Creation of a Growing Precious Metals Producer in Mexico

Investors Presentation

January 2021

San Francisco Mine

Disclaimers

The information contained in this presentation is provided by Magna Gold Corp. ("Magna" or the "Company") for informational purposes only. The information contained herein is not investment advice and is not intended to be used as the basis for making an investment decision. The views and opinions provided in this presentation reflect those of the individual presenters and are provided for information purposes only. The presentation has been prepared without taking into account the investment objectives, financial situation or particular needs of any particular person. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. To the maximum extent permitted by law, none of Magna nor its directors, officers, employees or agents, nor any other person accepts any liability, including, without limitation, any liability arising out of fault or negligence, for any loss arising from the use of the information contained in this presentation.

This presentation does not constitute an offer to sell or the solicitation of an offer to buy securities in the United States or in any other jurisdiction in which such an offer or solicitation would be unlawful.

Forward-Looking Statements

This presentation contains certain "forward-looking statements" or "forward-looking information" within the meaning of applicable securities laws (collectively, "forward-looking statements"). Forward-looking statements include estimates and statements that describe the Company's future plans, objectives or goals, including words to the effect that the Company or management expects a stated condition or result to occur. Forward-looking statements may be identified by such terms as "believes", "anticipates", "expects", "estimates", "may", "could", "would", "will" or "plan". Since forward-looking statements are based on assumptions and address future events and conditions, by their very nature they involve inherent risks and uncertainties. Although these statements are based on information currently available to the Company, the Company provides no assurance that actual results will meet management's expectations. Risks, uncertainties and other factors involved with forward-looking statements could cause actual events, results, performance, prospects and opportunities to differ materially from those expressed or implied by such forward-looking statements. Forward looking statements in this presentation include, but are not limited to, statements about timing of technical studies and the results of pilot projects and operations, the Company's objectives, goals or future plans, exploration results, potential mineralization, the estimation of mineral reserves and resources, exploration and mine development plans, timing of the commencement of operations and estimates of market conditions. Factors that could cause actual results to differ materially from such forward-looking statements include, but are not limited to, failure to identify mineral resources, failure to convert estimated mineral resources to reserves, the inability to complete a feasibility study which recommends a production decision, the preliminary nature of metallurgical test results, delays in obtaining or failures to obtain required governmental, environmental or other project approvals, political risks, inability to fulfill the duty to accommodate indigenous peoples, uncertainties relating to the availability and costs of financing needed in the future, changes in equity markets, inflation, changes in exchange rates, fluctuations in commodity prices, delays in the development of projects, capital and operating costs varying significantly from estimates and the other risks involved in the mineral exploration and development industry, and those risks set out in the Company's public documents filed on SEDAR. Although the Company believes that the assumptions and factors used in preparing the forward-looking statements in this presentation are reasonable, undue reliance should not be placed on such statements, which only apply as of the date of this presentation, and no assurance can be given that such events will occur in the disclosed time frames or at all. The Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, other than as required by law.

Non-IFRS Measures

The Company has included certain terms or performance measures commonly used in the mining industry that are not defined under International Financial Reporting Standards ("IFRS") in this presentation. These include: cash cost per ounce sold and all in sustaining cost ("AISC") per ounce sold. Non-IFRS measures do not have any standardized meaning prescribed under IFRS, and therefore, they may not be comparable to similar measures employed by other companies. The data presented is intended to provide additional information and should not be considered in isolation or as a substitute for measures prepared in accordance with IFRS and should be read in conjunction with the Company's consolidated financial statements. Readers should refer to the Company's Management's Discussion and Analysis under the heading "Non-GAAP Measures" for a more detailed discussion of how such measures are calculated.

Mineral Reserve and Resource Estimates

In accordance with applicable Canadian securities regulatory requirements, all mineral reserve and mineral resource estimates of the Company disclosed in this presentation have been prepared in accordance with National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101"), classified in accordance with Canadian Institute of Mining, Metallurgy and Petroleum's "CIM Definition Standards on Mineral Resources and Mineral Reserves", adopted by the CIM Council, as may be amended from time to time (the "CIM Standards").

Pursuant to the CIM Standards, mineral resources have a higher degree of uncertainty than mineral reserves as to their existence as well as their economic and legal feasibility. Inferred mineral resources, when compared with measured or indicated mineral resources, have the least certainty as to their existence, and it is reasonably expected that the majority of inferred mineral resources could be upgraded to indicated mineral resources with continued exploration. Pursuant to NI 43-101, inferred mineral resources may not form the basis of any economic analysis, including any feasibility study. Accordingly, readers are cautioned not to assume that all or any part of an inferred mineral resource exists, will ever be converted into a mineral reserve, or is or will ever be economically or legally mineable or recovered. The definitions under NI 43-101 and the CIM Standards differ from the definitions in Guide 7 of the U.S. Securities and Exchange Commission. Accordingly, information regarding mineral deposits may not be comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements under the United States securities laws and the policies and regulations thereunder.

