

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
Form 20-F

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended: December 31, 2025
Commission file number: 001-38256

NEXA RESOURCES S.A.
(Exact name of Registrant as specified in its charter)

Grand Duchy of Luxembourg
(Jurisdiction of incorporation or organization)

José Carlos del Valle
Senior Vice President of Finance and Group Chief Financial Officer
Phone: +352 28 26 37 27
37A, Avenue J.F. Kennedy
L-1855, Luxembourg
Grand Duchy of Luxembourg
(Address of principal registered office)

Securities registered or to be registered pursuant to Section 12(b) of the Act:

Title of Each Class	Trading Symbol	Name of Each Exchange on Which Registered
Common shares, each with par value of US\$1.00	NEXA	New York Stock Exchange

Securities registered or to be registered pursuant to Section 12(g) of the Act: None
Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act: None
The number of outstanding shares of each class of stock of Nexa Resources S.A. as of December 31, 2025, was:
132,438,611 common shares, each with par value of US\$1.00

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes ☐ No ☒

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.
Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.
Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (\$232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files).
Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or an emerging growth company. See definition of “accelerated filer,” “large accelerated filer” and “emerging growth company” in Rule 12-b2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☒ Non-accelerated filer ☐ Emerging growth company ☐

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards† provided pursuant to Section 13(a) of the Exchange Act. ☐

The term “new or revised financial accounting standard” refers to any update issued by the Financial Accounting Standards Board to its Accounting Standards Codification after April 5, 2012.

Indicate by check mark whether the registrant has filed a report on and attestation to its management’s assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant’s executive officers during the relevant recovery period pursuant to § 240.10D-1(b). ☐

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP ☐ International Financial Reporting Standards as issued by the International Accounting Standards Board ☒ Other ☐

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow.
Item 17 o Item 18 o

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes o No p

FORWARD-LOOKING STATEMENTS

This annual report includes statements that constitute estimates and forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, or Securities Act, and Section 21E of the Securities Exchange Act, as amended, or Exchange Act. The words “believe,” “will,” “may,” “may have,” “would,” “estimate,” “continues,” “anticipates,” “intends,” “plans,” “expects,” “budget,” “scheduled,” “forecasts” and similar words are intended to identify estimates and forward-looking statements. Estimates and forward-looking statements refer only to the date when they were made, and we do not undertake any obligation to update or revise any estimate or forward-looking statement due to new information, future events or otherwise, except as required by law. Estimates and forward-looking statements involve risks and uncertainties and do not guarantee future performance, as actual results or developments may be substantially different from the expectations described in the forward-looking statements.

These statements appear in a number of places in this report and include statements regarding our intent, belief or current expectations, and those of our officers and employees, with respect to, among other things: (i) our future financial or operating performance; (ii) our growth strategy; (iii) future trends that may affect our business and results of operations; (iv) the impact of competition and applicable laws and regulations on our results; (v) planned capital investments; (vi) future of zinc and/or other metal prices; (vii) estimation of mineral reserves and mineral resources; (viii) mine life; and (ix) our financial liquidity.

Forward-looking statements are not guarantees of future performance and involve risks and uncertainties. Actual results and developments may be substantially different from the expectations described in the forward-looking statements for several reasons, many of which are not under our control. Among them, the activities of our competition, the future global economic situation, current and future geopolitical scenarios, in the countries in which we operate, and associated decisions, weather conditions, market prices and conditions, exchange rates, and operational and financial risks. The unexpected occurrence of one or more of the above-mentioned events may significantly change the results of our operations on which we have based our estimates and forward-looking statements. Our estimates and forward-looking statements may be influenced by the following factors, including, among others:

- the cyclical and volatile prices of commodities;
- the changes in the expected level of supply and demand for commodities;
- foreign exchange rates, fluctuations, inflation and interest rate volatility;
- the risks and uncertainties related to economic and geopolitical conditions in the countries in which we operate;
- changes in global market conditions, impacting demand and pricing stability, including uncertainties related to global trade as a result of the imposition of tariffs in the international trade;
- the impact of expanded regional or global conflicts, and the resulting potential impacts on supply and demand for commodities, logistics of key-inputs and consumables, global security concerns, and market volatility;
- outbreaks of contagious diseases or health crises impacting overall economic activity regionally or globally, and the potential impact thereof on commodity prices and exchange rate variations in the currencies to which we are exposed to, our business and operating sites, and the global economy;
- demands and expectations from stakeholders with respect to our environmental, social and governance (“ESG”) practices, performance and disclosures, including the ability to meet energy requirements while complying with greenhouse gas emissions regulations and other energy transition policy changes and laws in the countries in which we operate;
- the impact of increasing severity of weather events on our operations, workforce and value chain;
- environmental, safety and engineering challenges and risks inherent to mining;

- severe natural disasters, such as storms, prolonged heavy rainfall and floods, severe drought, or earthquakes, disrupting our operations;
- operational risks, such as operator errors, mechanical failures and other accidents;
- the availability of materials, supplies, insurance coverage, equipment, required permits or approvals and financing;
- supply-chain and logistic related interruptions, including impacts to international and domestic freight and transportation networks;
- the implementation of our growth strategy, the availability of capital and the risks associated with related capital expenditures;
- failure to obtain financial assurance to meet closure and remediation obligations;
- the possible material differences between our estimates of Mineral Reserves and Mineral Resources and the mineral quantities we actually recover;
- the possibility that our permits, concessions, environmental studies, modificatory environmental studies and other governmental authorities requests may be terminated, not renewed or not granted by governmental authorities in the countries in which we operate which may result in impairment charges, fines and/or penalties;
- the impact of political, institutional and government changes in the countries in which we operate, and the effects of potential new legislation, including changes in taxation laws, tax rules interpretation, and any related agreements that we have entered or may enter into with local governments;
- legal and regulatory risks, including ongoing or future investigations by local authorities with respect to our business and operations, as well as the conduct of our customers, along with the impact to our financial statements regarding the resolution of any such matters;
- labor disputes or disagreements with local communities or unions in the countries in which we operate;
- loss of reputation due to unanticipated operational failures or significant occupational incidents;
- failure or outage of our digital infrastructure or information and operating technology systems;
- cyber events or attacks (including ransomware, state-sponsored, data breaches and other cyberattacks) due to negligence, IT security failures or the increased use of artificial intelligence ("AI");
- the future impact of competition and changes in domestic and international governmental and regulatory policies that apply to our operations;
- interest rates increases, making the cost of capital and financial expenses higher than expected or even unattainable;
- regulatory changes in the countries where we operate, including new trade restrictions, tariff escalations, and policy shifts affecting cross-border commerce and supply chains, such as recent tariff increases on imports from Canada, Mexico, and China; and
- other factors discussed under "Risk Factors."

Considering the risks and uncertainties described above, the events referred to in the estimates and forward-looking statements included in this report may or may not occur, and our business performance and results of operation may differ materially from those expressed in our estimates and forward-looking statements, due to factors that include but are not limited to those mentioned above.

These forward-looking statements are made as of the date of this annual report, and we assume no obligation to update them or revise them to reflect new events or circumstances. There can be no assurance that the forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements.

ABOUT THE COMPANY

We are a large-scale, low-cost, integrated polymetallic producer, with zinc as our main product. We have over 65 years of experience developing and operating mining and smelting assets in Latin America. We currently own and operate five polymetallic mines – four long-life underground (two in the Central Andes region of Peru and two in Brazil, in the states of Minas Gerais and Mato Grosso), and one open-pit in the Central Andes region of Peru. We also own and operate three zinc smelters – two in the state of Minas Gerais in Brazil (Três Marias and Juiz de Fora), and one in Lima, Peru (Cajamarquilla), which is the largest zinc smelter in the Americas.

We are a public limited liability company (*société anonyme*) incorporated under the laws of Luxembourg on February 26, 2014. Our registered office is located at 37A, Avenue J.F. Kennedy, L-1855, Luxembourg, Grand Duchy of Luxembourg, and we are registered with the Luxembourg Trade and Companies Register under number B185489. Our telephone number at this address is +352 28 26 3727. Our main office outside of Luxembourg is located at Avenida Engenheiro Luís Carlos Berrini, n° 105, 6th floor, São Paulo, State of São Paulo, Brazil. Our website is www.nexaresources.com. None of the information available on our website is incorporated in this annual report and it should not be relied upon in deciding to invest in our common shares.

PRESENTATION OF FINANCIAL AND OTHER INFORMATION

Certain definitions

Unless otherwise indicated or the context otherwise requires, the terms below are defined in the following manner.

- “Nexa,” “we,” “us” and “our” or similar terms refer to Nexa Resources and, unless the context otherwise requires, its consolidated subsidiaries;
- “Nexa Resources” refers to Nexa Resources S.A., a Luxembourg public limited liability company (*société anonyme*);
- “Nexa CJM” refers to our subsidiary Nexa Resources Cajamarquilla S.A. (previously known as Votorantim Metais—Cajamarquilla S.A.), a corporation organized as a *sociedad anónima* under the laws of Peru;
- “Nexa Brazil” refers to our subsidiary Nexa Recursos Minerais S.A. (previously known as Votorantim Metais Zinco S.A.), a corporation organized as a *sociedade anônima* under the laws of Brazil;
- “Nexa Peru” refers to our subsidiary Nexa Resources Peru S.A.A. (previously known as Compañía Minera Milpo S.A.A.), a corporation organized as a *sociedad anónima abierta* under the laws of Peru and publicly traded on the Lima Stock Exchange;
- “Pollarix” refers to our subsidiary Pollarix S.A., a corporation organized as a *sociedade anônima* under the laws of Brazil;
- “VSA” refers to our controlling shareholder Votorantim S.A., a corporation organized as a *sociedade anônima* under the laws of Brazil;
- the “Votorantim Group” refers to our controlling shareholder VSA and, unless the context otherwise requires, its consolidated subsidiaries;
- the “*real*,” “*reais*” or “R\$” refers to the Brazilian *real*, the official currency of Brazil;
- “*sol*,” “*soles*” or “S/.” refers to the Peruvian *sol*, the official currency of Peru; and

In addition, the meaning of other defined terms used in this report are set out in “Glossary.”

Financial information

Our consolidated financial statements as of December 31, 2025, and 2024 and for each of the three years ended December 31, 2025, December 31, 2024, and December 31, 2023, are included in this annual report. Our consolidated financial statements are prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board (“IFRS Accounting Standards”). References in this report to “our consolidated financial statements” are to our consolidated financial statements as of December 31, 2025, and 2024 and for each of the three years ended December 31, 2025, December 31, 2024, and December 31, 2023, and the related notes thereto included elsewhere in this report.

The financial information presented in this report should be read in conjunction with our consolidated financial statements, including the related notes, and the section of this report titled “Operating and Financial Review and Prospects.”

The main consolidated companies included in our consolidated financial statements are:

- **Nexa CJM** – a Peruvian company that is 99.997% directly and indirectly owned by Nexa Resources and is mainly engaged in smelting zinc contained in concentrate. Nexa CJM’s functional currency is the U.S. dollar.

- **Nexa Peru** – a Peruvian company that is 83.55% directly and indirectly owned by Nexa Resources and is mainly engaged in exploring, extracting, producing and trading zinc, copper and lead concentrates, extracted from its own three mining sites. Nexa Peru’s functional currency is the U.S. dollar. Nexa Peru is a public company with its shares listed on the Lima Stock Exchange.
- **Nexa Brazil** – a Brazilian company that is 100.00% owned by Nexa Resources and is mainly engaged in exploring, extracting and producing zinc, copper and lead concentrates, and smelting zinc contained in concentrate with operations in the states of Minas Gerais and Mato Grosso. Nexa Brazil’s functional currency is the *real*.

Non-IFRS Accounting Standards measures

For a discussion of how our management uses non-IFRS Accounting Standards measures as an additional measure of operational performance of our business, including discussion of our Adjusted EBITDA, reconciliation with most comparable IFRS Accounting Standards figures and changes made in 2025, see “Operating and Financial Review and Prospects—Results of Operations—Non-IFRS Accounting Standards measures and reconciliation.”

All forward-looking non-IFRS Accounting Standards financial measures in this document, including cash cost guidance, are provided only on a non-IFRS Accounting Standards basis. This is due to the inherent difficulty of forecasting the timing or number of items that would be included in the most directly comparable forward-looking IFRS Accounting Standards financial measures. As a result, reconciliation of the forward-looking non-IFRS Accounting Standards financial measures to IFRS Accounting Standards financial measures is not available without unreasonable effort and we are unable to assess the probable significance of the unavailable information.

Country, market and industry information

This report contains and refers to information and statistics regarding the countries in which we operate and the markets for the metals we produce and sell. This data is obtained from independent public sources, including publications and materials from participants in the industry, such as Wood Mackenzie and from governmental entities such as the Brazilian Central Bank, Bloomberg Finance L.P., LME, LBMA, Brazilian Ministry of Treasury (*Ministério da Fazenda*), Brazilian Ministry of Mines and Energy (*Ministério de Minas e Energia*, or “MME”), National Mining Agency (*Agência Nacional de Mineração*, or “ANM”), Brazilian Institute of Geography and Statistics (*Instituto Brasileiro de Geografia e Estatística*, or “IBGE”), the Getulio Vargas Foundation (*Fundação Getúlio Vargas*, or “FGV”), the Peruvian Stock Market Superintendency (*Superintendencia del Mercado de Valores*), the Peruvian Central Bank, the Peruvian Ministry of Economy and Finance (*Ministerio de Economía y Finanzas*) and the Peruvian National Institute of Statistics and Informatics (*Instituto Nacional de Estadística e Informática*). Some data is also based on our estimates, which are derived from our review of internal reports, as well as independent sources.

Volume information

All tonnage information in this report is expressed in metric tonnes, unless stated otherwise, and all references to ounces are to troy ounces, in each case, unless otherwise specified.

RISK FACTORS

Nexa and its operations are exposed to several inherent risks and uncertainties, including those described below. The risks described below are not the only ones that we face. Additional risks that we do not presently consider material, considering financial materiality and impact materiality, or of which we are not currently aware, may also affect us. Our business, results of operations, financial condition and cash flows could be materially and adversely affected if any of these risks materialize. You should carefully consider these risks with respect to an investment in us. This section is divided in two sub-sections: the “Risk Factors Summary,” which provides a brief summary of our Risk Factors and “Detailed Risk Factors,” providing detailed information in relation to each Risk Factor identified.

Risk Factors Summary

The following summarizes the main risks to which we are subject. You should carefully consider all the information discussed below in “Item 3—Key Information—Risk Factors—Detailed Risk Factors” in this annual report for a comprehensive description of these and other risks.

Strategic risks

- Our business is highly dependent on the international market prices of the metals we produce, which are both cyclical and volatile.
- Adverse economic developments in China could have a negative impact on our revenues, cash flow and profitability.
- Changes in global trade policy could adversely affect our business.
- Changes in the demand and supply for the metals we produce, including as a result of the cyclicity of global economic activity, could adversely affect our sales volume and revenues.
- The mining industry is highly competitive.
- Our estimates of Mineral Reserves and Resources may be materially different from the total mineral quantities we recover, and changes in metal prices, operating and capital costs, and other assumptions used to calculate these estimates may render certain Mineral Reserves and Resources uneconomical to mine.
- We depend on our ability to replenish our Mineral Reserves for our long-term viability.
- Our mineral exploration efforts are highly speculative in nature and may be unsuccessful.
- Any acquisitions or divestitures we make may not be successful or achieve the expected benefits.
- Failure to meet ESG standards and achieve our environmental and social commitments could adversely affect our business, reputation, and financial condition.
- Political, economic and social conditions in the countries in which we have operations or projects, or in which we do business, could adversely impact our business, financial condition results of operations and the trading price of our securities.
- Political and social opposition to mining activities in the regions we operate could adversely impact our business and reputation.
- Our operations depend on our relations and agreements with local communities, and new projects require conducting a prior consultation procedure.
- VSA has substantial control over us, which could limit our shareholders’ ability to influence the outcome of important corporate decisions.

Operational risks

- We may be materially and adversely affected by challenges relating to slope and stability of underground openings.
- Our projects are subject to operational risks that may result in increased costs or delays that prevent their successful implementation and/or adversely affect their expected financial return.
- There are unique risks inherent to the development of underground mines, which may have a material adverse impact on our current and future cash flows.
- Changes in the assumptions underlying the carrying amount of certain assets could result in significant impairment charges.
- Disruption in supply of zinc concentrate, secondary feed materials, zinc calcine, key-consumables, natural gas, and electric energy could have a material adverse effect on our production levels and financial results.

- The nature of our business includes risks related to litigation and administrative proceedings that could materially and adversely affect our business and financial performance in the event of unfavorable rulings.
- Our business could be adversely affected by the failure of our counterparties to perform their obligations.
- We may be adversely affected by the failure or unavailability of adequate infrastructure and skilled labor.
- We may be adversely affected by labor disputes.
- We could face significant challenges due to failures or interruptions in our information technology systems or automated machinery, including system security breaches resulting from cyber-attacks.
- Our information and operational technology systems may be adversely affected by disruptions, damage, failure, and risks associated with implementation and integration of new technologies.
- The failure of a tailings dam could negatively impact our business, reputation and results of operations, and the implementation of associated regulations and decommissioning processes may be expensive.
- The collapse of dams, dry tailings or other geotechnical structures may cause severe damages, including personal, property, reputational, environmental damages, and loss of life.
- We are exposed to health, safety, and environmental risks in our operations, and we may not be able to prevent accidents from happening.
- Natural disasters and increasing severity of weather-related events could affect our business.
- Interruptions of energy supply or increases in energy costs may materially and adversely affect our operations.

Financial risks

- Our financial position and results of operations may be materially and adversely affected by currency exchange rate fluctuations.
- Fluctuations in interest rates could increase the cost of servicing our debt, affect returns on our financial investments and negatively affect our overall financial performance.
- We may engage in hedging and other derivatives activity that may not be successful and may result in losses or tax liabilities.
- We might not be able to pay the principal and interest on our debt obligations if they are accelerated due to the non-compliance with the restrictive covenants and clauses of our debt contracts.
- A downgrade of our credit ratings could increase our borrowing costs, trigger default or acceleration clauses in certain debt agreements, and limit our access to capital markets.
- Any tax-related investigations conducted by federal, state or local governments may result in a material impact on our business, results of operations and financial condition.
- Our business, financial position and results of operations may be adversely affected by inflation.
- Our business requires substantial capital expenditures and is subject to financing risks.
- We are exposed to credit risk in relation to our contractual and trading counterparties as well as to hedging and derivative counterparty risk, and our results of operations may be negatively impacted by increases in expected credit losses.
- The mining business is subject to inherent risks, some of which are not insurable, and any uninsured or underinsured loss could adversely affect our operating and financial results.
- Dividends or other distributions paid by us on our common shares will be subject to Luxembourg withholding tax.

Compliance risks

- Health, safety and environmental laws and regulations, including regulations pertaining to adverse weather events, may increase our costs of doing business, restrict our operations or result in the imposition of fines or revocation of permits.
- Recent and potential changes in commercial and mining laws, including trends like resource nationalism, may significantly impact our mining operations.
- Changes in tax laws, and any related tax agreements we have entered into or may enter into with local governments, may increase our tax burden and, as a result, could adversely affect our business, financial position, and results of operations.
- Differing interpretations of agency regulations or court rulings and the application of such laws and regulations could result in unintended non-compliance and may have a material effect on our business, results of operations, and financial position.

Detailed Risk Factors

Nexa and its operations are exposed to several inherent risks and uncertainties, including those described below.

Strategic risks

Our business is highly dependent on the international market prices of the metals we produce, which are both cyclical and volatile.

Our business and financial performance is significantly affected by market prices of the metals we produce, particularly the market prices of zinc, copper, silver, lead and, to a lesser extent, gold. Historically, prices of such metals have been subject to wide fluctuations and are affected by numerous factors beyond our control, including international economic and political conditions, the cyclicity of consumption, actual or perceived changes in levels of supply and demand, the availability and costs of substitutes, inventory levels maintained by users, actions of participants in the commodities markets and currency exchange rates. We cannot predict whether, and to what extent, metal prices will rise or fall in the future.

The imposition of tariffs in international trade has introduced additional volatility to global trade and, consequently, to the market prices of our products. We are actively monitoring the impact of these measures and cannot predict their ultimate effect on our business. Additionally, the persistent tensions surrounding international trade may increase the risk of an economic recession, which could lead to decreased demand for commodities and negatively affect commodity prices. The uncertainty surrounding these tariffs poses a significant risk that could adversely impact our financial performance and operations.

The ongoing international political tensions have increased global security concerns, the risk of broader regional or global escalation of such conflicts or any other military or trade disruptions. These have had, and may continue to have, adverse effects worldwide. Additionally, fluctuations in the value of the U.S. dollar, partly driven by global security concerns, directly impact commodity prices. Continued ramifications of these global conflicts include disruption of the supply chain, which has led, and may continue to lead, to impacts on production, investment, and demand and prices for our products; higher and more volatile prices for commodities, including oil and gas; disruption of global financial markets, and further exacerbation of overall macroeconomic trends, including high inflation and rising interest rates. For more information see “Operating and Financial Review and Prospects—Overview.”

Future declines in metal prices, especially with respect to zinc, copper, silver and lead prices, could have an adverse impact on our results of operations and financial position, and we might consider curtailing or modifying certain operations, selling certain operations, or not proceeding with our sustaining and/or growth strategy. In addition, we may not be able to adjust production volume in a timely or cost-efficient manner in response to changes in metal prices. Lower utilization of capacity during periods of weak prices may expose us to higher unit production costs since a significant portion of our cost structure is fixed in the short-term due to the high capital intensity of mining operations. Conversely, during periods of high prices, our ability to rapidly increase production capacity may be limited, which could prevent us from selling more products. Moreover, we may be unable to complete expansions and greenfield projects in time to take advantage of rising prices for zinc, copper, lead, or other products.

Adverse economic developments in China could have a negative impact on our revenues, cash flow and profitability.

China has been the primary driver of global commodity demand for commodities over the last few years. According to Wood Mackenzie, in 2025, Chinese demand accounted for 51.4% of global demand for refined zinc and 57.3% of global demand for refined copper. Any slowdown in China’s economic growth that is not offset by increased demand from other regions or a reduction in commodities supply could adversely affect demand for our products or commodity prices, leading to lower revenues, cash flow and profitability.

Changes in global trade policy could adversely affect our business.

Since January 2025, the U.S. administration has enacted sweeping tariff measures that raised the average applied U.S. tariff rate to elevated levels, materially elevating global trade uncertainty and cost structures. A universal “reciprocal tariff” baseline of 10% on most imports took effect April 5, 2025, alongside higher country-specific rates later implemented on August 7, 2025, with country rates spanning 10-50% that have been adjusted through executive orders, creating frequent changes our supply chains must monitor. Sector-specific tariffs were expanded materially, including steel, aluminum, and copper, receiving 50% tariffs.

U.S. tariffs have increased input costs and created sourcing and pricing volatility across metals, smelting inputs and mining operations. Project capital estimates and lead-times are being revised upward across the industry to reflect tariff pass-through on construction materials and equipment, with some firms evaluating onshoring or alternative investments. The breadth of new U.S. tariffs can dampen global growth, lowering metals demand and prices and delaying investment cycles, with modeled demand reductions for aluminum and copper being material under trade war scenarios.

Tariffs have increased our cost of inputs, logistics and capital projects; impacted availability of equipment and materials; and contributed to demand and pricing volatility for our products. While exemptions have been introduced, we cannot guarantee that our products and key-consumables will be included in them. In addition, recent U.S. Supreme Court decisions addressing the legality or scope of certain tariff authorities have introduced further uncertainty, as the practical effect of such rulings may be limited by ongoing or subsequent proceedings, transitional application, or the potential for tariffs to be reinstated, modified or replaced under alternative statutory authorities. We may be unable to pass these increased costs on to our customers, which could adversely affect our profitability, cash flows, and competitive position. The duration, scope and ultimate impact of current and future trade policies, including Supreme Court and other judicial developments, remain highly uncertain, and the continuation of global trade disputes may continue to have negative effects on the economies and economic prospects of the countries in which we operate, which in turn may continue to negatively affect our business and results of operations.

Changes in the demand and supply for the metals we produce, including as a result of the cyclical nature of global economic activity, could adversely affect our sales volume and revenues.

Our revenues depend on the volume of metals we sell (and, to a lesser extent, the volume of metals produced by others that are smelted in our facilities. Our sales volume, in turn, depends on the level of industrial and consumer demand for these metals. An increase in the global production of zinc, copper, silver and lead along with a decline in demand for these metals, due to technological advances, changes in industrial processes or consumer habits, such as increased demand for substitute materials, economic slow-downs, or tariffs increasing prices could put downward pressure on metal prices. A decrease in prices may compromise the profitability of smelters, potentially leading us to reduce the volume of metals we sell, which could have a material adverse impact on our operational results and financial position. Even if our sales volumes remain stable, lower prices could negatively impact our revenues.

The mining industry has historically been highly volatile largely due to the cyclical nature of industrial production, which affects the demand for minerals and metals. Demand for minerals and metals thus generally correlates to macroeconomic fluctuations in the global economy. Changes in the demand for the metals we produce could adversely affect our sales volume and revenues.

The mining industry is highly competitive.

We face competition from other mining, processing, trading and industrial companies in Brazil, Peru and around the world. Competition principally involves the following factors: sales, supply and labor prices; contractual terms and conditions; attracting and retaining qualified personnel; and securing the services, supplies and technologies we need for our exploratory activities and operations. Slower development in technology and innovation could impact costs, productivity and competitiveness. In addition, mines have limited life and, as a result, we must seek to replace and expand our mineral reserves by acquiring and exploring new properties. Significant competition exists to acquire mining concessions, land and related assets. There is also substantial demand for exploration and drilling equipment from our competitors. We cannot assure shareholders that competition will not adversely affect us in the future.

The international trade environment faces increasing uncertainty. Potential changes to international trade regulations and agreements, as well as other political and economic arrangements (including direct or indirect subsidies), may benefit competitors operating in countries other than where our mining operations are currently located. These changes could also adversely affect the prices we pay for the supplies we need and our export costs when we engage in international transactions. We cannot assure shareholders that we will be able to compete based on price or other factors with companies that in the future may benefit from favorable regulations, lower cost of capital, trading or other arrangements or that we will be able to maintain the cost of the supplies that we require as well as our export costs.

Risks related to our Mineral Reserves and Resources

Our mineral rights may be terminated or not renewed by governmental authorities.

Our business is subject to extensive regulation in Brazil and Peru, including with respect to acquiring and renewing the required authorizations, permits, concessions, and/or licenses from the relevant governmental regulatory bodies. We have obtained, or are in the process of obtaining, all material authorizations, permits, concessions, and licenses required to conduct our mining and mining-related operations.

In Brazil, we may need to renew exploration authorizations related to our Brazilian mining operations 60 days prior to their expiration date if we determine that we continue to have an economic or business interest in the area. If we fail to demonstrate the existence of technical and economically viable mineral deposits in an area covered by an exploration authorization, we may be required to return them to ANM. The ANM may then grant exploration authorizations to other parties that may conduct other mineral prospecting activities at said area. With respect to mining concessions, there is no renewal requirement once we have obtained such concession. However, we must continue to assess the mineral potential of each mining concession to determine if the costs of maintaining the related exploration authorizations and mining concessions are justified by the results of operations to date. If such costs are not justified and we abandon the mine or suspend the mining activities without the formal consent of the regulatory authority for a period of more than 180 days, we may lose the respective mining concessions. Alternatively, we may elect to withdraw or assign some of our exploration authorizations or mining concessions.

In Peru, once mineral concessions are granted, they may not be revoked if the titleholder complies with two obligations, (1) payment of an annual fee and (2) either achievement of the minimum annual production target or expenditure of the equivalent amount in exploration or investments before the statutory deadline. If the production, expenditure or investment targets are not met, a statutory penalty must be paid. Accordingly, mineral concessions will lapse automatically if any of these obligations are not met within the statutory period. Mining concessions in Peru may be terminated if the concessionaire does not comply with its obligations.

These authorizations, permits, concessions and environmental licenses are subject to our compliance with conditions imposed and regulations promulgated by the relevant governmental authorities. While we anticipate that all required authorizations, permits, concessions and environmental licenses or their renewals will be granted as and when sought, there is no assurance that these items will be granted as a matter of course, and there is no assurance that new conditions will not be imposed in connection with such renewals. If we were to violate any of the foregoing laws and regulations or the conditions of our concessions, authorizations, and environmental licenses, including the failure to remove all residents who are within the self-rescue zone, we may be subjected to substantial fines or criminal sanctions, revocations of operating permits or licenses and possible closings of certain of our facilities.

Our estimates of Mineral Reserves and Resources may be materially different from the total mineral quantities we recover, and changes in metal prices, operating and capital costs, and other assumptions used to calculate these estimates may render certain Mineral Reserves and Resources uneconomical to mine.

There is a degree of uncertainty attributable to the estimation of Mineral Reserves and Resources. Until Mineral Reserves and Resources are mined and processed, the quantity of metal and grades must be considered as estimates only and no assurance can be given that the indicated levels of metals will be produced. In making determinations about whether to advance any of our projects to development, we must rely upon estimated calculations for the Mineral Reserves and Mineral Resources and grades of mineralization on our properties.

The estimation of Mineral Reserves and Resources is a subjective process that is partially dependent upon the judgment of the Qualified Persons preparing such estimates. The process relies on the quantity and quality of available data and is based on knowledge, mining experience, statistical analysis of drilling results and industry practices. Valid estimates made at a given time may significantly change when new information becomes available.

Our estimates of Mineral Reserves and Resources are based on geological interpretation and statistical inferences or assumptions drawn from drilling and sampling analysis made as of the date of such estimates. We periodically update our Mineral Reserves and Resources estimates based on the conclusions of the relevant Qualified Persons with respect to new data from exploratory and infill drilling, results from technical studies and the experience acquired during the operation of the mine and metallurgical processing, as well as changes to the assumptions used to calculate these estimates.

Several of the assumptions used to calculate these estimates, including the market prices of commodities and foreign exchange rates, operating and capital costs and mining and metallurgical recovery rates, among others, can greatly fluctuate, which may result in significant changes to our current estimates. These changes may also render some or all our proven and probable Mineral Reserves and Measured and Indicated Mineral Resources uneconomic to exploit and may result in a reduction in Mineral Reserves and Resources.

In addition, Inferred Mineral Resources are subject to significant uncertainty regarding their existence, grade, and economic and legal feasibility. There is no assurance that any part of estimated Inferred Mineral Resources will be upgraded to a higher category or that any Mineral Resources not already classified as Mineral Reserves will be reclassified as Mineral Reserves. Future exploration, technical studies, or economic assessments may not support the conversion of these Mineral Resources estimates to Mineral Reserves, which could materially and adversely impact our results of operations and finances.

We depend on our ability to replenish our Mineral Reserves for our long-term viability.

Mineral Reserves data is only indicative of future results of operations at the time the estimates are prepared and are depleted over time as we conduct our mining operations. We use several strategies to replenish and increase our Mineral Reserves that are depleted, including exploration activities and the acquisition of mining concessions. If we are unable to replenish our Mineral Reserves or to convert and develop our Mineral Resources, our business, results of operations and prospects would be materially and adversely affected.

Our mineral exploration efforts are highly speculative in nature and may be unsuccessful.

Mineral exploration is highly speculative in nature, involves multiple uncertainties and risks and may be unsuccessful. It is performed to demonstrate the dimensions, position and mineral characteristics of mineral deposits, estimate Mineral Reserves and Resources, assess amenability of the deposit to mining and processing scenarios, and estimate potential deposit value.

Substantial expenditures are required to establish proven and probable Mineral Reserves, to determine processes to extract the metals and, if required, to construct mining and processing facilities and obtain permits to continue mining activities. Therefore, once mineralization is discovered, it may take several years from the initial exploration phases and Mineral Resources determination before production is possible, if at all, during which time the project's feasibility may change adversely.

Any acquisitions or divestitures we make may not be successful or achieve the expected benefits.

We regularly consider and evaluate opportunities to acquire assets, companies, and operations, as well as constantly review our project portfolio and operating assets. There can be no assurance that we will be able to successfully integrate any acquired assets, companies, or operations, nor guarantee success in connection with any divestment or sale of an operational or non-operational project or asset. In addition, any additional debt we might incur to finance an acquisition may materially and adversely affect our financial position and results of operations. If future acquisitions are significant, they could change the scale of our business and expose us to new geographic, political, operating, and financial risks. Similarly, any divestitures we make may not have the anticipated positive impacts and could lead to an impairment charge or other material adverse effects on our business, financial position, and results of operations.

Failure to meet ESG standards and achieve our environmental and social commitments could adversely affect our business, reputation, and financial condition.

Public interest and legislative pressure related to ESG practices may vary significantly across the countries and jurisdictions in which we operate. If our ESG practices fail to meet regulatory requirements, our medium- and long-term ESG commitments, or the evolving expectations of investors, customers, employees or other stakeholders, our reputation, brand and ability to attract and retain talent may be negatively impacted, and customers and suppliers may be unwilling to continue doing business with us. Key areas of stakeholder focus include environmental stewardship, support for local communities, human capital management, employee health and safety, product quality, corporate governance, and transparency.

Stakeholders may focus on environmental issues, including climate-related risks, greenhouse gas (“GHG”) emissions, dam safety, and energy and water use. Concerns over the severity of weather-related events may result in new or increased legal and regulatory requirements to reduce or mitigate environmental impacts. If we fail to adapt to or comply with new regulations or disclosure requirements, investors may reconsider their capital investment in us and customers may choose to stop purchasing our products, which could have a material adverse effect on our business and financial condition.

We disclose information about our ESG goals and initiatives in our annual sustainability report and other communications, including voluntary commitments regarding GHG emission reductions, water consumption and safety. However, achieving these goals within our estimated investments, costs and timelines is subject to significant risks and uncertainties, including availability and affordability of necessary technology, unplanned operational issues, inability to obtain required permits, lack of necessary materials, customer acceptance of sustainable supply chain solutions, and shifts in public opinion and political leadership. Our ESG practices and initiatives may also result in increased operational costs, including monitoring, reporting, equipment and energy costs, which could materially impact our financial condition.

Additionally, certain political and regulatory developments reflect growing pushback against ESG initiatives, including measures that restrict or discourage ESG-related investment strategies and corporate initiatives. This may create challenges in balancing stakeholder expectations and could lead to legal, financial or reputational risks if our ESG approach is perceived as misaligned with regulatory or investor sentiment in different markets.

Political, economic, social and regulatory risks

Political, economic and social conditions in the countries in which we have operations or projects, or in which we do business, could adversely impact our business, financial condition results of operations and the trading price of our securities.

Political, economic and social conditions in the countries in which we have operations or projects, or in which we do business, may negatively affect our financial performance. Our business, financial position and results of operations may be affected by the general conditions of the Peruvian, Brazilian and other national political conditions, economies, economic recessions, price instability, exchange rate volatility, inflation, interest rates, and domestic regulatory and taxation policies. There can be no assurance that the countries in which we operate or do business will not face political, economic or social problems in the future or that these problems will not increase the volatility of the price of securities of issuers with operations in those countries, like us, or interfere with our ability to operate and service our indebtedness. For additional information, see “Operating and Financial Review and Prospects—Overview—Key factors affecting our business and results of operations.”

In all these countries, we are exposed to various additional risks over which we have no control, such as social unrest, bribery, cyberattacks, extortion, corruption, robbery, sabotage, kidnapping, civil strife, terrorism, acts of war and guerilla activities. These issues may adversely affect the economic and other conditions under which we operate in ways that could have a material and adverse effect on our business.

The current Brazilian political landscape may result in difficulties for the Brazilian federal government to obtain a majority of votes in the National Congress, which may lead to delays in the approval or the non-approval of certain economic measures, which may adversely affect Brazil’s economic growth and inflationary environment. These instabilities in Brazil may impair our business, financial condition or results of operations or adversely affect the market value of our securities.

Similarly, in recent years, Peru has experienced significant political instability. In 2025, Peru continued to face political uncertainty, including the appointment of a new president and changes in key members of the executive branch, which in turn have increased uncertainty regarding governance and the direction and implementation of economic and public policies. This continued in 2026, with the impeachment of President José Jeri and the election of José María Balcázar as the interim President. Such political conditions have adversely affected, and may continue to adversely affect, investor confidence and the overall economic outlook in the country. Inflationary pressures reduced economic growth and fluctuations in the Sol exchange rate may adversely affect our financial condition and results of operations. Political instability in Peru may also result in changes to, or delays in the enactment or implementation of, legislation and regulations applicable to our business in Peru.

Political and social opposition to mining activities in the regions we operate could adversely impact our business and reputation.

Disputes with communities where we operate may arise from time to time. In some instances, our operations and mineral reserves are located on or near lands owned or used by indigenous people or other groups of stakeholders. Some of our mining and other operations are in territories where title may be subject to disputes or uncertainties, or in areas claimed for agriculture or land reform purposes, which may lead to disagreements with organized social movements, local communities and the government. Further social or political changes, particularly in Peru and Brazil, may lead to a potential increase in these claims. We may be required to consult and negotiate with these groups as part of the process to obtain licenses required to operate, to mitigate impact on our operations or to obtain access to their lands. Disagreements or disputes with local groups, including indigenous groups, organized social movements and local communities could cause delays or interruptions to our operations, adversely affect our reputation or otherwise hamper our ability to develop our reserves and conduct our operations. Protesters have taken actions to disrupt our operations and projects, and they may continue to do so in the future, which may harm our operations and could adversely affect our business. In recent years, Peru has experienced protests against mining projects in several regions. On several occasions, local communities have opposed these operations and accused them of polluting the environment and hurting agricultural and other traditional economic activities. Social demands and conflicts could have a material adverse effect on our business and results of operations and the economy in general of the countries in which we operate.

Our operations depend on our relations and agreements with local communities, and new projects require conducting a prior consultation procedure.

There are several local communities that surround our operations in Brazil and Peru, most of which we have entered into agreements with that provide for the use of their land for our operations. We also interact with regional and local governments and depend on our close relations with local communities and such governments to conduct our operations. From time to time, we may experience disputes with local communities and if our relations with the local communities and such governments were to deteriorate, or the local communities do not comply with the existing agreements or renew them upon expiration, it could have a material adverse effect on our business, reputation, properties, operating results, financial position, or prospects. In addition, a disruption in the relations between the local communities, governments and other parties may affect us indirectly.

In August 2025, we experienced a partial suspension of mining activities at the Atacocha and El Porvenir mines for seven days. A small group of individuals from the San Juan de Milpo community illegally blocked access to the mines as part of protest activities. The temporary and partial disruption resulted in an estimated zinc production loss of approximately 1.2kt of zinc, which was partially recovered in following months.

In January 2026, we also experienced a partial suspension of mining activities at the Atacocha mine for approximately four weeks, when a small group of individuals from the Joraoniyoc community blocked road access to the mine as part of protest activities. The temporary disruption resulted in an estimated zinc production loss of approximately 0.9kt of zinc. These disruptions could delay project development, reduce mining volumes, increase mining or exploration costs, and hinder the transportation of raw materials to our sites or the delivery of concentrates to customers.

We also may face certain risks in relation to artisanal mining near the areas in which we operate. The increase of artisanal mining activity or the failure of these artisanal miners to abide with our existent agreement may have an adverse effect on the development of our operations. For example, see “Mining Operations—Aripuanã—History.”

Furthermore, to develop new projects in the countries in which we operate on land owned by, or in the possession of, third parties, we need to reach an agreement with such third parties to use that land. Any delay or failure to reach such agreements or obtain governmental approvals for our new projects could result in a material and adverse effect on our business, properties, operating results, financial position or prospects.

Risks relating to our corporate structure

It could be difficult for investors to enforce any judgment obtained outside Luxembourg against us or any of our associates.

We are organized under the laws of Luxembourg. Furthermore, certain of our directors and officers reside outside the United States and Canada and most of their assets are located outside the United States and Canada. Most of our assets are located outside the United States or Canada. As a result, it may not be possible for investors to effect service of process upon us or our directors and officers within the United States, Canada, or other jurisdictions outside Luxembourg or to enforce against us or our directors and officers, judgments obtained in the United States, Canada, or other jurisdictions outside Luxembourg. Because judgments of United States or Canadian courts for civil liabilities based upon the U.S. federal securities laws or Canadian securities laws may only be enforced in Luxembourg if certain requirements are met, investors may face greater difficulties in protecting their interest in actions against us or our directors and officers than would investors in a corporation incorporated in a state or other jurisdiction of the United States or Canada.

VSA has substantial control over us, which could limit our shareholders' ability to influence the outcome of important corporate decisions.

As of March 26, 2026, VSA owns 64.68% of our issued and outstanding common shares. As a result, VSA can influence or control matters requiring approval by our shareholders, including the election of directors, the allocation of profits, the appointment of external auditors and the approval of mergers, acquisitions, or other extraordinary transactions. VSA may also have interests that differ from those of our other investors and may vote in a way that conflicts with or is adverse to the interests of our other investors. Additionally, VSA's control over us may result in a lack of trading liquidity.

In addition, we have entered into several shared services contracts and similar agreements with other entities within the Votorantim Group in order to achieve operational economies of scale. Since we rely on the Votorantim Group for the negotiation, renewal and extension of these agreements, there can be no assurances that we will always have access to the services procured pursuant to these agreements at the same prices and conditions. See "Share Ownership and Trading—Related Party Transactions."

The rights of our shareholders, and the responsibilities of VSA as our controlling shareholder, are governed by Luxembourg law and are subject to certain Brazilian law provisions and differ in some respects from the rights and responsibilities of shareholders under the laws of other jurisdictions, including the United States and Canada, and shareholders may have more difficulty protecting their interests than they would as shareholders of a U.S. corporation.

Our corporate affairs are governed by our articles of association and by the laws governing limited liability companies organized under the laws of Luxembourg, as well as such other applicable local law, rules and regulations, and certain provisions of Brazilian corporate law. The rights of our shareholders and the responsibilities of VSA as our controlling shareholder and of our directors and officers under Luxembourg law are different from those applicable to a corporation incorporated in the United States or Canada. There may be less publicly available information about us than is regularly published by or about U.S. or Canadian issuers. Also, Luxembourg regulations governing the securities of Luxembourg companies may not be as extensive as those in effect in the United States or Canada, and Luxembourg law and regulations in respect of corporate governance matters may not be as protective of non-controlling shareholders as corporation laws in the United States or Canada. Therefore, shareholders may have more difficulty protecting their interests in connection with actions taken by us, our directors and officers or our principal shareholders than they would as shareholders of a corporation incorporated in the United States or Canada.

Our ability to pay dividends or other distributions and repurchase shares is subject to several factors and conditions.

The determination to pay dividends and the payment of dividends or other distributions (including reimbursements of share premium) will be subject to the approval of our Board of directors and/or our shareholders, as applicable, and will depend on a number of factors, including, but not limited to, our cash balance, cash flow, earnings, capital investment plans, expected future cash flows from operations, our strategic plans and cash dividend distributions from our subsidiaries, as well as restrictions imposed by applicable law and contractual restrictions (although as of the date of this annual report there are no contractual restrictions on our ability to pay dividends or other distributions to our shareholders), LME and LBMA metal prices and other factors our Board of directors may deem relevant at the time. Luxembourg law also imposes certain requirements regarding distributions. For additional information, see “Share Ownership and Trading—Distributions.”

We are a holding company and have no material assets other than our ownership of shares in our subsidiaries. When we pay a dividend or other distribution on our common shares, we generally cause our operating subsidiaries, including subsidiaries that are not wholly owned by us, to make distributions to the parent company in an amount sufficient to fund any such dividends or distributions to our shareholders. Although as of December 31, 2025, there were no material contractual restrictions on our subsidiaries’ ability to make distributions, their ability to do so is subject to, among other things, their capacity to generate sufficient earnings and cash flow and may also be affected by statutory accounting and tax rules in Brazil and Peru.

The determination to repurchase shares of our common stock is discretionary. Our ability to repurchase shares will depend on a number of factors, including, but not limited to, metal prices, restrictions imposed by applicable law, contractual restrictions, and other factors our Board of directors may deem relevant at the time. Our decision to repurchase shares could have a negative effect on our free cash flow and/or the liquidity of our common stock.

Operational risks

We may be materially and adversely affected by challenges relating to slope and stability of underground openings.

Our underground mines get deeper, and our waste and tailings storage facilities increase in size as we continue with and expand our mining activities. This presents certain geotechnical challenges, including the possibility of failure of underground openings. If we are required to further reinforce such openings or take additional actions to prevent such a failure, we could incur additional costs and expenses, and our operations and stated mineral reserves could be negatively affected. We have taken actions we consider appropriate to maintain the stability of underground openings, but additional actions may be required in the future. Unexpected failures or additional requirements to prevent such failures may materially and adversely affect our costs and expose us to health, safety and other liabilities in the event of an accident, as well as adversely impacting our reputation. These developments may in turn materially and adversely affect the results of our operations and financial position, as well as potentially diminish our stated mineral reserves.

Our projects are subject to operational risks that may result in increased costs or delays that prevent their successful implementation and/or adversely affect their expected financial return.

We invest in sustaining and increasing our mine and metal production capacity and developing new operations. Our projects are subject to several risks that may materially and adversely affect our growth prospects and profitability, including the following:

- we may encounter delays or higher than expected costs in completing technical, engineering studies and obtaining the necessary equipment, machinery, materials, supplies, labor or services, in project execution by third-party contractors and in implementing new technologies to develop and operate a project;
- we may experience delays in commencing and/or ramping up the operations of a new project or the expansion of an existing operation to its design capacity;
- our efforts to develop projects according to schedule may be hampered by a lack of infrastructure, including a reliable power supply;

- we may fail to obtain or renew, or experience delays or higher than expected costs in obtaining or renewing, the required agreements, authorizations, licenses, approvals and permits to develop a project, including the prior consultation procedure and agreements with local communities;
- changes in market conditions or regulations may make a project less profitable than expected at the time we initiated work on it;
- accidents, natural disasters, labor disputes, equipment failures, water shortages, logistical issues, interruption of energy supply and increase in energy costs;
- adverse mining conditions may delay and hamper our ability to produce the expected quantities and qualities of minerals upon which the project was budgeted;
- mineral reserves and resources are estimates based on the interpretation of limited sampling data and test work that may not be representative of the deposits as a whole, or the technical and economic assumptions used in the estimates may prove to be materially different when the deposits are mined, that could result in materially different economic outcomes; and
- conflicts with local communities, unions and/or strikes or other labor disputes may delay the implementation or the development of projects.

There are unique risks inherent to the development of underground mines, which may have a material adverse impact on our current and future cash flows.

The development of underground mines is subject to other unique risks including, but not limited to, geotechnical conditions, underground floods, issues relating to ventilating harmful gases, fall-of-ground accidents, and seismic activity resulting from unexpected or difficult geological conditions. While we anticipate taking all measures to safely operate, there is no assurance that the effect of these risks will not cause schedule delays, revised mine and operational plans, injuries to persons and property, and/or increased capital costs, any of which may have a material adverse impact on our cash flows.

We are subject to mine closure and environmental reclamation obligations, which may require substantial financial assurance and could negatively impact our liquidity and financial condition.

As a mining company, we are obliged to reclaim and remediate operationally affected areas during and after mining activities. These obligations are subject to regulatory changes, site conditions, and other external factors. In certain jurisdictions, we are required to provide financial assurances, such as bank guarantees, to ensure compliance with reclamation requirements. While these assurances are currently modest relative to our overall obligations, they may increase over time.

The costs associated with mine closure and environmental reclamation could be significant and may increase annually due to inflation, changes in regulatory requirements, and unforeseen site conditions. As of December 31, 2025, we have recognized provisions for these obligations; however, actual costs may exceed estimates. Changes in the regulatory requirements or the scope of necessary reclamation work could further impact our financial position and cash flows.

Failure to fulfil our reclamation and closure obligations or to provide adequate financial assurance could result in regulatory penalties, including fines, permits revocations, or other adverse consequences. Such risks could materially and adversely affect our operations, financial results, and reputation.

Changes in the assumptions underlying the carrying amount of certain assets could result in significant impairment charges.

We periodically assess whether our tangible and intangible assets have suffered any impairment, in accordance with the accounting policy stated in our consolidated financial statements. If our estimates of the recoverable amount of asset change or are inaccurate, we may determine that impairment charges are necessary. While impairment does not affect reported cash flow, the decrease in the recoverable amount determined could have a material adverse effect on our results of operations. Assurances cannot be given as to the absence of significant impairment charges in future periods, particularly if market conditions deteriorate.

Disruption in supply of zinc concentrate, secondary feed materials, zinc calcine, key-consumables, natural gas, and electric energy could have a material adverse effect on our production levels and financial results.

A portion of the zinc concentrate processed in our smelters is obtained from third parties, and we may be adversely affected if we are unable to source adequate supplies. In 2025, 49.2% of the zinc concentrate processed in our smelters was obtained from third parties, with the remainder supplied by our own mining operations and from secondary feeds. The availability and price of zinc concentrate may be negatively affected by factors beyond our control, including interruptions in production by our mines or suppliers, decisions by suppliers to allocate supplies to other purchasers, price fluctuations and increasing transport costs. The efficiency of our smelter production is also affected by the mix of zinc concentrate qualities and grades processed. Where we cannot source adequate supplies of the concentrate qualities and grades that comprise the most efficient mix, alternative types may be available, but their use may increase production costs or reduce smelter productivity.

In addition, zinc sourced from secondary feed materials represented approximately 10.1% of the zinc content used by our Juiz de Fora smelter in 2025. The use of secondary feed material provides a competitive advantage over zinc concentrate, due to lower acquisition costs and operational gains. We have also incorporated zinc calcine processed by third parties into our operations to increase smelter production. To the extent we are unable to obtain adequate supplies of zinc secondary feeds or zinc calcine, or if we must pay higher than anticipated prices, our business, results of operations and financial position may be adversely affected. In recent years, our calcine supplier in Peru shut down its facilities, impacting smelter production. Since 2022, we have partially offset the reduction in calcine availability through development and consumption of new sources of secondary raw materials, such as third-party waelz oxide, which now provides flexibility for consumption of different raw materials in our smelter operations. Though we have secured a new source of calcine in Peru in 2024, we cannot assure shareholders that we will be able to continuously have secure access to the raw materials required for our operations in the future.

Natural gas is a critical energy input for our Peruvian smelting operations, particularly at Cajamarquilla, where it is used in the roasting and refining processes. Our supply is sourced under contracts with Peruvian natural gas distributors and is subject to risks including price volatility, pipeline disruptions, regulatory changes affecting the Peruvian natural gas market, and potential supply constraints driven by competing industrial demand. Any sustained interruption in natural gas supply or a material increase in its price could reduce smelter output and increase our operating costs in Peru.

Electric energy is a key consumable across all of our mining and smelting operations. Our electricity supply is sourced predominantly from renewable sources, primarily hydroelectric power, with renewable sources accounting for 98.3% in 2025. While this positions us favorably from a carbon-intensity and cost perspective, it also exposes us to hydrological risk. Prolonged drought conditions, which have affected Brazilian and Peruvian water systems in recent years, can reduce hydroelectric generation capacity and result in supply constraints or higher spot market prices. In Peru, electricity supply to our operations is subject to the regulatory framework governing the national interconnected grid, and any adverse changes to that framework, including pricing mechanisms or dispatch priorities, could increase our energy costs or affect supply reliability. To the extent we are unable to secure adequate electric energy supply at anticipated costs, our production levels and financial results may be adversely affected.

The nature of our business includes risks related to litigation and administrative proceedings that could materially and adversely affect our business and financial performance in the event of unfavorable rulings.

The nature of our business exposes us to various litigation matters, including civil liability claims, environmental matters, health and safety matters, regulatory and administrative proceedings, governmental investigations, tort claims, contract disputes, labor matters, and tax matters, among others. We cannot assure shareholders that these or other legal proceedings will not have a material adverse effect on our ability to conduct our business or on our financial position and results of operations, through distraction of our management team, diversion of resources or otherwise. In addition, although we establish provisions in our financial statements as we deem necessary in accordance with IFRS Accounting Standards, the level of provisions that we record could vary significantly from any cash amounts we pay, due to the inherent uncertainties in the estimation process, which, in the aggregate, may negatively impact on our financial condition.

We may be liable for certain payments to individuals employed by third-party contractors.

Under Peruvian law, we may become responsible under certain circumstances to pay mandatory labor benefits or other obligations to personnel employed by our third-party contractors or sub-contractors. Although we believe that we are in substantial compliance with Peruvian labor laws, we cannot assure shareholders that any proceedings initiated by outsourced employees will be resolved in our favor and that we will not be liable for any mandatory labor benefits or for-profit sharing benefits. In the beginning of 2022, a law was published in Peru prohibiting companies from outsourcing core operational activities. More than 70% of our Peruvian workforce is employed by third-party contractors. In July 2023, the law was deemed to be unconstitutional because it was determined to be an unenforceable bureaucratic barrier by the National Institute for the Defense of Competition and the Protection of Intellectual Property (“INDECOPI”). In addition, we initiated a lawsuit seeking to declare the unconstitutionality of this law. However, in October 2025 the Constitutional Court determined that the prohibition to outsource core activities is constitutional. As a result of this ruling, chances of obtaining a favorable outcome in our action seeking a declaration of unconstitutionality of this law are remote. In parallel, there is a class action initiated by Servicio de Agua Potable y Alcantarillado de Lima (“SEDAPAL”) and other companies challenging the aforementioned law, which is pending a final judgment on appeal. We are not a party to this class action, but its outcome may impact the legal criteria applicable to our situation. Even so, the complaint filed at INDECOPI is still in effect in our favor, and we continue to monitor any developments. However, we cannot assure that the final outcome will be favorable to us or that the law will not have any material impact on us. Additionally, any future laws or regulations that would make us responsible under Peruvian law for paying mandatory labor benefits or for-profit sharing benefits for individuals employed by third-party contractors could have an adverse impact on our business, financial position, and results of operations. For more information, see “Information on the Company—Regulatory Matters—Peruvian regulatory framework—Regulation of other activities.”

Under Brazilian law, outsourcing is permitted if certain requirements are met. In addition, Brazilian law provides that the contractor will be held liable on a secondary basis if the outsourced or subcontracted companies do not fulfill their labor obligations. In cases where the outsourced or subcontracted companies do not pay the workers the labor sums they are entitled to, the contractor is responsible for those payments. These payments may have an adverse effect on our results of operation and financial position.

Our business could be adversely affected by the failure of our counterparties to perform their obligations.

Customers, suppliers, contractors, financial institutions, joint venture partners, and other counterparties may fail to perform existing contracts and obligations, which may unfavorably impact our operations and financial results. The ability of suppliers and customers to perform their obligations may be adversely affected in times of financial stress and economic downturn.

We currently operate important parts of our operations, particularly those related to our energy consumption and investments, through joint ventures. Our forecasts and plans for these joint ventures assume that our partners will observe their obligations to make capital contributions, purchase products and, in some cases, provide skilled and competent managerial personnel. If any of our partners fails to observe its commitments, the affected joint venture or consortium may not be able to operate in accordance with its business plans, or we may have to increase the level of our investment to implement these plans.

Some of our investments are controlled by joint venture partners or have separate and independent management. These investments may not fully comply with our standards, controls and procedures, including our health, safety, environment and community standards. Failure by any of our partners or joint ventures to adopt adequate standards, controls and procedures could lead to higher costs, reduced production or environmental, health and safety incidents or accidents, which could adversely affect our results and reputation.

We may be adversely affected by the failure or unavailability of adequate infrastructure and skilled labor.

Our mining, smelting, processing, development, and exploration activities depend to a large degree on adequate infrastructure. The regions where certain of our current operations, projects and prospects are located in remote, sparsely populated regions that are difficult to access. To conduct our operations efficiently, we depend on reliable roads, bridges, power sources, and water supplies. The availability and cost of this infrastructure directly impact our capital and operating expenses, as well as our ability to maintain expected production and sales levels. Several factors, such as unusual weather events (including heavy rainfall and flooding), other natural disasters, sabotage, government actions or external interference (including protests by local communities that could temporarily suspend our projects), may disrupt infrastructure maintenance or availability.

In addition, the mining industry is labor-intensive, and our success depends to a significant extent on our ability, and our contractors' ability to attract, hire, train and retain qualified employees, including individuals with the necessary skills in the regions in which we operate. We could experience increases in recruitment and training costs, as well as decreases in operating efficiency, productivity, and profit margins, if we are unable to attract, hire and retain a sufficient number of skilled employees to support our operations.

We may be adversely affected by labor disputes.

Mining is a labor-intensive industry. We depend on more than 15,000 workers, including employees and contractors, to conduct our operations. A portion of our employees are unionized. On June 26, 2025, operations at the Cajamarquilla smelter were partially and temporarily suspended, as operator employees, represented by their labor union, initiated a strike on June 25, 2025. On June 30, 2025, operations at the Cajamarquilla smelter fully resumed at normal capacity utilization levels, following the successful conclusion of negotiations. The temporary suspension lasted three days. We cannot assure that we will not experience further work slowdowns, work stoppages, strikes or other labor disputes in the future, particularly in the context of the annual renegotiation of our collective bargaining agreements.

We may also be affected by labor-related disputes that broadly develop in the countries in which we operate. Strikes and other labor disruptions at any of our operations could have a material adverse effect on our business, financial position and results of operations.

We could face significant challenges due to failures or interruptions in our information technology systems or automated machinery, including system security breaches resulting from cyber-attacks.

Our information technology systems and automation technology systems may be impacted by failures associated with various risks, including security system breaches or cyberattacks targeted at our technological infrastructure. In this regard, we invest in resources that help us deploy and enhance cybersecurity controls.

We have implemented and use systems and technological solutions for our operational and administrative processes. These can have material and adverse impacts on our results in the event of failures or unavailability due to malicious activities resulting from unauthorized access to our internal systems, vulnerabilities in critical systems, malware, corporate espionage, third-party system failures, and sabotage. These events may lead to the loss of critical data, unscheduled downtime or degradation of operations, disclosure or misuse of confidential information, reduced revenue, unexpected operational costs, reputational damage, and potential legal or regulatory violations. All of these factors could materially and adversely impact our financial and operational results.

We have observed an increase in cyber risk, significantly driven by geopolitical conflicts and the growing use of emerging technologies, particularly those based on AI. Recent data shows a considerable rise in attacks targeting critical infrastructure, industrial companies, and government bodies. There has also been a notable evolution in the sophistication of malicious actions, requiring greater efforts from companies to enhance their readiness and ability to detect, respond to and recover from cyberattacks. Given the current scenario, we are susceptible to cyber incidents that may affect our technological infrastructure, whether proprietary or provided by business partners.

A successful cyberattack or other cybersecurity incident could result in production and operational downtimes, data corruption, unauthorized disclosure of sensitive information, reduced revenue, unexpected operational costs, reputational damage, and potential legal or regulatory violations. Although cyber incidents to date have not resulted in any material breaches, disruptions, or loss of business-critical information, our systems and procedures for preparing and protecting against such attempts and mitigating such risks may prove to be insufficient against future attacks. These events may subject us to significant expenses, remediation costs, disputes, financial losses, regulatory actions or investigations, litigation, reputational harm, and delays in the deployment of critical technologies, which could result in damages, material fines and penalties, and harm to our reputation, any of which could have a significant effect on our financial condition, results of operations, liquidity, and cash flows.

Privacy, data protection, and cybersecurity are constantly adapting to frequently changing regulations and standards. The General Data Protection Regulation (“GDPR”) of the European Union came into effect in 2018, introducing stricter rules regarding the security of personal data. The GDPR requires companies to comply with new guidelines for handling personal and sensitive information, including its use, protection, and the rights of individuals to correct or delete their stored data. In Peru, the Personal Data Regulation, Law No. 29.733, known as the *Ley de Protección de Datos Personales* (“LPDP”), was enacted in 2011 and was supplemented by Supreme Decree No. 016-2024-JUS, published in 2024. Cybersecurity matters in Peru are regulated under a separate legal framework from the LPDP (Urgency Decree No.007-2020, which approves Peru’s Digital Trust Framework and provides measures to regulate and strengthen the Digital Trust Framework, approved by Supreme Decree 126-2025-PCM). Similarly, in Brazil, Law No 13.709, the *Lei Geral de Proteção de Dados* (“LGPD”) came into effect in 2020, which closely mirrors the principles outlined in the GDPR. These regulations reflect the ongoing evolution of privacy, data protection, and cybersecurity standards worldwide. We also observe a series of deliberations by regulatory bodies responsible for Data Protection in these countries and regions, primarily focused on responsibilities and data breach reporting criteria; sanctions; and how to adequately calculate fines, and the role of the Data Protection Officer. Regarding data governance, Peru has also issued specific rules on the role of a Data Protection Officer (“DPO”), through a Directive that establishes the requirements for the designation, performance, and functions of a DPO (approved by Directorial Resolution No. 100-2025-JUS/DGTAIPD). Both the LGPD and LPDP represent comprehensive data protection laws, establishing detailed rules for the collection, use, processing and storage of personal data and affecting all economic sectors, including the relationship between customers and suppliers of goods and services, employees and employers and other relationships in which personal data is collected, whether in a digital or physical environment. In public companies that require certain disclosures regarding cybersecurity risk, such scrutiny from the regulators increases the risk of investigations into the cybersecurity practices, and related disclosures, of companies within its jurisdiction, which at a minimum can result in an increase in administrative costs, distraction of management and diversion of resources for targeted businesses. Any noncompliance with the GDPR, the LGPD, the LPDP, the SEC cybersecurity rules, or any other privacy, data protection and cybersecurity regulations could result in proceedings or actions against us by governmental entities, the imposition of fines or penalties and damage to our reputation, which could have an adverse effect on us and our business, reputation, and results of operations.

Our information and operational technology systems may be adversely affected by disruptions, damage, failure, and risks associated with implementation and integration of new technologies.

Information and operational technology systems are constantly evolving, and to remain competitive, we must implement new technologies in a timely, cost-effective, and efficient manner. We actively update our corporate strategy for AI and the use of new technologies, which may increase our exposure to cybersecurity risks. AI models are used to support decision-making, while material financial and operational decisions remain subject to human review and approval in accordance with our governance framework. While AI has the potential to improve efficiency and safety, it also presents unique vulnerabilities that may adversely impact our operations, including algorithmic biases that could lead to inaccurate decisions or unintended outcomes; data integrity risks, such as manipulation or corruption of datasets used to train AI systems (data poisoning); AI hallucination, which can generate incorrect or misleading information that may negatively impact internal decision-making processes; and unauthorized access or exploitation of AI-powered systems, potentially compromising operations or sensitive data.

Additionally, adopting new technologies like AI requires new capabilities, which may require re-skilling of our existing workforce and could replace some tasks and result in workforce changes. A failure to manage these changes effectively could lead to adverse impacts including eroding our workplace culture and operational disruptions.

The increased interconnectivity of automated, AI, and cloud-based systems, combined with the expansion of our remote workforce, increases our cyber-attack risk. This requires heightened vigilance and the implementation of advanced security measures.

At the same time, despite our best efforts, failure to adopt new technologies, such as AI, as efficiently or as quickly as our competitors may adversely affect our competitiveness and, consequently, the results of our operations.

Health, safety and environmental risks

The failure of a tailings dam could negatively impact our business, reputation and results of operations, and the implementation of associated regulations and decommissioning processes may be expensive.

As a mining company, we face inherent risks associated with the operation of tailings dams, which are structures built for the containment of the mining or industrial waste, known as tailings, and in the operation of related structures and facilities. We currently have 40 disposal facilities, 22 of which are active and 18 inactive, including industrial waste dams, tailings dams, waste piles, dry stacking disposal facilities, effluent dams, sediment dams and water storage dams. 18 of these structures are located in Peru and 22 are located in Brazil. Some of our tailing's dams contain materials that could increase the potential hazard in the event of unexpected failure. As evidenced by the collapse of dams in Brazil over the last decade, any such failure could result in significant personal, property, reputational, social and environmental damages, and materially and adversely affect our reputation and our ability to conduct our operations and expose us to significant liability.

Regulatory changes have increased the time and costs associated with construction, operation, inspection, maintenance, and decommissioning tailings dams. In Brazil, obtaining or renewing an environmental license for new tailings dams or for building new dams now requires additional compliance measures. As part of this process, companies must present a proposal for an environmental bond to guarantee the socio-environmental recovery in the event of an accident or the deactivation of the dam. For more information see "Information on the Company—Mining Operations—Tailings Disposal."

In compliance with applicable regulations, we have conducted engineering studies to evaluate stability and confirm the construction method of old inactive industrial waste containment structures located in our Juiz de Fora unit, located in the State of Minas Gerais. These structures, since they became inactive more than 20 years ago, have been subject to decommissioning as monitored by the environmental agency of the State of Minas Gerais as part of the environmental licensing process for the unit. None of these structures contain mining tailings, water or liquid waste. After discussions with the State Environment Foundation, FEAM (*"Fundação Estadual do Meio Ambiente"*) they have been characterized as dry stacking structures (piles). Therefore, no de-characterization projects are required. All structures are non-operational and are stable. As a result, the provision previously recorded for potential de-characterization will be reduced, leaving only a residual amount for necessary adjustments for closure and preventive maintenance.

Certain regulations, such as those enacted by ANM between 2020 and 2025, may also impose requirements that are more restrictive than our current standards, including mandated compliance with emergency plans and increased insurance requirements and premiums, or require us to pay additional fees or royalties to operate tailings dams. We may also be required to facilitate the relocation of communities and facilities impacted by tailings dam failures. Moreover, insurance coverage for damages resulting from tailings dams' failure may not be available. As a result, we may incur increased expenses in connection with compliance with applicable standards, which may adversely impact on our results. If we fail to comply with applicable requirements, we may be exposed to liability and other penalties.

The collapse of dams, dry tailings or other geotechnical structures may cause severe damages, including personal, property, reputational, environmental damages, and loss of life.

We own several dams, dry stacking disposal facilities, and other geotechnical structures, which may present higher stability risks, especially related to liquefaction. We cannot guarantee that our safety measures will be sufficient and the collapse of any of these structures could cause significant loss of life, personal property and environmental damage, as well as having a material adverse effect on our business, operations, and reputation.

We are exposed to health, safety and environmental risks in our operations, and we may not be able to prevent accidents from happening.

Working underground in mines, in tailings' disposal facilities and across all our activities is inherently risky, presenting potential health, safety, industrial, environmental, and other risks that may affect our operations, employees and surrounding communities. Although safety is our number one priority throughout all our operations, we cannot eliminate the risk of accidents. In 2024 and 2025, such accidents resulted in three and two fatalities, respectively, which underscores the inherent risks of our activities that may have a negative effect on our results of operations and reputation. See "Environmental, Social and Governance (ESG)—Materiality Matrix—Health, safety and well-being."

Global or regional health considerations, including the outbreak of a pandemic or contagious disease, have impacted and could continue to impact our business, financial condition, and results of operations.

Pandemics or health crises could have significant impacts, including disruption to financial markets, rising inflation, and increased volatility due to market expectations for a global recession. The outbreak of contagious diseases, or future pandemics and public crises could present risks to our operations (including the ability of employees to be physically present at work), employee health and safety, mandatory operational closures and general macroeconomic activity, including international market prices for the metals we produce, as well as have a severe impact to our business, customers, or supply chain. This impact could continue for an extended period of time or impact our financial condition and results of operations and continued weak or worsening economic conditions could negatively impact demand for our products.

Natural disasters and increasing severity of weather-related events could affect our business.

Natural disasters could significantly damage our mining and production facilities and infrastructure and may cause a contraction in sales to countries adversely affected due to, among other factors, power outages and the destruction of industrial facilities and infrastructure. In particular, the Central Andean region, where two of our mines are located, is prone to mudslides and earthquakes of varying magnitudes. Due to the El Niño and La Niña weather phenomena, Peru typically experiences extreme weather events that lead to flooding and mudslides, and which could adversely affect our operations. In the past, extreme flooding and mudslides in Peru have interrupted the supply of metal concentrates from our mines and the supply of zinc products to our plants. In addition, Brazil has been experiencing increasingly unpredictable and severe weather events, including historically heavy rainfall in multiple consecutive years. The physical impact of adverse weather events on our business remains uncertain, but we are likely to experience changes in rainfall patterns, increased temperatures, water shortages, rising sea and river levels, lower water levels in rivers due to natural or operational conditions, increased storm frequency, and intensity as a result of increasing severity of weather-related events, which may adversely affect our operations. For example, in the Pasco region (El Porvenir and Atacocha) and at Aripuanã we faced atypical heavy rainfall, with Aripuanã recording rainfall volumes more than 30% above the two-year historical average. Our local team effectively responded to these events ensuring the safety and stability of operations, but we cannot guarantee that any future natural disasters or events will not adversely affect our operations. Although we have certain insurance policies covering damage caused by natural disasters, extensive damage to our properties and facilities and staff casualties due to natural disasters may not be covered by our insurance policies and/or could materially and adversely affect our ability to conduct our operations and, as a result, reduce our future operating results.

In addition, the potential physical impact of adverse weather events on our operations is highly uncertain and would be particular to the geographic circumstances of our facilities and operations. It may include changes in rainfall patterns, water shortages, forest fires, rising sea and river levels, changing storm patterns and intensities, and changing temperatures. These effects may materially impact the cost, production, and financial performance of our operations.

Interruptions of energy supply or increases in energy costs may materially and adversely affect our operations.

Energy is a key component of our production costs. In Peru, we obtain the majority of our electric power for our operations from third parties through energy supply contracts. Although we are party to long-term power purchase agreements with Electroperú S.A. (until the end of 2026) and Kallpa Generación S.A. (from 2027 to 2036), we cannot ensure that we will have secure access to energy sources in Peru at the same prices and conditions in the event of any interruption or failure of our sources of energy, failures or congestion in any part of the *Sistema Eléctrico Interconectado Nacional* (“SEIN”), any failure to renew or extend our other existing energy supply contracts, or due to any regulatory changes that may impact energy rates. In 2025, rainfall was stable throughout the year. Without major water shortages, average energy prices remained around US\$30/MWh. However, the inefficient energy generation in the SEIN, which currently lacks renewable energy projects (i.e., hydroelectric, wind and solar), may adversely impact our operations in case of lack of rain in central Peru, given that most of the energy consumption in the country comes from hydroelectric plants, and may result in an increase in energy prices. These types of renewable projects are expected to lower the prices that energy generators are able to offer to large industrial users.

In Brazil, we obtain electric power for our operations from hydroelectric plants grouped into several legal entities—which are directly or indirectly jointly owned by us, our controlling shareholder, and its affiliates—pursuant to long-term power purchase agreements. In 2025, self-production plants represented 82.2% of energy supply, in terms of energy acquired via energy purchase and sale contracts. Furthermore, our energy costs under these agreements could increase in the event of differences in the hydrology forecast due to the fact that these hydroelectric plants share hydrological risk, in addition to payment of higher energy taxes. For more information, see “Information on the Company—Energy—Power and energy supply.”

Prices and availability of energy resources for our operations may be subject to changes or curtailment due to, among other things, new laws or regulations, the imposition of new taxes or tariffs, supply interruptions, equipment damage, volatility and increase in worldwide price levels for energy and related components, market conditions, and any inability to renew our existing supply contracts. Disruptions in energy supply or increases in costs of energy resources could increase our production costs and have a material adverse effect on our financial position and results of operations.

Shortages of water supply due to permitting, licensing, and other governmental regulations, explosives, critical spare parts, maintenance service and new equipment and machinery may materially and adversely affect our operations and development projects.

Our mining and smelting operations require the use of significant quantities of water for extraction activities, processing, and related auxiliary facilities. Water usage, including extraction, containment, and recycling requires appropriate permits, which are granted by regulatory authorities in Brazil and Peru. The available water supply may be adversely affected by shortages or changes in governmental regulations. We cannot assure shareholders that water will be available in sufficient quantities to meet our future production needs or will prove sufficient to meet our water supply needs. In addition, we cannot assure shareholders that we will maintain our existing licenses related to water rights, particularly if political changes lead to additional regulatory requirements or review of existing licenses. A reduction in our water supply could materially and adversely affect our business, results of operations and financial position. In addition, if we are unable to obtain the necessary licenses with respect to water use, we may be prevented from pursuing some of our planned expansion projects.

In addition to water, our mining operations require intensive use of equipment and machinery as well as explosives. To be able to acquire and use explosives, we must first obtain the corresponding authorizations, which are granted by the relevant regulatory authorities in Brazil and Peru. A shortage in the supply of key spare parts, adequate maintenance service, new equipment and machinery to replace old ones and cover expansion requirements, or explosives, including due to the inability to deliver such water, energy, supplies, critical spare parts, explosives, or equipment and machinery to our operations, or regulatory change impacting our ability to obtain authorization for the acquisition of such materials, could materially and adversely affect our operations and development projects.

Financial risks

Our financial position and results of operations may be materially and adversely affected by currency exchange rate fluctuations.

Our revenues are primarily denominated in U.S. dollars, while certain portions of our operating costs, particularly labor costs, are denominated in *reais* and *soles*. As a result, an increase in inflation in Brazil and Peru, without a corresponding devaluation of the *real* or *sol*, could materially and adversely affect our financial position, results of operations, net income, and cash flows. See “Operating and Financial Review and Prospects—Key factors affecting our business and results of operations—Macroeconomic conditions of the countries and regions where we operate” for a discussion of inflation in 2025.

Given the structure of our operations, a decrease in the value of the U.S. dollar relative to the foreign currencies in which we incur costs could negatively impact our results of operations or financial position. Our exposure to foreign currency fluctuations increases the risk of volatility in our financial position, results of operations and cash flows. We cannot assure shareholders that currency fluctuations, or costs associated with our hedging activities (including fluctuations in exchange rates contrary to our expectations), will not adversely impact our financial position, credit ratings and results of operations.

Fluctuations in interest rates could increase the cost of servicing our debt, affect returns on our financial investments and negatively affect our overall financial performance.

A portion of our indebtedness bears interest based on variable/floating interest rates, including the Secured Overnight Financing Rate (“SOFR”), the Interbank Deposit Certificate (“CDI”), and the Long-Term Rate (“TLP”). As of December 31, 2025, 21.2% of our total debt was subject to variable/floating interest rates. These rates have fluctuated in response to changes in economic growth, monetary policy, and regulatory changes. A significant increase in underlying interest rates, particularly in SOFR and CDI, could materially increase our financial expenses and materially and adversely affect our overall financial performance and credit ratings. For more information, see “Operating and Financial Review and Prospects—Liquidity and Capital Resources—Debt.”

We may engage in hedging and other derivatives activity that may not be successful and may result in losses or tax liabilities.

We may use foreign exchange and metal commodity non-deliverable forwards, swaps and options to mitigate the risks associated with currency and metal price volatility. Despite having a conservative hedging and derivatives financial policy, our hedging activities could cause us to lose or limit our ability to benefit from increases in the prices of the metals we produce if prices rise above the levels set out in our hedge positions, or from favorable variations in currency prices. The cash flow and the mark-to-market values of our production hedges can be affected by factors such as currency volatility and fluctuations in metal prices, which are beyond our control.

Our hedging agreements contain events of default and termination events that could lead to early closeouts of our hedges such as failure to pay, breach of the agreement, misrepresentation, default under our loans or other hedging agreements and bankruptcy. In the event of an early termination of our hedging agreements, the relevant hedge positions would be required to be settled at that time. In that event, there could be a lump sum payment to be made either to or by us. The magnitude and direction of such a payment would depend upon, among other things, the characteristics of the hedge instruments that were terminated and the relevant market prices at the time of termination. Any of the factors described above could have a material adverse effect on our financial position, results of operations or cash flows. See “Operating and Financial Review and Prospects—Risk Management—Financial risk—Metal price sensitivity.”

In addition, we have faced the risk that the Peruvian tax authority (“SUNAT”) does not recognize the deductibility of losses from certain hedge transactions in our Corporate Income Tax (“CIT”) calculations. SUNAT has challenged past hedge transactions that were previously considered eligible for deduction, resulting in tax assessments against Nexa Peru and Nexa CJM totaling approximately US\$17.5 million. At this time, a provision has been recognized in connection with these assessments, primarily due to challenge in retrieving supporting documentation for transactions that occurred many years ago. Beginning in fiscal year 2019, Nexa CJM reclassified its derivative instruments as speculative, rather than hedging instruments for tax purposes, in order to mitigate the risk of future deductibility challenges by SUNAT. This tax treatment has been consistently applied in subsequent fiscal years and is expected to continue on a prospective basis. Nevertheless, residual risk remains with respect to prior periods currently under challenge by SUNAT, which could result in the disallowance of previously claimed deductions or the obligation to pay substantial additional tax amounts.

We might not be able to pay the principal and interest on our debt obligations if they are accelerated due to the non-compliance with the restrictive covenants and clauses of our debt contracts.

Any default on the contracts governing our debts that are not remedied or waived by our lenders or noteholders could result in the acceleration of our obligation to pay the outstanding amounts. If we are unable to generate sufficient cash flow from our operations or secure the necessary resources to make the principal and interest payments on our debts as a result of such acceleration, our business, financial position, credit ratings, and results of operations could be materially and adversely affected. For more information on restrictive covenants in our debt contracts, see “Operating and Financial Review and Prospects—Liquidity and Capital Resources—Debt.”

A downgrade of our credit ratings could increase our borrowing costs, trigger default or acceleration clauses in certain debt agreements, and limit our access to capital markets.

We cannot guarantee that our current credit ratings will be maintained. A downgrade of our credit ratings by one or more rating agencies could increase our borrowing costs, limit our access to capital markets, and trigger default or acceleration clauses in certain debt agreements, requiring us to implement cure mechanisms and/or post additional collateral under specific arrangements.

Any tax-related investigations conducted by federal, state, or local governments may result in a material impact on our business, results of operations and financial condition.

We may be subject to tax investigations by authorities arising from our actions or omissions, as well as those of our customers. Such investigations have the potential to impact our results and operations materially and adversely. Such investigations may lead to significant legal and financial consequences, including fines, penalties, and reputational damage. We may not be able to identify and address potential compliance issues, implement robust internal controls, and foster a culture of transparency and accountability with our customers.

In 2023, after cooperating with an investigation by the Public Prosecutor's Office and Tax Authority of the State of Minas Gerais ("MG Authorities") into the commercial and value added tax ("VAT") practices of certain former customers with respect these practices and our interactions with them, we reached a settlement and with the MG Authorities, without admitting wrongdoing, agreed to make certain tax payments, including interest, and penalties to the State of Minas Gerais on behalf of certain former customers who allegedly failed to meet their tax obligations. This resolution concluded the MG Authorities' investigations on us. We made the scheduled 2025 installment payments as required under the agreement and we do not expect any further developments or provisions regarding these VAT matters but cannot assure you we will not be subject to future tax-related investigations.

For more information about this investigation and its resolution, see "Additional Information—Legal Proceedings—Other legal proceedings." The effects of any future tax-related investigations may have a material impact on our business and financial condition.

Our business, financial position and results of operations may be adversely affected by inflation.

According to the International Monetary Fund, global inflationary pressures eased in 2025 compared to 2024 and are expected to continue declining in 2026. However, downside risks could alter this outlook, depending on shifts in technology expectations and the escalation of geopolitical tensions. Certain countries in which we operate have experienced, and may experience again in the future, periods of elevated inflation, potentially increasing our operating costs and affecting domestic demand for our products. Central banks are expected to persist in their efforts to maintain inflation within, or close to, established target ranges. These pressures have already impacted on our operating margins through cost increases and may increase the cost of financing and impact on our ability to access international financial markets. Further, government policies in the countries where we operate could materially and adversely affect their overall national economies, which in turn may materially and adversely affect us. Furthermore, as we follow international market prices, we may not be able to adjust the prices we charge our customers to offset potential effects of inflation on our cost structure. In addition, although the functional currency for our Peruvian operations is the U.S. dollar, high inflation rates could still increase our operating costs, further adversely impacting our operating margins if we are not able to pass these increased costs on to consumers.

Our business requires substantial capital expenditures and is subject to financing risks.

Our business is capital intensive. Exploration for and exploitation of mineral deposits, maintenance of machinery and equipment and compliance with applicable laws and regulations require substantial capital expenditures. We must continue to invest capital to maintain and potentially expand our existing brownfield operations, develop our greenfield projects pipeline in order to sustain and grow production, in addition to conducting investments in sustaining, health, safety and environment. In 2025, we invested US\$351.9 million in capital expenditures. We depend partially on our operating cash flows to support our capital expenditures. See "Information on the Company—Capital Expenditures."

No assurance can be given that we will be able to maintain our production levels or generate sufficient cash flow, or have access to sufficient investments, loans, or other financing alternatives to finance our capital and other projects expenditure program at a level necessary to sustain and grow our current exploration and exploitation activities. Any equity or debt financing, if available, may not be on terms that are favorable to us. If our access to external financing is limited, we may not be able to execute our strategy, which could adversely affect our business, financial position and results of operations.

We are exposed to credit risk in relation to our contractual and trading counterparties as well as to hedging and derivative counterparty risk, and our results of operations may be negatively impacted by increases in expected credit losses.

We are subject to the risk that the counterparties with whom we conduct our business (in particular our customers) and who are required to make payments to us are unable to make such payment in a timely manner or at all. Credit risk is present in our hedging operations, customer operations and cash management operations. If the amounts that are due to us are not paid or not paid in a timely manner, this may impact not only on our current trading and cash-flow position but also on our financial and business position. In addition, our derivatives, metals hedging, and foreign currency and energy risk management activities expose us to the risk of default by the counterparties to such arrangements. Any such default could have a material adverse effect on our business, financial position, and results of operations.

We hold a significant balance of accounts receivable and, therefore, provide an allowance to cover the amount that may not be received due to customer default. We record expected credit losses at an amount considered sufficient to cover estimated losses in the realization of receivables, taking into account our historical losses and internal risk classification of our customers, although we cannot guarantee that these amounts are sufficient to cover any losses. Additionally, delays in payment cycles from significant customers may adversely affect our liquidity and our ability to obtain financing for working capital, such as receivables sales.

The mining business is subject to inherent risks, some of which are not insurable, and any uninsured or underinsured loss could adversely affect our operating and financial results.

The business of mining zinc, copper, silver, lead, and other minerals is subject to several risks and hazards. Hazards associated with underground mining operations include underground fires and explosions, including those caused by flammable gas, gas and coal outbursts, cave-ins or falls of ground, rock falls, openings collapse, lack of oxygen, air pollution, tailings dam failures or other discharges of tailings, hazardous substances and materials, gases and toxic chemicals, water ingress and flooding, sinkhole formation, ground subsidence, and other accidents and conditions resulting from underground mining activities, such as drilling, blasting, removing and processing material. In addition, we may encounter geotechnical challenges as we continue with and expand our mining activities, including the possibility of failure of underground openings.

Such occurrences could result in damage to, or destruction of, our properties or production facilities, third-party property, human exposure to pollution, personal injury or death, environmental and natural resource damage or contamination, delays in mining, monetary losses and legal liability. In addition, any such occurrence could adversely affect our reputation. Damages to our reputation could result in additional environmental and health and safety legal oversight, and authorities could impose more stringent conditions in connection with the licensing process of our projects and operations. In addition, our customers may be less willing to buy metals from us if we have been subject to significant adverse publicity. We maintain insurance typically in the mining industry, and in amounts that we believe to be adequate, but which may not provide complete coverage in certain circumstances. Insurance against certain risks (including certain liabilities for environmental contamination, tailings dam failures and other hazards as a result of exploration, production or extreme weather) may not be generally available or is uneconomical to afford. If we incur significant liability for which we are not fully insured, we may not be able to finance the uninsured liability amount on acceptable terms to us or at all, and we could be required to divert a significant portion of our cash flow from normal business operations. This could have a material impact on our financial position.

We could also incur additional expenses due to failures in our industrial drainage system or other environmental control equipment. Any such failures could also have adverse impacts on the environment, which could lead to adverse weather events and a further impact on our reputation if we are found to contribute, or there is a perception that we have contributed, to adverse environmental impacts in the areas in which we operate.

The insurance market may not offer, or may offer only insufficient, coverage for certain risks to which we are exposed, and we cannot guarantee that all operational, cyber, property, civil liability and other critical risks will be fully covered under our insurance program. As a result, loss events involving uninsured or partially insured risks, including those considered critical to our operating could occur. Although we seek to diversify our counterparties, including insurers, reinsurers and brokers, to obtain the most appropriate and effective coverage available, there can be no assurance that adequate insurance will be accessible on commercially reasonable terms. Any uninsured or underinsured loss event could have a material adverse effect on our operations and financial condition.

Dividends or other distributions paid by us on our common shares will be subject to Luxembourg withholding tax.

Any dividends or other distributions paid by us on our common shares will be subject to a Luxembourg withholding tax at a rate of 15.0% unless an exemption or reduction in rate applies. The withholding tax must be withheld from the gross distribution and paid to the Luxembourg tax authorities. Under certain circumstances, distributions such as share capital reductions or share premium reimbursements may not be subject to withholding tax, but there are no assurances that we will be able to make such distributions in the future. See “Additional Information—Taxation—Luxembourg tax considerations—Shareholders.”

Compliance risks***We are subject to anti-corruption, anti-bribery and anti-money laundering laws and regulations in various jurisdictions. Any violations of any such laws or regulations could have a material adverse impact on our reputation and results of operations and financial position.***

We are subject to anti-corruption, anti-bribery, anti-money laundering and other international laws and regulations and are required to comply with the applicable laws and regulations of Brazil, Peru, Luxembourg, Canada and the United States, among others. In addition, we are subject to economic sanctions regulations that restrict our dealings with certain sanctioned countries, individuals, and entities. Our governance and compliance processes may not timely identify or prevent future breaches of legal, accounting or governance standards. We may be subject to instances of fraudulent behavior, corrupt practices and dishonesty by our affiliates, employees, directors, officers, partners, agents, and service providers. Any violations by us of anti-bribery and anti-corruption laws, sanctions regulations or other standards could have a material adverse effect on our business, reputation, results of operations and financial position.

We may be subject to misconduct by our employees, third-party contractors, or customers.

We may be subject to misconduct by our employees, third-party contractors, or customers, such as theft, bribery, sabotage, fraud, insider trading, violation of laws, including taxation laws, violation of human rights, slander, or other illegal actions. Any such misconduct may lead to fines or other penalties, slow-downs in production, increased costs, lost revenues, increased liabilities to third parties, impairment of assets or harmed reputation, any of which may have a material adverse effect on our business, results of operations or financial position.

Health, safety and environmental laws and regulations, including regulations pertaining to adverse weather events, may increase our costs of doing business, restrict our operations or result in the imposition of fines or revocation of permits.

Our mining and smelting activities are subject to Brazilian and Peruvian laws and regulations, including health, safety, and environmental matters. In January 2023, the EU Corporate Sustainability Reporting Directive (“CSRD”) entered into force, modernizing and strengthening social and environmental reporting requirements to help investors and stakeholders assess corporate sustainability impact. EU Member States had until July 2024 to implement the Directive into national law; Luxembourg submitted its draft implementation bill in March 2024. The CSRD replaces existing non-financial disclosure rules. In 2025, the European Commission introduced the “Omnibus” legislative package, which was approved in late 2025 and is currently subject to transposition and implementation by EU Member States. As a result of the Omnibus package, the scope and implementation timelines of the CSRD were significantly revised, based on the agreement confirmed by the European Parliament in December 2025. The final legal text remains subject to formal approval by the Council of the European Union and publication in the Official Journal of the European Union, after which national transposition into local laws will occur. Under the revised thresholds, CSRD will apply to companies with more than 1,000 employees and a minimum net turnover threshold of approximately €450 million in annual revenue, which would include us. In addition, the Omnibus package introduced a “stop-the-clock” mechanism, postponing compliance deadlines. Large companies previously classified under “Wave 2,” which were originally expected to begin reporting for fiscal years 2025 or 2026, are now required to begin CSRD reporting for fiscal years starting in 2027, with the first sustainability reports to be published in 2028. Furthermore, the review process of the European Sustainability Reporting Standards (“ESRS”) remains ongoing, including the development of simplified standards and delegated acts to be adopted following the completion of national transposition.

Additional matters subject to legislation include, but are not limited to, transportation, mineral storage, water use and discharge, use of explosives, hazardous and other non-hazardous waste, and reclamation and remediation measures. Our operations are subject to periodic inspections and special inspections in certain circumstances by governmental authorities and consultation with local communities. In Peru, Congress began a revision process of a law to prohibit economic activities in the headwaters of basins, which are currently considered vulnerable areas that require protection and mitigation measures. However, the revision process lost momentum and has shown no sign of progress to date. If adopted, this law could have a material impact on our projects in case any new projects were to occur in headwaters of basins. For more information about these Peruvian environmental regulations, see “Information on the Company—Regulatory Matters—Peruvian regulatory framework—Environmental regulations.” Compliance with these laws and regulations and new or existing regulations that may be applicable to us in the future could increase our operating costs and adversely affect our financial results of operations and cash flows.

Regulatory and industry responses to climate change and greenhouse gas emissions—including international agreements like the Paris Agreement, Kyoto Protocol and COP26—could significantly increase our operating costs through new emission controls, carbon credit purchases, and enhanced monitoring and reporting requirements, adversely affecting our business and financial results. In December 2024, Brazil enacted legislation establishing a regulated carbon market to reduce GHG emissions and promote sustainable development. The law creates: (i) a structured carbon market with economic incentives for emissions reduction; (ii) an emissions cap-and-trade system; (iii) mandatory verification and reporting guidelines; (iv) compliance obligations with penalties for non-compliance; (v) support for green projects and technology adoption; and (vi) a governance framework for market oversight. In 2025, the process of regulatory implementation of this legislation began, and regulation is expected to define, among other aspects, sectoral emissions limits, eligible offset and compensation mechanisms, and applicable tariffs or charges for emissions exceeding established thresholds. Compliance with this new framework may require substantial capital investment and increase our operating costs. In addition, the Brazilian government has initiatives to grant environmental licenses in connection with the license holder’s commitment to reducing greenhouse gases, especially in the state of Minas Gerais. As health, safety, and environmental regulations, requirements, best practices, and industry standards are evolving and becoming stricter in Brazil, we may incur increased expenditures for compliance with these increasingly demanding requirements.

Pursuant to applicable environmental regulations and laws, we could be found liable for all, or substantially all the damage caused by mining activities at our current or former facilities or those of our predecessors at disposal sites. We could also be found liable for all incidental damage due to the exposure of individuals to hazardous substances or other environmental damage, all of which could significantly and negatively affect our reputation. We cannot assure shareholders that our costs of complying with current and future environmental and health and safety laws and regulations, including decommissioning and remediation requirements, and any liabilities arising from past or future releases of, or exposure to, hazardous substances will not materially and adversely affect our business, financial position, and results of operations.

Recent and potential changes in commercial and mining laws, including trends like resource nationalism, may significantly impact our mining operations.

Changes to the Brazilian and Peruvian regulatory framework that could be enacted in the future may result in an increase in our expenses, particularly mining royalties, and tax-related expenses, among others. Any changes in the interpretation of Brazilian or Peruvian mining laws and regulations, including changes to our concession agreement and changes in commercial rules and protections, may increase our compliance, operational or other costs. In 2012, Peru launched REINFO (*Registro Integral de Formalización Minera*), a registration program that grants temporary permits to operators of informal mining activities while operators wait for formal approval. During this period, such operators are not required to adhere to the regulations governing the operations of formally approved mining operations, such as ours. Such regulations include the prohibition of mining in concession areas without the concession holder’s approval. The program has become increasingly popular in recent years and has been extended several times. The last extension was authorized in December 2025 through Law No. 32537, which provides that the program will remain in effect until December 31, 2026, or until other specific legislation and regulation is enacted. The establishment of REINFO has increased the presence of informal mining activities in Peru, including the mining of copper. The institutionalization of informal mining activities by the Peruvian government may significantly and adversely affect our operations and projects.

In December 2022, a new tax on mining operations was approved in the state of Mato Grosso, where the Aripuanã project is located. The Brazilian Supreme Court declared the tax unconstitutional, however in December 2023, a new tax replacing the previous one was approved by the state of Mato Grosso. We continue to follow and support discussions about the constitutionality of the new regulation, conducted by an association of the Mining Sector but cannot guarantee that the outcome will be favorable to us.

In addition, there is a risk that resource nationalism in Brazil or Peru may result in operational limitations, local content requirements, and even expropriations and nationalizations. For additional information, see “Information on the Company—Regulatory Matters—Brazilian regulatory framework—Mining rights and regulation of mining activities.”

Changes in tax laws, and any related tax agreements we have entered into or may enter into with local governments, may increase our tax burden and, as a result, could adversely affect our business, financial position, and results of operations.

The Brazilian, Peruvian and Luxembourg governments from time to time implement changes to tax laws and regulations. Any such changes, as well as changes in the interpretation of such laws and regulations, or changes to former precedents on tax decisions by authorities or courts, may result in increases to our overall tax burden, which would negatively affect our profitability. Moreover, some tax laws may be subject to controversial interpretation by tax authorities, including, but not limited to, the regulation applicable to corporate restructurings. In the event an interpretation different than the one on which we based our transactions prevails, we may be adversely affected.

In addition, as a result of the VAT tax benefit adopted by Minas Gerais State on the commercialization of several products, including metallic zinc, there has been increased scrutiny by the tax authorities of companies incorporated in this State. For more information about the VAT tax benefit, see “Information on the Company—Regulatory Matters—Brazilian regulatory framework—Royalties and other taxes on mining activities.” See also “Additional Information—Legal Proceedings” for information about the investigation by the Fiscal Office of the State of Minas Gerais and the Public Ministry of Minas Gerais relating to the VAT-related practices of certain of our former customers, as well as our relationship with such former customers.

On January 1, 2024, new transfer pricing regulations came into effect in Brazil, which adopted an arm’s length principle to transfer pricing similar to that of the Organization for Economic Co-operation and Development (OECD). Additionally, a substantial VAT tax reform for indirect and consumption taxes that eliminates existing federal, state, and municipal indirect taxes and creates three classes of taxes was approved in Brazil in December 2023 and will begin as of 2026. The reform’s goals are simplification, competitiveness and uniformization of legislation, and a long and gradual transition period is expected from 2026 to 2033. On January 16, 2025, *Lei Complementar* (Complementary Law) 214 was approved, which lays the foundation for tax reform and regulates the Constitutional Amendment 132/23 and institutes the Tax on Goods and Services (IBS), the Social Contribution on Goods and Services (CBS), the Selective Tax (IS) and creates the IBS Management Committee. On January 13, 2026, *Lei Complementar* 227 was enacted, amending the *Lei Complementar* 214 and finalizing the tax reform regulation. We are currently assessing the impact of the legal framework on its operations and there is no assurance that these new regulations will not increase taxes for us and will not materially and adversely affect our business.

Additionally, the OECD’s Pillar Two tax reform, which establishes a global minimum effective tax rate of 15%, became effective in Luxembourg on January 1, 2024. See “Taxation—Luxembourg tax considerations” for more information about this tax regime and its potential impact on us. Brazil enacted Pillar Two legislation during 2024, which went into effect on January 1, 2025. Peru has not yet enacted the Pillar Two legislation, however adopting this regime could have a potential impact on our business, financial position, and results of operations.

In 2025, we performed an assessment of our potential exposure to Pillar Two income taxes under the OECD transitional safe harbor rules and the Global Anti-Base Erosion (“GloBE”) income calculation. Our assessment concluded that there was no material impact on our financial results.

Further, we are engaged in ongoing tax-related matters with the SUNAT related to the stability agreement of Cerro Lindo's operations. The Peruvian tax authority revised the tax audits for the years ended December 31, 2014, 2015, 2016 and 2017. In 2024 and 2025, SUNAT concluded the tax audits for the years ended December 31, 2018, and December 31, 2019, respectively recognizing that part of the production was within the stabilization criteria. In October 2025, the tax court issued unfavorable decisions for the 2014 and 2015 years and in December 2025, we initiated judicial proceedings seeking the partial annulment of these tax court decisions. In January 2026, Nexa was notified of the tax court resolutions regarding the 2016 and 2017 years, in which the tax court declared SUNAT's tax stability assessments null. As of the date of this annual report, SUNAT is now auditing the year-ended December 31, 2020, and 2021, which are the last fiscal years covered by the stability agreement. Although we continue to believe that there are legal grounds to obtain favorable outcomes in these matters, we may have to pay the disputed amounts under discussion to continue the legal process at judicial levels which may impact on our results, cash flow and liquidity. For more information, see "Additional Information—Legal Proceedings" and Note 11(d) to our consolidated financial statements.

In addition, we may face the risk that SUNAT does not recognize the deductibility of certain expenses in our calculation of Corporate Income Tax, which could lead to tax assessments against us.

The Brazilian, Peruvian or Luxembourg governments may implement additional changes to tax regulations in the future, which could adversely affect our business, financial position, and results of operations.

Differing interpretations of agency regulations or court rulings and the application of such laws and regulations could result in unintended non-compliance and may have a material effect on our business, results of operations, and financial position.

The courts in some of the jurisdictions in which we operate may offer less certainty as to the judicial outcome of legal proceedings or a more protracted judicial process than is the case in more established economies. Businesses can become involved in lengthy court cases over simple issues when rulings are not clearly defined, and the poor drafting of laws and excessive delays in the legal process for resolving issues or disputes compound such problems. In addition, there may be limited or no relevant case law providing guidance on how courts would interpret such laws and the application of such laws to our contracts, joint ventures, licenses, license applications or other legal arrangements. Accordingly, there can be no assurance that contracts, joint ventures, licenses, license applications, tax agreements, or other legal arrangements will not be adversely affected by the actions of government authorities and the effectiveness of and enforcement of such arrangements in these jurisdictions. Moreover, the commitment of local businesses, government officials and agencies and the judicial system in these jurisdictions to abide by legal requirements and negotiated agreements may be more uncertain and may be susceptible to revision or cancellation, and legal redress may be uncertain or delayed. These uncertainties and delays could have a material adverse effect on our business and results of operations. Finally, certain interpretations of regulations and laws may lead to increasing governmental fines and sanctions, even for non-material violations of these rules and regulations. If we are deemed to be in violation of agency regulations or court rulings and are required to make payments in connection with the alleged violations, this may have a material impact on our business, results of operations and financial position.

