RESTATED MANAGEMENT'S DISCUSSION AND ANALYSIS

April 30, 2021

## RESTATED MANAGEMENT'S DISCUSSION AND ANALYSIS FOR THE PERIOD ENDED APRIL 30, 2021

This management's discussion and analysis ("MD&A") reviews the activities, results of operations and financial condition of Otso Gold Corp., ("Otso" or the "Company") and its subsidiaries for the period ended April 30, 2021. The discussion below should be read in conjunction with the Company's condensed interim consolidated financial statements for the period ended April 30, 2021, and the related notes thereto (the "Financial Statements"), which have been prepared in accordance with International Financial Reporting Standards ("IFRS") applicable to the preparation of interim financial statements. All dollar figures included in the following MD&A are quoted in Canadian dollars unless otherwise indicated. This MD&A has been prepared as of June 29, 2021 and restated as of September 24, 2021 pursuant to the disclosure requirements under National Instrument ("NI") 51-102 - Continuous Disclosure Obligations of the Canadian Securities Administrators.

Additional information related to the Company is available on SEDAR at [www.sedar.com](http://www.sedar.com) and on the Company's website at [www.otsogold.com](http://www.otsogold.com)

### 1. BACKGROUND AND CORE BUSINESS

The Company was incorporated under the laws of the Province of Alberta on February 14, 1992 under the name 510438 Alberta Ltd. The Company's name was subsequently changed to Firesteel Resources Inc. on April 22, 1992. The Company further changed its name to Nordic Gold Corp. on August 10, 2018, then to Nordic Gold Inc. on December 10, 2018 and, most recently, to Otso Gold Corp. on December 9, 2019.

The Company is incorporated and domiciled in Alberta and its common shares (the "**Common Shares**") trade on the TSX Venture Exchange ("TSX-V") under the symbol "OTSO". Additionally, the Company's Common Shares trade in the United States on the OTCQX under the symbol "FIEIF" and in Frankfurt under the symbol "FRA: 2FN".

The Company's administrative office is located at 181 Bay Street, Suite 1800, Toronto, Ontario, M5J 2T9.

The Company owns, indirectly through Swedish and Finnish subsidiaries, 100% of the Otso Gold Mine (the 'Mine') a fully licensed and developed gold mine in Finland. The Company also owns 49% of a Copper Creek porphyry copper gold exploration project situated in the golden triangle in British Columbia, Canada.

The Company's core business is to unlock shareholder value by progressing the Mine to production. The expected revenue from the successful restart of operations at the Mine will be deployed to build a portfolio of high-quality mining assets in safe jurisdictions. Finland is consistently recognized as among the best places in the world for mining and has a highly educated and skilled workforce.

The Company is focused on creating value for shareholders in an environmentally conscious and socially responsible manner. We invest in jurisdictions that share these values and ensure this is central to the Company's actions. We rely heavily on renewable energy, maintain the highest level of environmental standards and operate in a fair wage environment with protective labour policies.

The Mine is located approximately 20 minutes by mostly sealed roads from the port town of Raahe in central west Finland and one hour south of the country's 3 largest town of Oulu with access to an international airport.

The Mine consists of a fully built 2 million tonne per annum gold processing facility with all of the associated infrastructure in place. The facilities and infrastructure are production ready. In addition, the Mine has two open pits, the North Pit and South Pit, mined to ~50 metres and ~25 metres respectively and two additional pits with the overburden cleared. All the operations are fully permitted and licensed. Additionally, the Company holds a significant mining and exploration lease area.

### 2. OVERVIEW

The Company completed the Equity Financing (as defined herein) on February 8, 2021, which has allowed the Company to focus on the required preparatory work and drilling to proceed to production during the third fiscal quarter ending October 31, 2021 ("Q3 2022"). Additionally, the Equity Financing provided for the nomination of four new members to the board of directors of the Company (the "Board") adding further depth and strategic guidance.

