

December 2024 Quarterly Activities Report

Robe Mesa Transaction

- Foreign Investment Review Board (FIRB) approval remains the final material condition precedent outstanding to the transaction. FIRB requested several extensions during the December quarter, with the current statutory deadline 28 February, 2025
- CZR and Miracle Iron have agreed to extend the transaction Sunset Date to 28 February, 2025 for the satisfaction of the outstanding conditions precedent to the transaction
- As a consequence of the further delays to FIRB determination, CZR and Miracle Iron agreed to end the exclusivity obligations under the Robe Mesa share sale agreement
- CZR remains focused on completing a transaction on Robe Mesa and is continuing discussions with Miracle Iron and third parties regarding funding and transaction structures should a determination from FIRB on the Miracle Iron transaction not be received in its current form.

Exploration and Development

- Limited exploration and development activities were undertaken during the quarter given the uncertainty re. a timely FIRB determination
- Primary activities focused on progressing the Company's Port of Ashburton export facility plans and approvals

Corporate

- As noted above, CZR restricted exploration and development activities during the quarter to conserve cash as it awaits a decision from FIRB on the Robe Mesa transaction
- \$0.1 million cash at end of December quarter
- \$500k of the loan facility with an entity associated with Mark Creasy ("Yandal Facility") drawn down post quarter end
- Post quarter end, the Yandal Facility (entity associated with Mark Creasy) was extended by \$1m to \$2.5m and term extended to 30 June 2025. The additional funds will provide CZR additional time to complete a transaction for Robe Mesa and commence drilling at its iron ore and gold assets

OVERVIEW

CZR is a Western Australia focused mineral exploration and development company with five projects, all in joint-venture with its major shareholder, Creasy Group. All projects are strategically located near infrastructure and cover prospective geology with established iron ore, gold and base metal endowment.

CZR’s primary development asset is the Robe Mesa iron ore deposit, part of the Yarraloola project. The Company announced the results of the Definitive Feasibility Study (DFS) in October 2023, targeting a production rate of 3.5Mtpa - 5Mtpa over an initial 8-year mine life (ASX announcement 10 October 2023).

On 11 January 2024 CZR announced it had entered into a binding share sale agreement with Miracle iron Resources Pty Ltd to sell its 85% interest in Robe Mesa and supply chain infrastructure for \$102 million.

In addition to the development of Robe Mesa, CZR is also progressing several prospective exploration projects – well located in close proximity to major mines, discoveries and infrastructure.

ROBE MESA IRON-ORE DEPOSIT (Yarraloola Project) (CZR 85%)