Qualified Person

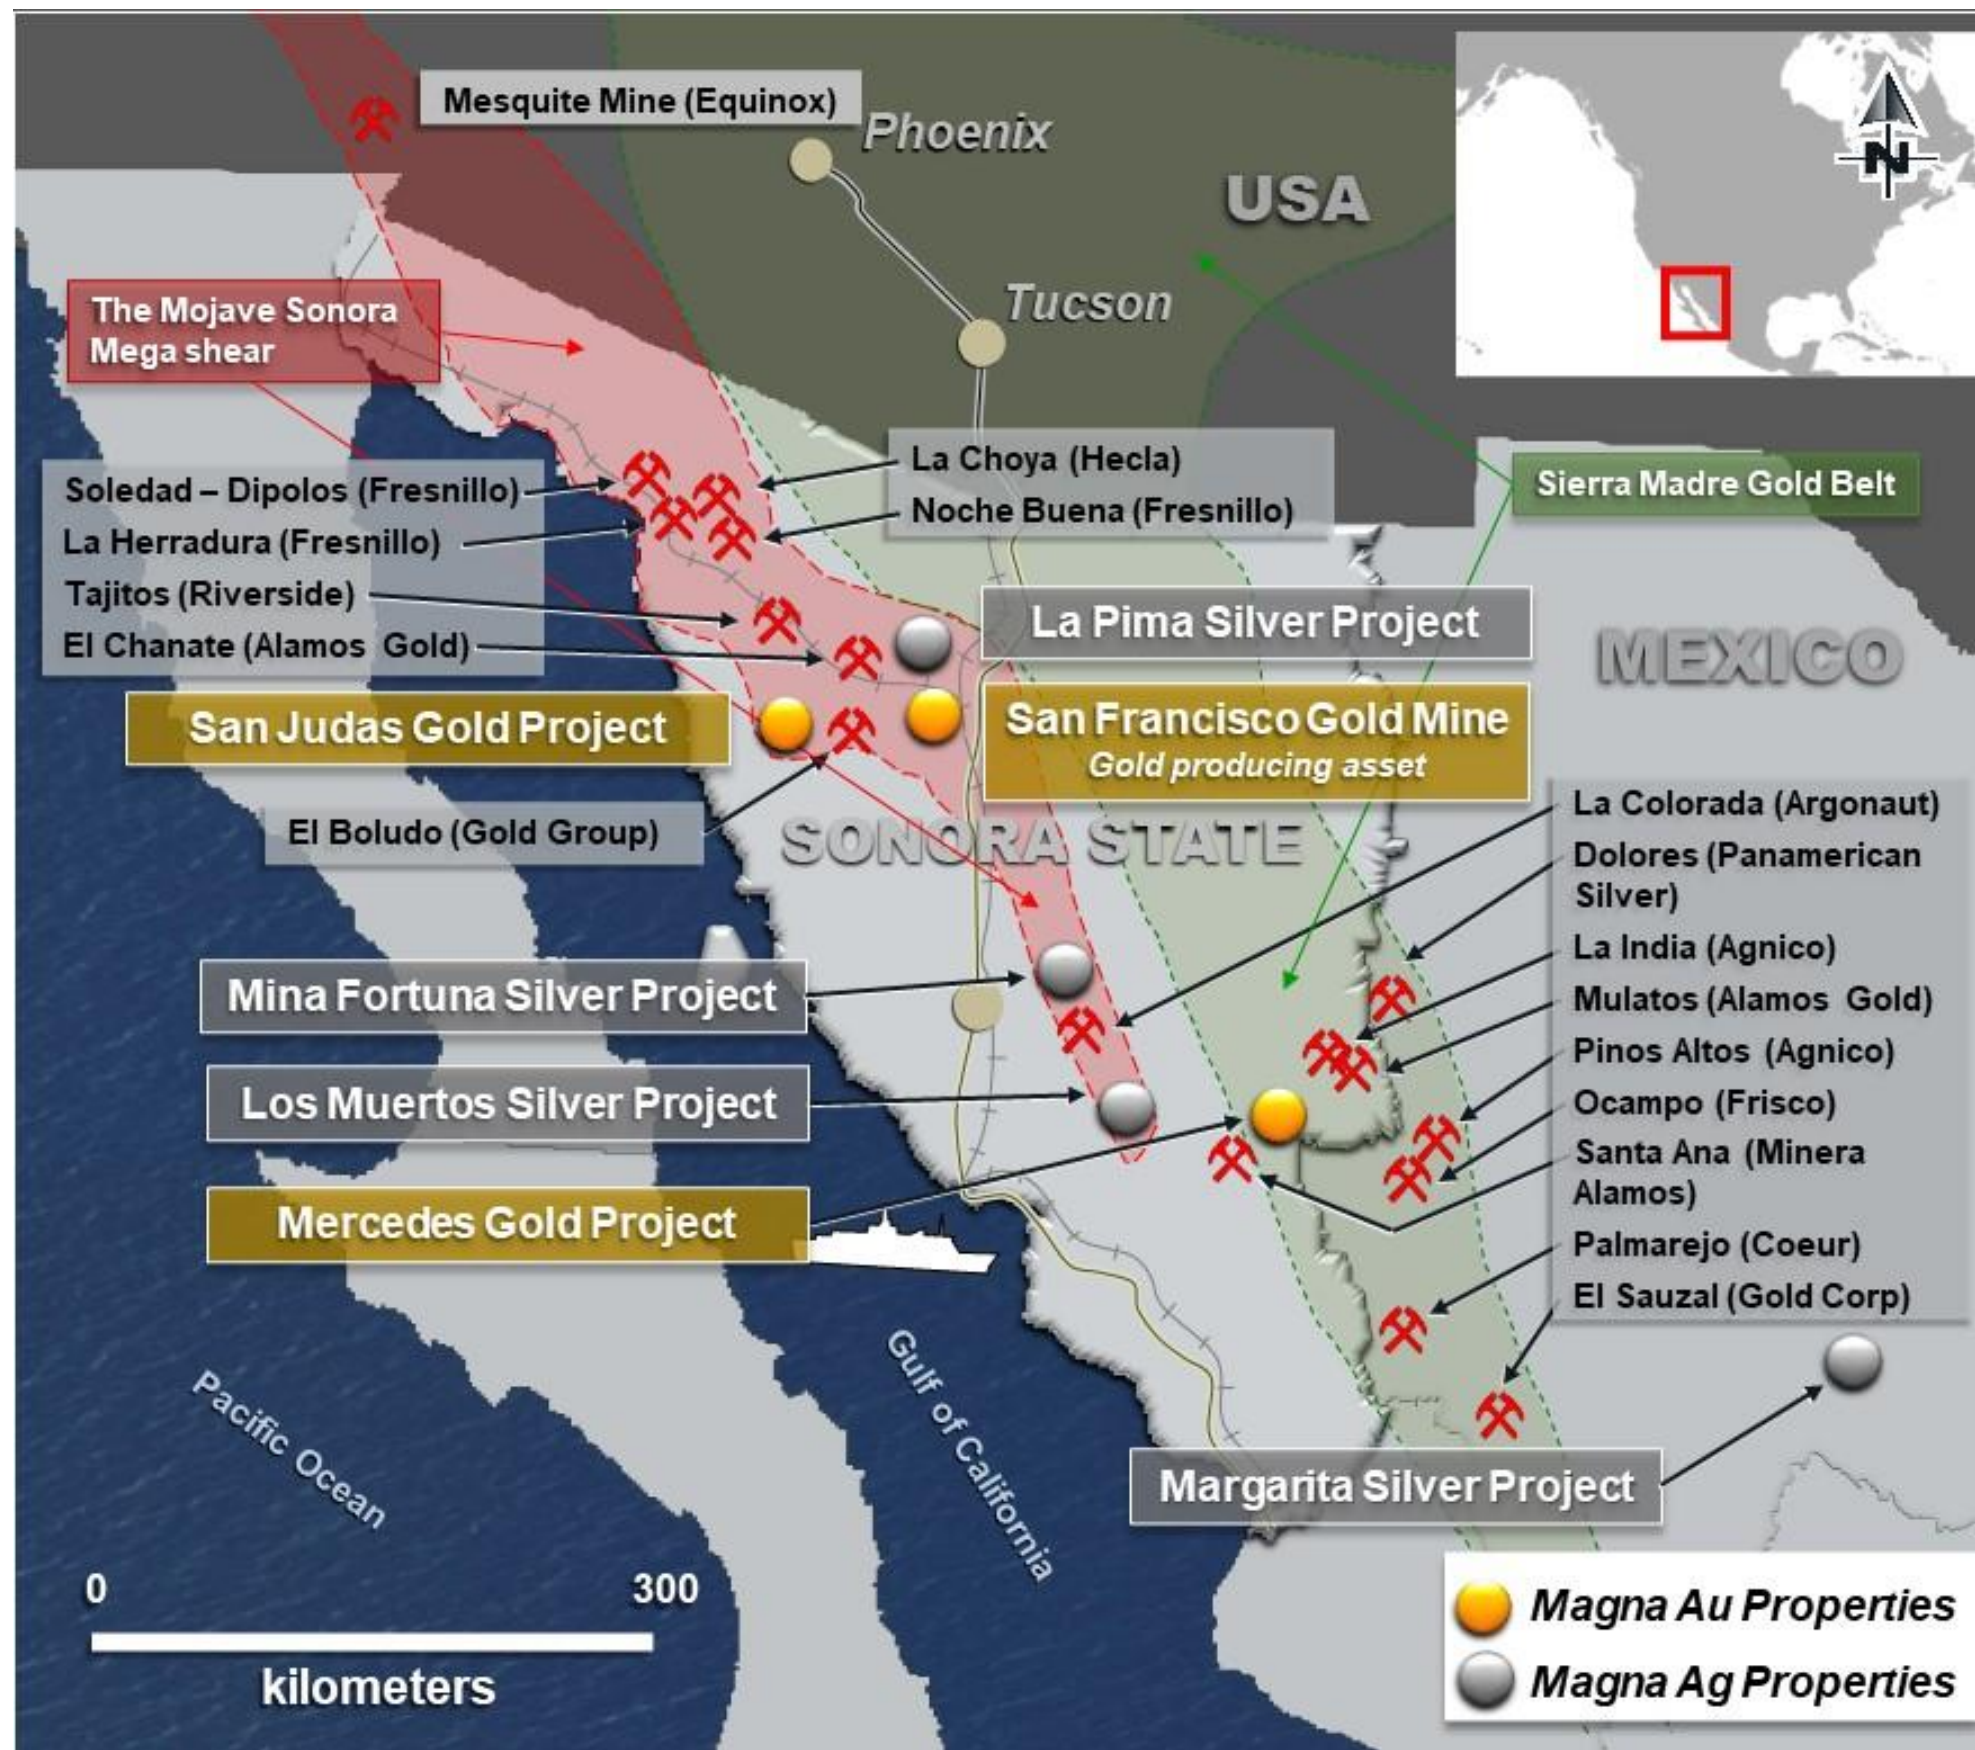

James Baughman (P. Geo.), Consulting Geologist and a Qualified Person as defined by NI 43-101, has approved the scientific and technical information in this presentation. Mr. Baughman is independent of the Company.