Regulation of other activities.

We are subject to mining and environmental regulation related to, among other activities, the use of explosives, fuel storage, controlled substances, discharges, telecommunications, archeological remains and energy concessions. We are also subject to more general legislation on data privacy, labor, occupational health and safety, and peasant and indigenous communities, among others, which may adversely affect our business. See "Information on the Company—Regulatory Matters—Brazilian regulatory framework" and "Information on the Company—Regulatory Matters—Peruvian regulatory framework."

I. INFORMATION ON THE COMPANY

BUSINESS OVERVIEW

Overview

We are a leading large-scale, low-cost, integrated polymetallic producer, with zinc as our main product. We have over 65 years of experience developing and operating mining and smelting assets in Latin America.

We currently own and operate five polymetallic mines – four long-life underground (two in the Central Andes region of Peru and two in Brazil, in the states of Minas Gerais and Mato Grosso), and one open-pit in the Central Andes region of Peru. The majority of our operations are large-scale, modern, mechanized mines. Our mines are located in close proximity to each other or to our smelters, creating synergies and operational efficiencies. Two of our mines, Cerro Lindo in Peru and Vazante in Brazil, are among the top 30 largest zinc-producing mines globally. Combined with our other mining operations, this placed us among the top six global zinc producers in 2025, according to Wood Mackenzie. In addition to zinc, which accounted for 46.9% of our mined metal production in 2025, measured on a zinc equivalent basis, we produce substantial amounts of copper, lead, silver and, to a lesser extent, gold as by-products, which reduce our overall costs to produce mined zinc. We also own and operate three zinc smelters: two in Minas Gerais, Brazil (Três Marias and Juiz de Fora), and one in Lima, Peru (Cajamarquilla), which produce metallic zinc, zinc oxide and several by-products. In 2025, we were the sixth largest producer of refined zinc globally, according to Wood Mackenzie. Our smelters are the only units of their kind in Latin America (excluding Mexico), providing us with benefits from higher premiums in the region. Cajamarquilla is the only operating zinc smelter in Peru and was ranked as the fifth largest zinc smelter globally by production volume in 2025, according to Wood Mackenzie. Peru is the second largest producer of mined zinc in the world, also according to Wood Mackenzie, ensuring long-term supply of zinc concentrates to Cajamarquilla. Given our proximity to concentrate producers (both to our own mines and third-party producers), we also benefit from freight parity.

Mining production decreased in 2025 as compared to 2024, mainly driven by lower production at Vazante. In the smelting segment, production also fell compared to 2024, largely due to lower volumes from Juiz de Fora and Três Marias.

- In 2025, our zinc mining production decreased by 3.5% compared to 2024, mainly driven by our increased focus on mining activities in lower-grade areas in the Vazante mine due to geotechnical constraints in the first half of 2025 in high-grade areas of the underground mine. Our mining operations produced 315.6 thousand tonnes of zinc contained in concentrates, 33.4 thousand tonnes of copper contained in concentrates, 63.1 thousand tonnes of lead contained in concentrates, 10.9 million ounces of silver and 38.2 thousand ounces of gold, for a total of 672.4 thousand tonnes of metal on a zinc equivalent basis (based on the average LME prices in 2025).
- Total smelting production (zinc metal + oxide) in 2025 decreased by 5.1% compared to 2024. Our smelters produced 564.4 thousand tonnes of zinc metal and oxide available for sale in different formats and sizes during 2025, along with by-products, principally sulfuric acid, Nexa's largest by-product by volume, silver concentrate, copper cement and copper sulfate, most of which are under annual or multi-year contracts to regional and international clients.
- Our smelters primarily process zinc concentrate. In 2025, 50.1% of the total zinc raw material consumption was sourced from our mines, while 49.9% was purchased from third parties or obtained as secondary raw material (excluding oxide). In 2025, the total production volume of the contained zinc in concentrates produced by our mines was processed by our own smelters. All our copper and lead concentrates were sold to third parties. We market our products both in Latin America and globally, through our commercial offices in Luxembourg, the United States, Brazil, and Peru. Additionally, we own energy assets (hydroelectric power plants) in both Brazil and Peru, which provide us with access to a reliable and competitive power supply.

The ramp-up phase at Aripuanã was completed in June 2024, marking Aripuanã's transition to a fully operational mine. In 2025, we continued to optimize operational performance, with a focus on the tailings filtration circuit, where available capacity remains a constraint to higher and sustained throughput. The installation of a fourth tailings filter is expected to be commissioned in the first half of 2026, which is designed to address this constraint and provide additional operational flexibility. For a detailed discussion of Aripuanã's operational status and improvement initiatives, see "Information on the Company—Mining operations—Aripuanã."

In 2024, our Board of Directors, through the Finance Committee, approved the first phase of the Cerro Pasco Integration Project: the tailings pumping and piping system, following a recommendation from the Sustainability and Capital Projects (“SCP”) Committee. The Integration Project is designed to consolidate the El Porvenir and Atacocha underground mines into an integrated complex, capturing operational synergies, reducing the environmental footprint and extending the combined life of the mining complex. Phase I encompasses the construction of a tailings treatment plant at El Porvenir and the refurbishment of a 6 km pipeline (mostly underground) connecting El Porvenir to Atacocha’s tailings storage facility. Construction began in July 2025 and remains in line with the planned schedule, with commissioning expected in 2026. We also submitted in December 2025 the two major environmental filings required by SENACE, and approvals are expected in the first quarter of 2027. For a description of Phase II and the project’s financial parameters, see “Information on the Company—Mining operations—Cerro Pasco Complex—Integration Project.”

History

We commenced operating in 1956 under the name “*Companhia Mineira de Metais*”, in the state of Minas Gerais, Brazil. After a series of restructurings in the subsequent fifty-eight years, in 2014, a new corporate governance model was implemented by our controlling shareholder VSA in the corporate group. The main consequence of this new corporate model was that the new governance structure demanded a higher level of empowerment and accountability of senior management, and the establishment of a Board of directors at each company. In addition, in connection with the implementation of the new corporate governance model, VSA’s equity participations in Nexa CJM (formerly Votorantim Metais – Cajamarquilla S.A.) and Nexa Brazil (formerly Votorantim Metais Zinco S.A.) were transferred to Nexa Resources on June 18, 2014, and July 1, 2014, respectively.

In October 2017, we completed our initial public offering and listed our common shares on the New York Stock Exchange (“NYSE”) and on the Toronto Stock Exchange (“TSX”) under the ticker symbol NEXA. In connection with becoming a public company, VM Holding S.A. changed its corporate name to Nexa Resources S.A. and our subsidiaries Votorantim Metais—Cajamarquilla S.A., Votorantim Metais Zinco S.A. and Compañía Minera Milpo S.A.A. changed their corporate names to Nexa CJM, Nexa Brazil and Nexa Peru, respectively.

On November 30, 2021, our common shares were voluntarily delisted from the TSX following an internal assessment that the costs and administrative requirements of maintaining the dual listing outweighed its benefits. We remain a reporting issuer in each of the provinces and territories of Canada and continue to file continuous and periodic disclosure documents to Canadian resident holders of our common shares. We intend to apply to cease to be a reporting issuer in Canada once we are in a position to satisfy or obtain relief from the applicable regulatory requirements.

Corporate structure and principal subsidiaries

Nexa CJM

Currently, Nexa Resources is the beneficial owner of 99.916% of the outstanding shares of Nexa CJM, and the remaining outstanding shares are owned by Nexa Recursos Minerais S.A. with 0.081% and by other minority shareholders holding 0.003% in aggregate.

Nexa Peru

Currently, Nexa Peru’s share capital consists of 1,257,754,353 common shares. In addition to common shares, Nexa Peru has issued investment shares that represent a participation in its net worth (*patrimonio*). Although the investment shares do not represent a participation in our capital nor grant any voting rights, they grant their holders the right, among others, to participate in any dividend distributions and liquidation proceeds, pro rata to the percentage they represent in the total net worth of Nexa Peru; as well as to participate in any capital increases (in order to maintain the participation they represent in the total net worth) and the right to have their shares redeemed in certain circumstances. As of December 31, 2025, approximately 67.02% of the investment shares are free float and 32.98% are treasury shares.

Both the common shares and the investment shares of Nexa Peru are registered with the Peruvian Public Registry of Securities (*Registro Público del Mercado de Valores*) and listed on the Lima Stock Exchange. As a result, Nexa Peru is required to comply with certain disclosure obligations such as filing quarterly and annual financial statements, reporting on material events (*hechos de importancia*) and disclosing information regarding the economic group to which it belongs.

The following table sets forth information concerning the ownership of the capital stock of Nexa Peru, excluding the investment shares.

Shareholder	Number	Share Capital (%)
Nexa CJM	1,048,621,896	83.37%
Nexa Resources	2,277,601	0.18%
Public float	206,854,856	16.45%
Total	1,257,754,353	100.0%

Nexa Brazil

Nexa Brazil is 100% owned by Nexa Resources, and owns the Vazante and Aripuanã mines, and Três Marias and Juiz de Fora smelters.

Producing mines and smelters

Producing mines:

- ***Cerro Lindo.*** Our Cerro Lindo mine is an underground mine located in Peru wholly owned by Nexa Peru, which is 83.55% directly and indirectly owned by Nexa Resources. Operations began in 2007 and, in 2025, the Cerro Lindo mine produced approximately 87.1 thousand tonnes of zinc contained in concentrates, 27.1 thousand tonnes of copper contained in concentrates, 10.3 thousand tonnes of lead contained in concentrates, 4.0 million ounces of silver contained in concentrates and 4.1 thousand ounces of gold contained in concentrates. The ore is treated at a concentrate plant that has a processing capacity of 20.0 thousand tonnes of ore per day.
- ***Vazante.*** Our Vazante mine is an underground and open pit mine located in Brazil wholly owned by Nexa Brazil, which is 100% owned by Nexa Resources. Operations began in 1969 and, in 2025, the Vazante mine produced approximately 128.4 thousand tonnes of zinc contained in concentrates, 0.86 thousand tonnes of lead contained in concentrates and 0.4 million ounces of silver contained in concentrates. The ore is treated at a concentrate plant that has a processing capacity of 5.0 thousand tonnes of ore per day.
- ***El Porvenir.*** Our El Porvenir mine is an underground mine located in Peru (part of the Cerro Pasco Complex) wholly owned by Nexa Resources El Porvenir S.A.C., which is 83.55% directly and indirectly owned by Nexa Resources. Operations began in 1949 and, in 2025, the El Porvenir mine produced approximately 53.1 thousand tonnes of zinc contained in concentrates, 0.4 thousand tonnes of copper contained in concentrates, 25.2 thousand tonnes of lead contained in concentrates, 4.4 million ounces of silver contained in concentrates and 7.7 thousand ounces of gold contained in concentrates. The ore is treated at a concentrate plant that has a processing capacity of 6.7 thousand tonnes of ore per day.
- ***Atacocha.*** Our Atacocha mine is an underground and open pit mine located in Peru (part of the Cerro Pasco Complex) wholly owned by Nexa Resources Atacocha S.A.A. (formerly Compañía Minera Atacocha), which is 83.01% directly and indirectly owned by Nexa Resources. Operations began in 1938 and, in 2025, the Atacocha mine produced approximately 11.9 thousand tonnes of zinc contained in concentrates, 13.7 thousand tonnes of lead contained in concentrates, 1.2 million ounces of silver contained in concentrates and 10.2 thousand ounces of gold contained in concentrates. The ore is treated at a concentrate plant that has a processing capacity of 4.6 thousand tonnes of ore per day. Since 2020, activities at the Atacocha underground mine have been suspended and have been placed under care and maintenance until the Cerro Pasco Integration Project is concluded and the rehabilitation milestone is achieved.

- **Aripuanã.** Our Aripuanã mine is an underground mine located in Brazil wholly owned by Nexa Brazil, which is 100% owned by Nexa Resources. In June 2024, the mine completed the ramp-up phase and transitioned to an ongoing operation. In 2025, the Aripuanã mine produced approximately 35.2 thousand tonnes of zinc contained in concentrates, 5.9 thousand tonnes of copper contained in concentrates, 13.0 thousand tonnes of lead contained in concentrates, 1.0 million ounces of silver contained in concentrates and 16.2 thousand ounces of gold contained in concentrates. The ore is treated at a concentrate plant that has a processing capacity of 6.3 thousand tonnes of ore per day. For a detailed discussion of Aripuanã's project implementation history, current operational status, production data, and mineral reserves and resources, see "Information on the Company—Mining operations—Aripuanã."

Smelters:

- **Cajamarquilla.** Our Cajamarquilla smelter, which is wholly owned by Nexa CJM, which is 99.997% directly and indirectly owned by Nexa Resources, is located in Peru and began operating in 1981. It is currently the largest zinc smelter in Latin America (excluding Mexico) and was the fifth largest zinc smelter in the world in 2025, according to Wood Mackenzie. This smelter uses Roast-Leach-Electrowinning technology. With a nominal production capacity of 344.4 thousand tonnes of refined metal per year, Cajamarquilla produced 345.3 thousand tonnes of zinc metal available for sale in 2025, at the nominal capacity, and 334.1 thousand tonnes in 2024. In 2025, 37.9% of the zinc contained in raw material used by Cajamarquilla was sourced from our mines in Peru and 62.1% was purchased from third parties or obtained from secondary feed materials. In addition to zinc metal, Cajamarquilla produced 594,124 tonnes of sulfuric acid in 2025, of which 566,279 tonnes were sold, along with silver concentrate and copper cement.
- **Três Marias.** Our Três Marias smelter, which is wholly owned by Nexa Brazil, which is 100% owned by Nexa Resources, is located in Brazil and began operating in 1969. Três Marias processes zinc silicate concentrate from our Vazante mine and zinc sulfide concentrate. This smelter uses Roast-Leach-Electrowinning technology. With a nominal production capacity of 192.2 thousand tonnes of refined metal per year, Três Marias produced 157.3 thousand tonnes of zinc metal and oxide in 2025 and 178.7 thousand tonnes in 2024. In 2025, 81.8% of the zinc contained in raw materials used by Três Marias was sourced from our mining operations in Brazil and Peru and 18.2% was purchased from third parties or obtained from secondary feed materials. Três Marias also produces sulfuric acid as a by-product of the roasting process, substantially all of which is consumed internally in the leach plant, with the remaining 877 tonnes sold.
- **Juiz de Fora.** Our Juiz de Fora smelter, which is wholly owned by Nexa Brazil, which is 100% owned by Nexa Resources, is located in Brazil and began operating in 1980. This smelter uses Roast-Leach-Electrowinning and Waelz Furnace technologies. With a nominal production capacity of 96.9 thousand tonnes of refined metal per year, Juiz de Fora produced 61.8 thousand tonnes of zinc metal in 2025 and 82.0 thousand tonnes in 2024. In 2025, 37.2% of the zinc raw material used in Juiz de Fora was zinc concentrate sourced from our mining operations, 52.6% was purchased from third parties and 10.1% was obtained from secondary feed materials from electric arc furnace ("EAF") and brass oxide. Juiz de Fora produced 105,832 tonnes of sulfuric acid in 2025, of which 50,170 tonnes were sold, as well as silver concentrate and copper sulfate.

Growth Projects

In addition to our operating assets, we maintain a portfolio of brownfield and greenfield exploration and development projects at various stages of advancement, focused on extending the life of our existing mines and building optionality in copper and zinc.

We have interests in three greenfield projects in Peru (Magistral, Hilarión and Florida Canyon Zinc) as well as a number of prospects in Peru, Brazil, and Namibia. For more information about the projects, please see "Information on the Company—Mining Operations—Mining greenfield projects." We also own 12.15% of the issued and outstanding shares of Tinka Resources Limited, which in turn owns 100% of the Ayawilca zinc-silver development project located 40 kilometers northwest of Cerro de Pasco in the Central Andes region of Peru.

Brownfield growth projects

Our key brownfield growth initiatives are focused on extending the life of existing operations. The most significant is the Cerro Pasco Complex Integration Project, which is designed to integrate the El Porvenir and Atacocha underground mines into a single complex, extending the combined life of mine by over a decade. Total capital expenditures for the project are estimated at US\$148.8 million, of which US\$117.1 million relates to Phase I (tailings pumping and piping system) and US\$31.7 million to Phase II (underground tunnel connection and shaft upgrade). Phase I construction progressed as planned in 2025, with commissioning expected in 2026. In parallel, Phase II preparatory work continued in 2025, including technical assessments of the Picasso shaft and underground integration alternatives to determine the complex's optimal long-term operational configuration. For a full description of the project's scope, phasing and execution status, see "Information on the Company—Mining operations—Cerro Pasco Complex—Integration Project."

Another main brownfield project is the Vazante mine deepening project, which is expected to be completed in 2028, together with related mineral exploration and infrastructure upgrades (e.g., pumping, ventilation, access, and electrical works). Civil works are targeted for completion in 2026 and additional electromechanical work planned for 2027–2028. For additional information, see "Information on the Company—Mining operations—Mining brownfield projects."

Mining greenfield projects

Our greenfield portfolio consists of several exploration and early-stage projects, none of which currently have Mineral Reserves under S-K 1300. The Magistral copper-molybdenum project in Peru encompasses 36 concessions totaling approximately 16,416 hectares. The Hilarión zinc-lead-silver-copper skarn project consists of 48 concessions covering approximately 9,374 hectares. The Florida Canyon Zinc project, a joint venture in which we hold 61% ownership, continues as an advanced exploration project. In Namibia, we closed the sale of the Otavi Project in December 2025 as part of our portfolio optimization strategy. Namibia remains a region of strategic interest, supporting the advancement of copper exploration initiatives in the Kalahari Copper Belt. For additional information, see below "Mining greenfield projects" and "Other Greenfield exploration projects."

MINING OPERATIONS

Map 1. Mines, Projects and Prospects in Peru

Source: Nexa Resources.

Map 2. Mines, Projects and Prospects in Brazil

Source: Nexa Resources.

The following table summarizes our concentrate production, metal contained in concentrate production in each metal and zinc equivalent production in each of our operating mines.

To calculate the zinc equivalent production for the years ended December 31, 2025, 2024, and 2023, we convert the relevant metal contained in concentrate production used in the zinc equivalent grade based on the average benchmark prices for 2025, namely, US\$2,869.66 per tonne (US\$1.30 per pound) for zinc, US\$9,944.94 per tonne (US\$4.51 per pound) for copper, US\$1,963.44 per tonne (US\$0.89 per pound) for lead, US\$40.03 per ounce for silver and US\$3,431.54 per ounce for gold.

	For the Year Ended December 31,		
	2025	2024	2023
Treated Ore (in tonnes)	13,024,510	13,420,966	13,846,530
Mining Production—Metal Contained in Concentrate			
Zinc (in tonnes)	315,648	326,995	333,154
Copper (in tonnes)	33,396	35,698	33,385
Lead (in tonnes)	63,086	69,303	65,194
Silver (in oz)	10,905,969	11,694,073	10,300,672
Gold (in oz)	38,247	36,027	27,627
Mining Production—Zinc Equivalent Production			
Cerro Lindo (in tonnes of zinc equivalent)	248,009	264,682	239,680
Vazante (in tonnes of zinc equivalent)	134,774	147,945	154,682
El Porvenir (in tonnes of zinc equivalent)	142,258	144,264	144,078
Atacocha (in tonnes of zinc equivalent)	49,934	46,632	44,360
Aripuanã (in tonnes of zinc equivalent)	97,422	91,821	58,507
Morro Agudo ⁽¹⁾ (in tonnes of zinc equivalent)	-	9,778	35,463
Total	672,397	705,122	676,769

(1) Considers only the four months of operations from January to April 2024. On April 30, 2024, we sold the Morro Agudo Complex.

The following table summarizes the average ore grade for the periods indicated.

	For the Year Ended December 31,		
	2025	2024	2023
Average Ore Grade			
Zinc (%)	2.85	2.90	2.90
Copper (%)	0.34	0.35	0.34
Lead (%)	0.62	0.67	0.66
Silver (in ounces per tonne)	1.101	1.159	1.002
Gold (in ounces per tonne)	0.006	0.006	0.005

We have determined that our material properties are Cerro Lindo, Vazante, Cerro Pasco Complex (El Porvenir and Atacocha mines) and Aripuanã. Each of these mining properties consists of one mine, one treatment plant and related infrastructure. We summarize below information as of December 31, 2025, for each of our five mines.

Mineral Reserves and Resources

Registrants engaged in mining operations must comply with Regulation S-K Subpart 1300 ("S-K 1300" or the "SEC Mining Modernization Rules"), which came into force on January 1, 2021. S-K 1300 governs the mineral property disclosure requirements for mining registrants. For the meanings of certain technical terms used in this prospectus, see "Additional Information—Glossary."

As a reporting issuer in Canada, we are also subject to Canadian National Instrument 43-101—*Standards of Disclosure for Mineral Projects* ("NI 43-101"), which is an instrument administered by the provincial and territorial securities regulatory authorities that governs how issuers in Canada disclose scientific and technical information about their mineral projects to the public. NI 43-101 imposes certain requirements in respect of such disclosure, including the requirement to have prescribed information prepared by, or under the supervision of, a Qualified Person and the filing of NI 43-101 technical reports in the prescribed circumstances. Any reference to a NI 43-101 report is for informational purposes only, and such reports are not incorporated herein by reference.

Descriptions in this report of our mineral deposits prepared in accordance with S-K 1300, as well as similar information provided by other issuers in accordance with S-K 1300, may not be comparable to similar information prepared in accordance with NI 43-101 that is presented elsewhere outside of this report.

The Qualified Persons that have reviewed and approved the scientific and technical information contained in this annual report are identified in the footnotes to the tables summarizing the Mineral Reserves and Resources estimates below. For the meanings of certain technical terms used in this report, see "Additional information—Glossary."

We periodically update our reserves and resources estimates when we have new geological data, economic assumptions or when mining plans become available. During 2025, we performed an analysis of our reserves and resources estimates for certain operations, resulting in updated estimates as of December 31, 2025. Reserves and resources estimates for each operation assume that we either have or expect to obtain all the necessary rights and permits to mine, extract and process mineral reserves or resources at each mine. Where we own less than 100% of the operation, reserves and resources estimates have been adjusted to reflect our ownership interest. Certain figures in the tables, discussions and notes have been rounded. For a description of risks relating to our estimates of Mineral Reserves and Resources, see “Risk factors—Risks related to our Mineral Reserves and Resources.”

Consolidated Overview

The total Consolidated Mineral Reserves and Mineral Resources estimates are based on the definitions for Mineral Reserves and Mineral Resources in SK-1300 and the tables below are based on costs and modifying factors from all operating mines, and zinc and copper projects.

Consolidated - Year End Mineral Reserves as of December 31, 2025 (on an attributable ownership basis) ⁽¹⁾⁽²⁾

Class	Tonnage ⁽³⁾ (Mt)	Grade ⁽³⁾					Contained Metal ⁽³⁾				
		Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Gold (g/t)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Gold (koz)
Proven	37.09	3.25	0.32	28.2	0.53	0.06	1,205.9	117.7	33,593	197.7	65.9
Probable	67.17	3.86	0.20	36.9	1.00	0.11	2,592.6	131.8	79,599	669.5	237.0
Total	104.27	3.64	0.24	33.8	0.83	0.09	3,798.5	249.5	113,192	867.2	302.9

Notes:

1. Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions.
2. The point of reference for Mineral Reserves in this table is mill feed materials.
3. Numbers may not add due to rounding.

Consolidated - Year End Mineral Reserves as of December 31, 2025 (on a 100% ownership basis) ⁽¹⁾⁽²⁾

Class	Tonnage ⁽³⁾ (Mt)	Grade ⁽³⁾					Contained Metal ⁽³⁾				
		Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Gold (g/t)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Gold (koz)
Proven	42.01	3.11	0.33	28.7	0.52	0.05	1,307.2	139.1	38,697	220.0	70.8
Probable	73.08	3.75	0.21	37.4	0.97	0.11	2,739.4	152.1	87,970	706.9	251.6
Total	115.09	3.52	0.25	34.2	0.81	0.09	4,046.6	291.2	126,667	926.8	322.4

Notes:

1. Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions.
2. The point of reference for Mineral Reserves in this table is mill feed materials.
3. Numbers may not add due to rounding.

Consolidated - Net Difference in Mineral Reserves between December 31, 2025, versus December 31, 2024 (on an attributable ownership basis)

Class	Tonnage		Zinc		Copper		Contained Metal Silver		Lead		Gold	
	(Mt)	%	(kt)	%	(kt)	%	(koz)	%	(kt)	%	(koz)	%
Proven	(1.07)	(2.8)	(27.3)	(2.2)	(25.6)	(17.9)	(2,238)	(6.2)	(16.3)	(7.6)	(4.2)	(8.3)
Probable	5.75	9.4	(3.1)	(0.1)	15.5	13.4	(304)	(0.4)	(31.8)	(4.5)	(3.9)	(2.2)
Total	4.67	4.7	(30.4)	(0.8)	(10.0)	(3.9)	(2,543)	(2.2)	(48.1)	(5.6)	(8.2)	(3.6)

Consolidated - Net Difference in Mineral Reserves between December 31, 2025, versus December 31, 2024 (on a 100% ownership basis)

Class	Tonnage		Zinc		Copper		Contained Metal Silver		Lead		Gold	
	(Mt)	%	(kt)	%	(kt)	%	(koz)	%	(kt)	%	(koz)	%
Proven	(1.52)	(3.5)	(33.0)	(2.5)	(30.2)	(17.8)	(2,611)	(6.3)	(18.5)	(7.8)	(4.5)	(8.5)
Probable	6.34	9.5	4.7	0.2	18.5	13.8	(192)	(0.2)	(34.7)	(4.7)	(4.9)	(2.7)
Total	4.83	4.4	(28.3)	(0.7)	(11.7)	(3.9)	(2,802)	(2.2)	(53.2)	(5.4)	(9.4)	(4.0)

In comparison to 2024, Consolidated Mineral Reserves increased by 4.4% in mass to total 115.1Mt from 110.3Mt, mainly attributed to increases in El Porvenir, Cerro Lindo and Vazante mines reflecting mineral resources conversion drilling, along with an increase at the Cerro Pasco Complex resulting from the metal price update, while decreased by 0.7% in zinc content (kt), mainly due to a decline in Cerro Lindo and Aripuanã mines driven by mineral reserves depletion replaced by lower grade material at both mines and a review in geotechnical parameters at Aripuanã. Total Mineral Reserve depletion during 2025 accounted for 13.1Mt containing 370.2kt of zinc.

Consolidated - Year End Mineral Resources as of December 31, 2025 (on an attributable ownership basis) (1)(2)(3)

Class	Tonnage ⁽⁴⁾ (Mt)	Grade ⁽⁴⁾					Contained Metal ⁽⁴⁾				
		Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Gold (g/t)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Gold (koz)
Measured	5.72	2.69	0.32	29.2	0.55	0.08	154.0	18.3	5,373	31.6	15.5
Indicated	16.47	3.34	0.17	33.0	0.83	0.14	549.5	28.7	17,476	136.6	72.9
Total	22.19	3.17	0.21	32.0	0.76	0.12	703.5	47.0	22,849	168.2	88.3
Inferred	89.33	3.86	0.25	45.9	0.97	0.26	3,445.3	227.2	131,727	865.4	735.1

Notes:

1. Subpart 1300 of Regulation S-K definitions were followed for Mineral Resources, which also are consistent with the CIM (2014) definitions.
2. Mineral Resources are reported exclusive of those Mineral Resources that were converted to Mineral Reserves, and Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.
3. The point of reference for Mineral Resources in this table is mill feed materials.
4. Numbers may not add due to rounding.

Consolidated - Year End Mineral Resources as of December 31, 2025 (on a 100% ownership basis) (1)(2)(3)

Class	Tonnage ⁽⁴⁾ (Mt)	Grade ⁽⁴⁾					Contained Metal ⁽⁴⁾				
		Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Gold (g/t)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Gold (koz)
Measured	6.69	2.60	0.32	29.6	0.55	0.08	174.1	21.7	6,354	37.1	17.7
Indicated	18.53	3.18	0.18	33.4	0.82	0.13	589.8	32.8	19,910	151.3	79.8
Total	25.22	3.03	0.22	32.4	0.75	0.12	763.9	54.6	26,265	188.4	97.5
Inferred	95.82	3.81	0.26	47.4	0.97	0.25	3,650.6	246.6	145,892	931.5	769.5

Notes:

1. Subpart 1300 of Regulation S-K definitions were followed for Mineral Resources, which also are consistent with the CIM (2014) definitions.
2. Mineral Resources are reported exclusive of those Mineral Resources that were converted to Mineral Reserves, and Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.
3. The point of reference for Mineral Resources in this table is mill feed materials.
4. Numbers may not add due to rounding.

Consolidated - Net Difference in Mineral Resources between December 31, 2025, versus December 31, 2024 (on an attributable ownership basis)

Class	Tonnage		Zinc		Copper		Contained Metal Silver		Lead		Gold	
	(Mt)	%	(kt)	%	(kt)	%	(koz)	%	(kt)	%	(koz)	%
Measured	(1.44)	(20.1)	(30.7)	(16.6)	(9.5)	(34.1)	(1,758)	(24.6)	(9.0)	(22.2)	(1.6)	(9.2)
Indicated	(1.27)	(7.1)	3.5	0.6	(7.5)	(0.2)	(3,221)	(15.6)	(12.0)	(8.1)	2.6	3.7
Total	(2.71)	(10.9)	(27.2)	(3.7)	(16.9)	(0.3)	(4,979)	(17.9)	(21.0)	(11.1)	1.0	1.2
Inferred	2.22	2.6	(158.8)	(4.4)	1.0	0.0	9,229	7.5	2.0	0.2	180.4	32.5

Consolidated - Net Difference in Mineral Resources between December 31, 2025, versus December 31, 2024 (on a 100% ownership basis)

Class	Tonnage		Zinc		Copper		Contained Metal Silver		Lead		Gold	
	(Mt)	%	(kt)	%	(kt)	%	(koz)	%	(kt)	%	(koz)	%
Measured	(1.76)	(20.9)	(37.9)	(17.9)	(11.3)	(34.1)	(2,157)	(25.3)	(11.2)	(23.1)	(1.4)	(7.3)
Indicated	(1.60)	(7.9)	(4.9)	(0.8)	(8.7)	(0.2)	(3,958)	(16.6)	(15.5)	(9.3)	3.8	5.0
Total	(3.36)	(11.8)	(42.9)	(5.3)	(20.0)	(0.3)	(6,115)	(18.9)	(26.6)	(12.4)	2.4	2.5
Inferred	2.68	2.9	(137.0)	(3.6)	2.0	0.0	11,324	8.4	6.0	0.7	212.6	38.2

In comparison to 2024, consolidated Inferred Mineral Resources increased by 2.9% in mass to total 95.8Mt from 93.8Mt, mainly attributed to exploration drilling at El Porvenir and Vazante, and decreased by 3.6% in zinc content (kt), reflecting the conversion of Inferred Mineral Resources to Mineral Reserves at Cerro Lindo, El Porvenir and Vazante.

In comparison to 2024, Consolidated Measured and Indicated Mineral Resources decreased by 11.8% in mass to total 25.2Mt from 28.6Mt, and by 5.3% in zinc content (kt), due to updated metal prices and conversion of Indicated and Measured Mineral Resources to Mineral Reserves at Atacocha, El Porvenir and Cerro Lindo.

Mineral Reserves

The following table shows our estimates of Attributable Mineral Reserves for our material mining properties as of December 31, 2025, prepared in accordance with Subpart 1300 of Regulation S-K.

	Ownership Interest (%)	Class	Tonnage (1) (Mt)	Grade					Contained Metal

Notes:

* Numbers may not add due to rounding.

* The point of reference for Mineral Reserves in this table is mill feed materials.

* The El Porvenir, Atacocha Underground and Atacocha Open Pit mines are part of the Cerro Pasco Complex.

- (1) The total tonnage and content amounts presented in this table represent our attributable ownership basis.
- (2) The total amounts and content presented in this table have not been adjusted to reflect our ownership interest. The information presented in this table includes 100% of the Mineral Reserve estimates for the property. Please refer to our ownership percentage for the amounts attributable to our ownership interest in the property.
- (3) The Qualified Person for the Mineral Reserves estimate is Cesar Moreno, B.Eng., MAusIMM, our employee. Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions. Mineral Reserves are estimated at an NSR break-even cut-off value of US\$45.66/t processed. Some incremental material with values between US\$30.44/t and US\$45.66/t was included. Mineral Reserves estimates are based on average long-term metal prices of zinc: US\$2,999.30/t (US\$1.36/lb); copper: US\$9,398.60/t (US\$4.26/lb); lead: US\$1,963.53/t (US\$0.89/lb); and silver: US\$29.11/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average head grades are 87.40% for Zn, 82.67% for Cu, 65.22% for Pb, and 68.78% for Ag. A minimum mining width of 5.0 m was used. Dilution and extraction factors are applied based on stope type and location. Bulk density varies depending on mineralization domain.
- (4) The Qualified Person for the Mineral Reserves estimate is Mateus Gomes Ribeiro, B.Eng., MAusIMM, our employee. Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions. Mineral Reserves are estimated at a NSR cut-off value of US\$62.42/t processed. Some incremental material with values between US\$41.32/t and US\$62.42/t was included. Mineral Reserves estimates are based on average long-term metal prices of zinc: US\$2,999.30/t (US\$1.36/lb); lead: US\$1,963.53/t (US\$0.89/lb); and silver: US\$29.11/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average head grades are 84.36% for Zn, 21.08% for Pb, and 42.00% for Ag. A minimum mining width of 2 m was applied.
- (5) The Qualified Person for the Mineral Reserves estimate is Mateus Gomes Ribeiro, B.Eng., MAusIMM, our employee. Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions. Mineral Reserves are estimated at a NSR cut-off value of US\$25.73/t processed. Mineral Reserves estimates are based on average long-term metal prices of zinc: US\$2,999.30/t (US\$1.36/lb); lead: US\$1,963.53/t (US\$0.89/lb); and silver: US\$29.11/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at Vazante Aroeira Tailings average head grades are 67.39% for Zn, 33.63% for Pb and 42.00% for Ag.
- (6) The Qualified Person for the Mineral Reserves estimate is Renzo Suarez, B.Eng., MAusIMM, our employee. Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions. Mineral Reserves were estimated at a NSR cut-off values ranging from US\$72.91/t to US\$74.76/t for SLS areas, and US\$74.04/t to US\$75.89/t for C&F areas depending on the zone. A number of incremental material (with values between US\$46.22/t and US\$48.07/t for SLS and values between US\$47.35/t and US\$49.20/t for C&F mining) was included in the estimates. Mineral Reserves estimates are based on average long-term metal prices of zinc: US\$2,999.30/t (US\$1.36/lb); copper: US\$9,398.60/t (US\$4.26/lb); lead: US\$1,963.53/t (US\$0.89/lb); and silver: US\$29.11/oz; and gold: US\$2,464.12/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average head grade are 89.26% for Zn, 15.62% for Cu, 79.36% for Pb, 62.92% for Ag, and 30.19% for Au. Minimum mining width of 5.0 m for C&F mining and 4.0 m for SLS mining were used for reserves shapes and development design and are reported inclusive of extraction losses and dilution.
- (7) The Qualified Person for the Mineral Reserves estimate is Renzo Suarez, B.Eng., MAusIMM, our employee. Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions. Mineral Reserves were estimated at a NSR cut-off of US\$77.60/t for SLS areas, and US\$78.77/t for C&F areas depending on the zone. A number of incremental material (with values between US\$50.91/t and US\$77.60/t for SLS and values between US\$52.08/t and US\$78.77/t for C&F mining) was included in the estimate. Mineral Reserves estimates are based on average long-term metal prices of zinc: US\$2,999.30/t (US\$1.36/lb); copper: US\$9,398.60/t (US\$4.26/lb); lead: US\$1,963.53/t (US\$0.89/lb); and silver: US\$29.11/oz.. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average head grades 89.20% for Zn, 15.73% for Cu, 80.02% for Pb, and 62.92% for Ag. Minimum mining width of 5.0 m for C&F mining and 4.0 m for SLS mining were used for reserves shapes and development design and are reported inclusive of extraction losses and dilution.
- (8) The Qualified Person for the Mineral Reserves estimate is Renzo Suarez, B.Eng., MAusIMM, our employee. Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions. Mineral Reserves were estimated at a NSR cut-off values of US\$22.91/t. A number of incremental material (with values between US\$16.54/t and US\$22.91/t was included in the estimates. US\$2,999.30/t (US\$1.36/lb); lead: US\$1,963.53/t (US\$0.89/lb); and silver: US\$29.11/oz; and gold: US\$2,464.12/oz . Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average head grades are 70.44% for Zn, 84.03% for Pb, 75.76% for Ag, and 65.46% for Au.

- (9) The Qualified Person for the Mineral Reserves estimate is Cristovao Teofilo dos Santos, B.Eng., FAusIMM, our employee. Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions. A break-even NSR cut-off value is US\$63.86/t processed was estimated from forecasted operating costs and some incremental material between US\$49.56/t and US\$63.86/t was included. A minimum mining width of 4.0 m was used for Bench Stoping and 15.0 m for VRM. The long-term prices derived are in line with the consensus forecasts from banks and independent institutions. Mineral Reserves estimates are based on average long-term metal prices of zinc: US\$2,999.30/t (US\$1.36/lb); copper: US\$9,398.60/t (US\$4.26/lb); lead: US\$1,963.53/t (US\$0.89/lb); and silver: US\$29.11/oz; and gold: US\$2,464.12/oz. Recoveries at LOM average head grades are 89.89% for Zn, 55.62% for Cu, 54.10% for Pb, 68.00% for Ag, and 67.80% for Au.

Mineral Resources

The following table shows our estimates of Attributable Mineral Resources for our material mining properties as of December 31, 2025, prepared in accordance with Subpart 1300 of Regulation S-K.

	Ownership Interest (%)	Class	Tonnage ⁽¹⁾ (Mt)	Grade					Contained Metal				
				Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Gold (g/t)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Gold (koz)

Notes:

* Numbers may not add due to rounding.

* The estimation of Mineral Resources involves assumptions about future commodity prices and technical mining matters. Mineral Resources are reported exclusive of those Mineral Resources that were converted to Mineral Reserves, and Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.

* The point of reference for Mineral Resources in this table is mill feed materials.

* The El Porvenir, Atacocha Underground and Atacocha Open Pit mines are part of the Cerro Pasco Complex.

The following table shows our estimates of Mineral Resources (100% ownership basis) for our material mining properties as of December 31, 2025, prepared in accordance with Subpart 1300 of Regulation S-K.

	Ownership Interest (%)	Class	Tonnage ⁽²⁾ (Mt)	Grade					Contained Metal

Notes:

* Numbers may not add due to rounding.

* The estimation of Mineral Resources involves assumptions about future commodity prices and technical mining matters. Mineral Resources are reported exclusive of those Mineral Resources that were converted to Mineral Reserves, and Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.

* The point of reference for Mineral Resources in this table is mill feed materials.

* The El Porvenir, Atacocha Underground and Atacocha Open Pit mines are part of the Cerro Pasco Complex.

- (1) The total tonnage and content amounts presented in this table represents our attributable ownership basis.
- (2) The tonnage and content amounts presented in this table represents 100% of the Mineral Resources estimates for the property. Please refer to our ownership percentage for the amounts attributable to our ownership interest in the property.
- (3) The Qualified Person for the Mineral Resources estimate is Jerry Huaman Abalos, B.Geo., MAusIMM CP(Geo), our employee. Subpart 1300 of Regulation S-K definitions were followed for Mineral Resources which also are consistent with the CIM (2014) definitions. Mineral Resources are estimated at an NSR cut-off value of US\$45.66/t. Mineral Resources estimates are based on average long-term metal prices of: zinc: US\$3,449.20/t (US\$1.56/lb); copper: US\$10,808.39/t (US\$4.90/lb); lead: US\$2,258.06/t (US\$1.02/lb); and silver: US\$33.48/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average head grades are 87.40% for Zn, 82.67% for Cu, 65.22% for Pb, and 68.78% for Ag. A minimum mining width of 4.0 m was used to create resource shapes. Bulk density varies depending on mineralization domain..

- (4) The Qualified Person for the Mineral Resources estimate is José Antonio Lopes, B.Geo., FAusIMM(Geo), our employee. Subpart 1300 of Regulation S-K definitions were followed for Mineral Resources, which also are consistent with the CIM (2014) definitions. Mineral Resources are estimated at various NSR cut-off values appropriate to the mineralization style and mining method. For Supergene Mineralization (calamine) the resources are estimated at a NSR cut-off value of US\$29.25/t for soil and US\$31.16/t for fresh rock and transition material. For Aroeira Tailings the resources are estimated at a NSR cut-off value of US\$25.73/t and for Hypogene Mineralization (willemite) a cut-off value of US\$62.42/t for all resources shapes. Mineral Resources are estimates are based on average long-term metal prices of zinc: US\$3,449.20/t (US\$1.56/lb); lead: US\$2,258.06/t (US\$1.02/lb); and silver: US\$33.48/oz. Metallurgical recoveries are accounted for NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average hypogene mineralization (willemite) head grades are 84.36% for Zn, 21.08% for Pb, and 42.00% for Ag. Recovery at LOM average supergene mineralization head grade is 55.0% for Zn. Recoveries at LOM average Aroeira Tailings head grades are 67.39% for Zn, 33.63% for Pb and 42.00% for Ag. A minimum thickness of 3.0 m for underground SLS, open pit shell for calamine and above original topography for tailings was applied. Bulk density was assigned based on rock type..
- (5) The Qualified Person for the Mineral Resources estimate is Jerry Huaman Abalos, B.Geo., MAusIMM CP(Geo), our employee. Subpart 1300 of Regulation S-K definitions were followed for Mineral Resources, which also are consistent with the CIM (2014) definitions. Mineral Resources are estimated at NSR cut-off grade values ranging from US\$72.91/t to US\$74.76/t for SLS areas and US\$74.04/t to US\$75.89/t for C&F areas depending on the zone. Mineral Resources estimates are based on average long-term metal prices of zinc: US\$3,449.20/t (US\$1.56/lb); copper: US\$10,808.39/t (US\$4.90/lb); lead: US\$2,258.06/t (US\$1.02/lb); silver: US\$33.48/oz; and gold: US\$2,833.74/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average head grades are 89.26% for Zn, 15.62% for Cu, 79.36% for Pb, 62.92% for Ag, and 30.19% for Au. A minimum mining width of 4.0 m was used for C&F, and a minimum mining width of 3.0 m was used for SLS resource stopes shapes, respectively. Bulk density varies depending on mineralization domain.
- (6) The Qualified Person for the Mineral Resources estimate is Jerry Huaman Abalos, B.Geo., MAusIMM CP(Geo), our employee. Subpart 1300 of Regulation S-K definitions were followed for Mineral Resources, which also are consistent with the CIM (2014) definitions. Mineral Resources are estimated at a NSR cut-off value of US\$77.60/t for SLS, and US\$78.77/t for C&F. Mineral Resources estimates are based on average long-term metal prices of: zinc: US\$3,449.20/t (US\$1.56/lb); copper: US\$10,808.39/t (US\$4.90/lb); lead: US\$2,258.06/t (US\$1.02/lb); and silver: US\$33.48/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average head grades are 89.20% for Zn, 15.73% for Cu, 80.02% for Pb, and 62.92% for Ag. A minimum mining width of 4.0 m was used for C&F, and a minimum mining width of 3.0 m was used for SLS resource stopes shapes, respectively. Density was assigned based on rock type.
- (7) The Qualified Person for the Mineral Resources estimate is Jerry Huaman Abalos, B.Geo., MAusIMM CP(Geo), our employee. Subpart 1300 of Regulation S-K definitions were followed for Mineral Resources, which also are consistent with the CIM (2014) definitions. Mineral Resources are reported within optimized pit shell. Mineral Resources are estimated at a NSR cut-off value of US\$22.91/t. Mineral Resources estimates are based on average long-term metal prices of: zinc: US\$3,449.20/t (US\$1.56/lb); lead: US\$2,258.06/t (US\$1.02/lb); silver: US\$33.48/oz; and gold: US\$2,833.74/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average head grades are 70.44% for Zn, 84.03% for Pb, 75.76% for Ag, and 65.46% for Au. Mineral resources are reported within open pit shell. Density was assigned based on rock type.
- (8) The Qualified Person for the Mineral Resources estimate is José Antonio Lopes, B.Geo., FAusIMM(Geo), our employee. Subpart 1300 of Regulation S-K definitions were followed for Mineral Resources, which also are consistent with the CIM (2014) definitions. Mineral Resources reported using a cut-of value of US\$60.68/t. Mineral Resources estimates are based on average long-term metal prices of: zinc: US\$3,449.20/t (US\$1.56/lb); copper: US\$10,808.39/t (US\$4.90/lb); lead: US\$2,258.06/t (US\$1.02/lb); silver: US\$33.48/oz; and gold: US\$2,833.74/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average head grades are 89.89% for Zn, 55.62% for Cu, 84.10% for Pb, 68.00% for Ag, and 67.80% for Au. A minimum thickness of 3.0 m was used for stopes shapes. Bulk density varies depending on mineralization domain.

The following table shows our estimates of Attributable Mineral Resources for our other operating mines and zinc projects which do not currently have estimated Mineral Reserves as of December 31, 2025, prepared in accordance with Regulation S-K 1300.

	Ownership (%)	Class	Tonnage ⁽¹⁾ (Mt)	Grade					Contained Metal

Notes:

* Numbers may not add due to rounding.

* The estimation of Mineral Resources involves assumptions about future commodity prices and technical mining matters. Mineral Resources are not mineral reserves and do not have demonstrated economic viability.

* The point of reference for Mineral Resources in this table is mill feed materials.

(1) The tonnage and content amounts presented in this table represents our attributable ownership basis.

(2) The tonnage and content amounts presented in this table represents 100% of the Mineral Resources estimates for the property. Please refer to our ownership percentage for the amounts attributable to our ownership interest in the property.

(3) The Qualified Person for the Mineral Resources estimate is José Antonio Lopes, B.Geo., FAusIMM(Geo), our employee. Subpart 1300 of Regulation S-K definitions were followed for Mineral Resources, which also are consistent with the CIM (2014) definitions. Mineral Resources are reported within underground mining shapes and the NSR cut-off values are calculated based on the LOM cost of US\$55.83/t. Mineral Resources estimates are based on average long-term metal prices of: zinc: US\$3,218.90/t (US\$1.46/lb) and lead: US\$2,300.33/t (US\$1.04/lb). Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at the LOM average head grades are 92.5% for Zn and 61.1% for Pb. A minimum thickness of 3.0 m was applied. Density was assigned based on rock type.

- (4) The Qualified Person for the Mineral Resources estimate is Jerry Huaman Abalos, B.Geo., MAusIMM CP(Geo), our employee. Subpart 1300 of Regulation S-K definitions were followed for Mineral Resources, which also are consistent with the CIM (2014) definitions. Mineral Resources are estimated at an NSR cut-off value of US\$45.00/t. Mineral Resources estimates are based on average long-term metal prices of: zinc US\$3,245.91/t (US\$1.47/lb); lead: US\$2,332.46/t (US\$1.06/lb); and silver: US\$22.66/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at the LOM average head grades for Hilarion are 90.00% for Zn, 86.00% for Pb, and 72.00% for Ag. A minimum thickness of 4.0 m was applied. Density was assigned based on rock type.
- (5) The Qualified Person for the Mineral Resources estimate is Jerry Huaman Abalos, B.Geo., MAusIMM CP(Geo), our employee. Subpart 1300 of Regulation S-K definitions were followed for Mineral Resources, which also are consistent with the CIM (2014) definitions. Mineral Resources are estimated at an NSR cut-off value of US\$41.40/t NSR for SLS, US\$42.93/t for C&F and US\$40.61/t for Room & Pillar mine areas. Mineral Resources estimates are based on average long-term metal prices of zinc: US\$2,816.35/t (US\$1.27/lb); lead: US\$2,196.50/t (US\$1.00/lb); and silver: US\$19.38/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at the LOM average head grades for Florida Canyon are 80.00% for Zn, 74.00% for Pb, and 52.00% for Ag. A minimum thickness of 3.0 m was applied. Density was assigned based on rock type.

The following table shows our estimates of Attributable Mineral Resources for our copper project which does not currently have estimated Mineral Reserves as of December 31, 2025, prepared in accordance with Regulation S-K 1300.

	Ownership (%)	Class	Tonnage (1) (Mt)	Grade					Contained Metal				
				Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Molybdenum (%)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Molybdenum (kt)

Notes:

* Numbers may not add due to rounding.

* The estimation of Mineral Resources involves assumptions about future commodity prices and technical mining matters. Mineral Resources are not mineral reserves and do not have demonstrated economic viability.

* The point of reference for Mineral Resources in this table is mill feed materials.

(1) The tonnage and content amounts presented in this table represents our attributable ownership basis.

(2) The tonnage and content amounts presented in this table represents 100% of the Mineral Resources estimates for the property. Please refer to our ownership percentage for the amounts attributable to our ownership interest in the property.

(3) The Qualified Person for the Mineral Resources estimate is Jerry Huaman Abalos, B.Geo., MAusIMM CP(Geo), our employee. Subpart 1300 of Regulation S-K definitions were followed for Mineral Resources, which also are consistent with the CIM (2014) definitions. Mineral Resources are estimated at a pit shell constraint and NSR cut-off value: US\$5.99/t (Porf San Ernesto, Porf. Sara and Porf. H), US\$5.51/t (Mixto), US\$5.48/t (Skarn). Mineral Resources estimates are based on average long-term metal prices of copper: US\$8,272.00/t (US\$3.75/lb); silver: US\$21.34/oz; and molybdenum: US\$21,829.00/t (US\$ 9.90/lb). Metallurgical recoveries are accounted for in the NSR calculations based on metallurgical data and vary from 79.3% in skarn to 92.5% in San Ernesto porphyry for Cu, 51.3% in skarn and 79.2% in San Ernesto porphyry for Mo, and 70.0% for Ag. Density was assigned based on rock type.

Internal Controls Disclosure

We have used well-established quality assurance/quality controls (“QA/QC”) protocols since 2007 for core samples from operating mines and our Brownfield/Greenfield projects. We have used a corporate database (GDMS Fusion) from Datamine since 2017. The current database system has several default laboratory packages for specific Business Units (ore deposit types/countries) with pre-defined preparation and assay methods, reporting units and over-limit methods. All assay dispatches from all mines and projects follows the same protocols for each medium type (core, rock, soil, stream sediment samples). All written protocols are in a corporate internal system that requires revisions and updates every three years.

Nexa Quality Control includes three types of duplicates (pulp, coarse rejects, and half core duplicates), blank controls and certified standards. Inter-laboratory checks are also conducted on an annual basis at certified laboratories. Fusion database has a collection of pre-defined QA/QC charts for each type of control where our parameters for each control are built in. All blanks and certified standards are approved and registered in Fusion by the database administrator. Our protocols for construction and certification of new standards from operating mines and projects include a minimum of ten laboratories and minimum of ten samples per lab in the Round Robin. Laboratories need to be from different continents and only three laboratories from the same group are allowed.

Every mine and advanced project provides a detailed QA/QC report at least once a year, which is appended to the updated mineral resources technical reports prepared by our engineers.

With respect to the verification of analytical procedures, we conduct periodic reviews of the QA/QC programs to ensure that an adequate level of quality is maintained in the process of sampling, preparing and testing drill core samples and that the QA/QC programs are designed and implemented to prevent or detect contamination and allow analytical precision and accuracy to be quantified. Our internal qualified person performed this review and concluded that our QA/QC programs meet or exceed industry standards, and the data are suitable for Mineral Resources and Mineral Reserves purposes.

Internally, regular data verification workflows are conducted to ensure the collection of reliable data. Coordinates, core logging, surveying, and sampling are monitored by exploration, mine geologists, and verified routinely for consistency.

The Mineral Resource and Mineral Reserve estimates are supported by a review of the recent operation results including operating costs, production, metallurgical performance, and reconciliation. The LOM plan supporting the estimates includes consideration of changes to the permits required, capital costs, tailings capacity and other production constraints. The estimates are subject to normal industry risks including metal prices, metallurgical performance and geological modeling. For geological risk we have modeling and estimation procedures following mining industry best practices including drilling, borehole survey, core logging, sampling, and density protocols.

Individual Property Disclosure

We have determined that our material properties are Cerro Lindo, Vazante, Cerro Pasco Complex and Aripuanã. As there has been no material changes in the reported reserves or resources for these mining properties since the last Technical Report Summary filed, we are not including new Technical Report Summaries in connection with this filing. Below is the individual property disclosure for each of these properties.

Cerro Lindo

Location and means of access

The Cerro Lindo mine is an underground, polymetallic mine located in the Chavín District, Chincha Province, Peru, approximately 268 km southeast of Lima and 60 km from the coast. Access from Lima is available via the paved Pan American Highway south to Chincha, and then via an unpaved road up the Topará River valley to the mine site. Internal roadways connect the various mine site components. The approximate coordinates of the mine are 392,780m East and 8,554,165m North, using the Universal Transverse Mercator WGS84 datum and the mine site is located at an average elevation of 2,000 meters above sea level.

History

Several companies have held interests in the Cerro Lindo mine area, including BTX, Phelps Dodge, and Nexa Peru. Exploration work completed to date includes geological mapping, rock chip and soil sampling, trenching, ground geophysical surveys, and exploration, definition, and underground operational core drilling. Feasibility studies were completed in 2002 and 2005, with mine construction commencing in 2006. Formal production started in 2007, and the mine has been operational since that date.

Title, leases and options

All mineral concessions are held in the name of Nexa Peru. The tenure consists of 68 mining concessions totaling approximately 44,171.3 hectares and one beneficiation concession, covering an area of 518.8 hectares.

Nexa Peru currently holds surface rights or easements for the following infrastructure at Cerro Lindo: mine site, access roads, power transmission line and water pipeline for the mine, old and new power transmission lines to Cerro Lindo, desalination plant, water process plant, and the water pipeline from the desalination plant to the mine site. There is sufficient suitable land available within the mineral tenure held by Nexa Peru for tailings disposal, mine waste disposal and installations such as the process plant and related mine infrastructure.

Cerro Lindo is currently subject to payment of royalties. The tax stability agreement expired on December 31, 2021, and the historical applicability thereof is subject to certain disputes with tax authorities. For more information, see “Additional Information—Legal Proceedings—Other legal proceedings.” Nexa Peru is required to pay royalties and special mining tax to the Peruvian government. For more information, see “Information on the Company—Regulatory matters—Peruvian regulatory framework.” As of December 31, 2025, Nexa Peru held a seawater extraction license, granted under Administrative Resolution No. 0033-2012-ANA-ALA MOC, for a total volume of 3,153,600 m³ per year.

Cerro Lindo holds a number of permits in support of the current operations. The permits are Resolutions issued by the Peruvian authorities upon approval of mining environmental impact assessments filed by the mining companies. Nexa Peru maintains an up-to-date record of the legal permits obtained to date.

Mineralization and Exploration

Cerro Lindo is classified as a volcanogenic massive sulfide (“VMS”) deposit. The Cerro Lindo deposit is 1,500 meters long, 1,000 meters wide, and has a current vertical development of 470 meters below the surface. Mineralization consists of at least 10 discrete mineralized zones. The Cerro Lindo deposit comprises lens-shaped massive bodies, composed of pyrite (50.0% to 90.0%), yellow sphalerite, brown sphalerite, chalcopyrite, and minor galena. Significant barite is present mainly in the upper portions of the deposit. A secondary-enrichment zone, composed of chalcocite and covellite, has formed near the surface where massive sulfides have oxidized. Silver-rich powdery barite remains at the surface as a relic of sulfide oxidation and leaching.

In 2025, mineral exploration focused on expanding known orebodies southeast of Cerro Lindo, with particular emphasis on confirming the continuity and extensions of mineralization in Orebodies 8B and 8C. During 2025, we completed approximately 5.9 km of diamond drilling in 9 drill holes, divided between surface and underground exploration drillings.

During 2026, we will focus our efforts on geological activities intended to extend the life of the Cerro Lindo mine.

In 2025, we spent US\$3.5 million in exploration expenses for Cerro Lindo. In 2026 we do not expect further mineral exploration activities and have not budgeted for any further activities.

Operations and infrastructure

The Cerro Lindo mine is substantially mechanized, using rubber-tired equipment for all development and production operations. The treatment plant current capacity is approximately 7.3 Mtpy. Production drilling operations have been performed by our personnel using a variety of drilling machines throughout the history of the Cerro Lindo mine. There is no shaft; all access is through 15 portals servicing adits, drifts and declines. Ore is extracted from nine separate ore bodies and delivered to the process plant via a series of conveyors. All ore is commingled during transport to the concentrator stockpile; ore from different ore bodies is not segregated.

We have completed construction of all key infrastructure required for mining and processing operations, including the underground mine, access roads, power lines, water pipelines, the desalination plant, offices and warehouses, accommodations, the process plant/concentrator, conveyor systems, waste rock facilities, temporary ore stockpiles, the paste-fill plant and the dry-stack tailings storage facilities and a fresh seawater pump and pipeline from the desalination plant on the coast to the mine. The national grid supplies electrical power for the mine site.

In 2025, we spent US\$57.3 million on sustaining capital expenditures for Cerro Lindo, primarily associated with mine development.

Production

The Cerro Lindo mine is in the production stage and has a treatment plant capacity of 20,000 tonnes of ore per day. The table below summarizes the Cerro Lindo mine's concentrate production, metal contained in concentrates produced, average grades, cash costs and non-expansion capital expenditures for the periods indicated. Production in 2025 was higher than 2024 primarily as a result of higher treated ore volumes combined with improved metal recovery rates.

	For the Year Ended December 31,		
	2025	2024	2023
Treatment ore (in tonnes)	6,213,172	6,080,038	5,991,156
Average ore grade			
Zinc (%)	1.57	1.62	1.51
Copper (%)	0.51	0.58	0.57
Lead (%)	0.23	0.31	0.31
Silver (ounces per tonne)	0.85	0.93	0.80
Gold (ounces per tonne)	0.002	0.003	0.002
Metal contained in concentrates production			
Zinc (in tonnes)	87,141	86,207	78,209
Copper (in tonnes)	27,081	29,888	28,588
Lead (in tonnes)	10,252	13,891	13,042
Silver (in oz)	3,953,241	4,268,043	3,540,975
Gold (in oz)	4,067	4,904	3,418
Cash Cost, net of by-product credits (in US\$/t)	(1,816.7)	(1,010.6)	(138.6)
Cash Cost, net of by-product credits (in US\$/lb)	(0.82)	(0.46)	(0.06)
Non-Expansion Capital Expenditures (in millions of US\$)	59.6	49.0	43.3

Mineral Reserves and Mineral Resources

The Cerro Lindo Mineral Reserves and Mineral Resources estimates are based on the definitions for Mineral Reserves and Mineral Resources in SK-1300 and the tables below are based on costs and modifying factors from the Cerro Lindo mine.

Cerro Lindo - Year End Mineral Reserves as of December 31, 2025 (on an 83.55% attributable ownership basis) ⁽¹⁾⁽²⁾⁽³⁾

Class	Tonnage ⁽⁴⁾ (Mt)	Grade ⁽⁴⁾					Contained Metal ⁽⁴⁾				
		Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Gold (g/t)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Gold (koz)
Proven	18.47	1.52	0.50	20.3	0.20	-	280.7	93.1	12,036	36.3	-
Probable	14.67	0.99	0.41	22.4	0.19	-	144.8	59.9	10,556	27.4	-
Total	33.14	1.28	0.46	21.2	0.19	-	425.5	153.0	22,592	63.7	-

Notes:

1. Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions.
2. The Qualified Person for the Mineral Reserves estimate is Cesar Moreno, B.Eng., MAusIMM, our employee.
3. The point of reference for Mineral Reserves in this table is mill feed materials.
4. Numbers may not add due to rounding.

Cerro Lindo - Year End Mineral Reserves as of December 31, 2025 (on a 100% ownership basis) (1)(2)(3)

Class	Tonnage ⁽⁴⁾ (Mt)	Grade ⁽⁴⁾					Contained Metal ⁽⁴⁾				
		Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Gold (g/t)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Gold (koz)

Notes:

1. Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions.
2. The Qualified Person for the Mineral Reserves estimate is Cesar Moreno, B.Eng., MAusIMM, our employee.
3. The point of reference for Mineral Reserves in this table is mill feed materials.
4. Numbers may not add due to rounding.

The Cerro Lindo Mineral Reserves are estimated at an NSR cut-off value of US\$45.66/t processed. A number of incremental material (with values between US\$45.66/t and US\$30.44/t) was included. A minimum mining width of 5.0 m was used, inclusive of extraction factors and dilution are applied based on stope type and location. The net smelter return ("NSR") cut-off value is determined using the mineral reserve metal prices, metal recoveries, concentrate transport, treatment, and refining costs, as well as mine operating costs. Metal prices used for Mineral Reserves are based on consensus, long-term forecasts from banks, financial institutions, and other sources. Mineral Reserves estimates are based on average long-term metal prices of zinc: US\$2,999.30/t (US\$1.36/lb); copper: US\$9,398.60/t (US\$4.26/lb); lead: US\$1,963.53/t (US\$0.89/lb); and silver: US\$29.11/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average head grades are 87.40% for Zn, 82.67% for Cu, 65.22% for Pb, and 68.78% for Ag. The current LOM production plan continues to 2032.

Cerro Lindo - Net Difference in Mineral Reserves between December 31, 2025, versus December 31, 2024 (on an 83.55% attributable ownership basis)

Class	Tonnage		Zinc		Copper		Silver		Lead		Gold	
	(Mt)	%	(kt)	%	(kt)	%	(koz)	%	(kt)	%	(koz)	%
Proven	(2.32)	(11.1)	(42.9)	(13.2)	(25.0)	(21.1)	(1,147)	(8.7)	(2.6)	(6.7)	-	-
Probable	2.81	23.7	17.7	13.9	9.4	18.6	1,317	14.3	1.1	4.0	-	-

Cerro Lindo - Net Difference in Mineral Reserves between December 31, 2025, versus December 31, 2024 (on a 100% ownership basis)

Class	Tonnage		Zinc		Copper		Silver		Lead		Gold	
	(Mt)	%	(kt)	%	(kt)	%	(koz)	%	(kt)	%	(koz)	%
Proven	(2.77)	(11.1)	(51.3)	(13.2)	(29.9)	(21.1)	(1,373)	(8.7)	(3.1)	(6.7)	-	-
Probable	3.37	23.7	21.1	13.9	11.2	18.6	1,577	14.3	1.3	4.0	-	-
Total	0.60	1.5	(30.2)	(5.6)	(18.6)	(9.2)	204	0.8	(1.8)	(2.4)	-	-

In comparison to 2024, Cerro Lindo's Mineral Reserves increased by 1.5% in mass to total 39.7Mt from 39.1Mt mainly due to mineral resource conversion, reflecting our drilling campaign and decreased by 5.6% in zinc content (kt), mainly due to mine reserve depletion replaced by lower grade material. Mineral Reserve depletion during 2025 represented 6.3Mt containing 95.9kt of zinc.

Cerro Lindo - Year End Mineral Resources as of December 31, 2025 (on an 83.55% attributable ownership basis) (1)(2)(3)(4)

Class	Tonnage ⁽⁵⁾ (Mt)	Grade ⁽⁵⁾					Contained Metal ⁽⁵⁾

Notes:

1. Subpart 1300 of Regulation S-K definitions were followed for Mineral Resources, which also are consistent with the CIM (2014) definitions.
2. Mineral Resources are reported exclusive of those Mineral Resources that were converted to Mineral Reserves, and Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.
3. The Qualified Person for the Mineral Resources estimate is Jerry Huaman Abalos, B.Geo., MAusIMM CP(Geo), our employee.
4. The point of reference for Mineral Resources in this table is mill feed materials.
5. Numbers may not add due to rounding.

The Cerro Lindo Mineral Resources estimates in the table above were completed using Datamine Studio RM ("Datamine") and Seequent's Leapfrog Geo ("Leapfrog") software. Wireframes for geology and mineralization were constructed in Leapfrog based on geology sections, assay results, lithological information, underground mapping and structural data. Assays were capped to various levels based on exploratory data analysis and then composited to 2.5 m lengths. Wireframes were filled with blocks sub-celled at wireframe boundaries. Blocks were interpolated with grade using the Ordinary Krig ("OK") and Inverse Distance to the cube ("ID³") interpolation algorithms. Block estimates were validated using industry standard validation techniques. Classification of blocks used distance-based and other criteria. Mineral Resources estimates were reported using all the material within resource shapes generated in Deswik Stope Optimizer ("DSO") software. The estimate satisfied the minimum mining width of 4.0 m for resource shapes and used NSR cut-off value of US\$45.66/t. Mineral Resources estimates are based on average long-term metal prices of zinc: US\$3,449.20/t (US\$1.56/lb); copper: US\$10,808.39/t (US\$4.90/lb); lead: US\$2,258.06/t (US\$1.02/lb); and silver: US\$33.48/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average head grades are 87.40% for Zn, 82.67% for Cu, 65.22% for Pb, and 68.78% for Ag.

Cerro Lindo - Net Difference in Mineral Resources between December 31, 2025, versus December 31, 2024 (on an 83.55% attributable ownership basis)

In comparison to 2024, Cerro Lindo's Inferred Mineral Resources decreased by 14.3% in mass and by 27.4% in zinc content (kt), mainly due to the conversion to Mineral Reserves. In comparison to 2024, Cerro Lindo's Measured and Indicated Mineral Resources decreased by 20.4% in mass and by 14.8% in zinc content (kt), mainly due to conversion to Mineral Reserves.

For additional information, see the "Technical Report Summary on the Cerro Lindo Mine," incorporated by reference as Exhibit 15.1 to this annual report.

Vazante

Location and means of access

The Vazante mine is an underground and open pit, polymetallic mine located about 8.5 km from the municipality of Vazante, in the state of Minas Gerais, Brazil. The approximate coordinates of the mine are 17° 57' 33" S and a longitude of approximately 46° 49' 42" W, within Zone 23S of the Universal Transverse Mercator coordinate system (Corrego Alegre Datum) at approximately 306,000m E and 8,016,000m N and the mine area has elevations ranging from 690 to 970 meters above sea level. Access from Brasilia is via federal highway BR-040 toward Paracatu. Internal roadways connect the various mine-site components. Concentrates are trucked about 250 km to the Três Marias smelter. The closest commercial airport is located in Brasilia. The Vazante municipal airport for light aircraft is adjacent to the mine site.

History

Mineralization was initially exploited by artisanal miners during the 1950s. Mechanized open pit mining and underground mining commenced in 1969 and 1983, respectively. The current primary ore types are hydrothermal zinc silicates and willemite. Initial mining operations exploited supergene calamine ores and a mixture of the zinc secondary minerals hemimorphite and smithsonite, which are derived from the weathering of silicate ore.

Title, leases and options

Nexa Brazil owns 100.0% of the Vazante mine. Mineral concessions are divided into core tenements, where the known mineral deposits are located and where we have active mining operations and the surrounding exploration concessions. Nexa Brazil holds three mining concession applications, nine mining concessions, including one group of mining concessions in the core area, totaling 2,339.6 hectares. The group of mining concessions comprises six mining concessions, totaling an area of 742.6 hectares. The Mineral Reserves and Resources are located within the limits of three mining concession applications, two exploration authorizations and four mining concessions with a total area of 1,595.7 hectares, which host the active mining operations. One mining concession (tenement # 14,840/1967), which is part of the group of mining concessions, has the potential to host zinc and lead mineralization, however it does not yet have associated mineral reserves and resources.

Nearby the main area, Nexa Brazil also holds, 23 exploration authorizations totaling 10,769.3 hectares and one right to apply for mining concession totaling 344.5 hectares, in addition to the core tenements. Nexa Brazil holds surface rights sufficient to support the current operations. Some surface rights agreements require annual payments to the owners. Two easements have been granted in support of the mining activities. Sufficient suitable land is available within the mineral tenure held by Nexa Brazil for tailings disposal, mine waste disposal, and installations such as the process plant and related mine infrastructure.

Brazilian companies that hold mining concessions are subject to a royalty payment imposed by the Federal Government. For more information, see “Information on the Company—Regulatory matters—Brazilian regulatory framework—Royalties and other taxes on mining activities.”

Nexa Brazil holds all required licenses for water management and water use in the operations. Nexa Brazil has lodged renewal applications, before the required deadline where applicable, for the water management and use.

The Vazante Operation holds several permits in support of the current operations. The main instrument to regulate the Vazante Operation is a set of operating licenses issued by the COPAM from the state of Minas Gerais. The licenses are active, some of them are under renewal process.

Mineralization and Exploration

The Vazante and Extremo Norte zinc deposits are epigenetic zinc silicate deposits, and Vazante is one of the largest deposits of its type worldwide. Mineralization exists within a sequence of pelitic carbonate rocks belonging to the Serra do Poço Verde formation of the Vazante group. The major structural control is the Vazante fault.

Mineral exploration activities in 2025 were focused on expanding mineralized zones near the existing operation, with the objective of extending the unit’s life of mine. Approximately 14.5 km of diamond drilling were completed across 23 drill holes, with two additional holes currently in progress and expected to be finalized in 2026. The drilling program combined exploratory drilling and extensions of known orebodies, such as Varginha, Lumiadeira, and Vazante Sul, while also advancing the conversion of inferred resources to indicated resources in the *Conexão Sucuri Norte* area.

In 2025, we invested US\$4.8 million in the Vazante exploration program for LOM extension, which included a drilling program and geological activities. For 2026, we have allocated a budget of US\$4.8 million for brownfield drilling and expect to drill 13.2 km.

Operations and infrastructure

The Vazante operation consists of two mechanized underground mines, the Vazante mine and Extremo Norte Mine. The treatment plant current capacity is approximately 1.8 Mtpy, including tailings retreatment. Production drilling operations have been performed by company personnel using a variety of drilling machines throughout the history of the Vazante mine.

The Vazante underground mine has been in operation since 1983 and is a fully mechanized mine using rubber-tired diesel equipment for development and production activities. Access is through two portals for Vazante and one portal for Extremo Norte. As development progresses at Extremo Norte, a connecting drift will be established from Vazante to Extremo Norte.

All infrastructure required for the current mining and processing operations has been constructed and is operational. This includes the underground mines, access roads, power lines, water pipelines, offices and warehouses, a process plant/concentrator, conveyor systems, waste rock facilities, temporary ore stockpiles, and tailings storage facilities.

The power supply to the Vazante operation is provided by one independent 138 kV transmission line that feeds the site and that can provide up to 59 MW. There are two 30/40 MVA and one 18/23 MVA transformers in the surface substation at the Vazante Operation and power is distributed to other areas of the mine at 13.8 kV and 440 V via secondary transformers to power mine equipment. There are two 700 kVA diesel generators on site to provide backup power to pump water out of the Extremo Norte mine zone in case of main line interruption.

In 2025, we spent US\$23.3 million on sustaining capital expenditures for this property, primarily associated with mine development. In addition, we invested US\$0.9 million in capital expenditures related to the LOM extension at Vazante, including US\$0.6 million for the Vazante mine deepening project. For more information, see “Information on the Company—Mining Operations—Growth Projects—Vazante mine deepening project and other Vazante initiatives.”

Production

The Vazante mine is in the production stage and has a treatment plant with a nominal design processing capacity of approximately 5,000 tonnes of ore per day. The table below summarizes the Vazante mine’s concentrate production, metal contained in concentrates produced, average grades, cash costs and non-expansion capital expenditures for the periods indicated. Production in 2025 was lower than 2024 due to a decline in average zinc grades resulting from the operational challenges experienced during the first half of the year.

	For the Year Ended December 31,		
	2025	2024	2023
Treatment ore (in tonnes)	1,753,327	1,769,646	1,633,357
Average ore grade			
Zinc (%)	8.64	9.22	10.19
Lead (%)	0.29	0.28	0.33
Silver (ounces per tonne)	0.60	0.63	0.67
Metal contained in concentrate production			
Zinc (in tonnes)	128,402	140,740	145,662
Lead (in tonnes)	864	947	1,449
Silver (in oz)	414,483	470,090	575,636
Cash cost, net of by-product credits (in US\$/t)	992.8	1,079.2	1,315.8
Cash cost, net of by-product credits (in US\$/lb)	0.45	0.49	0.60
Non-Expansion Capital Expenditures (in millions of US\$)	25.0	25.4	29.1

Mineral Reserves and Mineral Resources

The Vazante Mineral Reserves and Mineral Resources estimates are based on the definitions for Mineral Reserves and Mineral Resources in SK-1300 and the tables below are based on costs and modifying factors from the Vazante mine and Vazante Aroeira Tailings.

Vazante - Year End Mineral Reserves as of December 31, 2025 (on a 100% ownership basis) ⁽¹⁾

Class	Tonnage ⁽²⁾ (Mt)	Grade					Contained Metal				
		Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Gold (g/t)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Gold (koz)
Proven	6.59	7.45	-	10.5	0.20	-	490.8	-	2,219	13.0	-
Probable	8.94	7.26	-	8.2	0.21	-	648.8	-	2,344	19.2	-
Total	15.53	7.34	-	9.1	0.21	-	1,139.6	-	4,563	32.2	-

Notes:

1. Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions.
2. Mineral Reserves data presented in this table represents 100% of the Mineral Reserves estimates for the property. we own 100%.
3. The Qualified Person for the Mineral Reserves estimate is Mateus Gomes Ribeiro, B.Eng., MAusIMM, our employee.
4. Numbers may not add due to rounding.
5. The point of reference for Mineral Reserves in this table is mill feed materials.
6. Mineral Reserves presented in this table include Mineral Reserves from Vazante mine and Vazante Aroeira Tailings.

The Vazante Mineral Reserves estimates in the table above consider actual costs and modifying factors from the Vazante mine and Vazante Aroeira tailings, as well as operational level mine planning and budgeting. The dilution that has been applied is related to the selected mining method. The NSR cut-off value was determined using the mineral reserve metal prices, metal recoveries, transport, treatment, and refining costs, as well as mine operating costs. The Vazante mine Mineral Reserves are estimated at a NSR cut-off value of US\$62.42/t processed. A number of incremental material (with values between US\$41.32/t and US\$62.42/t) was included. A minimum mining width of 2.0 m. Recoveries for the Vazante mine at average head grades are 84.36% for Zn, 21.08% for Pb, and 42.00% for Ag. The Vazante Aroeira Tailings Mineral Reserves estimates in the table above consider actual costs and modifying factors from the Vazante Aroeira tailings, as well as operational level TSF reclaiming plan and budgeting. The Vazante Aroeira Tailings Mineral Reserves are estimated at a NSR cut-off value of US\$25.73/t processed. A minimum mining unit of 10m x 10m x 2m was applied. Recoveries for Vazante Aroeira Tailings at average head grades are 67.39% for Zn, 33.63% for Pb, and 42.00% for Ag. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Long-term metal prices used for Mineral Reserves are based on consensus and long-term forecasts from banks, financial institutions, and other sources. Mineral Reserves estimates are based on average long-term metal prices of zinc: US\$2,999.30/t (US\$1.36/lb); lead: US\$1,963.53/t (US\$0.89/lb); and silver: US\$29.11/oz. The current LOM production plan continues to 2034.

Vazante - Net Difference in Mineral Reserves between December 31, 2025, versus December 31, 2024 (on a 100% ownership basis)

Class	Tonnage		Contained Metal									
	(Mt)	%	Zinc		Copper		Silver		Lead		Gold	
			(kt)	%	(kt)	%	(koz)	%	(kt)	%	(koz)	%
Proven	1.14	20.9	14.0	2.9	-	-	(291)	(11.6)	(1.0)	(7.0)	-	-
Probable	0.64	7.7	(5.5)	(0.8)	-	-	(232)	(9.0)	(1.0)	(4.7)	-	-
Total	1.78	12.9	8.6	0.8	-	-	(523)	(10.3)	(1.9)	(5.6)	-	-

In comparison to 2024, Vazante's Mineral Reserves increased by 12.9% in mass, mainly due to mineral resource conversion, cut of value reduction and higher operational dilution and increased by 0.8% in zinc content (kt), mainly due to mineral resource conversion and cut-off value reduction. Mineral Reserve depletion during 2025 accounted for 1.8Mt containing 154.1kt of zinc.

Vazante - Year End Mineral Resources as of December 31, 2025 (on an 100% ownership basis) ⁽¹⁾

Class	Tonnage ⁽²⁾ (Mt)	Grade					Contained Metal				
		Zinc	Copper	Silver	Lead	Gold	Zinc	Copper	Silver	Lead	Gold
		(%)	(%)	(g/t)	(%)	(g/t)	(kt)	(kt)	(koz)	(kt)	(koz)
Measured	0.51	8.51	-	14.3	0.26	-	43.3	-	235	1.3	-
Indicated	1.95	9.39	-	6.1	0.11	-	183.1	-	380	2.2	-
Total	2.46	9.21	-	7.8	0.14	-	226.4	-	615	3.5	-
Inferred	12.92	8.47	-	11.9	0.20	-	1,094.3	-	4,935	26.2	-

Notes:

1. Subpart 1300 of Regulation S-K definitions were followed for Mineral Resources, which also are consistent with the CIM (2014) definitions.
2. Mineral Resources data presented in this table represents 100% of the Mineral Resources estimates for the property. We own 100% of property.
3. Mineral Resources are reported exclusive of those Mineral Resources that were converted to Mineral Reserves, and Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.
4. The Qualified Person for the Mineral Resources estimate is José Antonio Lopes, B.Geol., FAusIMM(Geo), our employee.
5. Numbers may not add due to rounding.
6. The point of reference for Mineral Resources in this table is mill feed materials.
7. Mineral Resources presented in this table include Mineral Resources from the Vazante mine and Vazante Aroeira Tailings.

The Vazante Mineral Resources estimates in the table above were completed using Datamine and Leapfrog software. The Mineral Resources at Vazante comprise three styles of mineralization. The first style of mineralization is represented by the hypogene (willemite) mineralized zones that are found in the underground portions of the Vazante and Extremo Norte deposits. The second style of mineralization is represented by the supergene (calamine) mineralized zones found in the Cava 3A, Matas dos Paulistas, and Braquiara areas of the Extremo Norte and Vazante deposits. This supergene (calamine) mineralization is referred to at the Vazante Operation as calamine mineralization and comprises a mixture of smithsonite and hemimorphite minerals. The third type of mineralization comprises tailings that are contained within the Aroeira TSF. The material found in the Aroeira tailings comprise a mixture of hypogene (willemite) and supergene (calamine) minerals. Mineral Resources estimates for the underground hypogene (willemite) mineralization are prepared within reporting panels using the native functions and workflows available through the DSO software package considering spatial continuity, a minimum width of 3.0 m and a NSR cut-off value of US\$62.42/t for Hypogene Mineralization (willemite). The Mineral Resources estimates for the supergene (calamine) mineralization are prepared using an open pit shell that considers appropriate metal prices, mining costs, metallurgical recoveries and geotechnical considerations with NSR cut-off value of US\$29.25/t for soil and US\$31.16/t for fresh rock and transition material. The Mineral Resources estimates for the tailings at Vazante are reported considering the material with a NSR value of greater than US\$25.73/t which lies above the original topographic surface. Mineral Resources estimates are based on average long-term metal prices for willemite and Aroeira TSF of zinc: US\$3,449.20/t (US\$1.56/lb); lead: US\$2,258.06/t (US\$1.02/lb); and silver: US\$33.48/oz, and for calamine of zinc: US\$3,250.30/t (US\$1.47/lb). Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average: hypogene head grades are 84.36% for Zn, 21.08% for Pb, and 42.00% for Ag, supergene (calamine) is 55.0% for Zn, and tailings are 67.39% for Zn, 33.63% for Pb, and 42.00% for Ag.

Vazante - Net Difference in Mineral Resources between December 31, 2025, versus December 31, 2024 (on an 100% ownership basis)

Class	Tonnage		Zinc		Copper		Contained Metal Silver		Lead		Gold	
	(Mt)	%	(kt)	%	(kt)	%	(koz)	%	(kt)	%	(koz)	%
Measured	0.05	10.5	1.9	4.5	-	-	(06)	(2.5)	(0.1)	(6.5)	-	-
Indicated	0.52	36.4	38.1	26.2	-	-	155	69.1	0.9	71.4	-	-
Total	0.57	30.1	39.9	21.4	-	-	149	32.1	0.8	31.0	-	-
Inferred	(0.44)	(3.3)	(220.0)	(16.7)	-	-	(133)	(2.6)	(1.2)	(4.2)	-	-

In comparison to 2024, Vazante's Inferred Mineral Resources decreased by 3.3% in mass and by 16.7% in zinc content (kt), mainly due to conversion to Mineral Reserves. In comparison to 2024, Vazante's Measured and Indicated Mineral Resources increased by 30.1% in mass and by 21.4% in zinc content (kt), mainly due to metal prices update.

For additional information, see the “Technical Report Summary on the Vazante Polymetallic Operations,” incorporated by reference as Exhibit 15.3 to this annual report.

Cerro Pasco Complex

The Cerro Pasco Complex consists of the El Porvenir underground mine, which produces zinc, copper, lead, silver and gold; the Atacocha San Gerardo open pit mine, producing zinc, lead, silver and gold; and the Atacocha underground mine, which has been suspended since 2020 and remains under care and maintenance due to our efforts to reduce costs and improve our operational efficiency, through the Cerro Pasco Integration Project which is currently under execution.

The Atacocha and El Porvenir mines are located in Peru, specifically in the province of Pasco, which is a region recognized for its intensive mineral economic activities, where many polymetallic mines have been operating for several decades.

El Porvenir is an underground mine with multiple accesses and a shaft where the mined ore is extracted and where workers and inputs are also transported. There are multiple accesses to the Atacocha underground mine from the surface and the mine is currently connected to the El Porvenir mine through two active tunnels located at 4070 and 3300 levels. These tunnels are used by operators of heavy mine equipment and conventional trucks, as well as for transporting mining crews between the Atacocha surface and the El Porvenir mine.

Currently, production from the Atacocha San Gerardo open pit mine feeds the Atacocha processing plant with a nominal throughput capacity of 4,600 tonnes of ore per day, while production from the El Porvenir underground mine feeds the El Porvenir processing plant with a nominal throughput capacity of 6,700 tonnes of ore per day. The Atacocha processing plant is expected to be decommissioned by 2028, when the Atacocha San Gerardo pit reaches the end of its mine life based on our current depletion schedule.

Integration Project

The Cerro Pasco Complex integration project (the “Integration Project”) involves the continued integration of the El Porvenir and Atacocha underground mines. The Cerro Pasco Complex is a material property for the purposes of S-K 1300 comprising the two mines, El Porvenir and Atacocha. The Integration Project is intended to continue to capture synergies between the two mining operations, as a result of their proximity and operational similarities, with ore from both the underground mines being processed at the El Porvenir processing plant. The goal of the Integration Project is to achieve cost and investment savings, thereby reducing the environmental footprint and extending the combined LOM of the two mines.

The Integration Project has been developed over the past few years, with the first, second, third and fourth stages finishing completion in 2014, 2015, 2016 and 2019, respectively. In 2022, we advanced the Integration Project with an optimization study to evaluate the increase in capacity of our tailings and El Porvenir shaft, in addition to enhancing the El Porvenir processing plant to potentially increase production and extend the LOM of both mines.

In 2023, we continued to advance the technical studies of the Integration Project, aiming to develop a robust organic growth option for the company. The technical studies for the Integration Project covered several areas, from mine planning to projects to sustain and expand production, such as studies for underground interconnection, shaft upgrade, engineering assessments, and key routes to increase capacity to provide a long-term solution for tailings disposal. A Front-End Loading 3 (“FEL3”) study to increase the El Porvenir hoisting was completed in the first quarter of 2023 and a FEL3 tailings pumping system study was also completed in the second quarter of 2023.

In 2024, our Board of Directors, through the Finance Committee, approved the first phase of the Integration Project - the tailings pumping and piping system, following a recommendation from the SCP Committee. We developed an investment plan consisting of two phases that includes constructing a tailings treatment plant and its auxiliary structures at El Porvenir, and the second involves installing a 6 km pipeline (mostly underground) to connect El Porvenir to Atacocha’s tailings storage facility. This initiative will enable the Cerro Pasco Complex to operate for over a decade and is designed to provide a long-term tailings disposal solution for the complex.

In 2025, construction of the tailings pumping and piping system began in July and progressed throughout the year. The first phase timeline remains on track, with commissioning expected in 2026. As part of the Integration Project's first phase, investments to raise the El Porvenir tailings dam and expand Atacocha's tailings storage capacity are still in progress up to elevation 4131, with a new capacity expansion planned to reach elevation 4142 in 2027. In parallel, Phase II preparatory work continued, which includes technical assessments of the Picasso shaft and underground integration to determine the most efficient long-term operational configuration. We also submitted in December 2025 the two major environmental filings required by SENACE, and approvals are expected in the first quarter of 2027.

The total capital expenditures for the project are estimated to be US\$148.8 million, encompassing the capital expenditures for Phase I, which are estimated to be US\$117.1 million. Of this amount, US\$45.2 million has already been invested in 2024 and 2025, and US\$31.4 million is planned to be invested in 2026. The remaining investments will be executed progressively until 2029. Capital expenditures for Phase II, are estimated to be US\$31.7 million, with investments planned from 2027 to 2032, and the highest level of expenditures expected in 2031. During the first phase, we intend to upgrade the tailings facilities at both El Porvenir and Atacocha, as well as improve water and effluent treatment systems, with construction planned for 2027-2028 following the completion of environmental impact assessments. In the second phase, we aim to build an additional 2.3 kilometers underground tunnel at a deeper level to connect the El Porvenir and Atacocha mines and upgrade the El Porvenir shaft, which is expected to unlock access to high-grade mineral resources. Support activities, such as technical reviews, environmental studies, and community engagement, are also progressing as planned. We are confident in the long-term value this project will generate for us and remain focused on its successful execution.

Overall, the Integration Project plan includes several key initiatives, including: (i) the construction of a new tailings pumping and pipeline system, establishing a long-term tailings disposal solution by transporting the tailings from the El Porvenir processing plant to the Atacocha tailings storage facility, extending the operational life of the combined mines; (ii) the development of an additional 2.3 km long connection tunnel (Tunnel 2900), which will connect the Atacocha underground mine to the base of the El Porvenir (Picasso) shaft, allowing ore hoisting and processing at the El Porvenir plant; (iii) the restart and rehabilitation of the Atacocha underground mine, revitalizing operations to improve production capacity; (iv) the closure of the Atacocha processing plant, following the depletion of Atacocha's open pit Mineral Reserves in 2027, resulting in operations being consolidated at El Porvenir; and (v) the expansion of the Picasso shaft capacity to support production and ore extraction from both underground mines. Additional initiatives related to the Integration Project encompass the advancement of the environmental studies and the regulatory permitting process required to support the project's execution.

For further information about our operations, infrastructure, production, and Mineral Reserves and Mineral Resources at the El Porvenir and Atacocha mines, see the "Technical Report Summary on the Cerro Pasco Complex Integration," incorporated by reference as Exhibit 15.2 to this annual report. For additional information on the increase of Mineral Reserves, see "Information on the Company—Mining Operations—El Porvenir—Mineral Reserves and Resources" and "Information on the Company—Mining operations—Atacocha—Mineral Reserves and Resources."

El Porvenir

Location and means of access

The El Porvenir mine is an underground, polymetallic mine (located in the Cerro Pasco Complex) in the central Andes mountains region of Peru, specifically in the district of San Francisco de Asís de Yarusyacán, in the province of Pasco, Peru. The approximate coordinates of the mine are 367600m E, 8826850m N, using the Universal Transverse Mercator WGS84 datum, Z18S and the mine site is located at an average elevation of 4,200 meters above sea level. The mine is situated at kilometer 340 of the Carretera Central Highway (Lima—Huánuco route), 13 km from the city of Cerro de Pasco. The mine is located in the Central Cordillera zone, which contains the communities of Parán, Lacsanga and Santo Domingo de Apache.

History

The El Porvenir mine began its operation as small-scale artisanal mine in 1949. We have been investing in the mine since then, with a current treatment plant capacity of 6,700 tonnes of ore per day. In 2014, we commenced the integration process with the Atacocha mine, as described above in "Information on the Company—Mining Operations—Cerro Pasco Complex—Integration Project."

Title, leases and options

The El Porvenir mine is operated by Nexa Resources El Porvenir S.A.C., a wholly owned subsidiary of Nexa Peru.

The El Porvenir mine has a total of 25 concessions covering approximately 4,846.7 hectares, as well as a beneficiation concession, “Acumulacion Aquiles 101.” With respect to the surface property at El Porvenir mine, there is a mining site of 450.8 hectares, where the mining concession is located, as well as additional surface property where tailings dams/ponds, camps sites and other ancillary infrastructure are located.

Mining operations at the El Porvenir mine are subject to certain royalties payable by Nexa Resources El Porvenir S.A.C. For more information, see “Information on the Company—Regulatory Matters—Peruvian regulatory framework—Royalties and other taxes on mining activities.”

The El Porvenir Mine holds several permits in support of the current operations. The permits are Directorial Resolutions issued by the Peruvian authorities upon approval of mining environmental management instruments filed by the mining companies. Nexa Peru maintains an up-to-date record of the legal permits obtained to date.

Mineralization and Exploration

The El Porvenir mine is a typical skarn deposit. The mineralization occurs within the contact of the upper Triassic limestone (*i.e.*, exoskarn) and the granodioritic-dacitic intrusive rocks (*i.e.*, endoskarn). There are also recognized veins and replacement manto type, minor disseminated mineralization may occur within the intrusive units. West of the Milpo-Atacocha fault within the Goyllarisquizga Group, mineralization is characterized as veins and disseminations. Most of the exploration is generally conducted simultaneously with underground development, which involves diamond core drilling and channel sampling following underground drifting.

Four groups of vein/mineralized structures are reported. Structurally controlled veins are sub-vertical up to 150 meters long, with a vertical extent of 350 meters. Economic mineralogy is mostly comprised of galena, sphalerite, and tetrahedrite, as well as variable and lesser pyrite, quartz and rhodochrosite.

Throughout 2025, the exploration program at El Porvenir was focused on drilling mineralized zones in the Integration Project, seeking to evaluate the mineralization continuity in strike and at depth, with the goal of increasing mineral resources to expand the life of the El Porvenir and Atacocha mines, supporting the long-term sustainability and operational efficiency of the mining complex. In 2025, we drilled 17 drill holes totaling 11.8 km of exploration drilling. In 2026, the exploration drilling strategy will continue to focus on expanding mineral resources and mineral reserves in Integration Project.

We spent approximately US\$3.0 million on the El Porvenir exploration program in 2025, including the drilling program and geological activities. We have budgeted US\$4.2 million for 2026 activities, and we expect to drill 18.5 km in 2026.

Operations and infrastructure

The El Porvenir mine site consists of an underground mine, tailings pond, waste rock stockpiles, a process facility with associated laboratory and maintenance facilities and maintenance buildings for underground and surface equipment. The treatment plant current capacity is approximately 2.4 Mtpy. Facilities and structures include a warehouse, office, change house facilities, main shaft, ventilation shaft, backfill plant, explosives storage area, hydroelectric power generation, power lines and substation, fuel storage tanks, a warehouse and laydown area and a permanent accommodation camp.

El Porvenir is connected to the SEIN, and the power supply to the operation is provided by a 50 kV transmission line that comes from the Milpo Substation, which is connected to the Paragsha II Substation through a 138 kV line (this transmission line provides energy to the entire Cerro Pasco Complex). These power lines are used to deliver power to various locations to support activities during operation of the mine. Additionally, there are three groups of diesel generators (1.25 MW each) as back-up in place.

Site roads include main roads suitable for use by mining trucks that transport concentrates to Lima and service roads for use by smaller vehicles. The site roads are used by authorized mine personnel and equipment, with access controlled by Nexa Peru. An approximately 15-to-20-kilometer network of service roads was constructed to provide access to the underground mine, processing plant, tailings facility, waste rock stockpile, mine offices, workshops, mine camps and other surface infrastructure.

In 2025, we spent US\$87.1 million on sustaining capital expenditures for this property, primarily associated with mine development, TSF (Phase I of the integration project partially included), equipment replacement and other major infrastructure.

Production

The El Porvenir mine is in the production stage and has a treatment plant capacity of 6,700 tonnes of ore per day. The table below summarizes the El Porvenir mine's concentrate production, metal contained in concentrates produced, average grades, cash costs and non-expansion capital expenditures for the periods indicated. for the periods indicated. Production in 2025 was higher than 2024 mainly due to improved average grades.

	For the Year Ended December 31,		
	2025	2024	2023
Treatment ore (in tonnes)	2,157,549	2,205,478	2,220,011
Average ore grade			
Zinc (%)	2.79	2.61	2.86
Copper (%)	0.17	0.14	0.16
Lead (%)	1.37	1.44	1.37
Silver (ounces per tonne)	2.40	2.50	2.34
Gold (ounces per tonne)	0.009	0.010	0.011
Metal contained in concentrate production			
Zinc (in tonnes)	53,064	50,637	55,825
Copper (in tonnes)	372	292	355
Lead (in tonnes)	25,248	26,805	24,937
Silver (in oz)	4,404,451	4,641,676	4,270,463
Gold (in oz)	7,693	7,974	8,696
Cash Cost, net of by-product credits (in US\$/t)	(1,080.4)	185.4	630.6
Cash Cost, net of by-product credits (in US\$/lb)	(0.49)	0.08	0.29
Non-Expansion Capital Expenditures (in millions of US\$)	87.5	77.3	68.6

Mineral Reserves and Mineral Resources

The El Porvenir Mineral Reserves and Mineral Resources estimates are based on the definitions for Mineral Reserves and Mineral Resources in SK-1300 and the tables below are based on costs and modifying factors from the El Porvenir mine.

El Porvenir - Year End Mineral Reserves as of December 31, 2025 (on an 83.55% attributable ownership basis) (1)(2)(3)

Class	Tonnage ⁽⁴⁾ (Mt)	Grade ⁽⁴⁾					Contained Metal ⁽⁴⁾				
		Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Gold (g/t)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Gold (koz)
Proven	3.61	4.35	0.27	69.3	1.06	0.16	157.1	9.8	8,039	38.4	18.7
Probable	9.92	4.16	0.26	64.8	0.96	0.20	412.7	25.3	20,666	95.3	64.2
Total	13.52	4.21	0.26	66.0	0.99	0.19	569.8	35.1	28,704	133.7	83.0

Notes:

- Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions.
- The Qualified Person for the Mineral Reserves estimate is Renzo Suarez, B.Eng., MAusIMM, our employee.
- The point of reference for Mineral Reserves in this table is mill feed materials.
- Numbers may not add due to rounding.

El Porvenir - Year End Mineral Reserves as of December 31, 2025 (on a 100% ownership basis) (1) (2)(3)

Class	Tonnage ⁽⁴⁾ (Mt)	Grade ⁽⁴⁾					Contained Metal ⁽⁴⁾				
		Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Gold (g/t)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Gold (koz)
Proven	4.32	4.35	0.27	69.3	1.06	0.16	188.0	11.8	9,622	45.9	22.4
Probable	11.87	4.16	0.26	64.8	0.96	0.20	494.0	30.3	24,734	114.0	76.9
Total	16.19	4.21	0.26	66.0	0.99	0.19	682.0	42.1	34,356	160.0	99.3

Notes:

1. Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions.
2. The Qualified Person for the Mineral Reserves estimate is Renzo Suarez, B.Eng., MAusIMM, our employee.
3. The point of reference for Mineral Reserves in this table is mill feed materials.
4. Numbers may not add due to rounding.

The El Porvenir Mineral Reserves estimates in the table above were prepared using DSO software, mine design and scheduling software. Mining methods used are Cut-and-Fill (“C&F”) mining, using unconsolidated rock fill and hydraulic backfill, and Sublevel Stope (“SLS”) using unconsolidated rock fill. NSR values were calculated using mineral reserve metal prices, metallurgical recovery, and consideration of smelter terms, including revenue from payable metals, price participation, penalties, smelter losses, transportation, treatment, refining, and sales charges. A minimum mining width of 5.0 m for C&F mining and 4.0 m for SLS mining were used for reserves shapes and development design and are reported to be inclusive of extraction losses and dilution. Mineral Reserves were estimated at a NSR cut-off values ranging from US\$72.91/t to US\$74.76/t for SLS areas, and US\$74.04/t to US\$75.89/t for C&F areas depending on the zone. A number of incremental material (with values between US\$46.22/t and US\$48.07/t for SLS and values between US\$47.35/t and US\$49.20/t for C&F mining) was included in the estimates. Mineral Reserves estimates are based on average long-term metal prices of zinc: US\$2,999.30/t (US\$1.36/lb); copper: US\$9,398.60/t (US\$4.26/lb); lead: US\$1,963.53/t (US\$0.89/lb); and silver: US\$29.11/oz; and gold: US\$2,464.12/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average head grades are 89.26% for Zn, 15.62% for Cu, 79.36% for Pb, 62.92% for Ag, and 30.19% for Au. The current LOM production plan continues to 2036.

El Porvenir - Net Difference in Mineral Reserves between December 31, 2025, versus December 31, 2024 (on an 83.55% attributable ownership basis)

In comparison to 2024, El Porvenir's Mineral Reserves increased by 6.3% in mass and increased by 8.0% in zinc content (kt). The increase in mass was mainly due to mineral resources conversion drilling. Mineral Reserve depletion during 2025 accounted for 2.2Mt containing 61.9kt of zinc.

