CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION AND STATEMENTS

Certain information, statements, beliefs and opinions in this presentation are forward-looking statements or forward-looking information, within the meaning of applicable Canadian securities legislation. All statements other than those of historical facts included in this presentation are forward-looking statements. These statements include, without limitation, financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future value, production, operations, exploration goals and targets, costs, products and services, and statements regarding future performance, projections and expectations relating to Allied Gold Corporation ("Allied" or the "Company"). Forward-looking statements are generally identified by the words "plans," "expect," "anticipates," "believes," "intends," "estimates", "targets", "forecast" and other similar expressions. All forward-looking statements involve a number of risks, uncertainties and other factors. Investors are cautioned that forwardlooking information and statements are subject to various risks and uncertainties, many of which are difficult to predict and generally beyond the control of Allied, that could cause actual results and developments to differ materially from those expressed in, or implied or projected by, forward-looking information and statements contained in this presentation. Factors that could cause or contribute to differences between the actual results, performance and achievements of Allied, include, but are not limited to, political, economic and business conditions; industry trends; competition; fluctuations in the spot and forward price of gold or certain other commodity prices; changes in regulation; risks relating to operating in emerging markets (particularly in the region of West Africa); risks relating to infectious diseases; currency fluctuations (including the US Dollar, Euro, West African CFA Franc, Ethiopian Birr exchange rates); risks relating to climate change, counterparty, credit, liquidity and interest rate risks; Allied's ability to successfully complete and integrate future acquisitions, to recover its Mineral Reserves or develop new Mineral Reserves, including its ability to convert its Mineral Reserves and its ability to turn exploration efforts into Mineral Reserves or Mineral Reserves; trespass, theft and vandalism; changes in its business strategy; the Company's current financing initiatives not being completed on the timelines currently expected: as well as risks and hazards associated with the business of mineral exploration. development, mining and production generally, and such other risks as are set out in Allied's current Annual Information Form dated March 28, 2024 available under Allied's profile on SEDAR+ at www.sedarplus.ca, Any forward-looking statements in this presentation speak only as of the date of this presentation and reflect the reasonable assumptions of management based on information available to it at the time of preparation. Subject to the requirements of the applicable Canadian securities laws. Allied explicitly disclaims any obligation or undertaking publicly to update or revise any forward-looking statements contained in this presentation, whether as a result of new information, future events or otherwise. Accordingly, investors should not place reliance on forward-looking statements contained in this presentation. This presentation also contains financial outlooks, within the meaning of applicable Canadian securities laws, regarding Allied's prospective results of operations. Any financial outlooks are subject to the same assumptions, risk factors, limitations and gualifications as set forth above. Allied has included the forward-looking information and financial outlooks to provide an outlook of management's expectations regarding anticipated activities and results, and such information may not be appropriate for other purposes. Allied believes that the financial outlooks have been prepared on a reasonable basis, reflecting management's reasonable estimates and judgements; however, actual results of operations and the resulting financial results may vary from the amounts set forth herein. Any financial outlook information speaks only as of the date on which it is made and Allied undertakes no obligation to update or revise any financial outlook, except in accordance with Canadian securities law requirements.

CAUTIONARY NOTES TO INVESTORS - MINERAL RESERVE AND MINERAL RESOURCE ESTIMATES

All Mineral Reserve and Mineral Resource estimates of Allied disclosed or referenced herein are presented in accordance with the disclosure standards of National Instrument 43-101 - *Standards of Disclosure for Mineral Projects* of the Canadian Securities Administrators ("NI 43-101") and have been classified in accordance with the 2014 Canadian Institute of Mining, Metallurgy and Petroleum Definition Standards for Mineral Resources and Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. See "Appendix A: Mineral Reserve Estimates", for a breakdown of Mineral Reserve and Mineral Reserve estimates for Allied, which have an effective date of December 31, 2023.

CAUTIONARY NOTE TO U.S. INVESTORS REGARDING ESTIMATES OF MEASURED, INDICATED AND INFERRED MINERAL RESOURCES

This presentation uses the terms "Measured", "Indicated" and "Inferred" Mineral Resources as defined in accordance with NI 43-101. United States readers are advised that while such terms are recognized and required by Canadian securities laws, the United States Securities and Exchange Commission does not recognize them. Under United States standards, mineralization may not be classified as a "reserve" unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve calculation is made. United States readers are cautioned not to assume that all or any part of the mineral deposits in these categories will ever be converted intor, "Inferred Mineral Resources" have a great amount of uncertainty as to their existence, and as to their existence, and that all or any part of an Inferred Resource will ever be upgraded to a higher category. United States readers are also cautioned not to assume that all or any part of an Inferred Mineral Resource exists or is economically or legally mineable.

SCIENTIFIC AND TECHNICAL INFORMATION

Unless otherwise stated, the qualified person for the scientific and technical information contained in this presentation is Sébastien Bernier, P.Geo (Vice President, Technical Performance and Compliance). Mr. Bernier, an employee of Allied and a "Qualified Person" as defined by Canadian Securities Administrators' National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101"), has reviewed and approved the scientific and technical information, including all Mineral Reserve and Mineral Resource estimates. No limitations were placed on Mr. Bernier's verification process.

