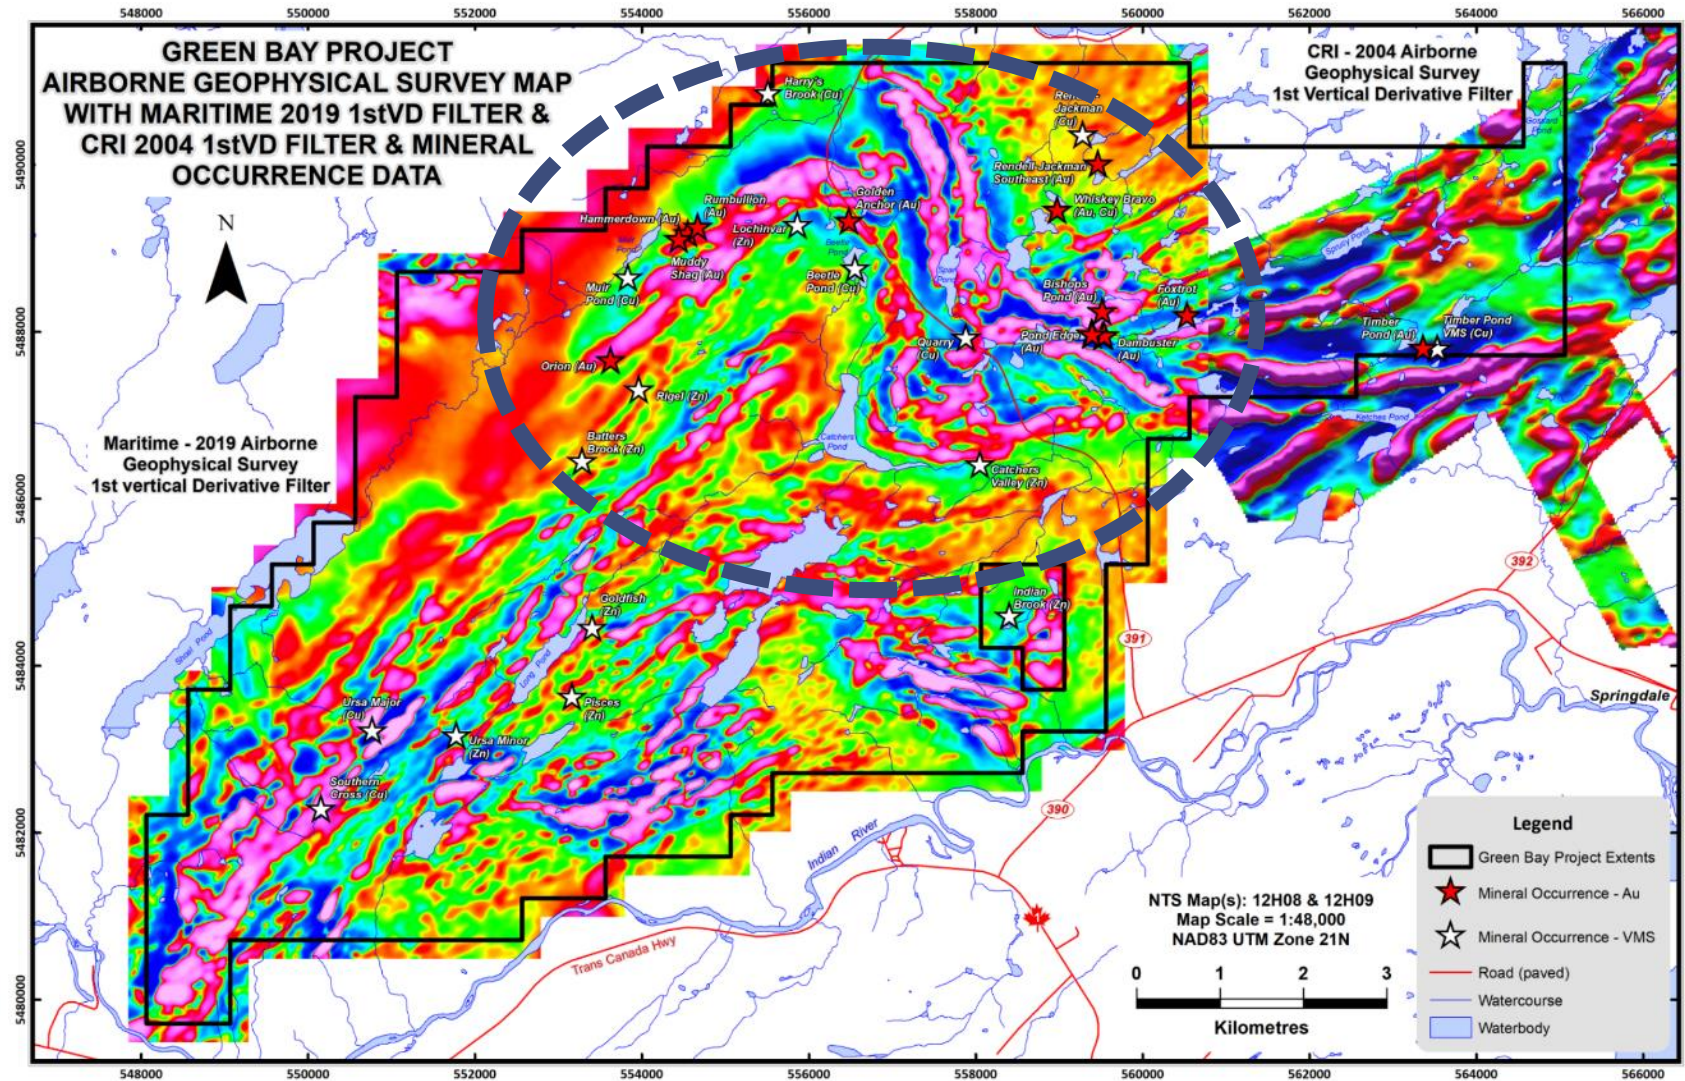

- Underexplored 5 km mineralized trend
- Historically shallow drilling
- Former Hammerdown mine
- Orion satellite deposit
- Lochinvar VMS zone