The Company is aiming to return to production in Q3 2022 with the preparatory work and drilling campaign well advanced. John T. Boyd ("Boyd") expects to publish an updated technical report that complies with National Instrument 43-101 *Standards of Disclosure for Mineral Projects* ("NI 43-101") and incorporates the drilling completed to date. Concurrently, Boyd will develop a mine plan for the first phase of production in the third quarter of 2021. The Company anticipates that the publishing of the NI 43-101 technical report will allow it to complete additional financing with Brunswick Gold Ltd., pursuant to its strategic partnership described below. The feasibility study is expected to be completed by Boyd in the third quarter of 2021 and will include a mine plan and an updated resource and reserve report.

The Company has built a highly experienced team on site with the majority of senior management positions filled, the key responsibilities of which are to develop a strong culture on site and build out the team required to operate the Mine, in addition to ensuring the Mine is ready for production. The Company has retained Brunel Energy Inc. ("Brunel") to support the Company in recruiting operational staff. Brunel has significant experience in the placement of mining personnel throughout the world. Brunel will be completing psychometric testing on all staff to ensure the on-site complement is both highly skilled and cohesive. From June 2021, the Company has also hired Andrey Maruta as its Chief Financial Officer. Mr. Maruta has over 18 years experience in the mining and metals industry across

## RESTATED MANAGEMENT'S DISCUSSION AND ANALYSIS FOR THE PERIOD ENDED APRIL 30, 2021

global exchanges and has previously served as the group chief financial officer for Kore Potash plc. (ASX, AIM, and JSE) and the chief financial officer for Petropavlovsk plc. (LSE).

### 3. FINANCING EFFORTS AND PARTNERSHIP WITH BRUNSWICK

Effective April 1, 2019, the Mine was placed on care and maintenance from pre-commercial production due to operational issues and the lack of sufficient funds to continue production. In addition to the operational milestones as noted above, the Company has completed various financial activities to ensure its return to production.

During March 2020, the Company closed a non-brokered private placement of convertible debentures for net proceeds of \$2,132,750. These unsecured debentures bear interest at 10% per annum and are convertible into common shares of the Company at a price equal to the greater of \$0.10 per share and the conversion date closing market price less a 20% discount. These debentures are due on March 26, 2023.

During May 2020, the Company concluded a facility with Alumina Partners (Ontario) Ltd. ("Alumina") pursuant to which, upon mutual acceptance on pricing terms, the Company can draw down funds to ensure its continued financial liquidity up to a total of \$8,000,000. To date, \$600,000 has been drawn down by means of private placements.

During the year ended January 31, 2021, the Company issued a further \$170,000 from unit private placements. A total of 3,066,667 units were issued with each unit comprising a common share and a common share purchase warrant to acquire an additional common share of the Company.

On December 11, 2020, Brunswick Gold Ltd. ("Brunswick"), entered into a subscription agreement pursuant to which it agreed to subscribe for 284,944,440 units ("Units") of the Company, at \$0.05 per Unit, for the aggregate subscription price of US\$11,000,000 (the "Equity Financing"). Each Unit consists of one common share and one Common Share purchase warrant (each a "Warrant"). The Warrants entitle the Brunswick, for a period of five years, to subscribe for up to 284,944,440 additional common shares of the Company at \$0.05 per common share. The Company completed the Equity Financing on February 8, 2021. Brunswick exercised its 284,994,440 Warrants for an additional US\$11,000,000 on July 21, 2021.

A total of 25,904,020 of such Units were also issued and were used to settle the principal on the US\$1 million unsecured loan (the "Loan") owed to Brunswick. The net proceeds from the Equity Financing after repayment of the Loan will fund the Company and enable the detailed directional diamond drilling program to inform a robust geological model, updated technical report, detailed mine plan as well as upgrades on site to underpin the return to production.

Upon completion of the Equity Financing, the Board was reconstituted to include seven directors – namely Brian Wesson, Clyde Wesson, Yvette Harrison and four new Brunswick nominees, including Vladimir Lelekov, Nicolas Pascault, Victor Koshkin and Martin Smith. Additionally, Mr. Lelekov was appointed as Chairperson of the Board. To facilitate the incoming Board members, Christopher Towsey resigned as a director of the Company and agreed to remain as a consultant to Otso.

