Disclaimers and Cautionary Statements

This presentation is proprietary to GoviEx Uranium Inc. (the "Company" or "GoviEx") and may not be reproduced, disseminated or referred to, in whole or in part without the prior consent of the Company. The Company assumes no responsibility for verification of the information in these materials, and no representation or warranty is made as to the accuracy or completeness of such information. The Company assumes no obligation to correct or update these materials. These materials do not contain all information that may be required to evaluate, and do not constitute a recommendation with respect to, any transaction or matter. Any recipient of these materials should conduct its own independent analysis of the matters referred to herein. This presentation may contain forward-looking information within the meaning of applicable securities laws. All information and statements other than statements of current or historical facts contained in this presentation are forward-looking information. Such statements and information may be identified by words such as "about", "approximately", "may", "believes", "expects", "will", "intends", "should", "plans", "predicts", "potential", "projects", "anticipates", "estimates", "continues" or similar words or the negative thereof or other comparable terminology. Forward-looking statements are subject to various risks and uncertainties concerning the specific factors disclosed here and elsewhere in the Company's periodic filings with Canadian securities regulators. Information provided in this presentation is necessarily summarized and may not contain all available material information. Forward-looking statements include, without limitation, statements regarding the expected timing of the development and potential advancement to production of the Company's mine-permitted projects in Niger and Zambia as well as advancement of its exploration projects in Mali, the expected continued support from major shareholders of the Company, the support of the mining industry in general by the local governments in the jurisdictions where the Company's projects are located, and the expected increase in demand for uranium coupled with growing decline in uranium supply, and related expectation for a uranium price increase. Forward-looking statements are based on a number of assumptions and estimates that, while considered reasonable by management based on the business and markets in which the Company operates, are inherently subject to significant operational, economic and competitive uncertainties and contingencies. Assumptions upon which forward looking statements are based include an impending depletion of uranium inventories giving rise to increased demand and an increased uranium price, and the long-term fundamentals of the uranium market remaining strong thereafter; the Company's various project resulting in a pipeline of project development; the practice of engaging locals from the jurisdictions where the Company's projects are located resulting in risk mitigation of the subject projects; the Company's major shareholders remaining as shareholders of the Company; the continuation of support of the mining industry in general and the Company's projects in particular by the local governments in the jurisdictions where the Company's projects are located; the Company's ability to optimize its projects so as make them attractive to new investors; the Company's ability to secure the requisite financing; and generally, that the price of uranium will remain sufficiently high and the costs of advancing the Company's projects sufficiently low so as to permit it to implement its business plans in a profitable manner. Important factors that could cause actual events and results to differ materially from the Company's expectations include those related to market fluctuations in prices for uranium; the Company's inability to obtain additional financing, develop its mineral projects or obtain any necessary permits, consents or authorizations required for its activities in the various jurisdictions where the Company operates; the refusal of the Company's partners to support its ongoing operations; as well as