CURRENCY

All dollar amounts in this presentation are stated in U.S. dollars.

CAUTIONARY STATEMENT REGARDING NON-GAAP MEASURES

Allied has included certain non-GAAP financial performance measures, which it believes provide investors with an improved ability to evaluate the underlying performance of Allied. Non-GAAP financial performance measures do not have any standardized meaning prescribed under IFRS, and therefore they may not be comparable to similar non-GAAP financial performance measures employed by other companies. The data is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The non-GAAP financial performance measures used in this presentation include: (i) Cash costs per gold ounce sold; (iii) AISC per gold ounce sold; (iii) Alloger gold ounce sold; (iii) Alloger gold ounce sold (v) Normalized cash flows. All operational and financial metrics are shown on 100% basis, except for NAV metrics which are shown on an attributable basis to reflect Allied's attributable interests. Reconciliations and descriptions associated with the above financial performance measures can be found in section 11 of the Company's Management's Discussion and Analysis for the quarter ended June 30, 2024 and the press release titled "Allied Gold Announces Second Quarter 2024 Results: Setting the Stage for a Strong Second Half with Critical Investments to Sustain Production and Realized Unparalleled Growth Potential" dated August 8, 2024 as filed on SEDAR+ at www.sedarplus.ca, which non-GAAP disclosure is incorporated by reference herein. The Company believes that in addition to conventional measures prepared in accordance with IFRS, the Company and certain investors and analysts use this information of Non-GAAP measures for Allied. Because for a breakdown of Non-GAAP measures for Allied.

THIRD PARTY INFORMATION

This presentation includes market and industry data which was obtained from various publicly available sources and other sources believed by Allied be true. Although Allied believe it to be reliable, it has not independently verified any of the data from third party sources referred to in this presentation or analyzed or verified the underlying reports relied upon or referred to by such sources, or ascertained the underlying assumptions relied upon by such sources. Allied does not make any representation as to the accuracy of such information.

2nd QUARTER OPERATING CASH FLOW BEFORE TAX AND WORKING CAPITAL

OPERATING RESULTS SUMMARY

	For three months ended June 30					
	2024 2023					
GOLD OUNCES						
Production	88,135	85,983				
Sales	84,611	75,373				

PER GOLD OUNCE SOLD (Q2 2024 VERSUS prior periods)

Q2 2024 RESULTS

Executing Financing Strategy⁽¹⁾

- Based on recent gold prices, the Company expects to be fully financed through cash flows. However, as a precaution to avoid dependence on gold prices, Allied is actively pursuing non-dilutive alternatives:
 - **Côte d'Ivoire streaming agreement** On August 7, 2024, the Company entered into a streaming transaction with Triple Flag International Ltd., a wholly-owned subsidiary of Triple Flag Precious Metals Corp. Under the terms of the agreement, Allied will receive a \$53.0 million upfront cash payment and an ongoing payment equal to 10% of the spot gold price. Triple Flag will have the right to purchase 3% of the payable gold produced at the Agbaou and Bonikro mines, subject to a step-down to 2% after set delivery thresholds. Closing is expected to be completed shortly.
 - Kurmuk funding package Given the competitive cost of capital realized via the Côte d'Ivoire stream and strong market feedback, Allied is arranging a minimum \$250 million Kurmuk funding package comprising a gold stream and a gold prepay facility for the Kurmuk development project. The gold prepay facility will bring forward cash flow with a built-in price hedge, starting deliveries after Kurmuk's anticipated mid-2026 construction timeframe. This deal is expected to close by the end of September 2024.
 - Other financing items The Company continues to explore non-dilutive, alternative sources of capital to both enhance financial flexibility and unlock the intrinsic value of its currently undervalued asset portfolio.

This comprehensive financing strategy is prompted by the current capital markets not fully capturing the inherent value of the Company's assets, leading Allied to seek alternative sources of capital that offer low-cost options with the added benefit of more accurately reflecting true value to market participants.

Allied Gold's positive operating trends are being complemented by a comprehensive financial strategy to advance fullyfunded growth initiatives

Project Updates⁽¹⁾

Kurmuk Project

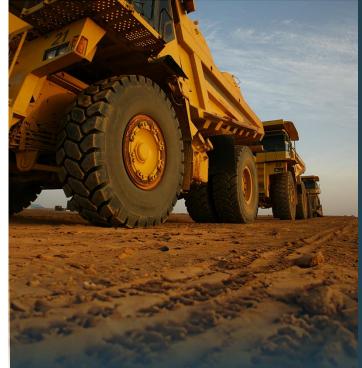

- **Engineering and Procurement:** EPCM activities advancing according to plan, with long lead items orders placed and critical paths packages awarded, including ball mill, plant site earthworks and camp construction
- **Early Works:** The construction water dam was completed on schedule by a local contractor, and it is performing well. The construction camp build is advancing, with earthworks, civil works, and erection of modules for the main 1,600-person camp ongoing
- **H2 2024:** Focus on the second half of the year is the completion of the earthworks at the plant site followed by civil construction, bulk earthworks at the Main Water Dam and haulage road construction and mine pioneering along with continuing expanding the camp to its second phase.
- **Exploration:** Efforts continued to yield positive results in the second quarter, with positive exploration results at Kurmuk's Dish Mountain and Tsenge confirming the high prospectivity of the property