On completion of the Equity Financing, B&A Wesson Pty Ltd ("B&A") and C&C Wesson Pty Ltd ("C&C"), both related parties and affiliated with Brian Wesson and Clyde Wesson, respectively, were issued an aggregate of 32,380,050 finders fee "top-up" common shares and PFL Raahe Holdings LP ("PFL") was issued 31,909,280 "top-up" common shares. Accordingly, as a result of the Equity Financing, on a non-diluted basis, Brunswick owns 46.03% of the common shares of the Company; PFL owns 12.79% of the common shares and each of B&A and C&C own 6.69% of the common shares.

In connection with the 31,909,280 common shares issued to PFL on closing, such issuance fully settled the Company's outstanding debt to PFL in the amount of US\$1,231,826.

The Company's intention is to do the preparatory work, continue its partnership with Brunswick and secure additional funding to fund the Company through to production in Q3 2022.

### 4. PROGRESS AND BUSINESS STRATEGY

The Company provides regular shareholder letters and updates to keep the shareholders informed of the Company's progress towards production and strategy, supplemented by announcements as these milestones are met. Shareholder letters were released on October 10, 2019, September 9, 2020 and April 7, 2021. Key points, are summarised below:

1. The Company closed convertible notes for a total subscription of \$3,737,000 to fund Preparatory Works and the drilling program;
2. the appointment of Andrey Maruta of Chief Financial Officer of Otso effective as of June 2021.
3. the Company confirming an expected return to production in Q3 2022;

## RESTATED MANAGEMENT'S DISCUSSION AND ANALYSIS FOR THE PERIOD ENDED APRIL 30, 2021

3. LV21001 18.47 m @ 1.69 g/t Au starting at 28.90 m.
4. LV21001 3.42 m @ 1.34 g/t Au starting at 63.58 m.
5. LV21003 1.65 m @ 1.20 g/t Au starting at 67.95 m.
6. LV21009 2.13 m @ 1.37 g/t Au starting at 72.45 m.
7. LV21015 6.30 m @ 1.78 g/t Au starting at 18.50 m.
8. LV21003 1.65 m @ 1.20 g/t Au starting at 67.95 m.

10. LV21019 1.70 m @ 1.27 g/t Au starting at 24.40 m.
11. LV21024 1.40 m @ 1.17 g/t Au starting at 28.20 m.

There are currently two pits that have been mined covering 200,000 square metres and a further two that have the overburden removed ready for mining. The plan is to expand the footprint to 980,000 square metres and create a mining pit that will encompass the two existing pits. The drilling program to date has been focused on identifying close to surface targets expanding 500 metres from the existing pits profile to inform the initial mine plan expected to expand the total footprint by up to four times. An initial mine plan for the first ~18 months of production, from near surface extensions within 500 metres of the pit is expected to be delivered in the third quarter of 2021. The initial mine plan will allow the company to move forward to production to be followed by the feasibility study including a long-term detailed mining plan.

## 6. PROCESS PLANT AND INFRASTRUCTURE

The process plant was built between 2009-2011 by Metso Minerals in conjunction with Outotec and commissioned. All permits are in place to restart the operations apart from the standard safety, environment and plans to be submitted for restart approval to the authorities. However, the main focus for the restart is the geology and mine plan to deliver the name plate 6,000 tonnes per day (two million tonnes processed per annum) to the process plant from Q3 2022 at 1.51 g/t. The process plant consists of a single stage crushing circuit, grinding mills 3 Mw installed power mills, flash flotation, gravity and regrind, high grade and low grade CIL plants, carbon stripping and gold room. Spent mud is sent to two facilities - one high grade and the other low grade. The low-grade dam is approximately 7.5 kilometres from the process plant where it is processed through a thickener.

As of June 29, 2021, the Company has finalised designs, retained contractors and commenced the refurbishment of the process water dam. The Company is finalising preparations for the lift of the tailings dam wall with the contractor retained and the drawings being finalised prior to an all hands meeting with the regulators for approval. Additionally, work has begun on the extension of the Potentially Acid Forming ("PAF") waste pile with the area cleared in preparation for lining. The Company crushed rock on site for the water dam and is preparing to quarry rock for the tailings dam short and long term works.

With all the primary infrastructure in place and ready for production, the Company is ensuring the upgrades and improvements detailed above do not delay the restart and are on schedule to deliver them well in advance of production.