the Company's inability to produce minerals from its projects successfully or profitably. In addition, the factors described or referred to in the section entitled "Financial Risks and Management Objectives" in the MD&A for the Company for the year-ended December 31, 2019, available at www.sedar.com, should be reviewed in conjunction with the information found in this presentation. Although the Company has attempted to identify important factors that could cause actual results, performance, or achievements to differ materially from those contained in the forward-looking statements, there can be other factors that cause results, performance or achievements not to be as anticipated, estimated or intended. There can be no assurance that such information will prove to be accurate or that management's expectations or estimates of future developments, circumstances or results will materialize. As a result of these risks and uncertainties, the results or events predicted in these forward-looking statements may differ materially from actual results or events. Accordingly, readers should not place undue reliance on forward-looking statements. The forward-looking statements in this presentation are made as of the date of this presentation, and the Company disclaims any intention or obligation to update or revise such information, except as required by applicable law. Certain scientific and technical information relating to the Madaouela Project contained in this presentation is derived or extracted from the technical report entitled "An Updated Integrated Development Plan for the Madaouela Project, Niger" having an effective date of August 11, 2015 and revision date of August 20, 2015, and prepared for GoviEx by SRK Consulting (the "Report") in accordance with National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101"). Please refer to the full text of the Report, which is available for review under GoviEx's profile on SEDAR at www.sedar.com. Scientific and technical information relating to the Mutanga and Falea properties contained in this presentation is derived or extracted from the technical report entitled, "NI 43-101 Technical Report on a Preliminary Economic Assessment of the Mutanga Uranium Project in Zambia", dated November 30, 2017, prepared by SRK Consulting (UK) Limited for GoviEx Uranium Inc. and the technical report titled, "Technical Report on the Falea Uranium, Silver and Copper Deposit, Mali West Africa", dated October 26, 2015, prepared by Roscoe Postle Associates Inc. for Denison Mines Corp, respectively. Both these technical reports are available for review on GoviEx's website at www.goviex.com. All scientific and technical information in this presentation has been reviewed and approved by Dr. Rob Bowell, a Chartered Chemist of the Royal Society of Chemistry, a Chartered Geologist of the Geological Society of London and Fellow of the Institute of Mining, Metallurgy and Materials who is an independent Qualified Person under the terms of NI 43-101. United States investors are cautioned that the requirements and terminology of NI 43-101 and the CIM Standards on Mineral Resources and Reserves – Definitions and Guideline ("CIM Standards") differ significantly from the requirements and terminology of the United States Securities and Exchange Commission ("SEC") set forth in the SEC's Industry Guide 7 ("SEC Industry Guide 7"). Accordingly, the Company's disclosures regarding mineralization may not be comparable to similar information disclosed by companies subject to SEC Industry Guide 7. Without limiting the foregoing, while the terms "mineral resources", "inferred mineral resources", "indicated mineral resources" and "measured mineral resources" are recognized and required by NI 43-101 and the CIM Standards, they are not recognized by the SEC and are not permitted to be used in documents filed with the SEC by companies subject to SEC Industry Guide 7. In addition, the NI 43-101 and CIM Standards definition of a "reserve" differs from the definition in SEC Industry Guide 7. This presentation and the disclosure contained herein is not and does not constitute an offer to sell or the solicitation of an offer to buy securities of GoviEx.