Precious Metals Exploration, Development and Production in Stable Jurisdictions

- Magna is a Canadian mining Company engaged in operation, development, exploration, and acquisition of mining properties in Mexico. We focus on precious metals
- The Company began trading on the TSXV in June 2019 under the symbol MGR. We also trade on the OTCQB exchange under the symbol MGLQF.
- Our primary strength is in our team of highly experienced mining professionals. We have a proven track record of developing properties in Mexico from discovery to production on budget and on time.
- The team developed, built and operated successfully the San Francisco Mine as Timmins Gold.
- The jurisdictions in which our projects are located are safe, stable and pro-mining.

Location

Operation and exploration properties are located in the States of **Sonora** and **Chihuahua, Mexico**, the best jurisdictions for mining in this Country.

Our Strategy and Goals

2020 – 2022

- We are re-starting, optimizing and in the process of increasing the mineral reserves at the San Francisco mine.
 - We are developing the San Francisco Underground Mine.
- We plan to establish a stable low cost production on our operations.
 - We plan to continue developing the Mercedes Project.
- We plan to complete a feasibility study on the Margarita Silver Project.
 - We plan to continue to pursue external growth opportunities.
- We plan to advance organic exploration on our pipeline of gold and silver assets.

2023

- 
- 
- To become a multi-mine precious metals producer.
 - To develop substantial gold and silver mineral resources on our properties.

Our Philosophy: Disciplined and sustained growth that generates long-term shareholder value

Ownership Structure

San Francisco Mine – Mineral Reserves and Resources

See technical report entitled 'NI 43101F1 Technical Report Pre-Feasibility Study for the San Francisco Gold Project, Sonora, Mexico' dated August 28, 2020 (the San Francisco Technical Report)

Mineral Reserves at \$1,350 USD Gold:

(Current mine plan)

Category	Tonnes	Au (g/t)	Gold (ozs)
Proven	21,058,000	0.511	346,000
Probable	25,789,000	0.49	406,000
Total	46,847,000	0.500	752,000
Low Grade Stockpile	782,000	0.256	6,000

Mineral Resources at \$1,500 USD Gold:

Category	Tonnes	Au (g/t)	Gold (ozs)
Measured	34,675,000	0.462	515,000
Indicated	65,025,000	0.437	914,000
Measured and Indicated	99,700,000	0.446	1,430,000
Inferred	11,374,000	0.467	171,000

Strip Ratio

2.5

- 1 All Mineral Reserves and Mineral Resources have been calculated in accordance with the standards of the Canadian Institute of Mining, Metallurgy and Petroleum and National Instrument 43-101, or the AusIMM JORC equivalent.
2. All Mineral Resources are reported inclusive of Mineral Reserves.
3. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability.
4. Mineral Reserves are estimated using appropriate recovery rates and US\$ commodity prices of \$1,350 per ounce of gold.
5. Mineral Resources are estimated using US\$ commodity prices of \$1,500 per ounce of gold.

San Francisco – Pre-Feasibility Study Overview

(see the San Francisco Technical Report)

Summary of Parameters

Mine Life	~8 years
Avg. Annual Gold Production	69 kozs ¹
Total Gold Production	527 kozs
Avg. Cash Cost	US\$1,160/oz