El Porvenir - Year End Mineral Resources as of December 31, 2025 (on an 83.55% Attributable ownership basis) (1)(2)(3)(4)

Class	Tonnage ⁽⁵⁾ (Mt)	Grade ⁽⁵⁾					Contained Metal ⁽⁵⁾

Notes:

- Subpart 1300 of Regulation S-K definitions were followed for Mineral Resources, which also are consistent with the CIM (2014) definitions.
- Mineral Resources are reported exclusive of those Mineral Resources that were converted to Mineral Reserves, and Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.
- The Qualified Person for the Mineral Resources estimate is Jerry Huaman Abalos, B.Geo., MAusIMM CP(Geo), our employee.
- Numbers may not add due to rounding.
- The point of reference for Mineral Resources in this table is mill feed materials.

The El Porvenir Mineral Resources estimates in the table above were completed using Datamine and Leapfrog software. Wireframes for geology and mineralization were constructed in Leapfrog based on geology sections, assay results, lithological information, underground mapping and structural data. Assays were capped to various levels based on exploratory data analysis and then composited to 1.0 m lengths. Wireframes were filled with blocks and sub-celling at wireframe boundaries. Blocks were interpolated with grade using the OK and ID³ interpolation algorithms. Block estimates were validated using industry standard validation techniques. Classification of blocks used distance-based and mineralization continuity criteria. Mineral Resources are reported using all the material within resource shapes generated in DSO software, satisfying minimum mining width of 4.0 m in areas with C&F stopes shapes and 3.0 m for SLS stopes. The Mineral Resources are estimated at a NSR cut-off grade values ranging from US\$72.91/t to US\$74.76/t for SLS areas and US\$74.04/t to US\$75.89/t for C&F areas depending on the zone. Mineral Resources estimates are based on average long-term metal prices of zinc: US\$3,449.20/t (US\$1.56 /lb); copper: US\$10,808.39/t (US\$4.90/lb); lead: US\$2,258.06/t (US\$1.02/lb); silver: US\$33.48/oz; and gold: US\$ 2,833.74/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average head grades are 89.26% for Zn, 15.62% for Cu, 79.36% for Pb, 62.92% for Ag, and 30.19% for Au.

El Porvenir - Net Difference in Mineral Resources between December 31, 2025, versus December 31, 2024 (on an 83.55% attributable ownership basis)

In comparison to 2024, El Porvenir's Inferred Mineral Resources increased by 32.5% in mass and increased by 33.4% in zinc content (kt), mainly due to exploration brownfield drilling. In comparison to 2024, El Porvenir's Measured and Indicated Mineral Resources decreased by 27.2% in mass and by 26.6% in zinc content (kt), mainly due to conversion to Mineral Reserves.

For additional information, see the "Technical Report Summary on the Cerro Pasco Complex Integration," incorporated by reference as Exhibit 15.2 to this annual report.

Atacocha

Location and means of access

Atacocha is a polymetallic underground and open pit mine (located in the Cerro Paso Complex) in the district of San Francisco de Asís de Yarusyacán, in the province of Pasco, Peru. The property is located at approximate coordinates of 367160m E, 8,830,400m N, using the UTM WGS84 datum, Z18S and approximately 4,050 meters above sea level.

History

The Atacocha mine began its operation as small-scale artisanal mine in 1936. We have been investing in the mine since then and, in 2012, production reached its current capacity of 4,600 tonnes per day. In 2014, we commenced the Integration Project with the El Porvenir mine, as described above in “Information on the Company—Mining operations—Cerro Pasco Complex—Integration Project.” Atacocha’s underground operations have been suspended since 2020 and remain under care and maintenance. In the fourth quarter of 2024, our Board of Directors, through the Finance Committee approved the first phase of the Integration Project – the tailings pumping and piping system, following the recommendation from the SCP Committee. Constructions began in 2025, and the timeline remains on track, with commissioning expected by the end of 2026.

Title, leases and options

The Atacocha mine is operated by Nexa Resources Atacocha S.A.A., a subsidiary of Nexa Peru.

The Atacocha mine has a total of 147 concessions covering approximately 2,872.5 hectares, as well as a beneficiation concession, “Chicrin N° 2.” With respect to the surface property at the Atacocha mine, there is a mining site of 1,343.0 hectares, where the mining concession is located, as well as additional surface property where tailings dams/ponds, camps sites and other ancillary infrastructure are located. There are royalties payable in respect of mining operations at the Atacocha mine for the mining concessions held by Nexa Resources Atacocha S.A.A. For more information, see “Information on the Company—Regulatory matters—Peruvian regulatory framework—Royalties and other taxes on mining activities.”

The Atacocha mine holds a number of permits in support of the current operations. The permits are Directorial Resolutions issued by the Peruvian authorities upon approval of mining environmental management instruments filed by the mining companies. Nexa Peru maintains an up-to-date record of the legal permits obtained to date.

Mineralization and Exploration

The Atacocha deposit contains skarn, replacement, or hydrothermal vein/breccia type of mineralization. Skarn mineralization, generally associated with the Santa Bárbara stock or San Gerardo stock, formed first, and was followed by the hydrothermal mineralization. Skarn zones developed within the Pucara Group sediments around the Santa Bárbara stock are associated with Zn, Pb, Ag, and Bi. Replacement mineralization, together with hydrothermal veins and polymictic breccias containing Ag, Pb, Zn mineral assemblages, occurs between the San Gerardo stock and Fault 1.

In 2025, we spent approximately US\$0.3 million on the Atacocha brownfield program for exploration maintenance. We have budgeted US\$0.3 million for maintenance in 2026.

Operations and infrastructure

Atacocha operates two mines: the Atacocha underground mine and the San Gerardo open pit mine. The underground mine is currently suspended due to our efforts to reduce costs and improve our operational efficiency and remains under care and maintenance. However, mining continues in the San Gerardo open pit mine. Both mining operations feed the Atacocha processing plant. The treatment plant current capacity is approximately 1.6 Mtpy.

As part of the Pasco Complex, the electrical power supply for the Atacocha mine is also provided by a 138 kV line that comes from the Paragsha II Substation, which later connects to the Chicrin Substation and a 50 kV transmission line. This structure is used to deliver power to various locations to support activities during operation of the mine.

In 2025, we spent US\$15.5 million on sustaining capital expenditures for this property, primarily associated with TSF (Phase I of the integration project included), equipment replacement and other major infrastructure.

Production

The Atacocha mine has a treatment plant capacity of 4,600 tonnes of ore per day. The table below summarizes the Atacocha mine's concentrate production, metal contained in concentrates produced, average grades, cash costs and non-expansion capital expenditures for the periods indicated. Production in 2025 was higher than in 2024 due to higher average grades and improved metal recoveries.

	For the Year Ended December 31,		
	2025	2024	2023
Treatment ore (in tonnes)	1,452,855	1,511,875	1,397,192
Average ore grade			
Zinc (%)	1.00	0.90	0.77
Lead (%)	1.09	0.95	0.93
Silver (ounces per tonne)	0.97	1.03	1.21
Gold (ounces per tonne)	0.012	0.011	0.010
Metal contained in concentrate production			
Zinc (in tonnes)	11,877	10,404	8,193
Lead (in tonnes)	13,734	12,295	11,116
Silver (in oz)	1,176,084	1,212,952	1,399,681
Gold (in oz)	10,250	9,113	7,559
Cash cost, net of by-product credits (in US\$/t)	(4,167.5)	(1,431.2)	(959.7)
Cash cost, net of by-product credits (in US\$/lb)	(1.89)	(0.65)	(0.44)
Non-Expansion Capital Expenditures (in millions of US\$)	15.7	13.1	16.2

Mineral Reserves and Mineral Resources (Atacocha Underground)

The Atacocha Underground Mineral Reserves and Mineral Resources estimates are based on the definitions for Mineral Reserves and Mineral Resources in SK-1300 and the tables below are based on costs and modifying factors from the Atacocha Underground mine.

Atacocha Underground - Year End Mineral Reserves as of December 31, 2025 (on an 83.01% attributable ownership basis) (1)(2)(3)

Class	Tonnage ⁽⁴⁾ (Mt)	Grade ⁽⁴⁾					Contained Metal ⁽⁴⁾				
		Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Gold (g/t)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Gold (koz)
Proven	1.65	3.70	0.33	81.2	1.44	-	60.9	5.4	4,297	23.7	-
Probable	3.89	4.24	0.45	75.6	1.24	-	164.7	17.5	9,441	48.2	-
Total	5.53	4.08	0.41	77.2	1.30	-	225.7	22.9	13,738	71.9	-

Notes:

1. Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions.
2. The Qualified Person for the Mineral Reserves estimate is Renzo Suarez, B.Eng., MAusIMM, our employee.
3. The point of reference for Mineral Reserves in this table is mill feed materials.
4. Numbers may not add due to rounding.

Atacocha Underground - Year End Mineral Reserves as of December 31, 2025 (on a 100% ownership basis)(1) (2)(3)

Class	Tonnage ⁽⁴⁾ (Mt)	Grade ⁽⁴⁾					Contained Metal ⁽⁴⁾				
		Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Gold (g/t)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Gold (koz)
Proven	1.98	3.70	0.33	81.2	1.44	-	73.4	6.5	5,176	28.6	-
Probable	4.68	4.24	0.45	75.6	1.24	-	198.5	21.1	11,374	58.0	-
Total	6.66	4.08	0.41	77.2	1.30	-	271.8	27.6	16,550	86.6	-

Notes:

1. Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions.
2. The Qualified Person for the Mineral Reserves estimate is Renzo Suarez, B.Eng., MAusIMM, our employee.
3. The point of reference for Mineral Reserves in this table is mill feed materials.
4. Numbers may not add due to rounding.

The Atacocha Underground Mineral Reserves estimates in the table above were prepared using DSO software, mine design and scheduling software. Mining methods used are C&F mining, using unconsolidated rock fill and hydraulic backfill, and SLS using unconsolidated rock fill. NSR values were calculated using mineral reserve metal prices, metallurgical recovery, and consideration of smelter terms, including revenue from payable metals, price participation, penalties, smelter losses, transportation, treatment, refining, and sales charges. A minimum mining width of 5.0m for C&F mining and 4.0 m for SLS mining were used for reserves shapes and development design and are reported inclusive of extraction losses and dilution. The Mineral Reserves were estimated at a NSR cut-off of US\$77.60/t for SLS areas, and US\$78.77/t for C&F areas depending on the zone. A number of incremental material (with values between US\$50.91/t and US\$77.60/t for SLS and values between US\$52.08/t and US\$78.77/t for C&F mining) was included in the estimate. Mineral Reserves estimates are based on average long-term metal prices of zinc: US\$2,999.30/t (US\$1.36/lb); copper: US\$9,398.60/t (US\$4.26/lb); lead: US\$1,963.53/t (US\$0.89/lb); and silver: US\$29.11/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average head grades are 89.20% for Zn, 15.73% for Cu, 80.02% for Pb, and 62.92% for Ag. The current LOM production plan begins in 2029 and continues to 2036.

Atacocha Underground - Net Difference in Mineral Reserves between December 31, 2025 (on an 83.01% attributable ownership basis), versus December 31, 2024 (on an 81.78% attributable ownership basis)

Class	Tonnage		Zinc		Copper		Contained Metal Silver		Lead		Gold	
	(Mt)	%	(kt)	%	(kt)	%	(koz)	%	(kt)	%	(koz)	%
Proven	0.18	12.5	3.2	5.6	0.6	12.7	243	6.0	0.9	4.1	-	-
Probable	0.55	16.4	13.4	8.8	3.3	23.0	1,225	14.9	5.7	13.5	-	-
Total	0.73	15.2	16.6	7.9	3.9	20.4	1,469	12.0	6.7	10.2	-	-

Atacocha Underground - Net Difference in Mineral Reserves between December 31, 2025, versus December 31, 2024 (on a 100% ownership basis)

Class	Tonnage		Zinc		Copper		Contained Metal Silver		Lead		Gold	
	(Mt)	%	(kt)	%	(kt)	%	(koz)	%	(kt)	%	(koz)	%
Proven	0.19	10.9	2.8	4.0	0.6	11.0	220	4.4	0.7	2.5	-	-
Probable	0.60	14.7	13.4	7.2	3.7	21.1	1,327	13.2	6.1	11.8	-	-
Total	0.79	13.5	16.2	6.3	4.3	18.6	1,547	10.3	6.9	8.6	-	-

In comparison to 2024, Atacocha's Underground Mineral Reserves increased by 13.5% and increased by 6.3% in zinc content (kt), mainly due to the metal price update.

Atacocha Underground - Year End Mineral Resources as of December 31, 2025 (on an 83.01% attributable ownership basis) (1)(2)(3)(4)

Class	Tonnage ⁽⁵⁾ (Mt)	Grade ⁽⁵⁾					Contained Metal ⁽⁵⁾

Inferred	0.28	3.4	20.0	6.0	4.1	0.1	1,561	7.7	4.5	4.5	-	-

In comparison to 2024 based on a 100% ownership basis, Atacocha's Underground Inferred Mineral Resources increased by 3.4% in mass and by 6.0% in zinc content (kt), mainly due to metal prices update. In comparison to 2024 based on a 100% ownership basis, Atacocha's Underground Measured and Indicated Mineral Resources decreased by 16.7% in mass and by 18.1% in zinc content (kt), mainly due to conversion to Mineral Reserves.

For additional information, see the "Technical Report Summary on the Cerro Pasco Complex Integration," incorporated by reference as Exhibit 15.2 to this annual report.

Mineral Reserves and Mineral Resources (Atacocha Open Pit)

The Atacocha Open Pit Mineral Reserves and Mineral Resources estimates are based on the definitions for Mineral Reserves and Mineral Resources in SK-1300 and the tables below are based on costs and modifying factors from the Atacocha Open Pit mine.

Atacocha Open Pit - Year End Mineral Reserves as of December 31, 2025 (on an 83.01% attributable ownership basis) (1)(2)(3)

Class	Tonnage ⁽⁴⁾ (Mt)	Grade ⁽⁴⁾					Contained Metal ⁽⁴⁾				
		Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Gold (g/t)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Gold (koz)
Proven	1.10	1.17	-	37.4	1.21	0.17	12.9	-	1,330	13.4	6.1
Probable	1.35	1.19	-	33.0	1.21	0.22	16.1	-	1,426	16.3	9.4
Total	2.45	1.18	-	35.0	1.21	0.20	29.0	-	2,756	29.7	15.5

Notes:

1. Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions.
2. The Qualified Person for the Mineral Reserves estimate is Renzo Suarez, B.Eng., MAusIMM, our employee.
3. The point of reference for Mineral Reserves in this table is mill feed materials.
4. Numbers may not add due to rounding.

Atacocha Open Pit - Year End Mineral Reserves as of December 31, 2025 (on a 100% ownership basis) (1) (2)(3)

Class	Tonnage ⁽⁴⁾ (Mt)	Grade ⁽⁴⁾					Contained Metal ⁽⁴⁾				
		Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Gold (g/t)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Gold (koz)
Proven	1.33	1.17	-	37.4	1.21	0.17	15.6	-	1,602	16.2	7.3
Probable	1.62	1.19	-	33.0	1.21	0.22	19.4	-	1,718	19.6	11.3
Total	2.95	1.18	-	35.0	1.21	0.20	34.9	-	3,320	35.7	18.7

Notes:

1. Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions.
2. The Qualified Person for the Mineral Reserves estimate is Renzo Suarez, B.Eng., MAusIMM, our employee.
3. The point of reference for Mineral Reserves in this table is mill feed materials.
4. Numbers may not add due to rounding.

The Atacocha Open Pit Mineral Reserves estimates in the table above were prepared using DSO software, mine design and scheduling software. NSR values were calculated using mineral reserve metal prices, metallurgical recovery, and consideration of smelter terms, including revenue from payable metals, price participation, penalties, smelter losses, transportation, treatment, refining, and sales charges. The Mineral Reserves were estimated at a NSR cut-off values of US\$22.91/t. A number of incremental material (with values between US\$16.54/t and US\$22.91/t was included in the estimates. Mineral Reserves estimates are based on average long-term metal prices of zinc: US\$2,999.30/t (US\$1.36/lb); lead: US\$1,963.53/t (US\$0.89/lb); and silver: US\$29.11/oz; and gold: US\$2,464.12/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average head grade are 70.44% for Zn, 84.03% for Pb, 75.76% for Ag, and 65.46% for gold. The current LOM production plan continues to 2028.

Atacocha Open Pit - Net Difference in Mineral Reserves between December 31, 2025 (on an 83.01% attributable ownership basis) versus December 31, 2024 (on an 81.78% attributable ownership basis)

Class	Tonnage		Zinc		Copper		Silver		Lead		Gold	
	(Mt)	%	(kt)	%	(kt)	%	(koz)	%	(kt)	%	(koz)	%
Proven	(0.07)	(6.1)	0.3	2.1	-	-	(140)	(9.5)	(0.3)	(2.5)	(0.6)	(9.4)
Probable	(0.47)	(25.8)	(1.5)	(8.7)	-	-	(517)	(26.6)	(4.7)	(22.3)	(3.6)	(27.6)
Total	(0.54)	(18.1)	(1.3)	(4.2)	-	-	(657)	(19.3)	(5.0)	(14.4)	(4.2)	(21.4)

Atacocha Open Pit - Net Difference in Mineral Reserves between December 31, 2025, versus December 31, 2024 (on a 100% ownership basis)

Class	Tonnage		Zinc		Copper		Silver		Lead		Gold	
	(Mt)	%	(kt)	%	(kt)	%	(koz)	%	(kt)	%	(koz)	%
Proven	(0.11)	(7.5)	0.1	0.6	-	-	(195)	(10.8)	(0.7)	(3.9)	(0.9)	(10.8)
Probable	(0.60)	(26.9)	(2.2)	(10.1)	-	-	(658)	(27.7)	(6.0)	(23.4)	(4.6)	(28.7)
Total	(0.71)	(19.3)	(2.1)	(5.6)	-	-	(853)	(20.4)	(6.7)	(15.7)	(5.4)	(22.6)

In comparison to 2024, Atacocha's Open Pit Mineral Reserves decreased by 19.3% in mass and decreased by 5.6% in zinc content (kt), mainly due to mine depletion. Mineral Reserve depletion during 2025 accounted for 1.5Mt containing 14.4kt of zinc.

Atacocha Open Pit - Year End Mineral Resources as of December 31, 2025 (on an 83.01% Attributable ownership basis) (1)(2)(3)(4)

Class	Tonnage ⁽⁵⁾ (Mt)	Grade ⁽⁵⁾					Contained Metal ⁽⁵⁾				
		Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Gold (g/t)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Gold (koz)
Measured	1.66	1.11	-	28.8	0.78	0.16	18.5	-	1,542	13.0	8.8
Indicated	3.57	0.96	-	27.8	0.87	0.20	34.2	-	3,185	31.0	22.5
Total	5.23	1.01	-	28.1	0.84	0.19	52.7	-	4,727	44.0	31.3
Inferred	1.24	1.07	-	25.0	0.89	0.18	13.3	-	994	11.1	7.2

Notes:

- Subpart 1300 of Regulation S-K definitions were followed for Mineral Resources, which also are consistent with the CIM (2014) definitions.
- Mineral Resources are reported exclusive of those Mineral Resources that were converted to Mineral Reserves, and Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.
- The Qualified Person for the Mineral Resources estimate is Jerry Huaman Abalos, B.Geo., MAusIMM CP(Geo), our employee.
- The point of reference for Mineral Resources in this table is mill feed materials.
- Numbers may not add due to rounding.

Atacocha Open Pit - Year End Mineral Resources as of December 31, 2025 (on a 100% ownership basis) (1) (2)(3)(4)

Class	Tonnage ⁽⁵⁾ (Mt)	Grade ⁽⁵⁾					Contained Metal ⁽⁵⁾				
		Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Gold (g/t)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Gold (koz)

Inferred	1.49	1.07	-	25.0	0.89	0.18	16.0	-	1,197	13.3	8.7

Notes:

- Subpart 1300 of Regulation S-K definitions were followed for Mineral Resources, which also are consistent with the CIM (2014) definitions.
- Mineral Resources are reported exclusive of those Mineral Resources that were converted to Mineral Reserves, and Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.
- The Qualified Person for the Mineral Resources estimate is Jerry Huaman Abalos, B.Geo., MAusIMM CP(Geo), our employee.
- The point of reference for Mineral Resources in this table is mill feed materials.
- Numbers may not add due to rounding.

The Atacocha Open Pit Mineral Resources estimates in the table above were completed using Datamine and Leapfrog software. Wireframes for geology and mineralization were constructed in Leapfrog based on geology sections, assay results, lithological information, underground and open pit mapping, and structural data. Assays were capped to various levels based on exploratory data analysis and then composited to 2.0 m lengths. Wireframes were filled with blocks and sub-celling at wireframe boundaries. Blocks were interpolated with grade using the OK and ID³ interpolation algorithms. Block estimates were validated using industry standard validation techniques. Classification of blocks used distance-based and mineralization continuity criteria. Mineral Resources are reported within resources open pit shell. The Mineral Resources are estimated at a NSR cut-off grade values of US\$22.91/t. Mineral Resources estimates are based on average long-term metal prices of zinc: US\$3,449.20/t (US\$1.56/lb); lead: US\$2,258.06/t (US\$1.02/lb); gold: US\$2,833.74/oz and silver: US\$33.48/oz. Metallurgical recoveries are accounted for in NSR calculations based on historical processing data and are variable as a function of head grade. Recoveries at LOM average head grades are 70.44% for Zn, 84.03% for Pb, 75.76% for Ag, and 65.46% for Au.

Atacocha Open Pit - Net Difference in Mineral Resources between December 31, 2025 (on an 83.01% attributable ownership basis), versus December 31, 2024 (on an 81.78% attributable ownership basis)

Class	Tonnage		Zinc		Copper		Contained Metal Silver		Lead		Gold	
	(Mt)	%	(kt)	%	(kt)	%	(koz)	%	(kt)	%	(koz)	%
Measured	0.06	3.5	(0.9)	(4.5)	-	-	20	1.3	(0.3)	(2.1)	(0.3)	(3.6)
Indicated	0.07	1.9	(0.6)	(1.7)	-	-	(19)	(0.6)	0.6	2.1	(3.3)	(12.7)
Total	0.12	2.4	(1.5)	(2.7)	-	-	1	0.0	0.4	0.8	(3.6)	(10.3)
Inferred	(0.27)	(17.8)	(6.7)	(33.5)	-	-	(520)	(34.3)	(5.7)	(34.1)	(2.6)	(26.3)

Atacocha Open Pit - Net Difference in Mineral Resources between December 31, 2025, versus December 31, 2024 (on a 100% ownership basis)

Class	Tonnage		Zinc		Copper		Contained Metal Silver		Lead		Gold	
	(Mt)	%	(kt)	%	(kt)	%	(koz)	%	(kt)	%	(koz)	%
Measured	0.04	1.9	(1.4)	(6.0)	-	-	(03)	(0.2)	(0.6)	(3.6)	(0.6)	(5.0)
Indicated	0.02	0.4	(1.3)	(3.1)	-	-	(81)	(2.1)	0.2	0.6	(4.4)	(14.0)
Total	0.05	0.9	(2.7)	(4.2)	-	-	(84)	(1.5)	(0.4)	(0.7)	(5.0)	(11.7)
Inferred	(0.35)	(19.1)	(8.4)	(34.5)	-	-	(654)	(35.3)	(7.2)	(35.1)	(3.3)	(27.4)

In comparison to 2024 based on a 100% ownership basis, Atacocha's Open Pit Inferred Mineral Resources decreased by 19.1% in mass and decreased by 34.5% in zinc content (kt), mainly due to conversion to Mineral Reserves. In comparison to 2024 based on a 100% ownership basis, Atacocha's Open Pit Measured and Indicated Mineral Resources increased by 0.9% in mass and decreased by 4.2% in zinc content (kt), mainly due to the metal price update.

For additional information, see the "Technical Report Summary on the Cerro Pasco Complex Integration," incorporated by reference as Exhibit 15.2 to this annual report.

Aripuanã

Location and means of access

The Aripuanã mine is located in the northwest corner of the Mato Grosso State in western Brazil, approximately 2,529 km by railroad and road to the Três Marias smelter, 2,831 km to the Juiz de Fora smelter or 2,660 km to the port of Santos. The approximate coordinates of the mine are 226,000m E and 8,888,000m N UTM 21L zone (South American 1969 datum) and the mine is located at an average elevation of 250 meters above sea level. The mine is accessible from the town of Aripuanã via a 25 km unpaved road, which is well maintained in the dry season. Aripuanã can be accessed from the state capital, Cuiabá, via a 16-hour drive (935 km) on paved and unpaved roads. The final 250 km between Cuiabá and Aripuanã are on unpaved roads.

The town of Aripuanã is also serviced by a paved airstrip suitable for light aircraft. There are daily commercial flights connecting Cuiabá and Aripuanã, with an approximate flight time of three hours, which is the primary mode of air access to the site. Chartered flights are rarely used, given the availability and reliability of regular commercial service.

History

Aripuanã is an underground polymetallic mine containing zinc, lead, copper, silver and gold, located in the state of Mato Grosso, Brazil. The project originated in 2000 as a joint venture, with Nexa Brazil joining in 2004 and subsequently, through a series of transactions between 2007 and 2019, becoming the sole owner of the Aripuanã mine.

Since 2020, we have taken several strategic actions to support the mine's development and operations. We reached an agreement with artisanal miners and government authorities to designate a specific area for artisanal mining activities, though non-compliance could adversely affect our operations. Between 2021 and 2022, we acquired approximately 2,017 hectares of land adjacent to the mine to meet Rural Environmental Registration (CAR) requirements for native vegetation preservation, with the CAR approval still pending as of this filing.

In January 2022, we entered into a five-year offtake agreement to sell 100% of Aripuanã's copper concentrate production (up to 30,810 tonnes) during the offtake period to an international third party, the offtaker, which was amended in September 2023 to provide flexibility on delivery schedules. The offtake agreement was structured to completely extinguish a previous existing future royalty obligation that we had with the offtaker. Additionally, we opted to designate the entire offtake agreement voluntarily and irrevocably at fair value through profit and loss within the scope of IFRS 9 rather than separate the value of the embedded derivative associated with the price cap, recognizing a non-cash accumulated loss of US\$49.3 million in the income statement for the period ended on December 31, 2025. For further details on the offtake agreement, see Note 16(v) to our consolidated financial statements.

Ramp-up activities at the Aripuanã mine started in July 2022 and were completed in June 2024. For further information, see below "Project implementation."

Titles, leases and options

The mine holds one mining concession in the core area that has a total area of 3,639.9 hectares, two mining concession applications totaling 1,368.5 hectares, one right to apply for mining concession with 1,000.0 hectares and eight exploration authorizations totaling 30,845.7 hectares.

The Aripuanã mine holds surface rights sufficient to support the future operations. There is sufficient suitable land available within the mineral rights held by us for tailings disposal, mine waste disposal, and installations such as the process plant and related mine infrastructure.

The Aripuanã mine holds several permits and licenses supporting its current operations. The operating license is valid until December 20, 2027.

Mineralization and Exploration

The Aripuanã region contains polymetallic VMS deposits with zinc, lead and copper, as well as small amounts of silver and gold, present in the form of massive mantles and veins, located in volcano sedimentary sequences belonging to the Roosevelt Group of Proterozoic age.

Four main elongated mineralized zones have been defined in the central portion of the mine: (1) Arex, (2) Link, (3) Ambrex and (4) Babaçu. Limited exploration has identified possible additional mineralized bodies including Massaranduba, Boroça, and Mocotó to the south and Arpa to the north.

The Aripuanã polymetallic deposits are typical VMS deposits associated with felsic bimodal volcanism. The individual mineralized bodies have complex shapes due to intense tectonic activity. Stratabound mineralized bodies tend to follow the local folds, however, local-scale, tight isoclinal folds are frequently observed, usually with axes parallel to major reverse faults, causing rapid variations in the dips.

Massive, stratabound sulphide mineralization as well as vein and stockwork-type discordant mineralization have been described on the property. The stratabound bodies, consisting of disseminated to massive pyrite and pyrrhotite, with well-developed sphalerite and galena mineralization, are commonly associated with the contact between the middle volcanic and the upper sedimentary units. Discordant stringer bodies of pyrrhotite-pyrite-chalcopyrite mineralization are generally located in the underlying volcanic units or intersect the massive sulphide lenses and have been interpreted as representing feeder zones.

The Mineral Exploration brownfield program in 2025 was focused on Massaranduba, aiming to identify new mineralized zones in Aripuanã geological district.

In 2025, we spent a total of US\$3.8 million on the Aripuanã exploration program, including exploratory drilling, program, geological activities and geochemistry. In 2025, we drilled in Massaranduba 9.3 km of diamond drilling in 27 drill holes. For 2026, we expect to invest US\$2.3 million in Aripuanã brownfield program, including TITAN geophysical survey to support target definition for future exploration programs.

Project implementation

Completion of the Aripuanã beneficiation plant was achieved in the first quarter of 2022, with commissioning finalized in the second quarter. Ramp-up activities commenced in July 2022, and milling capacity utilization reached 53% by the end of the fourth quarter. The first market-specification concentrate sales occurred in the fourth quarter of 2022, with ramp-up continuing through 2023.

Throughout 2023, ramp-up activities continued, with the plant utilization capacity averaging between 56-66% of nameplate capacity, per quarter, impacted by design limitations in the flotation pumping system, tailings filtration constraints, and heavy rainfall. Initial mine backfill tests were conducted between January and February. Underground activities were focused on developing and preparing new mining areas. In March 2023, the plant was temporarily halted for upgrades and improvements, including resizing the pumping system, upgrading processing and water treatment facilities, and enhancing resilience during the rainy season, with operational focus on stability, metallurgical recovery, and concentrate quality.

The ramp-up phase was concluded in June 2024, marking Aripuanã's transition to a fully operational mine. In the fourth quarter of 2024, average capacity utilization reached 67%, reflecting the impact of maintenance activities, tailings filter constraints, and rainfall levels 20% higher than the previous year. Despite significant capacity increases since production start-up, challenges persisted due to current tailings filtration limitations. To address these bottlenecks, a fourth tailings filter was acquired.

In 2025, Aripuanã consolidated its operational performance, achieving 76% of average utilization capacity in the fourth quarter, showing consistent improvement in key indicators. The first half of the year was marked by above-average rainfall, impacting operational stability and tailings filtration capacity. Gradual recovery was observed beginning on the second quarter, with increased throughput and operational reliability, achieving its record quarterly zinc production by the end of the year, reflecting greater stability and process efficiency, as well as progress on the installation of the fourth tailings filter, which arrived at the mine site in November and its installation is expected to be concluded in April 2026, remaining on track for commissioning in the first half of 2026.

Once the 4th tailings filter is up-and-running, we expect it to enhance utilization capacity, ensuring optimal performance, in line with our commitment to operational excellence. During this period, the operational focus remained on reaching full tailings filtration circuit capacity, cost reductions, and maximizing metallurgical recovery, with further capacity and resilience gains expected following the commissioning of the new tailings filter. While capacity significantly increased since production startup, challenges persist due to current constraints, as we continue to focus on improving operational performance, with a particular focus on the tailings filter circuit. We expect to achieve full operational capacity in the second half of 2026. Aripuanã is expected to be one of the primary drivers of the anticipated 6.1% increase in consolidated zinc production in 2026.

Operations and infrastructure

The Aripuanã operation consists of two fully mechanized underground mines, the Arex Mine and Link Mine, which have been in operation since 2019. These mines use rubber-tired diesel equipment for development and production activities. The treatment plant current capacity is approximately 2.2 Mtpy. Access to the mine is through one portal for Arex and one portal for Link. Production drilling operations have been conducted by company personnel using various drilling machines throughout the history of the Aripuanã mine.

All infrastructure required for the current mining and processing operations has been constructed and is operational. This includes the underground mines, access roads, power lines, water pipelines, offices and warehouses, a processing plant/concentrator, conveyor systems, waste rock facilities, temporary ore stockpiles, paste-fill plants, and tailings storage facilities.

The Aripuanã mine is connected to the main grid at 230 kV, with energy measurement and billing conducted at SE Dardanelos, 20 km away, using a 69 kV line to the unit. Power distribution occurs at 13.8 kV, and the unit is equipped with a 25/31 MW transformer. Currently, the contracted power demand with Energisa S.A. is 18.3 MW during peak hours and 23 MW during off-peak hours. Additionally, there are five 750 kVA diesel generators in place.

In 2025, we spent US\$68.8 million on sustaining capital expenditures for this property, primarily associated with mine development, equipment replacement, and other major infrastructure projects (including investments related to the fourth tailings filter).

Production

The Aripuanã mine concluded its ramp-up phase by the end of the first half of 2024 and has a treatment plant with a nominal design processing capacity of approximately 6,300 tonnes of ore per day. The table below summarizes the Aripuanã mine's concentrate production, metal contained in concentrates produced, average grades, cash costs and non-expansion capital expenditures for the periods indicated. Production in 2025 was higher than in 2024 mainly due to improved metal recoveries.

	For the Year Ended December 31,		
	2025	2024	2023
Treatment ore (in tonnes)	1,447,607	1,475,566	1,311,430
Average ore grade			
Zinc (%)	3.23	3.23	3.31
Copper (%)	0.58	0.56	0.68
Lead (%)	1.09	1.12	1.05
Silver (ounces per tonne)	1.00	1.17	0.96
Gold (ounces per tonne)	0.016	0.017	0.015
Metal contained in concentrate production			
Zinc (in tonnes)	35,165	31,613	22,099
Copper (in tonnes)	5,943	5,519	4,443
Lead (in tonnes)	12,988	13,062	6,331
Silver (in oz)	957,709	1,101,313	513,916
Gold (in oz)	16,237	14,037	7,954
Cash Cost, net of by-product credits (in US\$/t)	207	-	-
Cash Cost, net of by-product credits (in US\$/lb)	0.09	-	-
Non-Expansion Capital Expenditures (in millions of US\$)	69.0	42.7	60.1

Mineral Reserves and Mineral Resources

The Aripuanã Mineral Reserves and Mineral Resources estimates are based on the definitions for Mineral Reserves and Mineral Resources in SK-1300 and the tables below are based on costs and modifying factors from the Aripuanã mine.

Aripuanã - Year End Mineral Reserves as of December 31, 2025 (on a 100% ownership basis) (1)(2)(3)

Class	Tonnage ⁽⁴⁾ (Mt)	Grade ⁽⁴⁾					Contained Metal ⁽⁴⁾				
		Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Gold (g/t)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Gold (koz)
Proven	5.67	3.59	0.16	31.1	1.28	0.23	203.5	9.3	5,672	72.8	41.0
Probable	28.41	4.24	0.10	38.5	1.63	0.18	1,205.4	29.1	35,166	463.2	163.4
Total	34.08	4.13	0.11	37.3	1.57	0.19	1,408.9	38.4	40,838	536.1	204.4

Notes:

1. Subpart 1300 of Regulation S-K definitions were followed for Mineral Reserves, which also are consistent with the CIM (2014) definitions.
2. The Qualified Person for the Mineral Reserves estimate is Cristovao Teofilo dos Santos, B.Eng., FAusIMM, our employee.
3. The point of reference for Mineral Reserves in this table is mill feed materials.
4. Numbers may not add due to rounding.

The Aripuanã Mineral Reserves estimates are based on four main orebodies: Arex, Link and Ambrex and the two main types of mineralization in the deposit are stratabound and stringer. The main commodities produced are zinc, copper, lead, silver and gold. The dilution that has been applied is related to the selected mining method. The two main mining methods used at Aripuanã are longitudinal longhole retreat (“bench stoping”) and transverse longhole mining (vertical retreat mining, or “VRM”) with primary and secondary stope extraction. Dilution is applied on a percentage basis, with no grade applied to the diluting material. The NSR factors were determined using long-term metal price forecasts, metallurgical recoveries, transport, treatment, and refining costs. A break-even NSR cut-off value is US\$63.86/t processed was estimated from forecasted operating costs and some incremental material between US\$49.56/t and US\$63.86/t was included. A minimum mining width of 4.0 m was used for bench stoping and 15.0 m for VRM. The long-term prices derived are in line with the consensus forecasts from banks and independent institutions. Mineral Reserves estimates are based on average long-term metal prices of zinc: US\$2,999.30/t (US\$1.36/lb); copper: US\$9,398.60/t (US\$4.26/lb); lead: US\$1,963.53/t (US\$0.89/lb); and silver: US\$29.11/oz; and gold: US\$2,464.12/oz. Recoveries at LOM average head grades are 89.89% for Zn, 84.10% for Pb, 55.62% for Cu, 68.00% for Ag, and 67.80% for Au. The current LOM production plan continues to 2041.

Aripuanã - Net Difference in Mineral Reserves between December 31, 2025, versus December 31, 2024 (on a 100% ownership basis)

Class	Tonnage		Zinc		Copper		Silver		Lead		Gold	
	(Mt)	%	(kt)	%	(kt)	%	(koz)	%	(kt)	%	(koz)	%
Proven	(0.19)	(3.3)	(18.5)	(8.3)	(2.6)	(21.6)	(558)	(9.0)	(7.5)	(9.3)	(3.6)	(8.1)
Probable	1.60	5.9	(52.8)	(4.2)	(0.6)	(2.0)	(1,553)	(4.2)	(22.0)	(4.5)	(0.3)	(0.2)
Total	1.40	4.3	(71.3)	(4.8)	(3.2)	(7.6)	(2,111)	(4.9)	(29.5)	(5.2)	(3.9)	(1.9)

In comparison to 2024, Aripuanã’s Mineral Reserves increased by 4.3% in mass mainly due to metal price update and decreased by 4.8% in zinc content (kt), mainly due mine reserves depletion replaced by lower grade material and a review in geotechnical parameters. Mineral Reserve depletion during 2025 accounted for 1.5Mt containing 43.9kt of zinc.

Aripuanã - Year End Mineral Resources as of December 31, 2025 (on a 100% ownership basis) (1)(2)(3)(4)

Class	Tonnage ⁽⁵⁾ (Mt)	Grade ⁽⁵⁾					Contained Metal ⁽⁵⁾				
		Zinc (%)	Copper (%)	Silver (g/t)	Lead (%)	Gold (g/t)	Zinc (kt)	Copper (kt)	Silver (koz)	Lead (kt)	Gold (koz)
Measured	0.39	2.59	0.29	21.1	0.83	0.37	10.1	1.1	263	3.2	4.6
Indicated	4.27	3.88	0.18	36.2	1.44	0.28	165.6	7.7	4,975	61.5	38.6
Total	4.66	3.77	0.19	34.9	1.39	0.29	175.7	8.8	5,238	64.8	43.2
Inferred	43.78	3.02	0.30	39.5	1.16	0.40	1,320.4	130.3	55,611	507.6	560.4

Notes:

1. Subpart 1300 of Regulation S-K definitions were followed for Mineral Resources, which also are consistent with the CIM (2014) definitions.
2. Mineral Resources are reported exclusive of those Mineral Resources that were converted to Mineral Reserves, and Mineral Resources are not Mineral Reserves and do not have demonstrated economic viability.
3. The Qualified Person for the Mineral Resources estimate is José Antonio Lopes, B.Geo., FAusIMM(Geo), our employee.
4. The point of reference for Mineral Resources in this table is mill feed materials.
5. Numbers may not add due to rounding.

The Mineral Resources estimates for the Aripuanã mine were completed for Babaçu, Arex, Ambrex and Link. The block models were created using Datamine and Leapfrog software. Wireframes for geology and mineralization were constructed in Leapfrog based on geology sections, assay results, lithological information, and structural data. Assays were capped to various levels based on exploratory data analysis and then composited to one-meter lengths. Blocks were interpolated with grade using the OK and ID³. Blocks estimates were validated using industry standard validation techniques. Classification of blocks was based on distance-based criteria. Potentially mineable shapes of underground mineral resources are generated using DSO software. The Mineral Resources of the Aripuanã mine are reported using a cut-off value of US\$63.86/t. Mineral Resources estimates are based on average long-term metal prices of zinc: US\$3,449.20/t (US\$1.56/lb); copper: US\$10,808.39/t (US\$4.90/lb); lead: US\$2,258.06/t (US\$1.02/lb); silver: US\$33.48/oz and gold: US\$2,833.74/oz. Metallurgical recoveries are accounted for in NSR calculations based on metallurgical test work and are variable as a function of head grade and ore type. Recoveries at the LOM average head grades material are 89.89% for Zn, 84.10% for Pb, 55.62% for Cu, 68.00% for Ag, and 67.80 % for Au.

Aripuanã - Net Difference in Mineral Resources between December 31, 2025, versus December 31, 2024 (on a 100% ownership basis)

Class	Tonnage		Zinc		Copper		Contained Metal Silver		Lead		Gold	
	(Mt)	%	(kt)	%	(kt)	%	(koz)	%	(kt)	%	(koz)	%
Measured	(0.09)	(19.6)	(0.6)	(5.4)	(0.7)	(39.5)	(29)	(10.0)	(0.2)	(7.1)	(3.4)	(42.4)
Indicated	(0.63)	(12.8)	(1.5)	(0.9)	(1.8)	(0.2)	(311)	(5.9)	(0.0)	(0.1)	(5.9)	(13.2)
Total	(0.72)	(13.4)	(2.1)	(1.2)	(2.6)	(0.2)	(340)	(6.1)	(0.3)	(0.4)	(9.2)	(17.6)
Inferred	(0.40)	(0.9)	(75.6)	(5.4)	(7.3)	(0.1)	(2,909)	(5.0)	(26.2)	(4.9)	15.5	2.8

In comparison to 2024, Aripuanã's Inferred Mineral Resources decreased by 0.9% in mass and by 5.4% in zinc content (kt) in 2025, mainly due to metal prices update. In comparison to 2024, Aripuanã's Measured and Indicated Mineral Resources decreased by 13.4% in mass and by 1.2% in zinc content (kt) in 2025, mainly due to conversion to Mineral Reserves.

For additional information, see the "Technical Report Summary on the Aripuanã Zinc Project," incorporated by reference as Exhibit 15.4 to this annual report.

Growth projects

In addition to our operating mines and smelters, a component of our business focuses on growth and exploration, which are activities associated with ascertaining the existence, location, extent, or quality of a mineral deposit. Our exploration activities encompass brownfield and greenfield projects. Brownfield projects are exploration or development projects near or within our existing operations, which can share infrastructure and management. Greenfield projects are located outside the area of influence of our existing mine operations and are independently developed and managed.

Mining brownfield projects***Vazante mine deepening project and other Vazante initiatives***

One of our main brownfield projects is the Vazante mine deepening project, which involves extending the mine life of Vazante. The capital expenditures related to this project in 2025 totaled US\$0.6 million, and an additional US\$0.3 million towards other expansion projects, focusing on the LOM extension. We expect to invest an additional US\$5.3 million in 2026 for the deepening project. The Vazante mine deepening project began in 2013 and the completion of this project, which was postponed due to our capital allocation strategy and the focus on other Vazante initiatives, is now expected to be conducted in two stages, with the first stage expected to be completed in 2027 and the second in 2032.

In addition, we are conducting exploration activities below the mine's current operating level and alongside the orebody. As part of this project, we are investing in ongoing exploration activities and infrastructure, including expansion of an underground pumping station, an increase in the capacity of the ventilation system, emergency paths, access ramps, electrical networks and substations. In 2023, we prepared the area to receive such equipment in accordance with the project's specifications and in 2024 we completed activities in accordance with the updated project schedule. We had originally planned to conduct the civil works in 2026, however, due to the Vazante unit's capital allocation plan, these activities were rescheduled to 2027 and are expected to be executed in parallel with the electromechanical work. These changes are not expected to impact the project's expected completion in 2028.

Cerro Pasco Complex Integration Project

The Cerro Pasco Complex Integration Project is one of our main brownfield projects, which involves the continued integration of the El Porvenir and Atacocha underground mines. The Cerro Pasco Complex Integration Project continued to advance in 2025. In 2024, our Board of Directors, through the Finance Committee approved the first phase of the project, the tailings pumping and piping system, following a recommendation from the SCP committee. Construction of Phase I began in July 2025 and continued to progress as planned. The project implemented critical technical optimizations, including adjustments in slope configurations, a redesign of tailings pipeline supports, and adoption of a modular strategy for the electrical room. On-site works achieved significant milestones, such as completing micro-pile installation for the tailings thickener, advancing slope stabilization, and initiating earthworks and civil works for the pump house and main substation. The timeline remains on track, with commissioning expected in 2026. In parallel, Phase II preparatory work continued, including technical assessments of the Picasso shaft and underground integration alternatives to determine the complex's optimal long-term operational configuration. We submitted by year-end the two major environmental filings required by SENACE, the second modified environmental impact assessment ("MEIA") for the El Porvenir Mining Unit and the third MEIA for the Atacocha Mining Unit, with approvals expected in the first quarter of 2027. Total capital expenditures for the Integration Project are estimated at US\$148.8 million, including US\$45.2 million invested through 2024 and 2025, and US\$31.4 million planned for 2026 and remaining investments to be executed progressively until 2029 for Phase I and for Phase II from 2027 until 2032. For a description of the project's scope and detailed phasing, see "Information on the Company—Mining Operations—Cerro Pasco Complex—Integration Project."

Bonsucesso

The Bonsucesso project is a greenfield underground mine project that was formerly part of the Morro Agudo complex (Ambrósia Trend). The Bonsucesso project was not included in the 2024 sale of the Morro Agudo complex. The project is located 8 km north of the Ambrósia Sul mine and approximately 60 km north of the Morro Agudo mine.

In 2025, we had no exploration activities in the Bonsucesso project, and no activities are expected for 2026.

The feasibility study was concluded in 2022 with no amount invested since. The total investments related to this project, as of December 31, 2025, totaled US\$12.7 million, which includes all project studies (from the scoping study to the feasibility study) and incurred expenses related to construction and operating infrastructure.

Bonsucesso is currently inactive, with no exploration activities conducted in 2025 and none planned for 2026. We continue to evaluate the project's risk-return profile in the context of our portfolio optimization strategy and capital allocation priorities.

Mining greenfield projects

Project Name	Current Project Status
Magistral	Under Review
Hilarión	Exploration phase
Florida Canyon Zinc	Exploration phase

We summarize below certain information, including the outlook, for each of our greenfield projects. As of the date of this annual report, none of our greenfield projects have Mineral Reserves under S-K 1300.

Magistral

The Magistral mining project is an open-pit copper-molybdenum project located in the Ancash region of Peru, approximately 450 km northeast of the capital of Lima and approximately 140 km east of the port city of Trujillo. The project comprises 36 concessions totaling 16,416.0 hectares. Nexa Peru holds a 100% interest in 15 of the 36 concessions, and the additional 21 concessions by a lease agreement with Compañía Magistral S.A.C., a company also controlled by Nexa Peru. The project is currently under review following the rejection by SENACE of a MEIA in May 2024, which resulted in a US\$58.4 million impairment charge recorded in that year.

In 2025, the Peruvian government formally acknowledged the MEIA rejection as a force majeure event, leading to the suspension of Nexa Peru's obligation to fulfill its accreditable investment commitment under a contract with the Peruvian government. As of the date of this report, the deadline to fulfill its commitment remains suspended, as does the potential application of the related penalty. The unexecuted minimum investment commitment was US\$323.0 million as of December 31, 2025, with a penalty exposure of US\$97.0 million if the commitment is not completed by August 2028. We are currently engaged in direct negotiations with the Peruvian government to assess the impact of the force majeure event on the execution of the project and spent a total amount of approximately US\$2.2 million on the project in 2025, mainly related to project maintenance, legal expenses and mineral rights.

Exploration developments

The Magistral property is near the northeastern end of the Cordillera Blanca, a region that is underlain predominantly by Cretaceous carbonate and clastic sequences. These units strike north to northwest and are folded into a series of anticlines and synclines with northwest-trending axes.

Since acquiring the Magistral project in 2011, we have initiated a comprehensive exploration program consisting of geological mapping, prospecting, and sampling, ground geophysical surveying, and diamond drilling. Geological mapping at a scale of 1:2,000 was completed in the Ancapata area and the area north-northeast of Magistral. The objective was to verify and supplement the information available from Ancash Cobre's exploration.

No exploration drilling program was conducted since then and no exploration drilling program is scheduled for 2026.

Hilarión

The Hilarión project is located in the Ancash region of Peru, approximately 230 km north of Lima, the capital of Peru, and approximately 80 km south of the city of Huaraz and is accessible by paved road from Lima. It consists of 48 mineral concessions covering an area of approximately 9,374.0 hectares. Hilarión is a skarn mineral deposit made of vertical tabular ore bodies containing sulfide zinc, lead, silver, and copper deposits. Hilarión and El Padrino and other occurrences in proximity to them (Mia, Eureka and others) constitute a large mineralized system, open in several directions for a potential increase in resources, extended mine life and increased production capacity in the future. The conceptual plan for the project includes the development of an underground mine that could either use its own processing plant or use one of the several existing plants in the area, such as Pachapaqui, Huanzala and Atalaya plants.

In 2025, we spent approximately US\$1.3 million on the Hilarión project, including project maintenance, geology review works and environmental obligations. We had no drilling activities at the project in 2025. In 2026, we have budgeted US\$2.5 million for the Hilarión project maintenance, and we have planned approximately 4.0 km of drilling activities.

Florida Canyon Zinc

The Florida Canyon Zinc project is located in the Eastern Cordillera of Peru at the sub-Andean front in the upper Amazon River Basin, 680 km north-northeast of Lima and 245 km northeast of Chiclayo and is accessible by paved road from Lima. It is comprised of 11 contiguous mining concessions, covering approximately 8,700.0 hectares, is owned by Minera Bongará S.A. and operated by Nexa Peru, a joint venture between Nexa Peru, Solitario Exploration and Royalty Corp. and Minera Solitario Peru S.A.C. (collectively, Solitario) in existence since 2006. As of December 31, 2025, Nexa Peru owns a 61.00% interest in this joint venture, which may increase up to 70.00% upon Nexa Peru's satisfaction of certain conditions.

Although a Preliminary Economic Assessment relating to the Florida Canyon Zinc was released in 2017, the project continues to be treated as an early-stage project.

In 2023, drilling at the Florida Canyon began in the third quarter due to a delay in the drilling program caused by lack of transportation for drilling materials. In September 2023, construction and maintenance of the motorized trail, which aims to reach La Florida Annex, commenced and was completed in 2024. In 2024, we focused on maintenance of local infrastructure, such as opening access to receive future drilling campaigns.

In 2025, we spent approximately US\$1.4 million on this project, and we have budgeted US\$1.0 million for Florida Canyon project in 2026, including road maintenance, geological review, and social programs. No drilling activities are planned for 2026.

Other Greenfield exploration projects

Projects in Namibia

On May 15, 2025, we announced the sale of the Otavi Project in Namibia for a total consideration of US\$3.0 million upfront and up to US\$7.0 million in contingent payments, while retaining royalty rights. The closing of the transaction occurred on December 22, 2025, and the joint venture with JOGMEC was terminated. Prior to the sale, the 2025 drilling campaign at the Otavi Project completed 0.7 km of exploration drilling at the Leeulaagte target.

Namibia remains a strategic region for Nexa, with ongoing exploration in the Kalahari Copper Belt. The Kalahari Project is 100% owned by Nexa Resources and targets Cu-Ag mineralization hosted in sediments associated with the Neoproterozoic Ghanzi-Chobe Basin system. Current activities include airborne geophysical surveys, surface work, geological mapping, and target generation. We currently hold 16 Exclusive Prospective Licenses totaling 672,832.2 hectares, of which 621,083.6 hectares are in the Kalahari Copper Belt and 51,748.7 hectares in the Otavi Mountainland region.

Permits & authorizations for greenfield projects

The following table summarizes the status of the main permits and authorizations for our greenfield projects.

Project	Status
Magistral	An amendment to the EIA was rejected in 2024. All other permits are valid.
Hilarión	The most recent environmental study for the Hilarión project is the fifth modification to the Environmental Impact Statement (“EIS”), which consisted of obtaining approval for new exploration platforms and reviewing the drilling program. The project’s EIS study is valid until 2028. The most recent environmental study for the El Padrino project is the fourth modification to the project’s EIS, which consisted of obtaining approval for new exploration platforms and reviewing the drilling program. The project’s EIS study is valid until 2029. The most recent environmental study for the Azulmina project is the modification of the EIS, which consisted of obtaining approval for new exploration platforms and revising the drilling program. The study is valid until 2028.
Florida Canyon Zinc	The most recent environmental study is the fifth modification to the Florida Canyon Project’s EIS, which consisted of obtaining approval for new exploration platforms and reviewing the drilling program. It was approved in 2023 and is valid until 2034.

SMELTING OPERATIONS

The table below provides an overview of our smelting facilities:

Smelting Unit	Location	Smelting Process	Principal Refined Zinc Products	Plant Capacity ⁽¹⁾	Metallic Zinc Production in 2025 ⁽²⁾	Zinc Oxide Production in 2025 ⁽³⁾	Other Products
Cajamarquilla	Peru	RLE ⁽⁴⁾	Metallic zinc (SHG, CGG jumbos and alloys ⁽⁵⁾)	344,436	345,281	0	Sulfuric acid, silver concentrate, copper cement and cadmium sticks
Três Marias	Brazil	RLE	Metallic zinc (SHG, CGG jumbos, alloys and Zamac ⁽⁶⁾) and zinc oxide	192,199	122,731	34,566	Cadmium and cobalt cement
Juiz de Fora	Brazil	Waelz Furnace and RLE	Metallic zinc (SHG, alloys and Zamac)	96,923	61,827	0	Sulfuric acid, sulfur dioxide, silver concentrate, copper sulfate and zinc ash
Total				633,558	529,839	34,566	

Notes:

- (1) In tonnes of refined zinc per year.
- (2) In tonnes of zinc metal available for sale, includes alloys.
- (3) In tonnes of zinc oxide.
- (4) Roast-Leach-Electrowinning.
- (5) Alloys are zinc-based products with the addition of up to 1.0% of a specified metal, which are primarily used in the galvanizing market. Special alloys are zinc-based products with addition of specified metals, which are primarily used in galvanizing market.
- (6) Zamac is a zinc-based product with the addition of specified metals, which are primarily used in the die casting market.

Smelter sales

We produce various types of refined zinc products. In 2025, we sold a total of 532.5 thousand tonnes of our metallic zinc line of products (including SHG, CGG, jumbos, alloys, and Zamac). In addition, we commercialized 34.5 thousand tonnes of zinc oxide at 80% standard zinc content in 2025, totaling 567.0 thousand tonnes of zinc products sold.

Cajamarquilla

The Cajamarquilla smelter is located in the district of Lurigancho/Chosica in Lima, Peru, and is accessible by road.

The Cajamarquilla smelter is currently the largest zinc smelter in Latin America (excluding Mexico) and the only zinc smelter in Latin America outside Mexico and Brazil, according to Wood Mackenzie. It uses the RLE process to produce metallic zinc. With an annual production capacity of 344.4 thousand tonnes of refined metal per year, the Cajamarquilla smelter produced 345.3 thousand tonnes of zinc metal available for sale in 2025. In recent years, Cajamarquilla developed operational efficiencies, including debottlenecking projects, which increased the production of calcine from concentrates obtained from Nexa Peru, and the use of calcine and waelz oxide processed by third parties. See “Risk factors—Operational risks—Inadequate supply of zinc secondary feed materials and zinc calcine could affect the results of our smelters.”

The Cajamarquilla smelter produces zinc primarily from zinc contained in concentrates and, to a lesser extent, recycled zinc secondary feeds (also referred to as pre-treated concentrate). In 2025, the Cajamarquilla smelter consumed 369.2 thousand tonnes of zinc contained in concentrates, and secondary raw material, which consumed 37.9% of zinc contained in concentrates from our mines, 61.7% of zinc contained in concentrates from third parties and 0.4% from secondary raw material.

In 2025, we spent US\$46.4 million on sustaining capital expenditures for Cajamarquilla, primarily associated with efforts on continuity of operations, including replacement and overhaul of critical equipment.

The following table shows Cajamarquilla’s processed zinc contained in concentrates, zinc recovery rate, production, sales, cash costs, and non-expansion capital expenditures for the periods indicated:

	For the Year Ended December 31,		
	2025	2024	2023
Inputs (in tonnes)			
Zinc Contained in Concentrate from Our Mines	140,057	110,983	92,827
Zinc Contained in Concentrate from Third Parties	227,730	237,953	233,425
Secondary Raw Material	1,399	7,370	14,745
Total Inputs	369,185	356,306	340,997
Zinc Recovery (%)	94.0	94.4	93.8
Zinc Production (in tonnes)			
Metallic Zinc	345,281	334,078	323,059
Zinc Oxide	-	-	-
Total Zinc Production	345,281	334,078	323,059
Zinc Sales (in tonnes)			
Metallic Zinc	346,418	326,980	326,386
Zinc Oxide	-	-	-
Total Zinc Sales	346,418	326,980	326,386
Cash Cost, net of by-product credits (in US\$/t)	2,510.5	2,465.8	2,281.7
Cash Cost, net of by-product credits (in US\$/lb)	1.14	1.12	1.03
Non-Expansion Capital Expenditures (in millions of US\$)	49.1	45.6	34.5

Três Marias

The Três Marias smelter is located in the municipality of Três Marias in the state of Minas Gerais, Brazil, 253 km from the Vazante mine and is accessible by road.

The Três Marias smelter was built to treat the zinc silicate concentrates from the Vazante mine (willemite and calamine) and sulfide concentrates from Aripuanã mine, from Nexa Peru and from third-party concentrates. Currently, this smelter is integrated with the operation of the Vazante mine and it uses the RLE process to produce metallic zinc and zinc oxide. The annual production capacity of our Três Marias smelter is 192.2 thousand tonnes of refined metal per year. Production in 2025 totaled 157.3 thousand tonnes of zinc metal and oxide available for sale.

The Três Marias smelter produces zinc primarily from zinc contained in concentrates and, to a lesser extent, recycled zinc secondary feeds. In 2025, the Três Marias smelter consumed 170.7 thousand tonnes of zinc contained in concentrates and secondary raw material, which consumed 81.8% of zinc contained in concentrates from our mines and 18.2% of zinc contained in concentrates from third parties.

The Três Marias smelter contains a zinc oxide production plant intended for the chemical, pneumatic, ceramic, animal feed, and fertilizer industries. In 2025, the production of zinc oxide was approximately 34.6 thousand tonnes. In zinc content, approximately 72.2% of the raw material was electrolytic zinc that originated from the melting stage. In addition, we purchased 27.8% of raw material from third parties, in the form of dross and skims, to produce zinc oxide as well as the generation of by-products.

In 2023, we advanced with the waste dry disposal system on an industrial scale, which consists of filtering the waste pulp for subsequent disposal through the dry stacking process, as waste disposal in this unit was going directly to its tailings deposit. The initiative achieved excellent results, in December 2025, filtration reached 98.7% achieving an average of 74.6% for the full-year 2025. Due to this advancement, we began the licensing process for government approval of the dry stacking disposal facility. For more information, see “Mining Operations—Tailings Disposals—Regulatory framework.” See also “Risk factors—Operational risks—The failure of a tailings dam could negatively impact our business, reputation and results of operations, and the implementation of associated regulations and decommissioning processes may be expensive.”

In 2025, we spent US\$19.6 million on sustaining capital expenditures for Três Marias, primarily associated with TSF expenses and replacement and overhaul of critical equipment.

The following table shows Três Marias’s processed zinc contained in concentrates, zinc recovery rate, production, sales, cash costs, and non-expansion capital expenditures for the periods indicated:

	For the Year Ended December 31,		
	2025	2024	2023
Inputs (in tonnes)			
Zinc Contained in Concentrate from Our Mines	139,538	169,901	167,726
Zinc Contained in Concentrate from Third Parties	31,038	21,680	22,430
Secondary Raw Material	82	325	1,976
Total Inputs	170,658	191,906	192,132
Zinc Recovery (%)	88.5	89.2	90.1
Zinc Production (in tonnes)			
Metallic Zinc	122,731	144,096	148,354
Zinc Oxide	34,566	34,569	33,963
Total Zinc Production	157,297	178,664	182,317
Zinc Sales (in tonnes)			
Metallic Zinc	122,027	146,810	147,102
Zinc Oxide	34,531	34,512	33,885
Total Zinc Sales	156,558	181,322	180,987
Cash Cost, net of by-product credits (in US\$/t)	3,326.0	2,584.6	2,546.9
Cash Cost, net of by-product credits (in US\$/lb)	1.51	1.17	1.16
Non-Expansion Capital Expenditures (in millions of US\$)	27.0	17.6	22.2

Juiz de Fora

The Juiz de Fora smelter is located in the municipality of Juiz de Fora in the state of Minas Gerais, Brazil, and is accessible by road.

The Juiz de Fora smelter produces zinc from sulfide concentrates and secondary sources such as EAF dust, batteries, and brass oxide, and uses the RLE process to produce metallic zinc. The annual production capacity of our Juiz de Fora smelter is 96.9 thousand tonnes of refined metal per year. In 2025, Juiz de Fora produced 61.8 thousand tonnes of zinc metal available for sale. In recent years, Juiz de Fora used calcine processed by third parties in its production process.

The Juiz de Fora smelter produces zinc primarily from zinc contained in concentrates and, to a lesser extent, recycled zinc secondary feeds. In 2025, the Juiz de Fora smelter consumed 69.9 thousand tonnes of zinc contained in concentrates, and secondary raw material, which consumed 37.2% of zinc contained in concentrates from our mines, 52.6% of zinc contained in concentrates from third parties and 10.1% from secondary raw material.

In December 2024, a fire occurred in the electrostatic precipitators in the roasting plant at Juiz de Fora. The incident was promptly contained but required an emergency shutdown of the roasting circuit that constrained production throughout the first three quarters of 2025. The unit resumed planned production capacity in September 2025.

In 2025, we spent US\$15.7 million on sustaining capital expenditures for Juiz de Fora, primarily associated with environmental and operational infrastructure, replacement and major overhauls of critical equipment, and automation initiatives, a portion of which is currently under reimbursement process by our insurance providers.

The following table shows Juiz de Fora's processed zinc contained in concentrates, zinc recovery rate, production, sales, cash costs, and non-expansion capital expenditures for the periods indicated:

	For the Year Ended December 31,		
	2025	2024	2023
Inputs (in tonnes)			
Zinc Contained in Concentrate from Our Mines	26,028	46,341	36,460
Zinc Contained in Concentrate from Third Parties	36,804	23,428	36,515
Secondary Raw Material	7,098	12,726	14,419
Total Inputs	69,930	82,495	87,394
Zinc Recovery (%)	93.2	93.9	94.0
Zinc Production (in tonnes)			
Metallic Zinc	61,827	81,989	82,147
Zinc Oxide	-	-	-
Total Zinc Production	61,827	81,989	82,147
Zinc Sales (in tonnes)			
Metallic Zinc	64,043	83,005	82,470
Zinc Oxide	-	-	-
Total Zinc Sales	64,043	83,005	82,470
Cash Cost, net of by-product credits (in US\$/t)	3,443.5	2,701.1	2,666.3
Cash Cost, net of by-product credits (in US\$/lb)	1.56	1.23	1.21
Non-Expansion Capital Expenditures (in millions of US\$)	16.9	12.4	14.5

Smelting by-products

Our smelting operations generate several by-products, primarily sulfuric acid, silver concentrate, and copper cement. Sulfuric acid, the main by-product by volume, is generated from sulfur dioxide released during zinc concentrate roasting. While part of this acid is used internally, most is available for external sale. As the Três Marias smelter consumes more sulfuric acid than it produces, the Juiz de Fora smelter transfers part of its production to Três Marias. Silver concentrate is recovered at the Cajamarquilla and Juiz de Fora smelters from intermediate process streams and is sold to international traders and local customers. Copper cement is produced at the Cajamarquilla smelter during the purification stage and is sold to international traders and local customers.

The following table shows our by-products produced and sold by our smelting operations, in tonnes (except indicated otherwise), for the periods indicated:

	For the Year Ended December 31,		
	2025	2024	2023
Sulfuric Acid - Production			
Cajamarquilla	594,124	590,063	556,297
Três Marias	75,856	90,178	83,365
Juiz de Fora	105,832	104,672	115,914
Total Production	775,812	784,914	755,576
Sulfuric Acid - Sales ⁽¹⁾			
Cajamarquilla	566,279	553,428	525,445
Três Marias	877	296	0
Juiz de Fora ⁽²⁾	50,170	41,363	41,586
Total Sales	617,326	595,087	567,032
Silver Concentrate - Sales (Metal Contained in Concentrate)			
Cajamarquilla	1,666,203	1,583,419	1,524,130
Três Marias	-	-	-
Juiz de Fora	37,269	155,229	173,917
Total Sales (in ounces)	1,703,472	1,738,648	1,698,047
Copper Cement - Sales			
Cajamarquilla	7,439	5,988	5,949
Três Marias	-	-	-
Juiz de Fora	108	0	143
Total Sales	7,547	5,988	6,091

(1) Sales are net of internal consumption, transfers between smelters, third-party purchases, and changes in inventories.

(2) Excluding the sulfuric acid transferred to the Três Marias smelter totaling 35,294 tonnes in 2025, and 40,610 tonnes and 50,634 tonnes in 2024 and 2023, respectively.

TAILINGS DISPOSAL

Regulatory framework

In Brazil, tailings dams' failures have triggered the issuance of new regulations. On January 25, 2019, there was a tragic failure of a tailings dam in the city of Brumadinho, in the state of Minas Gerais, Brazil. The Brumadinho dam, which belongs to Vale S.A., was originally built using the upstream method. A report by a panel of technical experts commissioned by Vale S.A. found that the tailings dam failure was the result of flow liquefaction within the tailings in the dam. Another upstream-method tailings dam in Brazil, the Fundão tailings dam owned by Samarco Mineração S.A., failed in November 2015. Each of these failures released muddy tailings downstream, flooded certain communities, caused fatalities, and resulted in extensive environmental damage to the surrounding area.

In response to tailings dam failures in Brazil, the state of Minas Gerais enacted regulations in February 2019 mandating the decommissioning of all upstream tailings dams and prohibiting construction of new dams using the upstream method, with the ANM requiring inactive upstream dams to be decommissioned by 2021 and active upstream dams by 2023, and also prohibiting construction or expansion of dams if communities are established within the self-rescue zone where timely evacuation in emergencies is not possible. Due to licensing difficulties for new dams in Minas Gerais, in February 2023 we began industrial-scale testing of dry stacking disposal technology at the Três Marias unit, achieving excellent results in 2025 by successfully filtering an average of 74.6% of the operation's material throughout the year steadily increasing from the 92.4% in 2024, with remaining residue disposed in the west 1 module of the Murici Deposit, and we began the licensing process for government approval of the dry stacking disposal facility. In 2020, Brazilian mining authorities enacted new dam-related procedures through Resolutions ANM 32/2020 and 51/2020 and Federal Law No. 14,066/2020, which established requirements for dam break studies and Emergency Action Plan ("EAP") certification, mandated EAPs for all mining dams storing tailings, and limited construction of new tailings dams if communities are in the self-rescue zone unless residents are removed or dam structures are reinforced per ANM-approved technical solutions, followed by Resolution No. 95/2022 (as amended by Resolution No. 130/2023) in 2022, which consolidated all dam safety standards and introduced the Risk Management Process for Mining Dams ("RMPMD") for high Associated Potential Damage ("APD") dams, with implementation of these requirements beginning in 2021.

In 2025, the ANM issued Resolution No. 220/2025, which establishes a new, consolidated regulatory framework for the safety of mining tailings dams, consolidating multiple prior regulatory instruments and replacing previous ANM resolutions on the subject. The regulation introduces a risk-based approach to dam oversight, including revised classification criteria, mandatory hypothetical dam break studies, enhanced reporting and monitoring obligations, independent periodic safety reviews, and reinforced emergency preparedness requirements. The regulation maintains the nationwide prohibition of the upstream dam construction method and imposes restrictions on the installation and operation of dams affecting designated self-rescue zones. Most provisions will become effective in August 2027 following a phased implementation period. Compliance with this regulation may require additional technical studies, operational adjustments, and ongoing regulatory compliance efforts, which could increase administrative and operating costs.

In 2022, we revised the EAP for all of our mining dams to comply with the new Brazilian regulations and the updated Terms of Reference issued in 2021. We submitted the EAPs to the relevant public authorities and published the documents on our website. In 2024, we also conducted the legally required Compliance and Operational Evaluation (COA), which verifies whether the EAPs meet regulatory requirements and are operationally feasible in an actual emergency. An external firm assessed the plans and issued the Compliance and Operability Report (COR) and the Declaration of Conformity and Operability (DCO).

On December 30, 2023, the State of Minas Gerais published State Decree No. 48,747/2023, regulating the environmental recovery policies that companies are required to have in place in the event of an accident or deactivation of a dam, pursuant to a prior state law passed in 2019. Under State Decree No. 48,747/2023, any dams that meet the requirements established under the 2019 Dam Safety Policy law must have an environmental guarantee policy in place. During the second quarter of 2024, the Decree was amended to modify, among other provisions, the deadline for mining companies to indicate the type(s) of guarantee method(s) they would use. We complied with this requirement in September 2024. The amendment also established that mining companies must have presented 50% of the chosen guarantees by the end of 2024. The guarantee can be made by one of the following methods: (i) cash deposit; (ii) CDB; (iii) bank guarantee; or (iv) guarantee insurance. On December 27, 2024, we filed the environmental recovery proposal, contracting for 50% of the guarantee. As of December 31, 2025, we estimated that US\$22.3 million would be required to cover the applicable dams under this policy. We have provided US\$11.1 million in bank guarantees covering all of our structures in Minas Gerais, representing 50% of the total required guarantee. A new State Decree, enacted on December 31, 2024, established that the timeline for the remaining installments will only begin after the approval of the proposal by the environmental agency. Nexa is still awaiting this approval before proceeding with the remaining obligations.

In 2024, a new resolution was published by the State of Minas Gerais (GMG Resolution No. 83, of the Civil Defense), in Brazil, which establishes the minimum requirements for the preparation, analysis and approval of the second section of the Dam Emergency Action Plan (*PAE*), following the powers of the Civil Defense of Minas Gerais, according to State Decree No. 48,078, of November 2020. This resolution aims to standardize and ensure the effectiveness of emergency measures in dams. Among the main new requirements are the implementation of geotechnical monitoring rooms, which operate 24 hours a day, 7 days a week, in addition to changes in the sounding of alert sirens.

In 2025, we implemented geotechnical monitoring rooms at the Três Marias, Juiz de Fora and Vazante units, in compliance with the new regulatory requirements. These measures reflect both industry expectations and our continued efforts to enhance dam safety, monitoring structures, and the effectiveness of emergency prevention and response actions. In Peru, the upstream method has long been an abandoned practice due to seismic concerns in the region. As of 1995, compulsory guidelines were passed prohibiting the use of such method. Subsequently, in 2014 environmental regulators, and later technical regulators, in 2015, adopted the same guidelines prohibiting construction and operation under the upstream method, allowing only the use and construction under the centerline and downstream methods. A specialized governmental agency conducts periodically inspections of tailings dam and mining infrastructure, ensuring technical and environmental regulations are complied with. In addition, mining operations must submit biannual stability studies, to which they are held liable. We follow these guidelines, and all operative tailings dams use the downstream and centerline lift methods.

In December 2023, the Peruvian government issued Supreme Decree No. 034-2023-EM which amended the Occupational Health and Safety in Mining regulation by adding a chapter on management and safety requirements for waste and tailings disposal facilities. The main requirements of the Decree can be summarized as new needs for studies to be conducted, updating the emergency response plan, contemplating a dam break scenario, implementation of alarm systems, among other devices. Most of the items were already or have been implemented. The alarm system is in the implementation phase.

In June 2024, the Peruvian government issued Resolution No. 122-2024-OS/CD, which introduced new reporting requirements for tailings disposal facilities. The resolution requires companies to submit monthly reports on the condition of these facilities, along with reports containing geotechnical monitoring interpretations. Additionally, the resolution mandates the use of specific reporting formats to ensure that the submitted information is sufficient for safety analysis conducted by the relevant authority.

Atacocha's tailing dam is currently supported by an authorization for operation up to an altitude of 4,128 meters above sea level ("masl"), which was granted by the Ministry of Energy and Mines in June 2025, the previous authorization was for 4,126 masl. Activities to expand the Atacocha's tailings dam to an elevation up to 4,131 masl are underway and the authorization for this new elevation is expected to be obtained by September of 2026.

El Porvenir's tailings dam is currently supported by an authorization for operation up to an altitude of 4,070 masl, which was granted by means of an automatic authorization due to the Ministry of Energy and Mines' unfulfillment of the legal term to complete its evaluation. The previous authorization was for 4,064 masl and no further elevations are currently planned.

Cerro Lindo has two dry filtered tailings facilities, Pahuaypite 1 and Pahuaypite 2. Pahuaypite 1 is supported by an authorization for operation up to an altitude of 2,110 masl, which was granted by the Ministry of Energy and Mines in July 2025, and activities for expansion to 2,185 masl are underway and projected for August 2026. Pahuaypite 2 is supported by an authorization for operation up to an altitude of 2,156 masl, which was granted by the Ministry of Energy and Mines in May 2025, and plans for further expansions are underway and projected for the third quarter of 2027.

For more information, see “Risk factors—Operational risks—The failure of a tailings dam could negatively impact our business, reputation and results of operations, and the implementation of associated regulations and decommissioning processes may be expensive.”

Our practices

We monitor tailings and waste dams in accordance with international best practice guidelines for management and project design based on criteria set by the International Commission on Large Dams (“ICOLD”) and the Canadian Dam Association (“CDA”) dam safety guidelines. In 2025, all of our tailings dams in Brazil received Stability Condition Declarations (“DCEs”), certifying that these facilities are safe and stable. In Brazil, these certifications are conducted twice a year for mining and smelting dams. In Peru, they occur once a year. As of the date of this annual report, all tailings dams in Peru and Brazil have undergone the audit process, and we concluded a technical report for these dams in 2025. In addition, all our dams and dry stacking structures are monitored under a system known as the *Sistema de Gestão de Barragens e Pilhas*. Tailing Dam Management System (“SIGBAR/SIGDEP”), which consists of procedures, tools and key performance indicators, monthly reports and monitoring and analysis by an independent Geotechnical Engineer. The monitoring procedures include regular inspections, as well as internal and external audits.

In addition to the above-mentioned policies and procedures, our SCP committee assists and advises our Board in supporting safe and sustainable business practices in our conduct and activities, as well as in reviewing technical, economic and social matters with respect to our projects.

In 2024, we began the process of implementing standards delineated by the Global Industry Standard Tailings Management (“GISTM”) at the Vazante unit. This is an important step in our tailings management process, as we are focused on incorporating global standards for tailing management into our operations. At the same time, we underwent a review process conducted by our first Independent Tailings Review Board (“ITRB”), a process prescribed by GISTM. The main objective of the ITRB is to provide technical and strategic recommendations to ensure the safety and compliance of dams with the international best practices, reducing environmental, social, and financial risks. The scope of the ITRB assessment varies depending on the applicable company and local legislation but generally includes the assessment of design and construction; operation and maintenance; risk and safety management; regulatory compliance; closure and rehabilitation plan; among others. The ITRB’s function helps increase the transparency and credibility of dam management, and increase satisfaction of the expectations of regulators, investors, and local communities. No critical items were found in the ITRB assessment of our tailings management process in Vazante. The main recommendations observed were on tailings governance. We plan to continue implementing the standards delineated by GISTM at other units in 2025.

In 2023, we began conducting engineering studies to evaluate the stability and confirm the construction method of old inactive industrial waste containment structures. These structures, since they became inactive more than 20 years ago, have been subject to decommissioning as monitored by the environmental agency of the State of Minas Gerais as part of the environmental licensing process for the unit. None of these structures contain mining tailings, water, or liquid waste. In 2024, we presented the progress of the studies to the respective state environmental foundation, and we plan to resume discussions in the first half of 2025 to present the results of the studies conducted and define next steps to classify these structures. In December 2025, following the presentation of the technical studies to the state environmental authority, we received a final decision stating that the structures are no longer characterized as dams and are currently classified as waste piles. As a result, we are no longer subject to the dam-related regulatory requirements applicable to those structures. In March 2025, we inaugurated the Geotechnical Monitoring Center (“GMC”) at our Três Marias unit. The GCM enables continuous real-time monitoring of tailings dams and structural stability, strengthening our commitment to safe and responsible operations. For more information about our SCP committee and ESG initiatives, see “Information on the Company—Environmental, Social and Governance (ESG).”

We use four disposal options for tailings. Our preferred option is to convert part or all of the tailings’ material into a commercially viable product. When the conversion method is not available, we prefer to use the backfill method for our underground mines. This technique involves removing moisture from tailings, creating a mixture with cement, and filling open spaces in the mines with this combination. We believe this method reduces safety risks related to tailings disposal given that it provides greater geotechnical stability and does not involve the building of a dam or dry stacking structure.

If neither the conversion nor the backfill method is available, we prioritize the dry stacking method, which consists of removing moisture from tailings and stacking them in layers to form an engineered mount that can be covered with soil and vegetation, allowing it to blend into the surrounding landscape. We have used both dry stacking and backfill at our Cerro Lindo mine in Peru since its startup. With the dry stacking facility at the Vazante unit, we achieved 90.9% of our tailings' disposal through dry stacking and 6.3% through backfill in 2025, reducing our exposure to tailings dams. In 2023, we began developing backfill and dry stacking methods at our Aripuanã unit, which entered the ramp-up phase in 2022. In 2025, 53.9% of our tailings at Aripuanã were disposed of through dry stacking and 46.0% through backfill. In February 2023, we initiated industrial-scale testing for dry stacking at the Três Marias unit. In 2024, the tests produced strong results, successfully filtering the residue, and we continued advancing the project throughout the pilot stages of industrial-scale operations, achieving an average filtration rate of 92.4% for the year. In 2025, we achieved an average of 74.6%, reaching 98.7% in December 2025. In 2024 we also began the environmental licensing process for a new dry stacking facility at Três Marias. In 2025, we continued to advance this process and are awaiting the decision of the environmental authority regarding the issuance of the preliminary and installation licenses.

When neither of these three methods is possible, we use tailings dams. The dam acts as a solid barrier engineered to prevent the tailings material from escaping to the environment around the mine. We use this method in Peru at our Cerro Pasco Complex (El Porvenir and Atacocha mines), and at our Cajamarquilla smelter, and in Brazil at our Vazante mine, and Juiz de Fora and Três Marias smelters. We also use a combination of the backfill method and tailings dams at our El Porvenir and Atacocha mines in Peru. At the Aripuanã mine, we have built a water dam to supply water to our operation. This dam is engineered with borrowed material and uses the technical control of compaction of the soil.

We currently raise our tailings dams using the following two methods: (i) the downstream method, where the building material is disposed downstream of the crest of the dam body; and (ii) the center-line method, where the building material is disposed partially downstream and partially upstream of the crest of the dam body, while maintaining the same centerline of the crest. Historically, we have also used the upstream method – where the building material is disposed upstream of the crest of the dam body – in certain instances – however, none of these tailings' dams are now active.

In addition, we also use effluent dams, which are dams used to treat water that contains tailings particles or other solid particles. The effluent dams separate the tailings particles or other solid particles from the water by retaining the particles and releasing the clean water downstream.

We currently have 40 disposal facilities, 22 of which are active and 18 inactive (including 13 industrial waste dams, 8 tailings dams, 6 waste piles, 5 dry stacking facilities, 5 effluent dams, 2 sediment dams and one water storage dam), 18 located in Peru and 22 in Brazil. We continue to implement responsible tailings management strategies, including backfill methods and dry stacking, to minimize our environmental impact. Additionally, decommissioning efforts are ongoing for non-operational dams, in line with our commitment to sustainable mining practices. The following is an overview of the dams we have in place at our principal mining and smelting facilities:

Peru

- At Cerro Lindo, we have no tailings dams, and tailings are disposed of using a combination of the backfill and dry stacking methods; there are two dry stacking facilities and two effluent dams.
- At the Cerro Pasco Complex (El Porvenir and Atacocha), tailings are disposed of using a combination of the backfill method and tailings dams; there are two tailings dams in active use and four non-operational tailings dams, which are in the process of being decommissioned.
- At Cajamarquilla, there are three industrial waste dams in active use and four non-operational industrial waste dams, which are in the process of being decommissioned.
- At the Sinaycocha property, which is part of our Atacocha mine property, there is one non-operational tailings dam.

Brazil

- At Vazante, tailings are disposed of using a combination of tailings dams, backfill and dry stacking methods; there is one dry stacking facility, one tailings dam and two sediment dams in active use.
- At Aripuanã, we have no tailings dams, and tailings are disposed of using a combination of the backfill and dry stacking methods; there is one dry stacking facility and one water storage dam in active use.
- At Juiz de Fora, there is one industrial waste dam and three effluent dams in active use, and six non-operational waste piles.
- At Três Marias, there are two industrial waste dams and one dry stacking facility in active use and three non-operational industrial waste dams, which are in the process of being decommissioned.

COMMERCIAL AND LOGISTICS

Commercial

Our commercial operations encompass the sale of zinc concentrates, copper, and lead concentrates, metallic zinc, zinc oxide and by-products across global markets. In our mining segment, zinc concentrates are sold to our own smelters on arm's length terms and, in the case of copper and lead, to third-party offtakers and international traders. In our smelting segment, refined products are sold predominantly through one-to-three-year supply contracts to end users in the galvanizing, die casting, alloy, and transformer sectors, as well as to international traders. We maintain commercial offices in São Paulo, Lima, Houston, and Luxembourg, and hold an estimated market share of 82.3% in Latin America (excluding Mexico) for refined zinc products. Our integrated mining-to-smelting model, combined with the geographic proximity of our operations to key customers in South America, provides logistical advantages and supports long-term customer relationships.

Concentrate sales

All the metal produced by our mines is processed into concentrates. Our mining operations sell the concentrates that they produce to third parties and to our own smelters pursuant to arm's length transactions. Each mine bears the cost of transporting the concentrate to the point of sale where the smelter or trader purchases the concentrate. The smelter or trader pays the mine for the percentage of metals contained in the concentrate, net of charges for treating the concentrate and refining the metals. The typical payable percentage is 85.0% for zinc contained in concentrate, 96.5% for copper contained in concentrate and 95.0% for lead contained in concentrate, minus treatment charges ("TC").

In 2025, 100% of our zinc concentrate production was directed to our smelting operations in Peru and Brazil. Sales prices are established mainly by reference to prices quoted on the LME less a discount based on either the treatment charge or smelter charge. The LME price quotes are based on prevailing LME average prices for the period set forth in our sale agreements and generally refer to either the month following the shipment or the period near the execution date of the relevant agreement. Internal transfer prices between our mining and smelting segments are calculated on an arm's length basis using market pricing, allowing for independent performance evaluation of each segment.

We also purchase zinc contained in concentrate from third-party suppliers to meet our raw material requirements. In 2025, 50.1% of the total zinc raw material consumption in our smelters was produced by our mines and 49.9% was purchased from third parties or obtained from secondary raw materials (excluding zinc oxide).

Mining and Smelting Integration

We operate an integrated mining and smelting business model designed to enhance efficiency, resilience, and value capture across the zinc value chain. This integration secures raw material supply for our smelters, mitigates commodity cycle volatility, and enables margin capture through operational synergies. Additionally, the geographic proximity between our mines and smelters reduces logistics costs and lead times, improving sustainability and overall operational performance.

Owning and operating both mining and smelting assets provides protection against commodity cycle fluctuations: during periods of high treatment charges, and refining charges ("RC"), smelting operations benefit from wider processing margins, while in low-charge environments, mining operations retains more value from concentrate sales. This structure stabilizes profitability, ensures supply security, and supports long-term investment. Historically, this integrated model has reduced earnings volatility, delivering more consistent returns over time, albeit with lower peaks compared to pure mining operations.

Sales

We sell most of our products through supply contracts with terms between one and three years. Only a small portion of our products are sold on the spot market. The agreements with our customers include customary international commercial terms, such as CIF, FOB and other delivery terms based on Incoterms 2010/2020. Our ability to deliver significant volumes across several regions worldwide makes us a significant supplier to a client base of end users and global traders. As a result, we can obtain competitive commercial terms for our products in the long-term.

In 2025, our top 10 metallic zinc customers represented approximately 52.9% of the total sales volume for such products, with our top 10 zinc oxide customers representing 63.1% of the total sales volume for that product, and our top five concentrate customers represented approximately 72.4% of the total sales volume for such products, in each case excluding intercompany sales.

Refined Metal Sales

Our metallic zinc and zinc oxide are sold worldwide through our commercial offices located in:

- São Paulo, Brazil;
- Lima, Peru;
- Houston, United States; and
- Luxembourg, Grand Duchy of Luxembourg.

We hold a leadership position in our home market, Latin America (excluding Mexico), with an estimated market share of 82.3% in 2025, according to our sales volume, import databases and demand forecasts sourced from specialized consultancy groups and customs websites. In other regions, we hold a strategic position, with estimated market share of 26.0% in Africa, 0.1% in North America, 3.1% in Europe and 0.3% in Asia, according to our sales volumes, import databases and demand forecasts sourced from specialized consultancy groups and customs websites.

In 2025, 81.9% of our total sales of refined metals were to customers in the continuous galvanizing, general galvanizing, die casting, transformers, and alloy segments and 18.1% of our total sales were to international traders. Our products are sold to end users in the transport, construction, infrastructure, consumer goods, and industrial machinery industries. Of our volume of metallic zinc and zinc oxide sales in 2025, 54.6% were to Latin America (including Mexico), 10.7% to Europe, 12.8% to the United States, 5.8% to Africa and 5.3% to Asia, with the remaining 10.8% to international traders. Sales prices are mainly established by reference to prices quoted on the LME plus a negotiable premium. Pricing is based on prevailing LME average prices for a period set forth in our sale agreements, which generally refer to the month or month prior to shipment.

The Cajamarquilla smelter sold approximately 346.4 thousand tonnes of metallic zinc, of which 35.3% of the volume was sold to Latin America (including Mexico), 16.8% to Europe, 21.0% to the United States, 2.2% to Africa, 8.7% to Asia and 16.0% to international traders. The Cajamarquilla smelter also produces sulfuric acid, silver concentrate, copper cement, manganese dioxide, oxides (ashes) and cadmium sticks. In 2025, Cajamarquilla produced 594,124 tonnes of sulfuric acid, of which 566,279 tonnes were sold. These products are sold primarily to international traders and local customers, with sulfuric acid delivered in bulk to customers in Chile through the ports of Mejillones and Barquito.

The Três Marias smelter sold approximately 122.0 thousand tonnes of metallic zinc and 34.5 thousand tonnes of zinc oxide, of which 83.7% of the volume was sold to Latin America (including Mexico), 3.2% to international traders, 11.6 % to Africa, and 1.4% to Europe. The Três Marias smelter also produces sulfuric acid, substantially all of which is consumed internally in the leach plant, with the remaining 877 tonnes sold, as well as copper/cobalt cement, oxides (ashes) and cadmium briquettes. These products are sold to local customers.

The Juiz de Fora smelter sold approximately 64.0 thousand tonnes of metallic zinc, of which 87.3% of the volume was sold to Latin America (including Mexico), 11.1% to Africa and 1.6% to international traders outside of Latin America. This Juiz de Fora smelter also produces sulfuric acid, sulfur dioxide, silver concentrate, copper sulfate, and zinc ash. In 2025, Juiz de Fora produced 105,832 tonnes of sulfuric acid, of which 50,170 tonnes were sold. These products are sold primarily to international traders and local customers.

By-products

We sell a wide variety of chemical and metallurgic by-products generated during the production processes in our smelters and mines to a broad customer base. Our sales include more than 30 different by-products, most of which are sold based on the characteristics of each market or region.

Marketing

Our marketing strategy is designed to strengthen brand presence and increase customer engagement across the markets and regions in which we operate. In addition to material excellence, we are committed to delivering enhanced customer experience, providing added value through technical support and an optimized supply chain that improves our customers' working capital efficiency.

Our principal objectives include brand recognition, lead generation and customer retention, supported by the use of digital tools and platforms such as social media, CRM systems and data analytics to deliver impactful and personalized campaigns. We continuously monitor key performance indicators, including ROI, conversion rates and customer satisfaction, to ensure alignment with our business goals and prevailing market trends.

We serve a diverse range of segments, including continuous and general galvanizing, die casting, transformers and alloys, as well as transport, construction, infrastructure, consumer goods and industrial machinery industries. In 2025, 81.9% of our total refined metals sales were to customers in these segments, while 18.1% were to international traders. Our solutions and services are tailored to the specific needs of each sector and region, reinforcing proximity and customer support.

Our commitment to customer experience is further reflected in our operational and logistical flexibility, supported by integrated management systems such as Enterprise Resource Planning platforms ("SAP"), which ensure speed, safety and efficiency from production to delivery. Efficient domestic and cross-border logistics and long-term contracts with transportation and storage partners enable us to respond promptly to customer needs, ensuring reliable and continuous supply of products and by-products.

Logistics

Logistics activities support the efficient transportation and export of mineral concentrates and refined products to domestic and international markets. Concentrates produced at mining operations are transported to the port of Callao primarily by truck and, in certain cases, by rail, where they are delivered to customers. Refinery operations coordinate the export logistics of products such as zinc metal, silver concentrate, copper cement, and sulfuric acid through warehouses and port facilities at Callao, using containerized cargo and specialized chemical vessels depending on product characteristics. The logistics framework relies on contracted transportation providers, third-party storage facilities, and port terminal operators, enabling operational flexibility and efficient cargo handling. These activities are supported by integrated management systems, including SAP, and are carried out in compliance with applicable regulatory, safety, and environmental standards.

Transportation and shipping

Mining Operations – Concentrates

Our Cerro Lindo operation transports 100.0% of its concentrates by road. The concentrates are trucked in a dedicated fleet through the Panamericana Sur road to the port of Callao, or to the Cajamarquilla smelter. This transportation is covered by long-term contracts entered with two trucking companies.

Our Atacocha and El Porvenir operations use both road and rail transportation. The concentrates are trucked through the Carretera Central and Canta Road to the warehouses of Callao, or to the Cajamarquilla smelter. We also use railway transportation to secure logistic availability and maintain high environmental standards. Our use of railway transportation is covered by a long-term contract.

The zinc concentrate produced in the Cerro Lindo, Atacocha and El Porvenir mines supply our Peruvian smelters, as well as third-party customers, while the lead and copper concentrates produced by these mines are transported to third-party customers to the warehouses of Callao. Our smelters use zinc concentrate supplied from our mines and from third-party suppliers to meet the blending needs of each smelter.

The third-party zinc concentrate supplied to the Brazilian smelters is loaded in bulk and sent to the Port of Rio de Janeiro, where it is cleared through customs and then loaded into railcars to the Juiz de Fora smelter or into trucks and railcars to the Três Marias smelter.

All the zinc concentrates produced at our Vazante mine is transported by road to the Três Marias smelter using three trucking companies. These mines also produce lead concentrates with contained silver, which are loaded into containers at the mine and are transported using trucks and trains to the port terminals in Itaguaí, Rio de Janeiro, Brazil, or Santos, São Paulo, Brazil. These concentrates are then exported in accordance with our annual contracts with container shipping lines.

All the zinc concentrate produced at our Aripuanã mine is transported by road to the Três Marias and Juiz de Fora smelters. The mine also produces lead and copper concentrates, which are either loaded into containers at the mine or transported by road to the external warehouse in Rondonópolis, Mato Grosso, Brazil, for subsequent container stuffing. They are then transported using trucks and trains to the port terminals in Santos, São Paulo, Brazil. All lead and copper concentrates are shipped to foreign customers.

Smelting Operations – Refined Metal

The metallic zinc produced in the Cajamarquilla smelter is transported by train or truck to the terminals. The material intended for the Peruvian domestic market is distributed by truck from the refinery, while exports to foreign markets are loaded into containers and transported by truck from these terminals to the port of Callao.

The metallic zinc produced in the Juiz de Fora and Três Marias smelters is transported by truck for either local customers or exports. In the case of exports, the material is transported to terminals near the ports of Rio de Janeiro or Itaguaí, both in the state of Rio de Janeiro, or the port of Santos, in the state of São Paulo. The material is then loaded into containers at the terminal and transported to the ports by truck, where it is shipped to customers abroad.

The metallic zinc and zinc oxide production process in our smelters also generates by-products. The most relevant by-products are sulfuric acid, silver concentrate and copper cement. Sulfuric acid produced in the Cajamarquilla smelter is loaded into dedicated tank railcars and transported to be stored. The sulfuric acid is then loaded in bulk into chemical ship-tanks destined to our customers and discharged at the Chilean ports of Mejillones and Barquito. The silver concentrate and the copper cement produced at Cajamarquilla is loaded into containers and are dispatched to the port of Callao in Peru. In Juiz de Fora, sulfuric acid is transported by truck to local and regional customers. The silver concentrate produced is loaded into containers and dispatched to the port of Itaguaí, while copper sulfate is dispatched to the local market.

We ship all our refined zinc exports in containers. Transportation of this material is covered by annual agreements with the liner shipping providers, which are responsible for approximately 90.0% of these shipments.

ENERGY

Power and energy supply

Energy supply is a critical component for our operational strategy, ensuring efficiency and sustainability across all business activities. Our operations primarily rely on hydroelectric energy, in Brazil sourced through a joint venture with Auren Energia S.A. ("Auren"), which owns shares of hydroelectric plants that have entered into long term contracts with us, but also through contracts that offer renewable energy certificates (such as I-RECs (International Renewable Energy Certificates)), and in Peru through long-term contracts with renewable energy certificates, which results in a low carbon-intensity profile for the company's electricity consumption. We are committed to reducing carbon footprint and improving energy efficiency, in line with global standards and regulatory requirements. Additionally, we employ technologies that help us with energy management, such as energy monitoring systems, and use AI to optimize consumption and costs and minimize environmental impact.

Peru

We contracted for 97.4% (1,963.2 GWh) of energy for our operations in our Peruvian operating units from the SEIN and consumed 100% (1,963.2 GWh) of this energy. The other 2.6% (52.0 GWh) of the energy for our Peruvian operating units was obtained from our own hydroelectric power plants and the Cajamarquilla cogeneration power plant. We own three hydroelectric power plants, two at Atacocha and one at El Porvenir, with a total installed gross rated capacity of 9,726 kilowatts, or kW.

We currently have contracts with Electroperú S.A., a well-known Peruvian state-owned company, which cover 100% (290.9 GWh), 100% (150.1 GWh) and 51.1% (33.9 GWh) of the energy requirements for our Cerro Lindo, El Porvenir and Atacocha units, respectively. In Cajamarquilla, Electroperú S.A. is responsible for 94.8% (1,429.8 GWh) of the energy supply. In 2025, we consumed 100% of the energy acquired through these contracts.

We currently also have a spot contract with Engie S.A. for the supply of energy to the Cajamarquilla unit. In 2025, 3.9% (58.5 GWh) of the energy requirements for our operations in Cajamarquilla was contracted from Engie and 100% of this energy was consumed.

In June 2025, we entered into a 10-year supply agreement with Kallpa S.A., a Peruvian energy company, for the supply of 278.0 MW of power from 2027 to 2036, which will replace our contracts with Electroperú and Engie, which expire in December 2026. For the contract with Kallpa we will use the International REC Standard certificate system to offset greenhouse gas emissions.

The following table sets forth the energy sources and energy consumption with respect to our Peruvian operating units in 2025.

Operating Unit	Energy Source	Total Energy Consumed in 2025 (GWh)	Percentage of Total Energy Usage in 2025
Third-Party			
Cerro Lindo	Third-Party (Electroperú S.A.)	290.9	14.8%
El Porvenir	Third-Party (Electroperú S.A.)	150.1	7.7%
Atacocha	Third-Party (Electroperú S.A.)	33.9	1.7%
Cajamarquilla	Third-Party (Engie S.A.)	58.5	3.0%
Cajamarquilla	Third-Party (Electroperú S.A.)	1,429.8	72.8%
Total Energy Usage		1,963.2	100%
Own Power Plant			
El Porvenir	Own Power Plant (Candelaria)	0.0	0%
Atacocha	Own Power Plant (Chaprin and Marcopampa)	32.5	62.5%
Cogeneration CJM	Two steam turbines with HRSG from <i>tostación</i>	19.5	37.5%
Total Energy Usage		52.0	100%

Hydroelectric plants*Candelaria*

The El Porvenir unit has one hydroelectric plant, the Candelaria Hydroelectric Power Plant, which is located along the Lloclla River. The plant contains three separate hydroelectric turbines, two of which have been operational since 1957 and the third since 1998, and which together have an installed rated capacity of 4.8 MW. However, since 2020, Candelaria Hydroelectric Power Plant has been shut off indefinitely.

Chaprin and Marcopampa

The Atacocha unit has two hydroelectric plants. The Chaprin Hydroelectric Power Plant is located along the Lagia Ravine near the Huallaga River. The plant has been operating since 1957, and its installed rated capacity is 5.9 MW. The Marcopampa Hydroelectric Power Plant has been operating since 1953, and was overhauled in 1984, increasing its installed rated capacity to 1.2 MW. Since 2020, Marcopampa has been shut off indefinitely. During 2025, Atacocha consumed 32.5 GWh from these plants, which represented approximately 48.9% of the energy usage of the mine.

Brazil

With respect to our Brazilian operations, as of December 31, 2025, energy supply comes from various contracts, and our subsidiary Pollarix.