A Growing Africa-Focused Uranium Company

- ✓ Large U_3O_8 Mineral Resources¹ with >60% in measured and indicated category.
- ✓ Exploration potential with several drill ready targets.
- ✓ Development-focused team.
- ✓ Two mining-licensed projects:
 - ✓ Flagship Madaouela Project (Niger) and Mutanga Project (Zambia).
- ✓ Strong development pipeline for future production and resource growth.
- ✓ Focused on development of Madaouela.
 - ✓ Optimisation of opex and capex.
 - ✓ Debt and offtake.

Project Locations in Africa

- ✓ Diversified mining jurisdictions.
- ✓ Niger 60-70% annual exports U_3O_8 - providing 5% of world's mining output from Africa's highest grade uranium ore.
- ✓ Niger's first commercial uranium mine has produced $\pm 140,000tU$, since 1971. Further expansion of uranium mining has received strong governmental support.
- ✓ OHADA and ECOWAS cover Mali and Niger.
- ✓ Zambia seeking to diversify mining industry.
- ✓ Mali Africa's 4th largest gold producer.

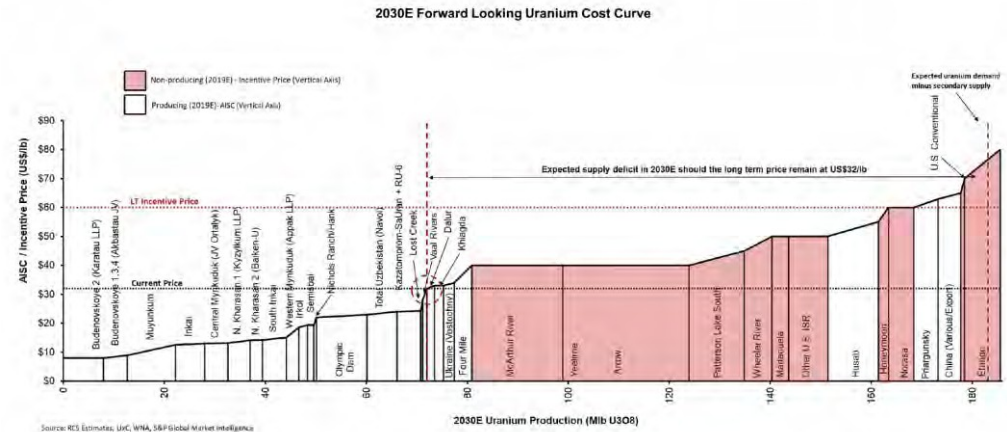

Resources ¹	Tonnes	Grade	U_3O_8 Contained	U_3O_8 Eq ² Contained
Total	Mt	% U_3O_8	Mlbs	Mlbs
Measured	17.66	0.093%	36.2	36.2
Indicated	47.83	0.102%	107.3	111.9
Inferred	92.84	0.042%	86.0	88.7

U₃O₈ Market Moves to Increased Deficit

2018-2040 Uranium Supply & Demand
(WNA Reference Scenario, mln lbs. U₃O₈)

Nuclear Demand Needs Additional Supply

- ✓ 2020 forecast supply deficit has increased due to Covid related mine closures – Canada, Kazakhstan and Namibia.
- ✓ 2022 uncovered demand is ±17Mlb (9% global demand), but 37% of USA demand uncovered.
- ✓ 2022 supply deficit forecast at ± 31Mlb U3O8.
- ✓ Inventories in decline increased as producers forced to buy spot material to cover contract commitments.
- ✓ New supply requires increase uranium prices to support re-starts or development.

GoviEx Proposed Development Strategy

	PEA	Pre-feasibility	Mining Permit	Definitive Feasibility	Development	Production
Madaouela	✓	✓	✓	2021	2022-2023	2024
Mutanga	✓	N/A ¹	✓	2023	2024-2025	2026

Falea: Strategy under review given precious metal exploration

Madaouela Project, Niger (GXU 80%)

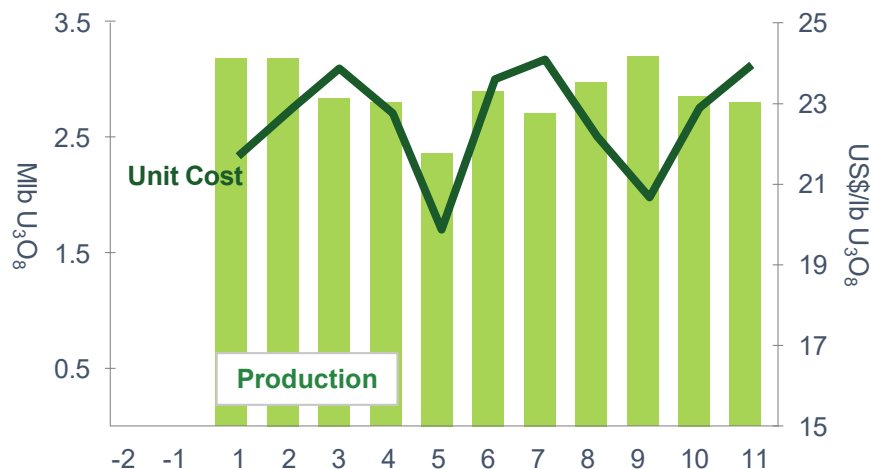

- ✓ Located ~10 km south of Orano's mining operations at Cominak (due to close March 2021) and Somaïr, in north-central Niger.
- ✓ Infrastructure: road access, skilled mine labour, groundwater and grid power.
- ✓ Sandstone hosted deposits in Tim Mersoï Basin.
- ✓ Probable mineral reserves¹ are 60.54 Mlbs U₃O₈.
- ✓ Environmental Permit approved July 2015.
- ✓ Madaouela I Mine Permit approved January 2016.
- ✓ Integrated Development Plan updated August 2015.

