Compliance Statement

This Annual Report contains information relating to a mineral resource and reserve as set out in the Company's Annual Resource Statement reported in accordance with the 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (2012 JORC Code) and available for viewing at www.cokal.com. CKA confirms that it is not aware of any new information or data that materially affects the information included in any original ASX market announcement and, in the case of estimates of mineral resources, that all material assumptions and technical parameters underpinning the estimate in the relevant market announcement continue to apply and have not materially changed.

Word From Our Chairman

Dear Shareholders:

We have experienced another challenging year with Coal prices falling and causing some delays in our progress. The good news, though, is that we have managed to put in place secure funding that will allow us to continue progressing on the ongoing infrastructure development works, contemporaneously, ride out the downturn in coal prices. This has been a combination of funding facilities provided with the assistance of our major shareholder and infrastructure funding deals with some of our partners that fast-track the infrastructure completion.

Of note is the agreement reached after year end with PT Petrindo Jaya Kreasi to fund and develop the BBM haul road to an all-weather road. This agreement will not only increase the volume to be taken down this road but also efficiency and therefore the cost per tonne of transport through this road. It's a self-funding investment through a tolling arrangement for coal transported on this route and will accordingly become a profit center for the company.

These innovative funding deals ensure value is retained For shareholders without substantial dilution to the current shareholder base. It's a key strategy of the company to not lose momentum in finalising and improving infrastructure while the coal price is lower. We aim to have the infrastructure in place so that a rapid ramp-up in coal production can be done when the coal price recovers. This will also include developments on the barging requirements and finalisation of development on the Batu Tuhup port in the coming months.

There has been considerable effort put into the costs of production and infrastructure to ensure our cost of production is competitive, and we are confident that we have this under control and improvements on the way as we make the infrastructure more efficient and drive-up volumes to spread the fixed costs over more tonnes. On the funding side, it is true that some of our funding costs seem expensive; however, it is our belief that this cost is more palatable to all of us as shareholders than a serious dilution by capital raising at low share prices. In addition, our forecast is that coal prices will increase to a reasonable level of say US\$200 per tonne or better, and that this level will provide sufficient positive cash flow to quickly pay down debt and alleviate these funding costs. This is a clear strategy and aim for the company.

Our expansion opportunities remain substantial, with near-term focus on TBAR and the West Block of the BBM lease. TBAR approval is now well advanced, and drilling to firm up a JORC resource is planned in the calendar year of 2026, with production to follow as soon as possible. Similarly, the West Block offers potential, given its location beside PT Petrindo's DBK mine, enabling shared infrastructure. A feasibility study on this proposal is planned for this year.

Accordingly, despite the current coal prices, the Company remains confident of a successful transition to a profitable metallurgical coal producer. It remains for us to thank our team in Jakarta and at the mine site. Their continued efforts and commitment serve the company well and are instrumental in achieving our goals. The leadership of our CEO, who has weathered the current climate admirably, is also worthy of our appreciation. Likewise, we thank our major shareholder and BBM Chairman Chin Wai Fong (Eddie Chin), who has provided not only his valuable time and expertise to ensure our operation remains on track but also his financial commitment to ensure the financial strength of our company through challenging times.

We thank our shareholders once again for their continued support and look forward to delivering financial rewards worthy of that trust.

DOMENIC MARTINO

VISION & MISSION

Vision

To establish Cokal as a resilient and efficient metallurgical coal producer in Central Kalimantan, leveraging strong infrastructure, reliable logistics, and disciplined partnerships to create sustainable value as market conditions improve.

Mission

- Focus on operational readiness by maintaining core mining capability and strengthening infrastructure during market downturns.
- Execute measured growth through disciplined investment and partnerships that reduce risk and enhance efficiency.
- Pioneer in building sustainable logistics infrastructure, ensuring dependable pit-to-port delivery in Upper Barito section of Central Kalimantan
- Maintain financial prudence while securing long-term funding support from strategic shareholders.
- Operate responsibly in line with Indonesian regulatory requirements and environmental standards, while supporting local communities.

INDONESIAN COAL ASSETS

Cokal maintains significant ownership interests in four metallurgical coal assets in Central Kalimantan, Indonesia, together with a dedicated logistics subsidiary:

- **Bumi Barito Mineral (BBM)** – 60% ownership of a 14,980 ha tenement.
- **Tambang Benua Alam Raya (TBAR)** – 75% ownership of an 18,850 ha exploration tenement situated adjacent to and southeast of BBM.
- **Borneo Bara Prima (BBP)** – 60% ownership of a 13,050 ha tenement.
- **Anugerah Alam Katingan (AAK)** – 75% ownership of a 5,000 ha tenement.
- **Barito Samudera Nusantara (BSN)** – 100% ownership of Cokal's logistics arm, providing coal hauling and barging operations to support mine development and sales.

Together, BBM, TBAR, BBP, and AAK are strategically located alongside Indomet's extensive coking coal holdings, while BSN delivers the integrated logistics capability to move coal from mine to market. Cokal's immediate priorities are the development of BBM and resource delineation at TBAR in the calendar year of 2026, with BSN providing the infrastructure backbone to enable efficient logistics execution.

Indonesian Coal Assets

Bumi Barito Mineral (BBM) Tenement

BBM's permit covers an area of 14,980ha with multiple seams of high-quality metallurgical coal. BBM has regulatory approvals in place including:

- **Mining Licence:** 20 years, with two further extensions of 10 years each.
- **Environmental Approval:** Permitting a mining rate of up to 6 Mt per annum.
- **Port Construction Approval:** Secured for dedicated coal export infrastructure.
- **Forestry Permit:** Granted to commence mining activity.

Geological Setting and Resources

The BBM permit area is bisected by the Barito River in a north-south orientation. Coal-bearing sediments are distributed across almost the entire IUP, with mineable open-cut areas influenced by the river and three major fault systems.

- **East Block:** Drilling to date has focused on the eastern side of the river, confirming an estimated 260 Mt of Resources and 23.1 Mt of Reserves (revised June 2025)
- **West Block:** More than 130 mapped outcrops indicate the presence of premium-quality anthracite and PCI coals. These resources are not currently included in the stated BBM Resource, underscoring the potential for significant future expansion.

Operations and Infrastructure

BBM commenced commercial production of metallurgical coal in November 2022. The company is actively advancing road and port infrastructure upgrades to support efficient coal transportation and to underpin long-term production growth.

BBM Project Area

¹ Refer ASX announcement “Annual Mineral Resource and Ore Reserve Statement” dated 2 September 2022 and “Annual Mineral Resources and Ore Statement” on page 26

Tambang Benua Alam Raya (TBAR) Tenement

The TBAR exploration license encompasses 18,850 hectares directly adjoining the southern boundary of Cokal's BBM tenement. Geological mapping along a 17 km strike length has delineated four coal seams, interpreted to host significant high-grade coking coal potential. These seams are considered correlatives of the B, C, D, and J seams within BBM.

Permit Status – IUP Exploration License

TBAR Project Area

Borneo Bara Prima (BBP) Tenement

The Borneo Bara Prima (BBP) project, in which Cokal holds a 60% interest, covers 13,050 hectares in Murung Raya Regency, Central Kalimantan. The project has been granted an Exploration Forestry Permit (IPPKH) and is listed on the Central Government's Clean and Clear register. The Production and Operation IUP has also been secured, with validity through to June 2033.

Permit Status – IUP Production and Operation IUP has also been secured, with validity through to June 2033.

BBP Project Area

Anugerah Alam Katingan (AAK) Tenement

The Anugerah Alam Katingan (AAK) project, in which Cokal holds a 75% interest, covers 5,000 hectares in Central Kalimantan. Applications for the Exploration Forestry Permit (IPPKH) and Clean and Clear certification are in progress, and Cokal continues to closely monitor the advancement of the regulatory approval process.

Permit Status – IUP Exploration License

AAK Project Area

MARKET REVIEW

Market Environment

Coking Coal- Market summary

- An extended steel downcycle and seasonally weak demand depressed met. coal prices in 2025. Coking coal prices have remained subdued throughout fiscal year 2025, including PLV reaching its lowest level since 2021, even with exports from Australia being heavily impacted by weather within the year.
- In China, strong domestic metallurgical coal production and intense competition lead to a low pricing environment for steel and coal. CFR China remained subdued resulting in FOB equivalent (CFR China – Freight netback Aus/China) lower than PLV FOB index.
- With a weak property market, steel exports remained elevated, placing margin pressure on steel makers globally.
- Imposition of tariffs on steel imports to India in April'25 supported domestic steel market pricing, however, mills in the region have been willing to operate with lower than historical coking coal inventory cover levels through the monsoon season.
- Coming into Q3 CY2025, there has been a price recovery in the Chinese domestic market on expectations of production controls, and that has supported price stabilisation.
- In both the US and Australia, signs of cost pressure are evident with Australian and US metallurgical coal producers removing marginal tonnes from the market. This along with return to demand from the Indian market are expected to drive pricing through late Q4 CY2025.
- During the period from Q2 2024 to August 2025, metallurgical coal markets experienced a pronounced downturn.

1. Premium Low Vol (PLV) FOB Australia fell by 25% from around US\$249/t in June -2024 to US\$187 by August 2025.
2. Hard Coking Coal (HCC) Australia followed a similar path, declining 30 % from US\$217/t to US\$153/t

Lossmaking volume at given price level,

Source: CRU Research

At these levels, an estimated 25% of seaborne producers were operating below cash costs, forcing several large players to halt or suspend operations.

Medium to long-term view:

- Steel production ex China is expected to improve in 2026. Over the next five years, new BF and coke capacity in Asia will increase demand, which will see the traded met. coal market continuing to expand
- However, rising costs and insufficient investment in the Australian supply raise the risk of supply-demand imbalances ahead.

Medium-term cost support seen at ~\$215 /t on restricted Russian supply

Met. coal cost curve premium HCC adjusted, FOB Queensland, \$/t

DATA: [CRU Metallurgical Coal Cost Service](#)

Looking forward, while near-term markets remain fragile, the medium-term outlook is more constructive:

- India's steel capacity expansion is projected to increase met. coal demand from 80 Mtpa (2024) to 130 Mtpa (2030).
- Chinese steel margins have shown signs of recovery, supporting restocking demand.
- Recovery momentum is expected to gather pace from Q1 2026 onwards, coinciding with Cokal's planned production ramp-up.

REVIEW OF OPERATIONS

Review of Operations

Cokal Limited (ASX:CKA; **Cokal** or the **Company**) is an Australian listed company focused on establishing itself as a globally recognised metallurgical coal producer. The Company holds an interest in four projects located in Central Kalimantan, Indonesia, each containing identified metallurgical coal resources.

HIGHLIGHTS

Despite challenging market conditions, the Company advanced its long-term strategy through infrastructure development, partnership progress, financial stability, and selective operational activity.

Highlights for the year include:

- Significant progress on licensing for underground mining at Pit 1 under PT Cipta Bersama Indonesia (CBI); development expected Q3 2026, fully funded by CBI.
- Achieved major permitting milestones for underground mining at SE Pit 3, including approval of the Techno-Economic Feasibility Study and IPPKH recommendation, paving the way for development with CBI from Q3 2026
- Cokal signs binding infrastructure term sheet with PT Petrindo (post-MOU), advancing initial US\$3m commitment into fully funded all-weather haul road upgrade (3Mtpa) with PT Petrosea as contractor.
- Secured US\$15 million strategic debt funding from major shareholder Chin Wai Fong (Eddie Chine) via ICT, reinforcing liquidity.
- Mining suspended beginning January 2025 due to weak metallurgical coal prices; resumed scaled-down operations in September 2025 (~45,000 tonnes target for September to December 2025)
- Coal haulage of stockpiled material continued to Batu Tuhup Jetty, ensuring limited shipments and revenue continuity.
- Barging operations via PT Barito Samudera Nusantara (BSN) are maintained, with scheduled maintenance and adaptations to adverse weather.
- Key infrastructure upgrades completed, including semi-permanent bridge at KM70 and haul road reinforcement between Krajan Jetty and Pit 3.
- Magazine warehouse construction advanced.
- Application was submitted for a 6.5 km haul road extension (KM92–KM86) to improve operational efficiency.
- TBAR approvals secured, including Governor's recommendation and Environmental Permit (UKL-UPL), enabling drilling to commence in the calendar year of 2026.
- TBAR achieved a major milestone with the granting of UKAL approval.
- Cratus partnership terminated early 2025; independent funding secured to maintain strategic initiatives.
- The contractor management agreement with PT Petrosea was discontinued in view of the prevailing market conditions.

During the year, Cokal advanced its operational and strategic objectives through key partnerships, funding initiatives, and infrastructure development, while also adjusting operations in response to prolonged weakness in metallurgical coal prices. Mining operations at BBM were suspended in January 2025 due to multi-year low prices but recommenced in September 2025 under a scaled-down program targeting approximately 45,000 tonnes of near-exposed reserves (29,000 tonnes accessible without blasting and a further 16,000 tonnes requiring blasting from November 2025). In the interim, coal haulage of previously mined and stockpiled material to the Batu Tuhup Jetty enabled limited shipments and sustained revenue despite the mining suspension.

While the Company's financial performance was below expectations, management acted decisively to protect the balance sheet, manage creditor relationships, and restructure vendor payments. Importantly, Cokal did not default on any obligations, underscoring its commitment to financial discipline even under difficult conditions. It is also important to view recent cash outflows in context: a significant portion of expenditure has been invested in critical infrastructure — including haul roads, bridges, jetty access, and logistics facilities — which few companies have been able to deliver in such a challenging environment. These assets now represent one of Cokal's greatest strategic advantages, forming the backbone of future production capacity and positioning the Company ahead of peers.

Despite challenging market conditions, Cokal maintained both international and domestic shipments, providing continuity of revenue and strengthening long-term customer relationships.

Review of Operations

BUMI BARITO MINERAL (BBM) DEVELOPMENT

Mining Operations

Mining was suspended from January 2025, with no interim production until September 2025, when BBM re-commenced under a scaled-down model targeting ~45,000 tonnes of near-exposed reserves.

- 29,000 tonnes without blasting.
- 16,000 tonnes requiring blasting (from November 2025 post-magazine commissioning).

Mining remained focused on Pit 3, delivering both Low-Volatility Hard Coal (LVHCC) and high-grade thermal coal. Operational efficiency improvements included tighter maintenance programs, improved fleet sequencing, and reduced cycle times.

Infrastructure Development

Cokal's Infrastructure development long-term vision, initiated five years ago and continues to be its top priority, is now attracting the interest of major industry players such as Petrindo, who recognise the strategic importance of aligning with Cokal. While near-term results do not fully reflect the value created, the Board firmly believes that these investments are the right foundation for growth. With production and partnerships expected to scale up alongside a market recovery, these assets will position Cokal to deliver substantial benefits in the medium term.

- **Haul Roads & Bridges:** The semi-permanent steel bridge at KM70 was completed in Q2 2025, securing reliable year-round access. Road reinforcement and upgrades have been undertaken across key sections, while an application for a 6.5 km bypass (KM92–KM86) has been submitted, with approval anticipated in Q4 2025.
- **Magazine Warehouse:** Construction is progressing, with completion targeted for November 2025. First blasting activities are scheduled to commence in late November 2025.
- **Batu Tuhup Jetty:** Current works are limited to access road development and maintenance of coal handling and barge loading infrastructure and equipment. Major construction of the 1,000 tph BLC has been deferred due to market conditions, with activities expected to resume in late Q1 2026.