HAMMERDOWN PROJECT AREA

MARITIME RESOURCES

2019 SURVEY SHOWS POTENTIAL FOR NEW SULPHIDE DEPOSITS (AU & VMS)

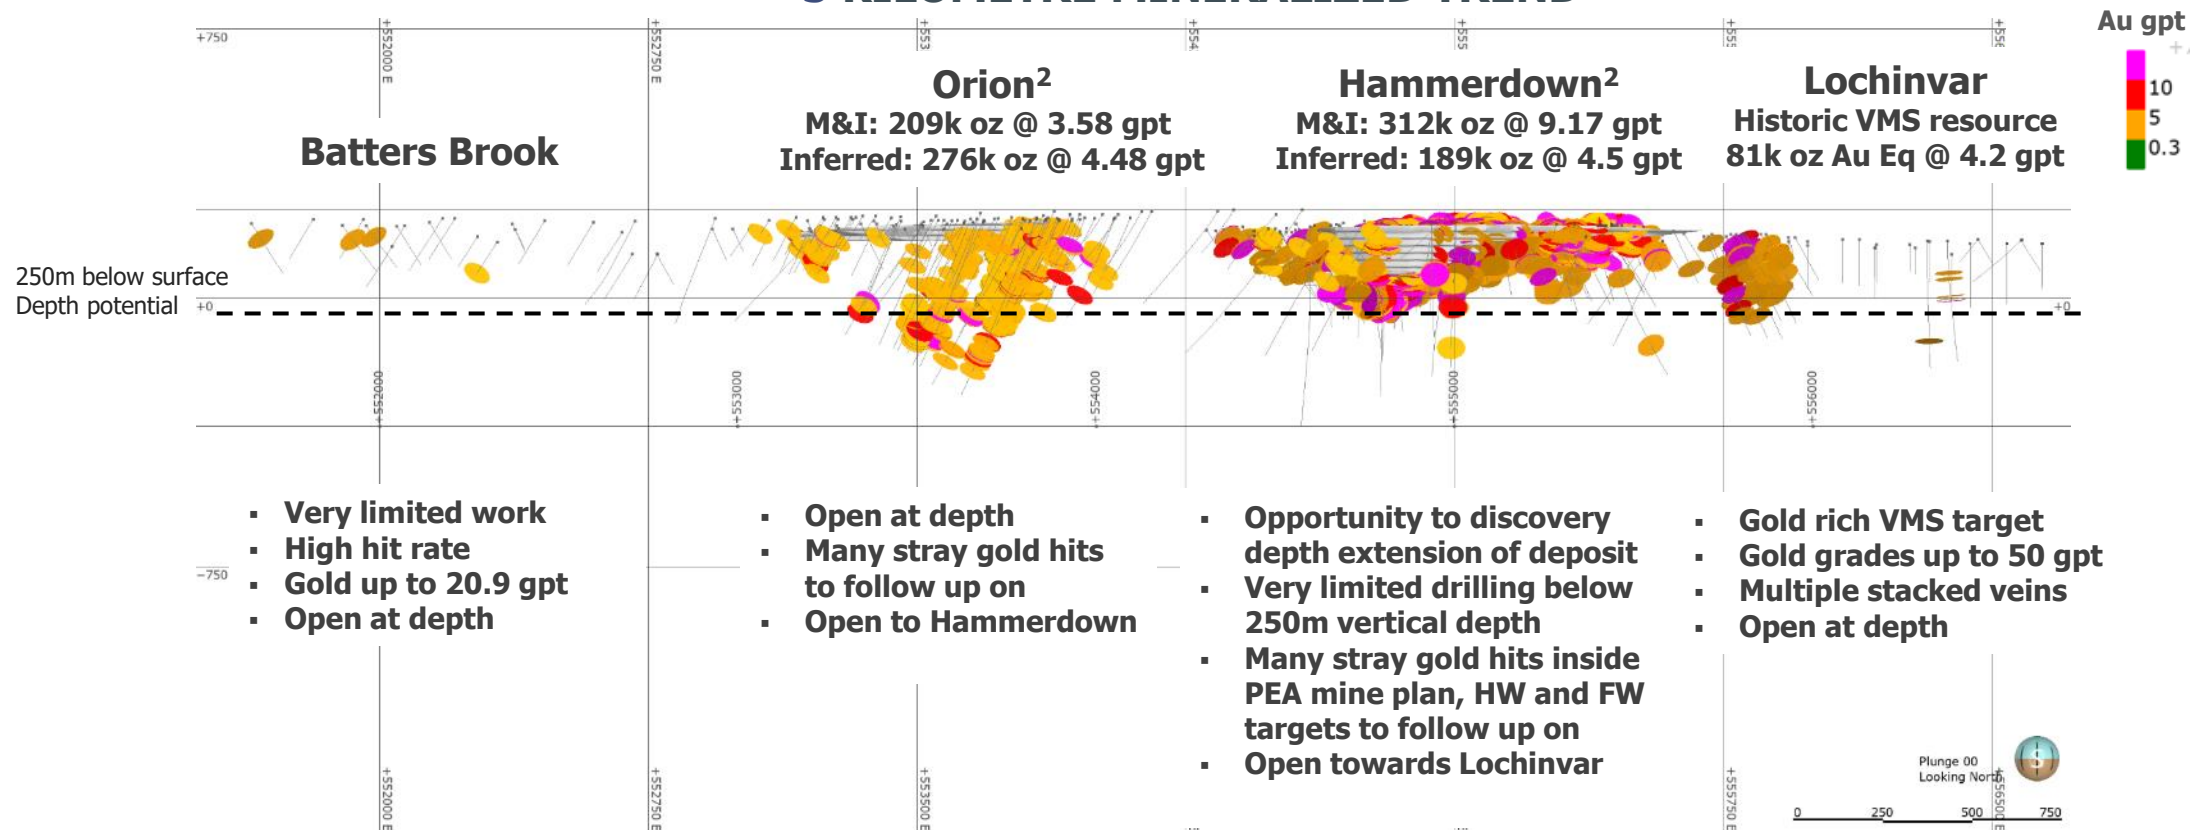

HAMMERDOWN AREA EXPLORATION

MARITIME RESOURCES

- 5 km long trend of high grade gold and gold-rich VMS targets
- Limited exploration below 250 metres historically
- Key deposits and several areas open at depth and along strike

5 KILOMETRE MINERALIZED TREND

HAMMERDOWN – RECENT RESULTS

MARITIME RESOURCES

26.2 gpt Au / 4.0m incl. 96.4 gpt Au / 1.1m at Orion

Hammerdown Gold Deposit

- 9.46 gpt Au and 2.01 gpt Ag over 2.3 m, including 59.43 gpt Au and 45.90 gpt Ag over 0.4 m in drill hole MP-20-140