Madaouela Project, Niger (GXU 80%)

Project Parameters

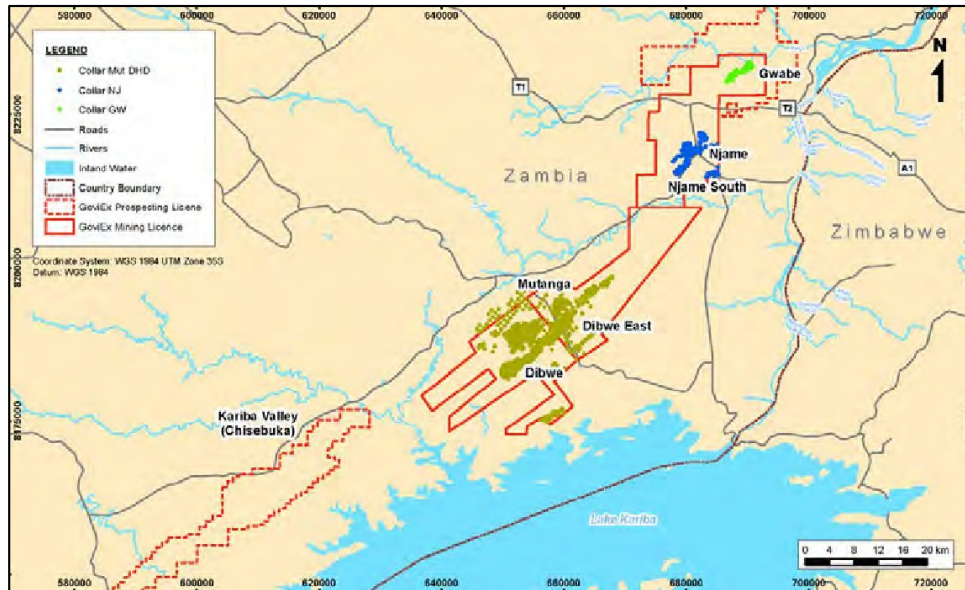

Initial Mine Life	21 years
Pre-production Capital	US\$359 million
Operating Cost²	US\$24.5/lb U ₃ O ₈
Total LoM cost (Opex and Capex)²	US\$36.4/lb U ₃ O ₈
Breakeven U₃O₈ price on NPV_{8%}	US\$48/lb U ₃ O ₈
Steady-state Production	2.69 Mlbs U ₃ O ₈
Uranium Recovery	93.7%

- ✓ Feasibility study commenced with SGS & SRK.
 - ✓ Initial stage focused on optimization of operating and capital costs and reducing technical risk.
 - ✓ Open Pit mine converting to Underground.
- ✓ Appointed project finance debt advisors. Expressions of Interest received from Export Credit Agencies and commercial banks.
- ✓ Initial offtake discussions with a focus on contracts to cover the debt period.
- ✓ Madaouela Mining Company held:
 - ✓ Republic of Niger: 10% free carried plus 10% for US\$14.5 million.
 - ✓ GoviEx: 80%

Mutanga ¹	Tonnes	Grade	U ₃ O ₈ Contained
	Mt	% U ₃ O ₈	Mlbs
Measured	11.8	0.12%	31.4
Indicated	25	0.14%	79.4
Inferred	9.5	0.13%	27.7

Mutanga Project, Zambia (GXU 100%)

- ✓ Located ~200 km south of Lusaka, north of Lake Kariba.
- ✓ Uranium deposits hosted within sandstones of the Escarpment Grit Formation of the Karoo Super Group.
- ✓ Three contiguous Mining Permits, and two prospecting licenses, for a total strike length of approximately 140 km.
- ✓ Infrastructure includes: road access via 39 km gravel road, ground water and available grid power (~60 km away).