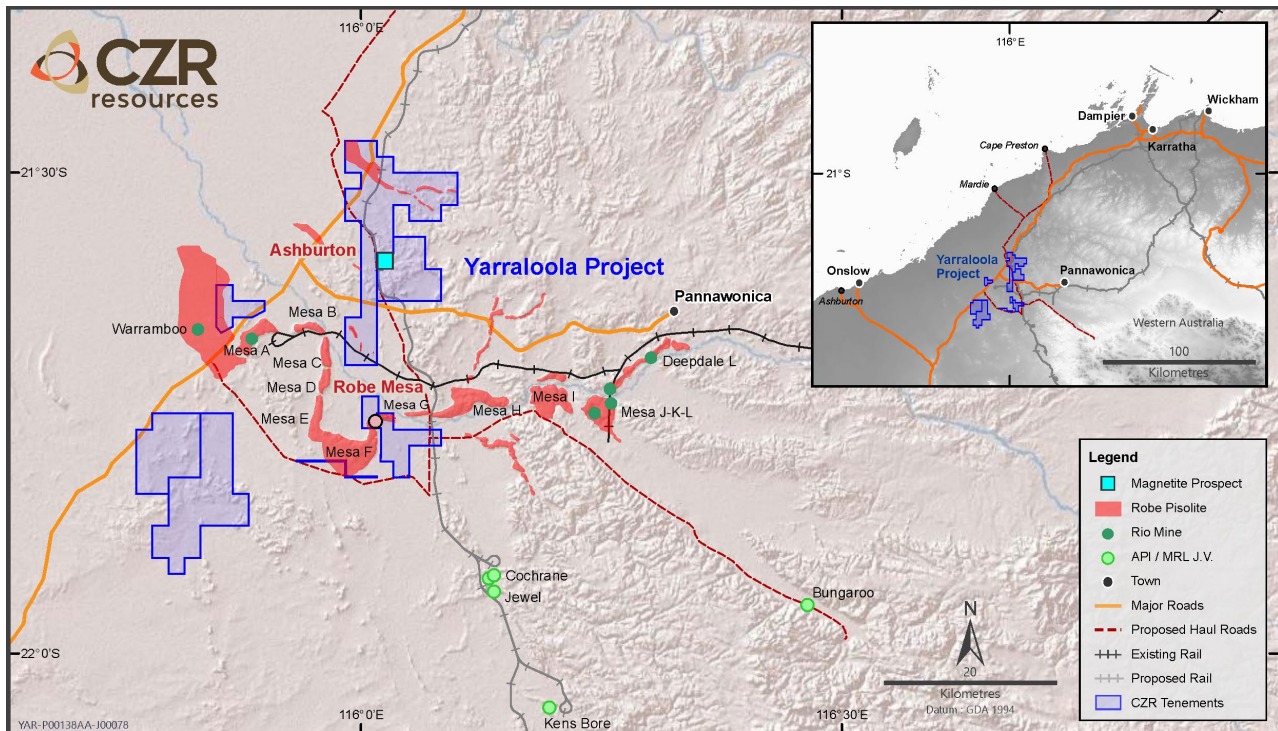

Figure 1. CZR’s Yarraloola project and Robe Mesa deposit showing local infrastructure and iron ore deposits. Insert map showing regional infrastructure of the West Pilbara, relative to the Robe Mesa deposit

Location

The Robe Mesa deposit is adjacent to the Robe River JV operations (Rio Tinto 53%, Mitsui 33%, Nippon Steel 14%) operated by Rio Tinto. Rio Tinto has been mining the Robe Valley since the 1970’s and has current mining operations at Mesa A, B, C, H, J and Warrambo, with rail linking to export facilities at Cape Lambert.

Miracle Iron Resources Transaction

On 11 January 2024 CZR announced it had entered into a binding Share Sale Agreement (the **Agreement**) for the sale of Zanthus Resources Pty Ltd (**Zanthus**), a wholly owned subsidiary that controls an 85% interest in the Robe Mesa Iron Ore Project (**Project**), to Miracle Iron Resources Pty Ltd (**Miracle Iron**) for \$102 million (the **Transaction**).

The transaction is subject to certain conditions precedent (**CP**), with a key condition achieved on 28 February 2024 when CZR shareholders voted overwhelmingly in favor of the transaction. During the December quarter Miracle Iron received several requests from FIRB to extend the statutory deadline for their response. Post quarter end a further extension was requested and granted until 28 February 2025.

As a consequence of the delay with FIRB approval, the parties agreed to extend the Sunset Date to 28 February 2025 for the satisfaction of the outstanding conditions precedent to the transaction. However, given the ongoing delays in a determination from FIRB, the parties have agreed to terminate the exclusivity obligations, allowing CZR to reengage with third parties on alternative funding or transactions for Robe Mesa.

Development Activities

No site activities were undertaken during the December quarter. CZR continues to work with environmental regulators to finalise the permits required to commence construction and operations on site.

Ashburton Link (CZR 50%)

The Ashburton Link consortium continue to progress the Development Application for the Port of Ashburton Export Facility with the Pilbara Ports Authority and work collaboratively with key stakeholders. Ashburton Link looks forward to developing the proposed 5Mtpa iron ore export facility once all approvals and contracts are in place.