During this quarter 500kg of ore representing four domains was shipped to Denver USA for proof of flow sheet. The metallurgical testwork is designed to study the process operating parameters and allow the process control Distributed Control System ("DCS") to be setup at specific operating criteria. The testing is from SAG mill Comminution Control ("SMC") test through to flotation and cyanide amenability.

## 7. COVID 19

Since March 2020, the Company, like the rest of the world, was affected by the COVID-19 pandemic.

The Company's first focus is on the Health and Safety of our staff, their families and the community. We are glad to report that there have been no outbreaks or transmissions onsite, with only one staff member contracting COVID-19 off site who did not spread it to anyone else. The Company has implemented the recommendations of the Finnish government in relation to COVID-19 including the wearing of masks, installation of hygiene stations and a system of mandatory testing and quarantine for those who travel to site from outside of Finland.

The primary effect on the Company was the delay in refinancing which delayed the Mine's return to production and increased the care and maintenance costs because of a longer period in care and maintenance. Additionally, the inability of senior staff to travel to site freely delayed the Company's progress including installing new systems and controls on site and planning for the return to production.

The Company has now finalised a financing solution with Brunswick enabling the return to production to be expedited, resulting in a relatively short delay to the Company's plans. Shortly after completion of the Equity Financing all senior staff spent significant time on site to ensure any further delays were minimised. The Mine will, at all times for the foreseeable future, have a member of the Board of Directors and senior staff on site to ensure there are no delays as a result of the pandemic. However, the Company has not had material issues with mobilising foreign staff to site, having been successful in placing the majority of department heads on site during the pandemic as well as geological staff. The Company is thankful that the Government of Finland has taken appropriate steps during the pandemic to minimise the effect on the country and in particular the region in which we operate, further the Government has allowed the important work of restarting the mine to proceed with appropriate border controls.

## 8. SELECTED FINANCIAL INFORMATION

### 8.1 Summary of Quarterly Results

The following table sets out selected unaudited quarterly financial information of the Company and is derived from the unaudited condensed interim consolidated financial statements prepared by management. The Company's interim consolidated financial statements are prepared in accordance with International Financial Reporting Standards applicable to interim financial reporting and are expressed in Canadian dollars.

For the quarter ended	April 30 2021	January 31 2021	October 31 2020	July 31 2020
	\$	\$	\$	\$
Net loss	(3,836,082)	(4,120,584)	(1,337,940)	(4,505,925)
Basic loss per common share	(0.01)	(0.02)	(0.01)	(0.02)
Diluted loss per common share	(0.01)	(0.02)	(0.01)	(0.02)
Cash and cash equivalents	5,030,957	95,531	832,455	512,884
Property, plant and equipment	51,541,431	52,651,492	54,838,466	56,512,129
Working capital	(31,636,849)	(41,063,569)	(40,404,154)	(25,562,511)

For the quarter ended	April 30 2020	January 31 2020	October 31 2019	July 31 2019
	\$	\$	\$	\$
Net income/(loss)	(5,412,974)	(9,562,578)	36,231,652	(8,602,163)
Basic income/(loss) per common share	(0.02)	(0.05)	0.18	(0.04)
Diluted income/(loss) per common share	(0.02)	(0.05)	0.18	(0.04)
Cash and cash equivalents	841,243	239,064	1,127,945	1,625,990
Property, plant and equipment	54,324,094	52,414,488	49,457,224	53,817,427
Working capital	(22,867,633)	(14,992,072)	(7,334,585)	(73,853,554)

From April 1, 2019 to February 8, 2021, the Mine was put on care and maintenance. The Company's results of operations during this period therefore reflect maintenance costs to ensure that the Mine stayed in a safe and stable condition. The Company has continued its definitive drilling program as described above during the period since March 1, 2021, to support the return to production in Q3 2022.

During the third quarter of fiscal 2020, the Company restructured its arrangement with PFL renegotiating the previous gold forward purchase agreement with a straight loan (US\$23 million) and a 2.5% net smelter return royalty on production from the Mine. The restructuring of the debt resulted in a gain of \$54 million and overall net income during the third quarter of fiscal 2020.

