

Completion of the Andy Well and Gnaweeda Project Acquisition from Silver Lake Resources

Latitude Consolidated Limited (ASX: LCD) ("**Latitude**" or "**the Company**") is pleased to announce that it has completed the acquisition of Andy Well and Gnaweeda Gold Projects from Silver Lake Resources as announced to the ASX on the 21st of December 2020.

The projects have a combined 343km² landholding in the prolific Murchison Gold Fields of Western Australia and host a Mineral Resource of 776,000oz gold at a grade of 4.0g/t.

Latitude sees a clear pathway to grow the existing resource base through drilling of high priority near-mine exploration targets and has secured a drilling services contractor to commence exploration drilling in early April 2021.

The Company looks forward to updating the market with regard to exploration activities over the coming months.

This announcement has been authorised for release by the Latitude Board of Directors.

COMPETENT PERSON'S STATEMENT

The information in this release that relates to Mineral Resources was first reported by the Company in its announcement to the ASX on 21st December 2020. The Company is not aware of any new information or data that materially affects the information included in this announcement and that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.

ABOUT LATITUDE CONSOLIDATED

Latitude Consolidate (ASX:LCD) is a junior gold explorer with a portfolio of exploration projects across South Australia and Western Australia.

Latitudes flagship projects are the Andy Well and Gnaweeda Gold Projects that have a combined 343km² landholding in the prolific Murchison Gold Fields of Western Australia and host a Mineral Resource of 776,000oz gold at a grade of 4.0g/t. The company is actively exploring on this tenure while also progressing mining studies to determine the best pathway to production.

ASX Announcement

16th February 2021

The Skye Gold Project in the Gawler Craton in South Australia is located in a region known for plunge-continuous high-grade gold mineralisation such as that seen at nearby Challenger Gold Deposit (1.2Moz past production). The exploration prize in the Gawler Province terrain can be significant, with high-value, high-grade discoveries in the district having a reputation for excellent down-plunge continuity of mineralised shoots.

The Circle Valley project in southern WA sits in the Albany Fraser mobile belt. This belt is also home to the 7Moz Tropicana gold mine. Primary gold mineralisation has been identified in two separate locations at Circle Valley and presents an exciting exploration opportunity for Latitude.