Cokal advanced development and upgrade of the **96 km haul road connecting Pit 3 to the Batu Tuhup Jetty**, a key logistics corridor for future production. Reinforcement works were carried out along the **Krajan Jetty–Pit 3** and **Pit 3–KM52** sections, while critical upgrades between **KM98–KM70** included the removal of soft material at **KM91** and compaction at **KM77–KM79** to support ongoing operations.

Road Maintenance Works

Review of Operations

To further enhance haulage efficiency, an application was submitted for a **6.5km bypass road (KM92-KM86)** to reduce steep gradients. The regulatory approval is expected in **Q4 2025**.

BBM Haul Road (Bypass Section)

A key milestone was the completion of the semi-permanent steel bridge at KM70 over the Mohing River, which became operational in Q2 2025. This structure replaced the former wooden bridge, ensuring year-round access during the rainy season. Additional bridge and culvert strengthening works along the route have further reinforced haul road reliability.

Mohing Bridge KM70

Review of Operations

Supporting infrastructure also progressed, with construction of a magazine warehouse near Pit 3 advancing toward completion in November 2025. The facility will enable on-site storage of explosives, with first blasting scheduled for late November 2025.

Magazine Warehouse Construction Progress Pit 3 (Aerial View)

Magazine Warehouse Construction Progress Pit 3

Review of Operations

Batu Tuhup Jetty

BLC Conveyor Works: Progress on the Batu Tuhup Jetty BLC conveyor was placed on hold due to subdued market conditions. Construction activities are expected to resume once market demand improves.

Jetty Operations: Despite the delay in conveyor development, the Batu Tuhup Jetty remained operational throughout the reporting period, ensuring continuity of coal logistics.

Infrastructure Upgrades: Upgrade works were carried out on the access road and expansion of coal stockpile areas to strengthen operational capacity & site reliability and improve material handling capacity.

Barge handling: The jetty successfully facilitated the unloading of incoming **BSN barges from Krajan**, maintaining critical supply chain integration between haulage and barging operations.

Coal Shipments: Outgoing coal shipments were executed from Batu Tuhup Jetty, allowing the Company to sustain limited sales and preserve customer relationships during the challenging market environment.

Barge Loading Operations for Shipment (Batu Tuhup Jetty)

Review of Operations

Logistics

Hauling & Barging Route

Barge logistics continued to play a vital role in Cokal's dual transport strategy, providing flexibility alongside road haulage. Coal was transported from **Krajan Jetty to Batu Tuhup Jetty** under the operations of subsidiary **PT Barito Samudera Nusantara (BSN)**.

Despite occasional weather-related disruptions, shipments proceeded during available windows, supported by the BSN fleet, which underwent scheduled maintenance to ensure operational reliability. Shipments were executed through both **Batu Tuhup Jetty and Krajan Jetty**, complemented by routine dredging works to maintain navigability at both sites.

Barge Loading (Krajan Jetty)

Review of Operations

Barge Loading (Batu Tuhup Jetty)

Incoming Barge unloading (Batu Tuhup Jetty)

Road Hauling

Haulage of previously mined and stockpiled coal to Batu Tuhup Jetty continued, supporting ongoing domestic and limited international sales during the temporary pause in mining activities. These shipments provided essential near-term revenue while reinforcing key customer relationships.

Truck Hauling (Batu Tuhup Jetty)

Truck Hauling (Batu Tuhup Jetty)

Review of Operations

Coal Loading (Pit 3 Rom Stockpile)

BBM Shipment Update

During this year, Cokal delivered a total of 26,234 tonnes of coal across both international and domestic markets. International sales comprised 14,815 tonnes, including 7,723 tonnes to China and 7,092 tonnes to Hong Kong. Domestic sales to PT Risun accounted for 7,407 tonnes, reflecting significant reduction in demand in both markets. Deliveries were managed in line with market conditions to optimise revenue and maintain strong customer relationships.

No	Market	Buyer	Volume (MT)
1	International	China	7,723
2	International	China	7,092
3	International	Hong Kong	4,012
4	Domestic	Pt Risun	7,407
			26,234

Coal Loading (Karajan Jetty)

Ship Loading (Taboneo Anchorage, South Kalimantan)

Review of Operations

Exploration Works

No additional exploration was undertaken on the BBM concession during the year, as resources were directed toward infrastructure and operational readiness.

Strategic Marketing

Cokal continued building recognition of the BBM coal brand in Southeast Asia, with shipments to China and domestic smelters during the reporting period. Discussions with large end-users remain ongoing to expand market reach and secure long-term demand.

Cokal's offtake partner, ICT, is working closely with M Resources, which is one of the largest, established met coal trading companies, to unlock maximum value for our product. In the interim, we are focusing on smaller parcel sales combined with extensive market outreach by M Resources Senior Team for back-to-back deliveries from September to December 2025, ensuring wider exposure and building strong relationships across a broad base of customers. This approach positions us strategically so that when market conditions improve in Q1 2026 and our planned ramp-up begins, we will have a diverse pool of buyers to choose from, maximising both flexibility and value creation.

BBM Strategic Partnership and Mining Agreements

During this year, Cokal executed a series of key mining and services contracts to support the scaling-up of operations at BBM. These agreements strengthen the Company's production capacity, logistics capability, and contractor management processes, leveraging the expertise of experienced Indonesian mining service providers.

- **PT Petrindo Jaya Kreasi Joint Ventures on infrastructure:**

During the year, Cokal advanced its collaboration with PT Petrindo, which secured US\$3.0 million committed funding (US\$1.45 million coal presales, US\$1.56 million infrastructure). In September 2025, Cokal and PT Petrindo executed a binding term sheet for the further development of the BBM Haul Road, under which PT Petrindo will fund upgrades to increase capacity and convert the road into an all-weather standard. The investment is structured as a prepayment of future toll fees, with recovery based on coal transport volumes and indexed to Platts SS Coal FOB Australia pricing.

As part of the collaboration, both parties jointly agreed to appoint PT Petrosea Tbk as the main contractor for the development works, with on-ground activities expected to commence in October 2025. PT Petrindo has also committed to developing an alternate segment along the public road section from KM 52 towards Batu Tuhup Jetty, granting Cokal access at the same toll rate. Importantly, PT BBM will continue to remain the sole owner and license holder of the haul road, with Cokal retaining the right to recoup all historical and new investments through toll fees before transitioning to a sustainable income stream.

PT BBM & PT PJK Signing Ceremony (Petrosea TBK office, Jakarta)

This arrangement strengthens economies of scale for coal transport (up to 3 Mtpa throughput capacity), reduces per-tonne costs for BBM, and provides Cokal with a long-term revenue stream from haul road toll fees while deepening its strategic relationship with PT Petrindo.

Review of Operations

About PT Petrindo Jaya Kreasi Tbk

PT Petrindo is a company listed on the Indonesian Stock Exchange, holding various coal mining projects in Indonesia.

- PT Petrindo has been producing high-quality thermal coal since 2013 through one of its subsidiaries, PT Tamtama Perkasa.

About PT Petrosea Tbk

- Petrosea is a major Indonesian contract mining, engineering, procurement, and construction company and oil and gas service company listed on the Indonesian Stock Exchange since 1990. The company has been in operation for more than 62 years, with annual revenues of US\$578m (2023) and employing over 5,000 staff. Petrosea is controlled by PT Kreasi Jasa Persada, which is wholly owned by PT Petrindo Jaya Kreasi TBK.

- **Underground Mining Agreement – PT Cipta Bersama Indonesia (CBI)**

Cokal has signed an Underground Mining Agreement with PT Cipta Bersama Indonesia (CBI) to advance underground mining at the South-East Pit 3 area. The scope of the agreement includes mine design, construction, and supporting infrastructure, notably a dedicated coal wash plant. Development is scheduled to commence in **Q3 2026**, fully funded by CBI.

The revenue-sharing arrangement **provides BBM with 40% of production revenue**, while **CBI will receive 60%** in return for capital investment, technical expertise, and project delivery. This strategic initiative enables Cokal to access deeper, higher margin coking coal seams with lower strip ratios, positioning the company for sustainable long-term growth.

Permitting and Regulatory Progress (as of September 2025)

- **Definitive Feasibility Study (DFS) completed and submitted.**
- **Techno-Economic Feasibility Study approved** – a key milestone providing regulatory validation of the project's commercial and technical viability.
- Project metrics submitted to the Ministry of Energy and Mineral Resources (ESDM).
- **IPPKH recommendation obtained** from the Governor of Central Kalimantan, securing critical land use rights.
- AMDAL environmental impact assessment update process commenced.

These permit approval market significant progress in de-risking the project, laying a strong foundation for the planned underground development with CBI beginning in Q3 2026.

- **ICT Additional facility Finalised Debt Funding Facility**

During the year, Cokal finalised a US\$15.0 million strategic debt funding facility with International Commodity Trade Pte Ltd (ICT), controlled by long-term supportive shareholder Mr Chin Wai Fong (Eddie Chin). The facility, comprising a US\$1.5 million cash advance and US\$13.5 million in bank loans arranged by ICT, will be utilised to ramp up metallurgical coal production at the BBM mine through investment in mining operations and transport infrastructure.

The facility is structured as revolving debt with a maximum tenor of three years, bearing interest of 10% p.a. on the cash advance and 8% p.a. on the bank loan component. Additional service fees are linked to coal sales volumes. Cokal Holdings Pte Ltd, a wholly-owned subsidiary, is the borrower, with Cokal Limited acting as guarantor (subject to shareholder approval under ASX Listing Rules).

ICT has been a longstanding financial partner to Cokal, having previously provided US\$20.0 million of funding for the development of the BBM mine and related infrastructure. The new facility demonstrates continued support from ICT and its shareholders, enabling Cokal to withstand the difficult market conditions, meet its financial commitments, continue operating, and commence small-scale interim mining operations, while also terminating all arrangements with Cratus.

Review of Operations

- **Contractor Management Term Sheet – PT Petrosea TBK**

Cokal previously signed a term sheet with PT Petrosea Tbk, one of Indonesia's leading mining services companies, to provide contractor and vendor management support, including negotiating supplier credit terms, managing contractor performance, and optimising production costs across BBM's mining and logistics operations. While Petrosea's involvement was expected to strengthen procurement efficiency, improve cash flow through extended credit lines, and ensure best practices in contractor oversight, the term sheet was ultimately not pursued due to weak market conditions.

In light of the reduced production program, BBM has opted to manage interim mining operations internally. Concurrently, the company is finalising the appointment of a mining contractor who is expected to begin operating under contracting terms by mid-November 2025.

- **Cratus Partnership:**

The Company's previously announced Strategic Partnership with Cratus Group was terminated. As outlined in ASX releases dated 19 November 2024 and 28 January 2025, the agreements with Cratus, covering coal marketing, transport infrastructure, and debt financing, were not performed to Cokal's satisfaction. Continued non-performance led to termination.

TAMBANG BENUA ALAM RAYA (TBAR) DEVELOPMENT

During the year, the Company reaffirmed its commitment to advancing the PT Tambang Benua Alam Raya (TBAR) project in Central Kalimantan as part of its long-term growth pipeline. TBAR is strategically important and complements BBM, with potential to expand Cokal's production profile significantly once development commences.

Licensing and Exploration Update

- UKP UPL TBAR was obtained on 10 July 2025.
- Key approvals obtained: TBAR secured a recommendation from the Governor of Central Kalimantan to borrow and use forest areas for exploration activities.
- The project also obtained the Environmental Permit (UKL-UPL) from the Ministry of Environment.
- An application to the Ministry of Forestry to obtain an official permit to borrow and use forest areas for exploration was submitted.
- With approvals in place, detailed drilling is scheduled to commence during the calendar year of 2026.

Strategic Integration and Infrastructure

- TBAR forms part of the broader infrastructure collaboration with Petrindo, covering BBM, TBAR, and Petrindo's DKB and BI tenements.
- The recently executed joint logistics initiative is underway, with potential haulage and port capacity of up to 3 Mtpa, enabling cost-sharing and reducing future development costs.
- Infrastructure planning for TBAR is aligned with regional haul road upgrades and jetty developments, ensuring efficient coal transport once operations commence.

The Board remains confident in TBAR's long-term potential. With the necessary exploration permits progressing and drilling scheduled to begin in 2026, TBAR will form an important pillar of Cokal's production growth strategy alongside BBM.

Exploration Works

No exploration was undertaken on the TBAR during the year.

Review of Operations

BARITO SAMUDRA NUSANTARA (BSN) DEVELOPMENT

PT Barito Samudera Nusantara (BSN) is a wholly owned subsidiary of Cokal Ltd, responsible for the Company's logistics operations, including both barging and road haulage of coal from pit to port.

Strategic Role in the Upper Barito River

BSN plays an extremely important and strategic role in Cokal's operations. With over two years of continuous experience operating in the challenging logistics environment of the Upper Barito River, BSN has developed the expertise required to manage complex and remote transport routes.

Notably, BSN is currently the only company operating so far upstream in the Barito River, giving Cokal a unique advantage in accessing and delivering coal from the BBM concession to downstream customers. This pioneering role has allowed BSN to establish proven operating knowledge in one of the most logistically challenging coal corridors in Indonesia.

Fleet Overview (under BSN)

The current BSN fleet comprises of the following assets:

No.	Name of the Barge	Number of Units
1	TB. BINA BERSAMA 12	Tug Boat
2	TB. BINA BERSAMA 18	Tug Boat
3	TB. BINA BERSAMA 17	Tug Boat
4	TB. BINA BERSAMA 01 ASIST	Tug Boat

BSN Future Vision

The Company's entire fleet of barges and trucks was maintained to required standards and operated under full licensing status, ensuring reliability and regulatory compliance throughout the year.

BSN's long-term vision is to expand its logistics capabilities in step with Cokal's production ramp-up from 2026 onwards. One avenue under consideration is the potential deployment of self-propelled barges, which could be pursued in cooperation with established logistics players active in the Indonesian market. While still at the planning stage, such initiatives reflect BSN's commitment to building a more efficient, scalable, and integrated logistics platform to underpin Cokal's growth strategy.

Review of Operations

BORNEO BARA PRIMA (BBP) DEVELOPMENT

Exploration Works

No exploration was undertaken on the TBAR during the year.

ANUGERAH ALAM KATINGAN (AAK) DEVELOPMENT

Exploration Works

No exploration was undertaken on the AAK during the year.

Annual Mineral and Reserve Statement

The Mineral Resources and Ore Reserve statement included with this Annual Report has been prepared in accordance with the 2012 Edition of the “Australasian Code for reporting of Exploration Results, Mineral Resources and Ore Reserves” (the JORC Code 2012) and the ASX Listing Rules.

Ore Reserves as at 30 June 2025

Project	2025 Reserves (in-situ) - Mt			2024 Reserves (in-situ) - Mt			Annual change	
	Proven	Probable	Total	Proven	Probable	Total	Mt	%
BBM	13.71	9.3	23.01	13.75	9.3	23.05	(0.04)	(0.03%)

Note: The reported Ore Reserves Total are approximately 43% PCI coal and 57% Coking coal by coal type. The reported Ore Reserves represent the total tonnages for BBM, of which Cokal has a 60% interest. The reported Mineral Resources and Ore Reserves were calculated using a price of US\$170/t for coking coal and US\$145/t for PCI based on the current market price projection. Annual change was from the actual coal mining progress of 38k tons from July 2024 to December 2024. There was no mining activity during January to June 2025 as the Mine Contractor ceased at the end of 2024 due to continuously underperforming and internal issues. Totals may not add due to rounding. Cut-off grade: minimum coal seam thickness of 0.30m.