### 8.2. Results of Operations

#### **Three months ended April 30, 2021 compared to three months ended April 30, 2020**

During the three months ended April 30, 2021, the Company incurred net loss of \$3,836,082, compared to \$5,412,974 during the three months ended April 30, 2020.

During the three months ended April 30, 2021, the operating expenses were \$1,018,762 compared to \$2,464,942 during the three months ended April 30, 2020. The overall decrease was primarily due to the Company capitalizing its expenditures on the Mine since February 8, 2021, upon completion of the Equity Financing. The Mine was under care and maintenance during the entire three month period ended April 30, 2020.

The Company's non-operating expenses include the derivative and restructuring cost related to its loan from PFL as well as convertible debentures issued to other holders. Total such non-cash costs incurred during the three months ended April 30, 2021, were \$3,594,421 compared to \$1,891,402 during the three months ended April 30, 2020. This increase of \$1,703,019 was mostly offset due to foreign exchange gain recognized by the Company during the three months ended April 30, 2021, of \$776,972 compared to a foreign exchange loss of \$1,046,155 during the three months April 30, 2020, a change of \$1,823,127. The foreign exchange impact in the profit or loss for the Company during these periods was a result of the change in the value of the Canadian dollar relative to the US dollar, primarily due to translation of the US\$23 million loan from PFL into Canadian dollars. Otso does not yet hedge its exposure to foreign currencies.

## RESTATED MANAGEMENT'S DISCUSSION AND ANALYSIS FOR THE PERIOD ENDED APRIL 30, 2021

Subsequent to the issuance of the Company's unaudited condensed interim consolidated financial statements for the three months ended April 30, 2021, the management of the Company determined that an accounting error had been made as the Company's Otso Gold Mine was no longer in care and maintenance as of February 8, 2021 as it had entered into the development phase. As a result, the Company restated its unaudited condensed interim consolidated financial statements as at April 30, 2021 and for the three months ended April 30, 2021 to reflect amounts incurred subsequent to February 8, 2021 (and previously recorded as care and maintenance expenses and other categories within the Company's statement of loss and comprehensive loss) as additions to the property, plant and equipment. As required, the Company performed an impairment test with no impairment required.

The effect of this restatement on the Company's unaudited condensed interim consolidated financial statements for the three months ended April 30, 2021 is summarized as follows:

Consolidated Statements of Financial Position	Previously reported	Adjustment	Restated
Property, plant and equipment	\$ 49,891,199	1,650,232	51,541,431
Consolidated Statements of Loss and Comprehensive Loss For the three months ended April 30, 2021			
Care and maintenance costs	\$ 1,852,680	(1,771,348)	81,332
Management and consulting	389,658	(200,046)	189,612
Professional fees	196,905	100,768	297,673
Marketing and administration	261,546	188,599	450,145
Currency translation adjustment	1,745,511	31,795	1,777,306
	<u>4,446,300</u>	<u>(1,650,232)</u>	<u>2,796,068</u>

The Company also reclassified \$1,379,318 of cash spent on development activities since February 8, 2021, from operating activities to investing activities in its consolidated statement of cash flows for the three months ended April 30, 2021.

There was no impact on the Company's loss per share incurred during the three months ended April 30, 2021, as a result of this correction of error.

As a result of the restatement, the net loss for the period of (previously stated to be \$5,518,110) was reduced to a net loss of \$3,836,082.

### 8.3. Liquidity and Capital Resources

The Financial Statements are prepared on a going concern basis, which assumes that the Company will be able to meet its obligations and continue its operations for at least the next twelve months. The Company has incurred operating losses since inception and currently is incurring negative cash flows from operating and investing activities. In order to continue as a going concern, the Company must generate sufficient operating cash flows, secure additional capital or otherwise pursue a strategic restructuring, refinancing or other transactions to provide it with additional liquidity.

Several adverse conditions and material uncertainties cast significant doubt upon the going concern assumption. During the three months ended April 30, 2021, the Company incurred net cash outflows from operating activities of \$4,497,225 (2020 - \$1,719,878). As at April 30, 2021, the Company had a working capital deficiency of \$31,636,849 consisting of mainly the deferred Pandion debt and former contractor costs from the past due in December 2021.