Dibwe East Deposit

Mutanga Project, Zambia (GXU 100%)

Project Parameters

Initial Mine Life	11 years
Pre-production Capital	US\$121 million
Operating Cost²	US\$31.1/lb U ₃ O ₈
Total LoM cost (Opex and Capex)²	US\$37.9/lb U ₃ O ₈
Breakeven U₃O₈ price on NPV_{8%}	US\$46/lb U ₃ O ₈
Steady-state Production	2.60 Mlbs U ₃ O ₈
Uranium Recovery	88 %

- ✓ Preliminary Economic Assessment (PEA) completed November 2017.
- ✓ Exploration upside with drill targets identified, and limited work to date undertaken on two prospecting licenses.
- ✓ Project planned to be open pit mining and heap leaching.
- ✓ Benefits from low stripping ratio (3.4:1) and low H₂SO₄ acid consumption (3-9kg/tonne ore).

Mutanga ¹	Tonnes	Grade	U ₃ O ₈ Contained
	Mt	% U ₃ O ₈	Mlbs
Measured	5.9	0.04%	4.8
Indicated	15.7	0.03%	10.4
Inferred	74.6	0.03%	44.9

The PEA is considered preliminary in nature and includes Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves. Mineral Resources that are not Mineral Reserves have not yet demonstrated economic viability. Due to the uncertainty that may be attached to Inferred Mineral Resources, it cannot be assumed that all or any part of an Inferred Mineral Resource will be upgraded to an Indicated or Measured Mineral Resource as a result of continued exploration or Mineral Reserves once economic considerations are applied; therefore, there is no certainty that the production profile concluded in the PEA will be realized.

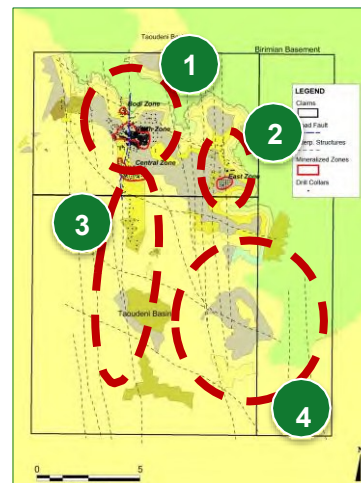

Falea Project, Mali (GXU 100%)

- ✓ Located within the Falea – North Guinea-Senegal Neoproterozoic Basin, ~80 km from Areva's Saraya East uranium deposit.
- ✓ In addition, Falea contains 63 Mlbs copper and 21 Moz silver (Indicated and Inferred Resources).
- ✓ Considerable technical and environmental work completed to date.

NI 43-101 Resources⁽¹⁾

Falea (0.03% cut-off)	Tonnes	Grade	Contained	U ₃ O ₈ Eq Contained ²
	Mt	% U ₃ O ₈	Mlbs	Mlbs

Inferred	8.8	0.069%	13.4	16.1

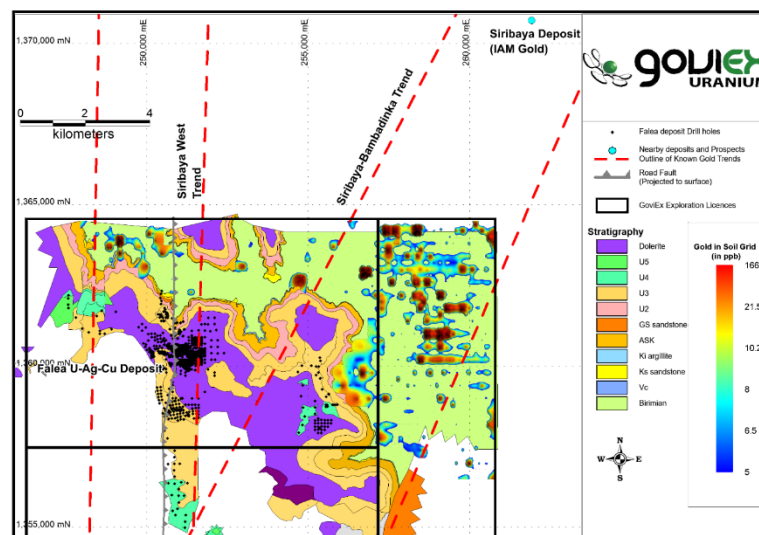

Regional Gold Trends

Uranium Geology Potential

- 1 Extensions to existing resources
- 2 Further exploration of East Zone
- 3 Southern extension of Road Fault
- 4 Exploration in areas of shallower cover sediments