Mineral Resources as at 30 June 2025

Project	2025 Resources - Mt				2024 Resources - Mt				Annual change	
	Measured	Indicated	Inferred	Total	Measured	Indicated	Inferred	Total	Mt	%
BBM	18.7	22.9	218.5	260.1	18.7	22.9	218.5	260.1	-	-

Note: The reported Mineral Resources total represents the total tonnages for BBM, of which Cokal has a 60% interest. The reported Mineral Resources were estimated up to a depth of 150m below topography for open pit potential, and the potential for underground mining was estimated up to a depth of 500m below topography. Mineral Resources are reported inclusive of Ore Reserves. Annual change was from actual coal mining progress of 38k ton. Cut-off grade: minimum coal seam thickness of 0.30m.

Mineral Resource and Ore Reserve Governance & Internal Controls

Cokal’s governance arrangements and internal controls for reporting its Mineral Resources and Ore Reserves and the estimation process within BBM and evaluation of future projects, such as the TBAR Project, including:

- oversight and approval of each annual statement by the Technical Director;
- establishment of internal procedures and controls to meet JORC Code 2012 compliance in all
- external reporting;
- independent and/or internal review of estimates;
- annual reconciliation with internal planning to validate reserve estimates for near-term production mines; and
- Cokal Board approval of new and materially changed estimates.

The Competent Person is suitably qualified and experienced, as defined in the 2012 Edition of JORC.

Competent Persons Statement

This Annual Ore Reserves Estimate in respect of the BBM Project, is based on, and fairly represents, information and supporting documentation prepared by a competent person. The Ore Reserves Estimate as a whole has, as to the form and content in which it appears, been approved by Mr Arie Cahyono. Mr Cahyono is a Competent Person and a member of the Australasian Institute of Mining and Metallurgy and an employee of the Company. Mr Cahyono has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Cahyono consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The reporting of Coal Resources for the BBM Project has been carried out in accordance with the "Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code), prepared by the Joint Ore Reserves Committee, December 2012. The information in the report to which this statement is attached, that relates to the Coal Resources of BBM, is based on information reviewed by Mr Luki Wilianto, who is a Member of The Australian Institute Mining and Metallurgy (AusIMM) and is a full-time employee of Cokal. Mr Wilianto has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration, and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Wilianto consents to the inclusion in the report of matters based on his information in the form and context in which appears.

BOARD OF DIRECTORS

Cokal/BBM has assembled an expert team to direct and manage Cokal's BBM, and other mines, which will be operated mainly by contractors.

Domenic Martino

Chairman & Non- Executive Director

Founding Director of Cokal and a Chartered Accountant with many years of experience as a director of ASX listed companies

Previously CEO Deloitte Touche Tohmatsu, Australia

Key player in the creation of shareholder value in a number of ASX companies including Sydney Gas, Pan Asia, Clean Global Energy, NuEnergy Capital

Lengthy track record of operating in Indonesia, successfully closing a number of energy and resources deals with key local players

Karan Bangur

Managing Director & CEO

Over a decade of experience in operating mining and logistics projects in South East Asia, including projects in Indonesia

Significant experience with Indonesian mining laws

Director of Aahana Mineral Resources Sdn Bhd and AMR Investment Pte Ltd, the largest shareholder in Cokal

Owner/operator of HME coal fleet in North Kalimantan

Evaluation of Iron Ore, Bauxite and Graphite concentrate recovery projects in Indonesia

Logistics & port development in Indonesia and other parts of South Asia; and developing & operating Iron Ore tenements in Malaysia

Allen Delbridge

Non-executive Director

Mining engineer with over 30 years experience in the mining industry including Indonesia

A member of PERHAPI and Aus IMM and a recognised competent person under the KCMI and JORC codes

Deep experience at all levels of operations and mine planning, including:

- Pit shell optimizations
- LOM (and stage push back) pit design
- Ore Reserve reporting
- Start-up mine schedules/plans
- Tenders
- Developing Systems
- Business improvement projects and Financial evaluations

MANAGEMENT TEAM

Andrew Ichwan CPA

Head of Finance

- Graduated from Curtin University (Perth, WA) and CPA Australia qualified with over 15 year's experience.
- Has held multiple finance /accounting positions in both Australia and Indonesia.
- Previously held positions with Silver Lake Resources Limited and Straits Resources Limited.

Eddie Chin

President Commissioner of BBM

- BSc (hons) Civil Engineering (University of Glasgow)
- President Commissioner of BBM & TBAR since June 2019
- Significant shareholder of Aahana Mineral Resources Sdn Bhd, largest shareholder in Cokal
- Founding member of major Indonesian coal miner PT Bayan Resources Tbk
- CEO of the Bayan Group between 2005 and Jan 2018
- Key person in the development of Bayan Group into a globally significant coal producer
- Managing Director of the Desaria Group of Companies

Pak Sukardi

President Director of BBM

- 40 years of mining and plantation industry experience in Indonesia
- Includes operational roles and Board/Senior management positions

Luki Wilianto

Geology Manager Cokal

- Geological Engineer with 15 years Indonesian coal mining experience
- Member of Aus IMM and an Indonesian Competent Person of "Ikatan Ahli Geologi" (CPI- IAGI)
- Previous positions with PT Thiess Contractors Indonesia, PT Britimindo and PT Wahana Baratama Mining (Bayan Resources)
- Experience leading due diligence, exploration programs and mining studies, comprising geological modellings, resources estimation, mine planning and reporting in accordance with the JORC Code and KCMI.

Loke Cherng Huei

Director BBM

- BE(civil) with 35 years mining, marine and construction industry experience in Malaysia and Indonesia
- Previously Director and General Manager roles in the Desaria group of companies in Malaysia

Muhamad Arie Cahyono

Mine Planning Manager Cokal

- 15 years mining experience, with particular expertise in coal geological modelling, mine planning and management of contractors
- Previously held positions with PT Thiess Contractors Indonesia, PT Britimindo (Mining Consultant) and PT Bayan Resources Tbk.
- Member of PERHAPI and also registered as Competent Person Indonesia (CPI).

DIRECTORS' REPORT

Directors' Report

Your Directors present their report for the year ended 30 June 2025.

The following persons were Directors of Cokal Limited ("Group", "consolidated entity" or "Cokal") during the financial year and up to the date of this report, unless otherwise stated:

Domenic Martino, Non-Executive Chairman

(Appointed Director on 24 December 2010 and Chairman on 27 January 2017)

B. Bus, FCPA

Mr. Martino, is a Chartered Accountant and an experienced director of ASX listed companies. Previously CEO of Deloitte Touche Tohmatsu in Australia, he has significant experience in the development of "micro-cap" companies.

- Former CEO Deloitte Touche Tohmatsu Australia.
- Key player in the re-birth of a broad grouping of ASX companies including Sydney Gas, Pan Asia, Clean Global Energy, NuEnergy Capital.
- Strong reputation in China.
- Lengthy track record of operating in Indonesia, successfully closed key energy and resources deals with key local players.
- Proven track record in capital raisings across a range of markets.

Karan Bangur, Non-Executive Director, CEO

(Appointed Director on 10 April 2019, Appointed Chief Executive Director on 30 June 2022)

BCom

Mr Bangur has over a decade of experience in operating mining and logistics projects in South East Asia. He is well experienced and familiar with Indonesian mining and general laws relating to on ground operations due to his experience in several projects in Indonesia.

Current ongoing and previous projects include:

- Operations of thermal coal mine in Tanah Grogot, East Kalimantan in capacity of financier.
- Operating fleet of HEMM (Heavy Earth Moving Equipment) in thermal coal mine project in Tarakan, North Kalimantan in capacity of owner.
- He currently serves as Managing Director of Aahana Global Resources & Investment Pte Ltd, which is primarily an investment and holding Co incorporated in Singapore 2008- Present.
- He serves as Director in Aahana Mineral Resources Sdn Bhd & AMR Investment Pte Ltd, which is the single majority shareholder in Cokal Ltd. 2019 - Present.
- Previous assignments involve evaluation and planning of Iron Ore, Bauxite Ore and Graphite concentrate recovery projects in Indonesia.
- Previous projects include logistics and port development in Indonesia and other parts of SE Asia.
- Development and operating Iron Ore tenement in Malaysia including HEMM fleet management and rental services.

David (Allen) Delbridge, Non-Executive Director (Appointed on 17 March 2020)

B.Mining Engineering, PERHAPI, AusIMM

Mr Delbridge has over 30 years' experience in the mining industry. He is a recognised competent person under the KCMI code as well as for JORC reserve statement for open cut coal. He has international experience, working for over 7 years as an expatriate in Indonesia. He has significant on-site operations experience, interactively providing practical and technical direction and team leadership for maintaining and improving mining operations at a senior leadership level.

Current ongoing and previous projects include:

- Worked at Citic Pacific Mining on its Sino Iron Ore project in Western Australia
- Worked at Jiujiang Mining Australia Pty Ltd on its Cairn Hill project in South Australia
- Worked at Bayan Resources Group as Manager – Mine Planning and Development in Jakarta with operational sites in Kalimantan

Directors' Report

Louisa Martino (Youens), Joint Company Secretary (Appointed on 9 August 2017)

BCom, CA, F FIN, FGIA

Ms Martino provides company secretarial and accounting services to a number of listed entities.

Previously Ms Martino worked for a corporate finance company, assisting with company compliance (ASIC and ASX) and capital raisings. She also has experience working for a government organisation in its Business Development division where she performed reviews of business opportunities and prepared business case analysis for those seeking Government funding.

Prior to that, Ms Martino worked for a major accounting firm in Perth, London and Sydney where she provided corporate advisory services, predominantly on IPOs and also performed due diligence reviews.

She has a Bachelor of Commerce from the University of Western Australia, is a member of Chartered Accountants Australia and New Zealand, a fellow of the Financial Services Institute of Australasia (FINSIA) and a Fellow of the Governance Institute of Australia (FGIA).

Miranda Yuan, Joint Company Secretary (Appointed 1 July 2020)

MFin, MCom, CPA, GIA

Ms Yuan provides comprehensive accounting services and auditing assistance to a number of public and listed companies through Indian Ocean Corporate. She has experience in company secretarial work in a broad range of ASX listed companies. She also has experience working as a Finance Analyst to provide corporate advisory services for cross-border M&A, capital raisings, IPOs/RTOs and performing due diligence reviews.

Ms Yuan is an honours graduate in Finance from Aberdeen University, she holds a Master degree of Commerce in Finance from the University of New South of Wales and Master degree of Professional Accounting from Charles Sturt University. Ms Yuan is a member of Certified Practicing Accountant (CPA) Australia and a member of the Governance institute of Australia (GIA)

Interests in Shares and Options

At the date of this report, the interests of the Directors in the capital of Cokal Limited are shown in the table below.

	Ordinary Shares	Options
Domenic Martino	41,688,512	-
Karan Bangur	222,141,719	-
David Delbridge	-	-

Principal Activities

The principal activities of the consolidated entity during the financial year were focused on the identification and development of coal within the highly prospective Central Kalimantan coking coal basin in Indonesia.

Operating Results

For the year ended 30 June 2025, the loss for the consolidated entity after providing for income tax was US\$7,276,442(2024: US\$9,826,413).

Dividends Paid or Recommended

There were no dividends paid or recommended during the financial year.

Directors' Report

Review of Operations

Detailed comments on operations and exploration programs up to the date of this report are included separately in the Annual Report under Review of Operations.

Review of Financial Condition

Overview

While the Company's financial performance during the year has been well below expectations due to the sustained weakness in metallurgical coal prices, management has acted decisively to protect the balance sheet, manage creditor relationships, and restructure vendor payments. Importantly, Cokal has not defaulted on any obligations, underscoring the Company's commitment to financial discipline even under difficult conditions.

It is also essential to view the cash outflows of recent years in context. A significant portion of expenditure has been directed toward the construction of critical infrastructure assets — including haul roads, bridges, jetty access, and logistics facilities — which very few companies have been willing, or able, to develop in such a challenging environment. This infrastructure now stands as one of Cokal's greatest strategic assets, forming the backbone of its future production capability and serving as a key differentiator against peers.

Indeed, this long-term vision, set in motion five years ago, is today attracting the interest of major industry players such as Petrindo, who recognize the strategic importance of aligning with Cokal. While the financial results may not fully reflect the value created to date, the Board firmly believes that the investments undertaken have been in the right direction. These assets position Cokal to capitalise strongly on a market recovery, with benefits expected to flow through in the medium term as production and partnerships scale up.

Capital Structure

At 30 June 2025, the consolidated entity had 1,078,948,980 (2024: 1,078,948,980) ordinary shares and nil unlisted options (2024: Nil) on issue.

Financial Position

The consolidated entity's net liabilities increased by US\$7,276,442 from US\$8,469,206 at 30 June 2024 to US\$15,745,648 at 30 June 2025.

Treasury Policy

The consolidated entity does not have a formally established treasury function. The Board is responsible for managing the consolidated entity's finance facilities.

Some goods and services purchased by the consolidated entity, along with the payments made to the vendors of the Kalimantan coal projects, are in foreign currencies (AU dollars or Indonesian Rupiah).

The consolidated entity does not currently undertake hedging of any kind.

Liquidity and Funding

The consolidated entity believes it has sufficient access to funds to finance its operations and exploration/development activities, and to allow the consolidated entity to take advantage of favourable business opportunities, not specifically budgeted for, or to fund unforeseen expenditure.

Significant Changes in the State of Affairs

There have been no significant changes in the Group's state of affairs during the year ended 30 June 2025.

Directors' Report

Significant Events after the Reporting Date

No matters or circumstances have arisen since the end of the year which significantly affected or could significantly affect the operations of the Group, the results of those operations, or the state of affairs of the Group in future financial years, except the following:

On 23 September 2025, Cokal Limited announced that it had advanced its strategic partnership with PT Petrindo Jaya Kreasi Tbk (PT Petrindo) through the execution of a binding term sheet for the further development of the BBM Haul Road. Under the agreement, PT Petrindo will fund the upgrade of the road to increase its capacity and convert it into an all-weather road. The investment will be structured as a prepayment of future toll fees, with recovery based on coal transport volumes. Cokal will retain full ownership and licensing rights to the haul road. Both parties have also jointly agreed to appoint PT Petrosea Tbk as the lead contractor for the development works, with on-ground activities expected to commence in October 2025. (refer to the ASX announcement 23 September 2025)

Future Developments, Prospects and Business Strategies

The Annual Report under Review of Operations has discussed likely developments in the consolidated entity's operations and the expected results of those operations in subsequent financial years where appropriate.

There are no further developments of which the Directors are aware which could be expected to affect the results of the consolidated entity's operations in subsequent financial years.

Business Results

The prospects of the Group in developing its properties in Indonesia may be affected by a number of factors. These factors are similar to most exploration companies moving through the exploration phase and attempting to get projects into production. Some of these factors include:

- Exploration - the results of the exploration activities at the BBM project and the tenements in Central Kalimantan may be such that the estimated resources are insufficient to justify the financial viability of the projects.
- Regulatory and Sovereign - the Group operates in Indonesia and deals with local regulatory authorities in relation to the operation and development of its properties. The Group may not achieve the required local regulatory approvals, or they may be significantly delayed enabling it to commence production.
- Funding - the Group may require additional funding to move from the exploration/development phase to the production phase of the BBM project and the tenements in Central Kalimantan. There is no certainty that the Group will have access to available financial resources sufficient to fund its capital costs and/or operating costs at that time.
- Development - the Group is involved in developing greenfield projects in Indonesia which could result in capital costs and/or operating costs at levels which do not justify the economic development of the project.
- Market - there are numerous factors involved with early stage development of its properties such as the BBM project, including variance in commodity price and labour costs which can result in projects being uneconomical.