Our subsidiary Pollarix holds direct or indirect interests in five hydroelectric power plants: a 22.4% equity participation in Enercan (Campos Novos), a 100.0% ownership of Picada, located in Minas Gerais, a 12.6% equity participation in the Amador Aguiar I, a 12.6% equity participation in the Amador Aguiar II and a 23.9% equity participation in the Igarapava. These plants have hydroelectric power facilities in the states of Minas Gerais, Santa Catarina, and São Paulo. The hydroelectric power plants of Pollarix provide energy to the four operating units (Vazante, Três Marias, Juiz de Fora and Aripuanã). With Pollarix, we have access to most of the energy needed for our operations. In 2025, it provided 1,276.8 GWh of energy, which represented 82.2% of our total energy purchased.

The only activity of Pollarix is to own our energy assets and sell energy to our Brazilian operating subsidiaries at market prices. We own all the common shares of Pollarix, which represents 33.3% of its total share capital. The remaining shares are preferred shares with limited voting rights, which are owned by Auren Energia S.A. ("Auren"). Under the terms of the preferred shares, Auren is entitled to dividends per share equal to 1.93 times the dividends per share payable on the common shares. See "Operating and Financial Review and Prospects—Overview—Key factors affecting our business and results of operations—Operating costs and expenses—Energy costs."

In May 2024, we entered into a 10-year supply agreement (from 2025 to 2034) with Eneva S.A. ("Eneva"), a Brazilian energy company. In 2025, Eneva provided a total supply of 219.0 GWh of energy, representing 14.1% of our total energy purchased. This amount of energy was acquired by Nexa Energy, our energy trading company, and distributed among all four operating units according to their consumption). All energy supplied under this contract is tied to I-REC certification, assuring the energy was generated from renewable sources.

In 2020, we began a 15-year renewable electric energy supply agreement with Furnas Centrais Elétricas S.A. ("Furnas"), a Brazilian energy company, controlled by Eletrobras, to help address the increasing energy demand in our operations. Furnas provides energy to two operating units (Três Marias and Juiz de Fora). The supply contract was terminated in February 2025. During these two months, Furnas provided a total supply of 33.7 GWh of energy, representing 2.2% of Nexa's total energy purchased.

We also have a contract with Auren, which provides electric energy from several energy generation sites to our Juiz de Fora and Três Marias operations in Brazil. In 2025, Auren provided a total supply of 16.9 GWh of energy, representing 1.1% of our total energy purchased.

During 2025, in addition to long-term contracts, to meet the energy demand of the operating units, it was necessary to purchase energy on the short-term market through Nexa Energy. These short-term contracts totaled 6.3 GWh, which represented 0.4% of Nexa Brazil total energy purchased.

The following table sets forth our energy sources and consumption with respect to our Brazilian operations in 2025.

Operating Unit	Energy Source	Total Energy Consumed in 2025 (GWh)	Percentage of Total Energy Usage in 2025
Third-Party and Own Power Plants			
Juiz de Fora	Pollarix S.A, Furnas	351.8	24.1%
Três Marias	S.A., Enercan, Auren	666.0	45.7%
Vazante	and Market	325.4	22.3%
Aripuanã		114.7	7.9%
Total Energy Usage		1,457.9	100%

Hydroelectric plants

Campos Novos

Campos Novos is a hydroelectric plant located along the Canoas River, in the state of Santa Catarina. The plant has an installed capacity of 880 MW and has been authorized by the Brazilian Energy Regulatory Agency (*Agência Nacional de Energia Elétrica* or ANEEL), to produce 382.2 MWavg. During 2025, Aripuanã, Vazante, Três Marias and Juiz de Fora units acquired 612.9 GWh from Campos Novos, which represented approximately 39.5% of our total energy purchased.

Picada

Picada is a hydroelectric plant located along the Peixe River in the state of Minas Gerais. The plant has an installed capacity of 50 MW and has been authorized by ANEEL to produce 29.6 MWavg. During 2025, the Vazante unit acquired 207.6 GWh, which represented 13.4% of our total energy purchased.

Igarapava

Igarapava is a hydroelectric plant located along the Grande River in the state of Sao Paulo. The plant has an installed capacity of 210 MW and has been authorized by ANEEL to produce 127.5 MWavg. During 2025, Aripuanã, Vazante, Três Marias and Juiz de Fora units acquired 214.7 GWh from Igarapava, which represented approximately 13.8% of our total energy purchased.

Amador Aguiar I

Amador Aguiar is a hydroelectric plant located along the Araguari River in the state of Minas Gerais. The plant has an installed capacity of 240 MW and has been authorized by ANEEL to produce 146.7 MWavg. During 2025, Aripuanã, Vazante, Três Marias and Juiz de Fora units acquired 129.4 GWh from Amador Aguiar I, which represented 8.3% of our total energy purchased.

Amador Aguiar II

Amador Aguiar is a hydroelectric plant located along the Araguari River in the state of Minas Gerais. The plant has an installed capacity of 210 MW and has been authorized by ANEEL to produce 125.2 MWavg. During 2025, Aripuanã, Vazante, Três Marias and Juiz de Fora units acquired 112.3 GWh from Amador Aguiar II, which represented 7.2% of our total energy purchased.

Nexa Energy

In June 2024, we acquired an energy trading company, currently named Nexa Energy, to maximize the benefits of our consumer units in the free energy market. The trading company acts as an intermediary in the negotiation of supply contracts, customizing them according to our specific needs, in addition to facilitating access to a variety of suppliers.

In certain situations, we may have a volume of available energy higher than our expected consumption, and Nexa Energy plays a crucial role in managing this surplus, enabling its trade in the free energy market. This operation can generate financial returns or mitigate potential financial losses, depending on market prices. It also prevents excess energy from being liquidated at the Electric Energy Commerce Chamber (*Câmara de Comercialização de Energia Elétrica* or “CCEE”), which is subject to the risk of non-payment by CCEE. Non-payment occurs when participants do not meet their financial obligations in the monthly settlements. In this case, the unpaid amounts are divided among all creditors, resulting in lower credits than the amount originally due.

In 2025, the amount of surplus energy traded by Nexa Energy was 158.7 MWavg.

CAPITAL EXPENDITURES

Our capital expenditures for the three years ended December 31, 2025, totaled US\$937.7 million. For 2026, we expect to invest approximately US\$380.8 million, an increase relative to 2025 investments, primarily attributed to higher mine development investments aimed at improving mine flexibility, sustaining capital requirements, and HS&E initiatives. Of the 2026 planned amount, US\$375.4 million are expected to be directed towards non-expansion investments and US\$5.4 million towards expansion projects.

The following table sets forth our capital expenditures for the periods indicated.

	For the Year Ended December 31,		
	2025	2024	2023
	(in millions of US\$)		
Capital Expenditures			
Expansion ⁽¹⁾	1.1	2.3	3.7
Modernization	3.3	3.3	3.8
Sustaining ⁽²⁾	333.9	268.0	292.8
Health, Safety and Environment ("HS&E")	14.6	12.2	15.7
Others	1.2	6.6	3.5
Subtotal	354.0	292.4	319.5
Reconciliation to Financial Statements ⁽³⁾	(2.1)	(15.5)	(10.5)
Total	351.9	276.8	309.0

(1) For a description of the projects, see "Information on the Company—Mining Operations."

(2) Investments related to the tailings storage facilities and mine development are also included in sustaining expenses.

(3) The amounts under "Reconciliation to Financial Statements" are mainly related to advance payment of imported materials, capitalization of interest net of advanced payments and tax credits.

Our capital allocation during these periods has focused on sustaining investments and mine development, reflecting a deliberate focus on extending life-of-mine, enhancing operational flexibility, and advancing tailings management across our operations. Investments on expansion have been lower following the completion of construction at Aripuanã in 2022, as we prioritize returns from existing assets and advance the permitting and engineering stages of future growth projects.

The principal drivers by year were as follows:

- In 2025, our capital expenditures totaled US\$351.9 million, a 27.1% increase compared to 2024, mainly due to investments related to Phase I of the Cerro Pasco Integration Project, specifically, the tailings pumping system, classified as sustaining, which were designed to enable safe, long-term tailings management at the complex, along with higher mine development spending and the impact of unfavorable foreign exchange variations.
- In 2024, our capital expenditures totaled US\$276.8 million, a 10.4% decrease compared to 2023, mainly due to favorable foreign exchange variations and ongoing initiatives to optimize capital allocation, which together more than offset continued investments in sustaining and mine development activities.
- In 2023, our capital expenditures were US\$309.0 million, an 18.9% decrease compared to 2022, mainly due to the conclusion of construction at Aripuanã, which had been our principal expansion project. This reduction in expansion capital expenditures was partially offset by increased sustaining capital expenditures, including US\$79.4 million invested in the ramp-up of the Aripuanã mine.

We expect to fund our capital expenditures through operating cash flow and our existing available liquidity. To the extent attractive financing instruments and terms are available, we may also access debt markets to optimize our capital structure. Actual capital expenditures may differ from current estimates in both amount and timing.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE (ESG)

We are committed to fully integrating ESG into our business through systematic planning and execution, prioritizing risk and impact management, and maintaining a positive social, economic and environmental legacy where we operate. Our practices related to ESG continuously evolve to adapt to new frameworks, regulatory and disclosure requirements, best practices, ESG-related trends and stakeholder feedback. We have a multidisciplinary task force that continuously assesses and refines our ESG strategy, including analyses of risks related to increasing severity of weather events, global and local weather conditions, and greenhouse gas emissions.

Our sustainability approach is set out in our Code of Conduct and Compliance and our ESG strategy. We adhere to the United Nations Global Compact, and our goals seek to contribute to fulfilling the UN's Sustainable Development Goals. Our ESG efforts focus on putting the health, safety and well-being of our people first; being environmentally responsible and accountable; respecting and fostering human rights; and supporting and dialoging with the communities where we operate.

Governance

Our Board of Directors oversees our ESG strategy and current material topics. The CNG Committee focuses on governance and supervises our social responsibility plans and policies. The SCP Committee oversees sustainability-related issues, including prioritization of safe and sustainable business practices, environmental, health, safety and social matters, tailings disposal management and governance, and capital projects monitoring. The SCP Committee also established our long-term targets and management's ESG plan.

The Audit Committee engages in ESG matters with a focus on financial reporting and preparedness to meet applicable disclosure requirements, including under the Corporate Sustainability Reporting Directive ("CSRD") and IFRS S1 and S2. The Audit Committee monitors the status of the CSRD implementation timeline, including the European Commission's proposal to defer the reporting obligation for companies in scope of the first wave to fiscal years beginning on or after January 1, 2027, with the first sustainability reports expected to be published in 2028.

ESG Commitments

ESG matters are important to our ability to responsibly develop mineral resources and sustain long-term operations, given the scale of our industrial activities and interaction with local communities and natural ecosystems. We seek to operate in accordance with applicable environmental regulations and internationally recognized industry standards, with a focus on safety performance, tailings and water management, climate change mitigation and adaptation, and community engagement and integrate ESG considerations into our strategic planning and risk-management processes. In 2025, we created an HS&E & ESG Committee under our Management Committee to support the overseeing and advancing of HS&E & ESG-related matters. This committee is responsible for (i) evaluating and monitoring our ESG strategy, (ii) prioritizing ESG-related investments, (iii) defining corporate guidelines, and (iv) monitoring ESG risks and opportunities. Our corporate ESG area was reorganized under one general management leadership, integrating Safety, Health, Environment, and ESG.

In 2025, we conducted a comprehensive materiality review to align our sustainability practices and disclosures with emerging regulatory and reporting requirements, including the CSRD and the IFRS S1 and S2 standards. This work incorporated the concept of double materiality and, in parallel, supported a reassessment of the public ESG targets and commitments we originally established in 2022.

We determined that a recalibration of those 2022 targets was necessary due to three concurrent developments: (i) the divestment of Morro Agudo, which removed a significant asset from our operations and affected the comparability of certain baselines; (ii) the transition of Aripuanã from a project-stage operation to ongoing operations, which enabled us to replace project-based assumptions with observed operating data; and (iii) the increased methodological rigor and disclosure traceability required under CSRD and IFRS S1/S2, which exceeds the level of documentation and consistency applied in our 2022 target-setting process. Accordingly, we reviewed our targets and commitments to enhance methodological consistency, strengthen transparency for investors, and improve alignment between our sustainability commitments, updated baselines, and medium- and long-term operational planning.

As a result of this review, we updated our baseline across three areas: GHG emissions; water consumption in mining; and water consumption in smelting. For GHG emissions, we also revised the target metric from an absolute basis to an intensity-based approach, and the updated GHG baseline underwent independent verification. Accordingly, we recalibrated certain public ESG targets, supported by operational sensitivity analyses and an assessment of technical constraints inherent to mining and smelting activities, under three governing principles:

- (i) technical robustness and data integrity;
- (ii) transparency regarding operational limitations; and
- (iii) long-term sustainability of commitments, ensuring alignment with economic value creation.

For further information on our revised commitments, including the rationale for these changes, as well as expanded discussion of our updated materiality matrix—encompassing a comprehensive analysis of the key differences from the prior framework and the rationale for each update—please refer to our Annual Sustainability Report, expected to be published in April 2026. Our Annual Sustainability Report is not incorporated by reference into this report and should not be considered part of it.

Safety

Health and safety is the main priority in our operations. Our underground and metallurgical operations carry inherent physical, chemical, and psychosocial risks that require active, daily management. Our commitments in this category are:

- Zero fatalities in all operating units (annually); and
- By 2030, position us in the first quartile of the mining industry with regard to the Total Recordable Injury Frequency Rate (“TRIFR”) based on the International Council on Mining and Metals (“ICMM”) benchmarks.

Unfortunately, in 2025 we recorded two fatalities at El Porvenir, following the three fatalities in 2024, at El Porvenir and Cerro Lindo in Peru, and at Vazante in Brazil. In 2025, the fatality was related to a post-seismic rockfall event. In 2024, the fatalities were related to an accident with mobile equipment during underground transport; failure in piping maintenance; and an accident with the conveyor system. The investigation of the five incidents identified a shared root, insufficient verification of critical controls at the point of task execution, particularly during non-routine tasks and shift transitions.

In direct response to those findings, we implemented three structural changes: (i) mandatory independent verification of critical controls before non-routine tasks at all underground operations; (ii) revision of shift transition protocols at the four units where fatal incidents occurred, with independent audit of the revised procedures; and (iii) permanent integration of fatal incident causal patterns into our risk matrix as reference cases for ongoing training and risk assessment.

Our 2025 data reflects material improvement to our injury frequency. Our TRIFR declined from 2.15 in 2023 and 2.36 in 2024, to 1.57 in 2025, approaching the first-quartile threshold of 1.46. This rate is defined as the number of injuries with and without lost time per one million man-hours worked. Our lost-work-time incident rate fell from 0.88 in 2023 and 1.11 in 2024, to 0.84 in 2025. This rate is defined as the number of injuries with lost time per one million man-hours worked. Severity rate in 2025 was 414, compared to 529 in 2024 and 64 in 2023. To calculate the severity rate, we consider the sum of lost, transported and debited days, divided by the total number of man-hours worked times one million. Our calculation reflects the ABNT NBR14280 methodology, which assigns 6,000 debited days per fatality. This methodology reflects the irreversibility of fatal outcomes and should be interpreted alongside frequency data, rather than as a substitute for it. The 2023 severity rate reflects a year with no fatalities and therefore carries no debited days under the ABNT NBR14280 methodology; the change to 529 in 2024 is attributable to the three fatal incidents recorded that year. We believe making direct year-over-year comparison of severity rates is informative only when read alongside fatality counts.

To support this improved trajectory, we continued implementing our G-MIRM project across all operating units, delivering 56,394 hours of training to 12,918 people in 2025. We deepened academic partnerships with the University of Sao Paulo in Brazil and the Sustainable Mining Institute - International Center of Excellence, University of Queensland, in Peru. In February 2025, we held our Safety Leadership Meeting in São Paulo to define annual safety priorities, featuring presentations from our CEO and vice-presidents, with more than 600 leaders completing the Humanized Leadership module.

Emissions Reduction

Mining and metals production are inherently energy-intensive activities, and our GHG emissions reflect this operational reality, as scope 1 emissions derive primarily from fuel combustion in mobile equipment and industrial process activities.

In 2022, we committed to (i) a 20% absolute reduction in Scope 1 emissions by 2030 against a 252.6 ktCO₂e baseline, (ii) carbon neutrality by 2040, and (iii) net-zero emissions by 2050. In 2025, we revised these commitments, adopting a revised 276.3 ktCO₂e baseline and replacing our absolute reduction target with an emissions intensity target. We also added a commitment to maintain our electricity matrix almost entirely based on renewable sources, and replaced our 2040 and 2050 long-term outcome targets with intermediate process milestones, which will identify operational and strategic responses to physical and transition climate risks, establishing the analytical foundation for restoring long-term outcome targets, in response to Brazil's enactment of Law No. 15,052, which establishes a national emissions trading system with carbon credit trading mechanisms expected by 2030 and which we intend to incorporate into our long-term target-setting framework. Our new commitments as of 2025 are:

- 10% reduction in Scope 1 emissions intensity per tonne of zinc (tCO₂e/tZn) by 2030;
- Maintain Nexa's electricity matrix almost entirely based on renewable sources by 2030;
- Develop a Climate Change Adaptation Plan by 2030; and
- Define, until 2035 a carbon neutrality roadmap.

As of 2025, our Scope 1 emissions totaled 210.7 ktCO₂e, a 7.1% decrease versus 2024 and a 23.7% decrease versus our updated 2020 baseline, while our emissions intensity stood at 0.37 tCO₂e/tZn, reflecting a 6.6% compared to 2024, and a 20.8% reduction against the same baseline. In June 2025, we signed a sector-wide memorandum of understanding with eight other mining companies to eliminate CO₂ emissions and received Gold Seal certification from Fundação Getúlio Vargas under the Brazilian GHG Protocol Program for the rigor of our carbon accounting and disclosure standards.

Our electrical energy supply has remained predominantly renewable, with renewable sources accounting for 98.4%, while our life-cycle carbon footprint for zinc production ranks among the lowest reported in the industry, as verified against International Zinc Association ("IZA") data by an independent third party.

Water usage and disposal

Water management is a material operational and social risk across our portfolio, with exposure concentrated at Cerro Lindo in Peru and Aripuanã in Brazil. Our commitment is to have a 10% reduction in specific water consumption at both mining and smelting operations by 2030. In 2025, we revised the baselines underpinning these targets to reflect the divestment of Morro Agudo and the full inclusion of Aripuanã's operational data.

Mining Operations

- Our revised 2030 target is 1.93 m³/ton of ROM, measured against an updated 2024 baseline of 2.26 m³/ton of ROM. Our previous target was set against a 2021 baseline of 1.68 m³/ton of ROM.

In 2025, specific water consumption improved to 2.01 m³/ton of ROM, compared to 2.26 m³/ton of ROM in 2024, and our water recirculation rate was 83.5%, compared to 84.2% in 2024 and 82.5% in 2023. Active investments include a wastewater treatment facility in development at Aripuanã, where construction is expected to begin in the first half of 2026, directly targeting the gap between current performance and our 2030 target.

Smelting Operations

- Our revised 2030 target is 18.09 m³/ton of cathode zinc, measured against an updated 2023 baseline of 20.10 m³/ton of cathode zinc. We revised the base production unit to cathode zinc to better reflect core operational efficiency. Our previous target was set against a 2021 baseline referenced against total metal output.

In 2025, smelting consumption was 20.48 m³/ton of cathode zinc, compared to 19.66 m³/ton of cathode zinc in 2024. Active investments include a water efficiency and effluent reuse project at Cajamarquilla, which increases the volume of treated water reused within the smelting cycle, and an industrial wastewater treatment plant under construction at Juiz de Fora, with completion expected in 2026.

Materiality Matrix

In 2025, we conducted our first comprehensive revision of our materiality matrix since 2023, driven by the adoption of CSRD and IFRS S1/S2 double materiality requirements, updated regulatory benchmarking across Brazil and Peru, and changes to our operating portfolio, including the addition of Aripuanã and the divestment of Morro Agudo. The process involved consultation with 507 stakeholders across both countries.

The revised matrix retains eight priority topics: Dam, Waste and Tailings Management; Climate Change; Natural Capital; Environmental Incident Risk Management; Social Development; Corporate Integrity and Governance; Human Capital; and Health, Safety and Well-being. Key changes include the addition of Environmental Incident Risk Management as a standalone priority topic, the integration of Plurality into Human Capital, and the

Environmental

- **Dam, waste and tailings management.** Tailings management is among the most consequential operational and reputational risks we carry. High volumes of tailings, increasingly stringent regulatory requirements under frameworks such as GISTM, and the irreversible nature of structural failures make this a priority that cannot be managed through compliance alone. Our strategic response has been to systematically migrate away from wet tailings storage toward dry stacking, a method that significantly reduces the volume of water-saturated material storage and the associated failure risk. Cerro Lindo, Vazante, Aripuanã and Três Marias all operate dry stacking systems. In 2025, we filtered an average of 34.7% of tailings material across all operations and through backfill method 26.6%, with only 38.6% disposed in tailings dams. Additionally, notable results were achieved at Três Marias, filtering an average of 74.6% of tailings material, a meaningful operational benchmark that we track against GISTM-aligned standards and intend to improve further as capital investment in filtration capacity continues.
- **Climate change.** Our Scope 1 emissions derive mainly from fuel combustion in mobile equipment and industrial process activities. In 2025, our electrical energy supply was 98.4% renewable, primarily hydroelectric, which structurally limits our Scope 2 exposure relative to peers operating on carbon-intensive grids. Transition risks we actively monitor include potential regulatory carbon pricing in Brazil and Peru, carbon-market volatility affecting the economics of offset strategies, and the long-term operational viability of high-emission mobile equipment fleets as decarbonization standards tighten in the mining sector. In 2025, we revised our emissions targets. For a description of these revised commitments and for 2025 performance data, see the Emissions Reduction section above.

- **Natural Capital.** Water availability is a material operational and social risk, particularly at Cerro Lindo, which operates in a water-stressed coastal environment and sources desalinated seawater for operational use, eliminating direct competition with local communities for freshwater. Our target is a 10% reduction in specific water consumption at both mining and smelting operations by 2030, against updated baselines established in 2025. For further detail on our revised targets, 2025 performance data, and active efficiency investments, see the Water Usage and Disposal section above.
- **Environmental Incident Risk Management:** Our operations generate atmospheric emissions, effluents, and solid waste streams that are managed under site-specific environmental control systems. The primary incident risk vectors are unplanned releases of process water or tailings, excess atmospheric emissions during abnormal operations, and dust dispersion from exposed surfaces, particularly during high-rainfall periods in Brazil and dry seasons in Peru. In 2025, we invested US\$32.5 million in environmental management initiatives and incurred US\$22.3 million in environmental operating expenditures. These amounts include spending on environmental compliance, pollution control systems, monitoring programs, and other environmental management activities.

Social

- **Social development.** Our acceptance among local communities is a direct input to operational continuity, particularly in Peru, where proximity to communities and historically contested resource rights require sustained, substantive engagement. In 2025, we invested US\$9.4 million in social initiatives in Peru and US\$1.9 million in Brazil, supporting 169 social projects that benefited more than 6,000 people. Community tensions or conflicts remain a monitored risk. Though to date we have not experienced operational disruptions attributable to community opposition, we actively track early indicators and maintain formal grievance mechanisms at each operating unit.

Governance

- **Corporate Integrity and Governance.** Business conduct practices create risks and opportunities for corporate integrity. Despite continued enhancements to our reporting mechanisms and awareness efforts through our Ethics Line and Compliance training and communications, opportunities remain to strengthen whistleblower protection, including external access and safeguards against retaliation. Political engagement can support sectoral policy development but requires clear governance to prevent misalignment with ESG commitments. Acting responsibly and transparently is one of our core values. We are committed to high standards of ethics and integrity across the entire company, whose principles stated in our Code of Conduct and reflected in our Compliance Program. Our Audit Committee and Board of directors are main agents in promoting the program and ensuring compliance with our Code of Conduct. In 2025, we completed a comprehensive revision of our Code of Conduct, one of the core elements of our Compliance Program. The updated version, which is expected to be approved by the Board of Directors in the upcoming months, was streamlined to enhance clarity and address emerging topics such as AI and cybersecurity. During the year, all employees received training on the Code of Conduct and our Anti-Corruption Policy, covering, among other topics, anti-corruption practices, conflicts of interest, data privacy, and AI. Additionally, we finalized a comprehensive review of our compliance policies, which are also expected to be approved by the Board of Directors in the upcoming months. In addition, we developed practical guidelines to further support employee understanding and application of our standards. We also activated a Cybersecurity Emergency Committee and incorporated AI-related risks into our strategic risk matrix. For further information on our Company's governance, see "Corporate Governance, Management and employees."

- **Human Capital:** Workforce stability, technical capability, and occupational health are material to operational continuity in underground mining and smelting. Our workforce faces distinct risk profiles depending on operational context: shift-intensive underground work, exposure to chemical agents in metallurgical environments, and geographic isolation at remote sites. We manage these risks through occupational health monitoring, structured mental health support via our Employee Assistance Program, and a compensation structure that includes fixed and variable pay linked to both individual performance and ESG outcomes. In 2025, we delivered 203,744 training hours across the organization, 32.8 hours per employee, including mandatory safety training, technical development, and leadership programs. ESG performance targets have been embedded in senior leadership compensation since 2022 and are customized by role for all other employees.
- **Health, safety and well-being.** Underground and metallurgical operations present the most direct risks to worker safety that we manage. In 2025, we recorded two fatal accidents and a TRIFR of 1.57, down from 2.36 in 2024 and approaching the first-quartile ICMM benchmark of 1.46. The zero-fatality commitment was not met in 2024 or 2025. For the full account of safety performance, program investments, and structural corrective actions, see the Safety section above.

Artificial Intelligence

In 2025, we launched the Nex.AI Program to enhance data and artificial intelligence capabilities across the organization, with a focus on operational efficiency, risk management, and data-driven decision-making. The Nex.AI Program is structured around three main pillars: (i) Data, Analytics, and AI Initiatives targeting measurable business outcomes; (ii) Regulatory and Governance of data and AI use; and (iii) Culture and People promoting data literacy and capability building across the workforce.

Our corporate data infrastructure will support these pillars through standardized, quality, and traceable data essential for scalable AI deployment. The main features of the implementation of the Nex.AI program are:

- (i) **Technology Framework.** The program aims to leverage scalable cloud platforms, analytics tools, and proprietary models, ensuring flexibility, scalability, and compliance with cybersecurity and data protection standards;
- (ii) **Governance.** Policies and processes will be in place for data management, model development, and lifecycle management of AI solutions, focusing on quality, accountability, and transparency;
- (iii) **Risk Management.** Through measures such as Responsible AI policies and training, we aim to manage risks related to data privacy and cybersecurity;
- (iv) **Future Actions.** We will continue to expand AI policies, capabilities, prioritizing disciplined and incremental adoption to support operational resilience, efficiency, and long-term value creation.

REGULATORY MATTERS

We are subject to a wide range of governmental regulations in the jurisdictions in which we operate. The following discussion summarizes the kinds of regulations that have the most significant impact on our operations.

Brazilian regulatory framework

Mining rights and regulation of mining activities

Mining activities in Brazil are governed by the Brazilian Federal Constitution of 1988, the Brazilian Mining Code and other decrees, laws, ordinances, and regulations, such as Decree nº 9.406/2018 which renewed the regulation of the Mining Code. These regulations impose several obligations on mining companies, including rules for exploration and exploitation of mineral deposits, health and safety of personnel and local communities where mines are located, and environmental protection and remediation measures. The MME and ANM regulate mining activities in Brazil, whereas the ANM is responsible for monitoring, analyzing, and promoting the performance of the Brazilian mineral economy, granting rights related to the exploration and exploitation of mineral resources and mineral reserves and other related activities in Brazil.

Under the Brazilian Federal Constitution, surface property rights are distinct from mineral rights, which belong exclusively to the Brazilian Federal Government, the sole entity responsible for governing mineral exploration and mining activity in Brazil.

Summary of Brazilian concessions

In Brazil, we hold 74 exploration authorizations, 10 mining concessions, 5 mining concession applications, 2 rights to apply for mining concession and 9 exploration authorization applications, which we broadly and collectively refer herein to as mineral rights, that cover a total area of 405,645.7 hectares, of which: (i) 343,738.2 hectares, or 84.8%, are exploration authorizations, (ii) 5,706.1 hectares, or 1.4%, are mining concessions, (iii) 1,641.8 hectares, or 0.4%, are mining concession applications, (iv) 1,344.5 hectares, or 0.3%, are rights to apply for mining concession and (v) 53,215.1 hectares, or 13.1%, remain as exploration authorization applications and are presently under initial geological reconnaissance.

The term of each of the mining concessions mentioned above is valid for the life of mine, evaluated pursuant to the specific mining project. All our mineral rights in Brazil are in good standing. Maintaining our mineral rights in Brazil in good standing involves: (i) maintaining production on the mineral concessions and/or satisfying the ANM's requirements if production has been suspended; (ii) developing exploration work and paying an annual property fee for the exploration authorizations; and (iii) complying with all the legal requirements, including not only as to mining, but also as to environmental and real estate requirements applicable to claiming a property with respect to exploration authorization applications.

Failure to pay the applicable fees for any given year will result in us forfeiting our mineral rights. As of December 31, 2025, we have paid all applicable royalties, taxes, and fees on our mineral rights. Our mineral rights in Brazil that are not currently undergoing exploration, or production will not expire unless we fail to timely pay the applicable royalties, taxes, and fees, as well as the applicable penalties and meet the ANM's and environmental authorities' requirements, as applicable. See "Information on the Company—Regulatory Matters—Brazilian regulatory framework—Royalties and other taxes on mining activities."

The following table summarizes our mineral rights in Brazil.

	Mine/Project	Mineral Rights	
		Titles	Area (hectares)
Mines	Vazante	36	13,453.4
	Aripuanã	12	36,854.0
Prospective Projects	Various	52	355,338.3
Total		100	405,645.7

Exploration authorization and mining concession regimes

Exploration authorizations grant the rights to conduct exploration activities for a period from one to four years, which may be renewable for an additional period (and potentially additional renewals on a case-by-case basis). Exploration authorizations are granted on a first come, first serve basis, and the ANM will only grant one exploration authorization for any given area. Mining concessions are currently valid until the mineral deposit reserves are exhausted. Mining concessions may be transferred to eligible third parties with the ANM's prior approval, pursuant to applicable legislation.

Decommissioning

In Brazil, enterprises dedicated to the exploitation of mineral resources shall submit a recovery plan to receive a mining concession. Accordingly, the environmental recovery of the degraded areas caused by mineral exploitation activities shall have been planned since their conception. According to Minas Gerais law, entrepreneurs must also submit to the environmental agency an environmental plan for closing two years before the planned mine closing. According to federal law, all mine closure plans must be approved by the ANM as well as the environmental licensing agency. We have been complying with legal requirements regarding mine closure plans and continue to comply with all regulatory and environmental requirements.

Royalties and other taxes on mining activities

Revenues from mining activities are subject to the Brazilian mining royalty, *Compensação Financeira pela Exploração de Recursos Minerais* ("CFEM"), which is paid to the ANM. CFEM is a monthly royalty based on gross revenue, excluding taxes on the sale of minerals. When the produced minerals are used in its internal industrial processes, CFEM is determined based on the costs incurred to produce them. CFEM is determined by a reference price of the respective mineral to be defined by the ANM. The applicable rate varies according to the mineral product (currently 2.0% for zinc, lead, copper, and silver). In addition, we are required to make certain fee payments for exploration authorizations known as the Annual Fee per Hectare (*Taxa I por Hectare*). There is also a monthly inspection fee related to the transfer and commercialization of certain minerals in some Brazilian states, such as Minas Gerais and Mato Grosso, where the concessions are located.

Since the State of Minas Gerais granted a tax benefit suspending VAT on the commercialization of metallic zinc by companies incorporated in the State, regulatory scrutiny of operations in the State has increased. We have provided all the requested information by the tax authorities in this process of reviewing the commercialization of our products throughout the zinc value chain. In case the buyer does not comply with the VAT deferred regulation, we may be subject to (i) subsidiary liability (pursuant to art. 57, IN, RICMS/MG); or (ii) joint liability (pursuant to art. 124, I of National Tax Code and art. 56, XI, RICMS/MG). For additional information, see "Risk Factors—Changes in tax laws, and any related tax agreements we have entered into or may enter into with local governments, may increase our tax burden and, as a result, could adversely affect our business, financial position and results of operations."

The states of Mato Grosso and Minas Gerais, among others in Brazil, approved a tax on mining operations collected according to the nature of the extracted ore.

Environmental regulations

We are subject to several environmental regulations related to, among other matters, water resources, caves, waste management, contaminated areas, areas of permanent preservation, conservation of protected areas and environmental recovery policies. For more information on environmental recovery policies that we are subject to, see "Information on the Company—Mining Operations—Tailings disposal." Specifically, we have taken the following actions regarding contaminated areas and areas of permanent preservation:

Contaminated areas. We have conducted environmental assessments on our operation units to verify the existence of contamination in groundwater and soil. The assessments prepared for the Brazilian units identified deviations in soil, groundwater, and surface water quality standards. We are committed to improving the management of areas identified as contaminated. For most of the identified deviations, we developed a robust remediation plan in order to comply with all legal requirements. We recorded provisions in our consolidated financial statements in respect of any potential liabilities associated with these deviations from applicable standards. See "Operating and Financial Review and Prospects—Overview—Key factors affecting our business and results of operations—Environmental expenses." We continue to conduct similar assessments with respect to the Peruvian operating units.

Areas of permanent preservation. Permanent Preservation Areas (*Áreas de Preservação Permanente*, or APP) are areas that, because of their importance for preserving water resources, geological stability, biodiversity protection and erosion control, receive special legal protection. The existence of such protected areas within a property, whether in urban or rural locations, may cause restrictions to the performance of the intended activities. Interference or removal of APP vegetation is only allowed in cases of public utility (such as mining activities), social interest, or low environmental impact, if there is a prior authorization from the applicable environmental authorities. Most of our properties in the state of Minas Gerais interfere in APPs in some way, however all are authorized by environmental agencies. For such properties, we have either established an advanced ongoing regularization process or have started the process for other properties. The regularization process includes the implementation of rigid controls over the properties.

Tailings dams. In December 2023, the State of Minas Gerais published State Decree No. 48,747/2023, regulating the environmental recovery policies that companies are required to have in place in the event of an accident or deactivation of a dam. Under State Decree No. 48,747/2023, any dams that meet the requirements established under the 2019 Dam Safety Policy law must have an environmental guarantee policy in place. During the second quarter of 2024, the Decree was amended to modify, among other provisions, the deadline for mining companies to indicate the type(s) of guarantee method(s) they would use. We complied with this requirement in 2024. The amendment also established that mining companies must have presented 50% of the chosen guarantees by the end of 2024. The guarantee can be made by one of the following methods: (i) cash deposit; (ii) CDB; (iii) bank guarantee; or (iv) guarantee insurance. On December 27, 2024, we filed the environmental recovery proposal, contracting for 50% of the guarantee. As of December 31, 2025, we estimated that US\$22.3 million would be required to cover the applicable dams under this policy. We have provided US\$11.1 million in bank guarantees covering all of our structures in Minas Gerais, representing 50% of the total required guarantee. A new State Decree, enacted on December 31, 2024, established that the timeline for the remaining installments will only begin after the approval of the proposal by the environmental agency. We are still awaiting such approval before proceeding with the remaining obligations. For more information, see “Information on the Company—Tailings Disposal—Regulatory framework.”

In 2024, a new resolution was published by the State of Minas Gerais (GMG Resolution No. 83, of the Civil Defense), in Brazil, which establishes the minimum requirements for the preparation, analysis and approval of the second section of the Dam Emergency Action Plan (*PAE*), following the powers of the Civil Defense of Minas Gerais, according to State Decree No. 48,078, of November 2020. This resolution aims to standardize and ensure the effectiveness of emergency measures in dams. Among the main new requirements are the implementation of geotechnical monitoring rooms, which operate 24 hours a day, 7 days a week, in addition to changes in the sounding of alert sirens, which were implemented in the units of Três Marias, Juiz de Fora and Vazante. These new requirements reflect the industry’s, and therefore our focus on improvement of safety and monitoring structures, increasing the efficiency of emergency prevention and response actions at dams. See “Information on the Company—Mining Operations—Tailings disposal” and Notes 27 and 32(b) of our consolidated financial statements.

In 2025, the ANM issued Resolution No. 220/2025, which establishes a new, consolidated regulatory framework for tailings dam safety with stricter oversight, monitoring and emergency requirements, while maintaining the ban on upstream dams. Most provisions take effect in August 2027 and may increase compliance costs due to additional technical and operational requirements. For more information, see “Information on the Company—Tailings Disposal—Regulatory framework.”

Environmental licenses

The Brazilian Federal Constitution grants federal, state and municipal governments the authority to issue environmental protection laws and to publish regulations based on those laws. While the Brazilian federal government has authority to issue environmental regulations setting general standards for environmental protection, state governments have the authority to issue stricter environmental regulations. Municipal governments may only issue regulations regarding matters of local interest or as a supplement to federal or state laws.

Under Brazilian law, the construction, installation, expansion and operation of any establishment or activity that uses environmental resources, or is deemed to be actually or potentially polluting, as well as those capable of causing any kind of environmental degradation, is subject to a prior licensing process.

Notably, in addition to the general guidelines set by the Brazilian federal government, each state is legally competent to promulgate specific regulations governing environmental licensing procedures under its jurisdiction. Depending on the level of environmental impact caused by the exploration/exploitation activities, the procedures for obtaining an environmental license may require assessment of the environmental impact and public hearings, which may considerably increase the complexity and duration of the licensing process and expose the exploration/exploitation activities to potential legal claims.

In August 2025, Brazil enacted the General Environmental Licensing Law (Federal Law No. 15,090/2025), establishing a unified national framework for environmental licensing procedures. The law seeks to align legislation and regulation across federal, state, and municipal authorities within the National Environmental System (“Sisnama”), strengthening legal certainty, transparency, and efficiency in permitting processes by defining guiding principles for licensing, including public participation, disclosure of environmental studies, streamlined procedures, and a strengthened focus on environmental risk assessment and prevention.

Environmental liability

Environmental liability may be determined by civil, administrative and criminal courts, with the application of administrative and criminal sanctions, in addition to the obligation to redress the damages caused. All our operating units, except for Cerro Lindo and Aripuanã, have obtained certification under the ISO 14001 standard.

Regulation of other activities

In addition to mining and environmental regulation, we must abide by regulations related to, among other things, the use of explosives and fuel storage. We are also subject to more general legislation on labor, occupational health and safety, and support of communities near mines, among other matters.

Peruvian regulatory framework

Mining rights and regulation of mining activities

In Peru, private landowners own surface land, while the government retains ownership of all subsurface land and mineral resources, with the Peruvian Constitution establishing that mineral resources are the property of the Nation and the State is sovereign in their administration. The Peruvian government may establish by law the conditions for granting exploitation rights and titles to individuals and legal entities. The General Mining Law (*Texto Único Ordenado de la Ley General de Minería*) is the primary legislation governing metallic and non-metallic mining activities in Peru and is complemented by regulations approved by the Ministry of Energy and Mines (MINEM), which through its regulatory body, the Dirección General de Minería (“DGM”), proposes and evaluates mining sector regulations and authorizes the commencement of mining activities. Mining activities such as exploration, exploitation, mining labor, beneficiation, and mining transport are conducted exclusively through concessions granted by the Peruvian State via the *Instituto Geológico, Minero y Metalúrgico*, though concession holders must separately purchase surface land, reach temporary use agreements with landowners, or obtain legal easements from MINEM to develop exploration or exploitation works.

Mining concessions are irrevocable and have an indefinite term, provided holders comply with obligations including payment of annual validity fees per hectare and achievement of minimum annual production targets, with failure to pay fees or production penalties for two consecutive years resulting in cancellation. Concession holders must also satisfy minimum annual production thresholds within a specified period—currently thirty years beginning the year after grant for concessions granted after October 2008, and thirty years beginning January 2009, for earlier concessions—or face potential cancellation. In September 2024, Congress began reviewing an amendment to the General Mining Law that would increase annual validity fees from US\$3 to US\$5 per hectare and reduce the term to satisfy minimum annual production from thirty years to twenty years, which, if adopted, could have a material impact on our business and projects. As of the date of this annual report, the amendment has not been adopted.

Additionally, on June 26, 2024, Supreme Decree No. 011-2024-EM was enacted, allowing any holder of a beneficiation concession (*concesión de beneficio*) to have a tolerance margin of up to 10% additional to the authorized daily installed capacity of mineral processing, without the need to apply to the corresponding beneficiation concession modification procedure. It should be noted that the additional processing capacity must not result from the installation of new equipment, new auxiliary facilities, repowering, or modification of the operating parameters of the equipment, process improvements, among other changes that require the prior approval of the amendment of the beneficiation concession.

Summary of Peruvian concessions

In Peru, we hold, through Nexa Peru and its subsidiaries, 477 mining and exploration concessions, which cover a total area of 178,261.1 hectares and 4 mineral claims totaling 1,500.0 hectares. Of our mines in Peru, the Atacocha mine property includes 147 mining concessions that cover an area of 2,872.5 hectares and one beneficiation concession, the El Porvenir mine property includes 25 mining concessions that cover an area of 4,846.7 hectares and one beneficiation concession, the Cerro Lindo mine has 68 mining concessions that cover an area of 44,171.3 hectares and one beneficiation concession. In addition, we have 95 mineral rights concessions for greenfield projects in Peru that cover a total area of 34,518.3 hectares. Our prospective projects include 42 mining concessions that cover an area of 91,852.3 hectares.

All our mining and processing concessions in Peru are in good standing. Maintaining our concessions in Peru in good standing involves, among other requirements, (i) paying the annual validity fee and production penalties (when applicable) for mining concessions with no production or with no effective exploration or (ii) paying the annual validity fee and complying with minimum production or investment requirements established in mining law.

Failure to pay such validity fees or production penalties (when applicable) for two consecutive years results in the cancellation of the respective mining concessions or beneficiation concessions granted by the Peruvian government. Our mining and beneficiation concessions will not expire unless we do not timely comply in paying these fees or with the minimum production or investment required by law in respect of such rights and depending on the applicable regime.

The following table summarizes our mining concessions in Peru:

	Mine/Project	Concessions	
		Titles	Area (hectares)
Mines	Atacocha	147	2,872.5
	El Porvenir	25	4,846.7
	Cerro Lindo	68	44,171.3
	Florida Canyon Zinc	11	8,700.0
Greenfield Projects	Hilarión	48	9,374.0
	Magistral	36	16,444.3
Prospective Projects	Various	147	91,852.3
Total		477	178,261.1

Exploration and authorization and mining concession regimes

Mining concessions are granted for an indefinite term, though dependent on the fulfillment of certain legal obligations. The commencement and re-commencement of exploration and/or exploitation mining activities are subject to the prior obtainment of an authorization for the commencement of activities before the DGM. Such authorizations could be subject to a prior consultation procedure with indigenous communities, conducted by MINEM, if mining activities were to impact said communities' collective rights and territories as determined by the Ministry of Culture.

As of December 31, 2025, we primarily owned metallic mining concessions with respect to zinc, copper, silver and lead. Our mining rights and concessions are in full force and effect under applicable Peruvian laws. We believe that we comply in all material respects with the terms and requirements applicable to our mining rights and concessions.

Decommissioning

Title holders of mining exploitation and beneficiation activities, and, in some cases, of exploration activities require the prior approval of a mine closure plan, which includes the environmental rehabilitation, restoration and remediation measures that shall be executed along with the mining operations and until its closure. Once the corresponding mine closure plan is approved, a guarantee (usually a bank performance bond) must be granted in favor of the MINEM to back up the environmental costs associated with the execution of the mine closure plan. Mining exploitation and beneficiation activities may only be initiated once the mine closure plan is approved, and the corresponding environmental guarantee is duly submitted before the competent authority. The referred guarantee is renewed yearly. If the titleholder of an ongoing mining operation fails to comply with this obligation, the MINEM is entitled to suspend the execution of such mining operation. In 2025, Supreme Decree No. 006-2025-EM amended the mine closure regulation to implement changes introduced by Law No. 31347, strengthening technical and financial closure requirements. Key amendments include: (i) a requirement for detailed engineering in closure plans, subject to verification by the supervisory authority; (ii) extension of financial guarantees to cover major components during progressive closure; (iii) mandatory revision of closure plans when environmental impact studies are modified; and (iv) enhanced monitoring powers for environmental oversight authorities. Additional provisions for enforcing the detailed engineering requirement and financial guarantees remain pending. These changes align Peru's regulatory framework with international best practices and enhance environmental and operational safety throughout the mine closure process. For additional information, see "Risk Factors—Political, economic, social, and regulatory risks—Our mineral rights may be terminated or not renewed by governmental authorities."

Royalties and other taxes on mining activities

Holders of mining concessions are required to pay a mining royalty (*regalía minera*) to the Peruvian government for the exploitation of metallic and non-metallic resources. The amount of the royalty is payable on a quarterly basis and is equal to the greater of (i) an amount determined in accordance with a statutory scale of marginal tax rates from 1.0% to 12.0% based on a company operating income margin and applied to that company's operating income and (ii) 1.0% of a company's sales, in each case during the applicable quarter. We are also required to pay annual fees (*derecho de vigencia*) for our mining concessions and, in some cases, penalties for not timely reaching the minimum production levels or the minimum annual investment set by Peruvian mining law.

Holders of mining concessions are also required to pay a Special Mining Tax (*Impuesto Especial a la Minería*) to the Peruvian government. The Special Mining Tax is payable on a quarterly basis and is calculated based on the operating income derived exclusively from the sale of metallic resources, with marginal rates between 2.0% and 8.4%.

Holders of mining concessions that are subject to administrative legal stability (in force as of the effective date) under an Agreement of Guarantees and Measures for Investment Protection entered into with the MINEM shall enter into an agreement with the Peruvian government for the payment of a Special Charge on Mining (*Gravamen Especial a la Minería*, or "GEM"). The GEM is payable on a quarterly basis and is calculated based on the operating income derived exclusively from the sale of metallic resources, with marginal rates between 4.00% and 13.12%.

Municipal permits

Under the General Mining Law, all Peruvian mines located in rural areas such as Cerro Lindo, Atacocha, El Porvenir and Chapi (which was sold on December 23, 2024) are exempted from paying municipal taxes and obtaining municipal permits.

Environmental regulations

The development of economic activities in Peruvian territory, such as those related to the mining industry, are subject to a broad range of general environmental laws and regulations related to the generation, storage, handling, use, disposal and transportation of hazardous and controlled materials; the emission and discharge of hazardous materials into the ground, air or water; and the protection of migratory birds and endangered and threatened species and plants. These regulations also set environmental quality standards for noise, water, air and soil, which shall be considered for the preparation, assessment, and approval of the corresponding environmental management instrument, granted by the National Service for Environmental Certification of Sustainable Investments ("SENACE") for exploitation and beneficiation activities, or the MINEM for exploration activities.

The Ministry of Environment and other administrative entities, such as the *Dirección General de Asuntos Ambientales Mineros* (“DGAAM”), have the authority to enact regulations related to environmental matters. Additionally, the Environmental Supervision Agency (*Organismo de Evaluación y Fiscalización Ambiental*, or “OEFA”), is the competent authority in charge of supervising and imposing sanctions on mining companies upon non-compliance of applicable environmental legislation. In addition, there are other competent governmental agencies or authorities on specific environmental matters such as water, forestry resources, protected natural areas and aquatic environment that regulate, authorize, and supervise environmental compliance and liability.

On November 23, 2023, Supreme Decree No. 028-2023-EM was enacted, amending the Regulations for Environmental Protection in Mining Exploration Activities in order to allow the simultaneous processing of various enabling permits related to water resources, such as water use authorizations or discharge permits, alongside the evaluation procedure for the respective environmental management instrument. This is expected to result in expedited processing of relevant permits for exploration projects. Additionally, on November 25, 2023, Supreme Decree No. 031-2023-EM was enacted, approving the law that specifies the mandatory environmental protection measures in the transportation and final disposal of tailings and the corresponding environmental management instruments for mining operations.

The Peruvian Congress initiated a revision process of a law to prohibit economic activities in the headwaters of basins, which are considered vulnerable areas that require protection and mitigation measures. However, the revision process lost momentum and has shown no sign of progress to date. If adopted, this law could have a material impact on our projects in case any new projects were to occur in headwaters of basins.

In December 2023, the Peruvian government published Supreme Decree No. 034-2023-EM, which amended the Occupational Health and Safety in Mining regulation by adding a chapter on management and safety requirements for waste and tailings disposal facilities. Among other requirements, the Decree addresses the installation of emergency warning systems for dams. We are currently adapting our operations to comply with the new requirements of the decree.

In addition, on May 3, 2024, Supreme Decree No. 004-2024-MINAM was enacted, amending Article 51 of the Regulation of the Law of the National Environmental Impact Assessment System, by simplifying and streamlining the environmental impact assessment processes, focusing on the reception and management of technical opinions by other authorities. On August 8, 2024, Law 32106 was passed. This law regulates the declaration of an environmental emergency over a specific geographic area in the event of a sudden and significant occurrence that affects environmental quality or ecosystems. The law states that the applicable environmental authority, together with the responsible party, will have to implement actions to contain, control, and reduce the environmental impact.

On March 19, 2025, Supreme Decree No. 006-2025-EM amended the Regulation for Mine Closure, introducing several key changes. Financial guarantees must now cover progressive closure measures for major components—including tailings storage facilities, waste rock dumps, leach pads, open pits, and underground workings—in addition to final and post-closure activities. Mining titleholders have three years to update their guaranteed budgets and must provide additional guarantees if required by the enforcement authority. The amendment establishes joint and several liability for mining titleholders, directors, and/or majority shareholders for actions or omissions that breach the Mine Closure Plan and cause actual environmental harm. Additionally, mining titleholders responsible for abandoned units or non-compliance causing environmental damage are prohibited for five years from acquiring new mining rights or obtaining authorizations for exploration, exploitation, or beneficiation activities.

Additionally, on July 24, 2025, Resolution No. 00019-2025-OEFA/CD was published, introducing several favorable changes to the enforcement framework. Key reforms include: (i) elimination of the sanctioning provision that discouraged voluntary remediation and did not exempt administrative liability, establishing that timely correction before the start of the sanctioning procedure is sufficient, even for non-compliances previously considered non-remediable; (ii) creation of commitment agreements allowing supervised parties to undertake specific corrective actions in lieu of receiving administrative measures; and (iii) revision of the “Manifestly Evident Improvement” definition so that compliance is measured by the achievement of environmental objectives, permitting measures that provide higher levels of environmental protection provided they do not generate new significant negative impacts.

Environmental permit regularization processes

Supreme Decree 040-2014-EM provided special procedures allowing us to acquire environmental and operational permits for mining operations and to regularize the mining of certain areas within the Cerro Lindo and Atacocha mines. While these regularization procedures were successfully completed, compliance with these special procedures did not exempt us from administrative sanctions by OEFA for the implementation of certain mining components without obtaining the corresponding environmental permits. Similarly, Supreme Decree 013-2019-EM allowed for further regularization procedures to be conducted, which also allowed us to acquire environmental and operational permits for infrastructure and mining areas in the Cerro Lindo, Atacocha, El Porvenir and Chapi (which was sold on December 23, 2024) mines. The regularization procedure for Cerro Lindo was denied due to an unfavorable opinion by the National Water Authority, yet proper procedure was not followed for which judicial measures to appeal the denial were taken and are currently in course. Atacocha's procedure was conducted to completion while the El Porvenir regularization procedure is still underway. The Chapi mine (which was sold on December 23, 2024) procedure did not fall through and the areas subject to the procedure must follow the standard mine closure regulations.

Supreme Decree 014-2024-EM allowed a new opportunity for regularization for environmental certifications to take place, for which an initial communication to MINEM and OEFA had to be made by December 13, 2024. The Cerro Lindo, Atacocha, El Porvenir, Chapi (which was sold on December 23, 2024) and Cajamarquilla operations invoked said procedure on time and presented the corresponding technical information by September 2025. All cases are pending evaluation by MINEM. Likewise, OEFA may impose sanctions for environmental non-compliance.

Regulation of other activities

In addition to mining and environmental regulation, we must abide by regulations related to, among other activities, the use of explosives, fuel storage, controlled substances, telecommunications, archeological remains, and energy concessions. We are also subject to more general legislation on labor, occupational health and safety, and indigenous communities, among others. With respect to labor regulations, in July 2023, a 2022 law establishing a series of measures to eliminate the outsourcing of a company's "core business" activities was deemed to be unconstitutional because it was determined to be an unenforceable bureaucratic barrier by the National Institute for the INDECOPI. In addition, we initiated a lawsuit seeking to declare the unconstitutionality of this law. However, in October 2025 the Constitutional Court determined that the prohibition to outsource core activities is constitutional. As a result, chances of obtaining a favorable outcome in the aforementioned lawsuit are remote. In parallel, there is a class action initiated by SEDAPAL challenging the aforementioned law, which that is pending a final judgment on appeal. We are not a party to this class action, but its outcome may impact the legal criteria applicable to our situation. The complaint filed at INDECOPI is still in effect in our favor, and we continue to monitor any developments.

For additional information, see "Risk Factors—Operational risks—We may be liable for certain payments to individuals employed by third-party contractors" and "Risk Factors—Operational risks—The nature of our business includes risks related to litigation and administrative proceedings that could materially and adversely affect our business and financial performance in the event of unfavorable rulings."

Regarding occupational health and safety regulations, on December 2023, Supreme Decree No. 034-2023-EM was enacted, amending the Regulation of Occupational Safety and Health in Mining approved by Supreme Decree No. 024-2016-EM. Among the key modifications made are the inclusion of parameters for the development of geo-mechanical, hydrogeological, seismicity, and stability studies; the elaboration of a monthly report on geotechnical supervision of tailings deposits, pads, leaching heaps, and waste rock deposits; changes regarding which entity should receive the preliminary report on hazardous incidents or fatal accidents; as well as the addition of a chapter on tailings deposit management which includes parameters for the development of a geotechnical monitoring and control program, a risk analysis and assessment, a management plan, among others. We began adapting and complying with the new obligations incorporated by the amendment in 2024.

In addition, in September 2024, Legislative Decree No. 1680, which establishes the “Archaeological Surface Diagnosis” was enacted. The decree allows for the certification of the non-existence of archaeological remains through an archaeologist duly authorized and registered with the Ministry of Culture, without the need to process the approval of a Certificate of Non-Existence of Archaeological Remains (“CIRA”).

II. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

OVERVIEW

Executive summary

Below are our highlights in 2025:

- **Operational performance.** In 2025, we reported net income of US\$223.1 million compared to a net loss of US\$187.4 million in 2024, while advancing the operational milestones that positions us for volume recovery in 2026. Net revenues reached US\$3,002.1 million, an 8.5% increase year-over-year, mainly driven by higher metal prices that offset lower smelting sales volumes. The improvement in net income reflected higher gross profit, a non-cash impairment reversal of US\$91.7 million and increased foreign exchange gains. See “Overview—Results of Operations—Net revenues” for more information.
- **Production and sales.** In 2025, mining production decreased 4.6% on a zinc equivalent basis, from 705.1 thousand tonnes in 2024 to 672.4 thousand tonnes in 2025, mainly attributed to lower volumes across all metals, except gold. Our total metal sales (metallic zinc and zinc oxide) decreased 4.1% from 591.3 thousand tonnes in 2024 to 567.0 thousand tonnes in 2025.
- **Aripuanã.** Following completion of the ramp-up phase in June 2024 and consolidation of operational performance through 2025, Aripuanã reached 76% average capacity utilization in the fourth quarter, with plant downtime reduced by approximately 50% compared to the first half of 2025. A fourth tailings filter was delivered to the site in November 2025, and installation is expected in April 2026, and commissioning in the first half of 2026. Full operational capacity is expected in the second half of 2026.
- **CAPEX.** Our capital expenditures totaled US\$351.9 million in 2025, a 27.1% increase compared to 2024, mainly reflecting investments related to Phase I of the Cerro Pasco Integration Project, focused on the tailings pumping system, and the appreciation of the Brazilian real against the U.S. dollar. Sustaining investments, including those in tailings storage facilities, accounted for 94.9% of total capital expenditures.
- **Exploration activities.** In 2025, we continued to prioritize brownfield exploration aiming at extending the life of our current mines, allocating 65.8% of the mineral exploration budget to projects around our operating mines and 34.2% to greenfield initiatives. Total exploration drilling reached 69.8 km in 2025, compared to 63.8 km in 2024.
- **Divestments.** In 2025, we completed the sale of the Otavi Project in Namibia for US\$3.0 million upfront, plus up to US\$7.0 million in contingent payments, while retaining royalty rights. Namibia remains a strategic region for Nexa, supporting the advancement of copper exploration initiatives in the Kalahari Copper Belt.
- **Financial Transactions.** In December 2025, we initiated a revenue hedge strategy for silver and gold through Zero Cost Collar derivatives. This strategy is designed to reduce price exposure at our Peruvian mining operations in 2026 and protect operating margins.

Key factors affecting our business and results of operations

Reporting segments

We operate through two reporting segments, mining, and smelting. Our vertically integrated structure means that in 2025, 100% of our zinc mining production was processed by our own smelters, while our own mines supplied approximately 50.1% of the total zinc raw material consumed (excluding oxide). The balance was sourced from third-party concentrate suppliers. Revenues from the mining segment include intercompany sales to the smelting segment, and costs of the smelting segment include corresponding intercompany purchases; both are calculated on an arm's length basis to evaluate each segment's performance individually and are eliminated in consolidation.

The profitability of our mining segment depends primarily on prevailing world prices for the metals we produce and on our unit cost to produce concentrates. Treatment charges, the processing fees that smelters charge to convert concentrate into refined metal, reduce the net revenue our mining segment realizes on concentrate sales.

The profitability of our smelting segment is less directly exposed to metal price movements, as prices affect both revenue and raw material cost. Smelting margins are instead mainly driven by treatment charges, which impacts the segment's cost to acquire concentrates; the premiums over benchmark metal prices that we realize on our refined products, operating costs and recovery efficiency at our smelters; and revenue from by-products. Additionally, since our smelters generally pay for 85% of the zinc LME price, they capture the value of the residual 15% – referred to in the industry as 'free metal'. Because treatment charges represent a cost to the mining segment and a benefit to the smelting segment, our integrated model naturally offsets treatment charges movements, which explains our consolidated margin profile.

Our segments are reported in accordance with IFRS 8 – Operating Segments, and the information is presented to the Chief Executive Officer, who is our Chief Operating Decision Maker (CODM). Our segment results are derived from the accounting records and are adjusted for reallocations between segments, depreciation and amortization and miscellaneous adjustments, if any, for the period. For more information, see "Operating and Financial Review and Prospects—Results of Operations—Non-IFRS Accounting Standards measures and reconciliation" in this report. See also Note 2 to our consolidated financial statements.

Metal prices

Our financial performance is significantly affected by the market prices of the metals we produce, especially zinc, copper and lead, and to a lesser extent, silver, gold, and other by-products recovered in our smelting operations. Zinc is our primary revenue driver, and movements in the LME zinc price have the most material impact on our consolidated results. Metal prices have historically been subject to significant volatility and are affected by numerous factors beyond our control. The factors that influence pricing, which affect each metal to varying degrees, include global macroeconomic conditions, regional and sector-specific demand trends (particularly in construction, infrastructure, automotive and, increasingly, energy transition applications), levels of mine and smelter supply, inventory dynamics on the LME and other exchanges, the availability and cost of substitutes, and currency exchange rates. Prices can also be affected by shorter-term factors, including shifts in speculative positioning and exchange warehouse flow.

The market prices for zinc, copper and lead are principally referenced to the daily cash seller and settlement price established on the LME. For zinc, LME prices reflect the balance of global supply and demand for both concentrate and metallic zinc. The supply of metallic zinc depends on concentrate availability and secondary feed volumes, and the utilization of global smelting capacity. Copper and lead prices are determined by analogous supply-demand dynamics, though each metal has a distinct demand profile and concentrate market structure.

In addition to metal prices, the treatment charges negotiated between miners and smelters for the processing of concentrates have a material effect on our results, functioning as a cost to the mining segment and a cost offset to the smelting segment. Movements in benchmark treatment charges, which have been notably compressed in recent periods, can influence segment profitability independently of metal price levels.

The table below sets forth the average published market prices for the metals and periods indicated:

Average Market Prices of Base Metals	For the Year Ended December 31,			
	2025		2024	
	(US\$/tonne)	(US¢/lb)	(US\$/tonne)	(US¢/lb)
Zinc (LME)	2,869.66	130.17	2,779.02	126.05
Copper (LME)	9,944.94	451.09	9,146.79	414.89
Lead (LME)	1,963.44	89.06	2,072.67	94.01

Average Market Prices of Precious Metals	For the Year Ended December 31,	
	2025	2024
	(in US\$/oz)	
Silver (LBMA)	40.03	28.27
Gold (Fix)	3,431.54	2,386.20

The key drivers and latest trends of each of the metals that we produce are discussed below.

Zinc

Zinc is essential to the construction, transport, and infrastructure industries, which represent approximately 50%, 21%, and 16% of zinc end-use, respectively, according to Wood Mackenzie. Galvanizing, the application of zinc coatings to protect steel from corrosion, accounts for approximately half of global consumption and positions zinc as an indirect beneficiary of the global buildout of renewable energy infrastructure, including wind towers, solar racking systems and transmission networks that rely on galvanized steel components.

The annual average price of zinc on the LME for the year ended on December 31, 2025, was 3.3% higher compared to the year ended December 31, 2024. Zinc prices fluctuated greatly during the year, shaped by two distinct phases. In the first half of the year, following the U.S. tariff announcements, U.S. dollar strength and uncertainty around global trade policy dragged down zinc prices sharply in early April alongside other base metals. In the second half of the year, U.S. dollar depreciation following interest rate cuts by the Federal Reserve, combined with a strong and sustained depletion of exchange inventories outside China lifted zinc prices. LME zinc inventories fell by 54.1% over the year, from 234,100 tonnes in January to a low of 33,825 tonnes in late November, less than one day of global consumption, and remained below 100,000 tonnes for most of the second half. This inventory constraint outside China, where domestic inventories followed a different pattern, sustained zinc prices above the US\$3,000/t mark for much of the fourth quarter.

On the demand side, global refined zinc consumption reached 13.6 million tonnes, an increase of 1.1% compared to 2024, according to Wood Mackenzie's December 2025 report. China led growth, where government stimulus measures and infrastructure spending supported galvanized steel demand, as well as by gains in India and parts of Europe. However, demand in the United States and certain Asian markets remained low, influenced by tariff-related uncertainty affecting construction and automotive activity, both significant zinc-consuming sectors.

On the supply side, mine production increased 4.7% in 2025 compared with 2024, totaling 12.8 million tonnes, as new and expanded operations, including Kipushi, Ozeroye and Mehdiabad, outperformed market expectations, generating a concentrate surplus of 263 thousand tonnes. Refined zinc production increased 2.6%, driven predominantly by new Chinese smelting capacity, including the expansion at Chehe Nanfang and the start of operations at the Wangyang and Anning smelters, which collectively boosted China's refined output to record levels. However, refined supply growth outside China remained constrained as smelters in several other countries continued to operate below capacity. The Odda smelter expansion in Norway was delayed, and low treatment charges, combined with limited uncontracted concentrate availability, prevented a meaningful rebound in ex-China output. This divergence, surplus refined metal in China alongside physical scarcity in the rest of the world, was the defining structural feature of the zinc market in 2025 and a primary driver of LME price support.

Spot treatment charges for imported concentrates in China recovered from record lows in 2024 and reached US\$110 per tonne in July 2025, but fell sharply to US\$35 per tonne by December 2025, as reported by Wood Mackenzie. Long-term contract treatment charges decreased from US\$165 per tonne in 2024 to US\$80 per tonne in 2025. The decline in treatment charges compressed smelting margins and, combined with limited concentrate availability on the spot market, reinforced the operating constraints on non-Chinese smelters. For integrated producers such as Nexa, the TC environment creates offsetting effects: lower TCs reduce smelting revenue but reflect tighter concentrate markets that support mining margins.

According to Wood Mackenzie's December 2025 report, the global zinc metal market closed 2025 with a surplus of 40 thousand tonnes, with refined production of 13.7 million tonnes narrowly exceeding consumption. However, this global balance masked significant regional imbalances, as the physical availability of metal outside China remained severely constrained throughout the year.

Copper

Copper is used in building construction, power generation and transmission, electronic product manufacturing, and the production of industrial machinery and transportation vehicles. According to Wood Mackenzie, electricity end uses, including electric vehicles, renewable energy systems and grid infrastructure, accounted for a growing share of global copper consumption in 2025, reinforcing copper's role as a structural beneficiary of the energy transition.

The annual average price of copper on the LME for the year ended on December 31, 2025, was 8.7% higher compared to the year ended on December 31, 2024. Prices increased through the first quarter, supported by a weaker U.S. dollar and expectations of Chinese stimulus, before falling sharply in early April alongside other commodities following U.S. tariff announcements. Copper recovered more quickly than most base metals, however, uncertainty over potential U.S. copper import tariffs in 2026 boosted speculative long positions across both LME and COMEX and incentivized physical metal flows into U.S. warehouses. Stronger-than-expected demand led by robust Chinese consumption from electric vehicles, renewables, and appliances, as well as solid Middle Eastern growth, further reinforced the price recovery by eroding already thin stock buffers.

On the supply side, mine production growth remained modest at 0.7% in 2025 as smelters faced maintenance outages, project delays and sharply lower treatment and refining charges, which signaled tightening concentrate markets. Refined production increased 2.1%, constrained by concentrate availability outside China. Consumption, however, grew 4.2%, outpacing supply growth and resulting in a refined market deficit of 203 thousand tonnes, according to Wood Mackenzie's 2025 report.

Lead

Lead is used primarily in lead-acid batteries for starting, lighting, and ignition applications, energy storage systems, and telecommunications backup power, which together account for approximately 85% of global lead consumption. Other end uses include radiation shielding, ammunition, and construction materials. Because lead is predominantly mined as a by-product of zinc, copper, and silver operations rather than as a primary metal, its mine supply is largely determined by production decisions for those metals, making the lead price particularly sensitive to demand-side shifts. The annual average price of lead on the LME for the year ended December 31, 2025, was 5.3% lower than compared to the year-ended December 31, 2024. Prices traded above US\$2,000 per tonne through the first quarter, supported by seasonal restocking and inventory draws in western markets, but fell sharply in April following the broad commodities sell-off triggered by U.S. tariff announcements, reaching a year-low near US\$1,830 per tonne. Prices partially recovered in the second half of 2025 but remained below prior-year levels as surplus conditions weighed on sentiment.

Silver

Silver is both a precious metal and an industrial metal. Its monetary role as a store of value supports price resilience during periods of economic uncertainty, while its physical properties make it essential to a growing range of industrial applications. Industrial fabrication now accounts for approximately 59% of total silver consumption, with solar photovoltaic manufacturing alone representing roughly one-fifth of global demand, up from approximately 5% a decade ago, according to the Silver Institute. Other significant industrial end uses include electronics, electric vehicle components, and brazing alloys, in addition to traditional applications in jewelry and silverware.

The annual average LBMA silver price for the year ended on December 31, 2025, was 41.6% higher compared to the year ended December 31, 2024. Silver prices accelerated sharply in the second half of the year, driven by a convergence of record industrial offtake, renewed investor demand through exchange-traded products, and persistent physical market tightness. Silver prices reached the highest level of the year on December 30, 2025, at US\$74.83 per ounce, which was 116.9% above the highest point of the previous year reached on October 24, 2024. This represented a new all-time nominal high for the LBMA silver price. The global silver market recorded its fifth consecutive annual supply deficit in 2025, with demand continuing to outpace mine production that remained broadly flat at approximately 813-823 million ounces. Approximately 70% of silver is mined as a by-product of copper, lead, and zinc operations, which limits the ability of producers to respond to higher prices by increasing silver-specific output.

Gold

Gold is primarily a monetary and investment asset, with additional demand from jewelry, electronics, and central bank reserve accumulation. The annual average LBMA gold price for the year ended on December 31, 2025, was US\$3,431.54 per ounce, 43.8% higher compared to the year ended on December 31, 2024. Gold prices reached successive all-time highs throughout the year, driven by sustained central bank purchasing, particularly from emerging market institutions seeking to diversify reserves away from the U.S. dollar, as well as strong investor inflows into exchange-traded products amid geopolitical uncertainty and expectations of monetary easing. Like silver, gold produced in our mining operations is recovered as a by-product of our polymetallic ore processing, and its price performance contributed to the favorable precious metals environment that positively impacted our net revenues in 2025.

Production volumes, ore grade and metal mix

Our production volumes, the ore grade from our mines and the mix of metals in our product portfolio affect our business performance. For more details, see “Information on the Company—Mining Operations.” Our zinc, copper lead and silver production decreased by 3.5%, 6.4%, 9.0%, and 6.7%, respectively, while gold production increased by 6.2%, in 2025.

Commercial terms

We sell our concentrates and metallic zinc and zinc oxide products mostly through supply contracts with terms between one and two years, and only a small portion is sold on the spot market. The agreements with our customers include customary international commercial terms, such as cost, insurance and freight, or CIF; free on board, or FOB; free carrier, or FCA; and cost and freight, or CFR; pursuant to Incoterms 2010/2020, as published by the International Chamber of Commerce. For concentrates, revenues are recorded at provisional prices and, typically, an adjustment is made after delivery, based on the pricing terms provided for under the relevant contract.

Sales prices for our products are based on LME and/or LBMA quotations. Concentrates are typically sold at the LME price reference minus a discount (treatment charge for zinc and lead; treatment charge and refining charge for copper). Metallic zinc and zinc oxide are typically sold at the LME quotation averaged during a quotation period, such as the month after shipment, the month prior to shipment or another agreed period, plus a negotiable premium that varies based on quality, shape, origin, and delivery terms, as well as the market where the metal will be sold. In 2025, 49.3% of the total zinc raw material consumption in our smelters was produced by our mines and 50.7% was purchased from third parties or obtained from secondary raw materials (including oxide). We buy zinc concentrates from different suppliers in the market to meet our raw material requirements. We sell all our copper and lead concentrates production to metal producers and international traders, on international market terms.

Our sales of metallic zinc are highly diversified. Our customer base is composed mainly of end users across various industries, including transport, construction, infrastructure, consumer goods, and industrial machinery. In 2025, 81.9% of our total sales were to customers in the continuous galvanizing, general galvanizing, die casting, transformers, and alloy segments, and 18.1% were to international traders. Our ten largest customers represented approximately 52.9% of our total sales volume. Overall, in 2025, we sold to more than 309 customers across 42 different countries.

Free zinc, treatment charges, premiums, and smelter by-products

Smelters operate as processing businesses that generate margins on the concentrates and other feed stocks they process. The price for the underlying metal is largely passed through from the miner supplying the concentrate or the supplier of the secondary feed material to the smelter’s customer. Our smelters use zinc concentrate as feedstock, which is supplied both from our own mines and third-party suppliers. The smelter’s revenue comes from three primary sources (i) the treatment charge reflects a discount applied to the purchase price of concentrates, (ii) free metal, which is the refined metal produced and sold over and above the metal content paid for in purchased concentrates and (iii) any premium on refined products. Additionally, our smelting operations generate revenue from by-products, which include sulfuric acid, silver concentrate, copper cement, copper sulfate, lead concentrate, lead-silver concentrate, and other metallurgical by-products.

Free zinc and treatment charges

Free zinc refers to the difference between the total amount of zinc recovered for sale by the smelter and the zinc content that is paid for in the concentrates. Typically, the industry standard for payable zinc content in concentrates is 85.0% of the total zinc content, multiplied by the LME price of zinc. Any additional zinc recovered beyond this percentage is considered “free zinc.” A smelter’s margin improves as it increases the amount of recoverable metal from zinc.

The TC is a discount per tonne of concentrates, which is determined by negotiation between the seller (a mine or a trading company) and the buyer (a smelter). There are three types of treatment charges: benchmark TC (negotiated annually by major miners and buyers, serving as a market reference), spot TC (determined by short-term market conditions and supply-demand dynamics) or negotiated TC (set in direct agreements between smelters and miners or traders). For our integrated mining and smelter operations in Brazil and Peru, we apply a benchmark TC. For our other purchases of zinc concentrate from third-party miners and trading companies, we apply a negotiated TC.

In order to mitigate volatility, most of our third-party contracts use a three-year average TC, thereby smoothing price fluctuations. In 2025, this reference (based on the average benchmark TC of 2025, 2024 and 2023) was US\$173/t concentrate, down 22.4% from the previous reference of US\$223/t concentrate (based on average benchmark TC of 2024, 2023 and 2022).

The market trend for treatment charges levels reflects the balance between supply and demand for concentrates in the market. When concentrate supply exceeds smelting capacity, treatment charges increase. When concentrate supply is tight relative to smelting capacity, treatment charges decrease. These cyclical dynamics influence both our smelting profitability and the cost of processing third-party concentrates. For information regarding our actual treatment charges, see “Information on the Company—Smelting Operations.”

The following table sets forth, for the periods indicated, the zinc realized Benchmark TC, expressed in dollars per dry metric tonne (“dmt”) of concentrate.

	For the Year Ended December 31,	
	2025	2024
Treatment Charge (in US\$/dmt)	80	165

Source: Wood Mackenzie.

Premiums

Like other smelters, we sell metallic zinc and zinc oxide products at a premium over the base LME price. This premium reflects a combination of several factors, including the smelter’s service in delivering zinc in specific sizes, shapes, or qualities required by customers, as well as transportation costs. Additionally, premiums are influenced by supply and demand conditions in the respective regional markets. Since transportation costs and customer specification preferences vary by region, premiums are shaped more by regional and local market dynamics rather than by global trends.

The following table presents information on premiums for the indicated markets, expressed in U.S. dollars per tonne, for the periods specified.

	For the Year Ended December 31,	
	2025	2024
Rotterdam (in US\$/tonne)	245	200
Singapore (in US\$/tonne)	115	105
United States (in US\$/tonne)	419	386

Source: Wood Mackenzie.

The following table presents information on gross premiums over the base LME price for zinc oxide realized by our smelting operations in Brazil, expressed in U.S. dollars per tonne.

	For the Year Ended December 31,	
	2025	2024
Brazilian operations (in US\$/tonne)	622	648

Smelter by-products

Our smelting operations generate by-products, especially sulfuric acid and silver concentrate, the volumes and value of which depend on the chemical composition of the concentrate feed and the recovery rates achieved at each smelter.

Sulfuric acid, our main by-product in volume, is generated from sulfur dioxide gas released during the roasting of zinc concentrates. While our zinc smelters consume a portion of this acid in their leach plants, most of their requirements are met by sulfuric acid produced in the electrolysis stage, leaving most of the roasting-derived acid available for external sale. We sell sulfuric acid under annual and multi-year contracts as well as through spot transactions.

Silver concentrate is produced at our Cajamarquilla and Juiz de Fora smelters, recovered from intermediate process streams during the metallurgical treatment of zinc concentrates. The recovered silver is primarily sold to international traders and local customers.

Copper cement is produced at our Cajamarquilla smelter as a by-product of the purification stage of the hydrometallurgical process. It is sold to international traders and local customers, with logistics through the port of Callao. In 2025, our three smelters produced a combined 775,812 tonnes of sulfuric acid, of which 616,881 tonnes were available for external sale after internal consumption: Cajamarquilla accounted for 594,124 tonnes produced and 566,279 tonnes sold; Juiz de Fora produced 105,832 tonnes, with 50,170 tonnes sold; and Três Marias produced 75,856 tonnes, substantially all of which was consumed internally in the leach plant, with the remaining 877 tonnes sold.

Operating costs and expenses

Our ability to manage our operating costs and expenses is a significant driver of our business performance. We prioritize cost control and expense management to enhance efficiency and ensure resilience during less favorable pricing conditions.

Energy costs

Energy is one of the key components of our costs. Our total energy cost includes the operating expenses of our own hydroelectric power plants, long-term energy supply contracts, and transmission and distribution charges.

In Peru, the energy market is relatively stable in terms of generation (based on hydrology forecasts) and pricing. In 2025, we sourced 2.6% of the energy for our operations from our own hydroelectric power plants and cogeneration in Cajamarquilla and the remaining 97.4% through third-party contracts with the SEIN.

In Brazil, our energy cost structure is supported by hydroelectric assets held through Pollarix, which consolidates our self-production interests and provides long-term supply stability and cost efficiency. Pollarix's portfolio includes wholly owned assets, joint operations, and an equity-accounted investment.

- Pollarix fully owns the Picada Hydroelectric Power Plant in Minas Gerais. In addition, Pollarix holds a 12.6% consortium interest in the Capim Branco Hydropower Complex, which comprises the Amador Aguiar I and Amador Aguiar II plants, accounted for as joint operations, and holds a 23.9% consortium interest in Igarapava Hydropower.
- Pollarix also holds a 22.4% equity interest in ENERCAN (Campos Novos), accounted for under the equity method. Dividends received from ENERCAN are included in Pollarix's Adjusted EBITDA, and Pollarix's consolidated results—covering its wholly owned plant, joint operations, and equity-accounted investment—are reflected in our operational cash flow.

Pollarix's sole activity is owning our energy assets, and it sells energy to our Brazilian operating subsidiaries at market prices. We control Pollarix through the ownership of all its common shares, which represent 33.3% of Pollarix's total share capital. The remaining shares are preferred shares with limited voting rights, held by Auren. Under the terms of the preferred shares, Auren is entitled to dividends per share that are 1.93 times higher than the dividends per share paid on the common shares. See "Information on the Company—Energy—Power and energy supply—Brazil." As a result of Pollarix's ownership structure, a portion of the profit from Pollarix's energy sales to our Brazilian operating subsidiaries is attributable to non-controlling interests and recognized accordingly in our consolidated financial statements.

Environmental expenses

Our mines and smelters operate under licenses issued by government authorities that control, among other things, air emissions and water discharges and are subject to stringent laws and regulations relating to waste materials and various other environmental matters. Additionally, each operation once it permanently ceases activities, will require full site rehabilitation.

We have made significant investments to reduce our environmental impact on the areas in which we operate and to ensure that we are able to comply with environmental standards. All our operational units have environmental improvement initiatives relating to reducing emissions and waste and improving the efficiency of use of natural resources and energy.

Where appropriate, we establish environmental provisions for restoration or remediation of existing contamination and disturbance, with all material issues being reviewed annually. Provisions associated with smelter and mining operations sites primarily relate to soil and groundwater contamination.

Since 2016, we have conducted extensive studies and updates of our decommissioning plans, including potential environmental obligations. During this period, we also modified our internal policies for decommissioning and environmental issues, which require frequent updates of environmental studies to reflect the best international practices. As a result of these adjustments, we recorded additional environmental provisions of US\$4.2 million and US\$4.9 million in 2025 and 2024, respectively. Although not expected in the near future, changes in legislation and adjustments to our internal policies after the ongoing evaluations could require additional provisions.

Macroeconomic conditions of the countries and regions where we operate

Peru

The following table presents the inflation rates, interest rates, and exchange rates in Peru for the dates and periods indicated.

	For the Year Ended December 31,	
	2025	2024
Real GDP growth rate ⁽¹⁾⁽²⁾	3.4%	3.5%
Internal demand growth rate ⁽¹⁾⁽²⁾	5.8%	4.0%
Private investment growth rate ⁽¹⁾⁽²⁾	10.0%	3.3%
Reference interest rate	5.1%	5.2%
CPI rate ⁽²⁾	1.5%	2.0%
(Appreciation) devaluation of <i>sol</i> against the U.S. dollar ⁽³⁾	(10.1%)	1.0%
Exchange rate of <i>soles</i> to US\$1.00 (end of period) ⁽⁴⁾	3.3625	3.7403

(4) Official offer exchange rates.

Effects of exchange rate fluctuations

Prices for our products are based on international indices, such as LME prices, and denominated in U.S. dollars. However, a portion of our production costs are denominated in *reais* or *soles*, creating a mismatch between our revenue and costs in terms of currency. In 2025, 14.9% of our production costs and operational expenses were denominated in *reais* and 14.4% of our production costs and operational expenses were denominated in *soles*. The latter is a smaller portion compared to *reais*, since most of our costs in Peru are in U.S. dollars. As a result, our operational results are impacted by fluctuations in exchange rates between *reais*, *soles*, and the U.S. dollar.

In addition, our Brazilian subsidiary, Nexa Brazil holds outstanding accounts receivables and accounts payables to Nexa Resources, intercompany loans with its related parties and loans in foreign currency, which are denominated in U.S. dollars. The functional currency of Nexa Brazil is the real, therefore, Nexa Brazil recognizes exchange gains or losses when the *real* fluctuates compared to the U.S. dollar. These gains and losses are not eliminated in consolidation, as the functional currency of Nexa Resources is the U.S. dollar, meaning no offsetting gains or losses are recognized, which resulted in a net foreign exchange gain of US\$74.4 million in our consolidated financial statements.

The following table presents, for the periods indicated (i) the high and low exchange rates, (ii) the average exchange rates as of the last day of each month for each year, as well as the daily average exchange rates for each month, and (iii) the exchange rate at the end of each period, expressed in *soles* per U.S. dollar (*sol*/US\$) and *reais* per U.S. dollar (*real*/US\$) as reported by the Peruvian Central Bank and the Brazilian Central Bank, respectively.

	Exchange Rates of S/ and R\$ per US\$1.00							
	Period-End		Average ⁽¹⁾		High		Low

Income taxes

Income taxes in Luxembourg, Peru and Brazil have a significant impact on our results. Due to varying economic and political conditions, tax rates in different jurisdictions may experience significant changes. Our future effective tax rates could be affected by changes in the mix of earnings across countries with different statutory tax rates, adjustments in the valuation of deferred tax assets and liabilities and changes in tax laws or their interpretation.

Luxembourg

The combined applicable income tax rate (including an unemployment fund contribution) as of January 1, 2025, was reduced from 24.94% to 23.87% (for entities with their statutory seat in Luxembourg City).

Brazil

Our Brazilian subsidiaries are subject to corporate income tax on both their Brazilian and non-Brazilian income. In addition to the corporate income tax, a social contribution tax is levied on their worldwide income. The combined applicable rate for both taxes is 34.0%. For a discussion of our effective income tax rate, see “Operating and Financial Review and Prospects—Results of Operations— Income tax (expense) benefit.”

Peru

Our Peruvian subsidiaries are subject to income tax on their worldwide income and are eligible for a potential credit for foreign taxes paid on income derived from foreign sources. The general income tax rate has been 29.5% since 2017.

Since January 1, 2022, the general income tax rate of 29.5% is applicable to Nexa Peru. Our Peruvian subsidiaries Nexa Peru, Nexa Resources El Porvenir S.A.C. and Nexa Resources Atacocha S.A.A. are subject to a special mining tax (*Impuesto Especial a la Minería*, or “IEM”), with marginal rates ranging from 2.00% and 8.40% of operating mining income, depending on the operating margin. In addition, these companies are subject to a mining royalty (*regalía minera*).

Dividends distributed to us by our Peruvian subsidiaries are subject to a withholding tax of 5.0 % on profits earned since 2017.

RESULTS OF OPERATIONS

The following discussion and analysis of our financial position and results of operations is based on our consolidated financial statements, for 2025, compared to 2024. For a discussion of the financial condition and results of operations for 2024 compared to 2023, please refer to "Operating and Financial Review and Prospects" in our Annual Report on Form 20-F for the year ended December 31, 2024. The following table sets forth our summarized results of operations for the periods indicated.

	For the Year Ended December 31,		Variation	% of Net Revenue from Products Sold	
	2025	2024	2025/2024	2025	2024
	(in millions of US\$)		(percentage)	(percentage)

Net income (loss) for the year	223.1	(187.4)	(219.1)	7.4	(6.8)

Net revenues

In 2025, net revenues of US\$3,002.1 million increased by 8.5%, or US\$235.6 million compared to 2024. This growth was primarily driven by higher metal prices, partially offset by lower smelting sales volume. Higher prices of silver and gold contained in concentrates positively impacted net revenues by approximately US\$175.1 million. The average LME prices for zinc, a key benchmark for our pricing, increased by 3.3%, from US\$2,779.0 per tonne in 2024 to US\$2,869.7 per tonne in 2025. This increase contributed approximately US\$53.6 million to net revenues, based on our 2024 sales volumes of 591.3kt and the average LME price difference of US\$90.6/t between 2025 and 2024. Additionally, the average price of copper increased 8.7% from US\$9,146.8 per tonne in 2024 to US\$9,944.9 per tonne in 2025, contributing an additional US\$27.5 million to net revenues. These positive impacts were partially offset by lower smelting sales volume, which reduced net revenues by approximately US\$67.5 million, and by lower sales volume of copper and lead negatively impacted net revenues by approximately US\$32.6 million. For a discussion of the underlying reasons driving the change in commodity prices, see "Operating and Financial Review and Prospects—Overview—Key factors affecting our business and results of operations—Metal Prices."

The following table shows a breakdown of our net revenues by destination of our sales.

	For the Year Ended December 31,	
	2025	2024
	(in millions of US\$)	
Peru	965.5	833.9
Brazil	654.3	601.0
United States	233.4	166.9
Singapore	208.7	234.8
Switzerland	136.1	224.3
South Korea	99.2	60.4
Chile	94.8	78.2
United Kingdom	85.2	62.6
Argentina	79.7	81.5
Luxembourg	66.5	71.3
Austria	47.4	42.8
Taiwan	39.0	30.5
Colombia	38.6	31.2
South Africa	36.5	39.4
Turkey	30.9	20.6
Germany	21.0	23.2
Belgium	19.8	9.0
Ecuador	14.5	11.1
China	13.1	7.6
France	12.0	3.4
Sweden	11.8	0.8
Japan	11.2	39.7
Netherlands	9.1	5.5
Vietnam	9.0	18.7
Other	64.8	68.0
Net revenues	3,002.1	2,766.5

Net revenues by destination reflected a continued strengthening of sales to home markets and a shift in the geographic mix towards direct end-user destinations. Peru and Brazil, our home markets, where we hold a leading competitive position, accounted for US\$1,619.8 million, or 54.0% of consolidated net revenues in 2025, an increase of US\$184.9 million, or 12.9% compared to 2024, mainly due to both higher metal prices and the strong performance of our Cajamarquilla smelter, which serves the Peruvian domestic market and is the primary export platform for our refined zinc products.

Sales to the United States increased 39.8% to US\$233.4 million, driven primarily by higher Cajamarquilla export volumes directed to U.S. customers and increased demand from the U.S. galvanizing sector. South Korea sales also grew, increasing 64.2% to US\$99.2 million, reflecting expanded silver and copper cement sales to direct end users. These gains were partially offset by lower revenues from Switzerland, which declined 39.3% to US\$136.1 million, and Japan, which declined 71.8% to US\$11.2 million. The declines in Switzerland and, to a lesser extent, Singapore and Luxembourg largely reflect changes in the booking destination of trading-intermediated sales rather than a loss of end-market demand, and a reallocation of concentrate sales from trading intermediaries to direct end users.

Overall, the geographic diversification of our revenues continued in 2025, with no single country outside our home markets representing more than 8% of our net revenues.

The following table sets forth the components of our production and sales volumes for the metals and periods indicated.

	For the Year Ended December 31,	
	2025	2024
Treatment Ore (in tonnes)	13,024,510	13,420,966
Mining Production—Metal Contained in Concentrate		
Zinc contained in concentrates (in tonnes)	315,648	326,995
Copper contained in concentrates (in tonnes)	33,396	35,698
Lead contained in concentrates (in tonnes)	63,086	69,303
Silver contained in concentrates (in oz)	10,905,969	11,694,073
Gold contained in concentrates (in oz)	38,247	36,027
External Mining Sales—Metal Contained in Concentrate		
Zinc contained in concentrates (in tonnes)	0	887
Copper contained in concentrates (in tonnes)	33,371	35,669
Lead contained in concentrates (in tonnes)	62,631	69,267
Smelting Production—Zinc Contained in Product Volumes		
Cajamarquilla (metal available for sale in tonnes)	345,281	334,078
Três Marias (metal available for sale in tonnes)	122,731	144,096
Juiz de Fora ⁽²⁾ (metal available for sale in tonnes)	61,827	81,989
Total zinc metal production (in tonnes)	529,839	560,163
Zinc Oxide Production—Zinc Contained in Product Volumes		
Três Marias (Zinc oxide, contained zinc in tonnes)	34,566	34,569
Smelting Sales—Product Volumes ⁽³⁾		
Metallic zinc (in tonnes)	532,488	556,795
Zinc oxide (in tonnes)	34,531	34,512
Total smelting sales volumes (in tonnes)	567,019	591,307

(1) Based on typical zinc contents in metallic zinc products and zinc oxide. For more details, see “Information on the Company—Smelting Operations—Smelter sales.”

(2) Including 3,181 tonnes of zinc ashes and drosses in 2025 and 2,861 in 2024.

(3) Including resale.

Cost of sales

In 2025, our cost of sales of US\$2,289.2 million increased by 2.7%, or US\$60.7 million, compared to 2024. At the segment level, the increase reflected mixed trends: smelting cost of sales increased 9.7%, or US\$175.3 million, mainly driven by significantly lower treatment charges, which raised the effective cost of third-party zinc concentrates, while mining cost of sales decreased 7.3%, or US\$73.5 million, reflecting lower production volumes and associated variable cost reductions. On a consolidated basis, treatment charges were the most significant driver of the cost increase. The three-year average benchmark TC used in most of our third-party contracts fell 22.4%, from US\$223 per tonne of concentrate to US\$173 per tonne, reflecting the decline in the annual benchmark from US\$165 per dry metric tonne in 2024 to US\$80 in 2025. Because treatment charges function as a discount on the price we pay for concentrates, this compression directly increased our smelting raw material costs. Higher zinc and copper prices also raised the payable metal component of concentrate purchases. These increases, along with higher maintenance expenses, particularly at our Brazilian smelters and unfavorable foreign exchange variations, were partially offset by lower smelting sales volumes and reduced energy costs. For a detailed discussion of segment-level cost dynamics, see “Operating and Financial Review and Prospects—Results of Operations—Results by segment.”

Selling, general and administrative expenses

In 2025, our selling, general and administrative (“SG&A”) expenses of US\$145.5 million increased by 14.2%, or US\$18.1 million, compared to 2024. This increase was mainly driven by higher personnel and third-party services expenses, increased freight expenses from higher sales volume at Cajamarquilla, and unfavorable foreign exchange variations.

Mineral exploration and project evaluation

In 2025, our mineral exploration and project evaluation expenses totaled US\$81.7 million, representing an increase of 20.2%, or US\$13.7 million, compared to 2024. This increase was primarily due to an increase in mineral exploration expenses, reinforcing our strategy of prioritizing exploratory drilling programs aimed at identifying new mineralized trends, both near operating mines and within greenfield initiatives. In 2025, our exploration drilling reached 69.8 km, compared to 63.8 km in 2024, including early-stage exploration programs.

Impairment reversal (loss) of long-lived assets

In 2025, we conducted our annual impairment test, analyzed all indicators and recorded an impairment reversal of US\$91.7 million. This reversal was primarily comprised of an impairment reversal related to the Cerro Pasco cash-generating unit of US\$108.0 million. The reversal primarily reflects higher short- and long-term metal price assumptions. This effect was partially offset by the recognition of an impairment loss of US\$16.3 million on other individual assets. For further information about our impairment assessments, please refer to Note 31 to our consolidated financial statements.

Other income and expenses, net

In 2025, our other income and expenses, net negatively impacted our results by US\$79.5 million, mainly due to the recognition of a non-cash accumulated loss of US\$49.3 million as of December 31, 2025, compared to a loss of US\$3.3 million as of December 31, 2024, due to the significant change in the projected copper price under the Aripuanã copper concentrate offtake agreement, which is measured at fair value through profit or loss.

The following table presents our other income and expenses, net for the periods indicated. For further information, please refer to Note 9 to our consolidated financial statements.

	For the Year Ended December 31,	
	2025	2024
	(in millions of US\$)	
Other income and expenses, net		
Changes in fair value of offtake agreement	(49.3)	(3.3)
Changes in fair value of derivative financial instruments	0.2	0.7
Loss on sale and write-off of property, plant and equipment	(1.6)	(16.2)
Changes in asset retirement, restoration and environmental obligations	(0.2)	13.8
Slow moving and obsolete inventory	(10.4)	(10.9)
Provision for legal claims	(15.2)	1.9
Penalties and fines on income tax	(11.4)	-
Contribution to communities	(12.9)	(14.6)
Changes in fair value of energy forward contracts	9.6	0.1
Divestment and restructuring	7.7	9.0
Others	3.8	(14.0)
Total other income and expenses, net	(79.5)	(33.5)

Net financial results

In 2025, we recognized net financial expenses of US\$187.4 million, a decrease of 49.3%, or US\$182.1 million, compared to US\$369.5 million in 2024. This decrease was mainly due to:

- Our financial income in 2025 increased by 24.4%, or US\$5.9 million, to US\$29.9 million. This increase was mainly due to reversals of monetary adjustments on contingencies recognized in prior periods, and the increase in Brazilian benchmark interest rates.
- Our financial expenses in 2025 increased by 24.7%, or US\$60.7 million, to US\$306.5 million. This increase was primarily attributed to interest on tax contingency provisions and premiums on bond repurchases. These effects were partially offset by lower interest on lease liabilities and other positive financial impacts.
- Other financial items, net increased by US\$236.9 million, reaching US\$89.2 million in 2025. This increase was mainly due to a positive effect attributable to the depreciation of the U.S. dollar on U.S. dollar-denominated balances and intercompany loans of Nexa Brazil, reflecting the appreciation of the Brazilian real in 2025, following a depreciation in 2024, and the fair value gains related to the cross-currency swap contracts we entered into to hedge the Brazilian real exposure of Nexa Brazil debentures.

- Excluding the impact of foreign exchange variations, our net financial results increased by 18.5%, or US\$40.8 million, to US\$261.7 million in 2025 compared to US\$220.9 million in 2024, because of the aforementioned reasons.

Income (loss) before tax

As a result of the factors described above, our income before tax in 2025 was US\$331.7 million, as compared to a loss before tax of US\$71.9 million in 2024.

Income tax (expense) benefit

In 2025, we recorded an income tax expense of US\$108.6 million, as compared to an income tax expense of US\$115.6 million in 2024. Our current income tax expense in 2025 decreased by 48.3%, or US\$99.3 million, to US\$106.4 million, mainly due to decrease in the income tax provision related to the Cerro Lindo stability agreement.

The difference between the nominal and effective tax rates in 2025 and 2024 is attributed to items that impacted the calculation of current income tax for these periods. These include the tax effect in translation of non-monetary assets (liabilities) to functional currency in Peru and the uncertain income tax treatment, specifically related to the Cerro Lindo Stability Agreement, which decreased the effective tax rate in 2025, as well as tax losses that did not qualify for deferred tax asset recognition, the special mining levy and mining taxes in Peru, and the difference in tax rate of subsidiaries outside Luxembourg, that increased the effective tax rate in the period. In 2025, we recorded a deferred tax expense of US\$2.2 million, a decrease of US\$92.3 million compared to 2024, mainly because of the reduction in the tax losses and foreign exchange expenses in Brazil.

Net income (loss) for the year

As a result of the foregoing, we had net income of US\$223.1 million in 2025 compared to a net loss of US\$187.4 million in 2024. This performance was driven by an increase in operating income from higher gross profit, a non-cash impairment reversal recorded during the year, and increased foreign exchange gains. These positive factors were partially offset by higher net financial expenses, increased other income and expenses, primarily due to changes in the fair value of offtake agreement, along with higher mineral exploration and project evaluation expenses.

Results by segment

The following table presents our summarized results of operations by segment for the periods indicated.

	For the Year Ended December 31,		Variation	Variation
	2025	2024	2025/2024	2025/2024
Consolidated Income Statement Information:	(in millions of US\$)		(percentage)	
Net revenues:				
Mining	1,569.9	1,349.7	220.2	16.3
Smelting	2,057.1	1,997.3	59.7	3.0

Total	712.9	538.1	174.8	32.5

(1) See Note 2 to our consolidated financial statements.

Mining**Net revenues**

In 2025, our net revenues in the mining segment totaled US\$1,569.9 million, an increase of 16.3%, or US\$220.2 million, compared to 2024. This increase was driven by the combined effect of higher metal prices and lower treatment charges, which more than offset declines in production volumes across copper and silver. Higher LME zinc prices contributed approximately US\$53.6 million to mining revenues, while the sharp increase in precious metals prices, silver up 41.6% and gold up 43.8% on an annual average basis, had a significant positive impact on the value of by-product credits in our polymetallic concentrates. The decline in benchmark treatment charges from US\$165 to US\$80 per dry metric tonne also benefited mining segment revenue, as lower TCs increase the net realized price on concentrates sold to our smelting operations. In 2025, 100% of our zinc concentrate production was directed to our smelting operations in Peru and Brazil, with internal transfer prices calculated on an arm's length basis using the benchmark TC.

Cost of sales

In 2025, our cost of sales in our mining segment totaled US\$938.3 million, a decrease of 7.3%, or US\$73.5 million, compared to 2024. The decrease primarily reflected the impact of lower production and sales volumes on variable costs, as treated ore sales volume declined 3.0% year-over-year. These cost reductions were achieved despite Aripuanã operating for a full year following the completion of its ramp-up phase in 2024, which added a full twelve months of operating costs to the mining segment's cost base compared to approximately six months in the prior-year period.

Smelting**Net revenues**

In 2025, our net revenues in the smelting segment amounted to US\$2,057.1 million, an increase of 3.0%, or US\$59.7 million, compared to 2024. The increase was supported by higher LME zinc prices and an increased contribution from smelter by-products, mainly sulfuric acid and silver concentrate, which more than offset a 4.3% decline in total smelting sales volumes, while higher regional premiums in key markets also positively contributed.