Gold Soil Sampling Results

Experienced Board and Technical Management Team

Executive Team

Govind Friedland (Executive Chairman and Director)

Geological engineer with a technical and business development background. Co-founder of Ivanhoe Industries, the parent company of I-Pulse Inc., a hi-tech company providing innovative solutions for mining, oil & gas, and advanced manufacturing sectors.

Daniel Major (Chief Executive Officer and Director)

Mining engineer with 30 years experience in the mining industry for both underground and open pit operations, covering multiple commodities, including as a mining analyst with HSBC Plc and JP Morgan Chase & Co.

Jerome Randabel (Chief Geologist)

Geologist with over 25 years experience, with the last 15 years specialising in the exploration and development of uranium deposits. Worked on projects in Australia, Botswana, Kazakhstan, Kyrgyzstan and the US.

Rob Howell (Technical Advisor)

Geochemist with 27 years experience. Background in applied geology in tropical and deeply weathered terrain's and mining consulting in the fields of due diligence, financial and technical audits, process chemistry, environmental geochemistry, environmental engineering and mineralogy. Specialization in uranium, copper and REE deposits.

Non-Executive Team - Directors

Benoit LaSalle

Mr. La Salle, a Fellow Chartered Accountant is a respected mining executive founder of gold producer SEMAFO Inc, and now CEO of Windiga Energy Inc. and has additional chairman roles including Chairman of Canadian Council of Africa since 2012.

David Cates

Mr. Cates is a Director of Denison Mines Corp. and is also President and CEO of both Denison Mines Corp. and Uranium Participation Corporation. Chartered Professional Accountant.

Christopher Wallace

Mr. Wallace has more than 35 years of banking and corporate finance experience. He is a Managing Director of CCC Investment Banking and previously served as the Managing Partner of Second City Capital Corporation, a private equity and mezzanine loan fund.

Matthew Lechtzier

Mr. Lechtzier is a qualified lawyer and has acted as project manager and senior advisor for over 80 public and private offerings. For nearly two decades, Mr. Lechtzier has served as Senior Vice President of Ivanhoe Capital Corporation. Previously a Director of Equity Capital Markets with Jardine Fleming Securities (now part of JP Morgan Chase & Co.) in Hong Kong,

Robert Hanson

Robert Hanson is the Chairman of Hanson Family Holdings. He served with NM Rothschild & Sons in London, Hong Kong, Chile and Spain before joining Hanson Plc. currently the Chairman of Hanson Capital Investments Ltd., Sinojie Hanson and Hanson Family Holdings Ltd. (formerly Hanson Transport Group Limited), and Co Chairman and Managing Partner of Millennium Hanson Advisors.

Investment Rationale

Experienced directors and management team.

A growing Africa-focused uranium company with a defined project development pipeline and increased jurisdictional diversification.

One of the largest combined uranium Mineral Resource bases amongst its peer group – with combined Measured Resources of 36.2 Mlbs U_3O_8 , Indicated Resources of 107.3 Mlbs U_3O_8 , and Inferred Resources of 86 Mlbs U_3O_8 estimated in accordance with NI 43-101.¹

Considerable exploration potential with several drill-ready targets defined at each property.

Mining permits granted in Niger and Zambia – mining countries recognized for good infrastructure and mining history.

Significant metallurgical testwork and engineering studies completed on its development assets providing GoviEx with an opportunity to build a strong development pipeline.