Mercedes Project

La Lamosa Hill

Sonora, Mexico

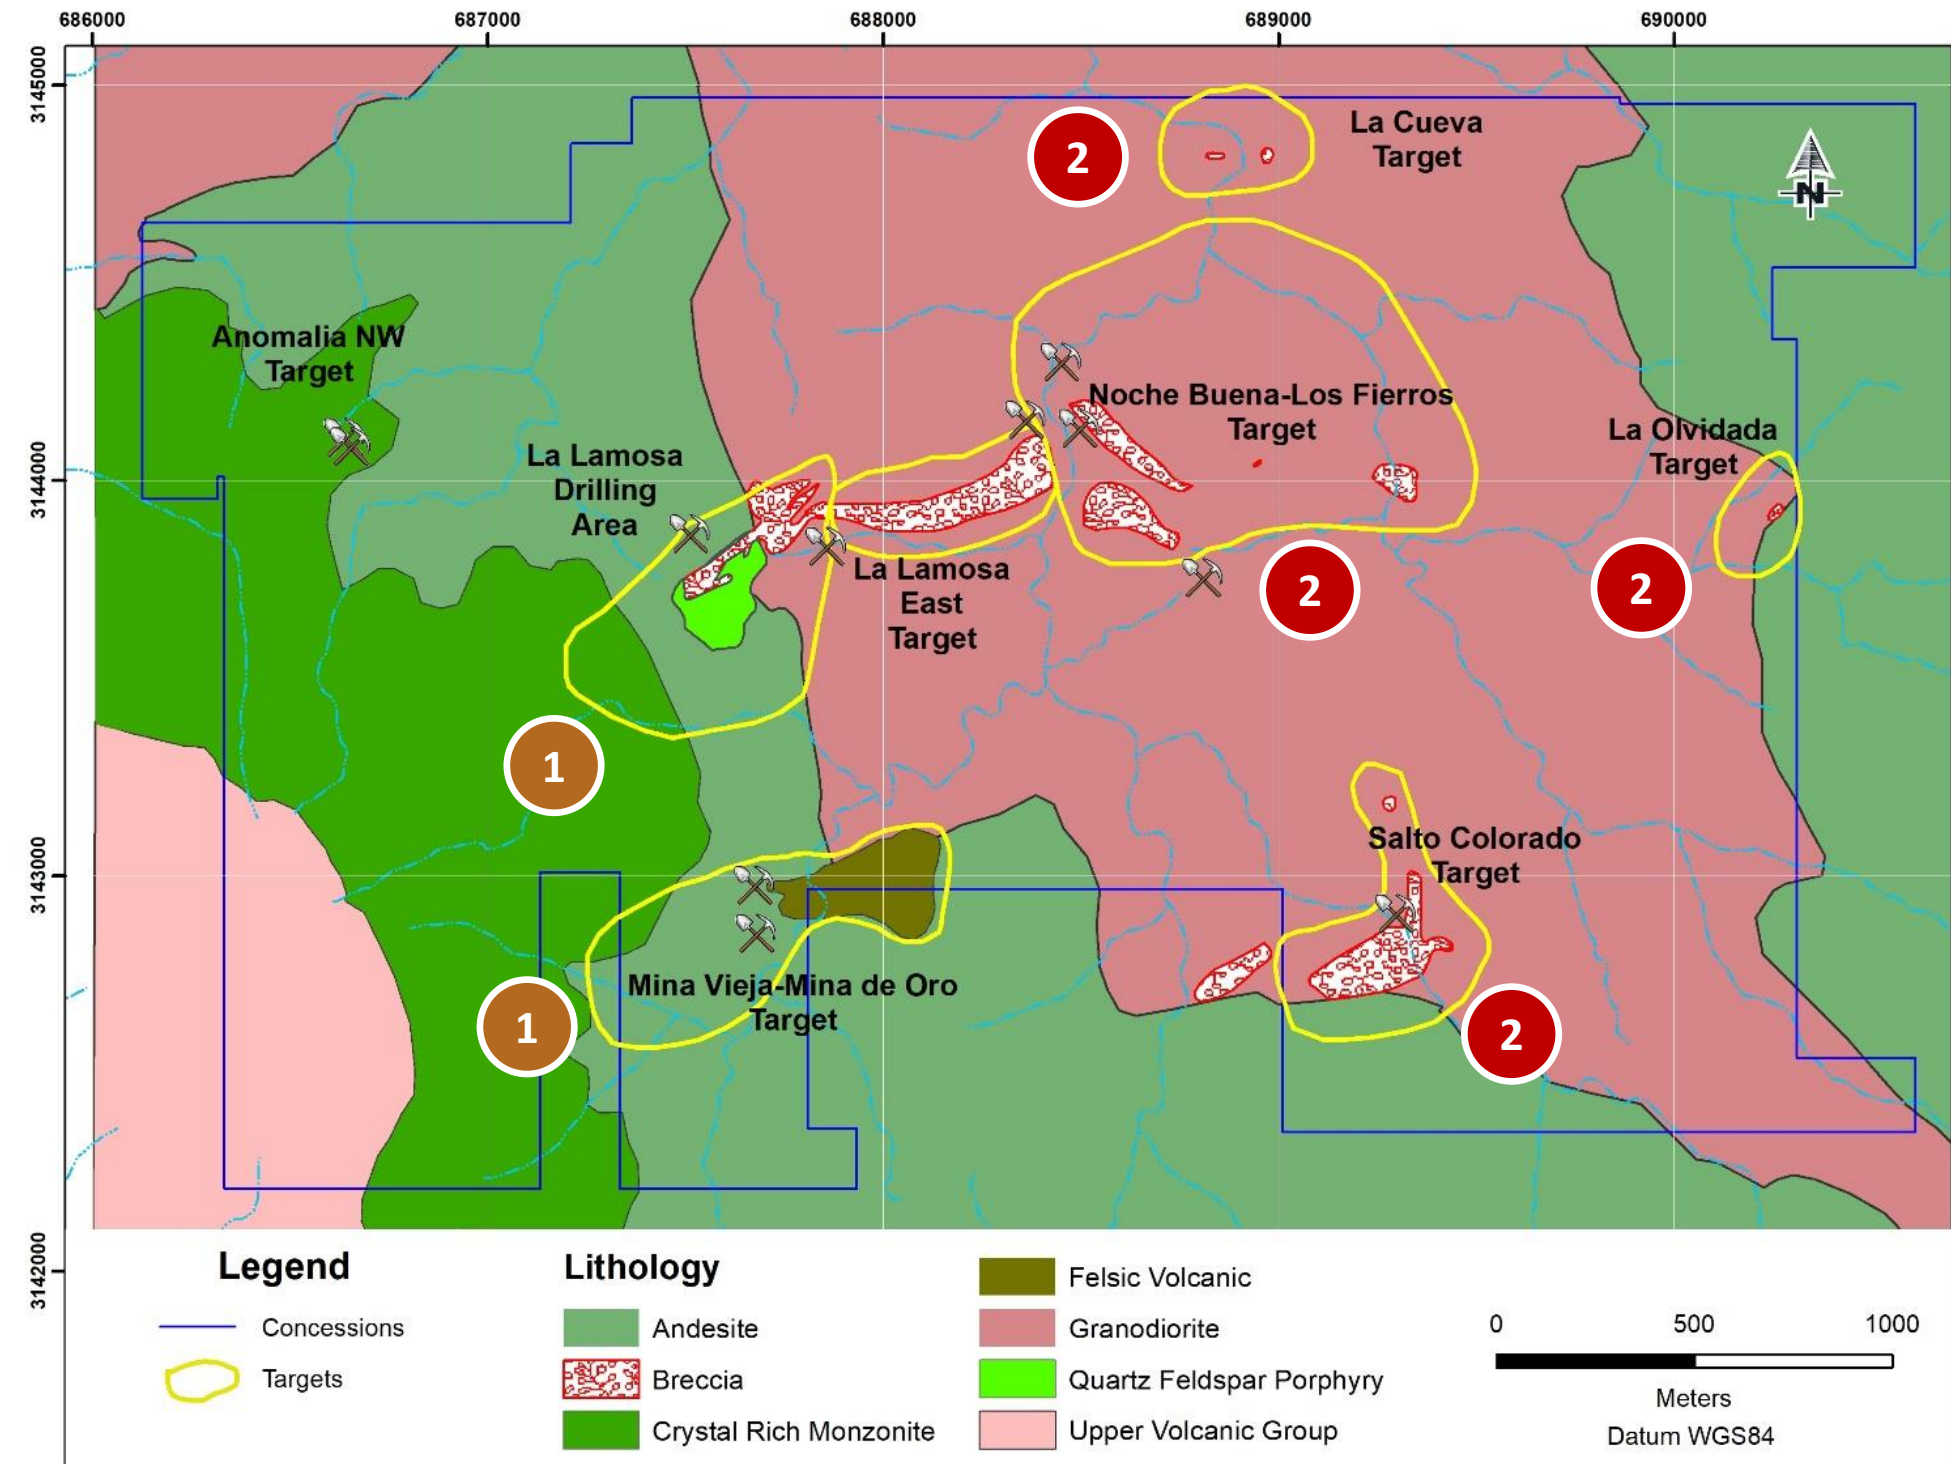

Mercedes Project

Sonora, Mexico

Mercedes hosts two different types of mineralization:

- 1 Disseminated gold / silver**
 - Near-surface mineralization
 - Indicative of a high-sulphidation epithermal system in volcanic rocks
 - Confirmed by drilling at La Lamosa and by intensive sampling at Mine de Oro
- 2 Quartz-Tourmaline breccias**
 - Structurally controlled
 - Consists of high grade gold, silver and base metal mineralization
 - Within a granodiorite batholith correlated to the different temperatures of a hydrothermal system
 - Intensive surface mapping and sampling identified the areas known as Salto Colorado, Noche Buena, La Cueva and La Olvidada