Sadiola Expansion

- 2024-2025 Phase 1 Expansion: Pre-construction activities are progressing well, with detailed engineering, procurement, and execution planning continuing and targeting commencement of early works in Q4 2024. This first investment is expected to increase the processing capacity to 5.7 Mt/y with up to 60% of fresh rock in the feed. This sets the stage for the integrated SSP expansion at Sadiola, with the first phase being a necessary and integrated component of the expansion plan and allowing for optimization work to improve recoveries
- **Optimization Strategy:** The financing strategy presented will provide the Company further financial flexibility to apply cash flows from existing operations, which are expected to increase because of ongoing operational improvements, toward possible acceleration of expansion plans at Sadiola and the advancement of studies to significantly increase metallurgical recoveries, thereby maximizing value creation and returns to shareholders
- **Exploration:** Drilling aimed at extending mineralization at Sekekoto West along strike to the north has defined over 1 km of continuous strike, and at FE2.5 exploratory drilling has also defined approximately 1km of oxide mineralization and further work is planned to increase oxide inventories is planned for Q3

Robust cash flows from producing assets will support development projects across the Company

Second Quarter Financial Performance

The Company is optimizing the operations of its producing assets while developing its high-potential assets

• Adjusted net earnings per share of \$0.06

- Operating cash flows before tax and net change in working capital of \$56.9 million
- Net cash used in operating activities for the quarter was impacted by the anticipated income tax payments in Q2, as well as working capital movements including the timing of receipt of VAT credits, the buildup of inventory stockpiles and finished goods awaiting shipment
- Cash flows from operating activities are expected to materially increase through the remainder of 2024, with increased production contributions and lower costs driving sequential improvements⁽⁴⁾ through the remainder of the year
- Administration scalability and growth-oriented strategy to deliver improved G&A costs on an absolute and per ounce basis
- Cash and cash equivalents were \$78.0 million as at June 30, 2024 after having spent \$43.5 million in Q2 on the Company's exploration, sustaining capital and development plans

Quarterly Financial Highlights

	2Q 2024	2Q 2023

2024 Guidance^(1,3)

Gold Production 375,000 – 405,000 ounces

First Half: 45%, Second Half: 55%

Cash Costs⁽²⁾ \$1,250/oz

Mine-Site All-in Sustaining Costs⁽²⁾ \$1,400/oz Includes sustaining capital and pre-stripping costs⁽³⁾

Total Exploration \$32.0 million

Expansionary Capital \$198.5 million

Notes:

1. See Disclaimers and Cautionary Statement Regarding Forward-Looking Information and Statements; Production figures are displayed on a 100% basis

2. All references herein to cash costs and AISC are to a non-GAAP financial measure and ratio, for which the closest IFRS financial measure is cost of sales. See Disclaimer and Cautionary Statement Regarding Non-GAAP Measures, and Appendix B.

3. 2024 sustaining capital is guided to \$29.5 million with pre-stripping of ~\$25 million for PB5 at Bonikro being incremental to the sustaining capital and which is included in the guided AISC.

2024 is set to deliver increased production at lower costs

Significant expansion projects are underway, while exploration continues to add upside across the Company's asset portfolio, aligning with the longterm vision of becoming Africa's next senior gold producer

Sustainability

Safety and Environmental Performance

- The Company did not report any significant Environmental Incidents for the three months or six months ended June 30, 2024
- For the quarter ended June 30, 2024, the Company reported 2 Lost Time Injuries ("LTI"), resulting in a Lost Time Injury Rate ("LTIR") of 0.54⁽¹⁾
- Published 2023 Sustainability Report, inaugural publication as a listed company
- Implemented new corporate sustainability policies for health and safety, the environment, and social responsibility
 - These policies establish Allied Gold's vision for sustainability and will ultimately guide the company's performance
- Allied Gold has demonstrated its commitment to evolving international best practices, standards, and external reporting and assessment

Allied Gold Africa's Next Leading Gold Producer⁽¹⁾

- Upcoming Milestones:
 - November 2024 exploration and resource update
 - Q3 2024 financial and operating results scheduled for release on November 8th
 - Update on financial plan
 - Update on plans to accelerate expansion of Sadiola
 - Trading on the OTCQX Best Market is expected to commence in August under the symbol "AAUCF"
 - The OTCQX Best Market is the highest market tier of OTC Markets on which over 12,000 U.S. and global securities trade
 - > Trading on OTCQX will enhance the visibility and accessibility of the Company to U.S. investors

Allied is also advancing strategic integrations and enhancements across its mining sites to further bolster performance and drive long-term growth.