Cost of sales

In 2025, our cost of sales in the smelting segment totaled US\$1,975.1 million, representing an increase of 9.7%, or US\$175.3 million, compared to 2024. The increase was primarily driven by significantly lower treatment charges. The benchmark TC fell from US\$165 per dry metric tonne of concentrate in 2024 to US\$80 per dry metric tonne in 2025, a 51.5% decrease and one of the lowest benchmark levels observed. As treatment charges function as a discount on the price we pay for concentrates, a lower TC directly increases our raw material costs. Each dollar decline in the effective TC, applied across our third-party concentrate purchases, translates into an equivalent increase in smelting cost of sales. Higher zinc prices also contributed to increased concentrate acquisition costs, as the payable metal component is priced based on the LME. Additionally, higher maintenance and operating expenses at our Brazilian smelters accounted for the balance of the cost increase. These effects were partially offset by lower smelting sales volumes, which declined 4.1% year-over-year.

Adjusted EBITDA by Segment

Adjusted EBITDA by segment is the main performance measure used by the chief operating decision maker to assess segment performance and to make decisions about resource allocation. Adjusted EBITDA information for our segments is disclosed and reconciled with IFRS Accounting Standards numbers in Note 2 to our financial statements. The use of Adjusted EBITDA as a segment performance measure is not considered a non-IFRS Accounting Standards financial measure.

A breakdown of Adjusted EBITDA by segment is presented below.

	For the Year Ended December 31,	
	2025	2024
	(in millions of US\$)	
Breakdown of Adjusted EBITDA by segment:		
Mining	658.3	464.1
Smelting	113.3	249.6
Other ⁽¹⁾	0.3	0.5
Adjusted EBITDA	771.9	714.1

(1) Represents the residual component of Adjusted EBITDA either not pertaining to the mining or smelting segments, or represents items that, because of their nature, are not being allocated to a specific segment.

Non-IFRS Accounting Standards measures and reconciliation

Adjusted EBITDA

In 2025, our Adjusted EBITDA amounted to US\$771.9 million, up 8.1% compared to 2024, primarily attributed to higher zinc prices, higher by-products contribution, and favorable foreign exchange variations, partially offset by increased operating costs in both segments, and lower metal sales volume.

Our management uses Adjusted EBITDA as an additional performance measure on a consolidated basis, in addition to, and not as a substitute for, net income. We define Adjusted EBITDA as net income (loss) for the year, adjusted by (i) share in the results of associates, depreciation and amortization, net financial results and income tax; (ii) addition of cash dividends received from associates; (iii) non-cash events and non-cash gains or losses that do not specifically reflect our operational performance for the specific period, such as: gain (loss) on sale of investments; impairment and impairment reversals; gain (loss) on sale of long-lived assets; write-offs of long-lived assets; remeasurement in estimates of asset retirement obligations and other restoration obligations; (iv) pre-operating and ramp-up expenses incurred during the commissioning and ramp-up phases of greenfield projects. For future periods, when applicable, management may exclude the impact of certain types of transactions that in its judgments are (i) events that are non-recurring, unusual or infrequent, and (ii) other specific events that, by their nature and scope, do not reflect our operational performance for the specific period.

We believe this measure provides useful information about the performance of our operations as it facilitates consistent comparisons between periods, planning, and forecasting of future operating results. This reflects the operational performance of our existing business without the impact of interest, taxes, amortization, depreciation, non-cash items that do not reflect our operational performance for the specific reporting period and the impact of pre-operating and ramp-up expenses during the commissioning and ramp-up phases of Aripuanã. Pre-operating and ramp-up expenses incurred during the commissioning and ramp-up phases of Aripuanã are not considered infrequent, unusual, or non-recurring expenses, as they have recurred in prior years with respect to Aripuanã and may recur in the future with respect to Aripuanã or any other projects that may reach the commissioning or ramp-up phases. Commencing in July 2024, these effects have no longer been included since, at the end of June 2024, Aripuanã reached the final stage of its ramp-up phase, transitioning to an ongoing operation. Also, since 2024, our management includes the cash dividend received from associates (currently, Enercan is our only associate) as part of our Adjusted EBITDA calculation. Enercan is an equity method investee with which we have a long-term energy supply agreement. Energy is one of the key components of our costs; as the purpose of our equity investment in Enercan is to secure a reliable long-term energy supply, our management considers this cash dividend received from Enercan each year as part of its analysis of our energy costs for such year. See “Operating and Financial Review and Prospects—Key factors affecting our business and results of operations—Energy costs.”

Our calculation of Adjusted EBITDA may differ from the calculation used by other companies, including our competitors in the mining industry, so our measures may not be comparable to those of other companies.

A reconciliation of Adjusted EBITDA to our net income (loss) for the years indicated is presented below.

	For the Year Ended December 31,	
	2025	2024
	(in millions of US\$)	
Reconciliation of Adjusted EBITDA:		
Net income (loss) for the year	223.1	(187.4)
Depreciation and amortization	289.0	330.2
Share in the results of associates	(21.1)	(21.2)
Net financial results	187.4	369.5
Income tax (benefit) expense	108.6	115.6
Change in fair value of offtake agreement ⁽¹⁾	44.2	0.1
Impairment loss (reversal) of long-lived assets ⁽²⁾	(91.7)	32.9
Impairment (reversal) of other assets ⁽³⁾	-	0.3
Aripuanã ramp-up impacts ⁽⁴⁾	-	25.2
Gain (loss) on sale and write-off of property, plant and equipment ⁽⁵⁾	1.6	16.2
Remeasurement adjustment of streaming agreement ⁽⁶⁾	24.6	21.1
Change in fair value of energy forward contracts ⁽⁷⁾	(9.6)	(0.1)
Other restoration obligations ⁽⁸⁾	(8.1)	1.0
Divestment and restructuring gains ⁽⁹⁾	(7.7)	(9.0)
Dividends received in cash ⁽¹⁰⁾	23.8	25.2
Asset retirement obligations remeasurement estimate ⁽¹¹⁾	7.7	(5.3)
Adjusted EBITDA	771.9	714.1

(1) Non-cash adjustment: Derivative financial instrument related to the “offtake agreement.”

(2) Non-cash adjustment: Cash generating unit and individual PP&E assets impairment loss (reversal).

(3) Non-cash adjustment: Value-added-taxes impairment loss.

(4) Expenses related to pre-operating and ramp-up expenses incurred during the commissioning and ramp-up phases of greenfield projects which have not achieved their expected production capacity. Commencing in July 2024, these effects were no longer included since, at the end of June 2024 it reached the final stage of its ramp-up phase, transitioning to an ongoing operation.

(5) Non-cash adjustment: Results from sale and disposal of certain non-current assets.

(6) Non-cash adjustment: Remeasurement of contractual obligation related to the forward sale contract of Cerro Lindo's Silver contained in the ore.

(7) Non-cash adjustment: The fair value adjustment of the energy surplus resulting from electric energy purchase contracts of our subsidiary, Pollarix and Nexa Energy.

(8) Non-cash adjustment: Expenses related to the remeasurement of provision related to estimated costs of anticipated additional obligations in relation to certain inactive industrial waste containment structures in Brazil that have been closed for more than 20 years and that do not contain mining tailings, water, or liquid waste.

(9) Expenses related to the effects of obligations of restructuring and divestment related to assets held for sale.

(10) Amount in cash dividend received from associates (currently, Enercan is our only associate), as our management considers this dividend part of the analysis of our energy costs.

(11) Non-cash adjustment: Asset retirement obligation remeasurement of discount rate and updated studies that are not subject to capitalization.

Net Debt

We define Net Debt as (i) loans and financing and lease liabilities, *less* (ii) cash and cash equivalents, *less* (iii) financial investments, *plus/less* (iv) the fair value of derivative financial liabilities or assets, respectively. Our management believes that net debt is an important figure because it indicates our ability to repay outstanding debts that become due simultaneously using available cash and highly liquid assets.

A reconciliation of Net Debt to loans and financing as of December 31, 2025, and 2024 is presented below.

	As of December 31,	
	2025	2024
	(in millions of US\$)	
Calculation of Net Debt:		
Loans and financings	1,706.0	1,762.6
Derivative financial instruments	(2.3)	(1.5)
Lease liabilities	121.1	95.9
Cash and cash equivalents	(515.9)	(620.5)
Financial investments	(5.7)	(19.7)
Net Debt	1,303.2	1,216.8

Net Debt to Adjusted EBITDA

We define Net Debt to Adjusted EBITDA ratio as Net Debt divided by Adjusted EBITDA.

The calculation of our Net Debt to Adjusted EBITDA ratio for the periods indicated is presented below.

	As of and For the Year Ended December 31,	
	2025	2024
	(in millions of US\$)	
Calculation of Net Debt to Adjusted EBITDA Ratio:		
Net debt (period end)	1,303.2	1,216.8
Adjusted EBITDA	771.9	714.1
Net Debt to Adjusted EBITDA Ratio	1.69	1.70

Adjusted EBITDA Margin

We define Adjusted EBITDA margin as Adjusted EBITDA divided by net revenues. The calculation of our Adjusted EBITDA margin for the periods indicated is presented below.

	For the Year Ended December 31,	
	2025	2024
	(in millions of US\$)	
Calculation of Adjusted EBITDA Margin:		
Adjusted EBITDA	771.9	714.1
Net revenues	3,002.1	2,766.5
Adjusted EBITDA Margin	25.7%	25.8%

Cash cost, net of by-products credits and related measures

In this report, we also present measures of costs that are widely used by peer companies operating in the mining and smelting industries. These performance measures are non-IFRS Accounting Standards measures, and they do not have a standard meaning and therefore may not be comparable to similar data presented by other mining and smelting companies. They should not be considered as a substitute for costs of sales, costs of selling and administrative expenses, or as an indicator of costs. Similar measures are also calculated by Wood Mackenzie for many market participants, but Wood Mackenzie's methodology differs from the methodology we use below.

Our management uses cash cost, net of by-products credits and related measures, among other measures, for internal planning and performance measurement purposes. We believe these measures provide useful information about the operational performance of our operations that facilitates period-to-period comparisons on a consistent basis.

In calculating cash cost, net of by-products credits, we account for transactions between our mining operations and our smelting operations using the same methodology we use to evaluate the performance of our mining and smelting segments. See Note 2 to our consolidated financial statements. We prepare an internal calculation based on transfer pricing adjustments made on an arm's length principal basis. All information disclosed for cash cost, net of by-products credits is consistent with this methodology.

Mining operations

Cash cost, net of by-products credits: For our mining operations, cash cost, net of by-products credits includes all direct costs associated with mining, concentrating, leaching, solvent extraction, on-site administration and general expenses, any off-site services essential to the operation, concentrate freight costs, marketing costs and property and severance taxes paid to state or federal agencies that are not profit-related. Treatment and refining charges on metal sales, which are typically recognized as a deduction component of sales revenues, are added to cash cost. Cash cost is calculated on a contained zinc sold basis, which indicates the percentage of zinc in metal sold, after the deduction of by-products credits attributable to mining operations, such as copper, silver, gold, and lead, which are deducted from total cash cost.

Sustaining cash cost, net of by-products credits: Sustaining cash cost, net of by-products credits is defined as the cash cost, net of by-products credits *plus* non-expansion capital expenditure, including sustaining health, safety and environment, modernization and other non-expansion-related capital expenditures.

All in sustaining cost, net of by-products credits: All in sustaining cost (“AISC”) is defined as sustaining cash cost, net of by-products credits *plus* corporate general and administrative expenses, royalties, and workers’ participation.

Our cash cost and AISC net of by-products credits are measured with respect to zinc sold.

For mining operations, we present below cash cost, net of by-products credits, sustaining cash cost, net of by-products credits and all-in sustaining cost and a reconciliation to our consolidated financial statements.

For the year ended December 31, 2025

	Vazante	Aripuanã	Cerro Lindo	El Porvenir	Atacocha	Consolidation of Operations	Corporate and Others	Mining

Royalties	2.9	8.6	6.7	3.0	1.34	22.5		22.5
Corporate G&A							44.5	44.5
AISC net of by-product credits (sold)								143.0
AISC net of by-product credits (sold) (per tonne)								454.0

Smelting operations

Cash cost, net of by-products credits: For our smelting operations, cash cost, net of by-products credits includes all the costs of smelting, including costs associated with labor, net energy, maintenance, materials, consumables and other on-site costs, as well as raw material costs. Cash cost is calculated on a contained zinc sold basis after the deduction of by-products credits attributable to smelting operations.

Sustaining cash cost, net of by-products credits: Sustaining cash cost, net of by-products credits is defined as the cash cost, after by-products credits *plus* non-expansion capital expenditure, including sustaining health, safety and environment, modernization and other non-expansion-related capital expenditures.

All in sustaining cost, net of by-products credits: All in sustaining cost is defined as sustaining cash cost, net of by-products credits *plus* general and administrative expenses and workers’ participation.

Our cash cost and AISC net of by-products credits are measured with respect to contained zinc sold, not considering resale operations of zinc from third parties. For our smelting operations, we present below cash cost, net of by-products credits, sustaining cash cost, net of by-products credits and all in sustaining cost and a reconciliation to our consolidated financial statements.

LIQUIDITY AND CAPITAL RESOURCES

Overview

In the ordinary course of business, our principal funding requirements are for working capital, capital expenditures relating to maintenance and expansion investments, servicing our indebtedness and distributions to our shareholders. We typically meet these requirements through operational cash flows, short, mid or long-term borrowings from private banks, the Brazilian Economic and Social Development Bank (*Banco Nacional de Desenvolvimento Econômico e Social*, or “BNDES”), international export credit agencies, and the issuance of debt securities in the international and local capital markets.

In April 2025, we issued US\$500 million 6.600% senior unsecured notes due in April 2037. The net proceeds of this offering were directed towards funding a cash tender offer for part of our existing notes due in 2027 and in 2028. Also in April 2025, we announced and completed the early redemption and cancellation of all of our outstanding 5.375% Notes due 2027 in the principal amount of US\$110.5 million. This strategic refinancing initiative extends our debt maturity profile, enhances financial flexibility, highlights solid credit metrics and investors' confidence, and reduces near-term refinancing risk.

In May 2025, to enhance our short-term liquidity and take advantage of competitive market conditions, we entered into an Advance on Export Foreign Exchange Contract term loan in the principal amount of US\$40 million at a 5.350% annual interest rate with a six-month maturity term. This loan was repaid in a single installment including principal, interest, and applicable foreign exchange adjustments in December 2025.

In December 2025, we made a partial repayment of US\$60.0 million on an export credit note maturing in 2027, which had an outstanding principal balance of US\$90.0 million prior to this repayment.

Our financing strategy is to fund necessary capital expenditures at competitive cost while preserving liquidity and meeting our debt service obligations. We believe that our cash and cash equivalents on hand, cash generated from operations and available borrowings capacity will be adequate to meet our capital expenditure requirements and liquidity needs for our current obligations. We may, however, require temporary additional capital to support longer-term liquidity and future growth initiatives. Although we believe our sources of liquidity are adequate, weaker economic conditions in Brazil, Peru or globally could materially and adversely affect our business, financial condition, and liquidity.

Sources of funds

Our principal sources of funds are cash flows from operations and borrowings. The availability of cash flows from operations is affected by our working capital requirements and investment activities, as well as a need to service our indebtedness. In 2025, we generated net cash provided by operating activities of US\$365.0 million, a 3.9% increase as compared to US\$351.4 million in 2024, which was largely due to higher operating cash flow, partially offset by higher working capital needs.

Uses of funds

In the ordinary course of business, our principal funding requirements are related to capital expenditures and debt service. In 2025, we also used funds (i) to invest towards sustaining our current operations, (ii) for our working capital needs, (iii) for taxes and (iv) for interest to service debt and debt payments.

Capital expenditures

Our capital expenditures in 2025 amounted to US\$351.9 million, 1.4% higher than our annual guidance mainly attributed to the appreciation of the Brazilian real against the U.S. dollar, which resulted in a negative impact of US\$7 million in 2025.

Non-expansion investments, which includes sustaining, TSF and HS&E, among others, accounted for 99.7% of the total capital expenditures (or US\$350.8 million) in 2025, including the amounts under “Reconciliation to Financial Statements” which are mainly related to capitalization of interest net of advanced payments for imported materials and tax credits.

For 2026, we have budgeted US\$380.8 million to invest in our operations and projects that are currently underway.

Expenses related to mineral exploration and project evaluation

In 2025, mineral exploration expenses were US\$63.1 million, focused on unlocking the mineral potential of our assets. We continue with efforts to replenish and increase available mineral resources as part of our long-term strategy, advancing mineral exploration activities, focusing mainly on identifying new ore bodies through drilling campaigns and preserving our investments in greenfield projects and business development analysis. In 2026, we expect to spend US\$67.7 million on expenses relating primarily to targeting greenfield and brownfield projects.

In 2025, project evaluation expenses amounted to US\$15.1 million. In 2026, we expect to spend US\$18.4 million on Information Technology initiatives to enhance cybersecurity solutions and optimize systems, as well as funding for the implementation of a new tailings stockpile in Aripuanã.

Distributions

Under our dividend policy, we aim to distribute annual dividends, subject to our governance framework and the availability of distributable amounts under Luxembourg law. The annual determination of distributable amounts (through dividends and/or share premium reimbursements) considers several factors, including: (i) cash balance; (ii) free cash flow and earnings generated during the year; (iii) leverage, measured by the Net Debt to Adjusted EBITDA ratio; (iv) capital investment programs and other capital allocation decisions; (v) expected future cash flows from operations; (vi) market volatility; and (vii) strategic planning considerations. In accordance with this policy, we target an annual dividend of up to 20% of free cash flow pre-events (defined as free cash flow excluding the effects of non-recurring or extraordinary items that are not part of our normal operations, including, among others, acquisitions, divestitures, legal settlements, and other one-off transactions), with a minimum payment of US\$0.08 per common share.

For the year ended on December 31, 2025, the Board of Directors proposed a share premium reimbursement equivalent to 20% of the free cash flow pre-events, amounting to approximately US\$17.5 million or US\$0.132136 per share. This proposal is subject to approval at the annual general shareholder meeting, expected to take place on June 25, 2026. If approved, the share premium reimbursement is expected to occur on or around August 11, 2026, to shareholders of record as of July 26, 2026.

Debt

As of December 31, 2025, our total outstanding consolidated indebtedness (current and non-current loans and financings, including accrued interest as of December 31, 2025) is US\$1,706.0 million, consisting of US\$55.4 million of short-term indebtedness, including the current portion of long-term indebtedness (or 3.2% of the total indebtedness), and US\$1,650.6 million of long-term indebtedness (or 96.8% of the total indebtedness). Our outstanding consolidated indebtedness decreased by 3.2% compared to December 31, 2024.

Our U.S. dollar denominated indebtedness as of December 31, 2025, was US\$1,393.9 million (or 81.7% of our total indebtedness), our Brazilian real denominated indebtedness was US\$312.1 million (or 18.3% of our total indebtedness).

As of December 31, 2025, US\$362.3 million, or 21.2% of our total consolidated indebtedness, bears interest at floating rates, including US\$190.0 million of *real*-denominated indebtedness that bear interest at rates based on the CDI, SELIC, TJLP and TLP rates (the long-term interest rates set by the Brazilian National Monetary Council and the basic costs of financing of the BNDES), and US\$172.3 million of foreign currency-denominated indebtedness that bear interest at rates based on SOFR.

Only 3.2% (US\$55.4 million) of the total debt matures in 2026, 2.9% (US\$49.4 million) matures in 2027, 25.6% (US\$436.1 million) matures between 2028 and 2031, 37.3% (US\$636.8 million) matures between 2032 and 2036, while 31.0% (US\$528.2 million) of total debt matures in and after 2037.

We continuously assess short- and mid-term debt to finance operational activities, ensuring business continuity, efficient working capital management, and a stable maturity profile of our debt. Actions related to our capital structure, including, but not limited to, improving the profile of outstanding debt, extending maturity and assessing financing alternatives are constantly under evaluation.

The following table sets forth selected information with respect to our total outstanding consolidated indebtedness as of December 31, 2025.

		As of December 31, 2025		
Indebtedness	Average Annual Interest Rate	Current Portion ⁽¹⁾	Long-term Portion ⁽¹⁾	Total ⁽¹⁾
(in millions of US\$)				
Eurobonds - USD	Pre-USD + 6.67%	19.0	1,202.6	1,221.6
BNDES	TJLP + 2.82%	28.3	147.1	175.4
	SELIC + 3.10%			
	TLP - IPCA + 5.85%			
Export Credit Notes	SOFR + 2.4%	0.9	121.2	122.1
Debtentures	SOFR + 2.5%			
	CDI + 1.50%	4.6	117.5	122.1
Others		2.6	62.2	64.8
Total		55.4	1,650.6	1,706.0

⁽¹⁾ Includes principal and interest.

As of December 31, 2025, US\$175.4 million remains outstanding under our loan agreements with BNDES regarding to Nexa Brazil's facility agreements which are guaranteed only by Nexa Resources.

As of December 31, 2025, some of our debt instruments contained covenants that restrict, among other things, our ability, and the ability of certain of our subsidiaries to incur liens and merge or consolidate with any other person or sell or otherwise dispose of all or substantially all its assets. These instruments also contained covenants requiring that we comply with certain financial ratios, including:

- a debt service coverage ratio equal to or higher than 1.0;
- a net debt to EBITDA ratio equal to or lower than 4.0; and
- an equity to total assets ratio equal to or higher than 0.3.

In 2024, we did not comply with one of the financial covenants included in the BNDES loan agreements, the capitalization ratio, which is measured as equity to total assets ratio, and must be equal to or higher than 0.3. We obtained a bank guarantee in accordance with the loan agreements which guaranteed us the right to classify the debt as long-term. Subsequently, in February 2025, we obtained a waiver from BNDES for the period from December 31, 2024, to December 31, 2025.

During 2025, we engaged in negotiations with BNDES and, on December 22, 2025, obtained a side letter authorizing: (i) the waiver of the financial covenants applicable to the fiscal year ended December 31, 2025, and (ii) the replacement of such covenants with a new contractual obligation to maintain a minimum corporate credit rating. The corresponding amendments to the loan agreements are expected to be executed within 120 days from the issuance of the letter. In accordance with the letter, the previous financial ratio requirements were replaced with minimum global-scale rating requirements. Given that the letter was issued prior to year-end and provides a legally enforceable and unconditional right to defer settlement, there was no event of default, and the previous covenants no longer affect the loan's maturity profile. As of December 31, 2025, we were in compliance with these requirements, and management has not identified any conditions that would indicate a potential downgrade below the required levels.

Short-term indebtedness and revolving credit lines

Our consolidated short-term indebtedness, including the current portion of our long-term debt, was US\$55.4 million, including principal and interest, as of December 31, 2025.

We have a US\$320 million sustainability-linked revolving credit facility, to support our liquidity profile, and the applicable margin may vary subject to compliance with carbon reduction key performance indicators. The facility is guaranteed by Nexa Brazil and Nexa CJM, and will mature in October 2028, and amounts drawn are subject to an initial interest rate of 1.60% plus Term SOFR per annum. As of December 31, 2025, no amounts were drawn under this facility.

In May 2025, to enhance our short-term liquidity and take advantage of competitive market conditions, we entered into a Term Loan of Advance on Export Foreign Exchange Contract in the principal amount of US\$40 million at a 5.35% annual interest rate with a six-month maturity term. This loan was repaid in a single installment, including principal, interest, and applicable foreign exchange adjustments.

In December 2025, we made a partial early repayment of US\$60.0 million for an export credit note maturing in 2027, which had an outstanding principal balance of US\$90.0 million prior to the repayment.

We believe that, based on current market conditions and our liquidity position, we will continue to secure sufficient credit to finance our working capital needs. See “Risk factors—Financial risk— Our business requires substantial capital expenditures and is subject to financing risks.”

Long-term indebtedness

The following discussion briefly describes our principal financing agreements as of the date of this annual report. For additional information, see Note 24 to our consolidated financial statements.

- *Debentures.* In April 2024, our wholly owned subsidiary Nexa Brazil issued 650,000 non-convertible ESG-linked debentures, each with a par value of R\$1,000.00, totaling R\$650 million (approximately US\$130 million). The debentures mature on March 28, 2030, are unsecured, bullet, and bear interest at 100% of CDI interest rate plus 1.50% per annum. In March 2025, we entered into a cross-currency swap agreement to change the variability of the CDI exposure associated with these debentures to an effective fixed rate in USD of approximately 6.21% per annum. As of December 31, 2025, our outstanding principal amount under this debenture was US\$122.1 million, including accrued interest.
- *Export Finance Notes.* In December 2023, we issued a Credit Note in the total principal amount of US\$50 million with maturity date of five years and costs of 2.20% plus TERM SOFR. As of December 31, 2025, our outstanding principal amount under this facility was US\$50.1 million, including accrued interest.
- *Export Credit Notes.* In March 2024, we extended by five years one of our remaining Export Credit Notes which was maturing on October 2024 with a cost of TERM SOFR plus 2.4%, in the total initial facility amount of US\$90.0 million. As of December 31, 2025, our outstanding principal amount under these Export Credit Notes was US\$91.6 million, including accrued interest.
- *Export Credit Notes.* In March 2022, we issued Export Credit Notes in the total principal amount of US\$90 million with a maturity date of five years and costs of 2.5% plus TERM SOFR. In December 2025, we made a partial early repayment of US\$60.0 million, plus the proportional accrued interest. As of December 31, 2025, our outstanding principal amount under our Export Credit Notes was US\$30.6 million, including accrued interest.
- *Nexa Resources Bonds due 2028.* In June 2020, we issued an aggregate principal amount of US\$500.0 million in bonds maturing in 2028 and bearing interest at 6.500% per year. The bonds are guaranteed by our subsidiaries Nexa Brazil, Nexa Peru, and Nexa CJM. In April 2024, we repurchased approximately 19.9% of the outstanding principal amount of the 2028 Notes. As of December 31, 2025, the outstanding amount under these bonds was US\$113.9 million, including accrued interest.

Nexa Resources Bonds due 2034. In April 2024, we issued an aggregate principal amount of US\$600.0 million in senior unsecured notes maturing in 2034 and bearing interest at 6.750% per year. The bonds are guaranteed by Nexa Brazil and Nexa CJM. The net proceeds of this offer were used to fund cash tender offers for our existing bonds due 2027 and 2028, which were validly tendered and accepted for purchase pursuant to the tender offers. As of December 31, 2025, the outstanding amount under these notes was US\$604.7 million, including accrued interest.

Nexa Resources Bonds due 2037. In April 2025, we issued an aggregate principal amount of US\$500.0 million in senior unsecured notes maturing in 2037 and bearing interest at 6.600% per year. The bonds are guaranteed by Nexa Brazil and Nexa CJM. The net proceeds of this offer were used to fund cash tender offers for our existing bonds due 2027 and 2028, which were validly tendered and accepted for purchase pursuant to the tender offers. As of December 31, 2025, the outstanding amount under these notes was US\$502.9 million, including accrued interest.

BNDES - ESG linked credit line. In June 2024, Nexa Brazil drew upon an ESG linked credit line from BNDES amounting to R\$200.0 million, with a term of approximately 8 years, maturing in March 2032. The credit line carries interest rate of IPCA plus 5.4% p.a. and a spread of 1.84%. Following a 2-year grace period, amortization of the loan will occur in 72 consecutive installments. After the 2-year grace period, the spread rate of 1.84% may be reduced to 1.44% if certain ESG goals are met, otherwise, the rate will increase to 2.84%. As of December 31, 2025, our outstanding principal amount under this loan agreement was US\$35.7 million, including accrued interest and fees.

BNDES - Aripuanã Loan. We have obtained a multi-tranche Credit Facility Agreement from BNDES for our Aripuanã Project with a cost of TLP IPCA plus 5.89%, maturing in 2040. As of December 31, 2025, our outstanding principal amount under this loan agreement was US\$113.7 million, including accrued interest.

BNDES - Revolving credit agreement I and II. We have obtained a multi-tranches Credit Facility Agreement from BNDES for our several projects (mainly Vazante Mine Deepening) with a cost of TLP plus 5.13%, SELIC plus 3.10%, TJLP plus 2.82% and TLP - IPCA plus 5.22%, with the final tranche maturing in 2028. As of December 31, 2025, our outstanding principal amount under these loan agreements was US\$25.9 million, including accrued interest.

FINEP. In 2014, Nexa Brazil obtained a loan from the Brazilian Financing Agency for Studies and Projects (*Financiadora de Estudos e Projetos* or “FINEP”), to finance the research and development of various projects. As of December 31, 2025, our outstanding principal amount under this loan agreement was US\$14.6 million, including accrued interest.

The following table sets forth selected information with respect to Nexa Brazil’s principal long-term financings with BNDES and our outstanding amount under these financings as of December 31, 2025.

Indebtedness	Borrower	Guarantor	Interest Rate	Payments Commencing on	Maturity Date	Principal Amount Outstanding As of December 31, 2025 (in millions of US\$)
R\$200.0 million ESG-linked credit line	Nexa Brazil	Nexa Resources	IPCA plus 7.35%	April 15, 2026	March 15, 2032	35.7
Total						35.7
R\$1,000.0 million BNDES Revolving Credit Agreement I	Nexa Brazil	Nexa Resources	TLP plus 5.13% per annum	January 15, 2019	December 15, 2028	5.3
Total						5.3
R\$1,200.0 million BNDES Revolving Credit Agreement II ⁽¹⁾	Nexa Brazil	Nexa Resources	SELIC plus 3.10% per annum	October 15, 2021	September 15, 2026	7.2
	Nexa Brazil	Nexa Resources	TJLP plus 2.82% per annum	September 15, 2017	September 15, 2026	3.2
	Nexa Brazil	Nexa Resources	TLP - IPCA plus 5.89% per annum	January 15, 2019	December 15, 2028	10.2
Total						20.6
Credit Facility Agreement	Nexa Brazil	Nexa Resources	TLP plus 5.52% per annum	March 15, 2023	August 15, 2040	113.7
Total						113.7
Total BNDES Long-Term Indebtedness						175.4

⁽¹⁾ Consists of three tranches.

Cash flows

The table below presents our cash flows from operating activities, investing activities and financing activities for the years ended December 31, 2025, and 2024.

	For the Year Ended December 31,	
	2025	2024
	(in millions of US\$)	
Consolidated Statement of Cash Flows Information		
Net cash flows provided by (used in):		
Operating activities	365.0	351.4
Investing activities	(297.0)	(238.1)
Financing activities	(185.3)	62.4
Foreign exchange effects on cash and cash equivalents	12.7	(12.4)
Increase (decrease) in cash and cash equivalents	(104.6)	163.3
Cash and cash equivalents at the beginning of the year	620.5	457.3
Cash and cash equivalents at the end of the year	515.9	620.5

In 2025, our net cash flow provided by operating activities was US\$365.0 million, primarily due to an increase in the confirming payables program, along with interest and foreign exchange effects, which offset higher income tax payments.

In 2025, our net cash flow used in investing activities was US\$297.0 million to maintain the sustainability of our business and invest in our growth, mainly related to sustaining investments related to mine development and the acquisition, replacement, and repairs of equipment in our operations.

In 2025, our net cash flow used in financing activities was US\$185.3 million as a result of activities resulting from our liability management actions conducted during the year, such as bond repurchases, payments of loans and financings (including the partial repayment of an export credit note and the full settlement of a short-term loan), payment of share premium reimbursement and payments of lease liabilities.

As a result, on December 31, 2025, our cash and cash equivalents were US\$515.9 million, US\$104.7 million lower compared to our cash and cash equivalents on December 31, 2024.

RISK MANAGEMENT

Risk management is considered one of the key points in our business strategy and contributes to value creation and increasing the level of confidence in us by its main stakeholders, including shareholders, employees, customers, suppliers, and the local communities.

As a result, we have adopted an Enterprise Risk Management Policy that describes our Risk Management Model as available at our website, and its activities are an integral part of the processes in our operational units, corporate departments, and projects, and provide support for decision-making by our executive officers and Board of directors.

Risks are categorized into four major classes—strategic, financial, operational, and regulatory—and further broken down into categories and subcategories. We seek to identify material risks, which are then assessed with consideration of the potential health and safety, environmental, social, reputational, legal and compliance, cybersecurity and information security, and financial impacts. Our risk governance operates through three integrated levels: the executive level (the board and the management committee) addresses strategic and prioritized risks; the tactical level (corporate vice-presidents and general managers) translates strategic policies into concrete actions and determines which risks to escalate; and the transactional level (operational managers and process leaders) manages risks that emerge in daily operational processes, including health and safety. In this context, we promote a culture of collective ownership of risk management, where risks are identified, discussed, and shared across the organization. While governance and oversight responsibilities are clearly defined, risk ownership is embedded throughout our business, and employees at all levels are expected to actively contribute to the identification and management of risks within their areas of responsibility. By embedding risk management into our work processes and critical business systems through this structured approach, we work to ensure we make decisions based on our risk appetite, which is reviewed annually and validated by senior management, based on relevant inputs and valid data.

We ensure a coordinated approach to risk management by integrating processes across Risk Management, Internal Controls, Internal Audit, Compliance, and our Ethics Hotline, aligning our approach when managing the same risk on different fronts. The Risk Committee, a standing committee of the Management Committee, monitors the risks that may affect the achievement of our objectives, provides oversight across all risk categories, approves and oversees the processes used to identify, evaluate, and manage risks, and issues recommendations to the Management Committee related to performance of risk controls, compliance with action plans, and risk response strategies. The Risks Area is responsible for coordinating the preparation and consolidation of information to be presented at each governance level, in line with the defined information hierarchy, and ensuring that such information is updated in accordance with the frequency of the applicable forums.

Financial risk

We consider market risk to be the potential loss arising from adverse changes in market rates and prices. We are exposed to several market risks arising from our normal business activities. These market risks, which are beyond our control, principally involve the possibility that changes in commodity prices, interest rates or exchange rates will adversely affect the value of our inventory, financial assets and liabilities or future cash flows and earnings. For information on our risk management policies, see Note 12 to our consolidated financial statements.

Our financial risk management policy seeks to preserve our liquidity and protect our cash flow and its operating components (revenues and costs), as well as financial components (financial assets and liabilities) against adverse credit and market events such as fluctuations in currency and interest rates.

A significant portion of the products we sell are commodities, with prices based on international indices and denominated in U.S. dollars. A portion of our costs, however, are denominated in *reais* and *soles*, and therefore leads to a mismatch of currencies between our revenues and costs. Additionally, our indebtedness is based on different indices and currencies, which may impact our cash flows.

Our current financial risk management policy includes:

- **Foreign Exchange Exposure Management.** Foreign exchange exposure is our exposure to fluctuations in the currencies that make up our commercial, operational, and financial relations (the *real* and *sol*), and that may impact our U.S. dollar cash flow. All actions in the financial risk management process are intended to hedge our cash flow in U.S. dollars, to maintain our ability to pay our financial obligations and to comply with liquidity and indebtedness levels defined by our management team. Our foreign exchange hedge mechanisms are based on the foreign exchange exposure that is projected at least for 12 months after a reference date.

- **Interest Rate Exposure Management.** Exposure to the interest rate is our exposure to fluctuations in each of the indices of interest rates (mainly CDI, SOFR and TJLP) from loans and financing transactions and financial investment that may impact our cash flow. Interest rate fluctuations would also result in gains or losses in the market value of our fixed rate debt portfolio due to differences in market interest rates and the rates at the execution of the debt agreements.
- **Commodity Exposure Management.** Exposure to commodity prices is our exposure to income and operating costs fluctuations due to changes in the reference prices for commodities (*e.g.*, zinc, copper, silver) based on demand, production capacity, producers' inventory levels and commercial strategies and the availability of substitutes in the global market. We calculate our exposure for at least 12 months after a reference date, considering any derivative financial instrument that has a certain commodity as the underlying asset.
- **Counterparties and Issuers' Risk Management.** This policy establishes exposure limits for financial and non-financial institutions that are counterparties of financial transactions and/or issuers of debt securities. The purpose of our counterparties and issuers' risk management is to mitigate the occurrence of negative impacts on our cash flows from the non-fulfillment of financial obligations by these issuers and counterparties. In the case of financial investments (cash allocation), we measure exposure to credit risk of issuers by the sum of gross balances of financial investments. In the case of derivative transactions, the credit risk exposure of a certain counterparty and transaction is measured by the pre-settlement risk using statistical models. Exposure limits are determined based on ratings assigned by rating agencies and the equity of the relevant financial institution.
- **Liquidity and Financial Indebtedness Management.** This policy establishes guidelines for managing our liquidity and financial indebtedness. The main instrument for measuring and monitoring liquidity is a cash flow projection, considering a minimum projection period of 12 months from the reference date. Liquidity and debt management considers as an objective the comparable metrics provided by global credit rating agencies for investment grade entities. With respect to indebtedness, metrics considered compatible with the relevant objective are considered.

All proposals must comply with the guidelines and rules set forth in our Financial Risk Management Policy and subsequently submitted for review by our Finance Committee and then for our Board of directors' approval, under the governance structure set forth in our Financial Risk Management Policy.

The following sensitivity analyses present the estimated impact on our Adjusted EBITDA from changes in the principal market variables to which our results are exposed. Commodity prices, particularly zinc, represent our most significant market risk, with a 10% change in zinc prices estimated to impact Adjusted EBITDA by approximately US\$78.2 million, or approximately 10% of our 2025 Adjusted EBITDA. Foreign exchange movements, particularly in the Brazilian real and Peruvian sol, represent the second most significant market risk. Interest rate exposure is comparatively lower, given the predominantly fixed-rate structure of our debt portfolio. Each sensitivity is calculated independently, holding all other variables constant, and does not reflect management actions that could be taken to mitigate the impact.

Metal price sensitivity

We are subject to financial risks arising from the volatility of prices of zinc, copper, lead, and silver, and to a lesser extent gold. Assuming that expected metal production and sales are achieved, that tax rates are unchanged, and giving no effect to potential hedging programs, metal price sensitivity factors would indicate the following change in our 2025 Adjusted EBITDA (as previously defined) attributable to us resulting from metal price changes.

	Zinc	Copper	Lead	Silver
Change in metal price (in percentage)	10%	10%	10%	10%
Estimated change in Adjusted EBITDA (in millions of US\$)	78.2	30.3	10.6	32.6

Foreign exchange risk

We are subject to foreign exchange risks resulting from the fluctuation of the *real* and the *sol* against the U.S. dollar, our functional currency. All actions in the financial risk management process related to our foreign exchange exposure are intended to hedge our cash flow in U.S. dollars, to maintain our ability to pay our financial obligations and to comply with liquidity and indebtedness levels defined by our management. We are also exposed to financial risk associated with changes in foreign currency exchange rates as certain costs incurred are in currencies other than our functional currency.

Assuming that expected metal production and sales are achieved, that tax rates are unchanged, and giving no effect to potential hedging programs, a 10% exchange rate appreciation or devaluation of the Brazilian real against the U.S. dollar as of December 31, 2025, we estimate that our Adjusted EBITDA would have increased or decreased by the dollar amounts shown below. This calculation assumes that each exchange rate would change in the same direction relative to the U.S. dollar.

	+10%	-10%
Estimated change in Adjusted EBITDA (in millions of US\$)	+59.4	-72.6

In addition to the direct effects of changes in exchange rates, changes in exchange rates may also affect the volume of sales as other market participants become more or less competitive. This sensitivity analysis does not factor in a potential change in sales levels or actions that management could take to manage the potential impact. Accordingly, the actual effect of exchange rate fluctuations will vary from period to period. However, assuming all other factors are held constant, we would expect future fluctuations like those analyzed above to have a similar potential impact on our results for future periods. See “Forward-looking Statements.”

Interest rate risk

A portion of our outstanding debt bears interest at variable rates and, accordingly, is sensitive to changes in interest rates. Based upon our indebtedness as of December 31, 2025, an increase/(decrease) in SOFR of 25.0% would impact our income statement for the year and cash flows by US\$1.6 million. We calculate our exposure to fluctuations in interest rates at least 12 months after a reference date, considering any derivative financial instrument that has certain index as the underlying asset. Based on these exposures, we prepare financial protection proposals, which are submitted to our Finance Committee’s approval. The hedges of interest rates, in general, seek to exchange fixed interest rate to floating interest rate or vice versa.

Derivative instruments

To hedge against financial risk, we enter derivative transactions under our Financial Risk Management Policy. Those transactions are conducted in the over-the-counter market under master agreements such as International Swaps and Derivative Association and Brazilian *Contrato Geral de Derivativos* (“CGD”) Agreements.

None of the derivative transactions we are partying to as of December 31, 2025, have corporate guarantees or require margin calls or any kind of collateral. None of the derivatives we were party to as of December 31, 2025, were entered into for speculative or arbitrage purposes.

We have the following recurring hedge programs in place:

Commodity Hedges

Hedge for concentrate sales (Strategic Hedge)

The objective of our strategic hedge is to reduce the volatility of cash flows due to price fluctuations in LME prices for zinc, copper, and lead, as well as London Bullion Market Association (LBMA) prices for silver and gold contained within these concentrates. This approach helps ensure a more predictable operating margin.

The hedged items are the proportion of payable metals (zinc, copper, lead, gold, and silver) within the sold concentrates, priced by the LME or the LBMA. We implement this strategic hedge through the sale of forward contracts or zero-cost collar contracts.

Hedge for mismatches of quotational periods (Book Hedge)

The objective of our book hedge is to mitigate the risk of mismatches in quotational periods arising between the purchases of metal concentrate or processed metal and the sale of processed metal. These transactions usually involve the purchases and sales of zinc for future trading on the over-the-counter market.

For this strategy, the hedged items are the percentages of payable zinc contained in the purchased concentrates by the smelters and the percentages of payable zinc contained in the sold metals. Concentrates from integrated own mines, and consequently the metals produced from these concentrates, are not part of this strategy as they do not bear the risk of mismatches of quotation periods.

Hedge for non-standard price metal sales (Customer Hedge)

The objective of our customer hedge is to maintain the revenues of a business unit linked to a standard LME quotational period ("QP") price, converting non-standard QPs offered to specific customers to a standard QP. For this strategy, the hedged item is the percentage of payable metal contained in the processed metals sold with the price negotiated on the LME.

On December 16, 2025, we implemented a new gold and silver revenue hedge program using "Zero Cost Collar" derivative instruments as part of our commodity risk management strategy. This was done to reduce the exposure of our Peru operations to commodity price risk in 2026 and to protect its margins. The Zero Cost Collars have monthly maturities until December 2026, in line with the forecast volume percentages provided by the commercial team. A Zero Cost Collar involves simultaneously buying and selling options to limit exposure to adverse price movements of commodities while capping potential gains within a predefined range. These contracts are designated as hedging instruments in accordance with IFRS 9.

Foreign Exchange hedge

Our cash flow is subject to currency volatility because the prices of our products are predominantly indexed to the U.S. dollar, while a significant portion of our costs are denominated in other currencies. Additionally, some debts and financial obligations are contracted in currencies other than the U.S. dollar, which also generates foreign exchange risk. To mitigate these risks, we may engage in derivative transactions, such as forwards, swaps, and options, to hedge its cash flow against foreign exchange fluctuations.

Interest Rate hedge

The Interest Rate hedge aims to protect our cash flow from fluctuations in interest rates associated with our financial assets or liabilities. Each interest rate exposure is projected until the maturity of the corresponding assets or liabilities. The hedging strategies may include exchanging a fixed interest rate for a floating interest rate, or vice versa; swapping one floating interest rate for another; or converting an interest rate (whether fixed or floating) denominated in one currency into an interest rate (whether fixed or floating) denominated in another currency.

On March 28, 2025, we executed a cross-currency swap with a notional amount of US\$112,652 (BRL 650,000 at the transaction date) to hedge the BRL exposure on Nexa Brazil debentures issued on April 2, 2024. The swap mirrors the interest and principal payment terms of the debentures, which mature on March 28, 2030, with semi-annual payments. Under the agreement, we pay 6.209% on the U.S. Dollar notional and receive CDI + 1.50% per annum floating on the BRL notional. This instrument is recognized at fair value through profit or loss (FVTPL) under net financial results.

We initially recognize derivative instruments at fair value on the date a derivative contract is entered into and subsequently remeasure at their fair value. The method of recognizing the resulting gain or loss depends on whether we designate the derivative as a hedging instrument, in the case of adoption of hedge accounting, and if so, the nature of the item being hedged. We adopt the hedge accounting procedure and designate certain derivatives as either:

- hedges of the fair value of recognized assets or liabilities or a firm commitment (fair value hedge); or
- hedges of a particular risk associated with a recognized asset or liability or a highly probable forecast transaction (cash flow hedge).

We document the relationship between hedging instruments and hedged items at the inception of the hedging transaction, as well as the risk management objective and strategy for the undertaking of the various hedge transactions. We also document our assessment, both at the inception of the hedge and on an ongoing basis, of whether the derivatives that are used in hedging transactions have been and will continue to be highly effective in offsetting changes in fair values or cash flows or fair values of hedged items.

Cybersecurity

Risk Management and Strategy

We maintain a comprehensive process for assessing, identifying, registering, addressing, and managing material risks associated with cybersecurity that may impact on our business, including risks related to disruption of business operations, financial reporting systems, or our financial statements, as well as fraud, regulatory, reputational, and business continuity risks.

We prioritize the identification and management of cyber risks, focusing on adopting controls, technologies and processes that support cybersecurity, developing IT systems and infrastructure, emphasizing the confidentiality and privacy of data and information, and complying with legal and regulatory requirements. Our cybersecurity risk management process includes the following:

- Using our cybersecurity risk management practices integrated with our Enterprise Risk Management. We adopted National Institute of Standards and Technology ("NIST") framework based on six pillars: Govern, Identify, Protect, Detect, Respond and Recover, and in collaboration with external partners, we assess our adherence to the NIST framework through an analysis of our cybersecurity processes and technologies. In 2025, We conducted a maturity assessment based on the NIST framework to prioritize actions for the next two years. Utilizing material components within our cybersecurity framework, such as firewalls, Intrusion Detection and Protection system, endpoint detection and response mechanisms, phishing tests and annual penetration and intrusion tests to identify threats and vulnerabilities that could be exploited by cybersecurity attacks and reviewing relevant tactics, techniques, and procedures to prepare for a cyber-attack;
- Involving a dedicated team of professionals who monitor and act on cybersecurity events and risks including the Information Technology and Automation Technology areas. This team is responsible for creating, implementing, overseeing, and managing controls provided for specific cybersecurity policies and procedures, in addition to presenting priorities and strategies for information and cyber security. This team is overseen by a Chief Information Security Officer ("CISO") who reports to the Cybersecurity committee ("COSEG"). Furthermore, we partner with strategic vendors to aid in the implementation and management of our cybersecurity controls;
- Providing requisite training and ensuring employees comply with cybersecurity programs and policies;
- Utilizing a comprehensive Cybersecurity Materiality Matrix to identify material cybersecurity incidents;
- Maintaining a comprehensive incident response plan and playbooks in the event of a cyber-attack that consists of defined policies, processes, and protocols for identifying a cybersecurity attack, analyzing the materiality of a cyber incident, responding to and recovering the technological environment, communicating the incidents to internal parties, and if necessary or required under various regulatory regimes, external parties, and completing a closing analysis to identify possible improvements of processes and controls;

- Utilizing a cyber incident module in the Information Technology Service System to register incidents and conduct materiality analyses.

Cybersecurity Governance

Board of directors and Audit Committee

Our Board of directors has delegated direct oversight into cybersecurity matters to the Audit Committee. The Audit Committee collaborates with management to implement processes focused on monitoring cybersecurity, receiving regular updates on cybersecurity testing, incident response plans, and policies. The committee ensures regular risk assessments are conducted, receives periodic reports on any significant incidents, and establishes communication protocols for cybersecurity events.

Cybersecurity Management

Cybersecurity at Nexa is managed by COSEG, which is the executive committee responsible for overseeing our cybersecurity strategies and policies, including but not limited to, assessing and managing our material risks from cybersecurity threats. COSEG is composed of our senior managers and executives, including the CIO and CISO. On a regular basis, the results of operational cybersecurity indicators are presented to COSEG by the CISO. Our cybersecurity management is established based on cybersecurity policies and processes, a dedicated cybersecurity budget, technological solutions, human resources, suppliers, and a departmental structure for cybersecurity. COSEG regularly reviews, tests, and updates cybersecurity processes, discussing materiality determinations, ransomware attacks, and breaches. The Management Committee stays updated on technological, industry, and public policy developments related to cybersecurity risks and best practices and evaluates the need for external expert engagement or law enforcement involvement and conduct thorough investigations of cyber breaches. As of the date of this filing, we have not identified any incidents that would be deemed material within the context of the SEC's requirements.

III. SHARE OWNERSHIP AND TRADING

MAJOR SHAREHOLDERS

As of March 26, 2026, Nexa Resources has 132,438,611 common shares outstanding, with par value of US\$1.00 per share. The table below sets forth the list of our shareholders and their participation in our capital stock.

Votorantim S.A. is Nexa Resources' controlling shareholder. VSA does not have any different voting rights, but as long as it holds a majority of our voting stock, it can influence or control matters requiring approval by our shareholders, including the appointment of directors. VSA acquired all its shares in Nexa Resources on February 26, 2014.

Shareholder	Number	Share Capital (%)
VSA	85,655,128	64.68%
Public	46,783,483	35.32%
Total	132,438,611	100.00%

VSA

As of March 26, 2026, Hejoassu Administração S.A., or Hejoassu, is the sole shareholder of VSA's capital stock, which consists of 18,278,788,894 common shares. Hejoassu is indirectly wholly owned by a number of individuals, some of whom are related to our Board member Luís Ermíro de Moraes, through controlled companies.

RELATED PARTY TRANSACTIONS

We enter into transactions with related parties, including VSA and companies that are owned or controlled, directly or indirectly, by VSA, in our ordinary course of business. These transactions are conducted on an arm's length basis and in accordance with applicable laws and our corporate governance policies. See "Risk Factors—Risks relating to our corporate structure—VSA has substantial control over us, which could limit our shareholders' ability to influence the outcome of important corporate decisions." In accordance with article 441-7 of the Luxembourg law of August 10, 1915, concerning commercial companies, as amended ("1915 Law"), any member of our Board of directors having a direct or indirect financial interest conflicting with that of Nexa Resources in a transaction put before the Board for consideration must advise the Board thereof and cause a record of such member's statement to be included in the minutes of the meeting. The director may not take part in these deliberations and at the next following general meeting of shareholders of Nexa Resources, before any other resolution is put to vote, a special report shall be made on any such conflicted transactions. This shall not apply whereas the decision of the Board relates to ordinary business entered into under normal market conditions. A similar rule is stated in the article 441-12 of the Law 1915 and applies to the members of the Management committee.

We have controls in place in order to identify related parties on a quarterly basis and approve related party transactions in advance. Such controls include an analysis by the related party group, an internal committee, and in certain circumstances, the Audit Committee, which is required for the execution of related party transactions.

The table below sets forth the balances of our principal-related party transactions as of the dates and periods indicated. The entities disclosed are entities part of the Votorantim Group. The transactions relate to shared project costs such as environmental protection; administrative services provided by the Center of Excellence (*Centro de Excelência*); sales of limestones and cement purchases, mainly for the Aripuanã project; purchases of energy to be used in Nexa Brazil operation units and construction services for the Aripuanã project, among others.

Scotiabank Peru S.A.A.

We have cash and cash equivalents and incur in interest expenses on lease contracts with Scotiabank Peru S.A.A., a company in which one of our directors holds the position of Chair of the Board of Directors and therefore may have significant influence.

Shared arrangements

We have entered into a number of shared services contracts with other entities in the Votorantim Group in an effort to achieve operational efficiencies. These include joint contracts for insurance coverage and information technology. Entities in the Votorantim Group with whom we maintain such contracts have access to a substantial level of information about us. In addition, VSA negotiates our insurance coverage at the level of the Votorantim group, and we thus depend on choices made by VSA for selecting the service providers to be used for all insurances contracted by us, including coverage related to property, transport, liability, credit, and engineering risk insurances. We retain the right of approval of contract renewal terms negotiated by VSA.

In addition, all executive officers participate in the *Fundação Senador José Ermírio de Moraes* (“FUNSEJEM”) pension fund, a private, closed and not-for-profit pension fund responsible for the management of the pension plans for the employees of companies linked to the Votorantim Group.

See “Risk Factors—Risks relating to our corporate structure—VSA has substantial control over us, which could limit our shareholders’ ability to influence the outcome of important corporate decisions.”

DISTRIBUTIONS

Distributions to our shareholders are subject to Luxembourg law and approval of our Board of Directors or shareholders, as applicable, and depend on factors including our cash balance, cash flow, earnings, capital investment plans, expected future cash flows, strategic plans, cash dividend distributions from subsidiaries, legal requirements, and other relevant factors. As of December 31, 2025, there were no contractual restrictions on our ability to make distributions. Based on our current dividend policy, we target an annual dividend of up to 20% of our free cash flow pre-events (defined as free cash flow before considering significant, non-recurring, or extraordinary events such as debt amortization, new funding, dividend payments, and other extraordinary payments), with a minimum payment of US\$0.08 per common share. Each common share entitles the holder to participate equally in distributions, unless the right has been suspended in accordance with our articles of association or applicable law. Distributions may be made as dividends or reimbursements of share premium. Under Luxembourg law, dividends are determined by simple majority vote at a general shareholders' meeting based on our Board's recommendation. Our Board may also declare interim dividends in the event of unexpected profits or non-recurring revenue increases (subject to certain requirements, including preparation of interim accounts), and/or proceed with reimbursements of share premium in accordance with the 1915 Law.

Distributions (including dividends or share premium reimbursements) may only be made from amounts available for distribution under Luxembourg law, determined based on our standalone statutory accounts prepared under Luxembourg GAAP. Under Luxembourg law, the distribution amount may not exceed profits at the end of the last fiscal year plus profits carried forward and amounts drawn from available reserves, less losses carried forward and sums to be placed in reserve in accordance with Luxembourg law or our articles of association. No distributions may be made if at the end of the last fiscal year the net assets as set out in the standalone statutory accounts are, or following such distribution would become, less than the subscribed share capital plus non-distributable reserves. Distributions in the form of dividends may only be made from net profits and profits carried forward, whereas share premium reimbursements may only be made from available share premium. Luxembourg law also requires at least 5.0% of our net profits per year to be allocated to the creation of a legal reserve until such reserve has reached an amount equal to 10.0% of our issued share capital. If the legal reserve subsequently falls below the 10.0% threshold, at least 5.0% of net profits again must be allocated toward the reserve. The legal reserve is not available for distribution. As of December 31, 2025, the legal reserve is US\$13,332,051.30.

The table below outlines the distributions paid or expected to be paid to our shareholders. In 2023, 2024 and 2025, distributions were made solely in the form of share premium reimbursements.

	For the Year Ended December 31,		
	2025	2024	2023
	(in millions of US\$)		
Distributions to shareholders	17.5	13.4	25.0

For the year ended December 31, 2025, the Board of Directors has proposed a share premium reimbursement equivalent to 20% of the free cash flow pre-events, amounting to approximately US\$17.5 million or US\$0.132136 per share. This proposal remains subject to approval at the Annual General Shareholder Meeting, which is expected to take place on June 25, 2026. If approved, the share premium reimbursement is expected to occur on or around August 11, 2026, for shareholders of record as of July 28, 2026.

Nexa Resources is a holding company and has no material assets other than its ownership of shares in its subsidiaries. When Nexa Resources pays a dividend or other distribution on its common shares in the future, it generally causes its operating subsidiaries to make distributions to it in an amount sufficient to cover any such dividends or distributions. The ability of subsidiaries of Nexa Resources to make distributions to Nexa Resources is subject to their capacity to generate sufficient earnings and cash flow and may also be affected by statutory accounting and tax rules in Brazil and Peru, as well as any conditions under the corporate law applicable to each subsidiary.

A Luxembourg withholding tax of 15.0% is generally due on dividends and similar distributions made by Nexa Resources to its shareholders. However, distributions on Nexa Resources' common shares that are sourced from a reduction of share capital or share premium (stemming from contributions made by the shareholders) should not be subject to Luxembourg withholding tax if Nexa Resources does not have distributable reserves or profits in its standalone statutory accounts prepared under Luxembourg GAAP and provided that such distributions are made for genuine economic reasons. See "Additional Information—Taxation—Luxembourg tax considerations—Shareholders."

There is no tax law, tax governmental decree or tax regulation in Luxembourg that would affect the remittance of dividends or other distributions by Nexa Resources to non-resident holders of its common shares, except that there may be a withholding tax on such distributions. In certain limited circumstances, the implementation and administration of international financial sanctions may affect the remittance of dividends or other distributions. There are no specified procedures for nonresident holders to claim dividends or other distributions.

Computershare Trust Company, N.A., is the pay agent for shareholders who hold common shares listed on the NYSE. Dividends and other distributions on our common shares will be declared and paid in U.S. dollars.

TRADING MARKETS

Our publicly traded share capital consists of common shares with a par value of US\$1.00 per share. Our common shares are publicly traded in the United States on the NYSE, under the ticker symbol NEXA. On March 26, 2026, there were 132,438,611 common shares issued and outstanding.

PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS

We did not repurchase any shares during 2025. As of December 31, 2025, there were no authorized share buyback programs.

IV. CORPORATE GOVERNANCE, MANAGEMENT AND EMPLOYEES

CORPORATE GOVERNANCE

Our corporate governance model is aimed at facilitating the flow of information between our executives and other key decision-makers on our management team, specifically, our Board of directors, Board committees, and Management committee. Our corporate governance model also provides a framework for the duties of our management team, including oversight of our performance and decision-making. Our main corporate governance activities include support for Board of directors, Board advisory committees, and executive Board meetings (management committee); contribution to the process of preparing the annual report on governance practices; and elaboration of governance documents and updating of best practices.

Our corporate governance model is designed to ensure that the proper corporate governance principles are consistently applied within our organization. We have adopted certain corporate governance policies and practices that include internal rules for the Board of directors and key committees that have independent representation and leadership, including an audit committee and a compensation, nominating and governance committee. The charter for the CNG committee includes responsibility for reviewing and assessing the size, composition, and operation of the Board of directors to ensure effective and independent decision making, advising on potential conflicts of interest situations, and developing corporate governance guidelines and principles, in line with ESG standards. The disclosure set out below describes in further detail our approach to corporate governance.

Code of conduct

We work with all of our employees, as well as third parties who we work with, to ensure they behave in a manner consistent with our values, Code of Conduct, and the key principles of our compliance program, particularly as these relate to the environment, human rights and labor related issues, health and safety, anti-bribery, and corruption. The Code of Conduct reflects our commitment to the principles of anti-corruption, anti-money laundering, anti-terrorist financing, integrity, ethics, human rights, social and environmental responsibilities, and antitrust policies based on laws in effect in the countries where we operate. Our directors and executives have certified that they have read and that they will comply with our Code of Conduct. Furthermore, our Board of directors periodically monitors compliance related topics. A Conduct committee is in charge of promoting the implementation of the code and supervising the application of disciplinary measures. In 2025, we reviewed our Code of Conduct and is expected to be approved by the Board of Directors in the upcoming months. In 2022, we also launched our Code of Conduct for Suppliers and started to disseminate it to any suppliers considered to be strategic vendors. In 2023, we launched our Code of Conduct for Customers and started disseminating it as well in 2024. In 2025, we continued to disseminate our Code of Conduct for Suppliers and Code of Conduct for Customers.

Anti-corruption, anti-money laundering and antitrust programs have been implemented, including, among other things, ethics and compliance training and an ethics hotline which enables employees and third parties to report misconduct. Information reported through our ethics hotline is investigated and following the investigation, disciplinary action may be taken, if necessary. We have not granted any implicit or explicit waivers from any provision of our Code of Conduct since its adoption.

Our Code of Conduct, Code of Conduct for Suppliers and compliance-related policies are publicly available on our website at <https://www.nexaresources.com>. We will disclose future amendments to, or waivers of, our Code of Conduct on the same page as our corporate website. Information contained on our website is not incorporated by reference into this report, and you should not consider it to be part of this report.

Foreign private issuer and controlled company exemptions

Because we are a foreign private issuer, the NYSE rules applicable to us are considerably different from those applied to U.S. companies. Accordingly, we have been, and expect to continue, taking advantage of certain exemptions from NYSE governance requirements provided in the NYSE rules for foreign private issuers. Subject to the items listed below, as a foreign private issuer we are permitted to follow home country practice in lieu of the NYSE's corporate governance standards. Luxembourg law does not require that a majority of our Board consist of independent directors or the implementation of a compensation committee or nominating and corporate governance committee. As a foreign private issuer, we must comply with four principal NYSE corporate governance rules: (i) we must satisfy the requirements of Exchange Act Rule 10A-3 relating to audit committees; (ii) our chief executive officer must promptly notify the NYSE in writing after any executive officer becomes aware of any non-compliance with the applicable NYSE corporate governance rules; (iii) we must provide the NYSE with annual and interim written affirmations as required under the NYSE corporate governance rules; and (iv) we must provide a brief description of any significant differences between our corporate governance practices and those followed by U.S. companies under NYSE listing standards.

In addition, for purposes of the NYSE rules, as VSA beneficially owns a majority of our outstanding common shares, we are a “controlled company.” “Controlled companies” under those rules are companies of which more than 50.0% of the voting power is held by an individual, a group or another company. Accordingly, we are eligible to take advantage of certain exemptions from NYSE governance requirements provided in the NYSE rules. Specifically, as a controlled company under NYSE rules, we are not required to have a majority of independent directors or a compensation, nominating and corporate governance committee composed entirely of independent directors.

As described further above, we recognize that good corporate governance plays an important role in our overall success and in enhancing shareholder value and, accordingly, we have adopted certain corporate governance policies and practices that reflect these considerations. The following table briefly describes the significant differences between our practices and the practices of U.S. domestic issuers under NYSE corporate governance rules.

Section	NYSE corporate governance rule for U.S. domestic issuers	Our approach
303A.01	A listed company must have a majority of independent directors. “Controlled companies” and “foreign private issuers” are not required to comply with this requirement.	We are a controlled company because more than a majority of our voting power for the appointment of directors is controlled by VSA. We are a foreign private issuer because we are incorporated in Luxembourg. As a controlled company and foreign private issuer, we are not required to comply with the majority of independent director requirements. Four of our nine directors are independent. Our Board of directors has adopted internal rules equivalent to a charter. See “Corporate Governance, Management and Employees—Board of directors” for a description of our Board and processes our Board has implemented to promote the exercise of independent judgment.
303A.03	The non-management directors of a listed company must meet at regularly scheduled executive sessions without management.	We have no management directors.

303A.04	A listed company must have a nominating/corporate governance committee composed entirely of independent directors, with a written charter that covers certain minimum specified duties. “Controlled companies” and “foreign private issuers” are not required to comply with this requirement.	As a controlled company and foreign private issuer, we are not required to comply with the nominating/corporate governance committee requirements. However, we do have a compensation, nominating and governance committee composed of one independent director and three non-independent directors, which has adopted a committee charter. As set forth in the committee’s charter, this committee is responsible for, among other matters: · identifying individuals qualified to be nominated as members of the Board of directors; · suggesting names to fill any vacancies on the Board of directors; · developing corporate governance guidelines and principles; and · evaluating the performance and effectiveness of the Board of directors, the CEO and each of committees. See “Corporate Governance, Management and Employees—Board of directors—Committees of our Board of directors.”
303A.05	A listed company must have a compensation committee composed entirely of independent directors, with a written charter that covers certain minimum specified duties. “Controlled companies” and “foreign private issuers” are not required to comply with this requirement.	As a controlled company and foreign private issuer, we are not required to comply with the compensation committee requirements. However, we do have a compensation, nominating and governance committee composed of one independent directors and three non-independent directors, which has adopted a committee charter. As set forth in the committee’s charter, this committee is responsible for, among other matters: · reviewing and proposing new compensation models and changes to current compensation models; and · determining compensation of executive officers, directors and committee members. See “Corporate Governance, Management and Employees—Board of directors—Committees of our Board of directors.”

303A.06 303A.07	A listed company must have an audit committee with a minimum of three independent directors who satisfy the independence requirements of Rule 10A-3 under the Exchange Act, with a written charter that covers certain minimum specified duties.	We have an audit committee composed of three members, all of whom qualify as independent under Rule 10A-3 and applicable NYSE standards. Each member of the Audit Committee also satisfies the financial literacy requirement under applicable standards. The Audit Committee has adopted a committee charter which was duly approved by our Board of directors. As set forth in the committee's charter, the committee shall assist the Board of directors in fulfilling its oversight responsibilities with respect to, among others: · quality and integrity of our financial reporting and related financial disclosures; · the effectiveness of our internal control over financial reporting and disclosure controls and procedures; · our compliance with legal and statutory requirements as they relate to financial statements and related financial disclosures; · our risk management controls and monitoring processes, according to the ERM policy; · the qualifications, performance and independence of our independent auditors and performance of the internal audit function; and · our internal controls and processes to ensure ESG and cybersecurity disclosures and policies are accurate, transparent and in compliance with applicable laws, regulations, or rules. See "Corporate Governance, Management and Employees—Board of directors—Committees of our Board of directors."
303A.08	Shareholders must be given the opportunity to vote on all equity-compensation plans and material revisions thereto, with limited exemptions set forth in the NYSE rules.	Our articles of association require shareholder approval of overall remuneration, including any equity-compensation plans of members of the Board of directors and members of Board committees.
303A.09	A listed company must adopt and disclose corporate governance guidelines that cover certain minimum specified subjects.	We have corporate governance policies in place as described in "Corporate Governance, Management and Employees" in this annual report.
303A.10	A listed company must adopt and disclose a code of business conduct and ethics for directors, officers, and employees, and promptly disclose any waivers of the code for directors or executive officers.	We have adopted a formal Code of Conduct which applies to our directors, officers, employees and third parties who interact with us. Our Code of Conduct has a scope that is similar, but not identical, to that required for a U.S. domestic company under the NYSE rules.

303A.12	(a) Each listed company CEO must certify to the NYSE each year that he or she is not aware of any violation by the company of NYSE corporate governance listing standards. (b) Each listed company CEO must promptly notify the NYSE in writing after any executive officer of the listed company becomes aware of any non-compliance with any applicable provisions of this Section 303A. (c) Each listed company must submit an executed Written Affirmation annually to the NYSE. In addition, each listed company must submit an interim Written Affirmation as and when required by the interim Written Affirmation form specified by the NYSE.	As a foreign private issuer, we are subject to and comply with (b) and (c) of these requirements but are not subject to (a).

BOARD OF DIRECTORS

Our Board of directors is responsible for the general guidance of our business and affairs, including providing general guidance, governance and strategic oversight to our executives and other members of our management team. It is also responsible for ensuring that we meet our objectives, as well as for monitoring our performance and ensuring business continuity. The Board of directors is vested with broad powers to act on our behalf and to perform or authorize all acts of administrative or ancillary nature necessary or useful to accomplish our corporate purpose. All powers not expressly reserved by law to the shareholders fall within the competence of our Board of directors.

Appointment and term of members of our Board of directors

In accordance with our articles of association and the 1915 Law, the members of our Board of directors are elected by a resolution of a general meeting of shareholders adopted with a simple majority of the votes validly cast, regardless of the portion of capital represented at such general meeting. Votes are cast for or against each nominee proposed for election to the Board and cast votes shall not include votes attaching to shares for which the shareholder has not participated in the vote, has abstained or has returned a blank or invalid vote.

Our directors are appointed for two-year terms and may be reelected. Members of our Board of directors may be removed at any time, with or without cause, by a resolution adopted at a general meeting of our shareholders. Under Luxembourg law, in the case of a vacancy of the office of a director appointed by the general meeting of shareholders, the remaining directors may, by a simple majority vote of the directors present or represented, fill the vacancy. In these circumstances, the following general meeting of shareholders shall make the final appointment of the director.

Composition of the Board of directors

Our Board of directors is comprised of a minimum of five and a maximum of eleven members and currently has nine members, of which four are independent directors and five are non-independent, as set out below.

The term of each and all of our directors expires at the 2026 annual general shareholder meeting. The following table sets forth our current directors as of the date of this filing, their respective Board positions and their respective date of election to the Board.

Name	Age	Principal Residence	Position	Elected Since
Jaime Ardila ⁽²⁾⁽³⁾	70	Aventura, USA	Chair of the Board	June 18, 2019
Daniella Dimitrov ^{(1)(2)*}	56	Toronto, Canada	Director	December 14, 2017**

Paulo Ermírio de Moraes Macedo ⁽⁴⁾	37	New York, USA	Director	June 28, 2024

(1) Member of the Audit committee.

(2) Member of the SCP committee.

(3) Member of the CNG committee.

(4) Member of the Finance Committee.

* Independent pursuant to Rule 10A-3 under the Exchange Act (Rule 10A-3) and applicable NYSE standards, as well as National Instrument 52-110 *Audit Committees*.

** The Audit Committee members were elected in December 2017 and the effective date of the mandate starting period was January 2018.

The business address of each member of our Board of directors is our corporate office, which is 37A, Avenue J.F. Kennedy, L-1855, Luxembourg, Grand Duchy of Luxembourg.

We present below a brief biographical description of each member of our Board of directors:

Jaime Ardila. Mr. Ardila has been a member of our Board of directors since June 2019 and has been Chair of the Board since July 30, 2020. Mr. Ardila founded The Hawksbill Group in 2016, which provides business advisory services, including strategy, operations, public relations, communications, and investment advice. Prior to that, he held several positions at General Motors Company in the U.S., Europe, and South America in a career spanning 30 years. He also worked at the Planning Department and the Ministry of Industry and Trade for the government of Colombia from 1981 to 1984 and the investment bank Rothschild from 1996 to 1998. At General Motors, Mr. Ardila served CFO of General Motors Chile; President and Managing Director of General Motors Ecuador; President of General Motors Colombia; President of General Motors Argentina; CFO for Latin America, Africa, and the Middle East; President for Brazil and Mercosur; and President of General Motors South America from 2010-2016. He is currently a member of the board of directors of Accenture and Chairman of Goldman Sachs, BDC. Mr. Ardila earned his master's degree in Economics at the London School of Economics in 1981 and his bachelor's degree in Economics at the University of Bogota in 1977.

Daniella Dimitrov. Ms. Dimitrov has been a member of our Board of directors since January 2018. Ms. Dimitrov has over 25 years of leadership experience in building, leading and operating businesses in mining and financial services, including as CEO, COO and CFO. Ms. Dimitrov served as the CFO of a multi-mine gold producer and her previous roles include also President and CEO, Interim CEO, CFO of multi mine gold/copper producers, partner at a mining investment bank, Executive Vice Chair of an iron ore developer through its acquisition following a hostile takeover bid, COO of a Canadian national wealth management and capital markets firm, and various corporate development roles in mining and financial services. Ms. Dimitrov has also been a director of various companies in the mining, oil, gas and chemicals industries and has served as a member and chair of various board committees, including audit, technical, health and safety, compensation, and governance. Ms. Dimitrov is currently also a director of Chemtrade Logistics Income Fund and Chief Strategy and Risk Officer of Equinox Gold Corp. Ms. Dimitrov has received the NACD Directorship Certification, the ESG Global Competent Boards Designation and the Cyber Risk Oversight Certificate from the CERT Division of the Software Engineering Institute at Carnegie Mellon University. She has a Global EMBA from Kellogg School of Management and Schulich School of Business and a law degree. She was chosen as one of the top 100 Global Inspirational Women in Mining in 2016.

Edward Ruiz. Mr. Ruiz has been a member of our Board of directors since January 2018. Mr. Ruiz brings over 51 years of experience in public and private accounting. Mr. Ruiz currently serves on the audit committees of Iochpe Maxion, and SmartFit, publicly traded companies in Brazil, and he is a former member of the Risk, Audit and Finance Committees of Arezzo & Co. He is a Certified Public Accountant since 1972 and has been responsible for audits of companies in the mining and energy sectors in Brazil and the United States. Mr. Ruiz retired from Deloitte in 2012, and most recently served as an audit partner and member of Deloitte's IFRS Accounting Standards specialist group. As head of the Capital Markets group for Deloitte, Mr. Ruiz advised companies on financial and regulatory reporting matters related to initial public offerings and secondary offerings in the Brazilian, United States and European capital markets. Prior to Deloitte, he held executive positions in internal audit at JP Morgan and PepsiCo in the United States. He started his career in public accounting with Arthur Young in 1971. Mr. Ruiz obtained his bachelor's degree from Pace University, New York City in 1971.

Flavio Aidar. Mr. Aidar has been a member of our Board of directors since October 2024. He brings experience in the industrial, infrastructure, and mining sectors, along with extensive board experience in various countries and financial markets. He is currently Managing Director of Votorantim S.A. and member of the Board of directors of Companhia Brasileira de Alumínio since October 2024. He previously served as CEO of InterCement, a leading global cement company with a presence in Latin America, Europe, and Africa. His previous board roles include Director of CCR S.A., Chairman of Loma Negra, Chairman of InterCement Brasil S.A., and Chairman of Brazil's Cement Industry Associations. Before holding these positions, Mr. Aidar was a Managing Director in the Investment Banking Division of Goldman Sachs and a member of its management committee in Brazil. Mr. Aidar holds a degree in Business Administration from Fundação Getúlio Vargas.

Gianfranco Castagnola. Mr. Castagnola has been a member of our Board of directors since June 2020. Mr. Castagnola is partner and Chairman of the Board of Apoyo Consultoría, a leading firm specialized in economic, business and financial advisory services in Peru. He is also former chairman of the board of directors of its subsidiary, AC Capitaes SAFI, one of the largest Peruvian investment fund managers. He has been a member of the board of directors of the Peruvian Central Bank from 1996 to 2001 and was president of the Universidad del Pacífico board of trustees. He is also chairman of the board of directors of Scotiabank Peru S.A., and member of the board of directors of Saga Falabella, the Austral Group and IKSA. Mr. Castagnola's previous roles include serving as member of the board of directors of Nexa Peru, Nexa Resources Atacocha S.A.A., Lima Airport Partners, Quimica Suiza, Cementos Pacasmayo, Camposol Holding and Redesur. Mr. Castagnola earned his master's degree in public policy from Harvard University and his bachelor's degree in Economics from the Universidad del Pacífico.

Hilmar Rode. Mr. Rode has been a member of our Board of directors since June 2023. Mr. Rode has over 30 years of experience in the global mining, materials, chemicals, and industrial gases industries. He began his career in process development and research engineering before joining Anglo American, where he worked for 12 years in leadership positions in its industrial diamonds, base metals and paper divisions in South Africa, United Kingdom and Austria. He joined Glencore in 2007 as CEO of its zinc division in Bolivia, returning in 2019 to the copper division to work on operational strategy, technical services, projects, and capital management. Between 2015 and 2019, Mr. Rode was president of BHP's Minera Escondida Ltda. in Chile and then Chief Executive Officer of zinc producer Nyrstar. Since September 2020, Mr. Rode joined Sibelco as group CEO. Mr. Rode holds a bachelor's degree in Chemical Engineering from the University of Stellenbosch, South Africa, a Master's in Environmental Engineering and a Doctorate in Chemical Engineering from State University, Buffalo, New York, and a Certificate in the Advanced Management Program from Harvard Business School.

Jane Sadowsky. Ms. Sadowsky has been a member of our Board of directors since January 2018. Ms. Sadowsky has a broad and diverse range of finance and deal-related expertise and also has sector expertise in power and utilities and the related fields of commodities, renewables, power technology, infrastructure, and energy. She has a depth of knowledge and experience in mergers and acquisitions, public and private debt and equity, corporate restructurings, and cross-border transactions. Ms. Sadowsky retired from Evercore Partners, after more than 22 years as an investment banker. Prior to Evercore Partners, she worked in Citigroup's Investment Bank and began her investment-banking career at Donaldson, Lufkin & Jenrette. Currently, Ms. Sadowsky serves on the board, the audit and the compensation committees of Allied Gold, Inc., and chairs Allied Gold's nomination and governance committee. She also serves as a senior advisor at Moelis & Company, a U.S. publicly traded company. Ms. Sadowsky also serves on the board and Remuneration Committee of Scientific Games, a PE-backed company based in the U.S. and the NY Chapter of NACD. Ms. Sadowsky earned her MBA from the Wharton School in 1989 and her bachelor's degree in Political Science and International Relations from the University of Pennsylvania in 1983. Ms. Sadowsky has received the NACD Directorship Certification. She is a National Association of Corporate Directors Governance fellow and a frequent speaker at board governance conferences throughout the United States.

Luís Ermírio de Moraes. Mr. Moraes has been a member of our Board of directors since 2016 and was the Chair of the Board until July 30, 2020. He was a member and the Chairman of the board of directors of Nexa Brazil until 2018. Mr. Moraes has over 35 years of experience working in mining and metallurgical operations. He is a member of the board of directors of VSA, which is the Portfolio Manager Board of the Votorantim Group. Mr. Moraes is Chairman of the board of directors of CBA, the largest integrated aluminum producer in Brazil. He is a board member of Hejoassu, which is the ownership board of Votorantim. Mr. Moraes previous roles include director of VSA since 2000. Mr. Moraes also worked as an engineer in various processes in the areas of alumina refinery, smelter and aluminum smelting, pyrometallurgical and hydrometallurgical mineral processing of nickel laterites, developing novel projects for the separation and refining of cobalt. In the early 2000s, Mr. Moraes was the shareholder responsible for the creation and development of a new Votorantim business area with investments in IT and biotechnology. Mr. Moraes received a bachelor's degree in mineral and chemistry engineering from the Colorado School of Mines, in the state of Colorado, United States, in 1982.

Paulo Ermírio de Moraes Macedo. Mr. Macedo has been a member of our Board of directors since June 2024. He is a co-founder and partner of 4x4 Capital, a New York based private equity firm focused on investing in the consumer, industrial and services sectors. Mr. Macedo led the acquisition of 1440 Foods (the former sports and active nutrition division of The Bountiful Company) from KKR and The Carlyle Group in 2021 and served as its Chief Financial Officer until the sale of the company to Bain Capital Private Equity in 2023. Mr. Macedo currently serves as Board Observer of 1440 Foods and as board member of Hejoassu Administração, the ownership board of Grupo Votorantim. Prior to that, Mr. Macedo served on the Board of Citrosuco from 2020 to 2021. Mr. Macedo started his career as an investment banker at Merrill Lynch International in London, working in several M&A and capital market transactions for large European industrial and mining companies and also worked at CVC Capital Partners in its Private Equity team in Sao Paulo, Brazil. Mr. Macedo earned his MBA from Stanford University and received his M.S. and B.S. in engineering from École Nationale des Ponts et Chaussées and Escola Politécnica-USP, where he was a CAPES Foundation Scholar.

Internal rules of the Board of directors

Our Board of directors adopted Board internal rules, which includes the following, among other things:

- approve the general guidance of our business, its mission, strategic goals, and guidelines;
- ensure that the executive officers comply with such mission, strategic goals, and guidelines;
- approve the budget and a strategic plan which takes into account, among other things, the opportunities, and risks of the business;
- approve the annual commercial agreements strategy;
- recommend the shareholders to approve mergers, spin-offs, incorporations, acquisitions, divestitures, and joint venture operations related to us and our subsidiaries according to our articles of association;
- promote and ensure compliance with our corporate purpose;
- ensure our long-term and sustainable continuity with respect to our ESG and economic goals, including, but not limited to, supporting the Board committees to oversee and revise the implementation of our ESG strategy pursuant to applicable laws, when applicable;
- develop our approach to corporate governance, including the creation and review, from time to time, of corporate governance principles and guidelines that are specifically applicable to us;
- evaluate the performance of our CEO and executive officers;
- exemplify and, together with the Management committee, implement a culture of integrity throughout the organization;
- approve and monitor compliance, directly and/or through its committees, with the following policies: (a) code of conduct; (b) disclosure policy; (c) insider trading policy; (d) dividend policy; (e) compliance policy; (f) antitrust/competition policy; (g) anti-corruption policy; (h) money laundering and terrorist financing prevention policy; (i) financial risk management policy (and complementary policies proposed by the Management committee, such as the hedge, derivatives, leverage, liquidity and foreign exchange exposure policy); (j) ERM policy; (k) clawback policy; and (l) authorization policy;
- approve Board members and executive officers' compensation, the amount of which shall not exceed the amount determined by the general meeting;
- ensure appropriate succession planning for our Board of directors, CEO, and executive officers;
- deliberate and approve the terms and conditions of any compensation arrangements or proposed material amendments to any terms and conditions of existing compensation arrangements entered between us and any of our executive officers;
- with respect to cybersecurity: (a) monitor the Audit Committee and management regarding cybersecurity matters and provide guidance as needed; (b) receive updates and reports on cybersecurity tests, incident response plans, cybersecurity incidents, and our cybersecurity policies; and (c) review with management and with the support of the Audit Committee, our cybersecurity risk management program in connection with the Enterprise Risk Management policy; and
- all further tasks as required by applicable laws.

The Board internal rules are available on our website.

The Board has at its disposal a set of provisions and practices that promotes independence in the decision-making process of the Board. In accordance with the Board's internal rules, the independent members of the Board may hold separate meetings, and each director has a duty to declare, prior to any Board meeting, the existence of a particular reason or conflict of interest with us with respect to a subject matter being discussed or considered by the Board. Accordingly, such Board member would be refrained from discussing and voting on a matter that could present a conflict of interest. Additionally, our Board members are prohibited from holding executive positions with us and/or serving on more than four boards of directors of companies that do not belong to the same conglomerate. As discussed above, our Audit Committee is comprised entirely of independent Directors, and we also have independent representation on all other committees.

Description of the position of Chair

Our Board of directors has developed a written position description for the chair of the Board of directors. The chair of the Board has the following responsibilities, subject to any other matters that may be set forth in our articles of association or provided for under applicable law:

- ensure the efficiency and proper performance of the Board of directors;
- preside over the Board meetings;
- prepare, organize, elaborate and distribute the agenda and minutes of the meetings aided by the Board secretary, including all information necessary to discuss the matters on the agenda;
- coordinate the activities of other Board members;
- ensure that all Board members receive comprehensive information about the items on the Board agenda in a timely manner;
- propose the annual corporate calendar to the Board in coordination with our CEO, which shall necessarily set forth the dates of corporate events;
- organize the onboarding and education sessions for incoming members of the Board in coordination with our CEO; and
- periodically arrange for continuing education opportunities for all Board members, so that individuals may maintain or enhance their skills and abilities as members and ensure that their knowledge and understanding of our business remains current.

The chair of our Board of directors is not an independent director of Nexa Resources. The Board of directors has carefully considered governance issues relating to chair independence and believes that the chair fulfills separate responsibilities diligently and that, with the compensating practices in place, the Board of directors operates effectively and in our best interest.

Meetings of the Board of directors and attendance

The Board of directors ordinarily meets in person or by other means of communication as may be required. The frequency of and agenda items for Board meetings will vary depending on the state of affairs, requirements for approvals and opportunities available to us and the risks and issues which we face. The agenda for meetings places priority and focuses on key issues for us, which are identified by the chair of our Board. Routine business is dealt with after substantive discussions on the key issues.

Under the Board of directors' internal rules and our articles of association, the Board can validly consider any matters and make decisions provided at least a majority of the members are in attendance in person or by representation. The Board of directors' internal rules further provides that each member is entitled to one vote either in person or where duly represented as required by the Board's internal rules. In fiscal year 2025, our Board of directors held ten meetings, in which the rate of attendance in person or by representation was 100%. In addition, we had (i) six Audit Committee meetings, (ii) nine Finance Committee meetings, (iii) four CNG committee meetings, and (iv) five SCP committee meetings.

Director	Board Meetings	Meetings Attended	Overall % Attendance
Jaime Ardila	10	10	100
Daniella Dimitrov	10	10	100
Edward Ruiz	10	10	100
Gianfranco Castagnola	10	10	100
Hilmar Rode	10	10	100
Jane Sadowsky	10	10	100
Flavio Aidar	10	10	100
Luís Ermírio de Moraes	10	10	100
Paulo Ermírio de Moraes Macedo	10	10	100

As set forth in the Board of directors' internal rules, the independent directors may hold meetings in which members of the management team and the non-independent directors are not present. In 2025, our directors held *in camera* sessions without members of the management team prior and/or at the conclusion of each Board meeting.

Committees of our Board of directors

Our Board of directors has an Audit Committee, a Finance Committee, a CNG committee and an SCP committee. Our Board of directors may have other committees as it may determine from time to time. Each of the standing committees of our Board of directors has the composition and responsibilities assigned to them by the meeting of the Board of directors that created such committee and as set forth in their respective committee charters. These charters set out, among other things, the roles and responsibilities of the chair of each committee. As set forth in the respective charters of the committees, each of the committees may meet with or without the management, as the case may be, at the discretion of the committee. The charter for each of the committees of our Board of directors is available on our website.

Audit Committee

Our Audit Committee is a standing committee established by our Board of directors in March 2017, to assist the Board of directors in fulfilling certain of its oversight responsibilities. The Audit Committee may be composed of three to five members, each appointed by our Board of directors for a term of one year. Daniella Dimitrov, Edward Ruiz, and Jane Sadowsky currently serve as its members. These individuals are independent under Rule 10A-3 and applicable NYSE standards, as well as Canadian securities regulators' National Instrument 52-110 *Audit Committees*. In addition, each of them satisfies the financial literacy requirement under applicable rules. Our Board of directors has determined that Mr. Edward Ruiz qualifies as an "audit committee financial expert."

Our Audit Committee's primary responsibilities are to assist the Board of directors' oversight of: (i) quality and integrity of our financial reporting and related financial disclosure; (ii) the effectiveness of our internal control over financial reporting and disclosure controls and procedures; (iii) our compliance with legal and statutory requirements as they relate to financial statements and related financial disclosures; (iv) the monitoring of risk management controls and processes, according to the ERM policy, and the oversight of financial reporting and related compliance, internal control over financial reporting and fraud risks; (v) the compliance and ethics program; (vi) review of all related party transactions; (vii) the qualifications, performance and independence of our independent auditors and performance of the internal audit function; and (viii) our internal controls and processes to ensure ESG and cybersecurity disclosures and policies are accurate, transparent and in compliance with applicable laws, regulations and rules.

We have established policies and procedures that require any engagement of our independent auditor for audit or non-audit services to be submitted to and pre-approved by the Audit Committee. In addition, our Audit Committee may delegate the authority to pre-approve non-audit services to one or more of its members. All non-audit services that are pre-approved pursuant to such delegated authority must be presented to the full Audit Committee at its first scheduled meeting following such pre-approval. Our Audit Committee shall pre-approve all audit and non-audit services to be provided to us by our independent auditor and also has the authority to recommend pre-approval policies and procedures to our Board of directors and for the engagement of our independent auditor's services.

Finance committee

Our Finance Committee is a standing committee established by our Board of directors in March 2017, to assist the Board of directors in fulfilling certain of its oversight responsibilities. The Finance Committee may be composed of three to five members, each appointed by our Board of directors for a term of one year. Gianfranco Castagnola, Paulo Macedo, Flávio Aidar and Edward Ruiz currently serve as its members. It is also the Finance Committee attribution to support the Board in its monitoring of the enterprise risk management in matters related to the responsibility of this committee.

Our Finance Committee's primary responsibilities are to assist the Board of directors in fulfilling its oversight responsibilities with respect to monitoring our balance sheet and by providing recommendations on our capital management strategy and capital structure, including indebtedness, investments, and returns, support the Board in its monitoring of the enterprise risk management in matters related to the responsibilities of the committee, among others.

CNG committee

Our CNG committee is a standing committee established by our Board of directors in March 2017, to assist the Board of directors in fulfilling certain of its oversight responsibilities. The CNG committee may be composed of two to five members, each appointed by our Board of directors for a term of one year. Jaime Ardila, Jane Sadowsky, Luís Ermírio de Moraes, and Flavio Aidar currently serve as its members. One of the four members of the compensation, nominating and governance committee is an independent director.

Our CNG committee is responsible for: (1) new compensation models and changes to compensation models currently used by us, in order to guide and influence our actions; (2) the compensation of the executive officers, of the members of the Board of directors and of the members of the committees of the Board of directors; (3) the administration the policy for the recovery of erroneously awarded compensation with the support of the Audit Committee and/or the Finance Committees where applicable, and the proposal of changes to such policy if necessary; (4) the proposal of candidates to the chair of chief executive officer, when applicable, or any serious restrictions on the candidates proposed by the chief executive officer to the other chairs of the executive officers; (5) development of corporate governance guidelines and principles; (6) the governance structure related to our ESG strategy as it applies to us and our value chain; (7) identification of individuals qualified to be nominated as members of the Board of directors and suggesting nominees to fill any vacancies on the Board of directors; (8) the structure and composition of Board committees; (9) evaluation of the performance and effectiveness of the Board of directors, the chief executive officer and each of the Board's standing committees; (10) the supervision and approval of our social responsibility plans and policies (other than community-related aspects which are overseen by the SCP committee), including, but not limited to, our ESG strategy; (11) the supervision of our people strategy; (12) the monitoring of our relationship with unions; (13) support the Board in its monitoring of the enterprise risk management in matters related to the responsibilities of the committee; and (14) any related matters required by applicable laws. For more information regarding our corporate governance policies, see "Information on the Company—Environmental, Social and Governance (ESG)—Materiality Matrix—Governance."

SCP committee

Our SCP committee is a standing committee established by our Board of directors in April 2019, to assist the Board of directors in fulfilling certain of its oversight responsibilities. The SCP committee may be composed of at least three and no more than five members, each appointed by our Board of directors for a term of one year. Daniella Dimitrov, Hilmar Rode, Jaime Ardila and Luís Ermírio de Moraes currently serve as its members.

Our SCP committee’s primary responsibilities are to assist the Board of directors by supporting safe and sustainable business practices in the conduct of our activities in respect of environmental, health, safety and social matters, including relationships with local communities, tailings management, water, waste, biodiversity, and GHG emissions, as well as with respect to the estimation and disclosure of mineral resources and reserves at all operations and projects (collectively “Sustainability Matters”). The committee also assists the Board with the oversight of our ESG strategy, including its revision and implementation, in connection with the Sustainability Matters and all related applicable laws.

The SCP committee is also responsible for assisting the Board with the review of technical, economic, and social matters with respect to our projects, including exploration, development, permitting, construction, and operation of our mining and smelting assets, which are core to our strategy and growth. For more information regarding our sustainability policies, see “Information on the Company—Environmental, Social and Governance (ESG)—Materiality Matrix—Environmental” and “Information on the Company—Environmental, Social and Governance (ESG)—Materiality Matrix—Social.”

Orientation and continuing education

We implemented an orientation program for new directors under which each new director meets with the chair of our Board of directors and our executives. New directors are provided with comprehensive orientation and education as to our business, operations, and corporate governance (including the role and responsibilities of the Board of directors and each committee).

The chair of our Board of directors is responsible for overseeing directors’ continuing education and ensure that it is designed to maintain or enhance the skills and abilities of our directors and to ensure that their knowledge and understanding of our business remains current. The chair of each committee is responsible for coordinating orientation and continuing director development programs relating to the committee’s mandate.

Our ongoing director education programs entail site visits, presentations from outside experts and consultants, discussions on ongoing governance trends and guidelines for public companies, briefings from staff and management, and reports on issues relating to our projects and operations, sustainability and social matters, competitive factors, reserves, legal issues, economic, accounting and financial disclosure, mineral and hydrocarbon education and other initiatives intended to keep the Board abreast of new developments and challenges that we may face. As part of the education session, certain directors obtained international certifications related to the competencies necessary for their activities, such as National Association of Corporate Directors (“NACD”) Directorship Certification.

Evaluation of directors

Our CNG committee established a framework for the implementation and administration of processes to assess the effectiveness of the Board and each of its members. This includes peer reviews of each director’s performance and self-assessments, as well as full Board and committee review of the Board and the respective committees, by way of questionnaires, interviews, and sessions with the chair. In addition to hiring external advisors to develop and undertake this assessment, the CNG committee is also responsible for overseeing the process and evaluating the results, with the objective of improving the performance of each director and the Board of directors as a whole.

Considerations in evaluating director nominees

Our Board of directors is responsible for nominating members for election to the Board and for filling vacancies on the Board that may occur between annual meetings of shareholders. The process for nominating a new director initiates with our CNG committee, which evaluates our current circumstances and establishes a profile for a director candidate. Such profile is then shared with a specialized external executive search firm, who assists the CNG committee in selecting candidates for interviews. Prior to the interview, the specialized external firm is responsible for a background check with former employers and colleagues of the respective candidates.

Following the interview(s), our CNG committee recommends the nomination of the director candidate to our Board of directors based upon an assessment of the independence, skills, qualifications and experience of such candidate. Specifically, the Board seeks members from diverse professional and personal backgrounds who combine a broad spectrum of experience and expertise with a reputation for integrity.

Plurality

We value plurality in our operations. We believe that having a plural Board of directors can offer a breadth and depth of perspectives that enhance our performance. Recommendations concerning director nominees are based on merit and past performance as well as other factors, as we believe that having a plural and inclusive organization overall is beneficial to our success.

Compensation-setting process

Our CNG committee is responsible for assisting our Board of directors in fulfilling its governance and supervisory responsibilities and advising our Board of directors with respect to evaluation and monitoring of compensation models and policies performed every two years, which takes into account peer companies and the challenges and opportunities we face. The committee's responsibilities also include administering and determining our compensation objectives and programs, reviewing, and making recommendations to our Board of directors concerning the level and type of the compensation payable, evaluating performance, implementing evaluation and improvement processes, and ensuring that policies and processes are consistent with our philosophy and the objectives of our compensation program.

Share ownership

Luís Ermírio de Moraes, a member of our Board of directors, indirectly owns approximately 2,356,402 or approximately 1.79% of our common shares or options on the company's shares. As of December 31, 2025, none of our executive officers own, beneficially or of record, any of our common shares.

EXECUTIVE OFFICERS AND MANAGEMENT COMMITTEE

Executive officers

We have global executives and management teams for our main subsidiaries. Each subsidiary team has a management structure that adheres to our corporate governance rules. Our executives currently are as follows:

Name	Age	Principal Residence	Position
Ignacio Rosado	56	São Paulo, Brazil	President and Chief Executive Officer
José Carlos del Valle	56	Lima, Peru	Senior Vice President of Finance and Group Chief Financial Officer; Chief Executive Officer of Nexa Peru
Mauro Davi Boletta	65	São Paulo, Brazil	Senior Vice President of Smelting Operations and Commercial
Leonardo Nunes Coelho	48	Lima, Peru	Senior Vice President of Mining Operations
Jones Aparecido Belther	58	São Paulo, Brazil	Senior Vice President of Technical Services & Business Development
Carlos Alberto Hilário de Andrade	60	São Paulo, Brazil	Vice President of Human Resources and Corporate Affairs
Renata Penna Moreira Gunzburger	42	São Paulo, Brazil	Vice President of Legal & Governance
Felipe Lana De Almeida	44	São Paulo, Brazil	Projects, Engineering, and Energy Officer
Fernando Demuner da Silva	46	São Paulo, Brazil	Smelting Operations Officer
Neuma Eufrazio Braz Moreira	41	São Paulo, Brazil	Internal Audit, Compliance & Internal Controls Officer

The business address of our executives is Avenida Engenheiro Luís Carlos Berrini, n° 105, 6th floor, São Paulo, State of São Paulo, Brazil.

A brief biographical description of each of our executives is presented below:

Ignacio Rosado. Mr. Rosado has been our Chief Executive Officer since January 2022. He has more than 16 years of experience in the metals and mining industry, and extensive board experience in different countries. Mr. Rosado led the initial public offering of Hochschild Mining Plc, and its acquisition strategy on Canadian Mining Assets. He also led the reorganization and transformation of Volcan Compañía Minera S.A.A. (“Volcan”) which included the construction of two new polymetallic mines and the issuance of bonds for more than US\$1 billion. Prior to joining Nexa Resources, Mr. Rosado was the CEO of Volcan since 2014 and its Deputy CEO since 2010. Prior to Volcan, he served as Director and Chief Financial Officer at Hochschild Mining Plc. since 2005 and as a Senior Project Manager at McKinsey & Company since 2000. During his career, he also served on the board of directors of Lake Shore Gold Corp., Zincore Metals, Cordoba Minerals, and Kaizen Discovery. Mr. Rosado graduated with a degree in Economics in 1992 from Universidad del Pacifico and an MBA from the Ross School of Business, University of Michigan in 2000.

José Carlos del Valle. Mr. del Valle has been our Senior Vice President of Finance and Group Chief Financial Officer since October 2022, and he also serves as Chief Executive Officer of Nexa Peru since November 2022. He has extensive knowledge of the metals and mining industry and more than 25 years of experience in finance and planning. Mr. del Valle joined us after spending nine years as CFO at Compañía Minera Antamina, where he led a successful company-wide transformation program and a US\$1 billion syndicated loan financing initiative, among other key efforts. Before Antamina, he was the CFO of Volcan Compañía Minera and he held various leadership positions at well-known companies, including McKinsey & Company, Standard Chartered Bank, and Wells Fargo Bank, among others. Mr. del Valle holds a Business Administration degree from California State University, as well as an MBA from The Wharton School. He also graduated from the Advanced Management Program at Harvard Business School.

Mauro Davi Boletta. Mr. Boletta has been our Senior Vice President of Smelting Operations and Commercial since 2016. Mr. Boletta has over 30 years of experience with operations. He joined Votorantim Metais S.A. in 1986, having served in several production areas. Between 2010 and 2011, he was responsible for the design review of an aluminum smelter in Trinidad and Tobago. Mr. Boletta graduated with a degree in electrical engineering from the Federal University of Itajubá, UNIFEI in 1985 and holds an MBA from FGV.