Environmental Issues

The consolidated entity is subject to environmental regulation in relation to its exploration activities. Indonesia where the Group's main project is located in the principal laws are Act No.41 of 1999 regarding Forestry (the Forestry Law), Act No.4 of 2009 regarding Minerals and Coal Mining (the Mining Law) and Act No. 32 of 2009 regarding Environmental Protection and Management (the Environment Law). There are no matters that have arisen in relation to environmental issues up to the date of this report.

Non-Audit Services

No non-audit services were provided by Cokal's auditor, Hall Chadwick during the financial year ended 30 June 2025 (2024: Nil).

Directors' Report

Remuneration Report (Audited)

This remuneration report for the year ended 30 June 2025 outlines the remuneration arrangements of the Group in accordance with the requirements of the Corporations Act 2001 (the Act) and its regulations. This information has been audited as required by section 308(3C) of the Act.

The remuneration report details the remuneration arrangements for key management personnel (KMP) who are defined as those persons having authority and responsibility for planning, directing and controlling the major activities of the Group, directly or indirectly, including any director (whether executive or otherwise) of the consolidated entity.

For the purposes of this report, the term "executive" includes the Chief Executive Officer, directors and other senior management executives of the Group.

Remuneration report approval at FY24 AGM

The remuneration report for the 2024 financial year received positive shareholder support with proxy votes of 77.07% in favour (of shares voted).

Remuneration Policy

The performance of the consolidated entity depends upon the quality of its directors and executives. To prosper, the consolidated entity must attract, motivate, and retain highly skilled directors and executives.

The Board does not presently have a Remuneration and Nomination Committee. The directors consider that the consolidated entity is not of a size, nor are its affairs of such complexity, as to justify the formation of any other special or separate committee at this time. All matters which might be dealt with by such a committee are reviewed by the directors meeting as a Board.

The Board, in carrying out the functions of the Remuneration and Nomination Committee, is responsible for reviewing and negotiating the compensation arrangements of senior executives and consultants.

The Board, in carrying out the functions of the Remuneration and Nomination Committee, assess the appropriateness of the nature and amount of remuneration of such officers on a periodic basis by reference to relevant employment market conditions with the overall objective of ensuring maximum stakeholder benefit from the retention of a high quality Board and executive team. Such officers are given the opportunity to receive their base remuneration in a variety of forms including cash and fringe benefits. It is intended that the manner of payments chosen will be optimal for the recipient without creating undue cost for the consolidated entity.

The consolidated entity aims to reward the Executive Directors and senior management with a level and mix of remuneration commensurate with their position and responsibilities within the consolidated entity. The Board's policy is to align director and executive objectives with shareholder and business objectives by providing a fixed remuneration component and offering short and/or long-term incentives as appropriate.

In accordance with best practice corporate governance, the structure of non-executive directors, Executive Directors and senior management remuneration is separate and distinct.

Non-executive Director Remuneration

The Board seeks to set aggregate remuneration at a level which provides the consolidated entity with the ability to attract and retain directors of the highest calibre, whilst incurring a cost which is acceptable to shareholders.

The Constitution of Cokal Limited and the ASX Listing Rules specify that the non-executive directors are entitled to remuneration as determined by the consolidated entity in a general meeting to be apportioned among them in such manner as the Directors agree and, in default of agreement, equally. The aggregate remuneration currently determined by Cokal Limited is AU\$500,000 per annum. Additionally, non-executive directors will be entitled to be reimbursed for properly incurred expenses.

If a non-executive director performs extra services, which in the opinion of the directors are outside the scope of the ordinary duties of the director, the consolidated entity may remunerate that director by payment of a fixed sum determined by the directors in addition to or instead of the remuneration referred to above. However, no payment can be made if the effect would be to exceed the maximum aggregate amount payable to non-executive directors. A non-executive director is entitled to be paid travel and other expenses properly incurred by them in attending directors' or general meetings of Cokal Limited or otherwise in connection with the business of the consolidated entity.

The remuneration of the non-executive directors for the year ending 30 June 2025 is detailed in this Remuneration Report.

Directors' Report

Executive Directors and Senior Management Remuneration

The consolidated entity aims to reward the Executive Directors and senior management with a level and mix of remuneration commensurate with their position and responsibilities within the consolidated entity so as to:

- reward Executives for consolidated entity and individual performance;
- align the interests of executives with those of shareholders;
- link reward with the strategic goals and performance of the consolidated entity; and
- ensure total remuneration is competitive by market standards.

The remuneration of the Executive Directors and senior management may from time to time be fixed by the Board. As noted above, the Board's policy is to align the Executive Directors and senior management objectives with shareholder and business objectives by providing a fixed remuneration component and offering short and/or long-term incentives as appropriate.

The level of fixed remuneration is set so as to provide a base level of remuneration which is both appropriate to the position and is competitive in the market. Short-term incentives may be provided in the form of performance bonuses. Fixed remuneration and short-term incentives are reviewed annually by the Board, in carrying out the functions of the Remuneration Committee, and the process consists of a review of Company-wide and individual performance, relevant comparative remuneration in the market and internal, and where appropriate, external advice on policies and practices.

Senior management are given the opportunity to receive their fixed remuneration in a variety of forms including cash and fringe benefits such as motor vehicles and expense payment plans. It is intended that the manner of payment chosen will be optimal for the recipient without creating undue cost for the consolidated entity.

Long-term incentives may be provided in the form of options and/or the issue of shares following the completion of satisfactory time periods of service. The consolidated entity uses employee continuity of service and the future share price to align comparative shareholder return and reward for executives.

The remuneration of the Executive Directors and senior management for the year ended 30 June 2024 is detailed in this Remuneration Report.

Relationship between Remuneration and Consolidated Entity Performance

During the financial year, the consolidated entity has generated losses as its principal activity was exploration and development within the Central Kalimantan coking coal basin in Indonesia.

The following table shows the performances of the consolidated entity for the last five years:

Year-end (30 June)	2025	2024	2023	2022	2021
Revenue	3,384,333	3,696,243	16,373	27,350	3,394
Net loss attributable to owners of the Parent Entity	(7,276,442)	(9,826,413)	(9,268,600)	(7,128,486)	(2,696,826)
Share price (US\$)	0.03	0.06	0.12	0.10	0.04
Basic (loss) per share (US cents)	(0.67)	(0.91)	(0.86)	(0.76)	(0.29)

There were no dividends paid during the year.

As the consolidated entity was still in the exploration and development stage during the financial year, the link between remuneration, consolidated entity performance and shareholder wealth is tenuous. Share prices are subject to the influence of coal prices and market sentiment toward the sector, and as such increases or decreases may occur quite independent of executive performance or remuneration.

Directors' Report

Employment and Services Agreements

It is the Board's policy that employment and/or services agreements are entered into with all Executive Directors, senior management, and employees.

Agreements do not provide for pre-determining compensation values or method of payment. Rather the amount of compensation is determined by the Board, where applicable with the remuneration policy set out above.

KMP are entitled to their statutory entitlements, where applicable of accrued annual leave and long service leave together with any superannuation on termination. No other termination payments are payable.

Chief Executive Officer

Mr Karan Bangur was appointed Chief Executive Officer on 13 July 2022 on the following terms:

- Appointment on an ongoing basis subject to termination by either party
- A base fee of A\$240,000 per annum subject to annual review by the Board
- The Company or the CEO may terminate the agreement by providing three months' notice. The payment of a termination benefit is subject to shareholder approval and was approved at the 2022 Annual General Meeting

Details of Key Management Personnel (KMP)

(i) Directors

- Domenic Martino, Chairman and Non-Executive Director
- Karan Bangur, Executive Director and Chief Executive Officer
- David Delbridge, Non-Executive Director

(ii) Senior Management

* In addition to director fees, Mr Bangur receive fees for services provided to BBM which are included in the schedule

Directors' Report

Cash Bonuses, Performance-related Bonuses and Share-based Payments

KMP and other executives may be paid cash bonuses or performance-related bonuses. There were nil remuneration options on issue during the 2025 financial year to KMP.

Options holdings

Details of options held and share-based payments to KMP and other executives awarded and vested/unvested during the year ended 30 June 2025 and 30 June 2024 are nil.

The options were issued to the director and senior management of Cokal Limited to align comparative shareholder return and reward for director and senior management.

All options issued by Cokal Limited entitle the holder to one ordinary share in Cokal Limited for each option exercised.

All options granted as part of remuneration were granted for nil consideration. Once vested, options can be exercised at any time up to the expiry date.

The consolidated entity does not currently have a policy prohibiting directors and executives from entering into arrangements to protect the value of unvested options. No directors or executives have entered into contracts to hedge their exposure to options awarded as part of their remuneration package.

Shareholdings

Details of ordinary shares held directly, indirectly or beneficially by KMP and their related parties are as follows:

	Balance 1 July 2024	Issued as Remuneration	On Exercise of Options	Net Change Other	Balance 30 June 2025

Directors' Report

Transactions with KMP and their related entities

Mr Domenic Martino

- As at 30 June 2025 director fees totalling US\$4,323 (2024: US\$46,200) remain outstanding to Mr Martino.
- Indian Ocean Corporate Pty Ltd, a company of which Mr Martino is a director, provides company secretarial services at a cost of AU\$6,600 (incl GST) per month. The services are based on normal commercial terms and conditions. During the 2025 financial year, Indian Ocean Capital Pty Ltd (associated company to Indian Ocean Corporate Pty Ltd) has provided company secretarial services totalling US\$51,876 (2024: US\$51,876), assistance with the preparation of reports totalling US\$18,013 (2024:US\$Nil) and a management consulting service totalling US\$Nil (2024: US\$ 43,230). Indian Ocean Consulting Group Pty Ltd has provided company taxation services totalling US\$Nil (2024:US\$12,160). As at 30 June 2025, company secretarial fees of US\$24,045 (2024: US\$17,354), management consulting services of US\$Nil (2024:US\$17,357) remain outstanding.

Mr Karan Bangur

- As at 30 June 2025 director fees totalling US\$178,200 (2024: US\$75,980) remain outstanding to Mr Bangur.

Mr David Delbridge

- As at 30 June 2025 director fees totalling US\$1,980 (2024: US\$1,965) remain outstanding to Mr Delbridge.

END OF REMUNERATION REPORT

Directors' Report

Directors' Meetings

The number of meetings of Directors held during the year and the number of meetings attended by each Director was as follows:

Board		
	Number of meetings held while in office	Meetings attended
Domenic Martino	6	6
Karan Bangur	6	6
David Delbridge	6	4

Indemnification and Insurance of Directors, Officers and Auditor

Each of the current Directors and Secretaries of Cokal Limited have entered into a Deed with Cokal Limited whereby Cokal Limited has provided certain contractual rights of access to books and records of Cokal Limited to those Directors and Secretaries.

Cokal Limited has insured all of the Directors of the consolidated entity. The contract of insurance prohibits the disclosure of the nature of the liabilities covered and amount of the premium paid. The Corporations Act does not require disclosure of the information in these circumstances.

The Company has not otherwise, during or since the financial year, except to the extent permitted by law, indemnified or agreed to indemnify an officer or auditor of the Company or of any related body corporate against a liability incurred as such an officer or auditor.

Options

At 30 June 2025, there were Nil unissued ordinary shares under options. (2024: Nil)

Directors' Report

Proceedings on Behalf of the Consolidated Entity

No person has applied for leave of Court to bring proceedings on behalf of the consolidated entity or intervene in any proceedings to which the consolidated entity is a party for the purposes of taking responsibility on behalf of the consolidated entity for all or any part of those proceedings.

The consolidated entity was not a party to any such proceedings during the year.

Auditor's Independence Declaration

The Auditor's Independence Declaration forms part of the Directors' Report and can be found on page 40.

Corporate Governance

In recognising the need for the highest standards of corporate behaviour and accountability, the directors of Cokal Limited support and have adhered to the principles of corporate governance. Cokal Limited's Corporate Governance Statement has been made publicly available on the Company's website at: www.cokal.com.au.

Annual Resource and Reserve Statement

The Company includes its Annual Resource and Reserve Statement in this Annual Report. The Statement can also be found on the Company's website at www.cokal.com.au.

This report is signed in accordance with a resolution of the directors.

**AUDITOR'S INDEPENDENCE DECLARATION
UNDER SECTION 307C OF THE CORPORATIONS ACT 2001 TO THE DIRECTORS OF
COKAL LIMITED**

In accordance with section 307C of the Corporations Act 2001, I am pleased to provide the following declaration of independence to the directors of Cokal Limited. As the lead audit partner for the audit of the financial report of Cokal Limited for the year ended 30 June 2025, I declare that, to the best of my knowledge and belief, there have been no contraventions of:

- (i) the auditor independence requirements as set out in the Corporations Act 2001 in relation to the audit; and
- (ii) any applicable code of professional conduct in relation to the audit.

The above Consolidated Statement of Cash Flows should be read in conjunction with the accompanying notes.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 1: About this Report

(a) General information

The consolidated financial statements of Cokal Limited for the year ended 30 June 2025 were authorised for issue in accordance with a resolution of the Directors dated 30 September 2025 and covers the consolidated entity (the “Group” or “Cokal”) consisting of Cokal Limited (the “Company”) and its subsidiaries.

The financial statements are presented in United States Dollars (“US\$”).

Cokal Limited (the parent) is a company limited by shares, incorporated and domiciled in Australia, whose shares are publicly traded on the Australian Securities Exchange.

The principal activities of the Group during the year were focused on the identification and development of coal within the highly prospective Central Kalimantan coking coal basin in Indonesia.

(b) Basis of preparation

The financial statements are general purpose financial statements which have been prepared in accordance with Australian Accounting Standards and the Corporations Act 2001.

The financial statements also comply with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

The financial statements have been prepared on a historical cost basis.

(c) Going concern

The financial report has been prepared on a going concern basis which contemplates the continuity of normal business activities and the realisation of assets and discharge of liabilities in the ordinary course of business.

For the year ended 30 June 2025 the Group recorded a loss of US\$7,276,442 (30 June 2024: loss of US\$9,826,413) and a net operating cash outflow US\$1,654,009 (30 June 2024: US\$957,846).

As at 30 June 2025, the Group’s current liabilities exceeded the current assets by US\$30,101,682 (30 June 2024: US\$19,513,740) and had net liabilities US\$(15,745,648) (30 June 2024: Net liabilities US\$(8,469,206)).

As at 30 June, the Group’s arrears of trade and other payables means its ability to continue as a going concern is dependent on shareholders, creditors, including management and the directors, extending payment terms, providing informal financial support and not demanding payment of amounts owed to them in excess of the Group’s available funds at the time. At the date of this report, no creditor or lender of the Group have made demands for payment.

The Group has a US\$20m debt financing facility for development of the Bumi Barito Mineral (BBM) Coking Coal Project with International Commodity Trade Pte Ltd (“ICT”). A further amount of a US\$ 3 million short term loan facility was provided by ICT with a facility fee of 20% p.a.

During this year, the Group entered into an additional US\$15 million financing facility with ICT, comprising a US\$1.5 million cash advance and US\$13.5 million in bank loans arranged by ICT on behalf of the Group. The new facility is for a term of up to three years, renewable annually at ICT’s discretion, and subject to shareholder and regulatory approvals for Cokal Limited to provide a corporate guarantee.