Agbaou	7.5	0.5	6.0		
Kurmuk	-	155.0	7.5		
Corporate	4.0	7.0	-		
Total	29.5	198.5	32.0		

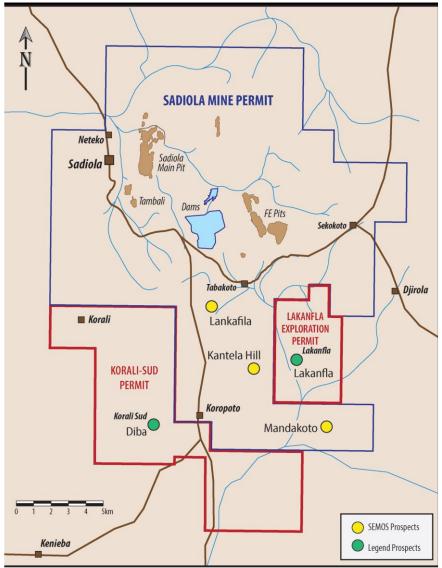

Total DDA \$55M Cash income taxes paid \$60M (assumes \$2,000/oz Au)

See Disclaimers and Cautionary Statement Regarding Forward-Looking Information and Statements; Production figures are displayed on a 100% basis. References to Cash Costs and AISC are to non-GAAP measures. See Disclaimer and Cautionary Statement Regarding Non-GAAP Measures, and Appendix B herein. Allied offers this cost guidance within a range of +/- 2%, with the guided figure representing the range's midpoint. Pre-stripping costs of "\$25 million for PB5 at Bonikro are incremental to the sustaining capital noted above and are included in the guided AISC.

Sadiola Overview⁽¹⁾

- Large-scale open-pit mine set for transformational growth and optimizations over an estimated 19-year LOM; Allied owns 80% with Mali government holding a 20% interest
- Significant and growing mineral inventory: Mineral Reserves increased by ~187% of depletion in 2023 to 7.4 Moz Au⁽²⁾
- **Phase 1 Expansion:** Pre-construction activities progressing well as part of broader plan for Sadiola as it transitions from producing gold from oxide ore to fresh rock
- Manageable Capex: Phase 1 total capital expenditure of ~\$61.6 million scheduled for execution in 2024 and 2025, increasing gold production from ~175koz/yr to ~200koz/yr until 2028 based on Mineral Reserves only⁽³⁾ and targeting upwards of 230koz/yr during the outlook period
- **Phase 2 Expansion:** New processing facility for higher-grade fresh ore starting in 2029, targets average production increasing to 400koz/yr for the first four years and 300koz/yr over the mine life, lowering AISC below US\$1,000 per gold ounce^(3,5) for incremental development capital of ~\$400 million interest

Guidance and longer-term Outlook & Strategy^(3,5)

- See Disclaimers and Cautionary Statement Regarding Forward-Looking Information and Statements; Production figures are displayed on a 100% basis.
- Mineral Reserves and Mineral Resources (M&I is inclusive of reserves) are displayed on 100% basis as of December 31, 2023. Further details including tonnes, grade and assumptions are presented in the full mineral reserves and mineral resources estimates in Appendix A herein. Allied's ownership of Sadiola is 80%. M&I Resources are constrained within an US\$1,800/oz pit shell whereas the Mineral Reserves were informed by a US\$1,500/oz gold price.
- Production based on 2024 guidance and 2025 and 2026 outlook. AISC provided at mine-level +/-2%. For periods with multiple years, figures represent the approximate average annual production for each period under consideration based on management guidance, outlook and strategic vision. See Disclaimers and Cautionary Statement Regarding Non-GAAP Measures in Appendix B.

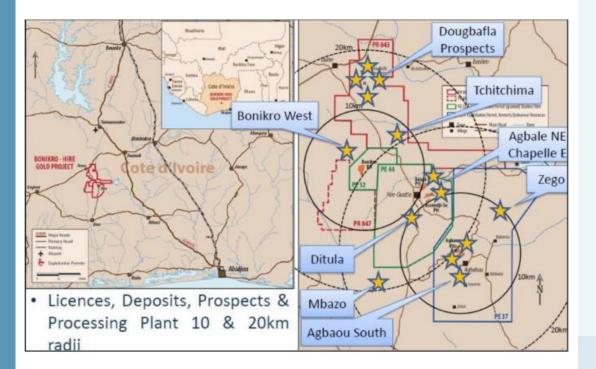

On November 9, 2023, Allied closed its acquisition of the permitted Korali-Sud Small Scale Mining License as well as the Lakanfla Exploration License (which are collectively known as the Diba Project) from Elemental Altus Royalties Corp pursuant to the terms of a share purchase agreement. The Company has reviewed the model and economic analysis by Elemental, and is targeting mining the HG ore from Diba to be processed at the Sadiola plant.

All references herein to AISC are to a non-GAAP financial measure and ratio, for which the closest IFRS financial measure is cost of sales. See Disclaimer and Cautionary Statements Regarding Non-IFRS Measures herein, and Appendix B.