Leonardo Nunes Coelho. Mr. Coelho has been our Senior Vice President of Mining Operations since 2017. Mr. Coelho has over 20 years of experience managing mining operations with focus at gold and zinc. Prior to joining us, Mr. Coelho worked for Anglo Gold Ashanti Ltd. for 15 years, where he initiated his career as a Trainee. In Anglo Gold Ashanti Ltd., Mr. Coelho has led mining operations and the expansion of mining projects and served as General Manager of the Cuiabá and Lamego complexes as his last position at this company. Mr. Coelho graduated with a degree in Mine Engineering in 2001 from the Federal University of the State of Minas Gerais ("UFMG") and has obtained graduate degrees from the Kellogg Graduate School of Management in 2015 in the United States, the Dom Cabral Foundation in 2009 in Brazil and the University of Cape Town in 2005 in South Africa as well as a qualification at INSEAD in digital transformation in 2018 and MIT in 2019.

Jones Aparecido Belther. Mr. Belther has been our Senior Vice President of Technical Services & Business Development since October 2024. Prior to this role, he served as Senior Vice President of Mineral Exploration & Business Development since 2014. He has over 28 years of experience in the area. He held the same position at Votorantim Metais S.A. between 2004 and 2014. Prior to joining us, he was country manager at Vale in Peru between 2002 and 2004. He has worked in Brazil and abroad in companies such as Rio Tinto Brasil, Golden Star Resources, in Suriname, Phelps Dodge in Brazil and Chile, Vale in Brazil and Peru, and other companies. Mr. Belther graduated with a degree in Geology in 1991 from the São Paulo State University, UNESP, in Brazil, where he also obtained a Master's degree in 2000 in Mineral Exploration.

Carlos Alberto Hilário de Andrade. Mr. Hilario became our Vice President of Human Resources and Corporate Affairs in April 2025. With over 25 years of experience in people management, he has built his career in leadership roles at major companies in the mining, steel, and forestry sectors, with an international track record across multiple countries, including Brazil, the United States, Argentina, and Trinidad and Tobago. Prior to joining, he served as Executive Director of Human Resources at Anglo American and held several senior leadership positions at ArcelorMittal. Throughout his career, he has led initiatives focused on cultural transformation, leadership development, labor relations, health, safety, and the environment, in addition to experience in social management and institutional relations. He holds degrees in Psychology and Business Administration, a PhD in Business Administration from Pontificia Universidad Católica Argentina, and a Master's in Business Administration from Fundação Getulio Vargas (FGV).

Renata Penna Moreira Gunzburger. Ms. Penna has been our Vice President of Legal & Governance since April 2023. Ms. Penna joined us as Chief Legal Counsel and Head of Governance in 2017. With more than 20 years of experience, Ms. Penna has focused on M&A, project finance and capital market transactions and she served as counsel and project manager on our initial public offering in October 2017. As of 2024, she also serves as a member of the board of directors of FUNSEJEM and as of May 2025 she serves as a member of the board of directors of Instituto Votorantim. Prior to Nexa, she led LATAM, M&A and Finance divisions within the Legal Department of Votorantim Cimentos for six years, as well as worked for law firms such as Linklaters, Lobo & de Rizzo and Barbosa Mussnich & Aragão Advogados. Ms. Penna has a Bachelor from Pontificia Universidade Católica de São Paulo and a Master of Law Degree (LL.M.) from the University of Chicago Law School, an Executive MBA from Instituto de Ensino e Pesquisa ("INSPER"), completed an Executive Education Program on Women on Board from Harvard Business School and a qualification at INSEAD in Transition to General Management.

Felipe Lana De Almeida. Mr. Almeida has been with Nexa since 2017 and was recently appointed as Projects, Engineering, and Energy Officer. He brings over 20 years of experience in the Automotive, Steel, and Mining Industries. Throughout his career, Mr. Almeida has held various roles focused on Engineering Development, Construction, Capital Projects, Portfolio Management, and Project Management Office. He has worked for well-known companies such as Fiat Powertrain Technologies, ArcelorMittal Long Carbon Americas, Anglo American Nickel, Niobium and Phosphates, and CMOC, where he had the opportunity to collaborate with different cultures and contribute to important strategic business growth initiatives. Mr. Almeida holds a degree in Mechatronic Engineer from PUC Minas and a postgraduate degree in Project Management from IBMEC Business School.

Fernando Demuner da Silva. Mr. Demuner has been our Smelting Operations Officer since January 2025, bringing over 22 years of experience in zinc smelting operations. He joined Nexa (formerly Votorantim Metais S.A.) in 2003, holding various leadership roles in operations and corporate areas in Brazil and Peru. Prior to his current position, he served as the General Manager of the Cajamarquilla Smelter and as Corporate General Manager of Smelting Operations and Development. He graduated in Metallurgical Engineering from the Federal University of Ouro Preto ("UFOP") in 2002. Additionally, he holds multiple qualifications, including an MBA from Fundação Getúlio Vargas ("FGV"), a Leadership Course from Harvard University, an Executive Development Program at Fundação Don Cabral ("FDC") and Kellogg School of Management. He also completed international specializations in Corporate Finance from ESAN Graduate School of Business and Mining Business Management from Universidad del Pacifico, both in Peru.

Neuma Eufrazio Braz Moreira. Ms. Moreira has been a member of our Leadership Team since October 2023. She brings over 20 years of leadership experience in building and managing Corporate Governance, Internal Controls, Risks and Internal Audit, Crisis Management and Compliance functions. Neuma has extensive experience in the mining industry, collaborating with companies involved in Iron Ore, Nickel, Phosphates, Niobium, and Copper. She has also worked across various cultures and regions, including Europe, South Africa, Chile, Peru, Australia, and the United States, with experience at the Board level. Before joining Nexa, Neuma led Anglo American Brazil's Governance, Internal Controls, Risks & Crisis Management, and Compliance division for 10 years, reporting directly to the CEO. From April 2022 to October 2023, she served as board member of the Fiscal Council for Fundambras, representing Anglo American. She has also held key roles at Ferrous Resources and Fir Capital / DJF Fund and has been a graduate and postgraduate professor at the Anima Group, teaching subjects such as calculation, statistics, internal audit, and corporate governance. Neuma holds a Bachelor's degree in IT and Business from PUC Minas and SEBRAE, a postgraduate degree in Business and Finance from IBMEC Business School, and a postgraduation in Data Privacy from Fundação Dom Cabral. She is certified as Leader Auditor in Antibribery System by RINA, a certified Board Director and Governance Officer by the Brazilian Institute of Corporate Governance and earned a Master's degree in Math and Computer Modelling from the Federal Centre of Technological Education of Minas Gerais in December 2013. She is also currently pursuing a Master's in Compliance from IMF Business School. In 2020, Neuma was recognized as one of the Top 100 Global Inspirational Women in Mining by Women in Mining UK.

Evaluation of executive officers

On an annual basis, the performance of our executive officers is evaluated by the chief executive officer, the CNG committee and ultimately, the Board of directors. We strive to create a strong ethical and high-performance culture, as well work to ensure an appropriate succession plan that ensures the continuity of our business. In addition to future business needs, we consider the core skills, experience, and personal attributes necessary to conduct our strategy.

Each year, our chief executive officer presents to the Board of directors a report on potential successors to his position, which considers the ability of succession candidates to succeed the chief executive officer in an emergency, on an interim or permanent basis, as well as critical experiences and other attributes required in order for each candidate to enhance his or her readiness for succession. Our Board of directors discusses potential successors with the chief executive officers, as well as potential successors to each member of the management team.

Management committee

In accordance with our articles of association, the Board of directors may delegate its powers to conduct our management and affairs, as well as its representation of us with respect to such matters, to a Management committee. The Management committee consists of at least three, and a maximum of eleven, members. The members are not required to be our shareholders or directors. The Board of directors may not delegate its powers related to general guidance of our business or acts reserved to the Board of directors pursuant to the 1915 Law.

The following table sets forth the current members of our Management committee, and their respective positions. The term of the members of our Management committee expires on the day of the first Board meeting held after the 2026 general shareholders' meeting.

Name	Age	Principal Residence	Position
Ignacio Rosado	56	São Paulo, Brazil	President and Chief Executive Officer
José Carlos del Valle	56	Lima, Peru	Senior Vice President of Finance and Group Chief Financial Officer
Mauro Davi Boletta	65	São Paulo, Brazil	Senior Vice President of Smelting Operations and Commercial
Leonardo Nunes Coelho	48	Lima, Peru	Senior Vice President of Mining Operations
Jones Aparecido Belther	58	São Paulo, Brazil	Senior Vice President of Technical Services & Business Development

Conduct Committee

Our Conduct committee reports to the Chief Executive Officer and was created on January 1, 2014. Its internal rules were revised and updated on December 2, 2019.

The Conduct committee may be composed of at least seven members, such members being necessarily the Chief Executive Officer, the Vice President of Human Resources and Corporate Affairs, the Vice President of Legal & Governance, the Head of Internal Audit, Compliance and Internal Controls, the Ethics Line Manager and two representatives of the Ethics Line program, a confidential reporting system managed by a qualified and independent external entity available to internal and external parties designed to allow anonymous reporting of violations of our Code of Conduct, policies and internal procedures or applicable laws.

Our Conduct committee's primary responsibilities are to assist the Management committee in enforcing the Code of Conduct, reviewing any claims raised through the Ethics Line program, and identifying claims that should be rated as critical. The Conduct committee also assists our Audit Committee by ensuring that any claim filed through the Ethics Line program and rated as critical is properly elevated to the Audit Committee for further review.

Family relationships among executives

Our executives do not have any family relationships among themselves or with any other of our employees.

EXECUTIVE AND DIRECTOR COMPENSATION

The following discussion describes the significant elements of the compensation of our executive officers and directors for the year ending December 31, 2025.

In 2025 our executive compensation program includes cash compensation in the form of base salary, short-term incentives, and long-term incentives. We provide base salary to compensate executives for their day-to-day responsibilities, which is aligned to a market reference based on industry analysis. We evaluate our total compensation practices on an annual basis to ensure that our compensation remains competitive in light of market and industry trends.

Our CNG committee is responsible for assisting our Board of directors in fulfilling its governance and supervisory responsibilities and advising our Board of directors with respect to evaluation and monitoring of compensation models and policies and other related matters. The committee's responsibilities also include administering and determining our compensation objectives and programs, reviewing, and making recommendations to our Board of directors concerning the level and type of the compensation payable, evaluating performance, implementing evaluation and improvement processes, and ensuring that policies and processes are consistent with our philosophy and the objectives of our compensation program.

Compensation framework

Our compensation is comprised of three principal components: (i) base salary, (ii) short-term incentive and (iii) long-term incentive.

Base salary

Base salaries for executive officers are established based on the scope of their responsibilities and competencies and taking into consideration the median market reference. Adjustments to base salaries are expected to be determined annually and may be increased based on performance, as well as to maintain market competitiveness. Additionally, base salaries may be adjusted as warranted throughout the year to reflect promotions or other changes in the scope or breadth of roles or responsibilities.

Short-term incentive program / bonuses

The annual bonus or short-term incentive program aims to align short-term priorities with our strategic planning by rewarding achievement of our goals and targeted annual results, resulting in an alignment with our interests. Each named executive officer has a panel of individual goals, with scales of minimum performance, target and surpass results. Measurement in these panels is based on financial and non-financial indicators. These indicators represent the specific goals and challenges attributable to the position in alignment with our performance and strategic planning.

Long-term incentive program

Our long-term incentive ("LTI") program is designed to provide strong incentives for making decisions with a view to creating value for shareholders by linking cash compensation to our long-term performance, and by guiding executive actions towards the achievement of our strategic goals and growth plans.

The LTI program aligns interests among our executives and shareholders to ensure continued value creation. This incentive system is also intended to engage management in developing and delivering a consistent strategic plan, as well to attract and retain executive officers.

Our LTI program is based on a three to five-year vesting period and is comprised of two parts providing for cash payments based on specific performance conditions: (i) restricted grant and (ii) absolute performance grant. Both grants are defined amounts approved by the Board of directors to be paid out at the end of the third, fourth and fifth year, considering one third of the total payment to be made on each of the three payments. The restricted grant amount provides for certain payments variable according to the total shareholder return ("TSR") over each payment period, a performance metric that reflects the return to our shareholders (based on share prices and dividend payments in the period). For more details about our dividend payments, see "Liquidity and Capital Resources—Distributions." The payment of the absolute performance grant is based on a targeted Company TSR combined with a performance curve, over each payment period, both approved by our Board of directors at each granting period. The performance curve determines the amount to be paid in case of a performance equal or lower than expected in the targeted TSR. If the targeted TSR is achieved, the payment is fully due. If the performance of the TSR is greater than expected, the supplementary grant to be paid will be adjusted by up to 100%. At the end of the five-year vesting period, the amount paid on the previous two payments will be adjusted with the fifth year TSR result. The plan contains specific rules in case of change of control, which may be adjusted by the CNG Committee and/or Board in special cases.

Insider trading policies

Our insider trading policy prohibits directors, officers, and employees from improper trading in our securities, including shares, convertible securities, debt instruments, options, warrants, and derivative securities, whether issued by us or not. The policy also prohibits purchasing financial instruments designed to hedge or offset a decrease in market value of our securities, such as prepaid variable forward contracts, equity swaps, or collars. The policy applies to all securities owned directly or indirectly by directors, officers, and employees, or over which they exercise control. Our policy is made available to directors, officers and employees and applies even after termination of employment or service. Violations may result in disciplinary action, including termination.

2025 executive compensation

During the fiscal year of 2025, our executive officers received cash compensation in an aggregate amount of approximately US\$6.6 million which includes compensation paid to any officers whose terms ended on the first business day of 2025. The following table summarizes compensation we paid to our executive officers during the fiscal year of 2025, including base salary, short-term incentive programs or bonuses, long-term incentive programs and pension value, in addition to severance payments.

	Compensation for the year ended December 31, 2025 (US\$)
Annual fixed compensation	2,261,291.00
In-kind benefits and pension plans	82,454.00
Variable compensation	3,874,572.00
Total amount recognized to active executive officers	6,218,216.00
Severance	401,234.83
Total amount recognized to active and former executive officers	6,616,450.82

For the year ended on December 31, 2025, the highest individual compensation paid to a member of our management team was composed as set forth in the table below.

	Compensation for the year ended December 31, 2025 (US\$)
Annual fixed compensation	628,390.00
In-kind benefits and pension plans	33,568
Variable compensation	1,107,177.00
Highest total amount recognized in 2025	1,769,136.00

2025 director compensation

During the fiscal year ended on December 31, 2025, our directors received total compensation in an aggregate amount of approximately US\$2.3 million for their services as members of our Board of directors. In 2025, the average base compensation for each Director was US\$235,000 which remains as the current base compensation. In addition, each director is entitled to reimbursement for reasonable travel and other expenses incurred in connection with attending Board meetings and meetings for any committee on which he or she serves.

We have no service contracts with members of our Board of directors providing for benefits upon termination of employment.

Retirement benefit plans

All executive officers participate in FUNSEJEM, a private pension fund for Votorantim group employees. The plan is a defined contribution plan, voluntary and supplemental to Brazil's mandatory social security system. The plan's assets correspond to 100% of liabilities, with annual actuarial assessments. We match participant contributions between 1.5% and 6.0% monthly, depending on the participant's chosen contribution percentage.

Recovery analysis of incentive-based compensation

Our employee incentive compensation recovery policy (the “Clawback Policy”) provides that if we are required to prepare an accounting restatement, our Compensation, Nominating and Governance Committee must determine whether there has been any erroneously awarded compensation for each of our executive officers in connection with such accounting restatement. The Clawback Policy is incorporated by reference as Exhibit 97.1 to this report.

No excess incentive compensation was received by executive officers in 2025.

EMPLOYEES

As of December 31, 2025, we had 5,615 employees and 9,983 independent contractors. The following tables show the number of employees and contractors as of December 31, 2025, 2024 and 2023.

Number of Employees			
	As of December 31,		
	2025	2024	2023
Brazil	3,532	3,247	3,658
Peru	2,065	1,989	2,095
United States and Luxembourg	15	17	18
Total	5,612	5,253	5,771

Number of Independent Contractors ⁽¹⁾⁽²⁾			
	As of December 31,		
	2025	2024	2023
Brazil	3,224	2,497	3,035
Peru	6,759	6,665	6,963
Total	9,983	9,162	9,998

(1) Refers to fixed-term contracts only.

(2) Independent contractors were reclassified based on the length of their contracts. Fixed contractors are considered as those with contract terms longer than six months and access to operational or corporate unit for more than 12 days per month.

Of our total employees as of December 31, 2025, approximately 45.5% were engaged in mining operations, 25.4% in smelting operations, and 29.0% in corporate and administrative functions. Women held 25.5% of leadership positions (coordinator level and above) as of December 31, 2025, an increase compared to 23.7% as of December 31, 2024. We have set a target of achieving 30% female representation in leadership by 2030.

The increase in independent contractors in 2025 reflects operational requirements. In both Peru and Brazil, the increase in independent contractors was primarily driven by higher mining development needs mainly at Cerro Lindo, Cerro Pasco, and Aripuanã, which required additional specialized contractor support. In 2025 we reclassified independent contractors based on contract duration (longer than six months) and frequency of site access (more than 12 days per month), with figures presented from prior periods adjusted to ensure comparability.

Most of our employees are represented by labor unions. On June 26, 2025, operations at the Cajamarquilla smelter were partially and temporarily suspended, as operator employees, represented by their labor union, initiated a strike on June 25, 2025. On June 30, 2025, operations at the Cajamarquilla smelter fully resumed at normal capacity utilization levels, following the successful conclusion of negotiations. The temporary suspension lasted three days. We negotiate collective bargaining agreements, relative to salaries, working conditions and welfare, with the various unions that represent our employees. Although we believe our present labor relations are good, there can be no assurance that further work slowdowns, stoppages or strikes will not occur prior to or upon the expiration of the current collective bargaining agreements, and we are unable to estimate the effect of any such work slowdowns, stoppages or strikes on our production levels, in spite of an established contingency plan.

We invest in employee development programs designed to maintain and strengthen the technical capabilities and operational competitiveness of our workforce. In 2025, we delivered 203,744 total training hours across the organization, or approximately 32.8 hours per employee, compared to 175,086 hours and 31.2 hours per employee in 2024. Our programs include technical and operative training, a mentoring program, a leadership development program, young professional training, and individualized development plans. In 2025, 89.5% of eligible employees completed our annual performance and career development review. In addition, we participate in the Academy of Excellence, a leadership development program administered by Votorantim.

In 2025, 1,148 new employees joined Nexa and 720 employees departed, resulting in a voluntary turnover rate of 5.4% and a total turnover rate of 17.0%, compared to a total turnover rate of approximately 18.6% in 2024. In our mining operations specifically, where retention of experienced technical personnel is critical to safe and efficient production, the voluntary turnover rate was 6.1% in 2025. We continue to invest in competitive compensation structures, including fixed and variable pay components and long-term incentive programs, to support talent retention across our operations.

V. ADDITIONAL INFORMATION

LEGAL PROCEEDINGS

As of December 31, 2025, we were party to various legal and administrative proceedings relating to labor, civil, environmental and tax matters in which the disputed amount for probable and possible claims was an aggregate of US\$711.1 million. It is our policy to make provisions for legal contingencies when, based upon our judgment and the advice of our legal counsel, the risk of loss is probable. As of December 31, 2025, we had established a net provision in the amount of US\$148.7 million to cover contingencies for proceedings for which the risk of loss was deemed probable.

The following tables summarize judicial and administrative proceedings to which we are a party, the amounts in dispute in these proceedings in which a loss is considered probable or possible and the aggregate amount of the net provision established for losses that may arise from these proceedings.

	As of December 31, 2025	
	Total Proceedings ⁽¹⁾	Total Net Provisions ⁽²⁾
	(in millions of US\$)	
Civil and environmental ⁽³⁾	160.9	22.5
Tax	493.8	101.1
Labor	56.3	25.1
Total	711.1	148.7

(1) Does not include claims with expectation of loss classified as remote.

(2) Only includes claims with expectation of loss classified as probable, net of judicial deposits.

(3) Includes environmental legal and administrative proceedings.

Civil and environmental liabilities and contingencies

As of December 31, 2025, we were party to civil judicial proceedings and environmental administrative proceedings, with a probable or possible chance of loss in the aggregate amount of US\$160.9 million, for which we have recorded a net provision in the amount of US\$22.5 million for proceedings with probable losses. The civil and environmental judicial claims filed against us primarily relate to pollution and collection lawsuits, repossession actions and indemnity actions related to contract disputes.

Tax liabilities and contingencies

As of December 31, 2025, we were party to tax related judicial proceedings, with a probable or possible chance of loss in the aggregate amount of US\$493.8 million, for which we have recorded a net provision in the amount of US\$101.1 million for proceedings with probable losses.

The tax-related judicial and administrative claims filed against us primarily relate to (i) value added tax on Sales and Services ("VAT"), (ii) corporate income tax and social contribution on net profit ("CIT"), (iii) Brazilian mining royalty ("CFEM"), (iv) Social Contributions ("PIS" and "COFINS").

Labor liabilities and contingencies

As of December 31, 2025, we were party to labor judicial proceedings related to employment benefits, with a probable or possible chance of loss of a total amount of US\$56.3 million, for which we have recorded a net provision in the amount of US\$25.1 million for proceedings with probable losses. The judicial and administrative claims related to labor benefits that were filed against us are mainly related to (i) overtime payments, (ii) compensation for illness-related damages, and (iii) payment of social benefits.

Other legal proceedings***VAT investigation***

Throughout 2023 and 2024, we cooperated with an investigation by the Fiscal Office of the State of Minas Gerais and the Public Ministry of Minas Gerais (the “MG Authorities”) regarding VAT-related practices of certain former customers and our relationship with them. In the third quarter of 2023 and in February 2024, we entered into resolutions with the MG Authorities, without admitting primary responsibility, agreeing to make tax payments on behalf of certain customers and, in one instance, an additional ESG-related contribution. We recognized total liabilities of US\$105.9 million, recorded primarily as other income and expenses and financial expenses. The amounts will be funded through a combination of VAT credit offsets, limited upfront cash payments, judicial deposit offsets and installment payments adjusted by the Brazilian federal funds rate. These resolutions conclude the investigation as it relates to us and we do not expect further developments or provisions, but we reserve our right to seek recovery from certain customers for amounts paid on their behalf, to be recognized only upon recovery.

Cerro Lindo stability agreement

To promote investments in Peru, investors and Peruvian companies can enter into an agreement with the Peruvian government, known as a Legal Stability Agreement, which provides a stable legal and tax regime for a specified period. In March 2002, Nexa Peru entered into a guarantee and investment protection contract, referred to as the stability agreement. Pursuant to this stability agreement, Nexa Peru applied a special income tax rate of 20.0% from 2007 through 2021. We are engaged in ongoing tax-related discussions with the Peruvian tax authorities SUNAT related to the stability agreement of Cerro Lindo’s operations. The Peruvian tax authority issued revised the tax audits for the years-ended December 31, 2014, 2015, 2016 and 2017, arguing that the stability income tax rate (20%) granted by the stability agreement applies only to the income generated from 5,000 tons per day of its production (i.e., income exclusively related to the investments informed in the Cerro Lindo Feasibility Study), and not from Cerro Lindo’s entire production capacity expanded over time. The total amount estimated for the contingency from 2014 to 2017 is US\$213.3 million.

In October 2025, the tax court issued unfavorable decisions for the 2014 and 2015 years, and in December 2025, we initiated judicial proceedings seeking partial annulment of these tax court decisions with respect to SUNAT’s disregard of the 20% stabilized tax regime applicable to the Cerro Lindo Project.

In January 2026, we were notified of the tax court resolutions regarding the 2016 and 2017 years, in which the tax court declared the SUNAT’s tax stability assessment null, considering that SUNAT did not adequately assess the documentation submitted by Nexa during the administrative process and that it failed to define a clear criterion for the segregation of results. Consequently, the TC recognized that SUNAT should not have applied the 29.5% non-stabilized tax rate to our total results and ordered the cases to return to the audit stage.

In the fourth quarter of 2024, SUNAT completed its audit of the 2018 tax period, recognizing that a portion of our income was subject to the tax stability regime. In January 2025, we paid US\$18.3 million to obtain a 60% reduction in penalties and interests.

In the fourth quarter of 2025, SUNAT also concluded its audit of the 2019 tax period, applying the same criteria used in the 2018 audit. In January 2026, we paid US\$12.2 million to obtain 60% reduction in penalties and interest.

For both payments related to the 2018 and 2019 tax periods, we maintain our legal position and do not consider such payments as an acknowledgement of liability and will continue pursuing its legal defense before the competent authorities. SUNAT is currently auditing the 2020 and 2021 tax years, which are the last fiscal years covered by the stability agreement.

Cajamarquilla Transfer Pricing litigation

We are engaged in transfer pricing discussions in Peru, relating to the discount and premium applied by Nexa CJM in the export of refined zinc to its related parties, Votorantim and Nexa Resources. In December 2024, Cajamarquilla received a new tax assessment related to the fiscal year 2018 (“CJM 2018”) in the amount of US\$31.2 million. In the same month, SUNAT released a decision for Nexa CJM’s transfer pricing practices related to fiscal year 2017 (“CJM 2017”), denying defenses we filed and maintaining its previous position. In January 2025, Nexa CJM paid the corresponding tax amounts and obtained a reduction of 60% for fines related to CJM 2018, US\$18.3 million, and 40% for fines related to CJM 2017, US\$24.0 million. These payments do not represent a recognition of the tax debt and Nexa CJM will continue to proceed with its defenses where applicable.

ARTICLES OF ASSOCIATION

Company objectives and purposes

We were incorporated in Luxembourg as a public limited liability company (*société anonyme*) on February 26, 2014. Our articles of association provide that our corporate purpose is to, among others, (i) carry out any trade, business or commercial activities whatsoever, including but not limited to the purchase, exchange and sale of goods and/or services to third parties; (ii) take participations and interests, in any form whatsoever, in any commercial, industrial, financial or other, Luxembourg or foreign companies or enterprises; (iii) acquire through participations, contributions, underwriting, purchases or options, negotiation or in any other way any securities, rights, patents and licenses and other property, rights and interest in property as we shall deem fit; (iv) generally to hold, manage, develop, sell or dispose of the same, in whole or in part, for such consideration as Nexa Resources may deem fit, and in particular for shares or securities of any company purchasing the same; (v) enter into, assist or participate in financial, commercial and other transactions; (vi) grant to any holding company, subsidiary or sister company, or any other company that belongs to the same group as Nexa Resources, any assistance, loans, advances or guarantees (in the latter case, even in favor of a third-party lender of any affiliates); (vii) borrow and raise money in any manner and to secure the repayment of any money borrowed; and (viii) generally to do all such other things as may appear to Nexa Resources to be incidental or conducive to the attainment of the above objects or any of them. We can perform all commercial, technical, and financial operations, connected directly or indirectly in all areas as described above, in order to facilitate the accomplishment of its purpose, provided always that Nexa Resources will not enter into any transaction that would constitute a regulated activity of the financial sector without due authorization under Luxembourg law.

Our common shares are governed by Luxembourg law and our articles of association. Our articles of association were amended in May 2025. The following is a summary of the material terms of our common shares based on our articles of association and Luxembourg law. These rights may differ from those typically provided to shareholders of U.S. companies under the corporation laws of some states of the United States. We encourage you to read the complete form of our articles of association, filed as Exhibit 1 of this annual report on Form 20-F.

Common shares

As of December 31, 2025, our issued share capital was US\$132,438,611 represented by 132,438,611 common shares fully paid, with par value of US\$1.00 per share. In addition to our issued share capital, we have an authorized share capital of US\$231,924,819, represented by 231,924,819 common shares.

Distributions

Pursuant to our articles of association, the general meeting of shareholders may approve dividends, and the Board of directors may declare interim dividends, in each case to the extent permitted by Luxembourg law. Pursuant to our articles of association, the Board of directors may also declare distributions to our shareholders in the form of reimbursement of share premium to the extent permitted by Luxembourg law. Each common share entitles the holder to participate equally in any distributions, if and when declared by the general meeting of shareholders or, in the case of interim dividends or reimbursements of share premium, the Board of directors, out of funds legally available for such purposes.

Declared and unpaid distributions held by us for the account of the shareholders shall not bear interest. Under Luxembourg law, claims for unpaid distributions will lapse in our favor five years after the date such distribution has been declared.

For additional information regarding our policy on distributions, including procedures provided by Luxembourg law, see “Share Ownership and Trading—Distributions.”

Voting rights

There are no restrictions on the rights of Luxembourg or non-Luxembourg residents to vote our shares. All our shareholders, including our public shareholders, hold common shares with identical voting rights, preferences, and privileges. Each common share entitles the shareholder to attend a general meeting of shareholders in person or by proxy, to address the general meeting of shareholders and to vote. Each common share entitles the holder to one vote at the general meeting of shareholders.

The Board of directors may also decide to allow shareholders to vote by correspondence by means of a proxy form providing for a positive or negative vote or an abstention on each agenda item. The conditions for voting by correspondence are set out in the articles of association and in the convening notice.

The Board of directors may decide to arrange for shareholders to be able to participate in the general meeting by conference call, video conference or similar means of communication, whereby (i) the shareholders attending the meeting can be identified, (ii) all persons participating in the meeting can hear and speak to each other, (iii) the transmission of the meeting is performed on an ongoing basis and (iv) the shareholders can properly deliberate without the need for them to appoint a proxyholder who would be physically present at the meeting.

General meeting of shareholders

In accordance with Luxembourg law and our articles of association, any regularly constituted general meeting of our shareholders has the power to order, conduct or ratify acts relating to our operations to the extent that such decisions are the domain of the shareholders and not the Board of directors.

Our annual general meeting of shareholders shall be held at our registered office, or at such other place in Luxembourg as may be specified in the notice of the meeting, within six months after the end of the relevant financial year. Except as otherwise specified in our articles of association, resolutions at a general meeting of shareholders are adopted by a simple majority of shares present or represented and voting at such meeting.

A shareholder entitled to vote may act at any general meeting of shareholders by appointing another person (who need not be a shareholder) as his proxy, which proxy shall be in writing and comply with such requirements as determined by our Board with respect to the attendance at the general meeting, and proxy forms in order to enable shareholders to exercise their right to vote. All proxies must be received by us (or our agents) no later than the day determined by our Board of directors.

Issuance of shares and preferential subscription rights

Our shares may be issued pursuant to a resolution of the general meeting of shareholders. The general meeting of shareholders may also delegate the authority to issue shares to the Board of directors for a renewable period of five years. The Board of directors has been authorized to issue up to 231,924,819 common shares. Such authorization will expire five years after the date publication in the Luxembourg legal gazette (*Recueil Electronique des Sociétés et Associations*) of the minutes of the of the general meeting of shareholders held on May 8, 2025 (unless amended or extended by the general meeting of shareholders).

Each holder of shares has preferential subscription rights to subscribe for any issue of shares pro rata to the aggregate amount of such holder's existing holding of the shares. Each shareholder shall, however, have no preferential subscription right on shares issued for a contribution in kind.

Preferential subscription rights may be restricted or excluded by a resolution of the general meeting of shareholders, or by the Board of directors if the shareholders delegate. The general meeting of shareholders has delegated to the Board of directors the power to cancel or limit the preferential subscription rights of the shareholders when issuing new shares, so long as the issuance of new shares is conducted through a public offering.

If we decide to issue new shares in the future and do not exclude the preferential subscription rights of existing shareholders, we will publish the decision by placing an announcement in the Luxembourg official journal *Recueil Electronique des Sociétés et Associations* and in a newspaper published in Luxembourg. The announcement will specify the period in which the preferential subscription rights may be exercised. Such period may not be shorter than 14 days after the publication of the offer. The announcement will also specify details regarding the procedure for exercise of the preferential subscription rights. Under Luxembourg law preferential subscription rights are transferable and tradable property rights.

Repurchase of shares

Nexa Resources is prohibited by the 1915 Law from subscribing for its own shares. Nexa Resources may, however, repurchase its own shares or have another person repurchase shares on its behalf, subject to certain conditions, including:

- prior authorization of the general meeting of shareholders setting out the terms and conditions of the proposed repurchase, including the maximum number of shares to be repurchased, the duration of the period for which the authorization is given (which may not exceed five years) and the minimum and maximum consideration per share;
- the repurchase may not reduce the net assets of Nexa Resources on a non-consolidated basis to a level below the aggregate of the issued share capital and the reserves that Nexa Resources must maintain pursuant to the 1915 Law or our articles of association;
- only fully paid-up shares may be repurchased; and
- the acquisition offer is made on the same terms and conditions to all the shareholders who are in the same position; however, listed companies may repurchase their own shares on the stock exchange without making an acquisition offer to the shareholders.

As of December 31, 2025, there were no authorized share buyback programs. For more information, see “Share Ownership and Trading—Purchases of equity securities by the issuer and affiliated purchasers.”

Form and transfer of shares

Our shares are issued in registered form only and are freely transferable. Luxembourg law does not impose any limitations on the rights of Luxembourg or non-Luxembourg residents to hold or vote our shares.

Under Luxembourg law, the ownership of registered shares is generally evidenced by the inscription of the name of the shareholder, the number of shares held by him or her in the shareholders’ register, which is maintained at our registered office. Each transfer of shares is made by a written declaration of transfer recorded in our shareholders’ register, dated and signed by the transferor and the transferee or by their duly appointed agent. We may accept and enter into its shareholders’ register any transfer based on an agreement between the transferor and the transferee provided a true and complete copy of the agreement is provided to us.

Our articles of association provide that, in case our shares are recorded in the register of shareholders on behalf of one or more persons in the name of a securities settlement system or the operator of such a system, or in the name of a professional depository of securities or any other depository or of a sub-depository designated by one or more depositories, we —subject to a confirmation in proper form received from the depository—will permit those persons to exercise the rights attaching to those shares, including admission to and voting at general meetings of shareholders. The Board of directors may determine the requirements with which such confirmations must comply. Shares held in such manner generally have the same rights and obligations as any other shares recorded in our shareholder register(s).

TAXATION

Luxembourg tax considerations***Scope of Discussion***

This summary is based on the laws of Luxembourg, including the Income Tax Law of December 4, 1967, as amended, the Municipal Business Tax Act of December 1, 1936, as amended and the Net Wealth Tax Act of October 16, 1934, as amended, to which we jointly refer as the “Luxembourg tax law”, existing and proposed regulations promulgated thereunder, and published judicial decisions and administrative pronouncements, each as in effect on the date of this report or with a known future effective date. This discussion does not generally address any aspects of Luxembourg taxation other than income tax, corporate income tax, municipal business tax, withholding tax and net wealth tax. This discussion, while not being a complete analysis or listing of all of the possible tax consequences of holding and disposing of shares in Nexa Resources, addresses the material tax issues. Also, there can be no assurance that the Luxembourg tax authorities will not challenge any of the Luxembourg tax consequences described below; in particular, changes in law and/or administrative practice, as well as changes in relevant facts and circumstances, may alter the tax considerations described below.

For purposes of this discussion, a “Luxembourg shareholder” is any beneficial owner of shares that for Luxembourg income tax purposes is:

- § an individual resident of Luxembourg under article 2 of the Luxembourg Income Tax Law (“LITL”), as amended; or
- § a corporation or other entity taxable as a corporation that is organized under the laws of Luxembourg or effectively managed from Luxembourg under article 159 of the Income Tax Law, as amended.

This discussion does not constitute tax advice and is intended only as a general guide. Shareholders should also consult their own tax advisors as to the Luxembourg tax consequences of the ownership and disposition of our common shares. The summary applies only to shareholders who will own our common shares as capital assets and does not apply to other categories of shareholders, such as dealers in securities, trustees, insurance companies, collective investment schemes, and shareholders who have, or who are deemed to have, acquired their shares in the capital of Nexa Resources by virtue of an office or employment.

Shareholders***Luxembourg income tax on dividends and similar distributions***

A non-Luxembourg shareholder will not be subject to Luxembourg income taxes on dividend income and similar distributions in respect of our common shares, other than a potential Luxembourg withholding tax as described below, unless the shares are attributable to a permanent establishment, or a fixed place of business maintained in Luxembourg by such non-Luxembourg shareholder.

An individual Luxembourg shareholder will be subject to Luxembourg income tax on dividend income and similar distributions in respect of its shares in Nexa Resources at the applicable progressive rates. Such payments may benefit from a 50.0% exemption set forth in Article 115 15a of the LITL, subject to the conditions set out therein. If the 50.0% exemption applies, the applicable income tax will be levied on 50% of the gross amount of the dividends at the applicable progressive rates. Taxable dividends are also subject to dependence insurance contribution levied at a rate of 1.4% on the net income where certain Luxembourg shareholders are affiliated to the Luxembourg social security administration.

A corporate Luxembourg shareholder is subject to Luxembourg CIT (including an unemployment fund contribution) and municipal business tax (“MBT”) at the aggregate rate of 23.87% in 2025 for entities having their statutory seat in Luxembourg City. The taxable basis of a corporate Luxembourg shareholder will, in principle, correspond to its accounting results, unless a specific treatment is provided for by the LITL. A corporate Luxembourg shareholder may benefit from the Luxembourg participation exemption regime with respect to dividends received if the following two conditions are met: (a) the shareholder holds or commits itself to hold at least 10.0% of the share capital of Nexa Resources or a participation with an acquisition price of at least €1.2 million for an uninterrupted period of at least twelve months and (b) the shareholder is a Luxembourg fully taxable corporation. If these cumulative conditions are met, dividends received by the corporate Luxembourg shareholder should be fully exempt from CIT and MBT at the level of the corporate Luxembourg shareholder.

If the conditions of the Luxembourg participation exemption regime with respect to dividends are not met, the corporate Luxembourg shareholders can still benefit from the aforementioned 50.0% exemption set forth in Article 115 15a of the LITL, subject to the conditions set out therein.

Luxembourg withholding tax—Share capital reductions or share premium reimbursements

Share capital reductions or share premium reimbursements made by Nexa Resources to the Luxembourg and non-Luxembourg shareholders, and stemming from contributions made by the shareholders, are in principle subject to a 15% Luxembourg withholding tax, unless they have been motivated by genuine economic reasons and provided that Nexa Resources does not have distributable reserves or profits available. Although genuine economic reasons are not defined by law, Luxembourg tax authorities may examine the given reasons. We do not intend to make capital reductions in the near future. Nexa Resources discloses distributable reserves, retained earnings and profits in its chart of accounts according to Decree dated June 10, 2009. As of December 31, 2025, we had the ability to pay dividends and share premiums. The share premium, if any, may be distributed to the shareholders in accordance with Luxembourg Commercial Companies Act by a resolution of the Board of directors. See “Share Ownership and Trading—Distributions.”

Luxembourg withholding tax—Distributions to shareholders

A Luxembourg withholding tax of 15.0% is due on dividends and similar distributions made by Nexa Resources to its Luxembourg and non-Luxembourg shareholders unless a Luxembourg domestic dividend withholding tax exemption or a double tax treaty reduction or exemption is applicable, as described below. The tax will be withheld by Nexa Resources and remitted to the Luxembourg tax authorities within 8 days as of the date the income is made available to the Luxembourg and non-Luxembourg shareholders.

Exemption from Luxembourg withholding tax—Distributions to shareholders

Dividends paid by Nexa Resources will be exempt from Luxembourg withholding tax provided that the following cumulative conditions are met (or domestic exemption):

- at the date of the distribution, the shareholder holds at least 10% of the share capital of Nexa Resources or a participation with an acquisition price of at least €1.2 million for an uninterrupted period of at least twelve months; and
- the dividend is paid to a (i) fully taxable company resident in Luxembourg, (ii) a company resident in a EU Member State fulfilling the conditions of Article 2 of the Parent Subsidiary Directive and listed in the appendix to this directive as well as a Luxembourg permanent establishment of such a company, (iii) a company resident in a country with which Luxembourg has concluded a double tax treaty and which is fully subject to income tax comparable to the Luxembourg corporate income tax as well as a Luxembourg permanent establishment of such a company, (iv) a company resident of Switzerland and subject to tax without being exempt, (v) a company or a cooperative company resident in a Member State of the European Economic Area, other than a Member State of the EU, and that is fully subject to tax equivalent to the Luxembourg corporate income tax, or (vi) a Luxembourg permanent establishment of a company under (ii) or (v).

For a shareholder to benefit from such exemption upon a distribution date, Nexa Resources must file a properly completed form 900 with the Luxembourg tax authorities within 8 days following the earlier of (a) the payment date set in the distribution decision or (b) the day following the distribution decision date in case no payment date is fixed. Luxembourg tax authorities may request all relevant documentation showing fulfillment of the above-mentioned conditions (*e.g.*, including a tax residency certificate). We make no representation that this exemption procedure will be practicable with respect to shares held through a clearing system such as DTC (in the United States).

Alternatively, a shareholder may file a refund request (form 901bis, stamped and validated by the tax authorities of the State of residency of the shareholder) with the Luxembourg tax authorities before December 31 of the year following the taxable event (*i.e.*, the distribution). We make no representation that this refund procedure will be practicable for a shareholder residing in the United States or any other specific jurisdiction.

A shareholder that does not meet the twelve-month holding period described in the first bullet above can request a refund when the twelve-month period has elapsed. The refund request (form 901bis, stamped and validated by the tax authorities of the State of residency of the shareholder) has to be filed with the Luxembourg tax authorities before December 31 of the year following the taxable event.

Forms 900 and 901bis are generally made available on the website of the Luxembourg tax authorities (*Administration des contributions directes*).

The application of the dividend withholding tax exemption to taxable companies' residents in other EU member states or to their EU permanent establishments is not granted if the income allocated is part of a tax avoidance scheme.

Reduction of Luxembourg withholding tax—Distributions to shareholders

As mentioned above, pursuant to the provisions of certain bilateral treaties for the avoidance of double taxation concluded between Luxembourg and other countries, and if certain conditions are met, the aforementioned Luxembourg dividend withholding tax may be reduced or an exemption may apply. Many such treaties, including the double tax treaty with the United States, provide for a tax rate lower than 15 percent only for a shareholder that holds a substantial (generally, 10 percent or 25 percent) portion of a Luxembourg company's shares. Shareholders that hold such shares should consult their tax advisors to determine how to benefit from the reduction in withholding tax rates.

A shareholder that is a company resident in a country that has entered a double tax treaty with Luxembourg may qualify for the domestic exemption even if the treaty would not reduce the withholding tax rate applicable to dividends paid to that shareholder.

Luxembourg NWT

A non-Luxembourg shareholder will not be subject to Luxembourg net wealth tax ("NWT") unless the shares are attributable to a permanent establishment, or a fixed place of business maintained in Luxembourg by such non-Luxembourg shareholder.

Luxembourg individual shareholders are not subject to Luxembourg NWT. A Luxembourg fully taxable corporate shareholder should be subject to Luxembourg NWT in respect of the shares held in the capital of Nexa Resources unless it holds more than 10% or €1.2 million of our common shares.

Luxembourg capital gains tax upon disposal of shares

Capital gains derived by a non-Luxembourg shareholder on the sale of our common shares will not be subject to taxation in Luxembourg, unless one of the following conditions applies:

- the shareholder does not benefit from a double tax treaty and (i) holds shares in Nexa Resources representing more than 10% of the share capital of Nexa Resources and such shares were held for less than six months prior to their sale or (ii) has been a resident taxpayer in Luxembourg for at least fifteen years and had acquired nonresident status less than five years prior to the disposal; or
- our common shares are attributable to a permanent establishment, or a fixed place of business maintained in Luxembourg by such non-Luxembourg shareholder. In such case, the non-Luxembourg shareholder is required to recognize capital gains or losses on the sale of such shares, which will be subject to CIT and MBT, unless the Luxembourg participation exemption regime with respect to capital gains applies.

Capital gains realized upon the sale of our common shares by a Luxembourg resident individual will be subject to Luxembourg income tax at the level of the Luxembourg resident individual only in case of (i) speculation gains or (ii) gains realized on a substantial participation.

Speculation gains

Capital gains realized upon the sale of our common shares within a shareholding period not exceeding six months will be subject to personal income taxation (unless such capital gain does not exceed €500) in the hands of a Luxembourg resident individual.

Substantial participation

In case where the Luxembourg resident individual has held the shares for at least six months and had a substantial participation, the capital gains realized will be subject to income tax at a rate equal to half the normal progressive rate applicable. A participation is considered as a substantial participation when a Luxembourg resident individual, jointly with his/her spouse and children under the age of 18, holds or has held, directly or indirectly, at any time during the five years prior to the date of the sale, 10.0% or more of the share capital of Nexa Resources. A participation is also considered as a substantial participation when a Luxembourg resident individual acquired free of charge, within the five-year period preceding the transfer, a participation that was constituting a substantial participation in the hands of the alienator (or the alienators in case of successive transfers free of charge within the same five-year period).

Capital gains realized by the Luxembourg corporate shareholder (*société de capitaux*) should be exempt from capital gains tax in Luxembourg if at the date of the disposal, the Luxembourg shareholder has held or undertakes to hold, for an uninterrupted period of at least 12 months, a direct participation which represents at least 10.0% of the share capital of Nexa Resources, or which acquisition price was at least €6.0 million. If these conditions are not met, the Luxembourg corporate shareholder would be fully taxed on the capital gains realized upon the sale of the common share. The exempt amount of the capital gains realized will be, however, reduced by the amount of any expenses related to the participation, including decreases in the acquisition cost that could have previously reduced such shareholder's Luxembourg taxable income.

ATAD rules

The European Council has adopted two Anti-Tax Avoidance Directives: Council Directive (EU) 2016/1164 of 12 July 2016 laying down rules against tax avoidance practices that directly affect the functioning of the internal market ("ATAD I") and Directive 2017/952/EU of 29 May 2017 amending ATAD I as regards hybrid mismatches with third countries ("ATAD II") that address many of the issues mentioned above. The measures included in ATAD I were implemented into Luxembourg law on December 21, 2018, and almost all of them have been applicable since January 1, 2019. The measures included in ATAD II were implemented into Luxembourg law on December 19, 2019, and almost all of them have been applicable since January 1, 2020, subject to certain exceptions. ATAD I and ATAD II may have a material impact on how returns to shareholders are taxed.

Pillar Two

Pillar Two is focused on implementing a global minimum tax designed to ensure that large multinationals pay a minimum effective tax rate of 15% in every jurisdiction they operate. Pillar Two is expected to apply to multinational groups with turnover in excess of €750 million. The Pillar Two proposals involve a framework of complex rules which, broadly, would impose top-up taxes on certain entities within a multinational group where the overall tax paid on the group's profit in any jurisdiction falls below the minimum 15% effective tax rate. The proposed rules for determining whether a top-up tax is required in respect of the group's profits in a jurisdiction and the allocation of any such top-up tax between the members of the group are detailed and are designed to prevent multinational groups from being able to structure around the rules. It should be noted that a group's effective tax rate in a jurisdiction may fall below the minimum 15% rate, and therefore a top-up tax may be required, even if that jurisdiction's statutory headline tax rate is over 15%. On December 14, 2022, the EU Member States adopted a Council Directive (2022/2523) on ensuring a global minimum level of taxation for multinational enterprise ("MNE") groups and large-scale domestic groups in the EU ("Minimum Tax Directive"). EU Member States had the obligation to implement the Minimum Tax Directive into their national laws before December 31, 2023. The Minimum Tax Directive was implemented into Luxembourg national law on December 22, 2023, and applies to fiscal years starting on or after December 31, 2023.

Peruvian tax considerations

The following is a general summary of material Peruvian tax matters, as in effect on the date of this report, and describes our understanding of the principal tax consequences of an investment in our common shares by a person or entity who is not considered a resident of Peru for tax purposes. This summary is not intended to be a comprehensive description of all the tax considerations that may be relevant to a decision to make an investment in the offered shares.

This summary is based on provisions of the Peruvian income tax law and its regulations in force as of the date hereof. No rulings from the Peruvian tax authorities or judicial rulings address the tax treatment of instruments similar to the shares of Nexa Resources. Accordingly, no assurance can be given that the Peruvian tax authorities will agree with the conclusions described below. If the Peruvian tax authorities were to take a position different from the conclusions described below, the Peruvian income tax consequences of investing in Nexa Resources may differ from those summarized below.

Sale, exchange or disposition of the shares or a beneficial interest therein

Investors who decide to invest in the shares of Nexa Resources hold the shares in book-entry form, in the name of a nominee holding such shares for the investors' benefit. Any future trading of such shares will be effected through a conveyance of the beneficial interest held by the investors thereupon through the designated clearing mechanism. Because the conveyance of such beneficial interest does not imply the actual transfer of shares, any capital gains resulting from the conveyance of the beneficial interest in such shares, obtained by a person or entity who is not considered a resident of Peru for Peruvian tax purposes, should not be subject to taxation in Peru.

Contrary to the conclusion stated above, if the sale of our common shares were to qualify as an "indirect transfer of Peruvian shares" (and the transfer of the beneficial interest in the shares were to be considered as an actual transfer of such shares), different rules would apply.

According to Peruvian income tax law, an "indirect transfer of Peruvian shares" is deemed to occur when there is a transfer of shares issued by a non-resident company which, in turn, owns—directly or through one or more companies—shares issued by a Peruvian company, and the following two conditions are concurrently met:

- (i) during any of the 12 months preceding the transfer, the fair market value ("FMV") of the shares issued by the Peruvian company held directly or indirectly by the nonresident company which shares are being sold, is equivalent to 50% or more of the FMV of all the shares issued by said non-resident company; and
- (ii) during any 12-month period, the shares transferred by a party, including those transferred by its related parties, represent at least 10% of the shares issued by such non-resident company.

Due to modifications to Peruvian income tax law, as of January 1, 2019, even if the abovementioned conditions are not met, an indirect transfer of Peruvian shares will also be deemed to exist if the "total value" of shares of the Peruvian company indirectly transferred within any 12-month period is equivalent to or higher than 40,000 Peruvian tax units (S/176 million or US\$50.0 million approximately). Said "total value" is determined by multiplying: i) the "percentage" that the FMV of the shares issued by the Peruvian company held (directly or indirectly) by the non-resident company which shares are being transferred, represents with regard to the FMV of all the shares issued by said non-resident company; and ii) the price agreed for the shares issued by the non-resident company directly transferred. To determine the "total value" threshold, transfers made by those parties which qualify as related to the transferor should also be considered. Nonetheless, the "taxable base" shall be determined, in any case, per party, considering the transfers made by the latter within the abovementioned 12-month period, but excluding those transfers previously taxed.

In case the sale of the shares were to qualify as an "indirect transfer of Peruvian shares" (and the transfer of the beneficial interest on the shares were to be considered as an actual transfer of such shares), any capital gain resulting therefrom will be subject to a 30% tax rate in Peru.

In case the corporate investor that makes the indirect transfer of Peruvian shares has a branch or a permanent establishment with assigned assets in Peru, said corporation will be jointly and severally liable for any income tax that resulted from the transfer of Peruvian shares; it will also be obligated to present to the Peruvian tax authority all the information related to the Peruvian shares of the non-resident investor that are being sold, particularly the information referred to the FMV; participation percentages; capital increase or reduction; issuance and placement of shares or participations; reorganization processes; patrimonial values and balance sheets; etc. Investors should consult their own tax advisors about the consequences of the acquisition, ownership, and disposition of their investment in the offered shares or any beneficial interest therein, including the possibility that the tax consequences of investing in the offered shares may differ from the description above.

United States federal income tax considerations

The following is a summary of certain U.S. federal income tax considerations that are likely to be relevant to the purchase, ownership, and disposition of our common shares by a U.S. Holder (as defined below).

This summary is based on provisions of the Internal Revenue Code of 1986, as amended (the “Code”), and U.S. Treasury regulations (“Regulations”), rulings, and judicial interpretations thereof, in force as of the date hereof, and the U.S.-Luxembourg Treaty dated December 20, 2000 (as amended by any subsequent protocols) (the “Treaty”). Those authorities may be changed at any time, perhaps retroactively, so as to result in U.S. federal income tax consequences different from those summarized below.

This summary is not a comprehensive discussion of all of the tax considerations that may be relevant to a particular investor’s decision to purchase, hold, or dispose of our common shares. In particular, this summary is directed only to U.S. Holders that hold common shares as capital assets and does not address tax consequences to U.S. Holders who may be subject to special tax rules, such as banks, brokers or dealers in securities or currencies, traders in securities electing to mark to market, financial institutions, life insurance companies, tax exempt entities, entities that are treated as partnerships for U.S. federal income tax purposes (or partners therein), holders that own or are treated as owning 10% or more of our common shares by vote or value, persons holding common shares as part of a hedging or conversion transaction or a straddle, nonresident alien individuals present in the United States for more than 182 days in a taxable year, or persons whose functional currency is not the U.S. dollar. Moreover, this summary does not address state, local or foreign taxes, U.S. federal estate and gift taxes, or the Medicare contribution tax applicable to net investment income of certain non-corporate U.S. Holders, or any alternative minimum tax consequences of acquiring, holding, or disposing of common shares.

For purposes of this summary, a “U.S. Holder” is a beneficial owner of common shares that is a citizen or resident of the United States, a U.S. domestic corporation or that otherwise is subject to U.S. federal income taxation on a net income basis in respect of such common shares.

U.S. Holders should consult their tax advisors about the consequences of the acquisition, ownership, and disposition of the common shares, including the relevance to their particular situation of the considerations discussed below and any consequences arising under foreign, state, local or other tax laws.

Taxation of dividends

Subject to the discussion below under “Passive Foreign Investment Company Status,” the gross amount of any distribution of cash or property with respect to our common shares that is paid out of our current or accumulated earnings and profits (as determined for U.S. federal income tax purposes) will generally be includible in a U.S. Holder’s taxable income as ordinary dividend income on the day on which the U.S. Holder receives the dividend and will not be eligible for the dividends received deduction allowed to corporations under the Code.

We do not expect to maintain calculations of our earnings and profits in accordance with U.S. federal income tax principles. U.S. Holders therefore should expect that distributions generally will be treated as dividends for U.S. federal income tax purposes.

Dividends received by an individual with respect to the common shares will be subject to taxation at a preferential rate if the dividends are “qualified dividends.” Subject to certain exceptions for short-term positions, dividends paid on the common shares will be treated as qualified dividends if:

- the common shares are readily tradable on an established securities market in the United States; and

- we were not, in the year prior to the year in which the dividend was paid, and are not, in the year in which the dividend is paid, a passive foreign investment company (“PFIC”).

The common shares are listed on the NYSE and will qualify as readily tradable on an established securities market in the United States so long as they are so listed. Based on our consolidated financial statements and certain estimates of our gross income and gross assets and relying on the Commodity Exception (as defined below under “Passive Foreign Investment Company Status”), we do not believe that we were a PFIC for our 2025 or 2024 taxable years, and we do not anticipate becoming a PFIC for our current taxable year or in the foreseeable future. Accordingly, we expect that dividends paid on the common shares will be treated as qualified dividends. U.S. Holders should consult their tax advisors regarding the availability of the reduced dividend tax rate in light of their own particular circumstances.

Subject to generally applicable limitations and conditions, Luxembourg dividend withholding tax paid at the appropriate rate applicable to the U.S. Holder may be eligible for a credit against such U.S. Holder’s U.S. federal income tax liability. These generally applicable limitations and conditions include requirements adopted by the U.S. Internal Revenue Service (“IRS”) in Regulations promulgated in December 2021, and any Luxembourg tax will need to satisfy these requirements in order to be eligible to be a creditable tax for a U.S. Holder. In the case of a U.S. Holder that either (i) is eligible for, and properly elects, the benefits of the Treaty, or (ii) consistently elects to apply a modified version of these rules under temporary guidance issued in July 2023 and complies with specific requirements set forth in such guidance, the Luxembourg tax on dividends will be treated as meeting these requirements and therefore as a creditable tax. In the case of all other U.S. Holders, the application of these requirements to the Luxembourg tax on dividends is uncertain, and we have not determined whether these requirements have been met. If the Luxembourg dividend tax is not a creditable tax for a U.S. Holder or the U.S. Holder does not elect to claim a foreign tax credit for any foreign income taxes paid or accrued in the same taxable year, the U.S. Holder may be able to deduct the Luxembourg tax in computing such U.S. Holder’s taxable income for U.S. federal income tax purposes. Dividend distributions will constitute income from sources without the United States and, for U.S. Holders that elect to claim foreign tax credits, generally will constitute “passive category income” for foreign tax credit purposes.

The availability and calculation of foreign tax credits and deductions for foreign taxes depend on a U.S. Holder’s particular circumstances and involve the application of complex rules to those circumstances. The temporary guidance discussed above also indicates that the Treasury and IRS are considering proposing amendments to the December 2021 Regulations and that the temporary guidance can be relied upon until additional guidance is issued that withdraws or modifies the temporary guidance. U.S. Holders should consult their own tax advisors regarding the application of these rules to their particular situations.

U.S. Holders that receive distributions of additional common shares or rights to subscribe for common shares as part of a pro rata distribution to all our shareholders generally will not be subject to U.S. federal income tax in respect of the distributions.

Taxation of dispositions of common shares

Subject to the discussion below under “Passive Foreign Investment Company Status,” a U.S. Holder generally will recognize gain or loss on the sale, exchange or other disposition of common shares in an amount equal to the difference, if any, between the amount realized upon the sale, exchange or other disposition and the U.S. Holder’s adjusted tax basis in the common shares. A U.S. Holder’s adjusted tax basis in its common shares generally will equal the purchase price for the common shares. Any gain or loss will be capital gain or loss and generally will be long-term capital gain or loss if the common shares have been held for more than one year. Long-term capital gain realized by a U.S. Holder that is an individual generally is subject to taxation at a preferential rate. The deductibility of capital losses is subject to limitations. Gain, if any, realized by a U.S. Holder on the sale or other disposition of the common shares generally will be treated as U.S. source income for U.S. foreign tax credit purposes.

Passive foreign investment company status

Special U.S. tax rules apply to investors in companies that are considered to be PFICs. We will be classified as a PFIC in a particularly taxable year if either:

- 75 percent or more of our gross income for the taxable year is passive income; or

- the average percentage of the value of our assets that produce or are held for the production of passive income is at least 50 percent.

Passive income generally includes dividends, interest, royalties, rents, annuities, net gains from the sale or exchange of property producing such income, net foreign currency gains, and gains from commodities transactions other than gains that are active business gains from the sale of commodities or arise from “commodity hedging transactions,” within the meaning of the applicable rules (“Commodity Exception”).

Based on our consolidated financial statements and certain estimates of our gross income and gross assets, and relying on the Commodity Exception, we do not believe that we were a PFIC for our 2025 or 2024 taxable years, and we do not anticipate becoming a PFIC for our current taxable year or in the foreseeable future. However, since PFIC status will be determined by us on an annual basis and since such status depends upon the composition of our income and assets, and the nature of our activities (including our ability to qualify for the Commodity Exception or any similar exceptions), from time to time, there can be no assurance that we will not be considered a PFIC for any taxable year. In the event that, contrary to our expectation, we are classified as a PFIC in any year, and a U.S. Holder does not make a mark-to-market election, as described in the following paragraph, the U.S. Holder will be subject to a special tax at ordinary income tax rates on “excess distributions” (generally, any distributions that a U.S. Holder receives in a taxable year that are greater than 125 percent of the average annual distributions that the U.S. Holder has received in the preceding three taxable years, or the U.S. Holder’s holding period, if shorter), and gain that the U.S. Holder recognizes on the sale of the U.S. Holder’s shares. Under these rules, (a) the excess distribution or gain will be allocated ratably over the U.S. Holder’s holding period, (b) the amount allocated to the current taxable year and any taxable year prior to the first taxable year in which we are a PFIC will be taxed as ordinary income, and (c) the amount allocated to each of the other taxable years will be subject to tax at the highest rate of tax in effect for the applicable class of taxpayer for that year, and an interest charge for the deemed deferral benefit will be imposed with respect to the resulting tax attributable to each such other taxable year. Classification as a PFIC may also have other adverse tax consequences.

A U.S. Holder may be able to mitigate some of the unfavorable rules described in the preceding paragraph by electing to mark the common shares to market. If a U.S. Holder makes this mark-to-market election, the U.S. Holder will be required in any year in which we are a PFIC to include as ordinary income the excess of the fair market value of the U.S. Holder’s common shares at year-end over the U.S. Holder’s basis in those shares. If a U.S. Holder’s basis in the common shares exceeds the shares’ fair market value at the end of the U.S. Holder’s taxable year, the U.S. Holder will be entitled to deduct the excess as an ordinary loss, but only to the extent of its net mark-to-market gains from previous years. The U.S. Holder’s basis in the shares will be adjusted to reflect the gain or loss. In addition, any gain that the U.S. Holder recognizes upon the sale of the common shares will be taxed as ordinary income in the year of sale.

A U.S. Holder that owns an equity interest in a PFIC must annually file IRS Form 8621 and may be required to file other IRS forms. A failure to file one or more of these forms as required may toll the running of the statute of limitations in respect of each of the U.S. Holder’s taxable years for which such form is required to be filed. As a result, the taxable years with respect to which the U.S. Holder fails to file the form may remain open to assessment by the IRS indefinitely, until the form is filed.

U.S. Holders should consult their tax advisors regarding the potential application of the PFIC rules to an investment in the common shares.

Foreign financial asset reporting

Individual U.S. Holders that own “specified foreign financial assets” with an aggregate value in excess of US\$50,000 on the last day of the taxable year or US\$75,000 at any time during the taxable year are generally required to file an information statement along with their tax returns, currently on Form 8938, with respect to such assets. “Specified foreign financial assets” include any financial accounts held at a non-U.S. financial institution, as well as securities issued by a non-U.S. issuer that are not held in accounts maintained by financial institutions. Higher reporting thresholds apply to certain individuals living abroad and to certain married individuals. Regulations extend this reporting requirement to certain entities that are treated as formed or availed of to hold direct or indirect interests in specified foreign financial assets based on objective criteria. U.S. Holders who fail to report the required information could be subject to substantial penalties. In addition, the statute of limitations for assessment of tax would be suspended, in whole or part. Prospective investors are encouraged to consult with their tax advisors regarding the possible application of these rules, including the application of the rules to their particular circumstances.

Backup withholding and information reporting

Dividends paid on, and proceeds from the sale or other disposition of, the common shares to a U.S. Holder generally may be subject to the information reporting requirements of the Code and may be subject to backup withholding unless the U.S. Holder provides an accurate taxpayer identification number and makes any other required certification or otherwise establishes an exemption. Backup withholding is not an additional tax. The amount of any backup withholding from a payment to a U.S. Holder will be allowed as a refund or credit against the U.S. Holder's U.S. federal income tax liability, provided the required information is furnished to the IRS in a timely manner.

A holder that is a foreign corporation or a non-resident alien individual may be required to comply with certification and identification procedures in order to establish its exemption from information reporting and backup withholding.

EXCHANGE CONTROLS AND OTHER LIMITATIONS AFFECTING SECURITY HOLDERS

We are not aware of any governmental laws, decrees, regulations or other legislation in Luxembourg that restrict the export or import of capital, including the availability of cash and cash equivalents for use by our affiliated companies, or that affect the remittance of dividends, interest or other payments to non-resident holders of our securities, except for regulations restricting the remittance of dividends and other payments in compliance with United Nations and EU sanctions.

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

Our management, with the participation of our chief executive officer and chief financial officer, has evaluated the effectiveness of our disclosure controls and procedures as of December 31, 2025. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.

We have evaluated, with the participation of our chief executive officer and chief financial officer, the effectiveness of our disclosure controls and procedures as of December 31, 2025. Based on our evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures were effective as of December 31, 2025.

INTERNAL CONTROL OVER FINANCIAL REPORTING

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting and for assessing its effectiveness.

Our internal control over financial reporting is a process designed by, or under the supervision of, our chief executive officer and our chief financial officer, and effected by our Board of directors, management and other employees, and it is designed to provide reasonable assurance regarding the reliability of financial reporting and of the preparation of our consolidated financial statements, in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards").

Due to its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. In addition, projections of any evaluation of the effectiveness of internal control over financial reporting to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with our policies or procedures may deteriorate.

Our management has assessed the effectiveness of our internal control over financial reporting as of December 31, 2025, based upon the criteria established in *Internal Controls—Integrated Framework* (2013), issued by the Committee of Sponsoring Organizations of Treadway Commission ("COSO"). Based on this assessment and criteria, our management has concluded that our internal control over financial reporting was effective as of December 31, 2025.

Audit of the effectiveness of internal control over financial reporting

Our independent registered public accounting firm, PricewaterhouseCoopers Auditores Independientes Ltda., has audited the effectiveness of our internal control over financial reporting, as stated in their report as of December 31, 2025.

Changes in internal control over financial reporting

There were no changes in our internal controls over financial reporting during the fiscal year of 2025, which have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PRINCIPAL ACCOUNTANT FEES AND SERVICES

The following table summarizes the fees billed to us by our independent auditors PricewaterhouseCoopers Auditores Independientes Ltda. for professional services in 2025 and 2024.

	For the Year Ended December 31,	
	2025	2024
	(US\$ thousand)	
Audit fees	1,832.7	1,695.2
Audit-related fees	31.4	371.5
Tax fees	-	-
Other fees	-	-
Total fees	1,864.1	2,066.7

“Audit fees” are the aggregate fees billed by PricewaterhouseCoopers Auditores Independientes Ltda. for the audit of our annual financial statements, the audit of the statutory financial statements of our subsidiaries, and reviews of interim financial statements and attestation services that are provided in connection with statutory and regulatory filings or engagements. They also include fees for services that only the independent auditor can reasonably provide, including the provision of comfort letters and consents in connection with statutory and regulatory filings and the review of documents filed with the SEC and other capital markets or local financial reporting regulatory bodies. “Audit-related fees” are fees charged by PricewaterhouseCoopers Auditores Independientes Ltda. for assurance and related services that are reasonably related to the performance of the audit or review of our consolidated financial statements and are not reported under “Audit fees.” “Tax fees” are the aggregate fees billed by PricewaterhouseCoopers Auditores Independientes Ltda. for services rendered for tax compliance, tax advice, and tax planning. “Other fees” are the aggregate fees billed by PricewaterhouseCoopers Auditores Independientes Ltda. for services related with assurance and review procedures not related with regulatory or financial reporting of our consolidated financial statements.

We have established policies and procedures that require any engagement of our independent auditor for audit or non-audit services to be submitted to and pre-approved by the Audit Committee. In addition, our Audit Committee may delegate the authority to pre-approve non-audit services to one or more of its members. All non-audit services that are pre-approved pursuant to such delegated authority must be presented to the full Audit Committee at its first scheduled meeting following such pre-approval. Our Audit Committee also has the authority to recommend pre-approval policies and procedures to our Board of directors and for the engagement of our independent auditor’s services.

INFORMATION FILED WITH SECURITIES REGULATORS

We are subject to various information and disclosure requirements in those countries in which our securities are traded, and we file financial statements and other periodic reports with the SEC and Canadian securities regulatory authorities.

- *United States.* We are subject to the information requirements of the Securities Exchange Act of 1934, as amended, and accordingly file reports and other information with the SEC. Our SEC filings are available to the public from the SEC at <http://www.sec.gov>. You may also inspect Nexa Resources' reports and other information at the offices of the New York Stock Exchange, 11 Wall Street, New York, New York 10005, on which our common shares are listed. For further information on obtaining copies of Nexa Resources' public filings at the NYSE, you should call (212) 656-5060.
- *Canada.* We must comply with certain Canadian periodic and ongoing disclosure rules under applicable Canadian provincial and territorial securities laws. However, with respect to the rules under applicable Canadian provincial and territorial securities laws, we are able to rely on certain exemptions from many of the requirements under such laws through our compliance with U.S. disclosures given our status in the U.S. as a foreign private issuer. Our Canadian filings are available to the public from the website maintained by the Canadian Securities Administrators at www.sedarplus.ca.

GLOSSARY

Brownfields project: An exploration or development project near or within an existing operation, which can share infrastructure and management.

Concentration: The process by which crushed, and ground ore is separated into metal concentrates and reject material through processes such as flotation.

Concentrate plant: A plant where metal concentration occurs.

Cut-off grade: is the grade (*i.e.*, the concentration of metal or mineral in rock) that determines the destination of the material during mining.

Development: The process of constructing a mining facility and the infrastructure to support the facility is known as mine development.

Diamond drilling: A method of drilling that uses a diamond bit, which rotates at the end of a drill rod or pipe.

Exploration: Activities associated with ascertaining the existence, location, extent, or quality of a mineral deposit.

Exploration stage property: is a property that has no mineral reserves disclosed.

Greenfields project: An exploration or development project that is located outside the area of influence of existing mine operations and/or infrastructure and will be independently developed and managed.

Indicated Mineral Resource: is that part of a Mineral Resource for which quantity and grade or quality are estimated on the basis of adequate geological evidence and sampling. The level of geological certainty associated with an indicated mineral resource is sufficient to allow a qualified person to apply modifying factors in sufficient detail to support mine planning and evaluation of the economic viability of the deposit.

Inferred Mineral Resource: is that part of a Mineral Resource for which quantity and grade or quality are estimated on the basis of limited geological evidence and sampling. The level of geological uncertainty associated with an inferred mineral resource is too high to apply relevant technical and economic factors likely to influence the prospects of economic extraction in a manner useful for evaluation of economic viability.

km: kilometer.

ktpd: thousand tonnes per day.

LBMA: The London Bullion Market Association.

LME: London Metal Exchange.

LOM: life of mine.

Measured Mineral Resource: is that part of a Mineral Resource for which quantity and grade or quality, are estimated on the basis of conclusive geological evidence and sampling. The level of geological certainty associated with a measured mineral resource is sufficient to allow a qualified person to apply modifying factors, as defined in this section, in sufficient detail to support detailed mine planning and final evaluation of the economic viability of the deposit.

Metal concentrate: The crushed and ground material obtained after concentration, including zinc, lead and copper concentrates. This is the product from our mining operations. Most of the zinc concentrate we produce is used in our smelting operations and the remaining portion, along with our lead and copper concentrates, is sold to our customers.

Metallic zinc: Pure metal (99.995% zinc) obtained from the electrodeposition of a zinc sulfate solution, free of impurities, through the Roaster-Leaching-Electrolysis (“RLE”) process.

Mineralization: The process or processes by which a mineral or minerals are introduced into a rock, resulting in a potentially valuable or valuable deposit.

Mineralized material: Mineral bearing material that has been physically delineated by one or more methods, including drilling and underground work, and is supported by sampling and chemical analysis. This material has been found to contain a sufficient amount of mineralization of an average grade of metal or metals to have economic potential that warrants further exploration evaluation. While this material is not currently or may never be classified as ore reserves, it is reported as mineralized material only if the potential exists for reclassification into the reserves category. This material cannot be classified in the reserves category until final technical; economic and legal factors have been determined. Under the SEC’s standards, a mineral deposit does not qualify as a reserve unless it can be economically and legally extracted at the time of reserve determination, and it constitutes a proven or probable reserve (as defined below).

Mineral Reserve: is an estimate of tonnage and grade or quality of indicated and measured mineral resources that, in the opinion of the qualified person, can be the basis of an economically viable project. More specifically, it is the economically mineable part of a measured or indicated mineral resource, which includes diluting materials and allowances for losses that may occur when the material is mined or extracted.

Mineral Resource: is a concentration or occurrence of material of economic interest in or on the Earth’s crust in such form, grade or quality, and quantity that there are reasonable prospects for eventual economic extraction. A mineral resource is a reasonable estimate of mineralization, taking into account relevant factors such as cut-off grade, likely mining dimensions, location, or continuity that, with the assumed and justifiable technical and economic conditions, is likely to, in whole or in part, become economically extractable.

Mine site: An economic unit comprised of an underground and/or open pit mine, a treatment plant and equipment and other facilities necessary to produce metals concentrates, in existence at a certain location.

NSR: Net Smelter Return is the net revenue that the owner of a mining property receives from the sale of the mine’s metal/nonmetal products, less transportation and refining costs.

Open pit: Surface mining in which the ore is extracted from a pit. The geometry of the pit may vary with the characteristics of the ore body.

Ore: A mineral or aggregate of minerals from which metal can be economically mined or extracted.

Ore grade: The average amount of metal expressed as a percentage, grams per tonne or in ounces per tonne.

Ounces or oz: Unit of weight. A troy ounce equals 31.1034 grams. All references to ounces in this report are to troy ounces unless otherwise specified.

Probable Mineral Reserve: is the economically mineable part of an indicated and, in some cases, a measured mineral resource.

Production stage property: is a property with material extraction of mineral reserves.

Proven Mineral Reserve: is the economically mineable part of a measured mineral resource and can only result from conversion of a measured mineral resource.

Qualified Person: An individual who is a mineral industry professional with at least five years of relevant experience in the type of mineralization and type of deposit under consideration in the specific type of activity that person is undertaking on behalf of the registrant and an eligible member or licensee in good standing of a recognized professional organization at the time the technical report is prepared.

Reclamation: The process of stabilizing, contouring, maintaining, conditioning, and/or reconstructing the surface of disturbed land (*i.e.*, used or affected by the execution of mining activities) to a state of “equivalent land capability.” Reclamation standards vary widely, but usually address issues of ground and surface water, topsoil, final slope gradients, overburden, and revegetation.

Refining: The process of purifying an impure metal; the purification of crude metallic substances.

Secondary feed materials: By-products of industrial processes such as smelting and refining that are then available for further treatment/recycling. It can cover foundry ashes, zinc oxides from brass and bronze production, electric arc furnace (“EAF”) dust, and slags.

SHG: Special High Grade.

Skarn: Metamorphic zone developed in the contact area around igneous rock intrusions when carbonate sedimentary rocks are invaded by substantial amounts of silicon, aluminum, iron and magnesium. The minerals commonly present in a skarn include iron oxides, calc-silicates, andradite and grossularite garnet, epidote, and calcite. Many skarns also include ore minerals. Several productive deposits of copper or other base metals have been found in and adjacent to skarns.

Tailings: Finely ground rock from which valuable minerals have been extracted by concentration.

Tonne: A unit of weight. One metric tonne equals 2,204.6 pounds or 1,000 kilograms. One short tonne equals 2,000 pounds. Unless otherwise specified, all references to “tonnes” in this report refer to metric tonnes.

Zinc equivalent: A metric used to compare mineralization that is comprised of different metals in terms of zinc. Copper, lead, silver and gold contents in our concentrate production have been converted to a zinc equivalent grade at the average benchmark prices for 2025, namely, US\$2,869.66 per tonne (US\$1.30 per pound) for zinc, US\$9,944.94 per tonne (US\$4.51 per pound) for copper, US\$1,963.44 per tonne (US\$0.89 per pound) for lead, US\$40.03 per ounce for silver and US\$3,431.54 per ounce for gold.

Zinc oxide: A chemical compound that results from the sublimation of zinc (Zn-metal) by oxygen in the atmosphere. Zinc oxide is in the form of powder or fine grains that is insoluble in water but very soluble in acid solutions.

1 General information

Nexa Resources S.A. (“NEXA” or “Parent Company”) is a public limited liability company (société anonyme) incorporated and domiciled in the Grand Duchy of Luxembourg. Its shares are publicly traded on the New York Stock Exchange (“NYSE”).

The Company’s registered office is located at 37A, Avenue J. F. Kennedy in the city of Luxembourg in the Grand Duchy of Luxembourg.

NEXA and its subsidiaries (the “Company”) operate large-scale, mechanized underground and open pit mines, as well as smelters. The Company owns and operates three polymetallic mines in Peru and two polymetallic mines in Brazil. Additionally, the Company owns and operates a zinc smelter in Peru and two zinc smelters in Brazil.

NEXA’s majority shareholder is Votorantim S.A. (“VSA”), which holds 64.68% of its equity. VSA is a Brazilian privately-owned industrial conglomerate that holds ownership interests in metal, steel, cement, and energy companies, among others.

(a) Impact of new United States tariff decisions

On April 2, 2025, the President of the United States issued an Executive Order imposing a 10% tariff on imports from most countries and up to 50% on selected nations, pursuant to the International Emergency Economic Powers Act (IEEPA). In addition, an investigation was initiated into the potential imposition of tariffs on critical minerals, including zinc and copper. However, the United States remains highly dependent on imports of refined zinc, which reduces the likelihood of the application of significant tariffs on this metal.

During the 2025 fiscal year and up to the issuance date of these financial statements, no further developments occurred regarding the imposition of tariffs on critical minerals. Accordingly, the Company has not identified any material impacts arising from trade measures adopted by the United States or from the potential imposition of import tariffs on zinc or copper. The primary impact observed continues to be exchange rate volatility, driven by U.S. economic policy announcements and ongoing geopolitical tensions.

2 Information by business segment

Business segment definition

The Company’s Chief Executive Officer has been identified as the chief operating decision maker (“CODM”) since the role encompasses authority over resource allocation decisions and performance assessment, mainly analyzing performance from the production obtained in the operations. The Company has identified two operating segments:

- Mining: consists of five long-life polymetallic mines, three located in the Central Andes of Peru and two located in Brazil (One in the state of Minas Gerais and one in the state of Mato Grosso). In addition to zinc, the Company produces substantial amounts of copper, lead, silver, and gold as by-products, which reduce the overall cost to produce mined zinc.
- Smelting: consists of three operating units, one located in Cajamarquilla in Peru and two located in the state of Minas Gerais in Brazil. The facilities recover zinc from concentrates and produce metallic zinc (mainly Special High-Grade “SHG” zinc and zinc alloys), zinc oxide and by-products, such as sulfuric acid, copper cement among others.

Accounting policy

Segment performance is assessed based on Adjusted EBITDA, since net financial results, comprising financial income and expenses and other financial items, and income tax are managed at the corporate level and are not allocated to operating segments.

Notes to the consolidated financial statements
At and for the year ended on December 31, 2025

All amounts in thousands of US dollars, unless otherwise stated

The Company defines Adjusted EBITDA as follows: net income (loss) for the year, adjusted by (i) share in the results of associates, depreciation and amortization, net financial results and income tax; (ii) addition of cash dividends received from associates; (iii) non-cash events and non-cash gains or losses that do not specifically reflect its operational performance for the specific period, such as: gain (loss) on sale of investments; impairment and impairment reversals; gain (loss) on sale of long-lived assets; write-offs of long-lived assets; remeasurement in estimates of asset retirement obligations; and other restoration obligations; and (iv) pre-operating and ramp-up expenses incurred during the commissioning and ramp-up phases of greenfield projects.

In addition, management may adjust the effect of certain types of transactions that in its judgment are (i) events that are non-recurring, unusual or infrequent, and (ii) other specific events that, by their nature and scope, do not reflect Nexa's operational performance for the year.

The adjusted EBITDA is derived from internal information prepared in accordance with the International Financial Reporting Standards ("IFRS Accounting Standards") and based on accounting measurements and management reclassifications between income statement lines items, which are reconciled to the consolidated financial statements in the column "Adjustments", as shown in the tables below. These adjustments include reclassifications of certain overhead costs and revenues from "Other income and expenses, net" to "Net Revenues, Cost of sales and/or Selling", "General and administrative expenses".

The Company uses customary market terms for intersegment sales. The Company's corporate headquarters' expenses are allocated to the operating segments to the extent they are included in the measures of performance used by the Chief operating decision maker (CODM).

The presentation of segments' results and reconciliation to income before income tax in the consolidated income statement is as follows:

	2025				
	Mining	Smelting	Intersegment sales	Adjustments	Consolidated
Net revenues	1,569,883	2,057,071	(669,298)	44,399	3,002,055

Net financial results					(167,058)
Loss before income tax					(296,084)

(i) This amount represents the change in the fair value of the offtake agreement described in note 16 (e), which is being measured at Fair value through profit and loss ("FVTPL"). This change in fair value is a non-cash item and has not been considered in the Company's Adjusted EBITDA calculation.

**Notes to the consolidated financial statements****At and for the year ended on December 31, 2025****All amounts in thousands of US dollars, unless otherwise stated**

(ii) This amount corresponds to the change in fair value and any adjustment of the energy surplus arising from electric energy purchase contracts of NEXA's subsidiary, Pollarix and Nexa Energy Comercializadora de Energia Ltda, as disclosed in note 16 (d). This change in fair value is a non-cash item and has been excluded from the Company's Adjusted EBITDA calculation.

(iii) During the years of 2023 and 2025, changes were recognized in the provision related to estimated costs of additional obligations associated with five (5) inactive industrial waste containment structures in Brazil, which have remained non-operational for more than 20 years and do not contain mining tailings, water, or liquid waste, as disclosed in Note 27(a). In 2025, following the completion of an engineering study, the competent environmental authority confirmed the classification of these structures as dry stacks and the absence of any remediation requirement, resulting in the reversal of the related provision. As these structures did not contribute to the Company's operating performance, the effects of these movements were excluded from the calculation of Adjusted EBITDA.

(iv) Annual remeasurement adjustment of the Company's silver streaming revenues given the changes in long-term prices and in the mine plan for the Cerro Lindo mining unit.

(v) Refers to dividends received from associate company Campos Novos Energia S.A – Enercan, an entity focused on electric energy generation. As the purpose of Nexa's investment in Enercan is to secure long-term energy supply for its operations in Brazil, the chief operating decision maker (CODM) considers Nexa's energy costs for a given period together with dividends received from Enercan during such period. Nexa recognized its share of the assets, liabilities, revenues and expenses for its interest in Enercan until November 2022, when it ceased to be a jointly controlled operation. Beginning in 2024, Nexa includes these dividends in its segment Adjusted EBITDA, as the CODM considers them jointly with Nexa's energy costs.

3 Basis of preparation of the consolidated financial statements

These consolidated financial statements have been prepared in accordance with the IFRS Accounting Standards as issued by the International Accounting Standards Board (IASB).

The consolidated financial statements have been prepared under the historical cost convention, except for certain financial assets and financial liabilities (including other financial instruments) measured at fair value at the end of each reporting period.

The consolidated financial statements of the Company for the year ended December 31, 2025, were approved for issue in accordance with a resolution of the Board of Directors on February 26, 2026.

4 Principles of consolidation

The consolidated financial statements comprise the financial statements of NEXA and its direct and indirect subsidiaries ("subsidiaries"), which reflect the assets, liabilities and transactions of the Parent Company and its subsidiaries. Intercompany balances and transactions, which include unrealized profits, are eliminated. A list of the most relevant companies, including subsidiaries, associates and joint operations, and the accounting policies applied in the preparation of the consolidated financial statements are described below.

- (i) During 2025, one (1) share was transferred free of charge from Votorantim S.A. to Nexa Recursos Minerais S.A. As a result of this transaction, Nexa Recursos Minerais S.A. came to hold 100% of the share capital of Mineração Santa Maria Ltda.
- (ii) Nexa, through its wholly owned subsidiary NEXA BR, holds 100% of the common shares of Pollarix, representing 33% of the total shares outstanding, which carry all voting rights. Auren, a subsidiary of VSA, holds 100% of the preference shares outstanding, representing 67% of the total shares outstanding, which entitles it to receive dividends 93% higher than the amount received by the common shareholder.
- (iii) In January 2025, the subsidiary Nexa Peru acquired 100% of the equity interest in a new subsidiary, Votorantim CSC S.A.C., a provider of shared administrative, tax, and accounting services, from its majority shareholder Votorantim S.A. The acquisition included a net asset value of USD 949, with a purchase price of USD 924, resulting in a gain of USD 25 recognized in profit or loss. The transaction had a net positive cash effect of USD 997, calculated as the difference between the cash and cash equivalents of the acquired subsidiary and the amount paid at the acquisition date.
- (iv) For further details about this change refer to note 30 (h).

(a) Subsidiaries

Subsidiaries include all entities over which the Company has control. The Company controls an entity when it (i) has the power over the entity; (ii) is exposed, or has the right, to variable returns from its involvement with the entity; and (iii) has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Company, except when the predecessor basis of accounting is applied. Subsidiaries are unconsolidated from the date that control ceases.

Accounting policies of subsidiaries are usually consistent with the policies adopted by the Company. If there are differences, an adjustment is made in the consolidation process.

Non-controlling interests in the subsidiaries' equity and results are shown separately in the consolidated balance sheet, income statement, statement of comprehensive income and statement of changes in shareholders' equity. A change in a subsidiary's ownership interest, without loss of control, is accounted for as an equity transaction.

If the Company loses control over a subsidiary, it derecognizes the related assets, liabilities, non-controlling interests and other equity components and any resultant gain or loss is recognized in the income statement. Any investment retained is recognized at fair value.

In general, there is a presumption that a majority of voting rights results in control. When the Company has less than a majority of the voting rights of an investee, it considers all relevant facts and circumstances to determine whether it has control over the investee. This may include contractual arrangements with the other holders of voting rights in the investee; rights arising from other contractual arrangements; and the Company's voting rights and potential voting rights that will give it the practical ability to direct the relevant activities of the investee unilaterally.

Intercompany transactions, balances, and unrealized gains on transactions between companies in the consolidated group are eliminated in full on consolidation. Unrealized losses are also eliminated unless the transaction indicates impairment of the transferred asset.

(b) Associates

Associates are initially recognized at cost and adjusted thereafter by the equity method of accounting. An entity is considered to be an associate when the Company is able to exercise significant influence over the financial and operating policy decisions of the entity, without having control of the entity.

(c) Transaction with non-controlling interests

Transactions with non-controlling interests that do not result in a loss of control are recognized within shareholders' equity as transactions with equity owners of the consolidated group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiary. Any difference between the amount of adjustment to non-controlling interests and any consideration paid or received is recognized in Additional paid in capital within shareholders' equity.

(d) Foreign currency translation

(i) Functional and presentation currency

Items included in the financial statements of each of the Company's entities are measured using the currency of the primary economic environment in which each entity operates ("the functional currency"). The Company's consolidated financial statements are presented in US Dollars ("USD"), which is NEXA's functional currency and the Company's reporting currency.

(ii) Transactions and balances

Foreign currency transactions are initially recorded by each of the Company's entities at their respective functional currency spot rates at the date the transaction is recognized. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at the functional currency spot rate at the end of each reporting period are recognized in the income statement. Non-monetary items that are measured at historical cost in a foreign currency are translated using the exchange rate at the date of the initial transaction. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss.

(iii) Consolidated entities

The results of operations and financial position of the Company's entities that have a functional currency different from the Company's reporting currency, are translated into the reporting currency as follows:

- Assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- Income and expenses for each income statement and statement of comprehensive income presented are translated at average exchange rates for the annual period of that income statement and statement of comprehensive income, which are a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates; and

All resulting exchange differences are recognized in other comprehensive income and accumulated in a separate component of shareholders' equity. When a foreign operation is totally or partially disposed, the translation adjustments that were previously recorded in equity are reclassified to the income statement.

5 Changes in the main accounting policies and disclosures

(a) New standards and amendments - applicable as of January 1, 2025

There was a new amendment to IAS 21 related to lack of exchangeability, effective for annual periods beginning on January 1, 2025. The adoption of this new amendment did not have a material impact on the Company's financial statements.

(b) New standards and interpretations not yet adopted

Certain new standards and amendments have been issued but are not yet effective. The Company is currently evaluating the potential impact of these pronouncements on its financial statements.

New standard - IFRS 18 - Presentation and Disclosure in Financial Statements

In April 2024, the IASB issued IFRS 18, *Presentation of Financial Statements*, which replaces IAS 1 *Presentation of Financial Statements*. IFRS 18 introduces new requirements for presentation within the statement of profit or loss, including specified totals and subtotals. Furthermore, entities are required to classify all income and expenses within the statement of profit or loss into one of five categories: operating, investing, financing, income taxes and discontinued operations, of which the first three are new.

The standard also requires disclosures of newly defined management-defined performance measures that represent subtotals of income and expenses not specified by IFRS but used by management in public communications and includes enhanced requirements for the aggregation and disaggregation of financial information based on the defined 'roles' of the primary financial statements (PFS) and the notes.

In addition, IFRS 18 includes amendments to IAS 7 *Statement of Cash Flows*, which change the starting point for determining cash flows from operating activities under the indirect method from 'profit or loss' to 'operating profit or loss', and removes certain classification options related to interest and dividends. As a result of these changes, consequential amendments have been made to other IFRS Accounting Standards.

IFRS 18 and the related amendments are effective for annual reporting periods beginning on or after 1 January 2027. Earlier application is permitted and must be disclosed. The standard will be applied retrospectively.

IFRS 18 is expected to affect the presentation and disclosure of information in the financial statements, particularly the structure of the statement of profit or loss and the disclosure of management performance measures. The standard is not expected to have an impact on the recognition and

measurement of the Group's assets and liabilities. At the date of these financial statements, the Group has not early adopted IFRS 18 and has not yet completed its assessment of the impact of the standard.

Amendments to IFRS 9 and IFRS 7 - Classification and Measurement of Financial Instruments

In May 2024, the IASB issued targeted amendments to IFRS 9 and IFRS 7 to respond to recent questions arising in practice, and to include new requirements not only for financial institutions but also for corporate entities. These amendments should clarify the date of recognition and derecognition of some financial assets and liabilities, with a new exception for some financial liabilities settled through an electronic cash transfer system, include further guidance for assessing whether a financial asset meets the payments of principal and interest (SPPI) criterion, define additional disclosures for certain instruments with contractual terms that can change cash flows (such as some financial instruments with features linked to the achievement of environment, social and governance targets), and update the disclosures for equity instruments designated at fair value through other comprehensive income (FVOCI).

The amendments will become effective for annual periods starting on or after January 1, 2026. Early adoption is permitted, with the option to adopt the amendments early for contingent features only.

The Company does not expect impacts on its consolidated financial statements arising from this new standard and the related consequential amendments to other standards.

Amendments to IFRS 9 and IFRS 7 - Classification and disclosure of own use and hedge accounting in 'Contracts Referencing Nature-dependent Electricity'

In December 2024, the IASB amended IFRS 9 and IFRS 7 to address the classification and disclosure of own use and hedge accounting in 'Contracts Referencing Nature-dependent Electricity'. The amendments pertain to own-use requirements, and hedge accounting requirements, together with related disclosures. The scope of the amendments is narrow and applies only to contracts meeting the specified scoping characteristics.

The effective date of the amendments is for annual reporting periods beginning on or after January 1, 2026, with early application permitted.

The Company does not expect impacts on its consolidated financial statements arising from this new standard and the related consequential amendments to other standards.

(c) Critical estimates, assumptions and judgments

The preparation of the Company's consolidated financial statements requires the use of estimates, assumptions, and judgments that affect the reported amounts of revenues, expenses, assets, and liabilities, as well as the accompanying disclosures and the disclosure of contingent liabilities as of the reporting date. Critical estimates, assumptions, and judgments seldom equal the actual results and are continually evaluated to reflect changing expectations about future events. Management must also exercise judgment when applying the Company's accounting policies.

This note provides an overview of the areas that involve a higher degree of judgment or complexity, and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be wrong due to their uncertainty. Detailed information about each of these estimates, assumptions and judgments is included in other notes together with information about the basis of calculation for each affected item in the financial statements.

The critical accounting estimates, assumptions and judgments applied by the Company in the preparation of these financial statements are as follows:

- estimation of current and deferred income taxes and uncertain tax positions - note 11
- estimation of fair value of financial instruments - note 14
- estimation of impairment of trade accounts receivables - note 17
- estimation of the net realizable value of inventories - note 18
- estimation of quantification of mineral reserves and resources for useful life calculation - note 22
- estimation of asset retirement, restoration and environmental obligations - note 27
- estimation of provisions for legal claims - note 28
- estimation of contractual obligations - note 29
- estimation of impairment of long-lived assets - note 31

Notes to the consolidated financial statements
At and for the year ended on December 31, 2025
All amounts in thousands of US dollars, unless otherwise stated

Estimates, assumptions and judgments are continuously evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Company and that are believed to be reasonable under the circumstances.

6 Net revenues

Accounting policy

Revenues represent the amount of the consideration received or receivable for the sale of goods in the ordinary course of the Company’s activities. Revenues are shown net of value-added tax, returns, rebates and discounts, after eliminating sales between the consolidated companies.

The Company recognizes revenue when a performance obligation is satisfied by transferring the promised goods or service to a customer. The asset is transferred when the customer obtains control of that asset.

To determine the point in time at which a customer obtains control of a promised asset the Company considers the following indicators: (i) the Company has a present right to payment for the asset; (ii) the customer has legal title to the asset; (iii) the Company has transferred physical possession of the asset; (iv) the customer has the significant risks and rewards of ownership of the asset; (v) the customer has accepted the asset.

Identification and timing of satisfaction of performance obligations

The Company has two distinct performance obligations included in certain sales contracts:

(i) the promise to provide goods to its customers; and (ii) the promise to provide freight and to contract insurance services to its customers.

Promise to provide goods: this performance obligation is satisfied when the control of such goods is transferred to the final customer, which is substantially determined based on the Incoterm agreed upon in each of the contracts with customers.

Promise to provide freight and contracting insurance services: this performance obligation is satisfied when the freight and insurance services contracted to customers are completed.

As a result of the distinct performance obligations identified, part of the Company’s revenues is presented as revenues from services. Cost related to revenues from services is presented as Cost of sales.

Revenues from the sale of goods and from freight and contracting insurance services are recognized at a point in time when control is transferred and when contracted services are provided. It is at this point that a trade receivable is recognized because only the passage of time is required before consideration is due. The Company does not have any contract assets, which give right to consideration in exchange for goods or services that the Company has transferred to the customer, since all rights to consideration of the contracts are unconditional.

In 2025, revenues of USD 744,166 approximately 24% of the total gross revenues are derived from two main customers (2024: USD 718,272 approximately 24%; and 2023: USD 773,230 approximately 27%). These revenues are attributed to both segments, mining and smelting.

Contractual obligations are an entity’s obligation to transfer goods or services to a customer for which the entity has received consideration from the customer (or the payment is due) but the transfer has not yet been completed. For contracts where performance obligations are satisfied over a period of time, the stage of completion is required to calculate how much revenue should be recognized to date and revenue shall be deducted from the prepayment to the extent that performance obligations are delivered. Refer to note 29 for the specific accounting policy and information related to NEXA’s contractual obligations.

Determining the transaction price and the amounts allocated to performance obligations

The Company considers the terms of the contract and its customary business practices to determine the transaction price. The transaction price is the amount of consideration that the Company expects to be entitled to receive in exchange for transferring promised goods or services to its customers. Transaction price is allocated to each performance obligation on a relative standalone selling price basis.

The transaction prices included in the Company's sales contracts are mainly based on international prices references and subject to price adjustments based on the market price at the end of the relevant quotation period stipulated in the sales contract. These are referred to as provisional pricing arrangements which are subject to a monthly price adjustment as per the London Metal Exchange (LME) quotational periods. As of December 31, 2025, the sales with pending price adjustments to be concluded at the final price were not material.

Additionally, the Company has a contractual obligation related to a long-term silver streaming arrangement linked to specific production of its Cerro Lindo mine. The Company received an upfront payment in advance of this specific production. The transaction price is linked to the silver production and spot market prices, which change over time and, therefore, it is accounted for as variable consideration. For more details about this streaming transaction see note 29.

7 Expenses by nature

Accounting policy

Cost of sales mainly consists of the cost of manufacturing the products sold by the Company and is recognized in the income statement on the date of delivery to the customer at the same time revenue is recognized from the related sale.

Selling, general and administrative expenses are recognized on an accrual basis and, if applicable, in the same period in which the income they are related to is recognized.

	2025

Other expenses	(27,143)	(24,599)	(12,417)	(64,159)
	(2,274,357)	(126,599)	(99,612)	(2,500,568)

(i) As of December 31, 2025, the Company recognized USD 2,888 in cost of sales related to idle-capacity costs in Juiz de Fora, due to the temporary shutdown of the emissions control system, and USD 2,475 in El Porvenir, mainly due to lower production levels resulting from adverse weather conditions and temporary suspensions of mining operations during the second and fourth quarters, respectively.

As of December 31, 2024, the Company recognized idle capacity costs totaling USD 34,591 related to the Aripuanã mine and plant during its ramp-up phase (including depreciation of USD 9,092), as well as USD 3,661 related to idle capacity at El Porvenir.

As of December 31, 2023, the Company recognized idle capacity costs totaling USD 12,455, mainly arising from temporary production interruptions at Cerro Lindo, Atacocha and Cajamarquilla due to adverse weather conditions, social unrest and unplanned maintenance activities.

(ii) The increase in raw materials and consumables used for the year ended December 31, 2025, compared with the same period in 2024, was primarily driven by higher average LME prices for zinc and copper, which increased the unit cost of concentrate consumed during the year. This effect was primarily due to Cajamarquilla, where higher production and processing volumes led to increased consumption of concentrates and related operating inputs.

8 Mineral exploration and project evaluation

Accounting policy

Mineral exploration and project evaluation costs are expensed in the year in which they are incurred.

Mineral exploration activities involve the search for mineral resources from potential areas up to the determination of commercial viability and technical feasibility of an identified resource. Mineral exploration costs include gathering exploration data through geological and geophysical studies, conducting exploration drilling and sampling, and determining and examining the volume and grade of the identified resources.

Project evaluation costs are mainly related to scoping, pre-feasibility and feasibility studies for greenfield and brownfield projects. Additionally, these evaluation costs could also include costs incurred for studies related to other corporate projects, research, innovation, automation, and information technology projects.

Note 21 describes when mineral exploration and project evaluation costs begin to be capitalized.

Composition

10 Net financial results

Accounting policy

(i) *Financial expenses* of obligations are recognized in the income statement when accrued, except for those directly attributable to the acquisition or the construction of qualifying assets, that is, assets that require a substantial amount of time to be ready for use, which are capitalized within property, plant and equipment and/or intangibles assets.

(ii) *Financial income* is mainly composed of interest income and is recognized on an accrual basis to reflect the asset's effective yield under the effective interest rate method.

