Job Description

Company Description

Anglo American Steelmaking Coal

Steelmaking coal is an essential ingredient in blast-furnace steel manufacture, producing steel used for critical building and infrastructure around the world. In Australia, we operate five steelmaking coal mines in Queensland's Bowen Basin, and have additional joint venture interests in steelmaking coal and manganese, as well as copper exploration projects underway in North West Queensland and Western Australia.

Job Description

We would like to invite applications from experienced Dragline operators to join our Dawson Mine site team. The Dawson operation is a large open-cut coal mining operation showing no signs of slowing down and estimating a whopping 16 years of operational mine life.

You will work as part of a team operating our BE1370 & Marion 8200 Draglines to produce Steelmaking Coal whilst demonstrating safe working behaviours and practices to achieve set targets.

Qualifications

To be successful in this role you will ensure compliance with all Anglo American safety and operating systems and a commitment to working together as part of a team to achieve business objectives. More specifically, you will:

- Be an experienced dragline operator with dozer skills
- Demonstrated knowledge in dragline set up, operations and dig methods
- Provide proof of your operating experience
- Display excellent interpersonal and communication skills
- Be a team player with a safety first mindset
- Drive optimization and continuous performance improvement

Additional information

- Full-time permanent position
- Dawson Mines Collective Enterprise Agreement 2021
- Lifestyle 5/4/4/5 Roster
- Camp or Housing accommodation
- **Anglo American are also now offering a \$10,000 sign on bonus and a \$15,000 retention bonus on your 6-month anniversary**

What we Offer

When you join Anglo American, you can expect to enjoy a competitive salary and benefits package. But more than this, you'll find yourself in an environment where the opportunities for learning and growth are second to none. From technical training to leadership programmes, we bring out the best in our people. There are plenty of opportunities to move onwards and upwards too. We're a large, successful multinational company – and we're still growing all the time.

Who we are

We aim to lead the industry by pursuing ever safer and more responsible ways of working, demonstrating integrity, and showing care and respect for people and the planet. That means we are constantly seeking new opportunities to mine and process our products sustainably, using less water, less energy and more precise extraction technologies. As the custodians of coal and other precious natural resources – diamonds (through De Beers), copper, platinum and other precious metals, iron ore and nickel – our extraordinary teams work safely and collaboratively, with the utmost consideration for local communities, our customers and the world at large.

Background checks

Successful candidates will be required to complete background screening which may include a criminal check and validation of qualifications.

Inclusion and Diversity

At Anglo American, we embrace change and promote an inclusive and diverse environment where you can bring your whole self to work, every day. We are adopting new approaches to recruitment, talent development, mentoring, parental leave, and flexible working to further support diversity across our business.

How we are committed to your safety

Nothing is more important to us than ensuring you return home safely after a day's work. To make that happen, we have the most rigorous safety standards in the industry. Not only that, we're also continually investing in new technologies – from drones to data analytics – that are helping to make mining safer.

Employee referral

Do you know someone who would fit this role? Employee referrals will be accepted for this job. Refer to your local Referral Guidelines for policy conditions and amounts.

How to apply

To apply for this role, please complete our online application form. You will have the opportunity to upload your CV and other relevant documentation as part of this process.

#REF32034Q

CLOSING DATE

5 JANUARY 2023

Please note, screening and interviews may take place prior to closing date – applications may also close before this date.

Recruitment Agencies

Anglo American Steelmaking Coal does not accept unsolicited applications from Recruitment Agencies.

Specialization: Mining, Resources & Energy