 Ш С

Notes

Côte d'Ivoire Operating Complex Overview⁽¹⁾

- Open pit gold mining complex located ~20km apart, offering synergies and exploration potential
 - Allied ownership: Agbaou 85%, Bonikro 89.9%
- **Infrastructure advantage:** Combined milling capacity and infrastructure provides synergies and optionality
- **Progressing optimization and integration:** Board approved plan to capture synergies covering the highly prospective Greenstone Belt
- New LOM Plan at Agbaou: Agbaou's performance is set to materially improve by incorporating high-grade Agbalé ore in the short term, and extending mine life to 2028 based on updated Mineral Reserves
- Setting Up for Future Success at Bonikro: Near-term production and costs at Bonikro are expected to sequentially improve through the outlook period, with costs declining to below a mine-site AISC of \$1,050/oz by 2026, following the stripping phase that exposes higher-grade material in 2025 and 2026^(3,4)
- **Extended strategic value:** Strategic mine life of 10+ years at 180- 200koz/yr Au expected with significant exploration potential
- Upside potential via targeted drilling: Further upside potential from Oume, including advanced resource drilling at Oume West and North, Agbalé as well as resource drilling at Akissi-So and others

See Disclaimers and Cautionary Statement Regarding Forward-Looking Information and Statements; Production figures are displayed on a 100% basis.

Mineral Reserves and Mineral Resources (M&i is inclusive of reserves) are displayed on 100% basis as of December 31, 2023. Further details including tonnes, grade and assumptions are presented in the full mineral reserves and mineral resources estimates in Appendix A. Agbaou is 85% owned, while Bonikro is 89.9% owner M&I Resources are constrained within an US\$1,800/oz pit shell whereas the Mineral Reserves were informed by a US\$1,500/oz gold price.

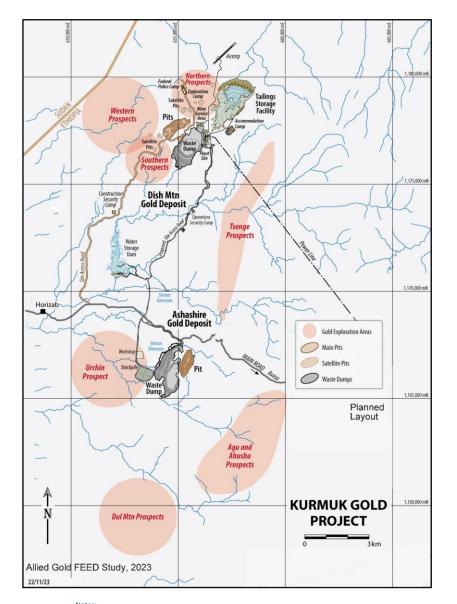

Production based on 2024 guidance and 2025 and 2026 outlook. AISC provided at mine-level +/-2%. For periods with multiple years, figures represent the approximate average annual production for each period under consideration based on management guidance and outlook. See Disclaimers and Cautionary Statement Regarding Non-GAAP Measures in Appendix B.

SUL'

Ш

Ľ

Kurmuk Overview⁽¹⁾

- Accretive ownership consolidation: Increased ownership to 93% with remaining 7% held by the Ethiopian government
- Phased, expanded project: A plus 240,000-ounce-per-year gold mine with an AISC target of <US\$950/oz and a strategic mine life extending for an initial 15 years^(3,4)
- **Manageable capex:** \$155 million of capital to be spent in 2024; total capital requirement of \$500 million with the first gold pour expected in mid-2026, with contribution of >175,000 ounces for that year
- **Fully-permitted, shovel ready project:** Project has EIA approval and a largescale mining license granted in 2021 for 20 years over a 100km² area covering the Dish Mountain and Ashashire deposits plus 1,450 km²+ exploration tenure
- Construction Progressing: Early works, engineering, civil, infrastructure and earthworks among others
- **Exploration upside:** Mineral Resource growth expected beyond the Dish Mountain and Ashashire deposits, which are the two initial open pits housing all current Mineral Reserves
 - Ongoing exploration has revealed significant gold mineralisation along a 9kilometer strike length
 - Recent exploration results mark a critical step toward defining a considerable body of mineralization at Tsenge, supporting Allied Gold's strategy to significantly extend and improve Kurmuk's production profile and augment Mineral Resources

Illustrative Gold Production and AISC Trend^(3,4)

S

RESUL

Kurmuk Project Update⁽¹⁾

Execution Planning

 Completed execution planning and preparation activities, including mobilizing the EPCM contractor to the site, advancing detailed engineering, formalizing, and executing the procurement plan

Engineering and Procurement:

- Ball mill order has been placed, expected to be delivered by mid-next year; SAG mill already owned
- Other key packages are progressing according to schedule

Construction and Local Engagement:

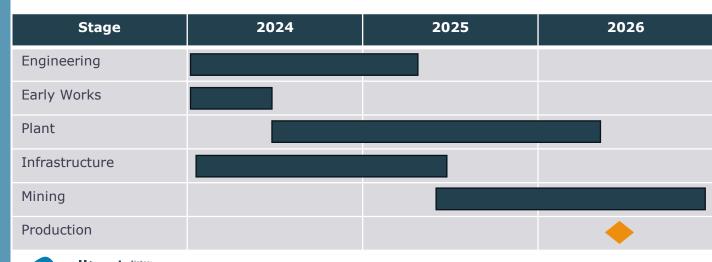

- The water dam has been completed on schedule and is now full
- The construction camp build is advancing