(iii) *Other financial items, net* is composed of the net of the income and expenses related to the fair value of loans and financings, derivative financial instruments, and foreign exchange gains or losses.

**Notes to the consolidated financial statements****At and for the year ended on December 31, 2025****All amounts in thousands of US dollars, unless otherwise stated**

(i) The amounts for 2025 and prior years are mainly related to exchange-rate variations on USD-denominated accounts receivable and payable between Nexa BR with NEXA, as well as on intercompany loans between Nexa BR and its related parties, for which the exchange variation is not eliminated in consolidation, and on foreign-currency denominated loans. These transactions were affected by the volatility of the Brazilian Real ("BRL"), which strengthened against the USD during 2025, while depreciating during 2024.

(ii) As of December 31, 2025, interest related to uncertain tax positions increased primarily due to changes in estimates under IFRIC 23 related to Cerro Lindo's tax stability agreement.

11 Current and deferred income tax and uncertain tax positions**Accounting policy**

The current income tax is calculated based on the tax laws enacted or substantively enacted as of the balance sheet date in the countries where the Company's entities operate and generate taxable income. Management periodically evaluates positions taken by the Company in the taxes on income returns with respect to situations in which the applicable tax regulations are subject to interpretation.

The Company establishes provisions or records a liability, where appropriate, and when the Company has a present obligation, considering amounts expected to be paid to the tax authorities.

The current income tax is presented net, separated by tax paying entity, in liabilities when there are amounts payable, or in assets when the amounts prepaid exceed the total amount due on the reporting date.

Deferred income tax is provided in full, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date. However, deferred tax liabilities are not recognized if they arise from the initial recognition of goodwill. Deferred income tax is determined using tax rates (and laws), of the Company's entities, that have been enacted or substantially enacted at the end of the reporting period and that are expected to be applied when the related deferred income tax asset is realized, or the deferred income tax liability is settled.

Deferred tax assets are recognized only to the extent it is probable that future taxable income will be available against which the temporary deductible differences and/or tax losses can be utilized. Deferred tax assets and liabilities are offset when there is a legally enforceable right and an intention to offset them in the calculation of current taxes, generally when they are related to the same legal entity and the same tax authority. Accordingly, deferred tax assets and liabilities in different entities or in different countries are generally presented separately, and not on a net basis.

Deferred tax liabilities and assets are not recognized for temporary differences between the carrying amounts and tax bases of investments in foreign operations where the Company is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not be reversed in the foreseeable future.

Current and deferred taxes are recognized in profit or loss, unless they relate to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

There are discussions and ongoing disputes with tax authorities related to uncertain tax positions adopted by the Company in the calculation of its income tax, and for which management, supported by its legal advisors, has concluded that it is more-likely-than-not that its positions will be sustained upon examination. In such cases, income tax effects of these uncertain tax positions are not recognized.

When the Company concludes that it is not more-likely-than-not that its positions will be sustained upon examination, the Company recognizes an income tax liability measured at the present value of the expenditure expected to be required to settle the obligation. The increase in the provision due to the passage of time is recognized as "Financial Expenses" and any penalties and fines are recognized as "Other income and expenses, net" in the profit and loss.

Notes to the consolidated financial statements
At and for the year ended on December 31, 2025

All amounts in thousands of US dollars, unless otherwise stated

The Company may have to pay income tax under discussion to continue the legal process either at the local judicial level or international arbitration, even though these taxes have not been provisioned considering the Company's risk assessment. Such payments may be made in multiple installments provided that a guarantee is provided for the whole installment period. These amounts are recognized as outstanding under "other assets" as "Tax claim payments", for potential future recovery in cash or compensation of the future provisions if the Company loses the discussions or if the risk assessment is later revised leading the Company to conclude that it would no longer be more likely than not that its tax positions would be sustained upon examination.

Critical accounting estimates, assumptions and judgments

The Company is subject to income tax in all countries in which it operates where uncertainties arise in the application of complex tax regulations. Significant estimates, assumptions and judgments are required to determine the amount of deferred tax assets that would be recovered since this amount may be affected by factors including, but not limited to: (i) internal assumptions on the projected taxable income, which are based on production and sales planning, commodity prices, operational costs and planned capital costs; (ii) macroeconomic environment; and (iii) trade and tax scenarios.

In addition, there are many transactions and calculations for which the ultimate tax determination is uncertain. The Company also exercises judgment in the identification of these uncertainties over income tax treatments which could impact the consolidated financial statements as the Company operates in a complex multinational environment.

The Company and its subsidiaries are subject to reviews of income tax filings and other tax payments, and disputes can arise with the tax authorities over the interpretation of the applicable laws and regulations.

The Company is involved in ongoing discussions and disputes with tax authorities related to tax matters. For this discussion, in which the Company concluded that its positions will not be sustained upon examination, the Company estimates income tax liability based on management's assessment and this requires a high level of judgment as well as expectations of cash outlays to settle the obligation, which are supported by the positions of external legal counsel and case law from other similar cases.

(a) Reconciliation of income tax (expense) benefit

	2025	2024	2023
Income (loss) before income tax	331,749	(71,851)	(296,084)
Luxembourg statutory income tax rate (i)	23.87%	24.94%	24.94%
Expected income tax benefit (expense) at statutory rate	(79,188)	17,920	73,843
Tax effects of translation of non-monetary assets/liabilities to functional currency	53,683	(1,323)	13,686
Uncertain income tax treatment (ii)	23,221	(94,764)	(5,194)
Special mining levy and special mining tax	(22,133)	(7,868)	(5,366)
Difference in tax rate of subsidiaries outside Luxembourg	(23,480)	12,591	24,665
Unrecognized deferred tax on net operating losses(iii)	(48,226)	(25,515)	(52,091)
Other tax differences	(12,482)	(16,597)	(45,269)
Income tax (expense) benefit	(108,605)	(115,556)	4,274
Current	(106,415)	(205,674)	(80,935)
Deferred	(2,190)	90,118	85,209
Income tax (expense) benefit	(108,605)	(115,556)	4,274

(i) On December 11, 2024, the Luxembourg Parliament approved a reduction in the aggregate corporate income tax rate from 24.94% to 23.87%, effective January 1, 2025. As NEXA's standalone net operating losses do not meet the recognition criteria, no deferred tax assets were recognized. Therefore, the tax rate reduction has no impact on the consolidated interim income statement.

(ii) Primarily related to income tax provision of Cerro Lindo Stability Agreement for the years 2014 to 2021. For further details, please refer to note 11 (d).

(iii) As of December 31, 2025, the Company did not record deferred tax assets on USD 188,087 net operating losses (2024: USD 93,385) after an assessment made by management considering the future recoverability of these net operating losses. As of December 31, 2025, the Company has an accumulated amount of USD 1,166,839 not recognized as deferred taxes on net operating losses. From the total amount of unused tax losses, USD 106 have an expiration limit of 5 years, USD 884,617 of 17 years, USD 14,907 of 20 years, and USD 267,209 can be carried forward indefinitely.

(b) Changes on deferred tax income tax assets and liabilities

	2025	2024	2023
Balance at the beginning of the year	104,352	68,667	(24,886)
Effect on income (loss) for the year	(2,190)	90,118	85,209
Effect on other comprehensive income – fair value adjustment	110	535	198
Effect on other comprehensive loss – hedge accounting	1,349	981	(1,269)
Effects of consolidation of acquired subsidiary – note 4(iii)	1,997	-	-
Effect on other comprehensive income (loss) – translation effect included in cumulative translation adjustment	23,730	(50,565)	9,415
Others	-	(5,384)	-
Balance at the end of year	129,348	104,352	68,667

(c) Analysis of deferred income tax assets and liabilities

	2025	2024
Tax credits on net operating losses	320,929	242,278
Tax credits on temporary differences		
Asset retirement obligations	25,556	22,498
Foreign exchange gains	22,159	14,222
Inventory provisions	15,268	10,903
Environmental liabilities	12,108	10,847
Tax, labor and civil provisions	11,169	7,886
Provision for employee benefits	6,910	5,196
Revaluation of derivative financial instruments	1,913	36
Others	13,756	10,773
Tax debits on temporary differences		
Capitalized interest	(18,085)	(17,054)
Depreciation, amortization and asset impairment	(129,435)	(70,985)
Added value of assets (i)	(134,916)	(131,663)
Others	(17,984)	(585)
	129,348	104,352
Deferred income tax assets	307,293	236,887
Deferred income tax liabilities	(177,945)	(132,535)
	129,348	104,352

(i) This tax debit balance mainly relates to the value added on the acquisition of mining rights from Nexa Peru and its subsidiaries. While the underlying assets are amortizable for accounting purposes, the related amortization is not deductible for tax purposes.

(d) Summary of uncertain tax positions on income tax

As of December 31, 2025, the Company's main uncertain tax positions are related to: (i) the interpretation of the application of the Cerro Lindo tax stability agreement; (ii) litigation of transfer pricing adjustments over transactions made with related parties; and (iii) the deductibility of certain costs and expenses.

The estimated amount of contingent liabilities related to these uncertain tax positions that have not been provisioned at the balance sheet as of December 31, 2025, amounts to USD 362,147 (USD 430,567 on December 31, 2024). Of this amount, USD 167,190 corresponds to matters related to the Cerro Lindo tax stability agreement and the deductibility of certain costs and expenses. The decrease compared to the prior year of USD 233,336 is mainly explained by favorable final resolutions issued by the Peruvian Tax Court in January 2026 (Subsequent Event), regarding the 2016 and 2017 tax stability matters, as well as favorable decisions related to discussions on the deductibility of certain expenses associated with these tax contingencies.

With respect to Cerro Lindo tax stability agreement, the Company had a tax stability agreement in force until 2021. On 2020, SUNAT initiated income tax inspections focused on the applicability of the stabilized income tax rate to Cerro Lindo's operations.

**Notes to the consolidated financial statements****At and for the year ended on December 31, 2025****All amounts in thousands of US dollars, unless otherwise stated**

In December 2021, SUNAT concluded its income tax inspection of Nexa Peru's fiscal year 2014 and issued an assessment determining an additional amount to be paid by the Company. SUNAT calculated Nexa Peru's income tax expense for the 2014 fiscal year using the Peruvian statutory income tax rate of 30%, instead of the 20% income tax rate granted under the tax stability agreement to Cerro Lindo's operations.

SUNAT's position was based on the assertion that the Company should segregate the income generated by the facilities built under the approved feasibility study (which includes a plant with a production capacity of 5,000 tons) from the income generated by other facilities. As SUNAT considered that NEXA Peru did not provide enough documentation for SUNAT to calculate such segregation, it disregarded the application of the stabilized income tax rate.

On January 18, 2022, the Company filed its defense before SUNAT's claim office, arguing that the assessment was not compliant with applicable law, mainly because: i) SUNAT determined a presumed tax base that is expressly denied by the Peruvian Tax Code; and ii) SUNAT misinterpreted the scope and application of the tax stability agreement.

In 2022 and 2023, SUNAT also concluded the fiscal audits related to the tax stability regime of Cerro Lindo for the 2015, 2016 and 2017 fiscal years and issued the corresponding tax assessments, applying the Peruvian statutory income tax rate of 28% for the 2015 and 2016 fiscal years and 29.5% for the 2017 fiscal year, instead of the stabilized income tax rate.

In 2023 and 2024, SUNAT issued unfavorable decisions against the Company for the fiscal years 2014 through 2017. The Company filed appeals against these decisions and continues to maintain its position regarding the applicability of the Cerro Lindo tax stability agreement.

In the fourth quarter of 2024, SUNAT completed its audit of the 2018 tax period, recognizing that a portion of the Company's income was subject to the tax stability regime. In January 2025, NEXA paid USD 18,300 in order to obtain a 60% reduction in penalties and interests on penalties, without waving its legal position regarding the application of the tax stability agreement.

As previously disclosed, in rulings issued for the 2014 and 2015 tax periods, the Peruvian Tax Court upheld SUNAT's restrictive interpretation. In the fourth quarter of 2025, the Company appealed these rulings and continues to litigate the cases before the Peruvian Judiciary. In accordance with local regulations, to pursue the appeal the Company is required to pay the full disputed amount once the debt becomes enforceable, which is currently expected to occur in the first half of 2026 for an estimated amount of USD 67,726. Such amount may be settled in up to 72 monthly installments, including accrued interest.

Conversely, regarding the 2016 and 2017 tax stability discussions, in January 2026, which are duly recognized herein as subsequent event, the Peruvian Tax Court declared the nullity of the tax stability assessment, concluding that SUNAT did not adequately assess the documentation submitted by the Company during the audit process and failed to establish a clear criterion for the segregation of results. Consequently, the Tax Court determined that SUNAT should not have applied the non-stabilized tax rate to the Company's total results and ordered the cases to return to the audit phase, during which SUNAT must perform the segregation of results.

In the fourth quarter of 2025, SUNAT concluded its audit of the 2019 tax period applying the same criteria used in the 2018 audit. In January 2026, the Company paid US\$ 12,210 to obtain a 60% reduction in penalties and interests over penalties, without affecting its legal position.

For both payments related to the 2018 and 2019 tax periods, the Company continues to maintain its legal position regarding the applicability of the tax stability agreement. Such payments do not constitute an acknowledgment of liability, and the Company will continue pursuing its legal defense before the competent authorities.

As of the date of these consolidated financial statements, SUNAT is auditing the Company's income tax returns for the 2020 and 2021 fiscal years.

The tax uncertainties related to the Cerro Lindo tax stability agreement that are recognized as part of income tax liabilities in the balance sheet as of December 31, 2025, amounted to USD 130,709 (USD 102,062 as of December 31, 2024).

Notes to the consolidated financial statements
At and for the year ended on December 31, 2025
All amounts in thousands of US dollars, unless otherwise stated

(e) Pillar 2 - analysis on estimated effects

NEXA is within the scope of the OECD Pillar Two model rules which establish a new global minimum tax framework of 15% minimum tax. Pillar Two legislation was enacted in Luxembourg and in Brazil, already in effect for financial year beginning January 1, 2024, and January 1, 2025, respectively. However, no legislation regarding Pillar Two has been enacted in Peru yet.

The Company performed an assessment of the group's potential exposure to Pillar Two income taxes under the OECD transitional safe harbor rules and the Global Anti-Base Erosion (GloBE) income calculation and there was no material impact on its financial results.

(f) New transfer pricing rules in Brazil

As from January 1, 2024, Law 14.596/2023 became effective and introduced new transfer pricing rules (TP rules) in Brazil. These rules aim to align with the international standards established by the Organization for Economic Cooperation and Development (OECD), according to the arm's length principle, which stipulates that the terms and conditions of a controlled transaction should be consistent with those that would be established between third parties in comparable transactions. The new rules are expected to affect only transactions involving Nexa BR, as transactions involving Nexa Peru and the Parent Company already comply with international standards established by the OECD.

The Company, with the support of its technical advisors, performed functional, economic and benchmark analyses of its principal intercompany transactions and monitored the results of each segment of the operations, having identified and implemented the necessary adjustments and adaptations during 2025. In addition, the Company complied in a timely manner with all obligations required under applicable law.

The Company continues to monitor developments in the legislation and does not expect a relevant impact on the Company or its subsidiaries.

12 Financial risk management

Accounting policies

The Company's activities expose it to a variety of financial risks: (a) market risk (including currency risk, interest rate risk and commodities price risk); (b) credit risk; and (c) liquidity risk.

A significant portion of the products sold by the Company are commodities, with prices pegged to international indices and denominated in USD. Part of the production costs, however, are denominated in BRL and Peruvian Soles ("PEN"), and therefore, there is a mismatch of currencies between revenues and costs. Additionally, the Company has debt linked to different indices and currencies, which may impact its cash flows.

To mitigate the potential adverse effects of each financial risk factor, the Company follows a Financial Risk Management Policy that establishes governance and guidelines for the financial risk management process, as well as metrics for measurement and monitoring. This policy establishes guidelines and rules for: (i) Commodities Exposure Management, (ii) Foreign Exchange Exposure Management, (iii) Interest Rate Exposure Management, (iv) Issuers and Counterparties Risk Management, and (v) Liquidity and Financial Indebtedness Management. All strategies and proposals must comply with the Financial Risk Management Policy guidelines and rules, be presented to and discussed with the Finance Committee of the Board of Directors, and, when applicable, submitted for the approval of the Board of Directors, under the governance structure described in such Policy.

(a) Market risk

The purpose of the market risk management process and all related actions is intended to protect the Company's cash flows against adverse events, such as changes in foreign exchange rates, interest rates and commodity prices, to maintain the ability to pay financial obligations, and to comply with liquidity and indebtedness levels defined by management.

(i) Sensitivity analysis

Presented below is a sensitivity analysis of the main risk factors that affect the pricing of the outstanding financial instruments related to cash and cash equivalents, financial investments, loans and financing, and other financial instruments. The main sensitivities are the exposure to changes in the USD exchange rate, the Interbank Deposit Certificate (“CDI”) interest rates, the National Broad Consumer Price Index (“IPCA”), the Secured Overnight Funding Rate (“SOFR”) and the commodity prices. The scenarios for these factors are prepared using market sources and other relevant sources, in compliance with the Company's policies. The scenarios on December 31, 2025, are described below:

- Scenario I: considers a change in the market forward yield curves and quotations as of December 31, 2025, according to the base scenario defined by the Company for March 31, 2026.
- Scenario II: considers a change of + or -25% in the market forward yield curves as of December 31, 2025.
- Scenario III considers a change of + or -50% in the market forward yield curves as of December 31, 2025.

			Impacts on income statement						Impacts on statement of comprehensive income				
			Scenarios II and III						Scenarios II and III

(ii) Foreign exchange risk

Foreign exchange risk is managed through the Company’s Financial Risk Management Policy, which states that the objectives of derivative transactions are to reduce cash flow volatility, hedge against foreign exchange exposure and minimize currency mismatches.

The Company’s Financial Risk Management Policy establishes guidelines and rules to manage the Foreign Exchange Risk, to consist in finance projects / companies in the same currency of its future cash flows (i.e. a project/company that will generate cash flows indexed to USD must be primarily financed with borrowings denominated in the same currency). This strategy aims to reduce the impact of currency on the project’s/company’s cash flows, since revenues and expenses are denominated in the same currency.

Presented below are the financial assets and liabilities in foreign currencies on December 31, 2025. These mainly results from NEXA BR’s operations, for which the functional currency is the BRL and some other receivables related to tax claim payments, which are made in Peruvian Soles.

Intercompany loans balances are fully eliminated in the consolidated financial statements. However, the related foreign exchange gain or loss is not, and is presented as foreign exchange effects.

USD amounts of foreign currency balances	2025	2024
Assets		
Cash, cash equivalents and financial investments	125,345	98,067
Other financial instruments	28,243	70
Trade accounts receivables	20,946	19,553
	174,534	117,690
Liabilities		
Loans and financings	312,115	297,199
Other financial instruments	21,021	238
Trade payables	205,414	162,288
Confirming payables	102,252	28,518
Lease liabilities	44,184	42,357
Use of public assets	18,808	18,047
	703,794	548,647
Net exposure	(529,260)	(430,957)

(iii) Interest rate risk

The Company's interest rate risk primarily arises from its long-term loans. Floating-rate loans expose the Company to cash flow interest rate risk, as changes in market rates directly impact future interest payments. Conversely, fixed-rate instruments may expose the Company to fair value risk, as fluctuations in market interest rates affect the fair value of the hedged instruments. For further details on interest rates, refer to note 24.

The Company’s Financial Risk Management Policy establishes guidelines and rules to hedge against changes in interest rates that impact on the Company’s cash flow. Exposure to each interest rate is projected until the maturity of the assets and liabilities are exposed to this index. Occasionally the Company enters floating to fixed interest rate swaps to manage its cash flow interest rate risk. In the case of loans and financings contracted together with swaps, the Company accounts for them under the fair value option to eliminate the accounting mismatch that would arise if amortized cost were used. Occasionally the Company enters floating to fixed interest rate swaps to manage its cash flow interest rate risk.

(iv) Commodity price risk

The Company's commodity price risk primarily arises from the volatility in the prices of the commodities it produces, including zinc, copper, lead, and the gold and silver contained within these concentrates. Price fluctuations depend on various factors such as global demand, production capacity, inventory levels, commercial strategies adopted by major producers, and the availability of substitutes in the global market. These changes can directly impact the Company's revenue and profitability.

The Company's Financial Risk Management Policy establishes guidelines to mitigate the risk of fluctuations in commodity prices that could impact the Company's cash flows. The exposure to the price of each commodity considers the monthly production projections, inputs purchases, and the maturity flows of hedges associated with them.

Commodity prices hedge transactions are classified into the following hedging strategies:

Hedges for concentrates and metals contained in concentrate sales (Strategic Hedges)

The strategic hedge objective is to reduce the volatility of cash flows due to price fluctuations in London Metal Exchange (LME) prices for zinc, copper, and lead, as well as London Bullion Market Association (LBMA) prices for silver and gold contained within these concentrates. This approach helps ensure a more predictable operating margin.

The hedged items are the proportion of payable metals (zinc, copper, lead, gold, and silver) within the sold concentrates, priced by the London Metal Exchange or the London Bullion Market Association. This strategy can be implemented through the sale of forward contracts or zero-cost collar contracts.

Hedges for mismatches of quotational periods (Book Hedge)

The book hedge objective is to mitigate the risk of mismatches in quotational periods arising between the purchases of concentrate or processed metal and the sale of processed metal. These transactions usually involve the purchases and sales of zinc for future trading on the over-the-counter market.

For this strategy, the hedged items are the percentages of payable zinc contained in the purchased concentrates by the smelters and the percentages of payable zinc contained in the sold metals. Concentrates from integrated own mines, and consequently the metals produced from these concentrates, do not participate in this strategy as they do not bear the risk of mismatches of quotation periods.

Hedge for non-standard price metal sales (Customer Hedge)

The customer hedge objective is to maintain the revenues of a business unit linked to a standard London Metal Exchange (LME) quotational period (QP) price, converting non-standard QPs offered to specific customers to a standard QP. For this strategy, the hedged item is the percentage of payable metal contained in the processed metals sold with the price negotiated on the London Metal Exchange.

(b) Credit risk

Trade receivables, derivative financial instruments, term deposits, bank deposit certificates ("CDBs"), and government securities create exposure to credit risk with respect to the counterparties and issuers. The Company has a policy of making deposits in financial institutions, investment funds and other entities engaged in or providing financial services, such as cash management, funding and working capital management, and derivative transactions, and all eligible counterparties including financial institutions and investment funds that have, at least, a rating from two of the following international rating agencies: Fitch, Moody's or Standard & Poor's, with the Company always applying the most conservative rating available.

The minimum rating required for counterparties is determined as follows:

- Onshore operations:

- (i) at least an "A" rating on the local scale when two or more local ratings exist; or
- (ii) at least an "AA-" rating on the local scale when only one local rating is available; or
- (iii) at least a "BBB-" rating on the global scale when there is no local rating, but two or more global ratings exist; or
- (iv) at least a "BBB+" rating on the global scale when only one global rating is available; or
- (v) if the counterparty does not have a local or global rating or does not meet these minimum criteria, the rating of its immediate parent or ultimate holding company must be used, which must be at least "A" on the global scale from two agencies, or "AA-" from one agency.

Notes to the consolidated financial statements
At and for the year ended on December 31, 2025
All amounts in thousands of US dollars, unless otherwise stated

- Offshore operations:
- (i) at least a “BBB-” rating on the global scale when the counterparty is rated by two or more agencies, or
 - (ii) at least a “BBB+” rating when rated by only one agency; or
 - (iii) rating “BBB-”, or equivalent, on a global scale by two rating agencies.

The prior country-specific exceptions for Peru and Luxembourg were eliminated, as the updated rating matrix provides a unified and comprehensive framework for all jurisdictions. If only a global rating exists, the updated minimum criteria described above shall apply depending on the number of agencies providing the rating. In the case of a counterparty that does not have its own credit rating, the Company must evaluate the rating of its immediate parent company; if the parent does not meet the policy criteria, the rating of the ultimate parent or holding company must be used. Additionally, if a counterparty does not meet the minimum rating requirements but offers a guarantor, the rating of the guarantor may be used, provided that the guarantor satisfies all minimum rating criteria and the guarantee fully covers the Company’s exposure for all types of transactions with the counterparty.

The pre-settlement risk methodology is used to assess counterparty risks in derivative transactions. This methodology uses Monte Carlo simulations to estimate the potential exposure before the settlement date in the event of a counterparty defaulting on the financial commitments defined by contract. The global ratings were obtained from the rating agencies Fitch, Moody’s or Standard & Poor’s ratings and are related to commitments in foreign or local currency, and, in both cases, they assess the capacity to honor these commitments, using a scale applicable on a global basis. Therefore, both ratings in foreign currency and in local currency are internationally comparable ratings.

In the case of credit risk arising from customer credit exposure, the Company assesses the credit quality of the customer, considering mainly the history of the relationship and financial indicators defining individual credit limits, which are continuously monitored.

The Company performs initial analyses of customer credit and, when deemed necessary, guarantees or letters of credit are obtained to mitigate the credit risk. Additionally, most sales to the United States of America, Europe and Asia are collateralized by letters of credit and credit insurance.

The carrying amount of the Company’s financial instruments best represents the maximum exposure to their credit risk.

The following table reflects the credit quality of issuers and counterparties for transactions involving cash and cash equivalents, financial investments and derivative financial instruments. The variations presented are mainly related to the Company's transactions in the year and not to changes in the counterparties’ ratings.

	2025			2024

AAA	1,080	-	1,080	883	-	883
	1,080	-	1,080	883	-	883

(i) Refers to subsidiaries of international financial institutions that do not have a global rating available in the international rating agencies. According to the Company's policy, for these financial institutions, the rating of the financial institution controlling entities is assumed, which must be at least BBB-.

(c) Liquidity risk

Liquidity risk is managed through the Company's Financial Risk Management Policy, which aims to ensure the availability of funds to meet the Company's financial obligations. The main liquidity measurement and monitoring instrument is the cash flow projection, using a minimum projection period of 12 months from the benchmark date. Financial institutions that provide the Company with financial services are within Nexa's rating policies and at the same level of the ones provided for the Company's credit risk.

A substantial part of the confirming payables arrangement is with one financial institution. However, there are other financial institutions that the Company has relations with that could be considered for future supplier financing transactions. If this service is not available, the entity may be required to increase its debt levels which may negatively impact its leverage ratios.

The table below shows the Company's financial obligations to be settled by the Company based on their maturity (the remaining period from the balance sheet up to the contractual maturity date). The amounts below represent the estimated undiscounted future cash flows, which include interests to be incurred and, accordingly, do not reconcile directly with the amounts presented in the consolidated balance sheet.

2025	Less than 1 year	Between 1 and 3 years	Between 3 and 5 years	Over 5 years	Total

	1,017,482	270,682	1,245,465	1,433,001	3,966,630

(d) Capital management

The Company's objectives when managing capital are to safeguard its ability to continue as a going concern, so it can continue to provide returns for shareholders and benefits for other stakeholders, and to maintain an optimal capital structure to reduce the cost of capital.

To maintain or adjust the capital structure, the Company may adjust the dividends level paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt. The Company monitors capital mainly using the leverage ratio, calculated as net debt to Adjusted EBITDA.

Net debt and Adjusted EBITDA measures should not be considered in isolation or as a substitute for net income or operating income, as indicators of operating performance, or as alternatives to cash flow as measures of liquidity. Additionally, management's calculation of Adjusted EBITDA may be different from the calculation used by other companies, including competitors in the mining and smelting industry, so these measures may not be comparable to those of other companies.

	Note	2025	2024	2023
Loans and financings	24 (a)	1,705,984	1,762,633	1,725,566
Derivative financial instruments	16 (a)	(2,341)	(1,484)	2,600
Lease liabilities	23 (b)	121,134	95,899	77,405
Cash and cash equivalents	15 (a)	(515,871)	(620,537)	(457,259)
Financial investments		(5,687)	(19,693)	(11,058)
Net debt (i)		1,303,219	1,216,818	1,337,254
Net income (loss) for the year		223,144	(187,407)	(291,810)
Plus (less):				
Depreciation and amortization	7	288,996	330,198	310,475
Share in the results of associates		(21,143)	(21,223)	(23,536)
Net financial results	10	187,365	369,460	167,058
Income tax expense (benefit)	11 (a)	108,605	115,556	(4,274)
Miscellaneous adjustments	2	(15,088)	107,496	248,128
Adjusted EBITDA (ii)		771,879	714,080	406,041
Leverage ratio (Net debt/Adjusted EBITDA)		1.68	1.70	3.29

(i) Net debt is defined as (a) loans and financings, plus lease liabilities, plus or minus (b) the fair value of derivative financial instruments, less (c) cash and cash equivalents, less (d) financial investments.

(ii) Adjusted EBITDA for capital management calculation uses the same assumptions described in note 2 for Adjusted EBITDA by segment.

13 Financial instruments

Accounting policy

Normal purchases and sales of financial assets are recognized on the trade date – the date on which the Company commits to purchase or sell the asset. Financial assets are initially recognized at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss, if any, are initially recognized at fair value, and transaction costs are expensed in the income statement.

Notes to the consolidated financial statements
At and for the year ended on December 31, 2025
All amounts in thousands of US dollars, unless otherwise stated

Financial assets are derecognized when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all the risks and rewards of ownership. Financial assets at fair value through profit or loss and at fair value through other comprehensive income are subsequently carried at fair value. Financial assets at amortized costs are subsequently measured using the effective interest rate method.

Equity instruments may be irrevocably elected on their initial recognition for their fair value changes to be presented in other comprehensive income instead of in the income statement. Since the objective of the Company's equity instruments is to buy more participation in a project and not sell the investment, they have been classified as fair value through other comprehensive income.

Then, the Company classifies its financial assets and liabilities under the following categories: amortized cost, fair value through profit or loss and fair value through other comprehensive income.

(i) Amortized cost

Financial assets measured at amortized cost are assets held within a business model whose objective is to hold financial assets to collect contractual cash flows and for which the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest ("SPPI") on the principal amount outstanding.

Financial liabilities are measured at amortized cost, except for financial liabilities at fair value through profit or loss such as derivatives and some specific loans and financings.

(ii) Fair value through profit or loss

Financial assets measured at fair value through profit or loss are assets which an entity manages with the objective of realizing cash flows through the sale of such assets and financial assets that do not give rise to cash flows that are SPPI on the principal amount outstanding.

Financial liabilities measured at fair value through profit or loss are liabilities which are not measured at amortized cost, such as derivatives and loans and financings where the fair value option is adopted to eliminate an accounting mismatch that would arise if amortized cost were used. For these loans and financings, the fair value variation related to the Company's own credit risk is recorded in the OCI.

(iii) Fair value through other comprehensive income

Financial assets measured at fair value through other comprehensive income are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and for which the contractual terms of the financial asset give rise on specified dates to cash flows that are SPPI on the principal amount outstanding. Investments in equity instruments are measured at fair value through other comprehensive income as mentioned before.

(a) Breakdown by category

The Company's financial assets and liabilities are classified as follows:

					2025
	Note	Amortized cost	Fair value through profit or loss	Fair value through Other comprehensive income	Total
Assets per balance sheet					
Cash and cash equivalents	15 (a)	515,871	-	-	515,871

Dividends payable		3,707	-	-	3,707
Use of public assets (ii)		18,047	-	-	18,047
Related parties (ii)	20 (a)	4,085	-	-	4,085
		2,503,514	129,454	-	2,632,968

(i) Classified as “Other assets” in the consolidated balance sheet.

(ii) Classified as “Other liabilities” in the consolidated balance sheet.

(iii) Fair value through profit or loss amounts, relates mainly to amounts included in a forfeiting program and sales that are subsequently adjusted to changes in LME prices.

14 Fair value estimates

Critical accounting estimates, assumptions and judgments

The fair value of financial instruments that are not traded in an active market is determined using valuation techniques. The Company uses judgment to select among a variety of methods and makes estimates and assumptions that are mainly based on market conditions existing at the end of each reporting period.

Although management has used its best judgment in estimating the fair value of its financial instruments, any technique for making said estimates and assumptions involves some level of inherent fragility.

(a) Analysis

The main financial instruments and the estimates and assumptions made by the Company for their valuation are described below:

- Cash and cash equivalents, financial investments, trade accounts receivables and other current assets – considering their nature, terms and maturity, the carrying amounts approximate their fair value.
- Financial liabilities – these instruments are subject to usual market interest rates. The fair value is based on the present value of expected future cash disbursements, at interest rates currently available for debt with similar maturities and terms and adjusted for the Company’s credit risk. Loans and financings are measured at amortized cost, except for certain contracts for which the Company has chosen the fair value option.
- Energy forward contracts - part of the fair value of these financial instruments, are estimated based on the published price quotations in the active markets, as far as the data is existent and accessible in the market. The other part is estimated based on the use of valuation techniques that consider: (i) prices established in purchase and sale operations; (ii) supply risk margin; and (iii) projected market price in the period of availability.
- Other financial instruments – the fair value is determined by calculating their present value through yield curves at the closing dates. The curves and prices used in the calculation for each group of instruments are developed based on data from Brazilian Securities, Commodities and Futures Exchange – B3, Central Bank of Brazil, LME and Bloomberg, interpolated between the available maturities. The main derivative financial instruments are:
 - Swap contracts – the present value of both the assets and liabilities are calculated through the discount of forecasted cash flows by the interest rate of the currency in which the swap is denominated. The difference between the present value of the assets and the liabilities generates its fair value.
 - Forward contracts – the present value is estimated by discounting the notional amount multiplied by the difference between the future price at the reference date and the contracted price. The future price is calculated using the convenience yield of the underlying asset. It is common to use Asian non-deliverable forwards for hedging non-ferrous metals positions. Asian contracts are derivatives in which the underlying is the average price of certain asset over a range of days.
 - Option contracts – the present value is estimated based on the Black and Scholes model, with assumptions that include the underlying asset price, strike price, volatility, time to maturity and interest rate.
 - Zero Cost Collar contracts – the present value of both options is estimated based on the Black model, with assumptions that include the underlying asset price, strike price, volatility, time to maturity and interest rate.

(b) Fair value by hierarchy

	Note	Level 1	Level 2 (ii)	2025 Total
Assets				
Other financial instruments	16 (a)	-	36,767	36,767
Trade accounts receivables		-	192,615	192,615

Loans and financings designated at fair value (ii)		-	92,320	92,320
Other financial instruments	16 (a)	-	37,134	37,134
		-	129,454	129,454

- (i) To determine the fair value of the investments in equity instruments, the Company uses the share’s quotation as of the last day of the reporting period.
(ii) Loans and financings are measured at amortized cost, except for certain contracts for which the Company has elected the fair value option.

The Company discloses fair value measurements based on their level on the following fair value measurement hierarchy:

Level 1:

When fair value is calculated with quoted prices (unadjusted) in active markets for identical assets and liabilities traded in active markets at the balance sheet date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm’s length basis. The quoted market price used for financial assets held by the Company is the current bid price.

Level 2:

When fair value is calculated with valuation techniques since the financial instruments are not traded in an active market and all the significant inputs required to identify the fair value of an instrument are observable. Specific valuation techniques used to value financial instruments include:

- Quoted market prices or dealer quotes for similar instruments are used where available;
- The fair values of interest rate swaps are calculated at the present value of the estimated future cash flow based on observable yield curves; and
- The fair value of forward foreign exchange contracts is determined using forward exchange rates at the balance sheet date, with the resulting value discounted to present value.

Other techniques, such as discounted cash flows analysis, are used to determine the fair value of the remaining financial instruments.

Level 3:

When fair value is calculated with inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs). As of December 31, 2025, there were no financial assets and liabilities carried at fair value classified as Level 3.

(c) Investments in equity instruments - Equity interest in Tinka Resources

In 2021, the Company acquired 9.0% of the issued and outstanding common shares of Tinka Resources Limited (“Tinka”), an exploration and development company that holds 100% of the Ayawilca zinc-silver project in Peru.

On May 31, 2022, the Company subscribed to 40,792 thousand additional common shares in a private transaction at approximately USD 0.17 (CAD 0.22) per share, totaling USD 7,000 (CAD 8,974 thousand). Subsequently, on December 17, 2024, the Company subscribed to a further 9,859 thousand common shares at approximately USD 0.07 (CAD 0.10) per share, totaling USD 700 (CAD 986 thousand).

Following these transactions, the Company held 19.86% of Tinka’s outstanding common shares (81,202 thousand shares) and 4,930 thousand warrants to acquire additional common shares.

On September 29, 2025, Tinka announced the consolidation of its common shares on a five-for-one basis, following approval by the TSX Venture Exchange. After the consolidation, the Company continued to hold 19.86% of Tinka’s outstanding common shares, totaling 16,240,442 post-consolidation shares.

On October 6, 2025, Tinka completed a non-brokered private placement issuing 51,918,181 units, each consisting of one common share and one-half of one common share purchase warrant. The Company did not participate in this offering, resulting in the dilution of its interest to 12.15% as of December 31, 2025, while maintaining ownership of 16,240,442 shares.

Consistent with the accounting policy applied to the original 2021 acquisitions, the investment in Tinka continues to be measured as an equity instrument at cost on initial recognition and subsequently measured at fair value through other comprehensive income.

15 Cash and cash equivalents

Accounting policy

Cash and cash equivalents include cash, bank deposits, and highly liquid short-term investments (investments with an original maturity of less than 90 days), which are readily convertible into a known amount of cash and subject to an immaterial risk of changes in value. Bank overdrafts are shown within Loans and financing in current liabilities in the balance sheet.

(a) Composition

	2025	2024
Cash and banks	383,994	424,258
Term deposits	131,877	196,279
	515,871	620,537

16 Other financial instruments

Accounting policy

Derivatives are initially recognized at fair value as at the date on which a derivative contract is entered into and are subsequently measured at fair value. Derivatives are only used for risk mitigation purposes and not as speculative investments. When derivatives do not meet the hedge accounting criteria, they are classified as held for trading and accounted for at fair value through profit or loss.

For derivatives that meet the hedge accounting criteria, the Company documents at the inception of the hedging transaction of the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking the hedge transactions. The Company also documents its assessment, both at hedge inception and on an ongoing basis, whether the derivatives that are used in hedging transactions and accounted for as hedge accounting were, and will continue to be, highly effective in offsetting changes in the fair value or cash flow of hedged items.

(i) Derivative financial instruments designated as cash flow hedge

Derivatives are classified as cash flow hedges when they are linked to a highly probable forecast transaction. The Company applies this classification to its concentrate sales hedging program (“Strategic Hedge”) and certain strategies related to its mismatches of quotational period (“QP”) hedging program (“Book Hedge”).

The hedge ratio is 1:1 for both hedging programs, as the quantity of purchase or sales designated as being hedged matches the notional amount of the hedging instrument. Since these operations involve highly probable future purchase and/or sales that are not yet recognized, the related risk stems from the volatility of cash flows; therefore, the exposure is treated exclusively as a cash flow hedge.

The Company assesses, on an ongoing basis, that a clear economic relationship exists between the hedging instruments and the hedged items, and that the hedge ratios applied are consistent with its risk management strategy.

Notes to the consolidated financial statements
At and for the year ended on December 31, 2025
All amounts in thousands of US dollars, unless otherwise stated

Derivative financial instruments are initially recognized at fair value on the trade date and subsequently measured at fair value at each reporting date.

For qualifying cash flow hedges:

- the effective portion of changes in the fair value of the hedging instruments is recognized in Other Comprehensive Income (OCI) and accumulated in equity; and
- the amounts accumulated in equity are reclassified to income statement in the same period(s) and during which the hedged forecast gold and silver sales affect income statement, while gains or losses related to the non-effective portion are immediately recognized as “Other income and expenses, net” in the income statement.

When a hedging instrument expires, is sold or no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in shareholders’ equity at that time remains in shareholders’ equity and is recognized when the forecast transaction is ultimately recognized in the income statement. When a forecasted transaction is no longer expected to occur, the cumulative gain or loss that was previously accounted in shareholders’ equity is immediately transferred to the income statement within “Other income and expenses, net”.

Any ineffective portion, if any, is recognized immediately in the income statement.

The main sources of hedge ineffectiveness identified:

- Changes in the hedged item, such as modifications in the estimates of future cash flows related to customer revenues.
- Forecast projections of purchases and sales at the time of hedge contracts that later prove to be different from what was actually purchased/sold.
- Variations in the counterparty’s credit risk, which may impact its ability to meet contractual obligations.
- Differences between the hypothetical derivative and the actual hedging instrument (ZCC), which may lead to mismatches in fair value measurement or in the underlying risk dynamics.

No significant hedge ineffectiveness is expected in the Strategic Hedge program, as we have secured up to 60% of the monthly forecasted sales (ex-streaming) for the year 2026 for Nexa Peru. This provides a considerable margin of error in the forecasted volumes for 2026. However, for the Book Hedge program, some ineffectiveness may occur because for certain QPs in some delivery months, we secure 100% of the monthly forecasted purchases/sales. Any ineffective portion is recognized immediately in the income statement.

(ii) Derivative financial instruments designated as fair value hedge

Derivatives that are designated for hedge accounting recognition are qualified as fair value hedges when they are related to assets or liabilities already recognized in the consolidated balance sheet.

Changes in the fair values of derivatives that are designated and qualify as fair value hedges and changes in the fair value of the hedged item are recorded in the income statement in the same period.

Currently, the Company does not have any derivatives designated as fair value hedge.

(iii) Derivatives financial instruments not designated as hedge accounting

Changes in the fair value of derivative financial instruments not designated as hedge accounting are recognized in the income statement in the line affected by the related transaction.

(iv) Energy forward contracts

The Company, through its energy subsidiaries, is an energy self-producer and authorized to sell energy both in the free and regulated markets as Energy Traders. A portion of these transactions involve contracts for delivery of energy for internal use to meet production demands and are not therefore classified as financial instruments.

Another portion of these transactions consists of sales of energy not used in production process. These transactions take place in an active market and meet the definition of financial instruments, because they are settled in energy and readily convertible into cash. Such contracts are recorded as derivatives and are recognized in the Company's balance sheet at fair value on the date the derivative is entered and subsequently revalued at their fair values at the reporting date. The fair value recognition and realization of these financial instruments are recorded under "Other income and expenses, net".

The fair values of these derivatives are estimated partly based on price quotes in active markets, as long as such market data exists, and partly through the use of valuation techniques, which consider: (i) prices established in the purchase and sale operations; (ii) the risk margin on the supply; and (iii) the projected market price during the period of availability. Whenever the fair value upon initial recognition for these contracts differs from the transaction price, a loss or gain on the fair value is recognized in the profit or loss for the year. The transactions carried out by the company Pollarix S.A. and Nexa Energy Comercializadora de Energia Ltda in the Free Contracting Environment ("ACL") resulted in a gain from the sale of surplus energy, which was recognized at its fair value on the transaction date.

(v) Offtake agreement

On January 25, 2022, the Company signed an offtake agreement with an international offtaker (the "Offtaker") a subsidiary of a BBB rated company, in which it agreed to sell 100% of the copper concentrate to be produced by Aripuanã for a 5-year period up to a total of 30,810 tons, at the lower of current spot market prices or a price cap. In July 2023, the contract was amended, including provisions for additional deliveries and time extension until Nexa fulfills the delivery of the originally agreed-upon volumes. The transaction price is the lower of current market prices or a price cap, from the most updated schedule of copper concentrates deliveries. The Company began deliveries of copper concentrates in June 2023.

The offtake agreement resulted from negotiations with the Offtaker to sell the copper concentrate in lieu of paying future royalties related to the previous acquisition of the Aripuanã project mining rights from the Offtaker. The amount of USD 46,100, representing the fair value of the agreement at its inception date, was recognized as an intangible asset and is being amortized over the life of the mine according to the Units of Production ("UoP") method.

Additionally, the Company opted to voluntarily and irrevocably designate the entire offtake agreement at fair value through profit and loss within the scope of IFRS 9, rather than separate the value of the embedded derivative associated with the price cap, recognizing a non-cash accumulated loss of USD 49,254 as of December 31, 2025 (gain as of December 31, 2024: USD 3,347), due mainly to significant variation in the copper price projection, as disclosed in Note 9.

(a) Composition

				2025

Other financial instruments, net	1,484	(19,666)	(13,670)	(31,852)

(i) On December 31, 2025, due to the current scenario of high energy supply in Brazil, the Company has a projected energy surplus on forward contracts with some suppliers. Consequently, the Company recognized the fair value arising from the mark-to-market of current purchase until 2026, which resulted in an income in the amount of USD 9,608. This amount was accounted for as an income within "Other income and expenses, net" (Note 9) and will vary according to the market's energy prices.

(b) Derivative financial instruments: Fair value by strategy

			2025		2024
Strategy	Per Unit	Notional	Fair value	Notional	Fair value

Interest rate risk					
IPCA vs. CDI	BRL	100,000	(421)	100,000	(168)
CDI vs. USD (i)	BRL	650,000	7,642	-	-
			7,221		(168)
			2,341		1,484

(i) On December 16, 2025, the Company implemented a new gold and silver revenue hedge program using Zero Cost Collar ("ZCC") derivative instruments as part of its commodity risk management strategy. This was done to reduce the Peru operations' exposure to commodity price risk in 2026 and to protect its margins. The ZCC have monthly maturities until December 2026, in line with the forecast volume percentages provided by the commercial team. A ZCC involves simultaneously buying and selling options to limit exposure to adverse price movements of commodities while capping potential gains within a predefined range.

(ii) On March 28, 2025, NEXA executed a cross-currency swap with a notional amount of USD 112,652 (BRL 650,000 at the transaction date) to hedge the BRL exposure related to Nexa BR debentures issued on April 2, 2024, in the same BRL amount. The swap mirrors the interest and principal payment terms of the debentures, which mature on March 28, 2030, with semi-annual payments. Under the agreement, NEXA pays 6.209% on the USD notional receives CDI + 1.50% p.a. floating on the BRL notional. This instrument is recognized at fair value through profit or loss (FVTPL) under net financial results. Since inception, the Company has recorded increased impacts from changes in BRL exposure on related assets and liabilities, compared to December 2024, as presented in Table A above.

(c) Derivative financial instruments: Changes in fair value - At the end of each year

Energy forward contracts (Megawatts)		-	-	(95,314)	58,621
Balance at the end of year		(5,558)	(13,670)		

(e) Offtake agreement measured at FVTPL: Changes in fair value

		2025	2024	Notional (tons) 2025	Notional (tons) 2024
Balance at the beginning of the year		(19,666)	(19,565)	22,288	27,562
Changes in fair value (i)		(49,254)	(3,347)	-	-
Deliveries of copper concentrates (ii)		-	-	(3,626)	(5,274)
Price cap realized (iii)		5,011	3,246	-	-
Balance at the end of year		(63,909)	(19,666)	18,662	22,288

(i) Changes in fair value increased for future deliveries, due to a higher forward copper price in the long term.

(ii) Since June 2023, the Company is delivering copper concentrates under an offtake agreement with an offtaker signed in January 2022 (amended in July 2023) to sell 100% of the copper concentrate produced by Aripuanã for 5 years or until NEXA fulfills the delivery of the specified agreed volume. The Company estimates that the full committed copper volumes will be delivered until the end of 2028. The transaction price agreed with the offtaker is below current market prices due to a price cap established in this agreement.

(iii) During 2025, copper prices exceeded the price cap, leading to a reduction in the financial instrument liability associated with these sales transactions. Revenue was recognized based on the fair value of the instruments.

17 Trade accounts receivables

Accounting policy

Trade accounts receivables are amounts due from customers for goods sold or services provided in the ordinary course of the Company's business.

Notes to the consolidated financial statements
At and for the year ended on December 31, 2025

All amounts in thousands of US dollars, unless otherwise stated

Trade accounts receivables are recognized initially at fair value and subsequently measured at:

(i) Fair value through profit or loss when they are related to the Company's accounts receivables portfolio outstanding at the balance sheet date that is designated at inception to be included in a forfaiting program whereby the Company, at its discretion, can discount certain outstanding trade accounts receivables and receive payments in advance. The program is used to meet short-term liquidity needs. Trade accounts receivables within this program are derecognized since all risks and rewards, control of the assets and contractual rights to receive the assets cash flows are transferred to the counterparty.

(ii) Fair value through profit or loss when they are related to sales that are subsequently adjusted to changes in LME prices, which are recorded in net revenues. These accounts receivable do not meet the SPPI criteria because there is a component of commodity price risk that modifies the cash flows that otherwise would be required by the sales contract.

(iii) Amortized cost using the effective interest rate method, less impairment, when the receivables do not meet the aforementioned classifications.

Credit risk can arise from non-performance by counterparties of their contractual obligations to the Company. To ensure an effective credit risk evaluation, management applies procedures related to the application for credit granting and approvals, renewal of credit limits, continuous monitoring of credit exposure in relation to established limits and events that trigger requirements for secured payment terms. As part of the Company's process, the credit exposures with all counterparties are regularly monitored and assessed.

The Company applies the IFRS 9 simplified approach to measure the impairment losses for trade accounts receivables. This approach requires the use of the lifetime expected credit losses on its trade accounts receivables measured at amortized cost. To calculate the lifetime expected credit losses the Company uses a provision matrix and forward-looking information. The additions to impairment of trade accounts receivables are included in selling expenses. Trade accounts receivables are generally written off when there is no expectation of recovering additional cash.

(a) Composition

	2025	2024

	228,588	140,793

18 Inventory

Accounting policy

Inventory is stated at the lower of the cost and the net realizable value. Cost is determined using the weighted average cost method. The cost of finished goods and work in progress comprises raw materials, direct labor, other direct costs and related fixed production overheads (based on normal operating capacity). The normal operating capacity is supported by the historical annual production. The idle capacity cost is calculated considering the reduction in the level of production due to unusual events and the level of production not achieved in the ramp-up period. Variable production overhead costs are included in inventory costs based on the actual production level. Imports in transit are stated at the accumulated cost of each import. At the end of the reporting period, the net realizable value of inventories is assessed and a provision for non-realizable losses on obsolete or slow-moving inventory may be recognized.

The provision for net realizable value is estimated considering the current selling price in the ordinary course of business, less any additional selling expenses. The write-downs and reversals are recognized within Cost of sales.

A provision for obsolete inventory, finished products, semi-finished products, raw materials and auxiliary materials is recognized when items cannot be used in normal production or sold because they are damaged or do not meet the Company's specification and is recognized as "Other income and expenses".

Slow-moving provision is recognized for inventory items that are in excess of the expected normal use or sale. The amount of slow-moving provision recognized is determined based on 20% of the carrying amount for each six-month period without use or sale and is recognized as "Other income and expenses".

(a) Composition

	2025	2024
Finished products	139,488	126,916
Semi-finished products	120,155	94,980

Divestments	-	1,943
Balance at the end of year	(54,185)	(39,717)

19 Other assets and other liabilities

(a) Other assets

	2025	2024
Tax claim payments (i)	125,670	64,656
Other recoverable taxes (ii)	102,187	103,261
Prepaid expenses	9,364	7,945
Judicial deposits	9,221	13,912
Advances to third parties	3,624	7,575
Other assets	38,586	26,572
	288,652	223,921
Current assets	77,225	88,195
Non-current assets	211,427	135,726

(i) This amount mainly consists of USD 102,147 related to tax claim payments concerning withholding taxes and litigation over transfer pricing adjustments in transactions with related parties (USD 64,656 in December 2024), and — USD 20,532 related to income tax claim payments arising from the interpretation of the application of Cerro Lindo’s stability agreement for the 2018 fiscal year (USD 18,300 in December 2024). Both payments stem from ongoing legal discussions, in which the Company has not recognized any provision, but was required to "settle the payment" to continue pursuing the matters at judicial levels. The payments were made in Peruvian soles and are subject to exchange rate fluctuations against the US dollar.

(ii) Other recoverable taxes are composed mainly of tax credits related to ICMS (Tax on Circulation of Goods and Services), primarily generated from purchases. Additionally, there are PIS (Social Integration Program) and COFINS (Contribution to Social Security Financing) credits, essentially arising from the acquisition of fixed assets.

(b) Other liabilities

	2025	2024
Advances from customers (i)	79,205	76,395
Other tax liabilities (ii)	70,292	52,978
Use of public assets	18,808	18,047
Other trade payables	18,720	20,921
Other liabilities	19,078	17,915
	206,103	186,256
Current liabilities	143,834	120,236
Non-current liabilities	62,269	66,020

(i) On December 17, 2025, the Company entered into a second commercial advance agreement with a customer, in which it agreed to sell concentrates produced by El Porvenir for twelve months period and received an advance payment of USD 50,000. The advance payment was recorded as “Other liabilities”, and the related revenues will be recognized upon delivery of the concentrates, when the corresponding performance obligations are satisfied. (As of December 31, 2024: USD 50,000 received under a similar commercial advance agreement).

(ii) Other tax liabilities are composed of various taxes arising from the Company's operations, including amounts related to COFINS, PIS and ICMS, mainly associated with routine operational activities, as well as ISS (Service Tax) applicable to service-related transactions. The balance also includes Other Taxes, Duties and Contributions, which comprise- ancillary and nonrecurring charges, together with Mining Special Tax and Fees and other regulatory charges classified as Various Taxes. Additionally, it includes amounts related to Mining Rights resulting from specific legal obligations associated with mining activities, and VAT Payable, arising from transactions subject to value-added tax in certain -jurisdiction.

(c) Brazilian Tax reform

In 2025, the Tax Reform was regulated by Complementary Law No. 214 for Brazilian entities, which establishes the gradual replacement of current taxes by the Goods and Services Tax (IBS) and the Contribution on Goods and Services (CBS).

Considering that the transition period is expected to begin in 2026, Management has assessed that there are no material impacts to be recognized in the Financial Statements for the year ended December 31, 2025.

Management continues to perform assessments of the potential impacts of the Tax Reform on its operations, including tax, accounting and operational aspects, as well as to evaluate and implement the necessary system and process adjustments to ensure the Company’s appropriate adaptation to the new tax framework.

20 Related parties

The Company’s related parties are subsidiaries, joint ventures, associates, shareholders and its related entities and key management personnel of the Company.

(i) Scotiabank Peru S.A.A., an entity for which one member of the Company’s Board of Directors serves as an independent chairman and may have significant influence, has transactions with Nexa related to leasing and confirming operations. The outstanding balances arising from these transactions as of December 31, 2025, amounted to USD 8,667 (2024: USD 5,404) for leasing operations and USD 55,199 (2024: USD 24,812) for confirming operations. Confirming operations consist of arrangements whereby payments otherwise due to suppliers are settled through the bank. In addition, purchase transactions presented in chart (b) above relate to interest expenses on lease contracts.

(ii) Nexa entered into contracts with Consórcio Construtor Nova Aripuanã (a consortium of Andrade Gutierrez group companies) for construction and operational services related to the Aripuanã project. At that time, a close family member of one of the Company’s board members was considered to have significant influence on the holding level of Andrade Gutierrez. In mid-2024, the board member associated with this entity terminated their contract with Nexa, and Andrade Gutierrez ceased to be regarded as a related party.

(c) Key management compensation

Key management includes the members of the Company's global executive team and Board of Directors. Key management compensation, including all benefits, was as follows:

	2025	2024
Short-term benefits	8,061	7,713
Other long-term benefits	457	116
	8,518	7,829

Short-term benefits include fixed compensation, payroll charges and short-term benefits under the Company’s variable compensation program. Other long-term benefits relate to the variable compensation program.

21 Property, plant and equipment

Accounting policy

Property, plant and equipment are stated at their historical cost of acquisition or construction less accumulated depreciation and any recognized impairment losses. Historical cost includes expenditures that are directly attributable to the acquisition and construction of the assets. The mining projects development costs that are registered within Property, plant and equipment include (i) direct and indirect costs attributed to building the mining facilities; (ii) financial charges incurred during the construction period; (iii) depreciation of other fixed assets used during construction; and (iv) estimated decommissioning and site restoration expenses.

Subsequent costs are included in the asset’s carrying amount, or recognized as a separate asset as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and they can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to the income statement during the reporting period in which they are incurred.

Replacement costs are included in the carrying amount of the asset when it is probable that the Company will realize future economic benefits in excess of the benefits expected from the asset in its current condition. Replacement costs are depreciated over the remaining useful life of the related asset.

Land is not depreciated. Depreciation of other assets is calculated using the straight-line method to reduce their costs to their residual values over their estimated useful lives.

The assets' residual values and useful lives are reviewed annually and adjusted if appropriate.

An asset carrying amount is reduced to its recoverable amount when it is greater than the estimated recoverable amount, in accordance with the criteria adopted by the Company to determine the recoverable amount.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognized within “Other income and expenses, net” in the income statement.

Loans and financings costs directly related to the acquisition, construction or production of a qualifying asset that requires a substantial period of time to prepare for its intended use or sale are capitalized as part of the cost of that asset when it is probable that future economic benefits associated with the item will flow to the Company and costs can be measured reliably.

Stripping costs

In its surface mining operations, the Company must remove overburden and other waste to gain access to mineral ore deposits. The removal process is referred to as stripping. During the development of a mine, before production commences, when the stripping activity improves access to the ore body, the component of the ore body for which access has been improved can be identified and the costs can be measured reliably, a stripping activity asset is capitalized as part of the investment in the construction of the mine and is accounted for as part of Property, plant and equipment within assets and projects under construction. Subsequently, when the operation starts, the stripping costs are transferred to “Dams and Buildings” and are depreciated by a linear calculation considering the asset’s useful life.

Stripping costs incurred during the production phase of operations are treated as production costs and are part of the inventory cost.

Mining Projects

The Company starts to capitalize a project’s mineral exploration and evaluation costs at the beginning of its feasibility study phase, following completion of a pre-feasibility study in which probability of economic feasibility has been established and where there is sufficient geologic and economic certainty of converting mineral resources into proven and probable mineral reserves at a development stage (construction or execution phase) or production stage based on various factors including the known geology, metallurgy and life-of-mine (“LOM”) plans.

Capitalized costs incurred during a project’s mineral exploration and evaluation stages are classified within Mining projects, under Property, plant and equipment until the project starts its development stage and are only depreciated by the UoP method once the development stage finishes and the project’s operation start.

Costs incurred during a project’s development stage are also capitalized under Property, plant, and equipment but within Assets and projects under construction. In this way, the capitalized mineral exploration and evaluation costs will remain within Mining projects and will only be depreciated by the UoP method once the development stage finishes and the project’s operation starts.

Once the development stage is finished and the project’s operation starts, the capitalized development costs are reclassified to the appropriate group of assets considering their nature and are depreciated on a linear calculation based on the assets’ useful life.

Based on the above, once a project begins operation, there will be depreciation coming from the project’s capitalized mineral exploration and evaluation costs within the Mining projects account and based on the UoP method and from the project’s capitalized development costs within the corresponding group of assets based on their useful life.

The carrying value of the capitalized mineral exploration and evaluation costs, which remain within Mining projects, and the capitalized development costs, which are within Assets and projects under construction, of the projects are assessed for impairment at least annually or whenever evidence indicates that the assets may be impaired in accordance with IFRS 6 and IAS 36. If the Company decides at any moment to discontinue the project, this could be an impairment indicator that will be assessed under the impairment test. For purposes of this impairment assessment, the projects are allocated to cash generating units (“CGUs”) when applicable. The annual impairment test is disclosed in note 31.

Notes to the consolidated financial statements
At and for the year ended on December 31, 2025
All amounts in thousands of US dollars, unless otherwise stated

Refer to note 8 for the Company’s accounting policy related to expensed mineral exploration and project evaluation costs for mining projects.
Costs to acquire exploration legal mining rights are included as Intangible within Rights to use natural resources as explained in note 23.

Asset retirement obligations

An asset retirement obligation is an obligation related to the permanent removal from service of a tangible long-lived asset that results from the acquisition, construction or development, or the normal operations of a tangible long-lived asset. At the initial recognition of an asset retirement obligation and at the periodical revisions of the expected disbursements and the discount rate, the changes in the liability are charged to Property, plant and equipment.
The capitalized amount recognized in Property, plant and equipment is depreciated based on the UoP method. Any reduction in the provision that exceeds the carrying amount of the asset, is immediately recognized in the income statement as “Other income and expenses, net.”

Impairment

Refer to note 31 for the Company’s accounting policy related to impairment of Property, plant and equipment.

(i) Only mining projects of the operating unit Atacocha are being depreciated under the UoP method.

22 Intangible assets

Accounting policy

Goodwill

Goodwill arising from business combinations is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net assets acquired. Goodwill is not amortized but is tested for impairment annually and whenever circumstances indicate that the carrying amount may not be recovered. Refer to note 31 for the Company's impairment accounting policy and critical estimates and assumptions and judgments.

Rights to use natural resources

The significant costs incurred for the acquisition of legal rights to explore mining concessions and develop mineral properties are capitalized and are amortized as production costs when the associated projects start their commercial operation using the UoP method over their useful lives. Useful lives consider the period of extraction for both mineral reserves and mineral resources, which includes a portion of the Company's inferred resources in the Company's mining operations. The costs for the acquisition of legal rights attributed to mining projects are not depreciated until the project becomes operational and production activities start.

The costs incurred are impaired if the Company determines that the projects and their mineral rights associated have no future economic value. For purposes of impairment assessment, rights to use natural resources are allocated to CGUs. Refer to note 31 for the Company's impairment accounting policy.

Critical accounting estimates, assumptions and judgments - Quantification of mineral reserves and resources for useful life calculation

The Company classifies proven and probable reserves, and measured, indicated and inferred resources based on the definitions of the United States Securities and Exchange Commission's (SEC) Modernized Property Disclosure Requirements for Mining Registrants as described in Subpart 229.1300 of Regulation S-K, Disclosure by Registrants Engaged in Mining Operations (S-K 1300) and Item 601 (b)(96) Technical Report Summary.

The useful life determination applied to the rights to use natural resources reflect the pattern in which the benefits are expected to be derived by the Company and is based on the estimated life of mine ("LOM"). Any changes to the LOM, based on new information regarding estimates of mineral reserves and mineral resources and mining plan, may affect prospectively the LOM and amortization rates.

The estimation process of mineral reserves and mineral resources is based on a technical evaluation, which includes geological, geophysics, engineering, environmental, legal and economic estimates and may have relevant impact on the economic viability of the mineral reserves and mineral resources. These estimates are reviewed periodically, and any changes are reflected in the expected LOM. Management is confident based on testing, continuity of the ore bodies and conversion experience that a part of the inferred resources will be converted into measured and indicated resources, and if they are economically recoverable, and such inferred resources may also be classified as proven and probable mineral reserves. Where the Company can demonstrate the expected economic recovery with a high level of confidence, inferred resources are included in the amortization calculation.

However, the future conversion of inferred resources is inherently uncertain and involves estimates, assumptions and judgments that could have a material impact on the Company's results of operations.

(i) As of December 31, 2025, the Company's recognized goodwill balances were as follows: USD 95,411 (2024 - USD 95,087) allocated to Cajamarquilla CGU, USD 4,374 (2023 - USD 3,887) allocated to Juiz de Fora, and USD 206,423 (2024 - USD 206,423) allocated to the Mining Peru group of CGUs.

23 Right-of-use assets and lease liabilities

Accounting policy

Right-of-use assets represent the right to use an underlying asset for the lease term and lease liabilities represent the Company's obligation to make lease payments arising from the lease.

Lease terms are negotiated on an individual asset basis, and contractual provisions contain a wide range of different terms and conditions. The lease agreements do not impose any covenants, but leased assets may not be used as security for borrowing purposes.

The Company accounts for non-lease components such as service costs separately, whenever applicable. The Company's lease terms may include options to extend or terminate the lease and when it is reasonably certain that we will exercise that option, the financial effects are included in the contract's measurement.

Payments associated with short-term leases, and all leases of low-value assets, are recognized on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less without a purchase option.

**Measurement**

Liabilities arising from a lease contract are initially measured on a present value basis, using the incremental borrowing rate approach. The incremental borrowing rate is determined by the Company based on equivalent financial costs that would be charged by a counterparty for a transaction with the same currency and a similar amount, term and risk of the lease contract. The finance cost charged to the income statement produces a constant periodic rate of interest over the lease term. On December 31, 2025, incremental borrowing rate were between 7,90% to 16,50% for Brazil; 2,85% to 9,53% for Peru and 5,00% for Luxembourg.

Lease contracts are recognized as a liability with a corresponding right-of-use asset at the date at which the leased asset is available for use by the Company. The right-of-use asset also includes any lease payments made, and it is amortized over the shorter of the asset's useful life and the lease term on a straight-line basis. Amortization expenses are classified either in "Cost of sales" or "Administrative expenses" based on the designation of the related assets.

When the lease liability is remeasured, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Non-current liabilities	75,618	63,152

24 Loans and financings

Accounting policy

Loans and financings are initially recognized at fair value, net of transaction costs incurred, and are subsequently measured at amortized cost, unless they are designated as fair value option, if necessary to eliminate the accounting mismatch that would arise if amortized cost were used. Any difference between the proceeds (net of transaction costs) and the total amount payable is recognized in the income statement as interest expense over the period of the loans using the effective interest rate method, except for the loans measured at fair value.

Loans and financings are classified as current liabilities unless the Company has the unconditional right to defer repayment of the liability for at least 12 months after the reporting period.

Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the drawdown occurs.

To the extent that there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a prepayment for liquidity services and amortized over the period of the facility to which it relates.

Interest in loans and financings		27,232					

(b) Loans and financing transactions during the year ended on December 31, 2025

On April 8, 2025, the Company completed a bond offering of USD 500,000 for a term of 12 years at an interest rate of 6.60% per year. The proceeds were used to fully repurchase the 2027 Senior Notes and partially repurchase the 2028 Senior Notes through a combination of a tender offer and a make-whole call, executed on April 8 and May 23, 2025, respectively. The Company repurchased USD 215,496 (100%) of the 2027 Notes and USD 289,483 (72.3%) of the 2028 Notes.

The total disbursement for these transactions amounted to USD 527,911, comprising USD 504,979 of principal, USD 6,977 in accrued interest, USD 15,046 in premium, USD 909 in agent fees and other related costs, and USD 1,905 in loss on bond repurchase related to the write-down of debt issuance costs, resulting in a total loss of USD 17,860 recognized in profit or loss for the period. The redemption price was determined based on the greater of par value or the present value of future cash flows, discounted at the US Treasury rate plus 50 basis points, plus accrued interest. Following the transactions, the remaining outstanding principal of the 2028 Notes was USD 111,018.

On May 13, 2025, to strengthen its short-term liquidity position, the Company entered an ACC with a top-tier financial institution for a principal amount of USD 40,000 (BRL 223,700), at an annual interest rate of 5.35%. The loan had a six-month maturity and was settled in a single installment upon submission of export documentation as defined in the debt agreement. Upon maturity, the Company fully settled the ACC, repaying the principal amount and USD 1,070 in accrued interest.

Notes to the consolidated financial statements
At and for the year ended on December 31, 2025

All amounts in thousands of US dollars, unless otherwise stated

Following this settlement, no outstanding balance remains under this facility.

On December 29, 2025, the Company made a partial repayment of its Export Credit Note maturing in 2027, which originally had an outstanding principal balance of USD 90,000. The Company repaid USD 60,000 of principal, together with USD 1,080 of accrued interest associated with the repaid portion. Following this transaction, as of December 31, 2025, the remaining outstanding balance of the Export Credit Note amounted to USD 30,550 in principal amount, plus the related accrued interest.

(c) Changes in the year

	2025	2024
Balance at the beginning of the year	1,762,633	1,725,566
New loans and financings	542,414	799,439
Debt issue costs	(4,931)	(7,577)

(h) Guarantees and financial covenants

The Company had certain loans and financings that are subject to specific financial covenants at a consolidated level, including: (i) leverage ratio; (ii) capitalization ratio; and (iii) debt service coverage ratio.

During 2025, the Company had engaged in negotiations with BNDES and, on December 22, 2025, the Company signed a letter with BNDES ("the Letter") authorizing: (i) the waiver of the financial covenants applicable to the fiscal year ended December 31, 2025, and (ii) the replacement of such covenants with a new contractual obligation to maintain a minimum corporate credit rating. The waiver and replacement of such covenants are already in place as of December 31, 2025, although the corresponding amendments to the loan agreements are expected to be executed within 120 days from the issuance of this Letter.

Pursuant to the Letter, the former financial ratio covenants were substituted with minimum global-scale corporate credit ratings as follows: (i) Fitch Ratings: BB+, and (ii) Moody's: Ba3.

As of December 31, 2025, the Company was in compliance with these ratings, and management has not identified any conditions indicating a potential downgrade below the required levels. Accordingly, the previous covenant requirements no longer affect the loan's classification or maturity profile.

The substitution of the former financial ratios for a minimum rating covenant does not alter the economic substance of the financing arrangement. From the issuance of the Letter onwards, early repayment may only be triggered if the Company fails to maintain the required ratings, subject to applicable contractual cure periods. Accordingly, only the portion of the BNDES financing that was originally scheduled for settlement within twelve months after December 31, 2025 is classified as a current liability, with the remaining balance classified as a non-current liability.

25 Trade Payables

Accounting policy

Trade payables represent liabilities for goods and services that were provided to the Company before the end of the financial year, which are unpaid. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. These amounts are recognized initially at their fair value and subsequently measured at amortized cost using the effective interest method.

(a) Composition

	2025	2024
Trade payables	487,543	434,672
Related parties – note 20 (a)	12,482	8,616
	500,025	443,288

26 Confirming Payables

Accounting policy

The Company has contracts with some suppliers whose commercial payment varies between 60 and 180 days, which can be negotiated individually with the supplier and reach 210 days, without any additional guarantees in these contracts, the supplier has the option to request a bank to advance the payment of their commercial invoice within 180 days, before the invoice matures. As a result of those contracts between the suppliers and the bank, the commercial terms agreed with the Company do not change. In accordance with the commercial agreement, the supplier communicates to the Company its interest in selling the invoice to the bank, and it is only the supplier who can decide to sell its invoice at any time during the commercial period. With this option, suppliers can improve their working capital position with advance receipt. The bank pays the supplier with an interest discount rate and the Company assumes part of the interest payment to the supplier. In certain cases, the supplier assumes the integral payment of interest. While the nature of the trade payable does not change, the Company believes that the separate presentation of these accounts within “Confirming payables” is relevant to the understanding of the Company's financial position.

Based on concepts of IFRS 9, the Company assesses whether the payment term extension arrangement substantially modifies the original liability based on qualitative and quantitative assessments. If the original liability has not been substantially modified, the original liability remains and is disclosed as “Confirming Payable”. If the original liability has been substantially modified, the Company derecognizes the original liability (confirming payables) and recognizes a new financial liability as “Other financial liabilities”. Any gain/loss is recognized in the “Income Statement”.

The Company concluded that for December 31, 2025, the transactions maintain their essence as “confirming payables” taking into consideration Nexa’s assessment policy.

Payments of the principal amounts and interest reimbursements are presented within the “operating activities group” in the Company's cash flow statement, in accordance with IAS 7, as the Company classifies the actual transactions as confirming payable.

(a) Carrying amount of financial liabilities

	2025	2024
Confirming payables	415,388	268,175

As of December 31, 2025, financial institutions have paid the total amount of confirming payables to the suppliers.

(b) Range of payments due dates

	2025 Days after invoice	2024 Days after invoice
Liabilities that are part of confirming payables	60 - 210	60 - 210
Comparable trade payables that are not part of a confirming payable	30 - 120	30 - 120

(c) Non-cash changes

There were no business combinations or material foreign exchange differences in either period.

27 Asset retirement, restoration and environmental obligations

Accounting policy

Provision for asset retirement obligations include costs for restoration and closure of the mining assets and is recognized due to the development or mineral production, based on the net present value of estimated closure costs. Other restoration obligations regarding the de-characterization of their structures includes estimated mandatory costs as required by the Brazilian Government. Management uses its judgment and previous experience to determine the potential scope of rehabilitation work required and the related costs associated with that work, which are recognized as a “Property, plant and equipment” for asset retirement obligations relating to operating mining assets or as “Other income and expenses, net” for non-operating structures and for de-characterization of environmental obligations and other restoration obligations include costs related to rehabilitation of areas damaged by the Company in its extractive actions (for example - soil contamination, water contamination, among others) or penalties. Therefore, it becomes an event that creates obligations when environmental damage is detected by the Company, when a new law requires that the existing damage be rectified or when the Company publicly accepts any responsibility for the rectification, creating a constructive obligation. The costs to remedy an eventual unexpected contamination, which give rise to a probable loss and can be reliably estimated, must be recognized in “Other income and expenses, net” in income statement.

In addition, investments in infrastructure, machinery and equipment regarding operational improvements to avoid future environmental damage, are not provisioned, because it is expected that these assets will bring future economic benefits to the operating units, thus it is capitalized as Property, plant and equipment.

The liabilities are discounted to present value using a risk-adjusted credit rate that reflects current market assessments of the time value of the money and the specifics risks for the asset to be restored. The interest rate charges relating to the liability are recognized as an accretion expense in the Net financial results. Difference in the settlement amount of the liability is recognized in the income statement.

Critical accounting estimates, assumptions and judgments

The initial recognition and the subsequent revisions of the asset retirement obligations, other restoration obligations, and environmental obligations consider critical future closure and repairing costs and several assumptions such as interest rates, inflation, useful lives of the assets and the estimated moment that the expenditure will be executed. These estimates are reviewed annually by the Company or when there is a relevant change in these assumptions.

Cost estimates can vary in response to many factors of each site that include timing, expected LOM, changes to the relevant legal or government requirements and commitments with stakeholders, review of remediation and relinquishment options, emergence of new restoration techniques, stage of engineering evaluation maturity among others. Engineering projects for each liability are in different stages of maturity, some of them still in the conceptual engineering phase, for which the estimation of expenditures includes in its methodology a high degree of uncertainty in the definition of the total cost of the project in accordance with best market practices.

External experts support the cost estimation process where appropriate. These factors either isolated or consolidated could significantly affect the future income statement and balance sheet position.

(a) Changes in the year

				2025	2024
	Asset retirement obligations	Environmental obligations	Other restoration obligations (iii)	Total	Total
Balance at the beginning of the year	240,408	32,159	6,819	279,386	314,919
Additions (ii)	10,188	1,103	-	11,291	56,375
Payments	(12,744)	(4,409)	-	(17,153)	(17,785)
Reversals	-	-	-	-	(1)
Interest accrual - note 10	23,012	3,114	461	26,587	26,058
Remeasurement - discount rate (i) / (ii)	8,919	(339)	91	8,671	(28,224)
Write-offs	-	-	(8,391)	(8,391)	(710)
Foreign exchange effects	15,028	3,994	1,020	20,042	(39,368)
Classified as liabilities associated with assets held for sale	-	-	-	-	(31,878)
Balance at the end of year	284,811	35,622	-	320,433	279,386
Current liabilities	35,032	4,294	-	39,326	47,561
Non-current liabilities	249,779	31,328	-	281,107	231,825

- (i) As of December 31, 2025, the credit risk-adjusted rate used for Peru was between 5,04% and 10,7% (December 31, 2024: 3.39% and 12.29%) and for Brazil was between 7,42% and 12,17% (December 31, 2024: 4.02% and 8.51%).
- (ii) The changes observed during 2025, were mainly due to the revised disbursement timelines related to decommissioning obligations in certain operations, based on updated asset retirement and environmental obligations studies, along with higher discount rates, as described above. As a result, as of December 31, 2025, the Company's asset retirement obligations for operational assets increased by USD 8,463 (December 31, 2024: increased of USD 35,944) as shown in note 21; and asset retirement and environmental obligations for non-operational assets gain in USD 174 (December 31, 2024: expense of USD 13,750) as shown in note 9.
- (iii) In December 2025, the Company completed engineering studies to confirm the construction method of certain inactive industrial waste containment structures that have been closed and decommissioned for more than 20 years. The environmental regulator confirmed the Nexa studies, and all five structures were classified as dry-stack (piles), confirming that not de-characterization or remediation projects are required. Accordingly, the previously recorded provision for restoration obligations was fully reversed for USD 8,392.

28 Provisions

Accounting policy

Provisions for legal claims and judicial deposits

Provisions for legal claims are recognized when there is a combination of the following conditions: (i) the Company has a present legal or constructive obligation as a result of past events; (ii) it is probable (more likely than not) that an outflow of resources will be required to settle the obligation; and (iii) the amount can be reliably estimated. The provisions are periodically estimated, and the likelihood of losses is supported by the Company's legal counsel.

Notes to the consolidated financial statements
At and for the year ended on December 31, 2025

All amounts in thousands of US dollars, unless otherwise stated

Provisions are measured at the present value of the expenditure expected to be required to settle the obligation using a discount rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to the passage of time is recognized as Financial Expenses.

When a claim is secured by a judicial deposit, the Company offsets the provision with the judicial deposit amount in the consolidated balance sheet. However, the Company also has judicial deposits for claims for which the likelihood of loss is possible or remote and for which no provision is recognized. In such cases, these amounts are recognized as outstanding judicial deposits in the Company's assets.

Critical accounting estimates and assumptions - Provisions for legal claims

The Company is part of ongoing tax, labor, civil and environmental lawsuits which are pending at different court levels. The provisions for potentially unfavorable outcomes of litigation in progress are established and updated based on management evaluation and require a high level of judgment regarding the matters involved, supported by the positions of external legal advisors. Income tax claims are discussed at the current and deferred income tax section (note 11).

(a) Changes in the year

					2025	2024
	Tax	Labor	Civil	Environmental	Total	Total
Balance at the beginning of the year	7,100	17,414	2,064	19,054	45,632	56,787
Additions	9,838	9,992	2,081	4,052	25,963	13,125
Reversals	(3,110)	(5,770)	(319)	(1,604)	(10,803)	(15,033)
Interest accrual	1,597	3,856	(48)	178	5,583	2,402
Payments	(7)	(2,912)	(3,364)	(1,990)	(8,273)	(4,326)
Foreign exchange effects	969	2,141	47	2,346	5,503	(7,727)
Other	(10,471)	347	-	(10)	(10,134)	404
Balance at the end of year	5,916	25,068	461	22,026	53,471	45,632

(b) Breakdown of legal claims provisions

The provisions and the corresponding judicial deposits are as follows:

	2025			2024		
	Judicial deposits	Provisions	Carrying amount	Judicial deposits	Provisions	Carrying amount
Tax	(6,986)	12,903	5,917	(1,118)	8,222	7,104
Labor	(744)	25,812	25,068	(985)	18,394	17,409
Civil	-	460	460	-	2,064	2,064
Environmental	(10)	22,036	22,026	-	19,055	19,055
Balance at the end of the year	(7,740)	61,211	53,471	(2,103)	47,735	45,632

As of December 31, 2025, the Company's outstanding judicial deposits, that are not presented net of the provisions are USD 9,221 and are recorded as "Other Assets" in the balance sheet (December 31, 2024: USD 13,912).

(c) Contingent liabilities

Legal claims that have a possible likelihood that an obligation will arise are disclosed in the Company's consolidated financial statements. The Company does not recognize a liability when it is not probable that an outflow of resources will be required or because the amount of liability cannot be reliably calculated. These legal claims are summarized below:

	2025	2024
Tax (i)	124,072	110,165
Labor (ii)	31,250	24,530
Civil (iii)	13,569	17,821
Environmental (iv)	124,810	106,799
	293,701	259,315

(i) Comments on contingent tax liabilities

The main contingent liabilities relating to tax lawsuits are discussed below.

Income tax over transfers of shares in Peru

Relates to assessments issued by the SUNAT, where the Company was jointly and severally liable for the payment of income tax by a foreign investor, in a supposed capital gain on transfer of shares. The estimated financial effect of this contingent liability is USD 34,560 (2024: USD 41,723).

Compensation for exploration for mineral resources

Relates to assessments issued by the Brazilian National Department of Mineral Production for the alleged failure to pay or underpayment of financial compensation for the exploration of mineral resources ("CFEM"). The estimated financial effect of this contingent liability is USD 16,147 (2024: USD 10,676).

PIS and COFINS tax credit offsetting

Tax proceeding concerning the utilization (offset) of tax credits recognized pursuant to the final judgment of Writ of Mandamus No. 001556.04.2008.4.01.3812, which ruled on the exclusion of ICMS from the PIS and COFINS calculation bases. The matter has been pending before the First Administrative Court since April 9, 2025. The estimated financial effect of this contingent liability is USD 71,600.

(ii) Comments on contingent labor liabilities

Include several claims filed by former employees, third parties and labor unions and labor public attorney's office mostly claiming the payment of indemnities related to dismissals, such as overtime, work at night hours, commuting hours, health hazard premiums and hazardous duty premiums, as well as indemnity claims by former employees and third parties based on alleged occupational illnesses, work accidents and payment of social benefits. The individual amount of the claims is not material.

(iii) Comments on contingent civil liabilities

The civil proceedings identified as potential contingent liabilities are related to indemnity lawsuits filed against the Company, alleging property damages, contractual breaches, personal injuries, consequential damages, loss of prospective earnings, and other general losses. The estimated financial effect of this contingent liability is USD 13,569 (2024: USD 17,821).

(iv) Comments on contingent environmental liabilities

The main contingent environmental liabilities in Brazil were filed by fishermen communities against the Company for indemnification, compensation for material and moral damages due to alleged pollution of the São Francisco River close to the Company's Três Marias operation in Brazil. The estimated financial effect of these contingent liabilities is USD 83,072 (2024: USD 93,634).

29 Contractual obligations

Accounting policy

Contractual obligations consist of advance payments received by the Company under a silver streaming agreement, signed with a counterparty (the "Streamer") and by which referential silver contents found in the ore concentrates produced by the Company's Cerro Lindo mining unit are sold to the Streamer.

Determining the accounting treatment of silver streaming transactions requires the exercise of high degree of judgment.

The Company assesses whether those advances obtained under this agreement should be recognized as contractual obligations (a sale of a non-financial item) or as a financial liability. For that purpose, the Company takes into consideration factors such as which party is exposed to the operational risk, the risk of access to the resources, the price risk, and assesses whether the transaction involves a sale of an own use asset for the counterparty. In those cases, in which the Company concludes that, in essence, the Streamer shares substantially the operational risks, the resource access and price risks, it delivers a non-financial item that qualifies as an "own use" item; any advance payment obtained is recognized as a contractual obligation in the framework of IFRS 15: Revenue from contracts with customers. Otherwise, the Company would recognize a financial liability in the framework of the provisions of IFRS 9: Financial instruments.

Notes to the consolidated financial statements**At and for the year ended on December 31, 2025****All amounts in thousands of US dollars, unless otherwise stated**

When a contractual obligation is recognized, the balance is initially recognized at the amount received, and it is subsequently recognized as revenue when the control of the respective assets is transferred, that is, upon the physical delivery of the nonfinancial item (silver certificate). Contractual obligations are recognized within non-current liabilities, except for the portion of silver certificates that are estimated to be delivered over the 12 months following the balance sheet date.

The advance payment obtained under the silver streaming transaction entered by the Company in 2016 is recognized as contractual obligation to the extent that the risk assessment conducted by management indicates the relevant risks are substantially shared with the Streamer and the qualifying conditions of a sale of an “own use” item are met.

The advance payment was recognized as a Contractual obligation and the corresponding revenues are recognized as the silver is delivered, which is the time that the contractual performance obligations are satisfied. The Company delivers the certificates as the silver contents of its concentrate sales are collected from its customers that buy ore concentrates.

The recognition of interest in contractual obligation is based on the opening balance of the year of the contractual obligations applying a market rate percent, representing the effect of passage of time over the length of the Metal Purchase Agreement.

Determination of the transaction price

The transaction price is the amount of consideration to which the Company expects to be entitled in return for transferring the promised goods to its counterparty. The transaction price is allocated to each performance obligation based on the relative standalone selling prices. In the silver streaming transaction, the Company has variable considerations related to the production capacity of the mine linked to its LOM and to the LME. IFRS 15 requires that for contracts containing variable considerations, the transaction price be continually updated and re-allocated to the transferred goods. For this purpose, the contractual obligations require an adjustment to the transaction price per unit each time there is a change in the underlying production profile of a mine or the expected metal prices. The change in the transaction price per unit results in a retroactive adjustment to revenues in the period in which the change is made, reflecting the new production profile expected to be delivered under the streaming agreement or the expected metal prices. A corresponding retroactive adjustment is made to accretion expenses, reflecting the impact of the change in the contractual obligation balance.

Critical accounting estimates, assumptions and judgments

The Recognition of revenues and of the contractual obligation related to the silver transaction require the use of critical accounting estimates and assumptions including, but not limited to: (i) allocation of revenues on relative prices; (ii) estimate prices for determining the upfront payment; (iii) discount rates used to measure the present value of future inflows and outflows; and (iv) estimates of LOM, reserves and mineral production.

(a) Composition

In 2016, the Company entered a silver streaming arrangement for the anticipated sale of a portion of the silver contained in the ore concentrates produced by the Cerro Lindo mining unit, which consisted of i) an upfront payment of USD 250,000 and ii) additional payments at the date of each delivery of the ounces of payable silver equivalent to 10% of the spot price at the date of settlement. In addition, by this agreement, sales of silver certificates to Triple Flag are limited to a total of 19.5 million of the ounces that Nexa Peru sells to its customers.

Notes to the consolidated financial statements
At and for the year ended on December 31, 2025
All amounts in thousands of US dollars, unless otherwise stated

Once that limit is reached, sales under the streaming will be made for 25% of the silver content in the Nexa Peru’s sales of concentrate for a period equivalent to the life of said mining unit. Based on the Company’s current production and delivery estimates, this threshold is expected to be reached during the first semester of 2026.

The changes in the contractual obligation are shown below:

	2025	2024
Balance at the beginning of the year	100,958	117,112
Revenues recognition upon ore delivery	(41,577)	(43,662)
Remeasurement adjustment (i)	24,637	21,084
Interest on contractual obligations – note 10	6,744	6,424
Balance at the end of year	90,762	100,958
Current	18,166	31,686
Non-current	72,596	69,272

(i) As of December 2025, the Company recognized a remeasurement adjustment in its contractual obligations of silver streaming with a corresponding reduction in revenues for an amount of USD 24,637 and an increased in accretion for an amount of USD 6,744 (2024: reduction in revenues for an amount of USD 21,084 and an increase in accretion for an amount of USD 6,424), given the higher long-term prices and the updated mine plan for its Cerro Lindo Mining Unit. According to the Company’s silver streaming accounting policy, prices and changes in the LOM given an update in mine plans are variable considerations and the recognized revenue under the streaming agreement should be adjusted to reflect the updated variables.

30 Shareholders’ equity

Accounting policy

Common shares are classified in shareholders’ equity. Each time a share premium is paid to the Company for an issued share, the respective share premium is allocated to the share premium account. Each time the repayment of a share premium is decided, such repayment shall be done pro-rata to the existing shareholders.

The distribution of dividends to the Company’s shareholders is recognized as a liability in the Company’s consolidated financial statements in the period in which the dividends are approved by the Company’s shareholders.

Shares repurchased under buyback programs that are not cancelled are reported as treasury shares and are deducted from shareholders’ equity. These shares are also deducted in the earnings per share calculation.

(a) Capital

As of December 31, 2025, the outstanding capital of USD 132,438 (2024: USD 132,438) is comprised of 132,438 thousand subscribed and issued common shares (2024: 132,438 thousand), with par value of USD 1.00 per share. In addition to the subscribed and issued common shares, NEXA also has an authorized, but unissued and unsubscribed share capital set at USD 231,925.

(b) Share premium

The share premium, if any, may be distributed to the shareholders in accordance with Luxembourg Commercial Companies Act by a resolution of the Board of Directors.

(c) Additional paid-in capital

Additional paid in capital arises from transactions recognized in equity that do not qualify as capital or share premium in accordance with Luxembourg Commercial Companies Act and, therefore, cannot be distributed to the shareholders of the Company.

(d) Accumulated other comprehensive income

The changes in the accumulated other comprehensive income are as follows:

Notes to the consolidated financial statements
At and for the year ended on December 31, 2025

All amounts in thousands of US dollars, unless otherwise stated

	Cumulative translation adjustment	Hedge accounting	Changes in fair value of financial instruments	Total

Attributable to NEXA's shareholders				(266,300)
Attributable to non-controlling interests				(51,672)

(e) Earnings per share

Basic earnings per share are calculated by dividing net income attributable to NEXA's shareholders by the weighted average number of ordinary shares outstanding during the year.

Diluted earnings per share are calculated using the same net income attributable to NEXA's shareholders and the weighted average number of ordinary shares adjusted for the effects of all potentially dilutive instruments, if any.

The Company performs an assessment at each reporting date of all outstanding financial instruments and equity-linked arrangements to determine whether they are potentially dilutive in accordance with IAS 33. For the years presented, the Company did not have any outstanding options, warrants, convertible instruments, share-based payment arrangements or any other instruments that could result in the issuance of additional shares. As the Company does not have any potentially dilutive shares, basic and diluted earnings per share are the same.

	2025	2024	2023
Net income (loss) for the year attributable to NEXA's shareholders	132,626	(205,030)	(291,968)
Weighted average number of outstanding shares – in thousands	132,439	132,439	132,439
Earnings (losses) per share - USD	1.00	(1.55)	(2.20)

(f) Dividend distribution

NEXA

On May 8, 2025, at the annual shareholders' meeting and in accordance with Luxembourg laws, the Company's shareholders approved a cash distribution to shareholders of USD 13,400 as a share premium reimbursement. The cash distribution was paid on June 27, 2025, to shareholders of record as of June 10, 2025.

Nexa Peru

On March 28, 2025, Nexa Peru approved dividends totaling USD 100,000 payable in two equal installments of USD 50,000 each, based on the ownership percentage of each shareholder as of the payment date. Nexa CJM is entitled to receive USD 82,432 for its shares, NEXA USD 179, and the non-controlling interest USD 17,389. The first installment of USD 8,717 was paid on April 30, 2025, and the second of USD 8,103 was paid on September 30, 2025. During 2025, Nexa Peru also paid USD 359 related to previous periods in dividends to non-controlling interests.

Pollarix

During 2025, Pollarix S.A. approved total dividends amounting to USD 50,231 (BRL 275,668), comprising USD 10,332 (BRL 56,713) allocated to Nexa BR and USD 39,899 (BRL 218,975) the portion allocated to non-controlling interests, USD 17,088 (BRL 93,726) was paid during 2025. The remaining balance, including dividends from 2025 and residual amounts from prior years, totaling USD 24,853 (BRL 133,344), was fully settled on January 19, 2026, as disclosed in Note 32. As a result, 100% of the dividends approved in 2025 were fully liquidated.

Enercan

On April 30, 2025, Enercan’s Board of Directors approved an additional dividend distribution to its shareholders related to the 2024 fiscal year, entitling the Company’s subsidiary Pollarix to receive USD 20,370 (BRL 112,216).

On December 19, 2025, Enercan’s Board of Directors approved an additional dividend distribution to its shareholders, entitling the Company’s subsidiary Pollarix to receive USD 3,465 (BRL 20,199). During 2025, Pollarix received in cash a total amount of USD 23,836 (BRL 132,415), including: (i) USD 10,099 (BRL 56,108) related to the June distribution; (ii) USD 6,061 (BRL 33,665) related to August; and (iii) USD 7,675 (BRL 42,642) related to November and December, from the outstanding dividend amount.

(g) Non-controlling interest

Summarized balance sheet	NEXA PERU		Pollarix S.A.

On January 15, 2025, Nexa El Porvenir paid USD 3,453 and non-controlling shareholders paid USD 1,864 for the subscription of newly issued shares of Nexa Atacocha. Since Nexa El Porvenir subscribed to its portion of the capital increase in December 2024, while non-controlling shareholders completed their subscription in January 2025, its ownership interest in Nexa Atacocha decreased from 86.65% as of December 31, 2024, to 82.11%. Nexa El Porvenir recognized a gain of USD 1,005 from the dilution of its ownership interest, due to Atacocha’s negative equity, which was recorded in equity attributable to Nexa’s controlling interest, while a loss of USD 1,016 was allocated to the non-controlling shareholders.

On July 17, 2025, Nexa El Porvenir, which owned 82.11% of Nexa Atacocha, launched a Voluntary Public Tender Offer (OPA) through the Lima Stock Exchange (BVL), under the supervision of the Peruvian Securities Market Authority (SMV), to acquire up to the remaining 17.89% of Atacocha's shares held by non-controlling interests. The tender offer remained open until September 3, 2025.

Following the completion of Tender Offer, 0.89% of the shares were acquired for USD 502, resulting in an increase in Nexa El Porvenir's controlling ownership interest in Nexa Atacocha from 82.11% to 83.00%.
As a result, the non-controlling interest decreased from 17.89% to 17.00. Consequently, a total reduction of USD 502 was recorded in equity, of which USD 492 was recognized in retained earnings attributable to the controlling interest and USD 10 to the non-controlling interest.

31 Impairment of long-lived assets

Accounting policy

Impairment of goodwill

As part of the impairment testing procedures, the goodwill arising from a business combination is allocated to a CGU or groups of CGUs that are expected to benefit from the related business combination and is tested at the lowest level that goodwill is monitored by management. Goodwill is tested annually for impairment, regardless of whether there has been an impairment indicator or, more frequently, if circumstances indicate that the carrying amount may not be recovered.

Impairment of long-lived assets

The Company assesses at each reporting date, whether there are indicators that the carrying amount of an asset or CGU, including goodwill balance, may not be recovered. If any indicator exists, such as a change in forecasted commodity prices, a significant increase in operational costs, a significant decrease in production volumes, a reduction in LOM, the cancelation or significant reduction in the scope of a project, foreign exchange rate, market conditions or unusual events that can affect the business, the Company estimates the recoverable amount of the assets or CGUs.

The recoverable amount is estimated by reference to the higher of an assets or CGUs fair value less cost of disposal ("FVLCD") and its value in use ("VIU"). The recoverable amount is determined for an individual asset unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case, the asset is tested as part of a larger CGU to which it belongs.

If the carrying amount of an asset or CGU exceeds its recoverable amount, the asset or CGU is considered impaired and is reduced to its recoverable amount. Non-financial assets other than goodwill that were adjusted due to impairment are subsequently reviewed for possible reversal of the impairment at each reporting date. Generally, the opposite of indicators that gave rise to an impairment loss would be considered indicators that impairment losses might have to be reversed.

If the underlying reasons for the original impairment have been removed or the service potential of the asset or CGU has increased, an assessment of impairment reversals is performed by the Company. Reversals of impairment losses that arise simply from the passage of time or related with prior goodwill impairments are not recognized.

For individual assets, if there is any indicator that an asset become unusable by damage or a decision that would lead the asset to not contribute economically to the Company, it is impaired. In addition, greenfield projects for which the Company decides to quit exploration and there is no expectation that in the future will bring cash inflows are also impaired.

Impairment of exploration and evaluation costs and development projects costs

Exploration assets (greenfields) representing mineral rights acquired in business combinations, mineral rights, and other capitalized exploration and evaluation costs, as well as development projects costs capitalized included in Property, plant and equipment are tested for impairment individually or allocated in aggregation with CGU or groups of CGUs that include producing assets, when applicable, through FVLCD when there are indicators that capitalized costs might not be recoverable. The allocation of exploration and evaluation costs, and development project costs to CGUs or group of CGUs is based on 1) expected synergies or share of producing assets infrastructure, assets and/or processing facilities 2) legal entity level, and 3) country level. When testing a CGU or a group of CGUs that include exploration and evaluation costs and development project costs, the Company performs the impairment test in two steps. In the first step, producing assets or group of producing assets, and exploration and evaluation costs and development projects costs that are not expected to share infrastructure assets are tested for impairment on an individual basis. In the second step, exploration and evaluation costs and development project costs that shared infrastructure assets and/or processing facilities are allocated to a CGU or a group of CGUs and tested for impairment on a combined basis.

Valuation methods and assumptions for recoverable amount based on FVLCD

FVLCD

FVLCD is an estimate of the price that the Company would receive to sell an asset, CGU or group of CGUs in an orderly transaction between market participants at the measurement date, less the cost of disposal. FVLCD is not an entity-specific measurement but is focused on market participants' assumptions for a particular asset when pricing the asset. FVLCD is estimated by the Company using discounted cash flows techniques (using a post-tax discount rate) and market past transaction multiples (amount paid per ton of minerals for projects in similar stages) for greenfield projects for

which resources allocation is under review, although the Company considers observable inputs, a substantial portion of the assumptions used in the calculations are unobservable. These cash flows are classified as level 3 in the fair value hierarchy. No CGUs are currently assessed for impairment by reference to a recoverable amount based on FVLCD classified as level 1 or level 2.

VIU

VIU is determined as the present value of the estimated future cash flows expected to arise from the continued use of the asset in its current condition and its residual value. VIU is determined by applying assumptions specific to the Company's continued use and does not consider enhancements or future developments. These assumptions are different from those used in calculating FVLCD and consequently the VIU calculation is likely to give a different result (usually lower) than a FVLCD calculation. Additionally, it is applied to the estimated future cash flows a pre-tax discount rate.

Forecast assumptions

The cash flow forecasts are based on management's best estimates of expected future revenues and costs, including the future cash costs of production, capital expenditure, and closure, restoration, and environmental costs. The resulting estimates are based on detailed LOM and long-term production plans. When calculating FVLCD, these forecasts include capital and operating expenditures related to expansions and restructurings of both brownfield and greenfield projects that a market participant would consider in seeking to obtain the highest and best use of the asset, considering their evaluation, eventual changes in their scope or feasibility, and their development stage.

The cash flow forecasts may include net cash flows expected to be realized from the extraction, processing and sale of material that does not currently qualify for inclusion in ore reserves. Such non-reserve material is only included if the Company has a high level of confidence that it will be converted to reserves. This expectation is usually based on preliminary drilling and sampling of areas of mineralization that are contiguous with existing ore reserves, as well as on the historical internal conversion ratio. Typically, the additional evaluation required for conversion to reserves of such material has not yet been done because this would involve incurring evaluation costs earlier than is required for the efficient planning and operation of the producing mine.