Since the Mine was put on care and maintenance, the Company has continued to progress on its efforts to raise financing to restart production. During the year ended January 31, 2020, the Company restructured its debt with PFL from a complex forward gold agreement to straight loan and royalty agreement to capitalize on the future potential of the Mine. During that year, the Company raised an additional \$7.6 million from PFL. During the year ended January 31, 2021, the Company raised approximately \$4.2 million in a combination of debt and equity financing. During the fiscal 2022, so far, the Company has continued its efforts to pay down on its debt and generate additional funding from strategic partners, as evident from the Company's partnership with Brunswick described above. The Company's intention is to continue its partnership with Brunswick and secure additional funding which is expected in the third quarter of 2021.

Although the Company has been successful in its efforts so far, given the significant working capital deficiency, there can be no assurances that sufficient funding will be available to maintain the Mine and to cover general and administrative expenses necessary for the maintenance of a public company for at least the next twelve months. The Company is highly dependent on funding from Brunswick and there can be no guarantee that it will be able to

## RESTATED MANAGEMENT'S DISCUSSION AND ANALYSIS FOR THE PERIOD ENDED APRIL 30, 2021

continue to secure additional financing in order to continue operations for the foreseeable future, if it doesn't receive adequate support from Brunswick. If financing is received, it may not be on terms that are favourable.

### 8.4. Outstanding Share Data

As of June 29, 2021, the Company had 618,975,528 Common Shares on issue. The Company also had 4,200,000 stock options outstanding, exercisable at a weighted average exercise price of \$0.07 per share, and 301,650,851 share purchase warrants outstanding, exercisable at a weighted average of \$0.05 per share.

### 8.5. Related Party Transactions

Key management personnel include those persons having authority and responsibility for planning, directing, and controlling the activities of the Company. The Company has determined that key management personnel consist of members of the Board and the Company's Chief Executive Officer and Chief Financial Officer.

Consulting fees, director fees, management fees, and other employment benefits, pursuant to service agreements for the three months ended April 30, 2021 were \$389,658 (2020 - \$413,755), of this amount, \$200,046 was capitalized to Mineral properties and machinery equipment and the balance of \$189,612 was included in operating expenses. As at April 30, 2021, an amount of \$608,083 (January 31, 2020 - \$1,067,090) was included in accounts payable and accrued liabilities, representing amounts owing to directors and officers of the Company. Any amounts owing at any time to key management personnel are unsecured, non-interest bearing, and due to demand.

On February 8, 2021, the Company raised \$14 million (US\$11 million) from Brunswick through issuance of 285 million Units, as well as issued a combined 32 million common shares to B&A and C&C as finders' fee for such the Equity Financing. An additional 32 million common shares were issued to PFL to settle the Company's previous commitment to them pursuant to the loan agreement with PFL. Both Brunswick and PFL are related parties to the Company due to their significant common share ownership in Otso.

During the three months ended April 30, 2021, the Company also amended the payment terms of the US\$23 million loan from PFL whereby instead of the US\$11.5 million repayment each in March and September 2021, the Company would repay the entire US\$23 million in December 2021. Pursuant to the amended agreement, US\$23 million would accrue interest at 15% per annum from February 8, 2021 to the date of the repayment.

## 9. FINANCIAL INSTRUMENTS AND OTHER INSTRUMENTS

### 9.1. Financial instrument classification and measurement

Financial instruments recorded at fair value on the consolidated statements of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

The fair value of hierarchy has the following levels:

- Level 1 – quoted prices in active markets for identical financial instruments.
- Level 2 – quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in the markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.
- Level 3 – valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

### 9.2. Fair values of financial assets and liabilities

The Company's financial instruments include cash, reclamation bond, accounts payable and accrued liabilities, convertible debentures, royalty provision, and the loans from external parties. The fair value of accounts payable and accrued liabilities may be less than their carrying value due to the liquidity risk. The fair values of the derivative component of the convertible debentures and royalty provision are determined using inputs at level 3 of the fair value hierarchy.

### 9.3. Credit risk

Credit risk arises from the potential that a counterparty will fail to perform its obligations. Financial instruments that potentially subject the Company to concentrations of credit risk consist of cash and cash equivalents and reclamation bonds. Cash and cash equivalents consist of cash held at a Canadian bank. A substantial portion of the Company's amounts receivable is Input Tax Credit. The carrying amount of cash and cash equivalents, reclamation bonds and amounts receivable represents the maximum credit exposure.