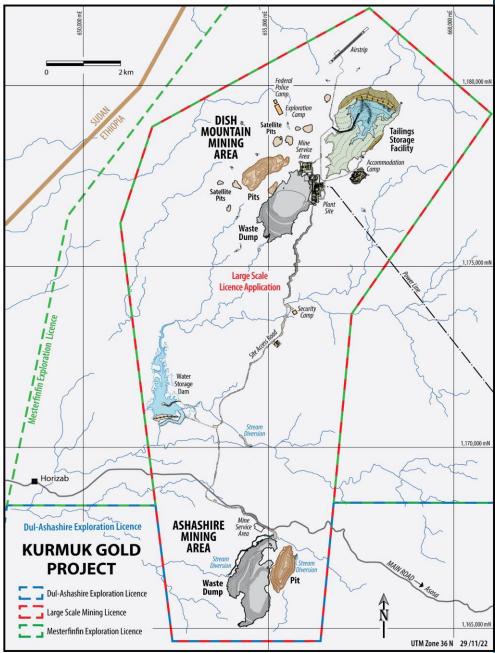

Local Stakeholder Engagement:

• The Company is dedicated to strong community relationships, and several initiatives have been advancing with national, regional, and local stakeholders

• Operational Readiness:

• Planning and preparation activities underway, including the recruitment of the General Manager and other operating positions

D2 2024 RESULTS

References to AISC are to a non-GAAP measure, for which the closest IFRS financial measure is cost of sales. See Disclaimer and Cautionary Statement Regarding Non-GAAP Measures herein, and Appendix B herein.

Appendix A Year-End 2023 Mineral Reserves and Resources

Reporting Notes

SADIOLA

Mineral Resources:

• The Sadiola Mineral Resource Estimate is listed at 0.5 g/t Au cut-off grade, constrained within an US\$1,800/oz pit shell and depleted to December 31, 2023

Mineral Reserves:

- Reflects that portion of the Mineral Resource which can be economically extracted by open pit methods
- Considers the modifying factors and other parameters, including but not limited to the mining, metallurgical, social, environmental, statutory and financial aspects of the project
- Includes an allowance for mining dilution at 8% and ore loss at 3%
- A base gold price of US\$1,500/oz was used for the pit optimization, with the selected pit shells using values of US\$1320/oz (revenue factor 0.88) for Sadiola Main and US\$1,500/oz (revenue factor 1.00) for FE3, FE4, Diba, Tambali and Sekekoto
- The cut-off grades used for Mineral Reserves reporting were informed by a US\$1,500/oz gold price and vary from 0.31 g/t to 0.73 g/t for different ore types due to differences in recoveries, costs for ore processing and ore haulage

KURMUK

Mineral Resources:

• The Kurmuk Mineral Resource Estimate is listed at 0.5 g/t Au cut-off grade and constrained within an US\$1,800/oz pit shell

Mineral Reserves:

- Reflects that portion of the Mineral Resource which can be economically extracted by open pit methods
- Considers the modifying factors and other parameters, including but not limited to the mining, metallurgical, social, environmental, statutory and financial aspects of the project
- + Includes an allowance for mining dilution at 18% and ore loss at 2%
- A base gold price of US\$1,500/oz was used for the pit optimization, with the selected pit shells using values of US\$1,320/oz (revenue factor 0.88) for Ashashire and US\$1,440/oz (revenue factor 0.96) for Dish Mountain
- The cut-off grades used for Mineral Reserves reporting were informed by a US\$1,500/oz gold price and vary from 0.30 g/t to 0.45 g/t for different ore types due to differences in recoveries, costs for ore processing and ore haulage

Appendix A Year-End 2023 Mineral Reserves and Resources

Reporting Notes

BONIKRO

Mineral Resources:

 The Mineral Resource estimate for Bonikro and Agbalé are listed at 0.5 g/t Au cut-off grade, constrained within an US\$1,800/oz pit shell and depleted to December 31, 2023

Mineral Reserves:

- Reflects that portion of the Mineral Resource which can be economically extracted by open pit methods
- Considers the modifying factors and other parameters, including but not limited to the mining, metallurgical, social, environmental, statutory and financial aspects of the project
- Includes an allowance for mining dilution at 8% and ore loss at 5%
- A base gold price of \$1,500/oz was used for the Mineral Reserves for the Bonikro pit:
 - With the selected pit shell using a value of \$1,388/oz (revenue factor 0.925)
 - Cut-off grades vary from 0.68 to 0.74 g/t Au for different ore types due to differences in recoveries, costs for ore processing and ore haulage
- A base gold price of \$1,800/oz was used for the Mineral Reserves for the Agbalé pit:
 - With the selected pit shell using a value of US\$1,800/oz (revenue factor 1.00).
 - Cut-off grades vary from 0.58 to 1.00 g/t Au for different ore types to the Agbaou
 processing plant due to differences in recoveries, costs for ore processing and ore
 haulage