A portion of the current liabilities are payable over time and from production. The Group has a commission payable of US\$9,261,535 based on an agreement with Alpine Invest Holdings Ltd. This amount is re-payable at the greater of US\$10,000 per month and US\$2.00 per tonne of coal sold by BBM and TBAR on a monthly basis. Based on original term an amount of US\$2 million payable to BMA is also included in current liabilities and is to be repaid based on US\$ 5 per tonne payable over the 1st 200,000 mt sold and US\$ 10 for the subsequent 100,000 mt.

The Directors remain confident that, given the progress towards mining at the BBM Project, the Group will be successful in advancing the development of the project. The commencement of operations at BBM, together with the expected generation of operating cash inflows, is anticipated to enable the Group to meet its working capital requirements, including arrears of trade and other payables.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

(c) Going Concern (Cont'd)

On this basis, the Directors reasonably expect that the Group's creditors will continue to extend payment terms, provide informal financial support, and refrain from demanding repayment beyond the Group's available funds. Accordingly, the financial report has been prepared on a going concern basis.

The financial report does not include any adjustments relating to the recoverability and classification of recorded asset amounts or to the amounts and classification of liabilities should the Group be unsuccessful in raising funds to enable it to realise its assets and discharge its liabilities in the ordinary course of business.

(d) New accounting standards and interpretations

i. Changes in accounting policy and disclosures

The Group has not early adopted other standards, interpretations or amendments that has been issued but are not yet effective.

ii. Accounting Standards and Interpretations issued but not yet effective

The Group has adopted all the mandatory new and amended Accounting Standards issued that are relevant to its operations and effective for the current reporting period. There was no material impact on the financial report as a result of the mandatory new and amended Accounting Standards adopted.

(e) Basis of consolidation

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries at reporting date. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- Exposure, or rights, to variable returns from its involvement with the investee; and
- The ability to use its power over the investee to affect its returns.

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangements with the other vote holders of the investee;
- Rights arising from other contractual arrangements; and
- The Group's voting rights and potential voting rights.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the period are included in the statement of comprehensive income from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-Group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

(e) Basis of consolidation

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- De-recognises the assets (including goodwill) and liabilities of the subsidiary;
- De-recognises the carrying amount of any non-controlling interests;
- De-recognises the cumulative translation differences recorded in equity;
- Recognises the fair value of the consideration received;
- Recognises the fair value of any investment retained;
- Recognises any surplus or deficit in profit or loss; and
- Reclassifies the parent's share of components previously recognised in OCI to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

(f) Critical accounting estimates and judgments

Details of critical accounting estimates and judgements about the future made by management at the end of the reporting period are set out below:

(i) Impairment of non-financial assets

The Group assesses each reporting period to determine whether any indication of impairment exists. Where an indicator of impairment exists, a formal estimate of the recoverable amount is made, which is considered to be the higher of the fair value less costs of disposal (FVLCD) and value in use (VIU). The assessments require the use of estimates and assumptions such as long term coal prices (considering current and historical prices, price trends and related factors), discount rates, operating costs, future capital requirements and decommissioning operating performance (which includes production and sales volumes). These estimates and assumptions are subject to risks and uncertainty. Therefore, there is a possibility that changes in circumstances will impact this project, which may impact the recoverable amount of the asset.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Group considers any third party offers when forming a view on fair value, or Enterprise Value (EV) that the market participants willing to pay for acquisition of the Group's shares.

(ii) Exploration and evaluation assets

The application of the Group's accounting policy for exploration and evaluation expenditure requires judgement to determine whether future economic benefits are likely, from either exploration or sale, or whether activities have not yet reached a stage which permits a reasonable assessment of the existence of technically feasible and commercially viable reserves. The determination of reserves and resources is itself an estimation process that requires varying degrees of uncertainty depending on how the resources are classified. These estimates directly impact when the Group defers exploration and evaluation expenditure. The deferral policy requires management to make certain estimates and assumptions about future events and circumstances, in particular, whether an economically viable extraction operation can be established. Any such estimates and assumptions may change as new information becomes available. If, after expenditure is capitalised, information becomes available suggesting that the recovery of the expenditure is unlikely, the relevant capitalised amount is written off in profit or loss in the statement of comprehensive income in the period when the new information becomes available.

At reporting date, certain tenements have reached a renewal date or will reach a renewal date in the next 12 months. These tenements remain current until an official government expiry notice is issued. The directors are of the opinion that while they are due for renewal, as no expiry notice has been received they remain current. If renewal is not forthcoming, the amounts capitalised will likely be de-recognised.

(iii) Mine under development assets

The Group uses its judgement to assess the stage of each mine under development to determine when a mine moves into the production phase, this being when the mine is substantially complete and ready for its intended use. The Group considers various relevant criteria to assess when the production phase is considered to have commenced. At this point, all related amounts are reclassified from 'Mines under development' to 'Mines in production'. Some of the criteria used to identify the production start date include, but are not limited to:

1. Level of capital expenditure incurred compared with the original development cost estimate;
2. Completion of a reasonable period of testing of the mine plant and equipment;
3. Ability to produce metal in saleable form (within specifications);
4. Ability to sustain ongoing production of metal; and
5. Positive cash flow position from operations.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

(f) Critical accounting estimates and judgments (Cont'd)

(iii) Mine under development assets (Cont'd)

When a mine development project moves into the production phase, the capitalisation of certain mine development costs and pre-production revenues cease and costs are either regarded as forming part of the cost of inventory or expensed, except for costs that qualify for capitalisation relating to mining asset additions or improvements, underground mine development or mineable reserve development. It is also at this point that amortisation commences. Amortisation is calculated in proportion to actual production when measured against mineable resources in the mine area developed.

Expenses are capitalised to mine development costs, except variable costs directly related to production, which are capitalised to inventory. Directors review the carrying value of mine development and pre-production to ensure it is not in excess of its recoverable amount.

(iv) Taxation

The Group's accounting policy for taxation requires management's judgement as to the types of arrangements considered to be a tax on income in contrast to an operating cost. Judgement is also required in assessing whether deferred tax assets and certain deferred tax liabilities are recognised on the balance sheet.

Deferred tax assets, including those arising from unrecouped tax losses, capital losses and temporary differences, are recognised only where it is considered more likely than not that they will be recovered, which is dependent on the generation of sufficient future taxable profits. Judgements are also required about the application of income tax legislation. These judgements and assumptions are subject to risk and uncertainty, hence there is a possibility that changes in circumstances will alter expectations, which may impact the amount of deferred tax assets and deferred tax liabilities recognised on the balance sheet and the amount of other tax losses and temporary differences not yet recognised. In such circumstances, some or all of the carrying amounts of recognised deferred tax assets and liabilities may require adjustment, resulting in a corresponding credit or change to the income statement.

(v) Share-based payments

The Group uses estimates to determine the fair value of equity instruments issued to directors, executives, employees and suppliers. Further detail of estimates used in determining the value of share-based payments is included in Note 24.

(vi) Joint arrangement

Judgement is also required to classify a joint arrangement. Classifying the arrangement requires the Group to assess its rights and obligations arising from the arrangement. Specifically, the Group considers:

- The structure of the joint arrangement – whether it's structured through a separate vehicle
- When the arrangement is structure through a separate vehicle, the Group also considers the rights and obligations arising from:
 - The legal form of the separate vehicle;
 - The terms of the contractual arrangement; and
 - Other facts and circumstances (when relevant).

This assessment often requires significant judgement, and a different conclusion on joint control and also whether the arrangement is a joint operation or a joint venture, may materially impact the accounting.

Per agreement with subsidiary shareholders, the relevant activities including financing of certain entities' are managed and controlled by Cokal until the completion of Initial Work Program. The rights of other shareholders to receive returns and obligations for expenditure are only established when they contribute their share of capital upon completion of the Initial Work Program by Cokal. Given this, to date it has been determined that Cokal controls these entities and hence currently consolidates them as subsidiaries. In future periods, however, the accounting treatment of these entities will be required to be reassessed upon completion of Initial Work Program. This may lead to a change in accounting if it is then determined that instead of controlling these entities, Cokal now only jointly controls these and they are joint arrangements. Depending on whether these joint arrangements are classified as joint ventures or joint operations, this may require either equity accounting (for a joint venture) or recognition of Cokal's share of the assets, liabilities, income and expenses of the arrangement (for a joint operation). Directors have not reassessed the impact at reporting date as the Initial Work Program has not been completed at this date.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

(g) Impairment of non-financial assets other than goodwill

At the end of each reporting period the Group assesses whether there is any indication that individual assets other than goodwill, are impaired. Where impairment indicators exist, recoverable amount is determined and impairment losses are recognised in profit or loss where the asset's carrying value exceeds its recoverable amount. Recoverable amount is the higher of an asset's FVLCD and VIU. For the purpose of assessing VIU, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Where it is not possible to estimate the recoverable amount for an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Assets other than goodwill that have previously been impaired are tested for possible reversal of the impairment whenever events or changes in circumstances indicate that the impairment may have reversed.

(f) Provisions

Provisions for legal claims and make good obligations are recognised when the Group has a present legal or constructive obligation as a result of a past event, it is probable that that an outflow of economic resources will be required to settle the obligation and the amount can be reliably estimated.

(g) GST

Revenues, expenses and assets are recognised net of GST except where GST incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item.

Receivables and payables are stated with the amount of GST included. The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statements of financial position.

Cash flows are included in the statement of cash flows on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority, are classified as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

(h) Fair value measurement

The Group did not have any financial assets and liabilities measured at fair value at reporting date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability; or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

(h) Fair value measurement (Cont'd)

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

(i) Current versus non-current classification

The Group presents assets and liabilities in the statement of financial position based on current/non-current classification. An asset is current when it is either:

- a. Expected to be realised or intended to be sold or consumed in the normal operating cycle;
- b. Held primarily for the purpose of trading;
- c. Expected to be realised within 12 months after the reporting period; or
- d. Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period.

All other assets are classified as non-current. A liability is current when either:

- e. It is expected to be settled in the normal operating cycle;
- f. It is held primarily for the purpose of trading;
- g. It is due to be settled within 12 months after the reporting period; or
- h. There is no unconditional right to defer the settlement of the liability for at least 12 months after the reporting period.

The Group classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

(j) Other accounting policies

Other accounting policies applied by the Group are disclosed in the following notes:

Note 2 Revenue and Other Income
 Note 4 Income Tax
 Note 6 Loss per Share
 Note 7 Cash and Cash Equivalent
 Note 9 Inventories
 Note 10 Property, Plant and Equipment
 Note 11 Exploration and Evaluation Assets
 Note 12 Mines under Development
 Note 14 Accounts Payable and Others
 Note 15 Leases
 Note 17 Issued Capital
 Note 18 Reserves
 Note 19 Parent Entity Information
 Note 22 Operating Segments
 Note 24 Share-based Payments
 Note 26 Financial Risk Management

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 2: Revenue and Other Income

	2025 US\$	2024 US\$
Sales revenue	3,341,000	3,674,906
Other income	43,333	21,337
Total other income	3,384,333	3,696,243

Accounting Policy: Revenue Recognition

Sales revenue

Revenue from the sale of coal is recognised when control of the product has transferred to the customer. Control of the product is considered transferred to the customer at the time of delivery, usually on a Free on Board ("FOB") basis (when the delivery of goods is carried out on board the ship that will carry out the transportation of goods) or a Free Along Ship ("FAS") basis (when the goods are handed over by the seller beside the ship at the loading port). A receivable is recognised when control of the products is delivered as this is the point in time that the consideration is unconditional and when control of the product is transferred to the customer.

Note 3: Dividends and Franking Credits

There were no dividends paid or recommended during the financial year (30 June 2024: Nil).

There were no franking credits available to the shareholders of the Group (30 June 2024: Nil).

Note 4: Income Tax

	2025 US\$	2024 US\$
The prima facie income tax on the loss is reconciled to the income tax expense as follows:		
Prima facie tax benefit at 25% on loss before income tax	(1,819,110)	(2,456,603)
Add tax effect of:		
- Tax adjustments and impact of tax rate differences	(989,398)	(1,001,557)
- Deferred tax asset not recognised	2,808,508	3,458,160
Income tax expense	-	-
Deferred tax assets		
Deductible temporary differences	-	-
Carry forward tax losses	21,969,032	19,160,524
Deferred tax liabilities		
Assessable temporary differences	-	-
Net deferred tax assets not recognised	21,969,032	19,160,524

The carried forward tax losses and temporary differences not recognised as deferred tax assets as at 30 June 2025 were US\$87,876,128 (30 June 2024: US\$76,642,096) and US\$Nil (30 June 2024: US\$Nil) respectively.

In order to recoup carried forward losses in future periods, either the Continuity of Ownership Test (COT) or Same Business Test must be passed. The majority of losses are carried forward at 30 June 2025 under COT.

Deferred tax assets which have not been recognised as an asset, will only be obtained if:

- the Group derives future assessable income of a nature and of an amount sufficient to enable the losses to be realised;
- the Group continues to comply with the conditions for deductibility imposed by the law; and
- no changes in tax legislation adversely affect the Group in realising the losses.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 4: Income tax (cont'd)

Accounting Policy: Income Tax

The income tax expense for the year is the tax payable on the current year's taxable income based on the national income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences between the tax base of assets and liabilities and their carrying amounts in the financial statements, and to unused tax losses.

Deferred tax assets and liabilities are recognised for all temporary differences, between carrying amounts of assets and liabilities for financial reporting purposes and their respective tax bases, at the tax rates expected to apply when the assets are recovered or liabilities settled, based on those tax rates which are enacted or substantively enacted for each jurisdiction. Exceptions are made for certain temporary differences arising on initial recognition of an asset or a liability if they arose in a transaction, other than a business combination, that at the time of the transaction did not affect either accounting profit or taxable profit.

Deferred tax assets are only recognised for deductible temporary differences and unused tax losses if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax assets and liabilities are not recognised for temporary differences between the carrying amount and tax bases of investments in subsidiaries, associates and interests in joint ventures where the parent entity is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Current and deferred tax balances relating to amounts recognised directly in other comprehensive income and equity are also recognised directly in other comprehensive income and equity, respectively.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer profitable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised.

Deferred tax assets and deferred tax liabilities are offset only if a legally enforceable right exists to set off current tax assets against tax liabilities and the deferred tax assets and liabilities relate to the same taxable entity and the same taxation authority.

Cokal Limited and its wholly-owned Australian subsidiaries have formed a tax consolidated group. Cokal Limited is the head entity in the tax consolidated Group. The entities in the tax consolidated group will be taxed as a single entity and deferred tax assets and liabilities will be offset in these consolidated financial statements.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 5: Auditor's Remuneration

	2025 US\$	2024 US\$
Audit services		
Amounts paid/payable for audit or review of the financial statements for the Group		
Hall Chadwick	137,000	89,524
	137,000	89,524

Note 6: Earnings per Share

	2025 US\$	2024 US\$
Loss attributable to owners of Cokal Limited used to calculate basic and diluted loss per share (USD)	(7,276,442)	(9,826,413)
Weighted average number of ordinary shares used as the denominator in calculating basic loss per share	1,078,948,980	1,078,948,980
Adjustments for calculation of diluted earnings per share:		
- Options *	-	-
Weighted average number of ordinary shares and potential ordinary shares used as the denominator in calculating diluted loss per share	1,078,948,980	1,078,948,980
Basic loss per share (US cents per share)	(0.67)	(0.91)
Diluted loss per share (US cents per share)	(0.67)	(0.91)

* Options are considered anti-dilutive as the Group is loss making.

Accounting Policy: Earnings per share

Basic earnings per share

Basic earnings per share is calculated by dividing the profit/(loss) attributable to owners of Cokal Limited by the weighted average number of ordinary shares outstanding during the period, adjusted for bonus elements in ordinary shares during the period.