Mercedes Project – La Lamosa Disseminated Gold and Silver Target

Phase 1 Reverse Circulation Exploration Program

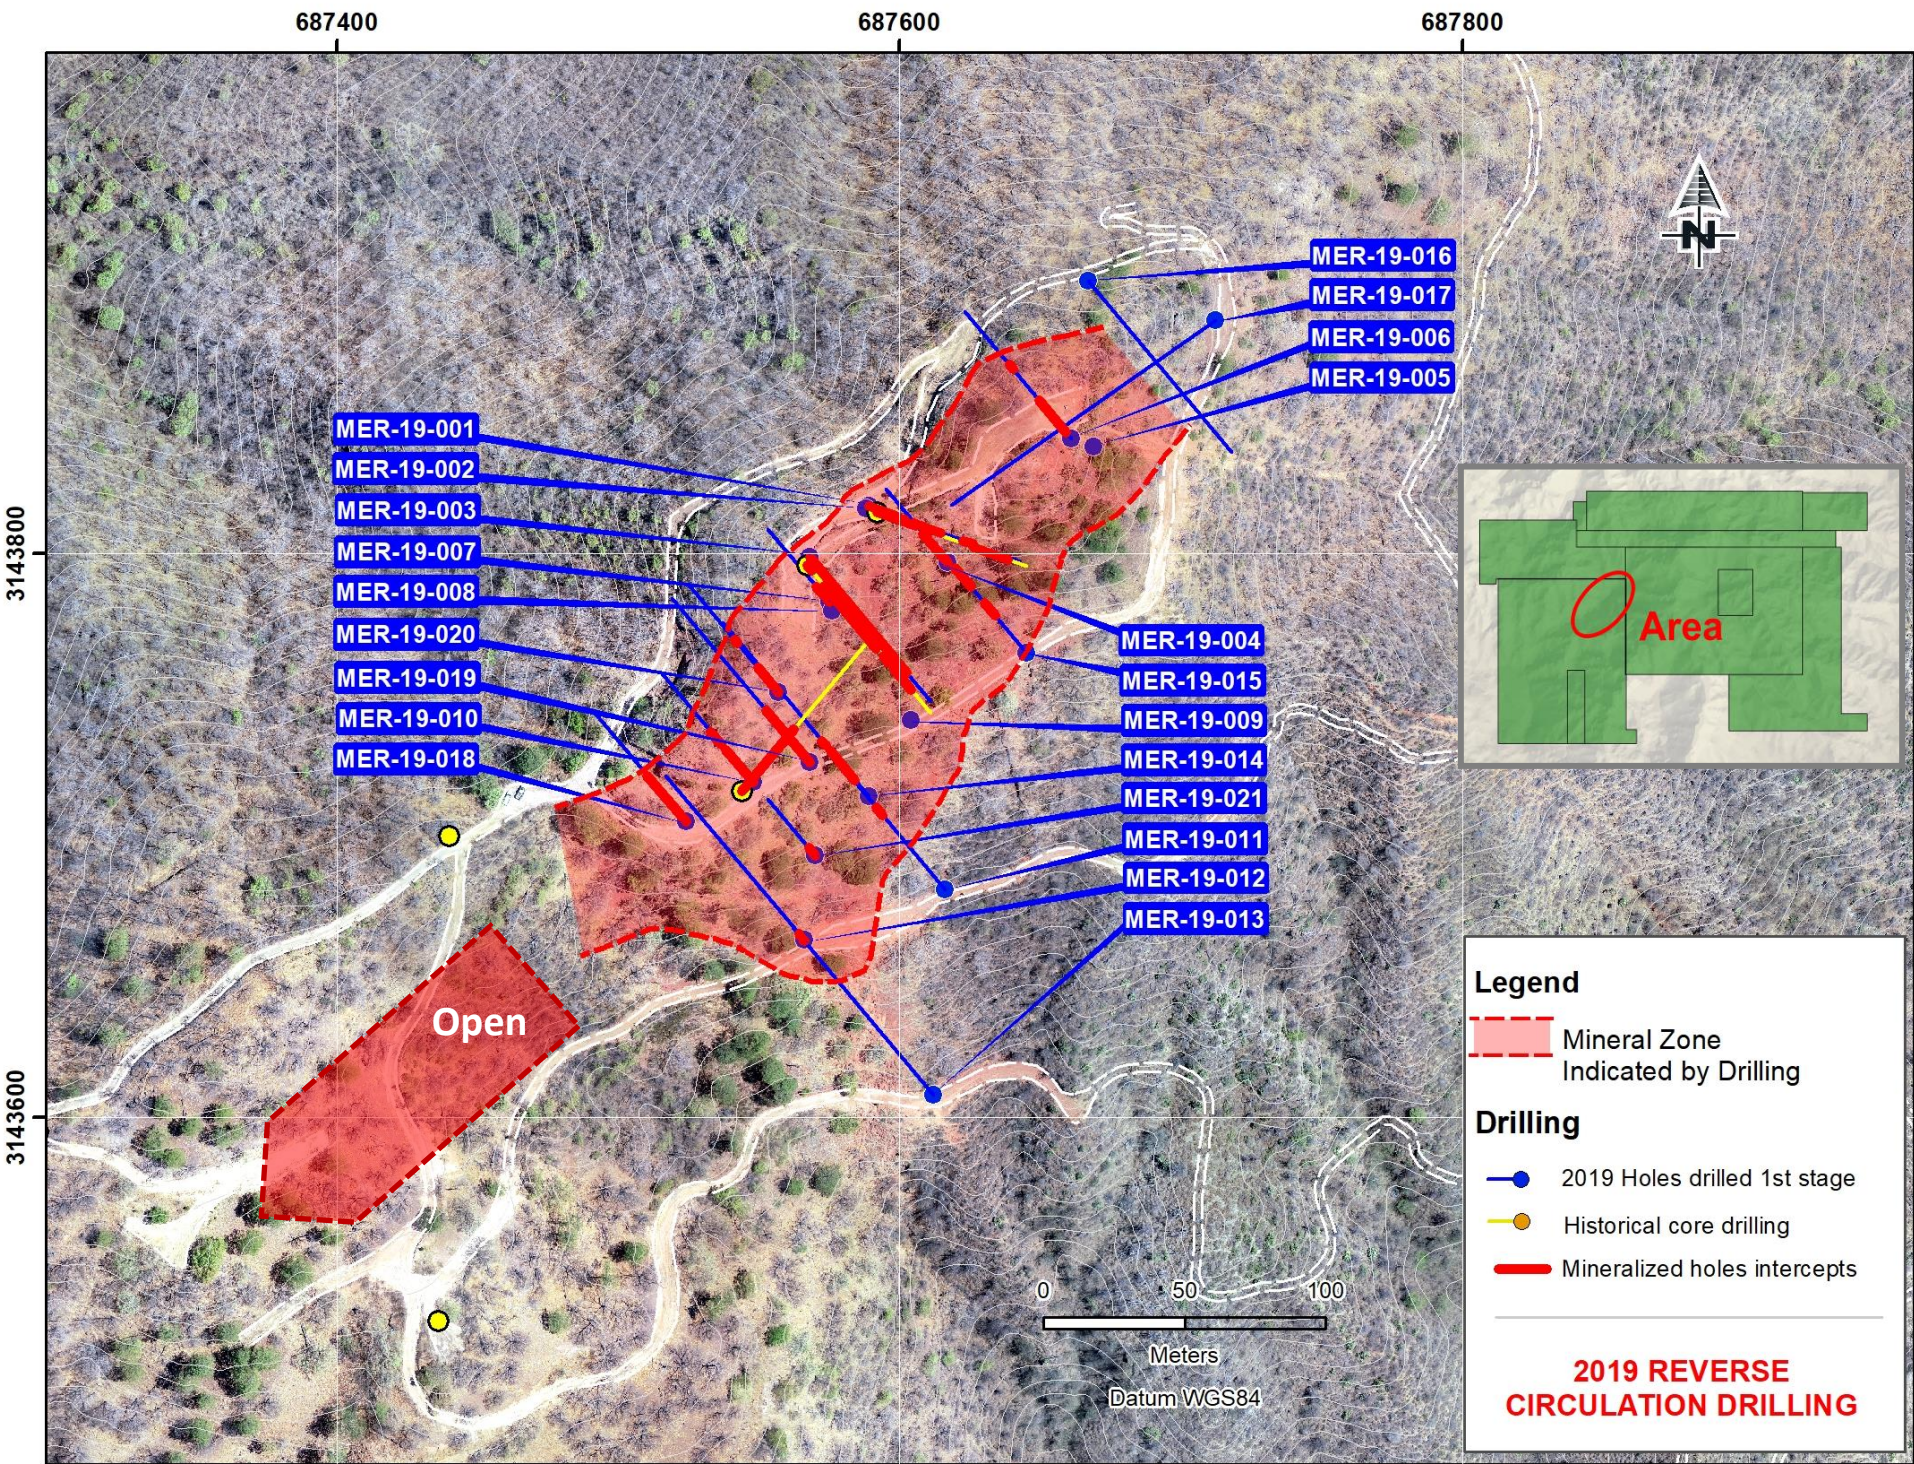

- A total of 2,723 meters of RC drilling were completed in 21 holes in Q4, 2019, which **confirmed near-surface gold / silver mineralization along 300 meters of La Lamosa.**
- Mineralization is **open at depth and to the SW.**

“Au-Eq assays were calculated on USD\$1,400/ounce gold and USD\$17/ounce silver price”

Mercedes Project – Mina del Oro

- Disseminated gold / silver target located 900 meters SE of La Lamosa Hill
- Chip sampling to date has returned **high gold and silver grades on surface and in historical mine workings**

Margarita Silver Project Chihuahua, Mexico

MAGNA GOLD CORPORATE PRESENTATION | JANUARY 2021

TSX-V: MGR | OTCQB: MGLQF

- Low-Intermediate Sulphidation Epithermal Ag-Pb-Zn System (primarily Ag)
- 7km of Outcropping Multiple Veins inside the property; only one vein has been drilled
- Channel Sampling has returned values of 100-900g/t Ag
- 35 DD holes were completed along 1,700 m of the Margarita vein, with over 1kg/t AgEq values in some drill intercepts.
- Some drill intercepts also have widths of over 48 meters of Ag mineralization.