AGBAOU

Mineral Resources:

 The Agbaou Mineral Resource Estimate is listed at 0.5 g/t Au cut-off grade, constrained within an US\$1,800/oz pit shell and depleted to December 31, 2023

Mineral Reserves:

- Reflects that portion of the Mineral Resource which can be economically extracted by open pit methods
- Considers the modifying factors and other parameters, including but not limited to the mining, metallurgical, social, environmental, statutory and financial aspects of the project
- Includes an allowance for mining dilution at 26% and ore loss at 1%
- A base gold price of \$1500/oz was used for the Mineral Reserves for the:
 - Pit designs (revenue factor 1.00) apart from North Gate (Stage 41) and South Sat (Stage 215) pit designs which used a higher short term gold price of \$1,800/oz and account for 49 koz or 10% of the Mineral Reserves
 - Cut-off grades which range from 0.49 to 0.74 g/t for different ore types due to differences in recoveries, costs for ore processing and ore haulage

Appendix B Non-GAAP Financial Measures

NON-GAAP FINANCIAL PERFORMANCE MEASURES

The Company has included certain non-GAAP financial performance measures and ratios to supplement its Consolidated Financial Statements, which are presented in accordance with IFRS, including the following: (i) Cash costs per gold ounce sold; (ii) AISC per gold ounce sold; (iii) Gross profit excluding Depreciation and Amortization; (iv) Sustaining, Expansionary and Exploration Capital Expenditures; and (v) Adjusted Net Earnings (Loss) and Adjusted Net Earnings (Loss) per share.

The Company believes that these measures and ratios, together with measures determined in accordance with IFRS, provide investors with an improved ability to evaluate the underlying performance of the Company.

Non-GAAP financial performance measures, including cash costs and AISC, do not have any standardized meaning prescribed under IFRS, and therefore may not be comparable to similar measures employed by other companies. Non-GAAP financial performance measures intend to provide additional information, and should not be considered in isolation as a substitute for measures of performance prepared in accordance with IFRS and are not necessarily indicative of operating costs, operating earnings or cash flows presented under IFRS.

Management's determination of the components of non-GAAP financial performance measures and other financial measures are evaluated on a periodic basis, influenced by new items and transactions, a review of investor uses and new regulations as applicable. Any changes to the measures are described and retrospectively applied, as applicable. Subtotals and per unit measures may not calculate based on amounts presented in the following tables due to rounding.

The measures of cash costs and AISC, along with revenue from sales, are considered to be key indicators of a Company's ability to generate operating earnings and cash flows from its mining operations. This data is furnished to provide additional information and is a non-GAAP financial performance measure.

CASH COSTS PER GOLD OUNCE SOLD

Cash costs include mine site operating costs such as mining, processing, administration, production taxes and royalties which are not based on sales or taxable income calculations. Cash costs exclude DA, exploration costs, accretion and amortization of reclamation and remediation, and capital, development and exploration spend. Cash costs include only items directly related to each mine site, and do not include any cost associated with the general corporate overhead structure.

The Company discloses cash costs because it understands that certain investors use this information to determine the Company's ability to generate earnings and cash flows for use in investing and other activities. The Company believes that conventional measures of performance prepared in accordance with IFRS do not fully illustrate the ability of its operating mines to generate cash flows. The most directly comparable IFRS measure is cost of sales. As aforementioned, this non-GAAP measure does not have any standardized meaning prescribed under IFRS, and therefore may not be comparable to similar measures employed by other companies, should not be considered in isolation as a substitute for measures of performance prepared in accordance with IFRS, and is not necessarily indicative of operating costs, operating earnings or cash flows presented under IFRS.

Cash costs are computed on a weighted average basis, with the aforementioned costs, net of by-product revenue credits from sales of silver, being the numerator in the calculation, divided by gold ounces sold.

Appendix B Non-GAAP Financial Measures

AISC PER GOLD OUNCE SOLD

AISC figures are calculated generally in accordance with a standard developed by the World Gold Council ("WGC"), a non-regulatory, market development organization for the gold industry. Adoption of the standard is voluntary, and the standard is an attempt to create uniformity and a standard amongst the industry and those that adopt it. Nonetheless, the cost measures presented herein may not be comparable to other similarly titled measures of other companies. The Company is not a member of the WGC at this time.

AISC include cash costs (as defined above), mine sustaining capital expenditures (including stripping), sustaining mine-site exploration and evaluation expensed and capitalized, and accretion and amortization of reclamation and remediation. AISC exclude capital expenditures attributable to projects or mine expansions, exploration and evaluation costs attributable to growth projects, DA, income tax payments, borrowing costs and dividend payments. AISC include only items directly related to each mine site, and do not include any cost associated with the general corporate overhead structure. As a result, Total AISC represent the weighted average of the three operating mines, and not a consolidated total for the Company. Consequently, this measure is not representative of all of the Company's cash expenditures.