Diluted earnings per share

Earnings used to calculate diluted earnings per share are calculated by adjusting the amount used in determining basic earnings per share by the after-tax effect of dividends and interest associated with dilutive potential ordinary shares. The weighted average number of shares used is adjusted for the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 7: Cash and Cash Equivalents

	2025 US\$	2023 US\$
Cash and bank balances	1,699,443	1,518,525
Less: Short term deposits maturing after three months and restricted bank balance classified as investing activities**	(1,068,517)	(1,036,712)
Cash and cash equivalents	630,926	481,813

**Includes restricted deposits of US\$1,068,517 (2024: US\$1,036,712) which can be used only after TBAR production commences.

Accounting Policy: Cash and cash equivalents

For the purposes of the Statement of Cash Flows, cash and cash equivalents includes cash on hand and at bank, deposits held at call with financial institutions, other short term, highly liquid investments with maturities of three months or less, that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Note 8: Subsidiaries

a) Interest in subsidiaries

The consolidated financial statements incorporate the assets, liabilities and results of the following subsidiaries in accordance with the accounting policy described in Note 1.

Name of entity	Country of Incorporation	Class of Shares	Percentage Owned (%) [*]	
			2025	2024
Jack Doolan Capital Pty Ltd	Australia	Ordinary	100%	100%

Cokal Karoo Limited [#]	Tanzania	Ordinary	100%	100%
Cokal Manda Limited [#]	Tanzania	Ordinary	100%	100%

* the proportion of ownership interest is equal to the proportion of voting power held.

[^] Up to the reporting date, BBM has been financed by Cokal Limited. Per agreement, the right of non-controlling shareholders' receiving a return is established only when BBM repays the loan owing to Cokal Limited, approximating US\$58m. At reporting date, no repayment of the loan has occurred and therefore there is no right to a return for non-controlling interests.

[#] These entities are dormant entities. All capitalised expenditures for these entities has been impaired to \$nil in prior periods. The fair value of the underlying assets, liabilities and contingent liabilities at the acquisition date and 30 June 2025 are \$nil.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 8: Subsidiaries (cont'd)

b) Financial information of subsidiaries

The balances of non-controlling interests are not currently material at 30 June 2025 and 30 June 2024 as the right of non-controlling shareholders' receiving a return is established only when BBM repays the loan owing to the Cokal Limited, approximating US\$58m. At reporting date, no repayment of the loan has occurred and therefore there is no right to a return for non-controlling interests.

Note 9: Inventories

	2025 US\$	2024 US\$
Stores and consumables – at cost	13,240	78,396
Inventory – at cost	1,858,125	1,725,072
Provision	(108,312)	(108,311)
	1,763,053	1,695,157

Accounting Policy: Inventories

Inventories of coal are physically measured or stated at the lower of cost and net realisable value.

Coal stocks comprises direct materials and delivery costs, direct labour, import duties and other taxes, an appropriate proportion of variable and fixed overhead expenditure based on normal operating capacity. Costs are assigned to inventories using the weighted average basis.

Stores cost comprises average cost of purchase price and associated charges.

Net realisable value is estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 10: Property, Plant and Equipment (cont'd)

Accounting Policy: Property, plant and equipment

Property, plant and equipment is measured at cost less depreciation and impairment losses.

The cost of property, plant and equipment constructed within the Group includes the cost of materials, direct labour, borrowing costs and an appropriate portion of fixed and variable costs.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the consolidated entity and the cost of the item can be measured reliably. All other repairs and maintenance are charged to profit or loss during the period in which they are incurred.

Depreciation

The depreciable amount of property, plant and equipment is depreciated over their useful life to the Group commencing from the time the asset is held ready for use.

The depreciation rates used for each class of assets are:

Class of Fixed Assets	Depreciation Rate
Land	nil
Computer Equipment	33.3% straight line
Plant and Equipment	10 – 33.3% straight line
Motor Vehicles	20% straight line

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An item of property, plant and equipment is de-recognised upon disposal or when no further future economic benefits are expected from its use or disposal.

Gains and losses on disposal are determined by comparing proceeds with the carrying amount. The gains and losses are included in the statement of comprehensive income.

Capital Work in Progress

Capital work in progress is projects of a capital nature which usually relates to the construction/installation of infrastructure. Upon completion (when ready for use) capital work in progress is transferred to the relevant asset category. Capital work in progress is not depreciated.

Note 11: Exploration and Evaluation Assets

	2025 US\$	2024 US\$
Non-Current		
Exploration and evaluation expenditure capitalised		
- exploration and evaluation phases	1,606,585	1,606,585
Recoverability of the carrying amount of exploration and evaluation assets is dependent on the successful development and commercial exploitation of coal, or alternatively, sale of the respective areas of interest.		
(a) Movements in carrying amounts		
Balance at the beginning of the year	1,606,585	1,606,585
Site related expenses during the year	-	-
Transfer to Mine under development	-	-
Carrying amount at the end of the year	1,606,585	1,606,585

The carrying amount of exploration and evaluation (E&E) assets at 30 June 2025 represents only the TBAR project. The value of the exploration and evaluation expenditure carried forward in respect of the BBM Project has been capitalised on the balance sheet as a Mine Under Development, as pre-production activities to gain access to mineral reserves have commenced and funding is in place.

The ultimate recoupment of expenditure relating to the exploration and evaluation phase is dependent upon successful development and commercial exploitation, or alternatively, sale of the respective areas of interest.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 11: Exploration and Evaluation Assets (cont'd)

Accounting Policy: Exploration, evaluation and development expenditure

Exploration, evaluation and development expenditure incurred is accumulated in respect of each identifiable area of interest. Such expenditures comprise net direct costs and an appropriate portion of related overhead expenditure but do not include overheads or administration expenditure not having a specific nexus with a particular area of interest. The exploration and evaluation expenditure is only carried forward as exploration or evaluation assets to the extent that they are expected to be recouped through the successful development of the area or where activities in the area have not yet reached a stage which permits reasonable assessment of the existence of economically recoverable reserves and active or significant operations in relation to the area are continuing.

When technical feasibility and commercial viability of extracting a Coal Resource have been demonstrated then any capitalised exploration and evaluation expenditure is reclassified as capitalised mine development. Prior to reclassification, capitalised exploration and evaluation expense is assessed for impairment.

A regular review has been undertaken on each area of interest to determine the appropriateness of continuing to carry forward costs in relation to that area of interest. Accumulated costs in relation to an abandoned area are written off/de-recognised in full against profit in the period in which the decision to abandon the area is made.

Costs related to the acquisition of properties that contain Coal Resources are allocated separately to specific areas of interest. These costs are capitalised until the viability of the area of interest is determined.

Note 12: Mines Under Development

	2025 US\$	2024 US\$
Non-Current		
Mines under Development	23,715,808	23,744,327
Movements in carrying amounts		
Balance at the start of the year	23,744,327	23,754,966
Amortisation for the period	(28,519)	(10,639)
Carrying amount at the end of the period	23,715,808	23,744,327

Accounting Policy: Mines under Development

Amortisation calculated to write off the net cost of Mine development over the useful lives as follows:

Class of Assets	Depreciation Rate
Mine development	Proportion of actual production measured against mineable resources in the mine area developed on which the expenses were incurred.

Mines under development include aggregate expenditure in relation to mine construction, mine development, exploration and evaluation expenditure where development decisions have been made and acquired mineral interests.

Expenditure incurred in constructing a mine by, or on behalf of, the Group is accumulated separately for each area of interest in which economically recoverable reserves and resources have been identified. This expenditure includes direct costs of construction, drilling costs and removal of overburden to gain access to the ore, borrowing costs capitalised during construction and an appropriate allocation of attributable overheads.

Mines under development are accumulated separately for each area of interest in which economically recoverable reserves have been identified and a decision to develop has occurred. This expenditure includes all capitalised exploration and evaluation expenditure in respect of the area of interest, direct costs of development, an appropriate allocation of overheads and where applicable borrowing costs capitalised during development. When mining of the area of interest can commence, the aggregated capitalised costs are classified under non-current assets as mines in production or an appropriate class of property, plant and equipment.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 12: Mines Under Development (cont'd)

Mines in production represent the aggregated exploration and evaluation expenditure and capitalised development costs in respect of areas of interest in which mining is ready to or has commenced. Mine development costs are deferred until commercial production commences, at which time they are amortised on a units-of-production basis over the ore reserves or resources. Once production commences, further development expenditure is classified as part of the cost of production, unless substantial future economic benefits can be established.

The stripping costs (the process of over burden removal) incurred before production commences (development stripping) are capitalised as part of mine development expenditure and subsequently amortised.

The stripping costs incurred subsequent to commencement of production are referred to as production stripping. Production stripping is generally considered to create two benefits, being either the production of inventory or improved access to the coal to be mined in the future. Where the benefits are realised in the form of inventory produced in the period, the production stripping costs are accounted for as part of the cost of producing those inventories. Where the benefits are realised in the form of improved access to ore to be mined in the future, the costs are recognised as a non-current asset, referred to as a 'stripping activity asset', if the following criteria are met:

- a) Future economic benefits (being improved access to the ore body) are probable;
- b) The component of the ore body for which access will be improved can be accurately identified; and
- c) The costs associated with the improved access can be reliably measured.

If all of the criteria are not met, the production stripping costs are charged to profit or loss as operating costs as they are incurred. When production commences, the accumulated costs for the relevant area of interest (mine development and acquired properties) will be amortised over the life of the area according to the rate of depletion of the economically recoverable reserves using a units of production method.

Mine rehabilitation costs will be incurred by the Group either while operating, or at the end of the operating life of, the Group's facilities and mine properties. The Group assesses its mine rehabilitation provision at each reporting date. The Group recognises a rehabilitation provision where it has a legal and constructive obligation as a result of past events, and it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount of obligation can be made. The nature of these restoration activities includes: dismantling and removing structures; rehabilitating mines and tailings dams; dismantling operating facilities; closing plant and waste sites; and restoring, reclaiming and revegetating affected areas.

The obligation generally arises when the asset is installed or the ground/environment is disturbed at the mining operation's location. When the liability is initially recognised, the present value of the estimated costs is capitalised by increasing the carrying amount of the related mining assets to the extent that it was incurred as a result of the development/construction of the mine. Any rehabilitation obligations that arise through the production of inventory are recognised as part of the related inventory item. Additional disturbances which arise due to further development /construction at the mine are recognised as additions or charges to the corresponding assets and rehabilitation liability when they occur. Costs related to restoration of site damage (subsequent to start of commercial production) that is created on an ongoing basis during production are provided for at their net present values and recognised in profit or loss as extraction progresses.

Changes in the estimated timing of rehabilitation or changes to the estimated future costs are dealt with prospectively by recognising an adjustment to the rehabilitation liability and a corresponding adjustment to the asset to which it relates, if the initial estimate was originally recognised as part of an asset measured in accordance with AASB 116.

Any reduction in the rehabilitation liability and, therefore, any deduction from the asset to which it relates, may not exceed the carrying amount of that asset. If it does, any excess over the carrying value is taken immediately to the statement of profit or loss and other comprehensive income.

If the change in estimate results in an increase in the rehabilitation liability and, therefore, an addition to the carrying value of the asset, the Group considers whether this is an indication of impairment of the asset as a whole, and if so, tests for impairment. If, for mature mines, the estimate for the revised mine assets net of rehabilitation provisions exceeds the recoverable value, then that portion of the increase is charged directly to expense.

Over time, the discounted liability is increased for the change in present value based on the discount rates that reflect current market assessments and the risks specific to the liability. The periodic unwinding of the discount is recognised in the statement of profit or loss and other comprehensive income as part of finance costs. For closed sites, changes to estimated costs are recognised immediately in the statement of profit or loss and other comprehensive income.

The Group recognises neither the deferred tax asset in respect of the temporary difference on the decommissioning liability nor the corresponding deferred tax liability in respect of the temporary difference on a decommissioning asset.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 13: Other Assets

Commission payable	9,261,535	9,261,535
	32,190,643	27,380,209

Accounting Policy: Accounts payable and others

Revenue in advance

BBM has entered into an agreement with PT Sumber Global Energy ("SGE") to monetise near-term coal production. SGE advances BBM a total of US\$2.0M as consideration for Cokal appointing SGE as Exclusive Sales Agent for domestic Indonesian coal sales whereby SGE will undertake the marketing and sales of 0.6Mt BBM coal sold into the Indonesian domestic market for a period of 2 years from the date of first delivery of coal to SGE.

BBM will repay the US\$2.0M to SGE through a reduction in the coal sales price over the term of the agreement. The repayment schedule to SGE will be calculated by apportioning the US\$2.0M consideration over the total tonnage of coal allocated to SGE over the term of the Agreement, which will be deducted from the sales price (e.g. If BBM allocates 0.6Mt of coal to SGE, then the US\$2.0M in consideration will result in a US\$3.33/t reduction in coal sales price for that tonnage.) The reduction in coal sales price shall be adjusted in the final period of the Agreement to ensure full repayment of the US\$2.0M consideration.

Cokal has received a total of US\$5.0 million in prepayments under coal sales agreements, including from International Commodity Trade Pte Ltd ("ICT") and other buyers. These advances will be repaid through future coal deliveries, with the prepayment amounts apportioned across the contracted tonnage and offset against the sales proceeds over the term of the agreements.

Commission payable

Loans owing by the Company were previously discharged and Cokal and each Cokal Group Company released from their liability to make payment of \$9,261,535 under the loan on terms including the following:

- the royalty payable to Alpine under the Royalty Deed will be the greater of:
 - USD 10,000 per month; and
 - USD 2.00 per tonne of coal sold by BBM and TBAR on a monthly basis;
- the maximum royalty payment of USD 40million payable under the Royalty Deed remains the same and will be payable through the first 20 million tonnes of coal produced and sold by both BBM and TBAR; and
- all other conditions stated in the Royalty Deed shall remain the same.

The fair value of the commission payable to Alpine has been determined using the extinguished value of borrowings, taking into consideration the performance risk associated with future production levels.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 15: Leases

	2025 US\$	2024 US\$
a) Right of use assets – buildings and motor vehicles		
Balance at beginning of year	255,597	624,952
Reclassification	-	(6,589)
Additional leases during the year	89,254	-
Amortisation	(266,070)	(362,766)
Balance at end of year	78,781	255,597
b) Lease liabilities		
Current	100,500	247,019
Non current	32,335	8,066
	132,835	255,085

Accounting Policy: Leases

At inception of a contract, the Group assesses if the contract contains or is a lease. If there is a lease present, a right-of-use asset and a corresponding lease liability is recognised by the Group where the Group is a lessee. However, all contracts that are classified as short-term leases (ie a lease with a remaining lease term of 12 months or less) and leases of low-value assets are recognised as an operating expense on a straight-line basis over the term of the lease.

Initially, the lease liability is measured at the present value of the lease payments still to be paid at commencement date. The lease payments are discounted at the interest rate implicit in the lease. If this rate cannot be readily determined, the Group uses the incremental borrowing rate.

Lease payments included in the measurement of the lease liability are as follows:

- fixed lease payments less any lease incentives;
- variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- the amount expected to be payable by the lessee under residual value guarantees;
- the exercise price of purchase options, if the lessee is reasonably certain to exercise the options;
- lease payments under extension options, if lessee is reasonably certain to exercise the options; and
- payments of penalties for terminating the lease, if the lease term reflects the exercise of an option to terminate the lease.

The right-of-use assets comprise the initial measurement of the corresponding lease liability as mentioned above, any lease payments made at or before the commencement date, as well as any initial direct costs. The subsequent measurement of the right-of-use assets is at cost less accumulated depreciation and impairment losses.