Orion Gold Deposit

- 26.2 gpt Au over 4.0 m, including 96.43 gpt Au over 1.1 m in newly identified structure in drill hole BB-20-116
- 1.78 gpt Au over 32.2 m, including 5.89 gpt Au over 5.2 m starting 8.0 m below surface in drill hole BB-20-107
- 1.28 gpt Au over 25.8 m, including 3.93 gpt Au over 4.2 m in hole BB-20-99

Lochinvar VMS Zone

- 0.85 gpt Au, 150.9 gpt Ag, 0.73% Cu, 3.33% Pb and 7.62% Zn over 11.6 m, including 0.74 gpt Au, 210.7 gpt Ag, 2.03% Cu, 10.64% Pb and 23.83% Zn over 2.5 m in drill hole GA-20-25

EXPLORATION

WHISKER VALLEY PROJECT

- 200 km² area
- Mineralization identified across 1,000 m
- High grade gold, silver and copper in quartz veins similar to Hammerdown
- Potential Cu-Au porphyry environment

WHISKER VALLEY PROJECT

MARITIME RESOURCES

NEW DISCOVERY 6 KM FROM HAMMERDOWN BETWEEN TWO MAJOR FAULTS

HIGH GRADE MINERALIZATION

MARITIME RESOURCES

INITIAL 5,000 METRE DRILL PROGRAM PLANNED FOR KEY SULPHIDE TARGETS

GARY VEIN SYSTEM

GOLD PIT VEINS

- 75.8 gpt Au, 35.2 gpt Ag, 0.75% Cu

- 37.2 gpt Au, 39.7 gpt Ag, 1.31% Cu

- 19.1 gpt Au, 69.6 gpt Ag, 3.0% Cu

NEW VEINS EXPOSED IN OUTCROP

MARITIME RESOURCES

FLOAT SAMPLE
75.8 gpt Au, 35.2 gpt Ag, 0.75% Cu

GOLD PIT
37.2 gpt Au, 39.7 gpt Ag, 1.3% Cu

WH-20-12 @ 150m depth
5.1 gpt Au / 5.8m incl.
• 21.1 gpt Au / 0.5m and
• 9.2 gpt Au / 2.1m

GARY VEIN – OUTCROP
100.5 gpt Au, 222 gpt Ag, 1.5% Cu

Magnetic High / Low Contact

SIGNIFICANCE OF DRILL HOLE WH-12-20

MARITIME RESOURCES

KEY LOCATION IDENTIFIES POTENTIAL FOR NEW +1,000 m VEIN SYSTEM

- 5.1 gpt Au / 5.8 m including 9.2 gpt Au / 2.1 m and 21.1 gpt Au / 0.5 m @ 150 m vertical depth
- Pyrite / chalcopryite sulphide mineralization in quartz veins - very similar to Hammerdown & Dalradian
- Drilled half way between 1,000 m long strike length between Gary Veins and the Gold Pit

POTENTIAL PORPHYRY SYSTEM?

