

Welcome to Queensland's largest gold mine

Ravenswood Gold is a proudly Australian company operating the largest gold mining operation in Queensland, right in the heart of the historic Ravenswood goldrush town—just a 1.5-hour drive south of Townsville.

— We've been on an exciting journey of transformation, expanding our operations to boost gold production to over 200,000 ounces per year and extend our mine's life beyond 2035. We're blending innovation with tradition through the use of cutting-edge technology, including on-site Photon Assay machinery, a new mining fleet, and data analytics. Our focus is on driving growth, ensuring sustainability and safety, and making a positive impact on the Ravenswood and broader North Queensland community.

We're committed to a long-term future in low-cost gold mining, and working towards making one of our dreams of contributing to the Brisbane Olympics in 2032 a reality.

Ravenswood Gold is proudly owned by EMR Capital (EMR) and Golden Energy and Resources Pte. Ltd. (GEAR).

Ravenswood Gold highlights

Beating fatigue using data in our modern fleet

We've made significant investments in modern mining fleet. Our fleet consists mainly of Hitachi trucks and excavators that are fitted with leading fleet management and fatigue monitoring technology. The fleet management system provides real time feedback to the operators to ensure correct material allocation while maximising payload, which improves productivity and fuel efficiency. The state-of-the-art fatigue monitoring system continuously monitors the alertness and attentiveness of our haulage operators, providing alarms and in-seat alerts to regain the operator's focus when required, while also escalating fatigue issues to a Supervisor to enable human