Right-of-use assets are depreciated over the lease term or useful life of the underlying asset, whichever is the shortest. Where a lease transfers ownership of the underlying asset, or the cost of the right-of-use asset reflects that the Group anticipates to exercise a purchase option, the specific asset is depreciated over the useful life of the underlying asset.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 16: Borrowings

	2025 US\$	2024 US\$
Current		
BMA Group loan	2,000,000	2,000,000
Loans payable	9,268,258	3,247,992
Total Current	11,268,258	5,247,992
Non-Current		
Loans payable	20,000,000	20,000,000
Total Non-Current	20,000,000	20,000,000
Total Borrowings	31,268,258	25,247,992

BMA Group loan

On 21 September 2018, Cokal signed a Key Principles of Agreement with PT Bara Mineral Asri (BMA Group) to develop and operate PCI and Coking Coal operations at the BBM Project. Cokal received US\$2.0 million loan from BMA Group to secure the transaction, but the BMA Group failed to complete the other funding conditions set out in the Key Principles of Agreement and has also failed to document the loan arrangement with the Group. Therefore, the Group has assessed the loan is repayable on demand and has been disclosed at the face value of the amounts received. Repayment terms have been revised to US\$ 5 per tonne payable over the first 200,000 mt sold and US\$ 10 for the subsequent 100,000 mt.

Short Term Loan Facility

An additional US\$2 million loan facility provided by ICT was executed on 7 February 2024. A facility fee of 20% per annum is payable over 4 quarters at 5% per quarter. Both parties agreed to increase the loan facility by an additional US\$1 million. As at 30 June 2025, the full amount of the facility to a total of US\$3 million has been drawn.

US\$15m ICT Loan Facility

On 11 June 2025, Cokal entered into entered into a US\$15.0 million facility with International Commodity Trade Pte Ltd (ICT), comprising a cash advance of US\$1.5 million and bank loans of US\$13.5 million arranged by ICT and secured by assets pledged to the banks. The facility is structured as revolving facilities renewable annually for up to three years, subject to ICT approval. Interest is payable monthly at 10% per annum on the cash advance and 8% per annum on the bank loan amounts. A service fee of US\$1.50 per tonne is payable on the first 20 million tonnes of coal sold from the date of funding, and late payments incur an additional 12% per annum up to 30 days. Cokal's guarantee of the facility, including a pledge of CHPL shares, is subject to shareholder and regulatory approvals, which must be obtained by 31 December 2025.

Non- Current Loans payable

On 14 July 2021 Cokal executed a US\$20 million debt financing facility with International Commodity Trade (ICT) for development of the Bumi Barito Mineral (BBM) Coking Cokal Project. As at 30 June 2025, US\$20 million has been drawn.

A capital participation fee for the debt finance is linked to BBM mining operations and is calculated as follows:

- Total Fee for debt finance of US\$0.20 per BCM of overburden removal at BBM;
- Total Fee for debt finance is capped at a maximum amount of 200,000,000 BCM of overburden work which equates to a maximum amount of US\$40m (this fee includes interest payable);
- The fee is payable on a monthly basis, based on actual overburden removal with a minimum of 2,000,000 BCM of overburden a month (US\$400,000);
- The fee payable must be paid within 8 years and 4 months from the first drawdown date.

The capital participation fee has been incurred from when amounts were drawn down under the facility, totalling US\$2,400,000 for the period to 30 June 2025.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 17: Issued Capital

(a) Ordinary shares	2025 US\$	2024 US\$

Shares issued during the year	-	-
At reporting date	1,078,948,980	1,078,948,980

(b) Options

Nil options on issue at 30 June 2025.

(c) Capital Risk Management

Management controls the capital of the Group in order to provide capital growth to shareholders and ensure the Group can fund its operations and continue as a going concern.

The Group capital comprises equity as shown in the Statement of Financial Position.

Management effectively manages the Group capital by assessing the Group financial risks and adjusting its capital structure in response to changes in these risks and the market. These responses include raising sufficient equity capital when required.

There have been no changes in the strategy adopted by management to control the capital of the Group since the prior year.

Accounting Policy: Issued capital

Ordinary shares are classified as equity. Costs directly attributable to the issue of new shares or options are shown as a deduction from the equity proceeds, net of any income tax benefit.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 18: Reserves

	2025 US\$	2024 US\$
Share based payments option reserve		
Opening balance	7,930,246	7,930,246
Movement	-	-

Movement	-	-
Closing balance	(1,417,999)	(1,417,999)
	6,512,247	6,512,247

Share Based Payment Option Reserve

The option reserve records the value of options issued as part of capital raisings, and consultant services as well as expenses relating to director, executive and employee share options.

Foreign Currency Translation Reserve

The foreign currency translation reserve represents net exchange differences arising from the translation as a result of foreign operations.

Translation reserve represents the net exchange differences arising from the translation as a result of change in presentation currency to US\$ from AU\$ and translation of the AUD entity to USD.

Accounting Policy: Foreign currency translation

Transactions in foreign currencies are initially recorded in the functional currency by applying the exchange rates ruling at the date of transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the rate of exchange ruling at the reporting date. The resulted gain or loss on retranslation is included in profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of the initial transaction. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 19: Parent Entity Information

The consolidated financial statements incorporate the assets, liabilities and results of the parent entity in accordance with the accounting policy described in Note 1.

Parent Entity	2025 US\$	2024 US\$
Current assets	20,858	71,796
Non-current assets	22,630,696	22,882,703

Accumulated losses	(94,111,641)	(93,549,757)
Total shareholder's equity	16,677,435	17,239,319
Loss for the year	(561,884)	(730,956)
Total comprehensive loss for the year	(561,884)	(730,956)

Guarantees

The parent entity has set up wholly owned special purpose entities (SPEs) in Singapore to hold ownership interests in Indonesia and provided an undertaking to financially support these SPEs to meet their liabilities as and when they fall due.

Cokal Limited has provided a corporate guarantee for payment of the International Commodity Trade (ICT) Facility (refer note 16).

Contractual Commitments

There were no contractual commitments for the acquisition of property, plant and equipment entered into by the parent entity at 30 June 2025 (2024: US\$Nil).

Contingent liabilities

Refer to note 21 Contingent liabilities.

Capital commitments

The parent entity has no capital commitments.

Impairment assessment

At 30 June 2025, Cokal Limited, the parent entity, performed an impairment assessment of its investments in subsidiaries and non-current receivables from subsidiaries. As a result of this assessment, the carrying amount of these assets was impaired by US\$Nil (2024: US\$Nil).

Accounting Policy: Parent entity financial information

The financial information for the parent entity, Cokal Limited, included in this note 19 has been prepared on the same basis as the consolidated financial statements, except investments in subsidiaries and joint venture operations are accounted for at cost, less provision for impairment.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 20: Commitments

Rexline Coal Handling System

Rexline Engineering is constructing a Coal Handling System at Batu Tuhup. The total cost of the project is US\$4.97 million, of which US\$2.24 million had been completed by 30 June 2025. The remaining balance will be completed within the following year.

Note 21: Contingent Liabilities

The Group has a number of contingent liabilities in respect of deferred purchase consideration for the acquisition of its mining and exploration tenements.

BBP Vendor Payment

At 30 June 2025, the Group's contingent liabilities include US\$7.95m (30 June 2024: US\$7.95m) in respect of its PT Borneo Bara Prima (BBP) tenement. The amount is payable on the achievement of certain milestones, including but not limited to the establishment of certain JORC Inferred Coal Resources and the issuance of production operation IUPs (licences) and production forestry permits.

BBM Vendor Payment

As part of the Group's acquisition of its interest in the BBM project, it was agreed an amount of US\$10.0 million would be payable within 30 days of the issue of the Production/ Operations IUP (mining license granted under the Indonesian New Mining Law). The Company subsequently entered into an agreement with the vendor of BBM for these vendor payments due on commencement of production. It has now been agreed that an amount of US\$10.5 million will be paid via:

1. US\$200,000 within 30 days of signing the agreement;
2. During the first and second year of coal sales to a third party, monthly at a rate of US\$2 per tonne of coal sold;
3. From the third year of coal sales to a third party, monthly at a rate of US\$3 per tonne of coal sold.

Payments under items 2 and 3 are to total US\$10.3 million.

Alpine Invest Holdings Ltd Commitment

During May 2020 the Company consented to the assignment of loans payable to a third party (**Loans**) to Alpine Invest Holdings Ltd (**Alpine**). It was agreed as a term of the consent to the assignment that immediately upon transfer of the Loans to Alpine, that the Loans are deemed released and Alpine discharges and releases Cokal and each Cokal Group Company from their liability to make payment of the Loans totalling \$9,261,535 (as recognised as a liability, refer note 14) on the following terms:

- the royalty payable to Alpine under the Royalty Deed will be the greater of:
 1. USD 10,000 per month; and
 2. USD 2.00 per tonne of coal sold by BBM and TBAR on a monthly basis;
- the maximum royalty payment of USD 40million payable under the Royalty Deed remains the same and will be payable through the first 20 million tonnes of coal produced and sold by both BBM and TBAR; and
- all other conditions stated in the Royalty Deed shall remain the same.

International Commodity Trade (ICT) \$20million Facility

Cokal Limited has provided a corporate guarantee for payment of the International Commodity Trade (ICT) Facility (refer note 16).

The Corporate Guarantee Agreement does not require registered charges over the assets of Cokal, however Cokal guarantees ICT punctual performance by BBM of all obligations under the Capital Participation Agreement and provides that should BBM not pay any amount as required under the Corporate Guarantee, including but not limited to the Guarantee Amount (being the amounts owing under the Capital Participation Agreement), the Guarantor (Cokal) will immediately on demand pay that amount not paid.

The Corporate Guarantee provided by Cokal may require the sale of the assets of BBM and/or Cokal to meet all obligations under the Capital Participation Agreement. This is an unsecured corporate guarantee which could force the sale of the BBM Project, or any other asset of the group including TBAR, BBP and/or AAK Projects to meet payment obligations.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 21: Contingent Liabilities (cont'd)

International Commodity Trade (ICT) \$15million Facility

Cokal Limited, subject to obtaining shareholder approval and any other required approvals under the ASX Listing Rules and Corporations Act, has agreed to provide a corporate guarantee in relation to the International Commodity Trade (ICT) Facility totalling US\$15.0 million (refer note 16).

Under the proposed guarantee, Cokal will guarantee CHPL's punctual performance of all obligations under the facility agreements. Should CHPL fail to pay any amounts due, including principal, interest, or fees under the ICT Facility, Cokal will be required to meet such obligations on demand.

The corporate guarantee provided by Cokal may require the sale of Cokal's assets, including its shares in CHPL or other group assets and projects, to satisfy obligations under the ICT Facility. This guarantee represents an unsecured corporate obligation that could result in the disposal of key projects of the group if CHPL defaults on its obligations.

International Coal Marketing Agreement

A fee of 6% of the coal sale value is payable to ICT by BBM in consideration for the marketing activities and financing assistance under the International Coal Marketing Agreement.

*Inter segment expense relating to the income is eliminated in Indonesia's exploration and evaluation assets.

Accounting Policy: Determination and presentation of operating segments

AASB 8 *Operating segments* requires a management approach under which segment information is presented on the same basis as that used for internal reporting purposes. Operating segments are reported in a manner that is consistent with the internal reporting to the chief operating decision maker (CODM), which has been identified as the Board of Directors.

Operating segments that meet the qualification criteria as prescribed by AASB 8 are reported separately. However, an operating segment that does not meet the qualification criteria is still reported separately when information about the segment would be useful to users of the financial statements.

Note 24: Share-based Payments

No share-based payment arrangements existed at 30 June 2025. (30 June 2024: Nil)

Share-based payments to directors, executives, employees and suppliers

During the year ended 30 June 2025, no shares or options were issued to directors, executives, or employees of the Group. At 30 June 2025, there were no unissued ordinary shares under option.

No option holder has any right under the options to participate in any other share issue of Cokal Limited or any other entity.

The range of exercise prices for options outstanding at 30 June 2025 was Nil (30 June 2024: Nil), and the weighted average remaining contractual life was Nil (30 June 2024: Nil).

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 24: Share-based Payments (Cont'd)

Accounting Policy: Share-based payment

The Group provides benefits to employees (including directors) and suppliers (including financiers and consultants) in the form of share-based payment transactions, whereby employees or suppliers render/provide services in exchange for shares or options over shares (equity-settled transactions).

The fair value of options granted to employees is recognised as an employee benefit expense with a corresponding increase in equity (share-based payment option reserve). The fair value of options granted to financiers is recognised as finance cost with a corresponding increase in equity (share-based payment option reserve). Fair value of shares issued to employees and consultants are recognised as employee benefits and consultancy expenses respectively with a corresponding increase in share capital. The fair value is measured at grant date and recognised over the period during which the employees/suppliers become unconditionally entitled to the options. Fair value is determined by an independent valuer using a Black-Scholes option pricing model. In determining fair value, no account is taken of any performance conditions other than those related to the share price of Cokal Limited (market conditions).

The cumulative expense recognised between grant date and vesting date is adjusted to reflect the directors' best estimate of the number of options that will ultimately vest because of internal conditions of the options, such as the employees having to remain with the Group until vesting date, or such that employees are required to meet internal performance targets. There are no conditions associated with the options issued to the financiers. No expense is recognised for options that do not ultimately vest because internal conditions were not met. An expense is still recognised for options that do not ultimately vest because a market condition was not met.

At each subsequent reporting date until vesting the cumulative charge to the statement of comprehensive income is the product of:

The grant date fair value of the award;

The current best estimate of the number of awards that will vest, taking into account such factors as the likelihood of employees turnover during the vesting period and the likelihood of non-market performance conditions being met; and

The expired portion of the vesting period.

The charge to the statement of comprehensive income for the period is the cumulative amount as calculated above less the amounts already charged in previous periods. There is a corresponding entry to equity.

Where the terms of options are modified, the expense continues to be recognised from grant date to vesting date as if the terms had never been changed. In addition, at the date of the modification, a further expense is recognised for any increase in fair value of the transaction as a result of the change.

Where options are cancelled, they are treated as if vesting occurred on cancellation and any unrecognised expenses are taken immediately to profit or loss. However, if new options are substituted for the cancelled options and designated as a replacement on grant date, the combined impact of the cancellation and replacement options are treated as if they were a modification.

The dilution effect, if any, of outstanding options is reflected as additional share dilutions in the computation of diluted earnings per share.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 25: Related Party Disclosure

Transactions between related parties are on normal commercial terms and conditions no more favourable than those available to other parties unless otherwise stated.

(a) Parent entity

The parent entity and ultimate controlling entity is Cokal Limited, which is incorporated in Australia.

(b) Subsidiaries

Interests and transactions in subsidiaries are disclosed in Note 8.

(c) Key management personnel (KMP) compensation

The KMP compensation for the year ended is set out below:

	2025 US\$	2024 US\$
Short-term employee benefits	224,834	224,332
Post-employment benefits	1,111	955
	225,945	225,287

Transactions with KMP and their related entities

Mr Domenic Martino

- As at 30 June 2025 director fees totalling US\$4,323 (2024: US\$46,200) remain outstanding to Mr Martino.
- Indian Ocean Corporate Pty Ltd, a company of which Mr Martino is a director, provides company secretarial services at a cost of AU\$6,600 (incl GST) per month. The services are based on normal commercial terms and conditions. During the 2025 financial year, Indian Ocean Capital Pty Ltd (associated company to Indian Ocean Corporate Pty Ltd) has provided company secretarial services totalling US\$51,876 (2024: US\$51,876), assistance with the preparation of reports totalling US\$18,013 (2024: US\$Nil) and a management consulting service totalling US\$Nil (2024: US\$ 43,230). Indian Ocean Consulting Group Pty Ltd has provided company taxation services totalling US\$Nil (2024: US\$12,160). As at 30 June 2025, company secretarial fees of US\$24,045 (2024: US\$17,354), management consulting services of US\$Nil (2024: US\$17,357) remain outstanding.