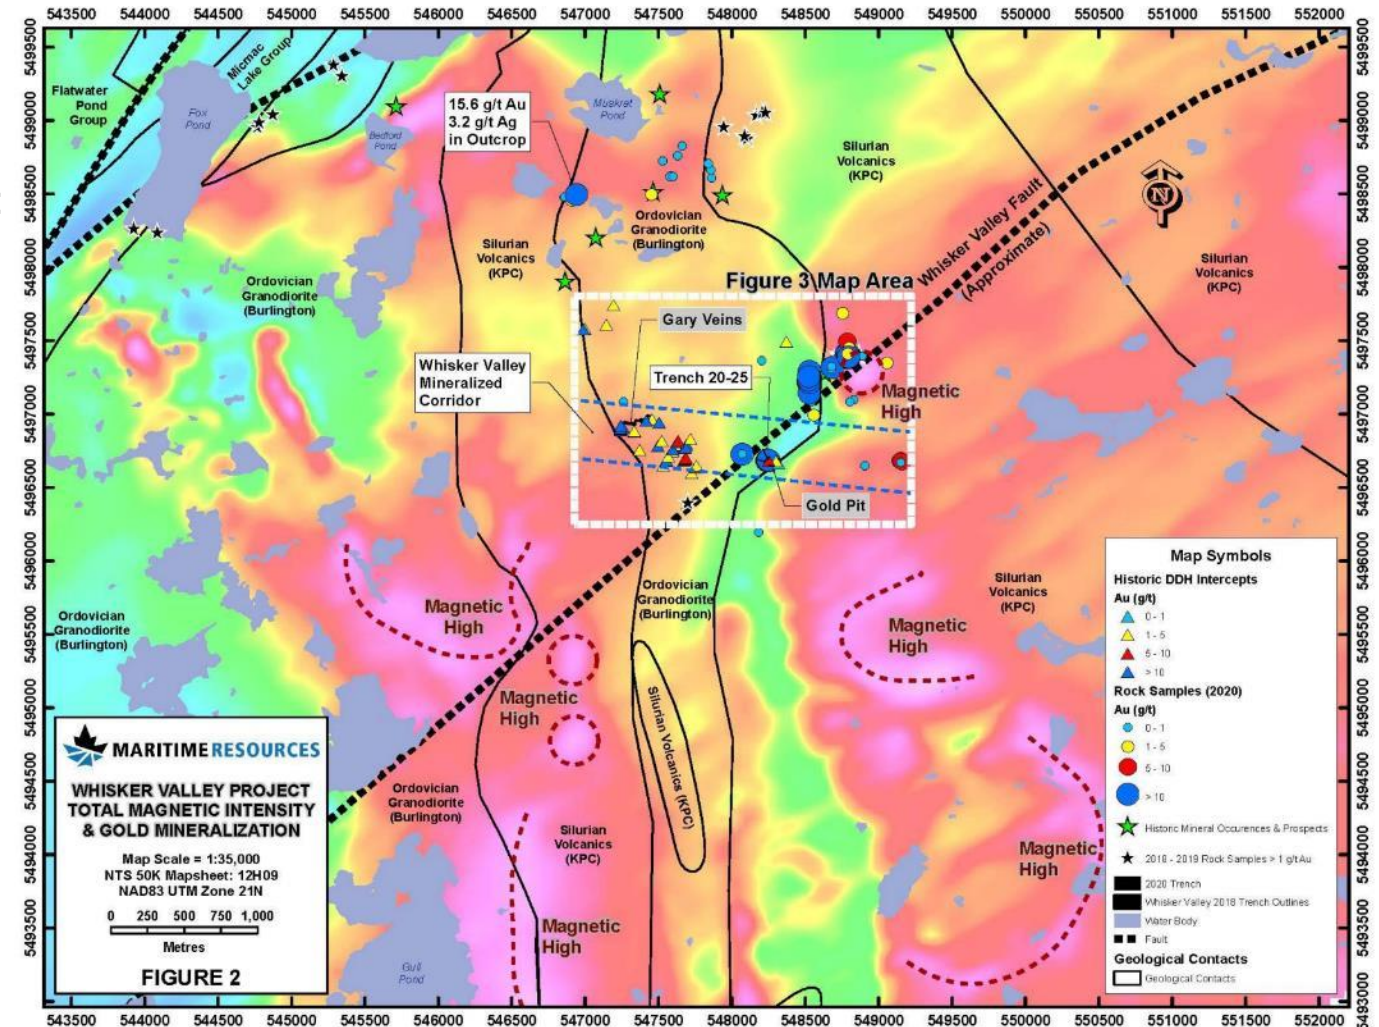

Whisker Valley is a magmatic-hydrothermal Cu-Au target, representing a distinctive opportunity compared to other deposits in the Baie Verte peninsula and regionally (e.g., VMS and orogenic gold).

Mineralization and alteration are distinctive with argillic, phyllic, and propylitic styles of alteration and Au associated with base metal-rich veins. Similarities to magmatic-hydrothermal styles of mineralization (e.g., porphyry Cu-Au).

