

Bravada Gold Corporation is a premier Nevada-focused exploration and development company, exploring for precious metals in well-established gold trends in one of the world's best gold jurisdictions. The company has a portfolio of high-quality properties covering a range of development stages from early-stage exploration to pre-development, often working with partners that typically fund up to ~\$1MM each year advancing the properties. In 2022 Bravada commissioned a Phase I PEA for Wind Mountain, demonstrating attractive economics.

BVA is De-risking the Wind Mtn Property for Production, One of 10 Exploration & Development Properties in Nevada

NEVADA FACTS

- Produces approximately >5MM ounces of gold per year, roughly 7% of the world total, approximately a quarter from underground mines
- Proven + probable gold reserves are stable, approximately 75MM ounces, - replacing production nearly every year
- Production over 200MM oz Au
- 67% of Nevada is federal government land open to exploration
- Stable environmental regulations, economy and mining infrastructure
- Consistently ranked within the top 5 gold jurisdictions in the world to explore and mine by the Canadian Fraser Institute
- Many recent successes with **deeper drilling beneath barren surface showings**

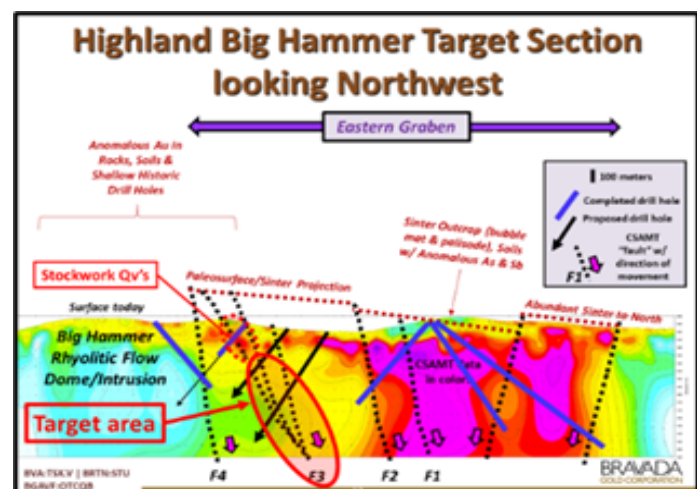

Wind Mountain project

- 100% owned, low-sulfidation gold & silver open-pit/heap leach.
- NI 43-101 resource estimate & positive PEA in 2012, with a **2022 updated Phase I PEA showing very attractive economics.**
 - 38% IRR, US\$46MM NPV@5%, low cap/low strip
- Phase II pit delineated; permitting underway to drill shallow mineralization for additional phases.

Highland project

- Many low-sulfidation (Hot Springs type) targets with high-grade gold/silver mineralization identified for drill testing.
- Best Intercept = BVA's R.C. hole H03-013 with 12.2m of 7.17g/t Au/108g/t Ag, including 1.5m of 50g/t Au/345g/t Ag.

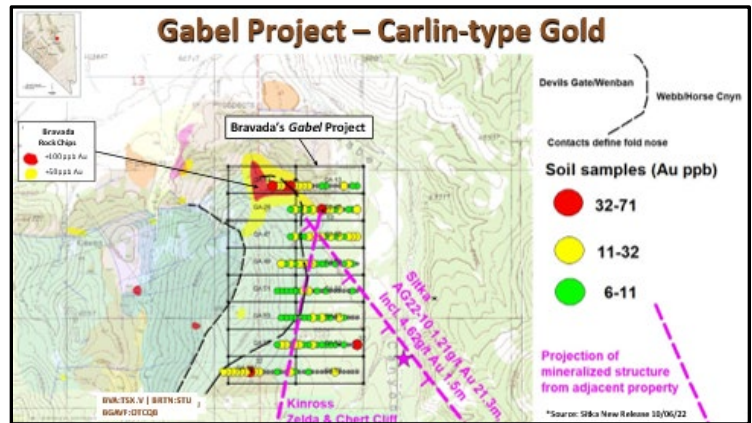

Baxter project

- Signed US\$4.5million earn-in agreement with Endeavour Silver, with Bravada carried to production.

- Similar low-sulfidation gold & silver geology to Endeavour's nearby Bruner district & Highland project.
- Previous partner, Kinross discovered shallow oxide gold mineralization at the Sinter target (32m of 0.88g/t Au intercept starting ~30m from surface). Indications are this zone extends to the west & remains open.

SF/HC and Gabel projects

- Close to some of the largest Carlin-type gold deposits recently discovered in Nevada (eg. Goldrush/Red Hill is ~6km west of SF/HC).
- Same important host rocks, (eg. Wenban Fm.)
- Soil sampling completed at Gabel & planned for SF/HC.

Other Project Agreements

- **Baker Hughes Oilfield Operations, Inc.** recently sold to **I-80 Gold** its interest in a partially permitted barite mining operation at BVA's **Shoshone Pediment** project. Bravada will be entitled to a \$1/ton royalty from barite production after 150,000 tons have been extracted. BVA retains other mineral rights for the property.
- **Stillwater Critical Minerals Corp. (previously Group Ten Metals, Inc.)** acquired 100% of BVA's **Drayton** Archean gold project (Ontario) from Bravada for shares and a retained a royalty interest. **Heritage Mining Ltd.** Acquired an option from Stillwater to earn 90% interest in the project in November 2021.

Projects Available for JV

Directors and Management

Lawrence Page, K.C., Chairman & Director
 Joseph A. Kizis, Jr., President & Director
 Nigel Bunting, Director
 Ross McDonald, Director
 John R. Kerr, Director
 Michael Rowley, Director
 Graham Thatcher, CFO
