PPX Mines 10,065 Tonnes Grading 9.43 gpt Au at Mina Callanquitas During Q4 2020; 29,696 Tonnes Grading 9.64 gpt Au for Full Year

Vancouver, British Columbia – February 24, 2021 – PPX Mining Corp. (the "Company" or "PPX") is pleased to announce that over 10,065 tonnes of ore grading 9.43 gpt gold were mined and processed during calendar Q4 (October - December) 2020 at Mina Callanquitas, a rate of approximately 109 tonnes/day. In addition, 771 metres of lateral mine development were also completed during the quarter. Highlights of mining results for calendar Q4 2020 are given below:

- The Company's mining partner Proyectos La Patagonia S.A.C. ("PLP") provided the Company with a detailed report on operations at Mina Callanquitas for calendar Q4 2020. PLP reports that 10,065 tonnes of gold mineralized ore mined at Callanquitas. Ore is processed at Planta Las Lomas ("Las Lomas"), located in the Department of Piura, Peru. Gold recoveries at Las Lomas ranged from 81% to 84%, resulting in the production of 3,800 ounces of gold, including the processing of ore mined in the previous quarter. To date, PPX has mined over 125,000 tonnes from the Measured and Indicated Resource at Mina Callanquitas which is a portion of the project's Mineral Reserves as defined in the Igor Pre-Feasibility Study ("PFS"), available on the Company's website or SEDAR.
- For the full calendar year 2020, Mina Callanquitas produced 29,696 tonnes of ore grading 9.64 gpt gold. Total gold recovered was 6,226 ounces. In addition, 2,159 metres of lateral mine development were completed during 2020 with the mine now open on five separate levels. Both mine production and gold produced were adversely impacted by COVID-related operational restrictions during calendar Q2 and Q3.

Cease Trading Order:

The Company is in the process of completing all required filings needed to be released from the Cease Trade Order issued by the British Columbia Securities Commission, including its 2020 Audited Annual Financial Statements and associated Management Discussion and Analysis. We expect to resume trading shortly when these filings are completed.

Coronavirus/COVID-19 Information:

Currently, all PPX and Sienna Minerals S.A.C. employees are working from home in accordance with their individual government recommendations and mandates. This status will continue for the foreseeable future, again under the guidance of respective local authorities.

About PPX Mining Corp:

PPX Mining Corp. (TSX.V: PPX.V, SSE: PPX, BVL: PPX) is a Canadian-based mining company with assets in northern Peru. Igor, the Company's 100%-owned flagship gold and silver project, is located in the prolific Northern Peru gold belt in eastern La Libertad Department. PPX is developing the Callanquitas Mine and heap leach facility to exploit high grade, underground-minable oxidized gold and silver ore.

Based on the Company's Pre-Feasibility Study ("PFS"), PPX expects the Callanquitas Mine to produce up to 26,000 AuEq* ounces per year over a seven-year mine life at cash cost of less than US\$610/AuEq* ounce (the Igor PFS is available on the Company's website and SEDAR). Simultaneously, PPX is accelerating its exploration program at Igor in order to fully evaluate the resource potential of the entire Igor project area. The Callanquitas structure is open along strike and at depth, parallel structures are unexplored. New discoveries at Portachuelos, coupled with the Domo and Tesoros exploration targets, emphasize that the Igor Project is evolving into a district-scale project with multiple deposits and mineralized zones.

*AuEq is calculated as follows: AuEq ounces = Au ounces + Ag ounces/75. Per PFS, inclusive of metallurgical recovery.

All scientific and technical information in this press release has been reviewed and approved by Quentin J. Browne, P.Geo., Independent Consulting Geologist to PPX Mining Corp., who is a qualified person under the definitions established by National Instrument 43-101.