Next steps

- Soil sampling, trenching, mapping
- Airborne VTEM and ZTEM geophysical surveys
- 5,000 metre diamond drilling program to test key targets along Gary Vein system and new targets from the geophysics surveys

2020 MILESTONES ACHIEVED

MARITIME RESOURCES

- ✓ Positive Preliminary Economic Assessment - Feb. 2020
- ✓ Over \$12M in Equity Financings - May and August 2020
- ✓ Letter of Intent with Rambler Metals & Mining for Nugget Pond gold plant
- ✓ Completed over 20,000 metres of diamond drilling
- ✓ Initiated Project Permitting for Hammerdown

PATH FORWARD

- Drilling and Regional Exploration work throughout 2020 and 2021
- Advancement of Project Permitting - 2021
- Feasibility Study - 2021

SUMMARY

MARITIME RESOURCES

- Well financed Canadian developer / explorer with \$7.6M in working capital and zero debt
- Hammerdown Gold Project - high grade, low capital 70k oz/y starter project with exceptional economics
 - @ **US\$1,650/oz: \$204M NPV_{5%} / 81% IRR after-tax**
 - @ **US\$2,000/oz: \$323M NPV_{5%} / 116% IRR after-tax**
- Newfoundland & Labrador – top tier jurisdiction for mine development and mineral exploration
- Aggressive +20,000 metre exploration program planned at Hammerdown and Whisker Valley to grow resources and discover new mineralization

Note 1. The Hammerdown Gold Project, Newfoundland and Labrador Preliminary Economic Assessment technical report (the “PEA Technical Report”) was filed on SEDAR under the Company's profile on April 15, 2020, in accordance with National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”). The PEA Technical Report is intended to be read as a whole, and sections should not be read or relied upon out of context. A copy of the PEA Technical Report is also available on the Company's website (www.maritimeresourcescorp.com). Larry Pilgrim, P.Geo. Project Manager for Maritime Resources, is the Qualified Person within the meaning of NI 43-101 for the Company and has prepared and approved the technical and scientific content of this news release, and as reviewed and validated that the information in this press release is consistent with that provided by the Qualified Persons responsible for the PEA Technical Report.

*Cautionary Statement: The reader is advised that the PEA Technical Report referenced in this press release is preliminary in nature and is intended to provide only an initial, high-level review of the Project potential and design options. Readers are encouraged to read the PEA Technical Report in its entirety, including all qualifications and assumptions.

The PEA mine plan and economic model include numerous assumptions and the use of Inferred Resources. Inferred Resources are considered to be too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves and to be used in an economic analysis except as allowed for by NI 43-101 in PEA studies. There is no guarantee that the PEA mine plan and economic model will be realized, and that Inferred Resources can be converted to Indicated or Measured Resources. Mineral resources that are not mineral reserves do not have demonstrated economic viability. As such, there is no guarantee the Project economics described herein will be achieved.

2020 RESOURCE ESTIMATE Note 2

Hammerdown and Orion Open Pit Mineral Resource Summary

Resource Classification	Cut-off	Deposit	Tonnes	Gold (g/t)	Gold oz
Measured	1.0 g/t	Hammerdown	284,600	11.75	107,500
Indicated	1.0 g/t	Hammerdown	739,100	8.17	194,100
Measured & Indicated	1.0 g/t	Hammerdown	1,023,700	9.16	301,600
Inferred	1.0 g/t	Hammerdown	538,400	4.89	84,700
Inferred Intervein	1.0 g/t	Hammerdown	321,700	4.18	43,200
Indicated	1.0 g/t	Orion	698,400	2.96	66,400
Inferred	1.0 g/t	Orion	483,400	5.04	78,300
Total Measured	1.0 g/t	Hammerdown & Orion	284,600	11.75	107,500
Total Indicated	1.0 g/t	Hammerdown & Orion	1,437,500	5.64	260,500
Total Measured & Indicated	1.0 g/t	Hammerdown & Orion	1,722,100	6.65	368,000
Total Inferred (incl. Intervein)	1.0 g/t	Hammerdown & Orion	1,343,500	4.77	206,200