CROYDON GOLD PROJECT (CZR 70%)

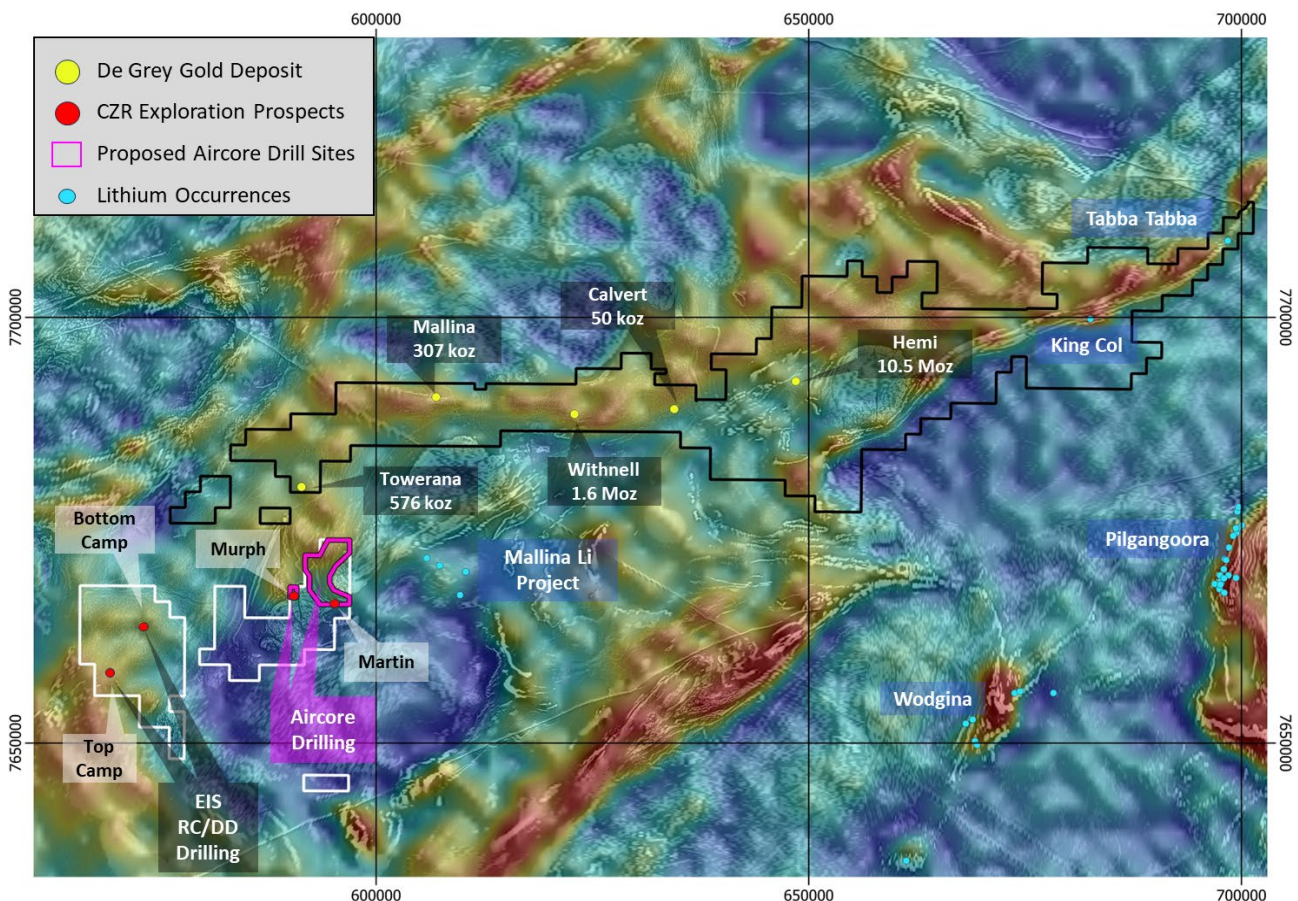

Figure 2. CZR's Croydon project and De Grey Mining's Hemi Gold Project – Regional gravity over magnetics

The Croydon project is located in the Mallina Basin between Karratha and Port Hedland. The region contains De Grey Mining Limited's (DEG) Hemi gold deposit with a Mineral Resource of 10.5 Moz (DEG release to ASX: 21 November 2023). The Mallina Basin is emerging as a major gold province and CZR's Croydon project covers approximately 40km strike of the Mallina Basin, ~50km south-east of Hemi (Figure 2).