Sustaining capital expenditures are expenditures that do not increase annual gold ounce production at a mine site and excludes all expenditures at the Company's development projects as well as certain expenditures at the Company's operating sites that are deemed expansionary in nature, such as the Sadiola Phased Expansion, the construction and development of Kurmuk and the PB5 pushback at Bonikro. Exploration capital expenditures represent exploration spend that has met criteria for capitalization under IFRS.

The Company discloses AISC, as it believes that the measure provides useful information and assists investors in understanding total sustaining expenditures of producing and selling gold from current operations, and evaluating the Company's operating performance and its ability to generate cash flow. The most directly comparable IFRS measure is cost of sales. As aforementioned, this non-GAAP measure does not have any standardized meaning prescribed under IFRS, and therefore may not be comparable to similar measures employed by other companies, should not be considered in isolation as a substitute for measures of performance prepared in accordance with IFRS, and is not necessarily indicative of operating costs, operating earnings or cash flows presented under IFRS.

AISC are computed on a weighted average basis, with the aforementioned costs, net of by-product revenue credits from sales of silver, being the numerator in the calculation, divided by gold ounces sold.

GROSS PROFIT EXCLUDING DEPRECIATION AND AMORTIZATION

The Company uses the financial measure "Gross Profit excluding Depreciation and Amortization" to supplement information in its financial statements. The Company believes that in addition to conventional measures prepared in accordance with IFRS, the Company and certain investors and analysts use this information to evaluate the Company's performance.

Gross profit excluding Depreciation and Amortization is calculated as Gross Profit plus Depreciation and Amortization.

The Company discloses Gross Profit excluding Depreciation and Amortization because it understands that certain investors use this information to determine the Company's ability to generate earnings and cash flows. The Company believes that conventional measures of performance prepared in accordance with IFRS do not fully illustrate the ability of its operating mines to generate cash flows. The most directly comparable IFRS measure is Gross Profit. As aforementioned, this non-GAAP measure does not have any standardized meaning prescribed under IFRS, and therefore may not be comparable to similar measures employed by other companies, should not be considered in isolation as a substitute for measures of performance prepared in accordance with IFRS, and is not necessarily indicative of operating costs, operating earnings or cash flows presented under IFRS.

Appendix B Non-GAAP Financial Measures

ADJUSTED NET EARNINGS (LOSS) AND ADJUSTED NET EARNINGS (LOSS) PER SHARE

The Company uses the financial measures "Adjusted Net Earnings (Loss)" and the non-GAAP ratio "Adjusted Net Earnings (Loss) per share" to supplement information in its financial statements. The Company believes that in addition to conventional measures prepared in accordance with IFRS, the Company and certain investors and analysts use this information to evaluate the Company's performance.

Adjusted Net Earnings (Loss) and Adjusted Net Earnings (Loss) per share are calculated as Net Earnings (Loss) attributable to Shareholders of the Company, excluding non-recurring items, items not related to a particular periods and/or not directly related to the core mining business such as the following, with notation of Gains (Losses) as they would show up on the financial statements.

- · Gains (losses) related to the transaction events and other items,
- · Gains (losses) on the revaluation of historical call and put options,
- · Unrealized Gains (losses) on financial instruments and embedded derivatives,
- · Write-offs (reversals) on mineral interest, exploration and evaluation and other assets,
- Gains (losses) on sale of assets,
- Unrealized foreign exchange gains (losses),
- · Share-based (expense) and other share-based compensation,
- · Unrealized foreign exchange gains (losses) related to revaluation of deferred income tax asset and liability on non-monetary items,
- · Deferred income tax recovery (expense) on the translation of foreign currency inter-corporate debt,
- · One-time tax adjustments to historical deferred income tax balances relating to changes in enacted tax rates,
- · Non-recurring provisions,
- Any other non-recurring adjustments and the tax impact of any of these adjustments calculated at the statutory effective rate for the same jurisdiction as the adjustment.

Non-recurring adjustments from unusual events or circumstances are reviewed from time to time based on materiality and the nature of the event or circumstance.

Management uses these measures for internal valuation of the core mining performance for the period and to assist with planning and forecasting of future operations. Management believes that the presentation of Adjusted Net Earnings (Loss) and Adjusted Net Earnings (Loss) per share provide useful information to investors because they exclude non-recurring items, items not related to or not indicative of current or future periods' results and/or not directly related to the core mining business and are a better indication of the Company's profitability from operations as evaluated by internal management and the board of directors. The items excluded from the computation of Adjusted Net Earnings (Loss) and Adjusted Net Earnings (Loss) per share, which are otherwise included in the determination of Net Earnings (Loss) and Net Earnings (Loss) per share prepared in accordance with IFRS, are items that the Company does not consider to be meaningful in evaluating the Company's past financial performance or the future prospects and may hinder a comparison of its period-to-period profitability.

The most directly comparable IFRS measure is Net Earnings (Loss). As aforementioned, this non-GAAP measure does not have any standardized meaning prescribed under IFRS, and therefore may not be comparable to similar measures employed by other companies, should not be considered in isolation as a substitute for measures of performance prepared in accordance with IFRS, and is not necessarily indicative of operating costs, operating earnings or cash flows presented under IFRS.