Hammerdown and Orion Underground Mineral Resource Summary

Resource Classification	Cut-off	Deposit	Tonnes	Gold (g/t)	Gold oz
Measured	2.0 g/t	Hammerdown	3,800	9.74	1,200
Indicated	2.0 g/t	Hammerdown	30,000	9.36	9,000
Measured & Indicated	2.0 g/t	Hammerdown	33,800	9.41	10,200
Inferred	2.0 g/t	Hammerdown	316,200	4.46	45,300
Inferred Intervein	2.0 g/t	Hammerdown	131,300	3.89	16,400
Indicated	2.0 g/t	Orion	1,118,000	3.97	142,900
Inferred	2.0 g/t	Orion	1,437,900	4.29	198,300
Total Measured	2.0 g/t	Hammerdown & Orion	3,800	9.74	1,200
Total Indicated	2.0 g/t	Hammerdown & Orion	1,148,000	4.11	151,900
Total Measured & Indicated	2.0 g/t	Hammerdown & Orion	1,151,800	4.13	153,000
Total Inferred (incl. Intervein)	2.0 g/t	Hammerdown & Orion	1,885,400	4.29	260,000

The Resource Estimate was prepared by Todd McCracken, P.Geo. of WSP Canada, Sudbury, ON.. Mr. McCracken is a qualified person and independent of the Company, as defined by section 1.5 of NI 43-101. Mineral resources that are not mineral reserves do not have demonstrated economic viability. Mineral resource estimates do not account for mineability, selectivity, mining loss and dilution. These mineral resource estimates include inferred mineral resources that are considered too speculative geologically to have economic considerations applied to them that would enable them to be categorized as mineral reserves. There is also no certainty that these inferred mineral resources will be converted to the measured and indicated categories through further drilling, or into mineral reserves, once economic considerations are applied.

Key Assumptions, Parameters, and Methods related to the Mineral Resource Estimates:

1. Mineral Resources were prepared in accordance with NI 43-101 and the CIM Definition Standards (2014). Mineral Resources that are not mineral reserves do not have demonstrated economic viability.
2. This estimate of Mineral Resources may be materially affected by environmental, permitting, legal, title, taxation, sociopolitical, marketing, or other relevant issues.
3. Open pit Mineral Resources are reported at a cut-off grade of 1.0 g/t gold that is based on a gold price of US\$1,500/oz.
4. Underground Mineral Resources are reports at a cut-off grade of 2.0 g/t gold that is based on a gold price of US\$1,500/oz.
5. Appropriate mining costs, processing costs, metal recoveries, and inter ramp pit slope angles were used to generate the pit shell.
6. Rounding may result in apparent summation differences between tonnes, grade, and contained metal content.
7. Tonnage and grade measurements are in metric units. Contained gold ounces are in troy ounces.
8. Composites completed at 0.5 m down the hole.
9. Contributing assay composites were capped at 125.00 g/t Au at Hammerdown and 23.88 g/t Au at Orion.
10. A specific gravity value of 2.84 was applied to all blocks.
11. Modeling for Hammerdown was performed use in GEOVIA Surpac 2019 software with grades estimated using ordinary kriging (OK) interpolation methodology. Orion modeling was performed using Datamine software with grades estimated using ordinary kriging (OK) interpolation methodology.
12. Blocks are 2.5m x1.0m x 2.5m with no sub-blocks.

The Mineral Resource estimate is based on the combination of geological modeling, geostatistics and conventional block modeling using the Ordinary Krig method of grade interpolation. The geological model including mineralized intercepts was generated by Maritime personnel and then audited by WSP. The QA/QC protocols and corresponding sample preparation and shipment procedures have been reviewed by WSP.

The Hammerdown Mineral Resource estimate was based on 56,533 metres in 468 surface drill holes, 12,551 metres in underground drill holes and 110 surface trenches totaling 298 metres. The Orion Mineral Resource estimates are based on 15,357 metres in 56 surface drill holes.

At a long-term metal price of US\$1,500 per ounce, reasonable prospects are considered to exist for eventual economic extraction of Mineral Resources defined at a 1.0 g/t Au cut-off value within limits of the conceptual final pit shell prepared by AGP. Additional resources are considered to exist for eventual economic extraction of the Mineral Resource as defined at a 2.00 g/t Au cut-off below the conceptual pit shell.

BOARD & ADVISORS

MARITIME RESOURCES

SUCCESSFUL DEVELOPMENT AND PRODUCTION TRACK RECORD

JOHN HAYES, MSc., MBA, P.Geo.
CHAIRMAN & DIRECTOR

- Sr. VP Corp. Development & IR, Pretium Resources
- Former Sr. VP Corporate Development, Osisko Mining
- Former mining analyst for BMO Capital Markets
- 30 years of industry & capital markets experience