MSEE	Inferred	1.45	1.64	2,373	5.23
La Banane	Indicated	1.57	1.64	2,589	5.71
	Inferred	1.15	1.18	1,358	2.99
Total Measured		11.76	1.21	14,232	31.37
Total Indicated		25.25	1.43	36,007	79.39
Total Inferred		9.46	1.33	12,556	27.66

Appendix B

Notes on tonnes and grade associated with Madaouela Mineral Resources as at November 13, 2017

The Company's mineral resources as at November 13, 2017 are classified in accordance with the Canadian Institute of Mining, Metallurgy and Petroleum's "CIM Definition Standards - For Mineral Resources and Mineral Reserves" in accordance with the requirements of National Instrument 43-101 "Standards of Disclosure for Mineral Projects" (the Instrument). Mineral reserve and mineral resource estimates reflect the Company's reasonable expectation that all necessary permits and approvals will be obtained and maintained.

Mineral resources that are not mineral reserves do not have to demonstrate economic viability. Mineral resources are subject to infill drilling, permitting, mine planning, mining dilution and recovery losses, among other things, to be converted into mineral reserves. Due to the uncertainty associated with Inferred mineral resources, it cannot be assumed that all or any part of an Inferred mineral resource will ever be upgraded to Indicated or Measured Mineral Resources, including as a result of continued exploration.

The Mineral Resource Statement was prepared by John Arthur, FGS, CGeol (CP) and Peter Gleeson FAusIMM (CP) of SRK Consulting (UK) Ltd, both are Qualified Persons as defined by the CIM Code.

Appendix C

Notes on Madaouela Probable Mineral Reserves as at May 20, 2015

Deposit	Cut-Off Grade eU (kg/t)	RoM	Uranium Metal		Uranium Oxide	
		Tons (Mt)	Grade eU (kg/t)	eU ₃ O ₈ (t)	Grade eU ₃ O ₈ (kg/t)	Contained eU ₃ O ₈ (t)
Marianne-Marylin (M&M)*						
Probable	0.48	14.1	0.79	11,164	0.93	13,165
MSNE-Maryvonne*						
Probable	0.48	7.8	0.76	5,938	0.89	7,002
Total Underground (Probable)	0.48	21.9	0.78	17,102	0.92	20,167
Miriam Open Pit**						
Probable	0.4	7.5	0.82	6,192	0.97	7,302

* Underground Mineral Reserves for Marianne-Marilyn (M&M) and MSNE-Maryvonne are reported at a cut-off grade of 0.48 kg/t eU. Cut-off grades are based on a price of USD 70 /lb of U₃O₈ (USD 154 /kg U₃O₈) and uranium recoveries of 83.0 %, without considering revenues from other metals. Note Mineral Reserves include both Measured and Indicated Resources.

**Open Pit Mineral Reserves are reported within the MAD I licence and within a designed pit shell at a cut-off grade of 0.4 kg/t eU. Cut-off grades are based on a price of USD 70 /lb of U₃O₈ (USD 154 /kg U₃O₈) and uranium recoveries of 83%, without considering revenues from other metals. Mining modifying factors are 2% ore loss and 5% dilution at 0 kg/t grade. Note Mineral Reserves include both Measured and Indicated Resources.

The Company's mineral reserves as at May 20, 2015 are classified in accordance with the Canadian Institute of Mining, Metallurgy and Petroleum's "CIM Definition Standards - For Mineral Resources and Mineral Reserves" in accordance with the requirements of National Instrument 43-101 "Standards of Disclosure for Mineral Projects" (the Instrument). Mineral reserve and mineral resource estimates reflect the company's reasonable expectation that all necessary permits and approvals will be obtained and maintained.

SRK's Mineral Reserve Statement for M&M and MSNE-Maryvonne as at May 20, 2015, was prepared under the direction of Tim McGurk FIMMM who is a Qualified Person as defined by the CIM Code. SRK's Mineral Reserve Statement for Miriam as at May 20, 2015, was prepared under the direction of Rick Skelton MIMMM who is a Qualified Person as defined by the CIM Code.