- Mining Friendly Chihuahua State in Mexico
- Adjacent to Sunshine Silver Los Gatos mine

Near Term catalysts adding substantial value in the near term (4 to 18 months)

1. San Francisco Gold Mine

- Increase mineral reserves, optimize production plan, increase NPV.

2. Mercedes Gold Project

- Continue developing all exploration targets within the Property.

3. San Judas Gold Project

- Finalize geological work and determine drill locations by Q1 2021.

Near Term Catalysts

4. The Margarita Silver Project

- Carry out drill program and complete first estimate of mineral resources and mineral reserves.
- Complete PEA / PFS on the project.

5. La Pima Silver Project

- Concluded initial phase of core drilling with good results. (See press release dated December 8th, 2020.
- Execute Phase 2 of the exploration drilling.

Near Term Catalysts

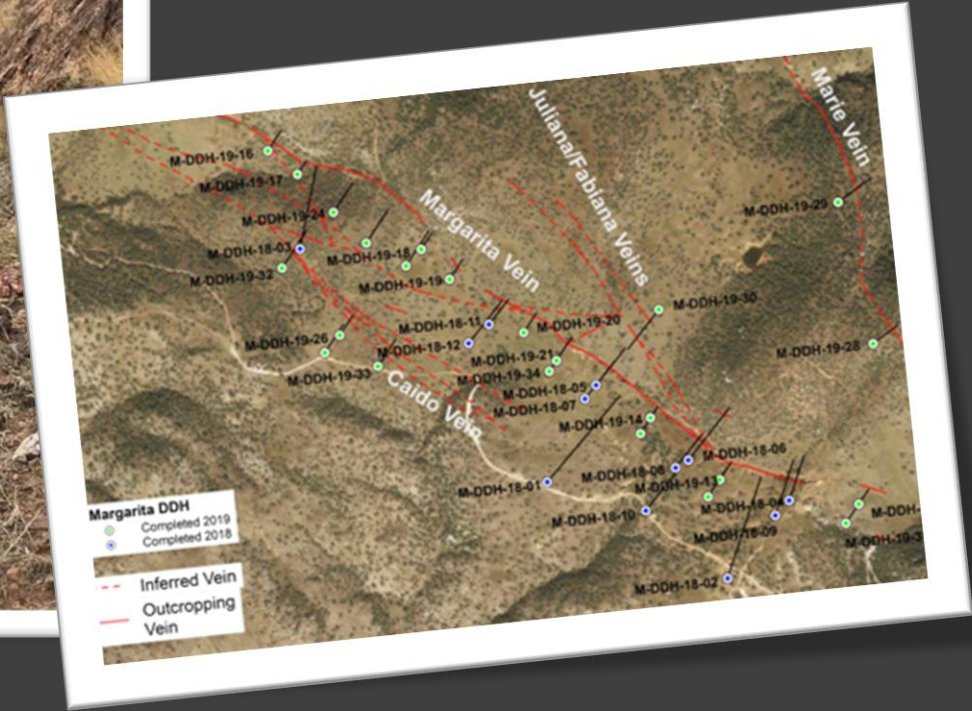

6. Silver Portfolio

Magna has acquired a very interesting portfolio of exploration Silver properties in northern Mexico.

We will be announcing our Silver strategy in the coming months.

MAGNAGOLD

Precious Metals Exploration, Development and
Production in Stable Jurisdictions.