The region is also an established lithium province, with mining operations at Wodgina (Mineral Resources) and Pilgangoora (Pilbara Minerals). Wildcat Resources' Tabbatabba and De Grey Mining's King Col deposits are located along a similar geological trend northeast of CZR's Croydon project.

Following completion of a heritage survey in the September quarter, CZR finalised plans for WA Government Exploration Incentive Scheme co-funded drilling at the Top and Bottom Camp prospects, and an extensive aircore drilling program targeting greenfield gold discoveries analogous to the Hemi discovery (Figures 2). Weather and pastoral activities delayed site work late in the December quarter, however CZR is hopeful to be on site early in 2025 once conditions on site allow access.

BUDDADOO PROJECT (CZR 85%)

The Buddadoo Project covers 125km² approximately 200km east of the port of Geraldton in the mid-west region of Western Australia. The project hosts copper, gold and vanadium-titanium-magnetite (VTM) mineralisation, with the most advanced prospect being a 6km long by 300-500m wide zone of gabbro with massive and disseminated VTM (Buddadoo Mafic Complex).

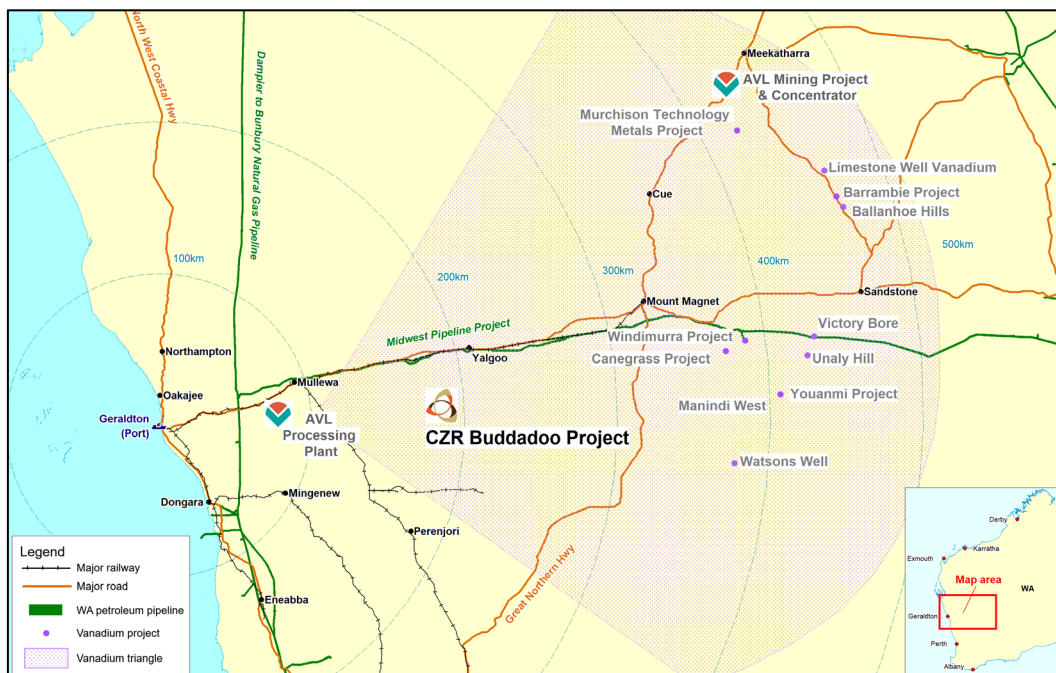

Figure 3. Buddadoo Project – regional scale showing proximal vanadium projects and infrastructure

During the quarter, CZR finalised its resource definition drill program, covering a 1.7km trend of outcropping high-grade titanium-magnetite. All heritage approvals have been received, and site works are scheduled to start post the Robe Mesa transaction completion or when alternative funding for Buddadoo is received.

As previously announced, CZR has lodged a Mining Licence application covering the Buddadoo Mafic Complex (MLA 59/784) and has commenced discussions with the Yamatji Southern Regional Corporation (YSRC), representing the Yamatji Nation native title holders over the Buddadoo project.

OTHER PROJECTS

No field activities were undertaken during the quarter at the Yarrie or Shepherds Well Projects.