## RESTATED MANAGEMENT'S DISCUSSION AND ANALYSIS FOR THE PERIOD ENDED APRIL 30, 2021

Management monitors the exposure to credit risk on an ongoing basis and does not consider such risk significant at this time.

### 9.4. Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they come due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its obligations when due, under both normal and stressed conditions, without incurring unacceptable losses. As at April 30, 2021, the Company had a cash balance of \$5,030,957 (January 31, 2021 - \$95,531) to settle current liabilities of \$39,856,313 (January 31, 2021 - \$44,068,723).

### 9.5. Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, commodity prices, and interest rates will affect the Company's operations, net earnings or the value of financial instruments.

#### 9.5.1. Foreign currency risk

Foreign exchange risk is the risk that variations in exchange rates between foreign currencies will affect the Company's operating and financial results. The Company is exposed to foreign currency risk as it engages in transaction and holds assets and liabilities in currencies other than the Canadian dollar, its functional and presentation currency. Such currencies include the Australian dollar, US dollar, Euro, Swedish Krona, and the Mexican Peso. Otso does not hedge its exposure for foreign currencies.

#### 9.5.2. Interest rate risk

Interest rate risk is the risk that interest rate fluctuations will affect the Company's operating and financial results. Management does not believe that the Company is exposed to significant interest rate risk as its debt incurs interest at a fixed rate.

#### 9.5.3. Commodity price risk

The nature of the Company's operations results in exposure to fluctuations in commodity prices. Commodity prices are impacted by global economic events that dictate the levels of supply and demand. Otso's management continuously monitors commodity prices and may consider instruments to manage exposure to these risks when it deems appropriate.

The Company is exposed to commodity price risk with respect to the price of gold. Commodity price risk is defined as the potential impact on earnings and economic value due to price movements. The Company closely monitors prices of gold to determine the appropriate course of action to be taken by the Company. Price risk could adversely affect the Company. In particular, the Company's future profitability and viability of development depends upon the market price of gold.

## 10. FORWARD LOOKING STATEMENTS

This Management's Discussion and Analysis of Financial Condition and Results of Operations contain certain forward- looking statements. Forward-looking statements include but are not limited to the timing and amount of estimated future production, costs of production, capital expenditures, costs and timing of the development of new deposits, success of exploration activities, permitting time lines, currency fluctuations, requirements for additional capital, environmental risks, unanticipated reclamation expenses, title disputes or claims and limitations on insurance coverage and the timing and possible outcome of pending litigation. In certain cases, forward-looking statements can be identified by the use of words such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes" or variations of such words and phrases, or statements that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved. Forward- looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such risks and uncertainties include, among others, the actual results of current exploration activities, conclusions or economic evaluations, changes in project parameters as plans continue to be refined, possible variations in grade and or recovery rates, failure of plant, equipment or processes to operate as anticipated, accidents, labour disputes or other risks of the mining industry, delays in obtaining government approvals or financing or incompleteness of development or construction activities, risks relating to the integration of acquisitions, to international operations, and to the prices of gold and other metals. While the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking

RESTATED MANAGEMENT'S DISCUSSION AND ANALYSIS  
FOR THE PERIOD ENDED APRIL 30, 2021

statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. The Company expressly disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise except as required by law.

## 12. Disclosure Controls and Procedures

In connection with National Instrument 52-109 (Certificate of Disclosure in Issuer's Annual and Interim Filings) ("NI 52-109"), the Chief Executive Officer and Chief Financial Officer of the Company have filed a Venture Issuer Basic Certificate with respect to the financial information contained in the Financial Statements for the period ended April 30, 2021 and this accompanying MD&A (together, the "Annual Filings").

In contrast to the full certificate under NI 52-109, the Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures and internal control over financial reporting, as defined in NI 52-109. For further information, the reader should refer to the Venture Issuer Basic Certificates filed by the Company with the Annual Filings on SEDAR at [www.sedar.com](http://www.sedar.com).

The Audit Committee of the Company has approved the disclosure contained in this MD&A.