Mr Karan Bangur

- As at 30 June 2025 director fees totalling US\$178,200 (2024: US\$75,980) remain outstanding to Mr Bangur.

Mr David Delbridge

- As at 30 June 2025 director fees totalling US\$1,980 (2024: US\$1,965) remain outstanding to Mr Delbridge.

Notes to the Consolidated Financial Statements for the year ended 30 June 2025

Note 26: Financial Risk Management

(a) General objectives, policies and processes

In common with all other businesses, the Group is exposed to risks that arise from its use of financial instruments. This note describes the Group objectives, policies and processes for managing those risks and the methods used to measure them. Further quantitative information in respect of these risks is presented throughout these financial statements.

There have been no substantive changes in the Group's exposure to financial instrument risks, its objectives, policies and processes for managing those risks or the methods used to measure them from previous periods unless otherwise stated in this note. The Group's financial instruments consist mainly of deposits with banks, accounts receivable, security deposits, interest bearing loans and accounts payable.

The Board has overall responsibility for the determination of the Group's financial risk management objectives and policies and, whilst retaining ultimate responsibility for them, it has delegated the authority for designing and operating processes that ensure the effective implementation of the objectives and policies to the Group's finance function. The Group's financial risk management policies and objectives are therefore designed to minimise the potential impacts of these risks on the results of the Group where such impacts may be material.

The overall objective of the Board is to set policies that seek to reduce financial risk as far as possible without unduly affecting the Group's competitiveness and flexibility. Further details regarding these policies are set out below.

(b) Credit risk

Credit risk is the risk that the other party to a financial instrument will fail to discharge their obligation resulting in the Group incurring a financial loss. This usually occurs when debtors fail to settle their obligations owing to the Group. The Group's objective is to minimise the risk of loss from credit risk exposure.

The Group's maximum exposure to credit risk at the end of the reporting period, without taking into account the value of any collateral or other security, in the event other parties fail to perform their obligations under financial instruments in relation to each class of recognised financial asset at reporting date, is as follows:

	Note	2025 US\$	2024 US\$
Cash and bank balances	7	630,926	481,813
Receivables	13	10,117	38,918
Security deposits	7	1,068,517	1,036,712
Total		1,709,560	1,557,443

The Group does not have any material credit risk exposure to any single debtor or Group of debtors under financial instruments entered into by the Group. No receivables balances were past due or impaired at period end. The credit quality of receivables that are neither past due nor impaired is good.

Notes to the Consolidated Financial Statements for the year ended 30 June 2024

Note 26: Financial Risk Management (cont'd)

(b) Liquidity Risk

Liquidity risk is the risk that the Group may encounter difficulties raising funds to meet financial obligations as they fall due. The objective of managing liquidity risk is to ensure, as far as possible, that the Group will always have sufficient liquidity to meet its liabilities when they fall due, under both normal and stressed conditions

Liquidity risk is reviewed regularly by the Board and the Audit Committee. Regular financial updates are received by the Board, including financial forecasts of expenditure. The Board maintains a standing item in its Board meetings relating to the Group's funding with discussion and updates of various options and progression of funding provided regularly.

(c) Market Risk

Market risk arises from the use of interest bearing, tradable and foreign currency financial instruments. It is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in interest rates (interest rate risk), foreign exchange rates (currency risk) or other market factors (other price risk). The entity does not have any material exposure to market risk other than as set out below.

(i) Interest rate risk

Interest rate risk arises principally from cash and cash equivalents. The objective of interest rate risk management is to manage and control interest rate risk exposures within acceptable parameters while optimising the return.

Interest rate risk is managed with fixed rate debt. For further details on interest rate risk refer to the tables below:

Notes to the Consolidated Financial Statements for the year ended 30 June 2024

Note 26: Financial Risk Management (cont'd)

(i) Interest rate risk (cont'd)

2025	Interest bearing - floating interest rate	Interest bearing - fixed interest rate	Non-interest bearing	Total carrying amount	Weighted average effective interest rate
	US\$	US\$	US\$	US\$	%

Borrowings	-	29,268,258	2,000,000	31,268,258	-
Total financial liabilities	-	29,401,093	34,190,643	63,591,736	-

2024	Interest bearing - floating interest rate	Interest bearing - fixed interest rate	Non-interest bearing	Total carrying amount	Weighted average effective interest rate
	US\$	US\$	US\$	US\$	%
<i>Financial assets</i>					
Cash and bank balances	481,813	-	-	481,813	-
Receivables	-	-	38,918	38,918	-
Security deposits	-	-	1,036,712	1,036,712	-
Total financial assets	481,813	-	1,075,630	1,557,443	-
<i>Financial liabilities</i>					
Accounts payable	-	-	27,380,209	27,380,209	-
Leases	-	255,085	-	255,085	-
Borrowings	-	23,247,992	2,000,000	25,247,992	-
Total financial liabilities	-	23,503,077	29,380,209	52,883,286	-

The Group has performed a sensitivity analysis relating to its exposure to interest rate risk. This sensitivity demonstrates the effect on the current period results and equity which could result from a change in these risks.

The effect on post tax profit and equity as a result of changes in the interest rate for floating interest rate instruments, with all other variables held constant, would be as follows:

	Carrying Amount (interest bearing) US\$	Increase in interest rate by 0.5% US\$	Decrease in interest rate by 0.5% US\$
2025			
Cash and cash equivalents	630,926	3,155	(3,155)
Total effect on post tax profit	-	3,155	(3,155)
2024			
Cash and cash equivalents	481,813	2,409	(2,409)
Total effect on post tax profit	-	2,409	(2,409)

(ii) Currency risk

Exposure to foreign exchange risk may result in the fair value or future cash flows of a financial instrument fluctuating due to movements in foreign exchange rates of currencies in which the Group hold financial instruments which are other than the US\$ functional currency of the Group.

Notes to the Consolidated Financial Statements for the year ended 30 June 2024

Note 26: Financial Risk Management (cont'd)

(ii) Currency risk (cont'd)

The Group is exposed to currency risk on its cash and cash equivalents held (in AUD and Indonesian Rupiah) in Indonesia and Australia as well as on purchases made from suppliers in Indonesia and Australia.

The Group's exposure to foreign currency risk and the effect on post tax profit as a result of changes in foreign currency rates, with all other variables held constant, are as follows:

	AUD	SGD	Indonesian Rupiah	USD	Total
	US\$	US\$	US\$	US\$	US\$
2025

Decrease by 10%	(301,611)	2,633	(15,581,480)	-	(15,880,458)

Accounting Policy: Financial Instruments

Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Recognition and Initial Measurement of financial assets

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. The Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. In order for a financial asset to be classified and measured at amortised cost it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Subsequent Measurement of financial assets

Financial assets at amortised cost (debt instruments) is the most relevant to the Group. The Group measures financial assets at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding

Notes to the Consolidated Financial Statements for the year ended 30 June 2024

Note 26: Financial Risk Management (cont'd)

Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

Impairment of financial assets

The Group recognises an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group's consolidated statement of financial position) when the rights to receive cash flows from the asset have expired or the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Financial liabilities

A financial liability is a contractual obligation to deliver cash or another financial asset or to exchange financial assets or financial liabilities under unfavourable conditions.

Recognition and Initial Measurement of financial liabilities

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings or as payables. All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs. The Group's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, and derivative financial instruments.

Subsequent Measurement of financial liabilities

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit or loss.

Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Notes to the Consolidated Financial Statements for the year ended 30 June 2024

Note 27: Significant Events after the Reporting Date

No matters or circumstances have arisen since the end of the year which significantly affected or could significantly affect the operations of the Group, the results of those operations, or the state of affairs of the Group in future financial years, except the following:

On 23 September 2025, Cokal Limited announced that it had advanced its strategic partnership with PT Petrindo Jaya Kreasi Tbk (PT Petrindo) through the execution of a binding term sheet for the further development of the BBM Haul Road. Under the agreement, PT Petrindo will fund the upgrade of the road to increase its capacity and convert it into an all-weather road. The investment will be structured as a prepayment of future toll fees, with recovery based on coal transport volumes. Cokal will retain full ownership and licensing rights to the haul road. Both parties have also jointly agreed to appoint PT Petrosea Tbk as the lead contractor for the development works, with on-ground activities expected to commence in October 2025. (refer to the ASX announcement 23 September 2025)

Consolidated Entity Disclosure Statement

Set out below is relevant information relating to entities that are consolidated in the consolidated financial statements at the end of the financial year as required by the *Corporations Act 2001* (s.295 (3A) (a)).

Key assumptions and judgements

Determination of Tax Residency

Section 295(3A) of the *Corporations Acts 2001* required that the tax residency of each entity which is included in the Consolidated Entity Disclosure Statement (CEDS) be disclosed. In the context of an entity which was an Australian resident, “Australian resident” has the meaning provided in the *Income Tax Assessment Act 1997*. The determination of tax residency involves judgement as the determination of tax residency is highly fact dependent and there are currently several different interpretations that could be adopted, and which could give rise to a different conclusion on residency.

In determining tax residency, the consolidated entity has applied the following interpretations:

- **Australian tax residency**
The consolidated entity has applied current legislation and judicial precedent, including having regard to the Commissioner of Taxation’s public guidance in *Tax Ruling TR 2018/5*.
- **Foreign tax residency**
The consolidated entity has applied current legislation and where available judicial precedent in the determination of foreign tax residency. Where necessary, the consolidated entity has used independent tax advisers in foreign jurisdictions to assist in its determination of tax residency to ensure applicable foreign tax legislation has been complied with.

Declaration by Directors

The directors of the Group declare that:

1. The financial statements, comprising the statement of comprehensive income, statement of financial position, statement of cash flows, statement of changes in equity, and accompanying notes, are in accordance with the Corporations Act 2001 and:
 - (a) comply with Australian Accounting Standards and the Corporations Regulations 2001;
 - (b) give a true and fair view of the Group's financial position as at 30 June 2025 and of its performance for the year ended on that date; and
 - (c) the information disclosed in the attached consolidated entity disclosure statement is true and correct.
2. The Group has included in note 1 to the financial statements explicit and unreserved statement of compliance with International Financial Reporting Standards.
3. In the directors' opinion, there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.
4. The remuneration disclosures included in pages 32 to 36 of the directors' report (as part of audited Remuneration Report) for the year ended 30 June 2025, comply with section 300A of the *Corporations Act 2001*.
5. The directors have been given the declarations by the chief executive officer and chief financial officer required by section 295A of the Corporations Act 2001.

This declaration is signed in accordance with a resolution of the directors.

Cokal Limited

Domenic Martino
Chairman

Sydney
30 September
2025

**COKAL LIMITED
ABN 55 082 541 437
AND CONTROLLED ENTITIES**

**INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF
COKAL LIMITED**

Opinion

We have audited the financial report of Cokal Limited (the company) and its controlled entities (the group), which comprises the consolidated statement of financial position as at 30 June 2025, consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, notes to the financial statements, including a summary of material accounting policy information, consolidated entity disclosure statement and the directors' declaration.

In our opinion the accompanying financial report of the Cokal Limited and its controlled entities is in accordance with the *Corporations Act 2001*, including:

- (a) giving a true and fair view of the group's financial position as at 30 June 2025 and of its financial performance for the year then ended; and
- (b) complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

Basis of Opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those Standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110: *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of the company, would be in the same terms if given to the directors as at the time of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

We draw attention to Note 1(c) in the financial report, which indicates that the group incurred a net loss of \$7,276,442 for the year ended 30 June 2025, and as of that date, the group's current liabilities exceeded its current assets by \$30,101,682. As stated in Note 1(c), these events or conditions, along with other matters as set forth in Note 1(c), indicate that a material uncertainty exists that may cast significant doubt on the group's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report for the year ended 30 June 2025. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, we do not provide a separate opinion on these matters.

Key Audit Matter	How Our Audit Addressed the Key Audit Matter
Carrying value of non-current assets	
<i>Refer to Note 12 Mines under Development, Note 10 Property, Plant and Equipment and Note 1(f) Critical accounting estimates and judgements.</i>	
As at 30 June 2025, the group's assets included mines under development of \$23,715,808 and property, plant and equipment amounting to \$18,756,318. The group's accounting policy in respect of mines under development is outlined in Note 12 and the group's accounting policy in respect of property, plant and equipment is outlined in Note 10. This is a key audit matter because the carrying value of the non-current assets are material to the financial statements and significant judgement is applied in determining whether an indicator of impairment exists in accordance with AASB 136 "Impairment of Assets".	Our procedures included, amongst others: • We reviewed management's assessment as to whether there existed any impairment indicators at balance date. • In assessing whether an indicator of impairment exists in relation to the group's mines under development and property, plant and equipment in accordance with AASB 136, we – examined the board meeting minutes and ASX announcements together with other internal and external information gathered to determine directors' expectation of whether the carrying value of mines under development and property, plant and equipment is likely to be recovered in full through successful development; – challenged group's assertions as to presence of impairment indicators. This included assessing the status of the BBM project, and comparing forecast coal prices to published market prices and views of market commentators on future trends. • We assessed the recoverability of carrying value of mines under development and related property, plant and equipment assets against the discounted cash flow calculations based on major assumptions including forecast production, production costs and other cash flows related to the mine. • We performed a critical review of management's assumptions applied in the value in use model and involved our internal valuation specialist to assess the appropriateness of key inputs. • We assessed the adequacy of the related disclosures within the financial statements.

Key Audit Matter	How Our Audit Addressed the Key Audit Matter
Exploration and evaluation assets	
<i>Refer to Note 11 Exploration and evaluation assets and Note 1(f) Critical accounting estimates and judgements.</i>	
As at 30 June 2025, the group's assets included exploration and evaluation assets amounting to \$1,606,585. The group's accounting policy in respect of exploration and evaluation assets is outlined in Note 11. This is a key audit matter because the carrying value of exploration and evaluation assets are material to the financial statements and significant judgement is applied in determining whether an indicator of impairment exists in relation to the carrying value of exploration and evaluation assets in accordance with AASB 6 "Exploration for and Evaluation of Mineral Resources".	Our procedures included, amongst others: • We confirmed the existence and tenure of exploration assets in which the group has a contracted interest by obtaining confirmation of title from relevant authorities. • In assessing whether an indicator of impairment exists in relation to the group's exploration and evaluation assets in accordance with AASB 6, we – examined the board meeting minutes and ASX announcements; – discussed with management the group's ability and intention to undertake further exploration activities. – evaluated the group's assessment that there were no indicators of asset impairment at 30 June 2025. • We assessed the adequacy of the related disclosures within the financial statements.

Information Other than the Financial Report and Auditor's Report Thereon

The directors are responsible for the other information. The other information comprises the information included in the group's annual report for the year ended 30 June 2025, but does not include the financial report and our auditor's report thereon. Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon. In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Report

The directors of the group are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the Corporations Act 2001 and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibility for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

As part of an audit in accordance with Australian Auditing Standards, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the director's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial report or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial report, including the disclosures, and whether the financial report represents the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the group to express an opinion on the financial report. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, amongst other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the financial report of the current period and are therefore key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.