Appendix D

Notes on Falea Mineral Resources as at October 26, 2015

Category	Tonnes	U ₃ O ₈	Cu	Ag	U ₃ O ₈	Cu	Ag
	(MT)	(%)	(%)	(g/t)	(Mlbs)	(Mlbs)	(Moz)
Indicated	6.88	0.115	0.161	72.8	17.4	24.4	16.11
Inferred	8.78	0.069	0.200	17.3	13.4	38.7	4.9

The Company's mineral resources as at October 26, 2015 are classified in accordance with the Canadian Institute of Mining, Metallurgy and Petroleum's "CIM Definition Standards - For Mineral Resources and Mineral Reserves" in accordance with the requirements of National Instrument 43-101 "Standards of Disclosure for Mineral Projects" (the Instrument). Mineral reserve and mineral resource estimates reflect the company's reasonable expectation that all necessary permits and approvals will be obtained and maintained.

Mineral resources that are not mineral reserves do not have to demonstrate economic viability. Mineral resources are subject to infill drilling, permitting, mine planning, mining dilution and recovery losses, among other things, to be converted into mineral reserves. Due to the uncertainty associated with inferred mineral resources, it cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to indicated or measured mineral resources, including as a result of continued exploration.

The Mineral Resource Statement was prepared Mark Mathisen, C.P.G., Senior Geologist, of Roscoe Postle Associates Inc., who is a Qualified Persons as defined by the CIM Code.

Source: Technical Report titled "Technical Report on the Falea Uranium, Silver and Copper Deposit, Mali, West Africa" prepared by Roscoe Postle Associates Inc. for Denison Mines Corp., October 26, 2015.

Notes:

1. CIM definitions followed for classification of Mineral Resources.
2. Reported above a cut-off grade of 0.03% U₃O₈, based on a uranium price of US\$75/lb.
3. Bulk density is 2.65 t/m³.
4. Numbers may not add due to rounding.

Appendix E

Mutanga Mineral Resource Estimate¹ – November 20, 2017

Deposit	Category	Tonnes (Mt)	U ₃ O ₈ Grade (ppm)	U ₃ O ₈ Mlb
Mutanga ²	Measured	1.9	481	2.0
	Indicated	8.4	314	5.8
	Inferred	7.2	206	3.3
Dibwe ²	Inferred	17.0	239	9.0
Dibwe East ²	Inferred	43.1	304	28.9
Gwabe ³	Measured	1.3	237	0.7
	Indicated	3.6	313	2.5
	Inferred	0.7	178	0.3
Njame ³	Measured	2.7	350	2.1
	Indicated	3.7	252	2.1
	Inferred	2.1	225	1.1
Njame South ³	Inferred	4.4	250	2.4
Sub-total Measured		5.9	366	4.8
Sub-total Indicated		15.7	299	10.4
Measured and Indicated		21.6	317.5	15.1
Inferred		74.6	273.0	44.9

¹ Mineral Resources have not been constrained by pit shells; however, almost all of the mineralization occurs within 125 metres of surface with uranium grades which are, in general, considered to have reasonable prospects for eventual economic extraction by open pit mining.

² The cut-off grade used for reporting the Mineral Resource is 100 ppm U₃O₈, which is applied directly to block model cells.

³ No U₃O₈ ppm cut-off is applied to block model cells for reporting the Mineral Resource. However, the outer limits block model was constrained within a 100 ppm U₃O₈ wireframe used for geological modelling.

The PEA is considered preliminary in nature and includes Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves. Mineral Resources that are not Mineral Reserves have not yet demonstrated economic viability. Due to the uncertainty that may be attached to Inferred Mineral Resources, it cannot be assumed that all or any part of an Inferred Mineral Resource will be upgraded to an Indicated or Measured Mineral Resource as a result of continued exploration or Mineral Reserves once economic considerations are applied; therefore, there is no certainty that the production profile concluded in the PEA will be realized.