For purposes of determining FVLCD from a market participant's perspective, the cash flows incorporate management's internal price forecasts that also reflects the view of market participants. The internal price forecasts are developed using a robust model that incorporates market-based supply, demand and cost data. The internal price forecasts used for ore reserve estimation testing and the Company's strategic planning are generally consistent with those used for the impairment testing.

Cost levels incorporated in the cash flow forecasts are based on the current LOM plan and long-term production plan for the CGU, which are based on detailed research, analysis and iterative modeling to optimize the level of return from investment, output and sequence of extraction. The mine plan considers all relevant characteristics of the orebody, including waste-to-ore ratios, ore grades, haul distances, chemical and metallurgical properties of the ore, process recoveries and capacities of processing equipment that can be used. The LOM plan and long-term production plans are, therefore, the basis for forecasting production output and production costs in each future year.

The discount rates applied to the future cash flow forecasts represent the Company's estimate of the rate that a market participant would apply to the time value of money and the risks specific to the asset for which the future cash flow estimates have not been adjusted. The Company's weighted average cost of capital is generally used for determining the discount rates, with appropriate adjustments for the risk profile of the countries in which the individual CGUs operate.

With respect to the estimated future cash flows of capitalized exploration assets and development projects, for some assets the Company applies a price to net assets value ratio discount in order to reflect the inherent risk of such projects and that are neither adjusted in the discount rate nor in the future cash flows. The discount is based on the stage of the project and the type of metal.

Critical accounting estimates, assumptions and judgments - Impairment of long-lived assets

Impairment is assessed at the CGU level. A CGU is the smallest identifiable asset or group of assets that generates independent cash inflows. Judgment is applied to identify the Company's CGUs, particularly when assets belong to integrated operations, and changes in CGUs could impact impairment charges and reversals.

External and internal factors are quarterly monitored for impairment indicators. Judgment is required to determine, for example, whether the impact of adverse spot commodity price movements is significant and structural in nature. Also, the Company's assessment of whether internal factors, such as an increase in production costs and delays in projects, result in impairment indicators requires significant judgment. Among others, the long-term zinc price, foreign exchange rate considering Brazilian real (BRL) per US dollar (USD) for Brazilian operations, and the discount rate may have a significant impact on the Company's impairment estimations.

The process of estimating the recoverable amount involves the use of assumptions, judgment and projections for future cash flows. These calculations use cash flow projections based on financial and operational budgets for a five-year period. After the five-year period, the cash flows are extended until the end of the useful LOM or indefinitely for the smelters. The smelters cash flows do not use growth rates in the cash flow projections of the terminal value. Management's assumptions and estimates of future cash flows used for the Company's impairment testing of goodwill and long-lived assets are subject to risk and uncertainties, including metal prices and macroeconomic conditions, which are particularly volatile and partially or totally outside the Company's control. Future changes in these variables may differ from management's expectations and may materially change the recoverable amounts of the CGUs.

Impairment test analysis

Throughout 2025, the Company, at each reporting date, assessed whether there were indicators that the carrying amount of an asset, goodwill, or cash generation unit (CGU) might not be recoverable, or if a previously recorded impairment needed to be reversed for its entire CGU located in Brazil and Peru.

Goodwill assessment

During 2025 Nexa conducted its annual impairment test for the CGUs to which goodwill has been previously allocated including Mining Peru group of CGUs (composed of Cerro Pasco and Cerro Lindo CGUs), Cajamarquilla and Juiz de Fora in accordance with the assumptions and projections outlined in the Company's strategic planning process. As a result, no impairment was identified.

Cerro Pasco CGU

The Company identified indicators of reversal, primarily driven by the increase of short-term and long-term metal prices. As a result, an impairment reversal of USD 108,005 was recognized at the CGU Cerro Pasco against the income statement.

Impairment test summary

In summary, for the year 2025, Nexa recognized the following impairment loss/reversal:

Impairment (losses) reversals	2025	2024	2023
Magistral Project	-	(58,435)	-
Cerro Pasco CGU	108,005	22,206	(42,660)
Morro Agudo	-	10,291	(59,002)
Pukaqaga Project	-	3,978	-
Other individual assets	(16,299)	(10,910)	(12,976)
Total	91,706		(114,643)

(a) Key assumptions used in impairment tests

The recoverable amounts for each CGU were determined based on the FVLCD method, which were higher than those determined based on the VIU method. The Company identified long-term metal prices, discount rate, exchange rate considering Brazilian real (BRL), and LOM as key assumptions in determining the recoverable amounts, due to the material impact such assumptions may have on the recoverable value. Part of these assumptions are summarized below:

	2025	2024	2023
Long-term zinc price (USD/t)	3,120	2,930	2,800
Discount rate (Peru)	7.08%	7.08%	7.22%
Discount rate (Brazil)	7.63%	7.64%	8.02%
Exchange rate (BRL x USD)	5.43	5.66	4.84
Brownfield projects - LOM (years)	From 3 to 25	From 3 to 25	From 4 to 21

(i) Although LOM is a key assumption, based on current facts and circumstances, including recent historical information, management does not consider a change in this assumption to be reasonably possible. Historically, LOM has remained stable or increased by one to two years, and given the current stage of mining operations, a significant reduction in LOM is not expected.

(b) Impairment reversal - Cerro Pasco CGU

As mentioned above, the impairment reversal was identified at the CGU level, not being directly related to a single asset. Then, the impairment reversal was allocated on a pro-rata basis to the following assets:

	Carrying amount prior to impairment reversal	Impairment reversal	Carrying amount after impairment reversal
Property, plant and equipment	292,466	17,448	309,914
Intangible assets	155,528	90,558	246,086
Other net liabilities	(53,772)	-	(53,772)

The Company performed a stress test on the key assumptions used in the calculation of the recoverable amount of the CGU Cerro Pasco as follows:

Scenario	Impairment Reversal	Excess over recoverable amount	Current Long-term zinc price (USD/t)	Current Discount rate (Peru)
Base case	108,005	33,502	3,120	7.08%

Assumption	Stress test Scenario	Stress on Assumption	Impairment Reversal	Impact	Excess over recoverable amount	Impact
Long-term zinc price (USD/t)	5% Decrease	2,964	75,328	(32,677)	-	(33,502)
Discount rate (Peru)	5% Increase	7.43%	108,005	-	18,643	(14,859)

(c) Sensitivity analysis -Tested CGUs and Cajamarquilla Goodwill

The Company estimated the amount by which the value assigned to the key assumptions must change in order for the assessed CGU recoverable amount, which was not impaired, to be equal to its carrying amount:

CGU	Excess over recoverable amount	Decrease in Long term Zinc (USD/t)		Increase in WACC		Appreciation of BRL over USD(i)	
		Change	Price	Change	Rate	Change	Price
Três Marias System	458,634	(14.41%)	2,670	111.02%	14.94%	(13.46%)	4.70
Juiz de Fora	51,351	(8.04%)	2,869	24.96%	8.85%	(3.77%)	5.23
Aripuaña	633,312	(30.26%)	2,176	113.29%	15.10%	(22.70%)	4.20
Cerro Pasco	33,502	(2.53%)	3,041	11.54%	8.51%	-	-
Cerro Lindo	431,471	(36.33%)	1,987	133.08%	17.78%	-	-
Mining Peru	258,550	(11.24%)	2,769	43.88%	10.98%	-	-
Cajamarquilla	730,640	(51.36%)	1,518	94.11%	14.81%	-	-

(i) These analyses are only applicable to Três Marias System, Juiz de Fora and Aripuanã CGUs, as these are in Brazil and their functional currency is BRL. Therefore, the appreciation of BRL over USD impacts the operational cost and expense, reducing the recoverable amount of these CGUs in USD, for consolidated purposes.

32 Long-term commitments

(a) Projects evaluation

In December 2021, the Group submitted a request for the Modification of the Environmental Impact Assessment (MEIA) for the Magistral Project to the National Environmental Certification Agency (SENACE), through the applicable legal process. During the review process, the Peruvian Water Authority (ANA) and the Protected Natural Areas Service - (SERNANP) issued unfavorable observations. On May 24, 2024, SENACE formally rejected the MEIA.

On February 8, 2024, the Peruvian Government approved an extension of the deadline for fulfilling the Accreditable Investment Commitment under the Magistral Transfer Contract, extending it from September 2025 to August 2028. As of December 31, 2025, the unexecuted amount under this commitment totaled USD 323,000.

In December 2021, the Group submitted a request for the Modification of the Environmental Impact Assessment (MEIA) for the Magistral Project to the National Environmental Certification Agency (SENACE), through the applicable legal process. During the review process, the Peruvian Water Authority (ANA) and the Protected Natural Areas Service - (SERNANP) issued unfavorable observations. On May 24, 2024, SENACE formally rejected the MEIA.

On April 30, 2025, the Peruvian Government formally acknowledged the rejection of the MEIA as a force majeure event, leading to the suspension of the obligation to fulfill the investment commitment. As stipulated in the Magistral Transfer Contract, NEXA and the Government must now engage in direct negotiations to assess the impact of this majeure force event on the project's execution. As of the date of this report, the deadline to fulfill the Accreditable Investment Commitment remains suspended, as does the potential application of the related penalty in the amount of USD 97,029.

(b) Environmental Guarantee for Dams

As of December 31, 2025, there have been no changes to the regulatory framework related to the environmental guarantee requirements established under Decree 48,747/2023 and its amendments. NEXA submitted its guarantee proposal in September 2024 and provided a guarantee for BRL 60,728 (approximately USD 11,128), representing 50% of the required amount by December 31, 2024. A new Decree, published on December 31, 2024, established that the timeline for the remaining installments will begin only after the approval of the proposal by the environmental agency. NEXA is still awaiting this approval before proceeding with the remaining obligations.

33 Events after the reporting period

(a) Payments of dividends to non-controlling interest

On January 19, 2026, Pollarix paid interim dividends related to previous quarters, totaling USD 31,290 (BRL 167,880). Of this amount, USD 24,853 (BRL 133,344) was fully settled to non-controlling interests, while USD 6,437 (BRL 34,535) was paid to Nexa BR.

(b) Tax claim payments

In January of 2026, the Company paid the amount of US\$ 12,210 regarding specific Peruvian uncertain income tax discussions of other expenses as explained in note 11 (d). Such payment was placed before the courts, and a provision may be recorded against such amount in the future if the likelihood of loss becomes probable, or the payments could be recoverable in cash if the Company prevails in these discussions. This payment did not change Nexa’s legal position or estimate related to the tax discussion on December 31, 2025.

(c) Share premium reimbursement

On February 26, 2026, the Company’s Board of Directors recommended, subject to approval by the Company’s Annual General Meeting expected to be held on or around June 26, 2026, a cash distribution to the Company’s shareholders of approximately USD 17,454 to be paid on August 26, 2026, as share premium reimbursement, in accordance with the dividend policy effective since January 2025.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of
Nexa Resources S.A.

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Nexa Resources S.A. and its subsidiaries (the “Company”) as of December 31, 2025 and 2024, and the related consolidated income statement, consolidated statement of comprehensive income, consolidated statement of changes in shareholders’ equity and consolidated statement of cash flows for each of the three years in the period ended December 31, 2025, including the related notes (collectively referred to as the “consolidated financial statements”). We also have audited the Company's internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2025 and 2024, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2025 in conformity with IFRS Accounting Standards as issued by the International Accounting Standards Board. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2025, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the Management’s Report on Internal Control over Financial Reporting appearing under Item 15. Our responsibility is to express opinions on the Company’s consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that (i) relate to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Impairment Assessments – Goodwill and long-lived assets

As described in Notes 22 and 31 to the consolidated financial statements, the Company’s goodwill balance was US\$ 306,208 thousand as of December 31, 2025, comprised by the goodwill allocated to the following cash generating units (CGU): Cajamarquilla, in the amount of US\$ 95,411 thousand, Juiz de Fora, in the amount of US\$ 4,374 thousand and Mining Peru group of CGUs, in the amount of US\$ 206,423 thousand. Management conducts a goodwill impairment test on an annual basis or, more frequently, if circumstances indicate that the carrying value of goodwill may be impaired. Management also evaluates impairment losses and reversals indicators for the long-lived assets, such as intangible, property plant and equipment and investments in associate companies. Potential impairment is identified by comparing the Fair Value Less Cost of Disposal (FVLCD) of a CGU to its carrying value, including goodwill, when applicable. Fair value is estimated by management using a discounted cash flow model or by market past transaction multiples. Management’s cash flow projections included significant judgments and assumptions mainly related to long-term zinc price and discount rates. The goodwill impairment assessments resulted in no impairment losses. The Company has also tested for impairment the assets that showed indicators of impairment losses and the assets other than goodwill that showed any indication that an impairment loss either no longer exists or has decreased. As a result of these impairment tests, the Company recorded US\$ 108,005 thousand of impairment reversal of assets related to Cerro Pasco CGU, and recorded US\$ 16,299 thousand of impairment losses, related to other individual assets.

The principal considerations for our determination that performing procedures relating to impairment assessments of the goodwill and long-lived assets is a critical audit matter are (i) the significant judgment by management when developing the fair value estimates of the CGUs and individual assets; (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating management's significant assumptions related to long-term zinc price and discount rates; and (iii) the audit effort included involving the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to management's impairment assessments, including controls related to the significant assumptions. These procedures also included, among others (i) assessing the Company's determination of its cash generating units; (ii) testing management's process for developing the fair value estimates; (iii) evaluating the appropriateness of the discounted cash flow model used by management; (iv) testing the completeness and accuracy of underlying data used in the discounted cash flow model; and (v) evaluating the reasonableness of the significant assumptions used by management related to long-term zinc price and discount rates. Evaluating management's assumptions related to long-term zinc price and discount rates involved evaluating whether the assumptions used by management were reasonable considering (i) the consistency with external market and industry data; and (ii) whether the assumptions were consistent with evidence obtained in other areas of the audit. Professionals with specialized skill and knowledge were used to assist in evaluating (i) the appropriateness of the discounted cash flow model and (ii) the reasonableness of the long-term zinc price and discount rates used.

Cerro Lindo tax stability agreement

As described in Note 11 to the consolidated financial statements, as it relates to uncertain tax positions on income tax, the Company recognizes liabilities in the consolidated financial statements for the uncertain tax positions when management determines that it is not more-likely-than-not that the positions will be sustained upon examination by the tax authorities. No liability is accrued in the consolidated financial statements for uncertain tax positions when the Company determines that it is more-likely-than-not that the positions will be sustained upon examination by the tax authorities; these uncertain tax positions are disclosed. The Company's liability accrued and uncertain tax positions disclosed related to the Cerro Lindo stability agreement are US\$ 130,709 thousand and US\$ 167,190 thousand, respectively, as of December 31, 2025.

The principal considerations for our determination that performing procedures relating to Cerro Lindo stability agreement is a critical audit matter were (i) the significant judgment by management when assessing whether it is not more-likely-than-not that the Company's tax positions will be sustained upon examination by the tax authority, and in determining whether the amount of the loss or range of loss can be reasonably estimated and (ii) a high degree of auditor judgment and effort in performing procedures and evaluating audit evidence related to management's assessment of the uncertain tax positions.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to management's assessment of Cerro Lindo stability agreement, including controls over assessing whether a liability should be accrued or a disclosure should be made, and when determining whether the amount of the loss or range of loss can be reasonably estimated, as well as financial statement disclosures. These procedures also included, among others (i) confirming with internal and external legal counsel the possibility or probability of an unfavorable outcome and the extent to which the loss or range of loss is reasonably estimable; (ii) evaluating the reasonableness of management's assessment regarding whether an unfavorable outcome is more-likely-than-not and reasonably estimable; and (iii) evaluating the sufficiency of the Company's disclosures.

We have served as the Company's auditor since 2001.

Nexa Resources S.A.
Société anonyme
37A, Avenue J.F. Kennedy
L-1855 Luxembourg
Grand Duchy of Luxembourg
R.C.S. Luxembourg: B 185.489

ARTICLES OF ASSOCIATION AS OF 8 MAY 2025

TITLE I - DENOMINATION, REGISTERED OFFICE, OBJECT, DURATION

1. ARTICLE 1.-

There is hereby established a public limited liability company ("*société anonyme*") under the name of "**Nexa Resources S.A.**" (the "**Company**") governed by the present articles of association (the "**Articles**") and by current Luxembourg law ("**Luxembourg Law**"), in particular the law of 10 August 1915 on commercial companies, as amended (the "**Commercial Companies Law**").

2. ARTICLE 2.

- 2.1 The Company has its registered office in the City of Luxembourg, Grand Duchy of Luxembourg.
 - 2.2 The registered office may be transferred within the Grand Duchy of Luxembourg by decision of the board of directors of the Company (the "**Board of Directors**"). The Board of Directors is authorized to amend these Articles to reflect the change of registered office and to proceed to such formalities as may be required under Luxembourg Law.
 - 2.3 The registered office of the Company may be transferred outside the Grand Duchy of Luxembourg by means of a resolution of the shareholders adopted at a general meeting of shareholders of the Company (the "**General Meeting**") under the conditions required by these Articles.
 - 2.4 The Company may have offices and branches (whether or not a permanent establishment) both in Luxembourg and abroad.
 - 2.5 In the event that the Board of Directors should determine that extraordinary political, economic or social developments have occurred or are imminent that would interfere with the normal activities of the Company at its registered office or with the ease of communication between such office and persons abroad, the registered office may be temporarily transferred abroad until the complete cessation of these extraordinary circumstances; such temporary measures shall have no effect on the nationality of the Company which, notwithstanding the temporary transfer of its registered office, will remain a Luxembourg company. Such temporary measures will be taken and notified to any interested parties by the Board of Directors.
-

3. ARTICLE 3.-

The Company is established for an unlimited period of time.

4. ARTICLE 4.-

The Company's purpose is:

- 1) To carry out any trade, business or commercial activities whatsoever, including but not limited to the purchase, exchange and sale of goods and/or services to third parties;
- 2) To take participations and interests, in any form whatsoever, in any commercial, industrial, financial or other, Luxembourg or foreign companies or enterprises;
- 3) To acquire through participations, contributions, underwriting, purchases or options, negotiation or in any other way any securities, rights, patents and licenses and other property, rights and interest in property as the Company shall deem fit;
- 4) Generally to hold, manage, develop, sell or dispose of the same, in whole or in part, for such consideration as the Company may think fit, and in particular for shares or securities of any company purchasing the same;
- 5) To enter into, assist or participate in financial, commercial and other transactions;
- 6) To grant to any holding company, subsidiary, or fellow subsidiary, or any other company which belong to the same group of companies as the Company (the "**Affiliates**") any assistance, loans, advances or guarantees (in the latter case, even in favour of a third-party lender of the Affiliates);
- 7) To borrow and raise money in any manner and to secure the repayment of any money borrowed; and
- 8) Generally to do all such other things as may appear to the Company to be incidental or conducive to the attainment of the above objects or any of them.

The Company can perform all commercial, technical and financial operations, connected directly or indirectly in all areas as described above in order to facilitate the accomplishment of its purpose, provided always that the Company will not enter into any transaction which would constitute a regulated activity of the financial sector without due authorization under Luxembourg Law.

TITLE II - CAPITAL, SHARES

5. ARTICLE 5.

- 5.1 The subscribed share capital is set at USD 132,438,611 (one hundred thirty-two million four hundred thirty eight six hundred eleven United States Dollars) divided into 132,438,611 (one hundred thirty-two million four hundred thirty eight six hundred eleven) shares having a nominal value of USD 1 (one United States Dollar) each (the "**Shares**").
-

- 5.2 The Shares can only be in registered form.
- 5.3 The Company may, without limitation, accept equity or other contributions without issuing Shares or other securities in consideration for the contribution and may credit the contributions to one or more accounts. Decisions as to the use of any such accounts are to be taken by the Board of Directors subject to the Commercial Companies Law and these Articles. For the avoidance of doubt, any such decision may, but needs not to, allocate any amount contributed to the contributor.
- 5.4 The subscribed share capital and any Authorized Capital (as defined below) may be increased or reduced by a resolution of the General Meeting adopted in accordance with the conditions required for the amendment of the Articles, as further detailed in Article 13.18.2 and in accordance with Luxembourg Law.
- 5.5 All Shares must be fully paid up on issue by contributions in cash or in kind.
- 5.6 The Company may have a sole shareholder. The death or dissolution of a sole shareholder will not result in the dissolution of the Company.
- 5.7 In addition to its issued and subscribed share capital, the Company has also an authorized, but unissued and unsubscribed share capital set at USD 231,924,819 (two hundred thirty-one million nine hundred twenty-four thousand eight hundred nineteen United States Dollars) (the "**Authorized Capital**").
- 5.8 The Board of Directors is authorized, during a period starting on the day of the general meeting of shareholders held on 8 May 2025 and ending on the fifth anniversary of the date of publication in the Luxembourg legal gazette (*Recueil Electronique des Sociétés et Associations*) of the minutes of such general meeting, without prejudice to any renewals, to increase the issued share capital on one or more occasions within the limits of the Authorized Capital.
- 5.9 The Board of Directors is authorized to determine the conditions of any capital increase and the issuance of new Shares and the instruments to be issued in accordance with the above provisions through contributions in cash or in kind, among others, by the conversion of debt into equity, by offsetting receivables, by the incorporation of reserves, issue premiums or retained earnings, with or without the issue of new Shares, or following the issue and the exercise of subordinated or non-subordinated bonds, convertible into or repayable by or exchangeable for Shares (whether provided in the terms at issue or subsequently provided), or following the issue of bonds with warrants or other rights to subscribe for Shares attached, or through the issue of stand-alone warrants or any other instrument carrying an entitlement to, or the right to subscribe for, Shares.
- 5.10 The Board of Directors may approve the issuance of new Shares and, where applicable, the instruments to be issued in accordance with the provisions of this Article 5 of the present Articles without reserving (i.e. by cancelling or limiting) the preferential right to subscribe for such Shares and instruments for the existing shareholders so long as such issuance of new Shares and instruments is carried out through a public offering process.
- 5.11 The Board of Directors is authorized to set the subscription price, with or without issue premium, the date from which the Shares or other financial instruments will carry beneficial rights and, if applicable, the duration, amortization, other rights (including early repayment), interest rates, conversion rates and exchange rates of the aforesaid financial instruments as well as all the other conditions and terms of such financial instruments including as to their subscription, issue and payment, for which the Board of Directors may decide that, if the proposed increase of capital is not entirely subscribed for, the capital shall be increased by the amount of subscriptions received.
-

- 5.12 The Board of Directors is authorized to allocate existing Shares or new Shares issued under the Authorized Capital, free of charge, to employees and corporate officers (including directors) of the Company and of companies of which at least 10 per cent of the capital or voting rights is directly or indirectly held by the Company. The terms and conditions of such allocations are to be determined by the Board of Directors.
- 5.13 When the Board of Directors has implemented a complete or partial increase in capital as authorized by the foregoing provisions, Article 5 of the present Articles shall be amended to reflect that increase.
- 5.14 The Board of Directors is expressly authorized to delegate to any natural or legal person to organize the market in subscription rights, accept subscriptions, conversions or exchanges, receive payment for the price of Shares, bonds, subscription rights or other financial instruments, to have registered increases of capital carried out as well as the corresponding amendments to Article 5 of the present Articles and to have recorded in said Article 5 of the present Articles the amount by which the authorization to increase the capital has actually been used and, where appropriate, the amounts of any such increase that are reserved for financial instruments which may carry an entitlement to Shares. The non-subscribed portion of the Authorized Capital may be drawn on by the exercise of conversion or subscription rights already conferred by the Company.
- 5.15 The Company may, to the extent and under the terms permitted by Luxembourg Law, purchase its own Shares or cause them to be repurchased by its subsidiaries.
- 5.16 The Company shall consider the person in whose name the Shares are recorded in the register of shareholders to be the owner of those Shares.
- 5.17 Only if a public offering of Shares on a stock exchange, either regulated or not, in the European Economic Area, the United Kingdom, the United States of America, or Canada occurred and in case Shares are recorded in the register of shareholders on behalf of one or more persons in the name of a securities settlement system or the operator of such a system or in the name of a professional depositary of securities or any other depositary (such systems, professionals or other depositaries being referred to hereinafter as “**Depositaries**”) or of a sub-depositary designated by one or more Depositaries, the Company—subject to a confirmation in proper form received from the Depositary—will permit those persons to exercise the rights attaching to those Shares, including admission to and voting at General Meetings. The Board of Directors may determine the requirements which such confirmations must comply with.
- 5.18 Confirmations that an entry has been made in the register of shareholders will be provided to shareholders directly recorded in the register of shareholders or, in case of Depositaries or sub-depositaries recorded in the register, upon their request. Except for transfers in accordance with the rules and regulations of the relevant Depositary, the transfer of Shares shall be made by a written declaration of transfer recorded in the register of shareholders and dated and signed by the transferor and the transferee or by their duly-appointed agents. The Company may accept any other document, instrument, writing or correspondence as sufficient proof of the transfer.
-

TITLE III - MANAGEMENT

6. ARTICLE 6.

- 6.1 The Company shall be managed by a board of directors comprising at least five (5) members and a maximum of eleven (11) members (each a "**Director**" and together the "**Directors**"), who shall be appointed by the General Meeting in accordance with Article 13.18.1. The Board of Directors shall at all times be composed as required pursuant to applicable law, including, if applicable, the rules and regulations of any stock exchange on which part or all of the Shares of the Company are listed. In particular, at least three (3) Directors shall meet the independence and financial literacy requirements for audit committee members set forth in the listing rules of the New York Stock Exchange, Toronto Stock Exchange, or any stock exchange on which any Shares of the Company are then listed and any additional requirements under the rules and regulations of the U.S. Securities and Exchange Commission, Canadian securities laws and other applicable law, subject to any available exemptions.
- 6.2 The Directors, whether shareholders or not, are appointed for a period not exceeding two (2) years (renewable) by the General Meeting, which may at any time and "ad nutum" remove them.
- 6.3 The maximum number of Directors and the overall remuneration of the Board of Directors are approved by the General Meeting. The Board of Directors determines the remuneration of each Director based on the total amount approved by the General Meeting.
- 6.4 Any Director may resign at any time by delivering his or her resignation in writing or by electronic transmission to the Chairman (as defined below) or to the Board of Directors. Such resignation shall be effective upon receipt by the Company unless it is specified therein to be effective at some later time, and the acceptance of a resignation shall not be necessary to make it effective unless such resignation specifies otherwise.
- 6.5 In the event that a Director appointed by the General Meeting ceases to be a Director for any reason, the remaining Directors, by a simple majority vote of the Directors present or represented, may, at their discretion, fill such vacancy. This Director will be in office up to the next General Meeting taking place.
- 6.6 Any Director may be suspended or dismissed at any time by a resolution of the General Meeting adopted at a simple majority.

7. ARTICLE 7.

- 7.1 The Board of Directors shall elect from its members a chairman (the "**Chairman**") and who may choose a secretary for each meeting, who need not be a director and who shall be responsible for keeping the minutes of such meeting of the Board of Directors. The Chairman will preside at all meetings of the Board of Directors. In his absence, the other members of the Board of Directors will appoint another chairman "pro tempore", by simple majority vote of the Directors present or represented at such meeting, who will preside at the relevant meeting.
- 7.2 The Board of Directors is convened upon call by the Chairman or at least three (3) Directors, as often as the interest of the Company so requires.
-

- 7.3 No separate notice is required for meetings held at times and places specified in a schedule previously adopted by a resolution of the Board of Directors.
- 7.4 Any director may act at any meeting of the Board of Directors by appointing in writing, whether in original, by mail or email, another Director as his or her proxy. A Director may represent more than one of his or her colleagues, provided that at least two (2) directors are present in person or participate by telephone conference or similar means in any meeting.
- 7.5 The Board of Directors can validly debate and take decisions only if at least the majority of its members is present or represented. Resolutions of the Board of Directors are only validly adopted if carried by a majority of the votes of the members of the Board of Directors present or represented. In case of a tie vote, the matter shall be deferred by the Chairman.
- 7.6 Directors may participate in a meeting of the Board of Directors by means of telephone conference or similar communications equipment allowing the identification of each participating Director and by means of which all persons participating in the meeting can hear and speak to each other on a continuous basis, and such participation in a meeting will constitute presence in person at the meeting, provided that all actions approved by the Directors at any such meeting will be reproduced in writing in the form of resolutions.
- 7.7 The deliberations of the Board of Directors shall be recorded in the minutes, shall be signed by the Chairman and by the secretary of the meeting or a member of the Board of Directors who participated to the meeting. Any transcript of or excerpt from these minutes shall be signed by the Chairman or by the secretary of such meeting.
- 7.8 Resolutions in writing signed by all members of the Board of Directors will be as valid and effective as if passed at a meeting duly convened and held. The signatures of such resolutions may appear on a single document or multiple counterparts of an identical document and may be evidenced by mail, email or any similar means. Resolutions adopted in accordance with this procedure are deemed to have been taken at the registered office of the Company.
- 7.9 The Board of Directors shall approve the internal regulation of the Board of Directors.

8. ARTICLE 8.

- 8.1 The Board of Directors is vested with the powers to perform all acts of administration and disposition in compliance with the corporate object of the Company, with the exception of the powers reserved by Luxembourg Law or by the Articles to the General Meeting.
- 8.2 The Board of Directors may establish and dissolve committees including, but not limited to, an audit committee, a compensation, nominating and governance committee, a finance committee, and a sustainability committee set forth their respective duties, approve the internal regulations of those committees, elect the respective members thereof and define and approve, based on the total amount determined by the General Meeting, the remuneration of the members of such committees, including as required pursuant to applicable law (including the rules and regulations of any stock exchange applicable to the Company). Such committee members shall exercise their duties under the responsibility of the Board of Directors.
-

9. ARTICLE 9.

9.1 The Company is validly bound or represented towards third parties by:

- 9.1.1 the joint signature of two (2) Directors;
- 9.1.2 if the Board of Directors of the Company has delegated certain powers to a Management Committee (as defined in Article 10), by the joint signature of two (2) Managing Officers, but only within the limits of such delegated powers;
- 9.1.3 if a sole Daily Manager (as defined in Article 11.1) has been appointed, the Company will be bound by the sole signature of such Daily Manager to the extent powers have been delegated to him under Article 11.1, but only within the limits of such delegated powers;
- 9.1.4 if more than one Daily Manager as defined in Article 11.1 has been appointed, the Company will be bound by the joint signature of two Daily Managers, to the extent powers have been delegated to them under Article 11.1, but only within the limits of such delegated powers; or
- 9.1.5 the sole signature or joint signature of any other person(s) to whom such a power has been delegated in accordance with Article 11.2, but only within the limits of such delegated powers.

10. ARTICLE 10.

- 10.1 The Board of Directors may delegate its powers to conduct the management and affairs of the Company, except the general guidance of the Company's business and the acts reserved by the Commercial Companies Law to the Board of Directors, and the representation of the Company for such management and affairs to a management committee (the "**Management Committee**") comprising at least three (3) members and a maximum of eleven (11) members, who need not be shareholders or Directors (each a "**Managing Officer**").
- 10.2 The Managing Officers are appointed by the Board of Directors of the Company for a period not exceeding one (1) year (renewable) which may at any time and "ad nutum" remove and replace them. Their remuneration is determined by the Board of Directors.
- 10.3 The Board of Directors shall approve the internal regulations of the Management Committee, which shall set forth its duties and any other management powers and attributions including, but not limited to: the powers to perform acts or transactions involving the Company, the authorization limits of the Management Committee, appointment and removal of the Daily Managers (as defined below), and any other specific power that may be attributed to the Management Committee by the Board of Directors as determined in the relevant resolution of the Board of Directors to that effect or in the internal regulations of the Management Committee.

11. ARTICLE 11.

- 11.1 The day-to-day management of the business of the Company and the power to represent the Company with respect thereto may be delegated by decision of the Management Committee, if any has been established, or otherwise by decision of the Board of Directors, to one or more Directors, members of the Management Committee, officers, employees or third parties (each a "**Daily Manager**"), acting either alone or jointly, as determined in the relevant internal regulation. A majority of the Daily Managers shall be resident in Luxembourg. The Board of Directors or the Management Committee, if any, shall approve, by a simple majority vote of the Directors or the Managing Officers, respectively, present at such meeting the internal regulations of the Daily Managers and set forth their duties.
-

- 11.2 The Board of Directors, the Management Committee, if any, and/or the Daily Manager(s), if any, may delegate any of their powers for specific tasks to one or more ad hoc agents, Directors, Managing Officers, Daily Managers, employee or third party and may remove any such agent(s) and will determine any such agent's powers and responsibilities and remuneration (if any), and any other relevant conditions of such agent's agency.

TITLE IV - SUPERVISION

12. ARTICLE 12.

- 12.1 The Company is supervised by one or more independent auditors (*réviseur(s) d'entreprises agréé(s)*) (the "**Statutory Auditors**"), which are appointed by a General Meeting.
- 12.2 Their term of office must not exceed one (1) year, however, Statutory Auditors may be re-elected. In the event that an Independent Auditor is appointed without any indication of the term of his appointment, his term is deemed to be one (1) year.
- 12.3 A Statutory Auditor may only be removed by a General Meeting for cause in accordance with Luxembourg Law or with the Statutory Auditors' approval.

TITLE V. - GENERAL MEETING

13. ARTICLE 13.

- 13.1 The annual General Meeting shall be held in Luxembourg at the address of the registered office of the Company or at such other place as may be specified in the convening notice of the meeting within six (6) months after the end of the accounting year as set out in Article 14.
- 13.2 Other meetings of the shareholders of the Company may be held at such place and time as may be specified in the respective convening notices of the meeting.
- 13.3 Any shareholder may participate in a General Meeting by conference call, video conference or similar means of communications equipment whereby (i) the shareholders attending the meeting can be identified, (ii) all persons participating in the meeting can hear and speak to each other, (iii) the transmission of the meeting is performed on an on-going basis, and (iv) the shareholders can properly deliberate, and participating in a meeting by such means shall constitute presence in person at such meeting.
- 13.4 Except as otherwise required by Luxembourg Law, by the rules of the New York Stock Exchange, Toronto Stock Exchange, or any stock exchange on which any Shares of the Company are then listed and any additional requirements under the rules and regulations of the U.S. Securities and Exchange Commission, Canadian securities laws and other applicable law or by these Articles, General Meetings shall be convened by the Board of Directors with at least a thirty (30) days prior notice. The quorum provided for by Luxembourg Law shall govern the notice for, and the conduct of, the General Meetings.
-

- 13.5 The convening notices shall be sent by registered letter or, alternatively, in any manner as set forth in applicable law or in these Articles.
- 13.6 The convening notice may be sent to a shareholder by any other means of communication having been accepted by such shareholder. Alternative means of communication are email, fax, ordinary letter and courier services.
- 13.7 Only the contact details on record with the Company at least five (5) days before the issue by the Board of Directors of any notice to such shareholder shall be valid and binding on the Company. The Board of Directors shall at the registered office keep a list of the email addresses communicated by the shareholders to the Company and no third party other than the notary recording shareholder decisions shall have access to such a list.
- 13.8 Any shareholder may change its street address or email address or revoke its consent or deemed consent to alternative means of convening provided that its revocation or its new contact details are received by the Company no later than five (5) days before the issue of any notice. The Board of Directors is authorized to ask for confirmation of such new contact details by sending a registered letter or an email, as appropriate, to this new street address or email address. If the shareholder fails to confirm its new contact details, the Board of Directors shall be authorized to send any subsequent notice to the previous contact details.
- 13.9 The Board of Directors as well as the Statutory Auditors may convene a General Meeting. They shall be obliged to convene it so that it is held within a period of one month, if shareholders representing one tenth (1/10th) of the Company's share capital require it in writing, with an indication of the agenda. One or more shareholders representing at least one tenth (1/10th) of the subscribed capital may require the entry of one or more items on the agenda of any General Meeting. This request must be addressed to the Company at least ten (10) days prior to the relevant General Meeting.
- 13.10 The Board of Directors may fix in advance a date preceding the date of (i) any General Meeting and/or (ii) for the payment of any dividend (including, without limitation, an interim dividend) as a record date for the determination of the shareholders entitled to vote at such General Meeting and/or receive payment of any such dividend, respectively, notwithstanding any transfer of any Shares on the register of the Company after any such record date.

Notwithstanding the provisions of the foregoing paragraph of this Article 13.10, the fixing of a record date shall be in conformity with Luxembourg Law and the rules of the New York Stock Exchange, Toronto Stock Exchange, or any stock exchange on which any Shares of the Company are then listed.

- 13.11 Each share is entitled to one vote.

- 13.12 Any shareholder may in accordance with statutory rules vote in person or through a proxy. A shareholder may act at any General Meeting by appointing any other natural or legal person who need not be a shareholder as its proxy in writing whether in original, by telefax, or e-mail to which an electronic signature (which is valid under Luxembourg Law) is affixed. Such proxy shall enjoy the same rights to speak and ask questions during the General Meeting as those to which the shareholder thus represented would be entitled. All the proxies must be received by the Company no later than the day preceding the fifth (5th) Business Day before the General Meeting unless the Board of Directors fixes a shorter period. A person acting as proxy may represent more than one shareholder.
-

- 13.13 Except as otherwise required by Luxembourg Law, the rules of the New York Stock Exchange, Toronto Stock Exchange, or any stock exchange on which any Shares of the Company are then listed and any additional requirements under the rules and regulations of the U.S. Securities and Exchange Commission, Canadian securities laws and other applicable law or by these Articles, resolutions at a duly convened General Meeting will be adopted by a simple majority of those present or represented and voting.
- 13.14 If all the shareholders of the Company are present or represented at a General Meeting, and consider themselves as being duly convened and informed of the agenda of the meeting, the meeting may be held without prior notice.
- 13.15 The minutes of the General Meeting will be signed by the members of the bureau of the General Meeting and by any shareholder who wishes to do so.
- 13.16 However, in case decisions of the General Meeting have to be certified, copies or extracts for use in court or elsewhere must be signed by the Chairman of the Board of Directors or by the secretary of the meeting.
- 13.17 Each shareholder may vote through voting forms in the manner set out in the convening notice in relation to a General Meeting. The shareholders may only use voting forms provided by the Company and which contain at least the place, date and time of the meeting, the agenda of the meeting, the proposal submitted to the decision of the meeting, as well as for each proposal three boxes allowing the shareholder to vote in favour, against, or abstain from voting on each proposed resolution by ticking the appropriate box. Voting forms which show neither a vote in favor, nor against the resolution, nor an abstention, shall be void. The Company will only take into account voting forms received three (3) days prior to the General Meeting to which they relate and which comply with the requirements set out on the convening notice.
- 13.18 Without prejudice to any legal requirements in relation to such matters being approved by a meeting of the Board of Directors and without prejudice of any other matters that must be approved by the General Meeting according to Luxembourg Law, the General Meeting is in particular (but not limited to) vested with the rights and powers in relation to the matters set out in Articles 13.18.1 and 13.18.2.
- 13.18.1 Decisions by the General Meeting with regard to the following matters shall be adopted by a simple majority of the votes validly cast, regardless of the portion of the capital represented:
- (a) approval of the annual accounts and respective inventory and balance sheet of the Company;
 - (b) distribution of dividends;
 - (c) appointment and removal of Directors, as provided in Article 6 above;
-

- (d) appointment and removal of Statutory Auditor(s), as the case may be, as provided in Article 12 above; and
- (e) the appointment and dismissal of liquidators and judgment of their accounts.

13.18.2 Decisions by the General Meeting with regard to the following matters shall be adopted with a majority of two-thirds of the votes validly cast at a meeting in which holders of at least half of the Company's issued share capital are present or represented:

- (a) amendments to the Articles;
- (b) transfer of the registered office of the Company outside the Grand Duchy of Luxembourg;
- (c) capital increases other than under the Authorized Capital and capital decreases; and
- (d) the dissolution of the Company.

13.18.3 If the quorum requirement set out in the preceding paragraph is not satisfied, a second meeting may be convened, in the manner prescribed by these Articles or by the Commercial Companies Law. The second convening notice shall reproduce the agenda and indicate the date and the results of the previous notice.

13.19 Bondholders cannot attend a General Meeting. This does not preclude shareholders who are also bondholders to attend a General Meeting in their quality as shareholders of the Company.

TITLE VI - ACCOUNTING YEAR, ALLOCATION OF PROFITS

14. ARTICLE 14.-

The accounting year of the Company shall begin on the 1st of January and shall terminate on the 31st of December of each year.

15. ARTICLE 15.

15.1 Each year on the 31st of December, the accounts are closed and the Board of Directors prepares an inventory including an indication of the value of the Company's assets and liabilities. Each shareholder may inspect the above inventory and balance sheet at the Company's registered office.

15.2 From the annual net profits of the Company, five per cent (5%) shall be allocated to the legal reserve. This allocation shall cease to be mandatory as soon and as long as such reserve amounts to ten per cent (10%) of the subscribed capital of the Company, as stated in Article 5 hereof or as increased or reduced from time to time as provided in Article 5 hereof.

15.3 The balance is at the disposal of the General Meeting.

15.4 Under the terms and conditions provided by the Luxembourg Law, the Board of Directors may proceed to the payment of interim dividends to the shareholder(s) which shall be paid at the places and on the dates decided by the Board of Directors with respect to Article 13.10.

- 15.5 The share premium, if any, may be freely distributed to the shareholder(s) according to Luxembourg Law by a resolution of the Board of Directors.

TITLE VII - DISSOLUTION, LIQUIDATION

16. ARTICLE 16.-

The Company may be dissolved by a resolution of the General Meeting. If the Company is dissolved, the liquidation will be carried out by one or more liquidators, physical or legal persons, appointed by the General Meeting, which will specify their powers and fix their remuneration.

TITLE VIII.- GENERAL PROVISIONS

17. ARTICLE 17.

17.1 In these Articles:

17.1.1 a reference to:

- (a) one gender shall include each gender;
- (b) (unless the context otherwise requires) the singular shall include the plural and vice versa;
- (c) a "**person**" includes a reference to any individual, firm, company, corporation or other body corporate, government, state or agency of a state or any joint venture, association or partnership, works council or employee representative body (whether or not having a separate legal personality);
- (d) a statutory provision or statute includes all modifications thereto and all re-enactments (with or without modifications) thereof;
- (e) a "**Business Day**" shall mean any day (other than a Saturday or a Sunday) on which banks in the Grand Duchy of Luxembourg are open for the conduct of non-automated banking operations.

17.1.2 the words "include" and "including" shall be deemed to be followed by the words "without limitation" and general words shall not be given a restrictive meaning by reason of their being preceded or followed by words indicating a particular class of acts, matters or things or by examples falling within the general words;

17.1.3 the headings to these Articles do not affect their interpretation or construction.

17.2 All matters not governed by these Articles are to be construed in accordance with the Commercial Companies Law, as amended.

Note: This Table of Contents shall not, for any purpose, be deemed to be part of this Indenture.

THIS INDENTURE, dated as of June 18, 2020, among Nexa Resources S.A., a public limited liability company validly organized under the laws of the Grand Duchy of Luxembourg having its registered office at 37A Avenue J.F. Kennedy, L-1855, Luxembourg, Grand Duchy of Luxembourg and registered with the *Registre de Commerce et des Sociétés* in Luxembourg under number B 185.489 (the “Issuer”), Nexa Resources Cajamarquilla S.A., a corporation (*sociedad anónima*) validly organized under the laws of the Republic of Peru (“Nexa CJM”), Nexa Resources Perú S.A.A., a publicly held corporation (*sociedad anónima abierta*) validly organized under the laws of the Republic of Peru (“Nexa Peru”), Nexa Recursos Minerais S.A., a corporation (*sociedade anônima*) validly organized under the laws of the Federative Republic of Brazil (“Nexa Brazil”, and, together with Nexa CJM and Nexa Peru, the “Guarantors”), and The Bank of New York Mellon, a New York banking corporation, as trustee (the “Trustee”), a paying agent (the “Principal Paying Agent” and any other paying agents to be appointed hereunder, the “Paying Agents”), transfer agent (the “Transfer Agent”), and registrar (the “Registrar”) and any other paying agents to be appointed hereunder, the “Paying Agents”.

RECITALS

WHEREAS, the Issuer has duly authorized the creation of an issue of U.S.\$500,000,000 of its 6.500% Notes due 2028 (the “Initial Notes” and, together with any Additional Notes (as defined herein) issued as provided for in Section 2.2 and 2.17 hereof, the “Notes”) of substantially the tenor and amount hereinafter set forth, and to provide therefor the Issuer has duly authorized the execution and delivery of this Indenture.

WHEREAS, Nexa CJM, Nexa Peru and Nexa Brazil have duly authorized the execution and delivery of this Indenture to provide for their Guarantees with respect to the Notes as set forth in this Indenture.

WHEREAS, all things necessary (i) to make the Initial Notes, when executed by the Issuer and authenticated and delivered hereunder and duly issued by the Issuer, the valid obligations of the Issuer, (ii) to make the Guarantees of Nexa CJM, Nexa Peru and Nexa Brazil, when executed by Nexa CJM, Nexa Peru and Nexa Brazil and endorsed on the Notes executed, authenticated and delivered hereunder, the valid obligations of Nexa CJM, Nexa Peru and Nexa Brazil and (iii) to make this Indenture a valid agreement of the Issuer, Nexa CJM, Nexa Peru and Nexa Brazil, all, in accordance with their respective terms, have been done.

NOW, THEREFORE, THIS INDENTURE WITNESSETH:

For and in consideration of the premises and the purchase of the Notes by the Holders (as defined below) thereof, it is mutually covenanted and agreed, for the equal and proportionate benefit of all Holders of the Notes, as follows:

ARTICLE I

DEFINITIONS AND OTHER PROVISIONS
OF GENERAL APPLICATION

Section 1.1. Definitions.

For all purposes of this Indenture, except as otherwise expressly provided or unless the context otherwise requires:

- (1) the terms defined in this Article have the meanings assigned to them in this Article and include the plural as well as the singular;
- (2) all accounting terms not otherwise defined herein have the meanings assigned to them in accordance with GAAP (whether or not such is indicated herein);
- (3) the words "herein," "hereof" and "hereunder" and other words of similar import refer to this Indenture as a whole and not to any particular Article, Section or other subdivision;
- (4) whenever there is mentioned in this Indenture, in any context, the payment of, or in respect of, a Redemption Price, the principal of or any premium or interest on any Note or the net proceeds received on the sale or exchange of any Notes, such mention shall be deemed to include mention of the payment of Additional Amounts to the extent that, in such context, Additional Amounts are, were or would be payable in respect thereof pursuant to this Indenture;
- (5) All references in this Indenture to "\$," "U.S.\$," "dollars" or "United States dollars" shall refer to the lawful currency of the United States.

"Act" when used with respect to any Holder, has the meaning specified in Section 1.4. "Additional Amounts" has the meaning specified in Section 11.9.

"Additional Notes" means additional 6.500% Notes due 2028 issued from time to time after the Issue Date under the terms of this Indenture.

"Affiliate" of any Person means any other Person controlling or controlled by or under direct or indirect common control with such Person. For the purposes of this definition, "control," when used with respect to any Person, means the power to direct the management and policies of such Person, directly or indirectly, whether through the ownership of voting securities, by contract or otherwise; and the terms "controlling" and "controlled" have meanings correlative to the foregoing.

"Agent Member" means any member of, or participant in, the Depositary.

"Agents" means any Paying Agent, the Registrar, the Transfer Agent and any Principal Paying Agent appointed hereunder.

“Bankruptcy Law” means Title 11, United States Code, Brazilian Federal Law No. 11,101, dated February 9, 2005, as amended, or any similar federal or state law relating to bankruptcy, insolvency, receivership, winding-up, suspension of payments, liquidation, reorganization or relief of debtors or the law of any other jurisdiction relating to bankruptcy, insolvency, receivership, winding-up, suspension of payments, liquidation, dissolution, *“procedimiento concursal ordinario,” “procedimiento concursal preventivo,” “procedimiento acelerado de refinanciación concursal,” “recuperação judicial,” “recuperação extrajudicial,”* reorganization or relief of debtors, the judicial proceedings referred to in article 13, items 2 to 11 of the Luxembourg law dated 19 December 2002 relating to the register of commerce and companies as well as the accounting and the annual accounts of companies, as amended, including in particular, bankruptcy (*faillite*), controlled management (*gestion contrôlée*), suspension of payments (*sursis de paiement*), arrangement with creditors (*concordat préventif de la faillite*) and judicial liquidation (*liquidation judiciaire*) proceedings or any amendment to, succession to or change in any such law, procedure or process.

“Bankruptcy Order” means any court order made in a proceeding pursuant to or within the meaning of any Bankruptcy Law, containing an adjudication of bankruptcy or insolvency, or providing for liquidation, receivership, winding-up, dissolution, *“procedimiento concursal ordinario,” “procedimiento concursal preventivo,” “procedimiento acelerado de refinanciación concursal,” “recuperação judicial,” “recuperação extrajudicial,”* or reorganization, or appointing a custodian of a debtor or of all or any substantial part of a debtor’s property, or providing for the staying, arrangement, adjustment or composition of Indebtedness or other relief of a debtor or in any court order made in connection with the judicial proceedings referred to in article 13, items 2 to 11 of the Luxembourg law dated 19 December 2002 relating to the register of commerce and companies as well as the accounting and the annual accounts of companies, as amended, including in particular, bankruptcy (*faillite*), controlled management (*gestion contrôlée*), suspension of payments (*sursis de paiement*), arrangement with creditors (*concordat préventif de la faillite*) and judicial liquidation (*liquidation judiciaire*) proceedings.

“Base Currency” has the meaning set forth in Section 1.14.

“Board of Directors” means the board of directors of the Issuer.

“Board Resolution” means a duly adopted resolution of the Board of Directors in full force and effect at the time of determination.

“Brazil” means the Federative Republic of Brazil and any ministry, department, authority (including the Central Bank of Brazil) or statutory corporation or other entity (including a trust), owned or controlled directly or indirectly by the Federative Republic of Brazil or any of the foregoing.

“Business Day” means each day that is not a Saturday, Sunday or other day on which banking institutions in New York, United States, Luxembourg, Grand Duchy of Luxembourg, São Paulo, Brazil or Lima, Peru are authorized or required by law to close.

“Capital Lease Obligation” of any Person means the obligation to pay rent or other payment amounts under a lease of (or other Indebtedness arrangements conveying the right to use) real or personal property of such Person which is required to be classified and accounted for as a capital lease or a liability set forth on a balance sheet of such Person in accordance with applicable GAAP. The stated maturity of such obligation shall be the date of the last payment of rent or any other amount due under such lease prior to the first date upon which such lease may be terminated by the lessee without payment of a penalty. The principal amount of such obligation shall be the capitalized amount thereof that would appear on the face of a balance sheet of such Person in accordance with applicable GAAP.

“Capital Stock” of any Person means any and all shares, interests, participations or other equivalents (however designated and whether voting or non-voting) of corporate stock or other equity participations or ownership interests, including quotas in a Brazilian limited liability quota company (*limitada*) or partnership interests, whether general or limited, of such Person.

“Cash Equivalents” means:

(1) United States dollars, Brazilian *reais*, Peruvian *soles*, euros, or money in other currencies received in the ordinary course of business of the Issuer and its Subsidiaries that are readily convertible into United States dollars or euros,

(2) any evidence of Debt with a maturity of 180 days or less issued or directly and fully guaranteed or insured by Brazil, Peru or the United States or any agency or instrumentality thereof, provided that the full faith and credit of Brazil, Peru or the United States is pledged in support thereof,

(3) (i) demand deposits, (ii) time deposits and certificates of deposit with maturities of one year or less from the date of acquisition, (iii) bankers’ acceptances with maturities not exceeding one year from the date of acquisition, and (iv) overnight bank deposits, in each case with any bank or trust company organized or licensed under the laws of Luxembourg, Brazil, Peru or the United States or any political subdivision or state thereof having capital, surplus and undivided profits in excess of U.S.\$500.0 million whose short-term debt is rated “A-2” or higher by S&P or “P-2” or higher by Moody’s,

(4) repurchase obligations with a term of not more than seven days for underlying securities of the type described in clauses (2) and (3) above entered into with any financial institution meeting the qualifications specified in clause (3) above,

(5) commercial paper rated at least P-1 by Moody’s or A-1 by S&P and maturing within six months after the date of acquisition, and

(6) money market funds at least 95% of the assets of which consist of investments of the type described in clauses (1) through (5) above.

“Change of Control” means that the Permitted Holders shall cease to own, directly or indirectly, at least a majority of the outstanding voting power of the Voting Stock of the Issuer and shall cease to have the power to direct or cause the direction of the management and policies of the Issuer.

“Change of Control Offer” has the meaning specified in Section 11.5.

“Change of Control Payment” has the meaning specified in Section 11.5.

“Change of Control Payment Date” has the meaning specified in Section 11.5.

“Central Bank” means (i) the Central Bank of Luxembourg, (ii) the Central Bank of Brazil and (iii) the Central Reserve Bank of Peru or, in each case, any successor entity thereto.

“Change of Law” has the meaning specified in Section 3.1.

“Clearstream” means Clearstream Banking, *société anonyme*.

“Code” means the United States Internal Revenue Code of 1986, as amended.

“Comparable Treasury Issue” means the United States Treasury security or securities selected by an Independent Investment Banker as having an actual or interpolated maturity comparable to the period from the Redemption Date to the Par Call Date that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities of a comparable maturity to the period from the Redemption Date to the Par Call Date.

“Comparable Treasury Price” means, with respect to any Redemption Date, (1) the average of the Reference Treasury Dealer Quotations for such redemption date, after excluding the highest and lowest such Reference Treasury Dealer Quotation, or (2) if the Issuer or a Guarantor obtains fewer than four such Reference Treasury Dealer Quotations, the average of all such quotations.

“Consolidated Total Assets” means, on a consolidated basis, the Issuer’s total amount of assets, calculated based on the most recent balance sheet delivered by the Issuer to the Trustee pursuant to this Indenture, after giving pro forma effect to any acquisition or disposition of companies, divisions, lines of businesses, operations or assets by the Issuer and its Subsidiaries subsequent to such date.

“Corporate Trust Office” means the principal office of the Trustee in The City of New York, New York, at which at any particular time its corporate trust business shall be administered, which at the date hereof is located at 240 Greenwich Street, New York, New York 10286, United States, Attention: Global Corporate Trust, Fax: (212) 815-5603, and such other offices as the Trustee may designate from time to time.

“corporation” means a corporation, association, company, limited liability company, joint stock company or business trust.

“covenant defeasance” has the meaning specified in Section 12.3.

“Default” means an event that with the passing of time or the giving of notice or both shall constitute an Event of Default.

“Defaulted Interest” has the meaning specified in Section 3.6.

“Depository” means, with respect to the Notes issuable or issued in whole or in part in the form of one or more Global Notes, DTC for so long as it shall be a clearing agency registered under the Exchange Act, or such successor as the Issuer shall designate from time to time in an Officer’s Certificate delivered to the Trustee.

“Designated Subsidiary” means (i) each Guarantor and (ii) any other Subsidiary of the Issuer which, as of the date of the Issuer’s most recent quarterly or annual, as applicable, consolidated balance sheet, constituted 15% or more of the Consolidated Total Assets of the Issuer, after giving pro forma effect to any acquisition or disposition of companies, divisions, lines of businesses, operations or assets by the Issuer and its Subsidiaries subsequent to such date.

“Director” means a member of the Board of Directors.

“Disqualified Stock” of any Person means any Capital Stock of such Person which, by its terms (or by the terms of any security into which it is convertible or for which it is exchangeable), or upon the happening of any event, matures or is mandatorily redeemable, pursuant to a sinking fund obligation or otherwise, or is redeemable at the option of the holder thereof, in whole or in part, on or prior to the Stated Maturity of the Notes.

“DTC” means The Depository Trust Company.

“Euroclear” means Euroclear Bank S.A./N.V., as operator of the Euroclear system or its successors.

“Event of Default” has the meaning specified in Section 6.1.

“Exchange Act” means the United States Securities Exchange Act of 1934, as amended (or any successor act), and the rules and regulations thereunder.

“Expiration Date” has the meaning set forth in Section 1.4.

“FATCA” means Sections 1471 to 1474 of the U.S. Internal Revenue Code of 1986, as amended.

“Fitch” means Fitch Rating Service, Inc. and its successors.

“GAAP” means, as elected from time to time by the Issuer, (i) generally accepted accounting principles prescribed by the laws, rules and regulations applicable in the jurisdiction of incorporation of the Issuer, (ii) International Financial Reporting Standards, or (iii) accounting practices generally accepted in the United States, in each case, as in effect from time to time.

“Global Note” means, as the context may require, any or all of the Regulation S Global Note(s) and the Restricted Global Note(s), evidencing all or part of a series of Notes which is issued to the Depositary or its nominee and is registered in the name of the Depositary or its nominee.

“guarantee” by any Person means any obligation, contingent or otherwise, of such Person guaranteeing, or having the economic effect of guaranteeing, any Indebtedness of any other Person (the “primary obligor”) in any manner, whether directly or indirectly, and including, without limitation, any obligation of such Person, (i) to purchase or pay (or advance or supply funds for the purchase or payment of) such Indebtedness or to purchase (or to advance or supply funds for the purchase of) any security for the payment of such Indebtedness, (ii) to purchase property, securities or services for the purpose of assuring the holder of such Indebtedness of the payment of such Indebtedness, or (iii) to maintain working capital, equity capital or other financial statement condition or liquidity of the primary obligor so as to enable the primary obligor to pay such Indebtedness (and “guaranteed,” “guaranteeing” and “guarantor” shall have meanings correlative to the foregoing); provided that, the guarantee by any Person shall not include endorsements by such Person for collection or deposit, in either case, in the ordinary course of business; provided further that, the Incurrence by the Issuer or a Designated Subsidiary of a Lien permitted under clause (2) of Section 11.10 shall not be deemed to constitute a guarantee by the Issuer or a Designated Subsidiary of any purchase money debt of such Person secured thereby.

“Guarantee” means the guarantee by the Guarantors of the due and punctual payment of the principal (and premium, if any) and interest (including any Additional Amounts) on, the Notes and other amounts due under this Indenture.

“Guarantors” mean Nexa CJM, Nexa Peru and Nexa Brazil.

“Holder” means a Person in whose name a Note is registered on the Registrar’s books.

“Incur” means, with respect to any Indebtedness or other obligation of any Person, to create, issue, incur (by conversion, exchange or otherwise), assume, guarantee or otherwise become liable in respect of such Indebtedness or other obligation including by acquisition of Subsidiaries or the recording, as required pursuant to applicable GAAP or otherwise, of any such Indebtedness or other obligation on the balance sheet of such Person (and “Incurrence,” “Incurred,” “Incurable” and “Incurring” shall have meanings correlative to the foregoing); provided that a change in applicable GAAP that results in an obligation of such Person that exists at such time becoming Indebtedness shall not be deemed an Incurrence of such Indebtedness and that neither the accrual of interest nor the accretion of original issue discount shall be deemed an Incurrence of Indebtedness; provided further that, the Issuer may elect to treat all or any portion of revolving credit debt commitments, whether or not then outstanding, of the Issuer or a Subsidiary as being incurred from and after any date beginning the date the relevant revolving credit commitment is extended to the Issuer or a Subsidiary, as the case may be, by furnishing written notice thereof to the Trustee, and any borrowings or reborrowings by the Issuer or a Subsidiary under such commitment up to the amount of such commitment designated by the Issuer or such Subsidiary as Incurred shall not be deemed to be new Incurrences of Indebtedness by the Issuer or such Subsidiary, as the case may be.

"Indebtedness" means (without duplication), with respect to any Person, whether recourse is to all or a portion of the assets of such Person and whether or not contingent, (i) every obligation of such Person for money borrowed, (ii) every obligation of such Person evidenced by bonds, debentures, notes or other similar instruments, including any such obligations Incurred in connection with the acquisition of property, assets or businesses, (iii) every reimbursement obligation of such Person with respect to letters of credit, bankers' acceptances or similar facilities issued for the account of such Person, (iv) every obligation of such Person issued or assumed as the deferred purchase price of property or services (including securities repurchase agreements but excluding trade accounts payable or accrued liabilities arising in the ordinary course of business which are payable on customary trade terms or which are being contested in good faith), (v) all obligations to redeem Disqualified Stock issued by such Person, (vi) every Net Obligation under Interest Rate or Currency Protection Agreements of such Person, (vii) every Capital Lease Obligation of such Person, and (viii) every obligation of the type referred to in clauses (i) through (vii) of another Person and all dividends of another Person the payment of which, in either case, such Person has guaranteed, other than with respect to clauses (iii) and (vi) above, in each case, if and to the extent any of the preceding items would appear as a liability upon the financial statements of the specified Person in accordance with applicable GAAP.

"Indenture" means this instrument as originally executed or as it may from time to time be supplemented or amended by one or more supplemental indentures hereto entered into pursuant to the applicable provisions hereof.

"Independent Investment Banker" means one of the Reference Treasury Dealers appointed by the Issuer or a Guarantor.

"Initial Notes" means the U.S.\$500,000,000 of Notes designated in the first paragraph of the Recitals.

"Interest Payment Date" means each January 18 and July 18, commencing January 18, 2021.

"Interest Rate or Currency Protection Agreement" of any Person means any forward contract, futures contract, swap, option, hedge or other financial agreement or arrangement (including, without limitation, caps, floors, collars and similar agreements) relating to, or the value of which is dependent upon, interest rates or currency exchange rates or indices.

"Investment Grade Rating" means a rating equal to or higher than (i) BBB- (or the equivalent) by S&P, (ii) Baa3 (or the equivalent) by Moody's or (iii) BBB- (or the equivalent) by Fitch.

"Issuer" means the Person named as the "Issuer" in the first paragraph of this instrument until a successor Person shall have become such pursuant to the applicable provisions of this Indenture and thereafter "Issuer" shall mean such successor Person.

"Issue Date" means June 18, 2020.

"Issuer Request" or "Issuer Order" means a written request or order signed in the name of the Issuer by an authorized signatory of the Issuer and delivered to the Trustee.

“Lien” means any mortgage, pledge, security interest, encumbrance or charge of any kind (including, without limitation, any conditional sale or other title retention agreement or lease in the nature thereof or any agreement to give any security interest).

“Luxembourg” means the Grand Duchy of Luxembourg and any ministry, department, authority (including the Central Bank of Luxembourg) or statutory corporation or other entity (including a trust), owned or controlled directly or indirectly by the Grand Duchy of Luxembourg or any of the foregoing.

“Maturity” when used with respect to any Note, means the date on which the principal of such Note becomes due and payable as therein or herein provided, whether at the Stated Maturity or by declaration of acceleration, call for redemption or otherwise.

“Maturity Date” means January 18, 2028.

“Moody’s” means Moody’s Investors Service, Inc. and its successors.

“Net Obligation” at any date of determination means the net amount, exclusive of any commissions or administrative fees that a Person would be obligated to pay upon the termination of an Interest Rate or Currency Protection Agreement as of such date.

“Nexa Brazil” means the Person named as “Nexa Brazil” in the first paragraph of this instrument until a successor Person shall have become such pursuant to the applicable provisions of this Indenture and thereafter “Nexa Brazil” shall mean such successor Person.

“Nexa CJM” means the Person named as “Nexa CJM” in the first paragraph of this instrument until a successor Person shall have become such pursuant to the applicable provisions of this Indenture and thereafter “Nexa CJM” shall mean such successor Person.

“Nexa Peru” means the Person named as “Nexa Peru” in the first paragraph of this instrument until a successor Person shall have become such pursuant to the applicable provisions of this Indenture and thereafter “Nexa Peru” shall mean such successor Person.

“Note Register” has the meaning specified in Section 3.4(b).

“Notes” has the meaning specified in the first paragraph of the Recitals.

“Notice of Default” has the meaning set forth in Section 7.2.

"OECD" means the Organization for Economic Co-operation and Development.

"Officer's Certificate" means a certificate signed by any of the following: the Chief Executive Officer, President, Chief Financial Officer or a Vice President; and delivered to the Trustee and containing the statements provided for in Section 1.2 hereof (if applicable).

"Opinion of Counsel" means a written opinion of legal counsel, who may be counsel for the Issuer or a Guarantor, containing the statements provided for in Section 1.2 in form and substance reasonably acceptable to the Trustee.

"Outstanding" when used with respect to the Notes, means, as of the date of determination, all the Notes theretofore authenticated and delivered under this Indenture (including, as of such date, all the Notes represented by Global Notes authenticated and delivered under this Indenture), except the reduced portion or portions of any Global Note, as such reduction or reductions shall have been endorsed on such Global Note by the Trustee as provided herein and, except:

(i) the Notes theretofore cancelled by the Trustee or delivered to the Trustee for cancellation;

(ii) the Notes for whose payment or redemption money in the necessary amount has been theretofore deposited with the Trustee or any Paying Agent (other than the Issuer) in trust or set aside and segregated in trust by the Issuer (if the Issuer shall act as its own Paying Agent) for the Holders of such Notes; provided that if such Notes are to be repurchased, notice of such repurchase has been duly given pursuant to this Indenture; and

(iii) Notes which have been issued pursuant to Section 3.5 or in exchange for or in lieu of which other Notes have been authenticated and delivered pursuant to this Indenture, other than any such Notes in respect of which there shall have been presented to the Trustee proof satisfactory to it that such Notes are held by a bona fide purchaser in whose hands such Notes are valid obligations of the Issuer;

provided, however, that in determining whether the Holders of the requisite principal amount of the Outstanding Notes have given any request, demand, authorization, direction, notice, consent or waiver hereunder, Notes owned by the Issuer or any other obligor upon the Notes or any Affiliate of the Issuer or of such other obligor shall be disregarded and deemed not to be Outstanding, except that, in determining whether the Trustee shall be protected in relying upon any such request, demand, authorization, direction, notice, consent or waiver, only Notes which a Responsible Officer of the Trustee actually knows to be so owned shall be so disregarded. Notes so owned which have been pledged in good faith may be regarded as Outstanding if the pledgee establishes to the satisfaction of the Trustee the pledgee's right so to act with respect to such Notes and that the pledgee is not the Issuer or any other obligor upon the Notes or any Affiliate of the Issuer or of such other obligor.

"Paying Agent" means any Person authorized by the Issuer to pay the principal of (and premium, if any) or interest on any Notes on behalf of the Issuer. The Issuer has initially appointed the Principal Paying Agent to act as Paying Agent.

"Payment Date" has the meaning set forth in Section 3.11(b).

"Permitted Holders" mean (i) the estate of Mr. Antonio Ermírio de Moraes and any of Mr. Ermírio Pereira de Moraes, Mrs. Maria Helena de Moraes Scripilliti and Mr. José Ermírio de Moraes Filho and any of their descendants, (ii) any Affiliate of any of the foregoing and (iii) any corporation, partnership, joint venture, association, trust, fund, unincorporated organization, or any other entity or group formed pursuant to a shareholders, control or voting agreement or similar agreement, of which any one or more of the Permitted Holders referred to in clauses (i) or (ii) hereof is a shareholder, partner, beneficiary, member or party.

"Permitted Holding Company" means any entity which owns at least 95% of the outstanding Capital Stock or other ownership interests (other than directors' qualifying shares) of the Issuer.

"Person" means any individual, corporation, partnership, joint venture, association, trust, unincorporated organization, government or agency or political subdivision thereof or any other entity.

"Peru" means the Republic of Peru and any ministry, department, authority (including the Central Reserve Bank of Peru) or statutory corporation or other entity (including a trust), owned or controlled directly or indirectly by the Republic of Peru or any of the foregoing.

"Predecessor Note" of any particular Note means every previous Note evidencing all or a portion of the same debt as that evidenced by such particular Note; and, for the purposes of this definition, any Note authenticated and delivered under Section 3.5 in exchange for or in lieu of a mutilated, destroyed, lost or stolen Note shall be deemed to evidence the same debt as the mutilated, destroyed, lost or stolen Note.

"Principal Paying Agent" means The Bank of New York Mellon, a New York banking corporation, or any successor in its capacity as Principal Paying Agent.

"Rating Agency" means each of S&P, Moody's and Fitch; provided that if any of S&P, Moody's or Fitch ceases to rate the Notes or fails to make a rating on the Notes publicly available, the Issuer will appoint a replacement for such Rating Agency that is a "nationally recognized statistical rating organization" within the meaning of Rule 15c3-1(c)(2)(vi)(F) under the Exchange Act.

"Rating Date" means the date which is 90 days prior to the earlier of (i) a Change of Control and (ii) public notice of the occurrence of a Change of Control or of the intention of the Permitted Holders or the Issuer to effect a Change of Control.

"Rating Decline" means the occurrence of the following on, or within 90 days after, the date of public notice of the occurrence of a Change of Control or of the intention by a Permitted Holder or the Issuer to effect a Change of Control (which period shall be extended so long as the rating of the Notes is under publicly announced consideration for possible downgrade by any of the Rating Agencies): (i) in the event the Notes are assigned an Investment Grade Rating by at least two of the Rating Agencies on the Rating Date, the rating of the Notes by at least two of the Rating Agencies shall be below an Investment Grade Rating; or (ii) in the event the Notes are rated below an Investment Grade Rating by at least two of the Rating Agencies on the Rating Date, the rating of the Notes by at least two of the Rating Agencies shall be decreased by one or more gradations (including gradations (but not outlooks) within rating categories as well as between rating categories); provided that any such Rating Decline is in whole or in part in connection with a Change of Control. The Issuer will provide the Trustee with prompt written notice of any Rating Decline, and the Trustee shall not be deemed to have knowledge of any Rating Decline until it receives such notice.

“rate(s) of exchange” has the meaning set forth in Section 1.14.

“Receivables” means receivables, chattel paper, instruments, documents or intangibles evidencing or relating to the right to payment of money in respect of the sale of goods or services.

“Redemption Date” when used with respect to any Note to be redeemed, means the date fixed for such redemption by or pursuant to this Indenture.

“Redemption Price” when used with respect to any Note to be redeemed, means the price at which it is to be redeemed pursuant to this Indenture.

“Reference Treasury Dealer” means at least four dealers which are primary United States government securities dealers in New York City reasonably designated by the Issuer or a Guarantor.

“Reference Treasury Dealer Quotation” means, with respect to each Reference Treasury Dealer and any Redemption Date, the average, as determined by the Issuer, of the bid and asked prices for the Comparable Treasury Issue (expressed in each case as a percentage of its principal amount) quoted in writing to the Issuer or a Guarantor by such Reference Treasury Dealer at 3:30p.m. New York time on the third business day preceding such Redemption Date.

“Registrar” has the meaning specified in Section 3.4(b).

“Regular Record Date” for the interest payable on any Interest Payment Date means the second day (whether or not a Business Day), as the case may be, next preceding such Interest Payment Date.

“Responsible Officer” means any officer within the corporate trust department of the Trustee, including any director, managing director, vice president, assistant vice president, trust officer, assistant trust officer or any other officer or assistant officer of the Trustee customarily performing functions similar to those performed by the persons who at that time shall be such officers having direct responsibility for the administration of this Indenture, and also means, with respect to a particular corporate trust matter, any other officer to whom such trust matter is referred because of his or her knowledge of and familiarity with the particular subject.

“Regulation S” means Regulation S (including any successor regulation thereto) under the Securities Act, as it may be amended from time to time.

“Regulation S Global Note” has the meaning set forth in Section 2.1

“Restricted Global Note” has the meaning set forth in Section 2.1.

“Restricted Notes” means the Restricted Global Note and any Successor Note, other than (i) any Note issued upon a transfer or exchange for which a certificate substantially in the form set forth in (a) Exhibit A is required to be provided and is provided pursuant to Section 3.4(c)(2) or (b) Exhibit C-2 is required to be provided and is provided pursuant to Section 3.4(c)(5), (ii) any Note issued in exchange for or in lieu of any Note specified in clause (i) of this definition or any Note issued in exchange therefor or in lieu thereof, or (iii) any Note as to which the Issuer has removed and has not replaced the legend described in Section 3.4(b).

“Restricted Property” means any mineral property (including any mineral concessions, authorizations or rights in respect of minerals granted by any governmental authority), concentrate plant, manufacturing or processing plant used in connection with the processing, refining or manufacturing of metals or minerals, power plant or transmission lines of the Issuer or any Designated Subsidiary and any capital stock of any Subsidiary directly owning any such mineral property, concentrate, manufacturing or processing plant, power plant or transmission lines.

“Reuters” means Reuters Group plc, a U.K. corporation, and its successors and assigns.

“Rule 144A” means Rule 144A (including any successor regulation thereto) under the Securities Act, as it may be amended from time to time.

“S&P” means S&P Global Ratings, a business unit of Standard & Poor’s Financial Services LLC and its successors.

“SEC” means the United States Securities and Exchange Commission.

“Securities Act” means the United States Securities Act of 1933, as amended, and the rules and regulations of the SEC promulgated thereunder.

“Securitization Transaction” means a transaction in which the Issuer or a Subsidiary thereof sells or transfers an interest in Receivables (and/or any rights arising under the documentation governing or relating to such Receivables covered by such transaction, any proceeds of Receivables and any lockboxes or accounts in which such proceeds are deposited and any related assets) to a special purpose entity that issues securities payable from collections of such Receivables or other assets.

“Special Record Date” for the payment of any Defaulted Interest means a date fixed by the Trustee pursuant to Section 3.6.

“Stated Maturity” when used with respect to any Note or any installment of interest thereon, means the date specified in such Note as the date on which the principal of such Note or such installment of interest, as the case may be, is due and payable.

“Subsidiary” of any Person means (i) a corporation more than 50% of the combined voting power of the outstanding Voting Stock of which is owned, directly or indirectly, by such Person or by one or more other Subsidiaries of such Person or by such Person and one or more Subsidiaries thereof or (ii) any other Person (other than a corporation) in which such Person, or one or more other Subsidiaries of such Person or such Person and one or more other Subsidiaries thereof, directly or indirectly, has at least a majority ownership and power to direct the policies, management and affairs thereof.

“Successor Note” of any particular Note means every Note issued after, and evidencing all or a portion of the same debt as that evidenced by, such particular Note; and, for the purposes of this definition, any Note authenticated and delivered under Section 3.5 in exchange for or in lieu of a mutilated, destroyed, lost or stolen Note shall be deemed to evidence the same debt as the mutilated, destroyed, lost or stolen Note.

“Taxes” has the meaning set forth in Section 11.9.

“Transaction Documents” has the meaning set forth in Section 11.1.

“Transfer Agent” means the agent designated by the Issuer (not including the Registrar) for the registration of transfer of securities as provided in Section 11.2.

“Treasury Rate” means, with respect to any Redemption Date, the rate per annum equal to the semi-annual equivalent yield to maturity or interpolated maturity (on a day count basis) of the Comparable Treasury Issue, assuming a price for the Comparable Treasury Issue (expressed as a percentage of its principal amount) equal to the Comparable Treasury Price for such Redemption Date.

“Trustee” means the Person named as the “Trustee” in the first paragraph of this instrument until a successor Trustee shall have been appointed pursuant to the applicable provisions of this Indenture, and thereafter “Trustee” shall mean such successor Trustee.

“United States” means the United States of America.

“U.S. Dollar Equivalent” means, with respect to any monetary amount in a currency other than the U.S. Dollar, at any time for the determination thereof, the amount of U.S. Dollars obtained by converting such foreign currency involved in such computation into U.S. Dollars at the spot rate for the purchase of U.S. Dollars with the applicable foreign currency as quoted by Reuters at approximately 11:00 a.m. (New York time) on the date not more than two Business Days prior to such determination.

“U.S. Global Notes” has the meaning specified in Section 2.1.

“Vice President” when used with respect to the Issuer or any Guarantor, means any vice president, whether or not designated by a number or a word or words added before or after the title “vice president.”

“Voting Stock” of a Person means all classes of Capital Stock of such Person then outstanding that are entitled (without regard to the occurrence of any contingency) to vote in the election of the directors of such Person, but excluding such classes of Capital Stock or other interests that are entitled, as a group in a separate cast, to appoint one director of such Person as representative of the minority shareholders.

“Wholly Owned Subsidiary” of any Person means any entity owned by such Person of which at least 95% of the outstanding Capital Stock or other ownership interests (other than directors’ qualifying shares) of such entity shall at the time be owned by such Person or by one or more Wholly Owned Subsidiaries of such Person.

Section 1.2. Compliance Certificates and Opinions.

Upon any application or request by the Issuer or a Guarantor to the Trustee to take any action under any provision of this Indenture, the Issuer or such Guarantor shall furnish to the Trustee such certificates and opinions as may be required under this Indenture; provided, however, that such certificate and opinion shall not be required in the case of the initial issuance of Notes hereunder. Each such certificate or opinion, and any certificate evidencing a determination required to be made by the Issuer or a Guarantor under this Indenture, shall be given in the form of an Officer's Certificate, if to be given by an officer of the Issuer or such Guarantor, or an Opinion of Counsel, if to be given by counsel, and shall comply with the requirements set forth in this Indenture.

Every certificate or opinion with respect to compliance by or on behalf of the Issuer or a Guarantor with a condition or covenant provided for in this Indenture shall include:

- (1) a statement that each individual signing such certificate or opinion has read such covenant or condition and the definitions herein relating thereto;
- (2) a brief statement as to the nature and scope of the examination or investigation upon which the statements or opinions contained in such certificate or opinion are based;
- (3) a statement that, in the opinion of each such individual, he has made such examination or investigation as is necessary to enable him or her to express an informed opinion as to whether or not such covenant or condition has been complied with; and
- (4) a statement as to whether, in the opinion of each such individual, such condition or covenant has been complied with.

Section 1.3. Form of Documents Delivered to Trustee.

In any case where several matters are required to be certified by, or covered by an opinion of, any specified Person, it is not necessary that all such matters be certified by, or covered by the opinion of, only one such Person, or that they be so certified or covered by only one document, but one such Person may certify or give an opinion with respect to some matters and one or more other such Persons as to other matters, and any such Person may certify or give an opinion as to such matters in one or several documents.

Any certificate of an officer of the Issuer or a Guarantor may be based, insofar as it relates to legal matters, upon an Opinion of Counsel submitted therewith, unless such officer knows, or in the exercise of reasonable care should know, that the opinion with respect to the matters upon which his certificate is based is erroneous. Any Opinion of Counsel may be based, insofar as it relates to factual matters, upon a certificate of an officer or officers of the Issuer or a Guarantor submitted therewith stating the information on which counsel is relying, unless such counsel knows, or in the exercise of reasonable care should know, that the certificate with respect to such matters is erroneous.

Where any Person is required to make, give or execute two or more applications, requests, consents, certificates, statements, opinions or other instruments under this Indenture, they may, but need not, be consolidated and form one instrument.

Section 1.4. Acts of Holders; Record Date.

Any request, demand, authorization, direction, notice, consent, waiver or other action provided by this Indenture to be given or taken by Holders may be embodied in and evidenced by one or more instruments of substantially similar tenor signed by such Holders in person or by an agent duly appointed in writing; and, except as herein otherwise expressly provided, such action shall become effective when such instrument or instruments are delivered to the Trustee and, where it is hereby expressly required, to the Issuer. Such instrument or instruments (and the action embodied therein and evidenced thereby) are herein sometimes referred to as the “Act” of the Holders signing such instrument or instruments. Proof of execution of any such instrument or of a writing appointing any such agent shall be sufficient for any purpose of this Indenture and (subject to Section 6.1) conclusive in favor of the Trustee and the Issuer, if made in the manner provided in this Section.

The fact and date of the execution by any Person of any such instrument or writing pursuant to this Section 1.4 may be proved by the affidavit of a witness of such execution or by a certificate of a notary public or other officer authorized by law to take acknowledgments of deeds, certifying that the individual signing such instrument or writing acknowledged to him or her the execution thereof. Where such execution is by a signer acting in a capacity other than his individual capacity, such certificate or affidavit shall also constitute sufficient proof of his authority. The fact and date of the execution of any such instrument or writing, or the authority of the Person executing the same, may also be proved in any other manner which the Trustee deems sufficient.

The ownership of Notes shall be proved by the Note Register.

Any request, demand, authorization, direction, notice, consent, waiver or other Act of the Holder of any Note shall bind every future Holder of the same Note and the Holder of every Note issued upon the registration of transfer thereof or in exchange therefor or in lieu thereof in respect of anything done, omitted or suffered to be done by the Trustee or the Issuer in reliance thereon, whether or not notation of such action is made upon such Note.

The Issuer may set any day as a record date for the purpose of determining the Holders of Outstanding Notes entitled to give, make or take any request, demand, authorization, direction, notice, consent, waiver or other action provided or permitted by this Indenture to be given, made or taken by Holders of Notes, provided that the Issuer may not set a record date for, and the provisions of this paragraph shall not apply with respect to, the giving or making of any notice, declaration, request or direction referred to in the next paragraph. If not set by the Issuer prior to the first solicitation of a Holder made by any Person in respect of any such matter referred to in the foregoing sentence, the record date for any such matter shall be the 30th day (or, if later, the date of the most recent list of Holders required to be provided pursuant to Section 7.1) prior to such first solicitation. If any record date is set pursuant to this paragraph, the Holders of Outstanding Notes on such record date, and no other Holders, shall be entitled to take the relevant action, whether or not such Holders remain Holders after such record date; provided that no such action shall be effective hereunder unless taken on or prior to the applicable Expiration Date by Holders of the requisite principal amount of Outstanding Notes on such record date.

The Trustee may set any day as a record date for the purpose of determining the Holders of Outstanding Notes entitled to join in the giving or making of (i) any Notice of Default, (ii) any declaration of acceleration referred to in Section 5.1, (iii) any request to institute proceedings referred to in Section 5.6(2) or (iv) any direction referred to in Section 5.11. If any record date is set pursuant to this paragraph, the Holders of Outstanding Notes on such record date, and no other Holders, shall be entitled to join in such notice, declaration, request or direction, whether or not such Holders remain Holders after such record date; provided that no such action shall be effective hereunder unless taken on or prior to the applicable Expiration Date by Holders of the requisite principal amount of Outstanding Notes on such record date. Nothing in this paragraph shall be construed to prevent the Trustee from (i) giving or making any notice required to be made pursuant to the Trustee's duties and obligations under this Indenture and (ii) setting a new record date for any action for which a record date has previously been set pursuant to this paragraph (whereupon the record date previously set shall automatically and with no action by any Person be cancelled and of no effect), and nothing in this paragraph shall be construed to render ineffective any action taken by Holders of the requisite principal amount of Outstanding Notes on the date such action is taken. Promptly after any record date is set pursuant to this paragraph, the Trustee, at the Issuer's expense, shall cause notice of such record date, the proposed action by Holders and the applicable Expiration Date to be given to the Issuer in writing and to each Holder of Notes in the manner set forth in Section 1.6.

Nothing in this paragraph shall be construed to prevent the Issuer from setting a new record date for any action for which a record date has previously been set pursuant to this paragraph (whereupon the record date previously set shall automatically and with no action by any Person be cancelled and of no effect), and nothing in this paragraph shall be construed to render ineffective any action taken by Holders of the requisite principal amount of Outstanding Notes on the date such action is taken. Promptly after any record date is set pursuant to this paragraph, the Issuer, at its own expense, shall cause notice of such record date, the proposed action by Holders and the applicable Expiration Date to be given to the Trustee in writing and to each Holder of Notes in the manner set forth in Section 1.6.

With respect to any record date set pursuant to this Section, the party hereto which sets such record dates may designate any day as the "Expiration Date," and from time to time may change the Expiration Date to any earlier or later day; provided that no such change shall be effective unless notice of the proposed new Expiration Date is given to the other party hereto in writing, and to each Holder of Notes in the manner set forth in Section 1.6, on or prior to the existing Expiration Date. If an Expiration Date is not designated with respect to any record date set pursuant to this Section, the party hereto which set such record date shall be deemed to have initially designated the 180th day after such record date as the Expiration Date with respect thereto, subject to its right to change the Expiration Date as provided in this paragraph. Notwithstanding the foregoing, no Expiration Date shall be later than the 180th day after the applicable record date.

Without limiting the foregoing, a Holder entitled hereunder to take any action hereunder with regard to any particular Note may do so with regard to all or any part of the principal amount of such Note or by one or more duly appointed agents each of which may do so pursuant to such appointment with regard to all or any part of such principal amount.

Section 1.5. Notices, Etc., to Trustee, the Paying Agents and the Issuer.

Any request, demand, authorization, direction, notice, consent, waiver or Act of Holders or other document provided or permitted by this Indenture to be made upon, given or furnished to, or filed with:

(1) the Trustee or any Agent by any Holder or by the Issuer or the Guarantor shall be sufficient for every purpose hereunder if made, given, furnished or filed, in writing in English or accompanied by a certified translation to English, to or with the Trustee at The Bank of New York Mellon, 240 Greenwich Street, New York, New York 10286, United States, Attention: Global Corporate Trust, Fax: (212) 815-5630, and such other offices as the Trustee may designate from time to time or at any other address previously furnished in writing to the Holders, the Issuer by the Trustee;

(2) the Principal Paying Agent by the Trustee, the Issuer or any Holder shall be sufficient for every purpose hereunder (except as otherwise expressly provided herein) if in writing and mailed, first class postage prepaid, to the Principal Paying Agent addressed to it at 240 Greenwich Street, New York, New York 10286, United States, Attention: Global Corporate Trust, or at any other address previously furnished in writing to the Trustee by the Principal Paying Agent;

(3) the Issuer by the Trustee or by any Holder shall be sufficient for every purpose hereunder (except as otherwise expressly provided herein) if in writing and mailed, first-class postage prepaid, to the Issuer addressed to it at 37A, Avenue J.F. Kennedy, L-1855, Luxembourg, Grand Duchy of Luxembourg, Attention: Rodrigo Menck (Group Chief Financial Officer), or at any other address previously furnished in writing to the Trustee by the Issuer;

(4) Nexa CJM by the Trustee or by any Holder shall be sufficient for every purpose hereunder (except as otherwise expressly provided herein) if in writing and mailed, first-class postage prepaid, to Nexa CJM addressed to it at Carretera Central Km 9.5, desvío a Huachipa, Lurigancho-Chosica, Provincia y Departamento de Lima, Peru, Attention: Rodrigo Menck (Group Chief Financial Officer), or at any other address previously furnished in writing to the Trustee by Nexa CJM;

(5) Nexa Peru by the Trustee or by any Holder shall be sufficient for every purpose hereunder (except as otherwise expressly provided herein) if in writing and mailed, first-class postage prepaid, to Nexa Peru addressed to it at Avenida San Borja Norte 523, Lima, Peru, Attention: Rodrigo Menck (Group Chief Financial Officer), or at any other address previously furnished in writing to the Trustee by Nexa Peru; and

(6) Nexa Brazil by the Trustee or by any Holder shall be sufficient for every purpose hereunder (except as otherwise expressly provided herein) if in writing and mailed, first-class postage prepaid, to Nexa Brazil addressed to it at Av. Engenheiro Luis Carlos Berrini, 105, São Paulo, SP 04571-010, Brazil, Attention: Rodrigo Menck (Treasurer), or at any other address previously furnished in writing to the Trustee by Nexa Brazil.

Section 1.6. Notice to Holders: Waiver.

Where this Indenture provides for notice to Holders of any event, such notice shall be sufficiently given (unless otherwise herein expressly provided) if (i) in the case of a Global Note, in writing by electronic mail, facsimile and/or by first-class mail to the Depositary, and (ii) in the case of securities other than Global Notes, in writing and mailed, first-class postage prepaid, to each Holder affected by such event, at his address as it appears in the Note Register on the Business Day immediately preceding the date of mailing, which shall be not later than the latest date (if any), and not earlier than the earliest date (if any), prescribed for the giving of such notice. In any case where notice to Holders is given by mail, neither the failure to mail such notice, nor any defect in any notice so mailed, to any particular Holder shall affect the sufficiency of such notice with respect to other Holders. Where this Indenture provides for notice in any manner, such notice may be waived in writing by the Person entitled to receive such notice, either before or after the event, and such waiver shall be the equivalent of such notice. Waivers of notice by Holders shall be filed with the Trustee, but such filing shall not be a condition precedent to the validity of any action taken in reliance upon such waiver.

In case by reason of the suspension of regular mail service or by reason of any other cause it shall be impracticable to give such notice by mail, then such notification as shall be made with the approval of the Trustee shall constitute a sufficient notification for every purpose hereunder.

Any obligation the Issuer (and the Paying Agents on its behalf) may have to publish a notice to Holders shall have been met upon delivery of the notice to the Depositary.

Section 1.7. Effect of Headings and Table of Contents.

The Article and Section headings herein and the Table of Contents are for convenience only and shall not affect the construction hereof.

Section 1.8. Successors and Assigns.

All covenants and agreements in this Indenture by each of the Issuer and the Guarantors shall bind its successors and assigns, whether so expressed or not.

Section 1.9. Separability Clause.

In case any provision in this Indenture or in the Notes or in the Guarantees shall be invalid, illegal or unenforceable, the validity, legality and enforceability of the remaining provisions of each of this Indenture, the Notes or the Guarantees shall not in any way be affected or impaired thereby.

Section 1.10. Benefits of Indenture.

Nothing in this Indenture or in the Notes, express or implied, shall give to any Person, other than the parties hereto and their successors hereunder and the Holders of Notes, any benefit or any legal or equitable right, remedy or claim under this Indenture, the Notes or the Guarantees.

Section 1.11. Governing Law.

THIS INDENTURE, THE NOTES AND THE GUARANTEES SHALL BE GOVERNED BY, AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF NEW YORK, without regard to conflicts of laws principles thereof. For the purposes of paragraph 2 of article 9 of the Brazilian Decree-Law No. 4,567, dated September 4, 1942, as amended, the Trustee shall be deemed the “proponent” of the transactions contemplated by this Indenture. Articles 470-1 through 470-19 of the Luxembourg law dated August 10, 1915 on commercial companies, as amended, which set the provisions related to the representation of the Holders of the Notes, are not applicable to the Notes or the Guarantees.

EACH OF THE PARTIES HERETO HEREBY IRREVOCABLY WAIVES, TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, ANY AND ALL RIGHT TO TRIAL BY JURY IN ANY LEGAL PROCEEDING ARISING OUT OF OR RELATING TO THIS INDENTURE, THE NOTES OR THE TRANSACTION CONTEMPLATED HEREBY.

Section 1.12. Legal Holidays.

In any case where any Interest Payment Date, Redemption Date or Stated Maturity of any Note shall not be a Business Day, then (notwithstanding any other provision of this Indenture, the Notes or the Guarantees) payment of interest or principal (and premium, if any) need not be made on such date, but may be made on the next succeeding Business Day with the same force and effect as if made on the Interest Payment Date or Redemption Date, or at the Stated Maturity, provided that no interest shall accrue on account of such delay for the period from and after such Interest Payment Date or Redemption Date or Stated Maturity, as the case may be.

Section 1.13. Consent to Jurisdiction and Service of Process.

(a) Each of the Issuer and the Guarantors agrees that any suit, action or proceeding against it brought by any Holder or the Trustee arising out of or based upon this Indenture, the Notes or the Guarantees may be instituted in any state or Federal court in the Borough of Manhattan in The City of New York, New York, and waives any objection which it may now or hereafter have to the laying of venue of any such proceeding, and irrevocably submits to the non-exclusive jurisdiction of such courts in any suit, action or proceeding.

(b) By the execution and delivery of this Indenture or any amendment or supplement hereto, each of the Issuer and the Guarantors (i) acknowledges that it has, by separate written instrument, designated and appointed Cogency Global Inc. currently located at 122 East 42nd Street, 18th Floor, New York, NY 10168, as its authorized agent upon which process may be served in any suit, action or proceeding with respect to, arising out of, or relating to, the Notes, this Indenture or the Guarantees, that may be instituted in any Federal or state court in the State of New York, The City of New York, the Borough of Manhattan, or brought under Federal or state securities laws or brought by the Trustee or the Paying Agent (whether in its individual capacity or in its capacity as Trustee or the Paying Agent, as the case may be, hereunder), and acknowledges that Cogency Global Inc. has accepted such designation, (ii) submits to the jurisdiction of any such court in any such suit, action or proceeding, and (iii) agrees that service of process upon Cogency Global Inc. shall be deemed in every respect effective service of process upon the Issuer and the Guarantors, as the case may be, in any such suit, action or proceeding. Each of the Issuer and the Guarantors further agrees to take any and all action, including the execution and filing of any and all such documents and instruments as may be necessary to continue such designation and appointment of Cogency Global Inc. in full force and effect so long as this Indenture shall be in full force and effect; provided that the Issuer and the Guarantors may and shall (to the extent Cogency Global Inc. ceases to be able to be served on the basis contemplated herein), by written notice to the Trustee, designate such additional or alternative agents for service of process under this Section 1.13 that (i) maintains an office located in the Borough of Manhattan, The City of New York in the State of New York, (ii) are either (x) counsel for the Issuer and the Guarantors or (y) a corporate service company which acts as agent for service of process for other persons in the ordinary course of its business and (iii) agrees to act as agent for service of process in accordance with this Section 1.13. Such notice shall identify the name of such agent for process and the address of such agent for process in the Borough of Manhattan, The City of New York, State of New York. Upon the request of any Holder, the Trustee shall deliver such information to such Holder. Notwithstanding the foregoing, there shall, at all times, be at least one agent for service of process for the Issuer and the Guarantors appointed and acting in accordance with this Section 1.13.

(c) To the extent that the Issuer or the Guarantors has or hereafter may acquire any immunity from jurisdiction of any court or from any legal process (whether through service of notice, attachment prior to judgment, attachment in aid of execution, execution or otherwise) with respect to itself or its property, each of the Issuer and the Guarantors hereby irrevocably waives such immunity in respect of its obligations under this Indenture, the Notes and the Guarantees, to the fullest extent permitted by law.

Section 1.14. Currency of Account; Conversion of Currency; Foreign Exchange Restrictions.

(a) U.S. Dollars are the sole currency of account and payment for all sums payable by the Issuer and the Guarantors under or in connection with the Notes, the Guarantees or this Indenture, including damages. Any amount received or recovered in a currency other than U.S. dollars (whether as a result of, or of the enforcement of, a judgment or order of a court of any jurisdiction, in the winding-up or dissolution of the Issuer or the Guarantors or otherwise) by any Holder of the Notes in respect of any sum expressed to be due to it from the Issuer or the Guarantors shall only constitute a discharge to the Issuer or the Guarantors, as the case may be, to the extent of the U.S. dollar amount which the recipient is able to purchase with the amount so received or recovered in that other currency on the date of that receipt or recovery (or, if it is not practicable to make that purchase on that date, on the first date on which it is practicable to do so). If that U.S. dollar amount is less than the U.S. dollar amount expressed to be due to the recipient under the Notes, the Issuer and the Guarantors shall, jointly and severally, indemnify it against any loss sustained by it as a result as set forth in Section 1.14(b). In any event, the Issuer and the Guarantors shall, jointly and severally, indemnify the recipient against the cost of making any such purchase. For the purposes of this Section 1.14, it will be sufficient for the Holder of a Note to certify in a satisfactory manner (indicating sources of information used) that it would have suffered a loss had an actual purchase of U.S. dollars been made with the amount so received in that other currency on the date of receipt or recovery (or, if a purchase of U.S. dollars on such date had not been practicable, on the first date on which it would have been practicable, it being required that the need for a change of date be certified in the manner mentioned above). The indemnities set forth in this Section 1.14 constitute separate and independent obligations from other obligations of the Issuer and the Guarantors, shall give rise to a separate and independent cause of action, shall apply irrespective of any indulgence granted by any Holder of the Notes and shall continue in full force and effect despite any other judgment, order, claim or proof for a liquidated amount in respect of any sum due under the Notes.

(b) The Issuer and the Guarantors covenant and agree that the following provisions shall apply to conversion of currency in the case of the Notes, the Guarantors and this Indenture:

(i) (A) if for the purpose of obtaining judgment in, or enforcing the judgment of, any court in any country, it becomes necessary to convert into a currency (the “judgment currency”) an amount due in any other currency (the “Base Currency”), then the conversion shall be made at the rate of exchange prevailing on the Business Day before the day on which the judgment is given or the order of enforcement is made, as the case may be (unless a court shall otherwise determine), and

(B) if there is change in the rate of exchange prevailing between the Business Day before the day on which the judgment is given or an order of enforcement is made, as the case may be (or such other date as a court shall determine), and the date of receipt of the amount due, the Issuer or the Guarantors, as the case may be, will pay such additional (or, as the case may be, such lesser) amount, if any, as may be necessary so that the amount paid in the judgment currency when converted at the rate of exchange prevailing on the date of receipt will produce the amount in the Base Currency originally due;

(ii) in the event of the winding-up of the Issuer or the Guarantors at any time while any amount or damages owing under the Notes, the Guarantees and this Indenture, or any judgment or order rendered in respect thereof, shall remain outstanding, the Issuer and the Guarantors shall, jointly and severally, indemnify and hold the Holders and the Trustee harmless against any deficiency arising or resulting from any variation in rates of exchange between (1) the date as of which the U.S. Dollar Equivalent of the amount due or contingently due under the Notes, the Guarantees and this Indenture (other than under this Subsection (b)(ii)) is calculated for the purposes of such winding-up and (2) the final date for the filing of proofs of claim in such winding-up. For the purpose of this subsection (b)(ii), the final date for the filing of proofs of claim in the winding-up of the Issuer or the Guarantors, as the case may be, shall be the date fixed by the liquidator or otherwise in accordance with the relevant provisions of applicable law as being the latest practicable date as at which liabilities of the Issuer or the Guarantors, as the case may be, may be ascertained for such winding-up prior to payment by the liquidator or otherwise in respect thereto;

(iii) the obligations contained in Subsections (a), (b)(i)(B) and (b)(ii) of this Section 1.14 shall constitute separate and independent obligations from the other obligations of the Issuer and the Guarantors under the terms of this Indenture, shall give rise to separate and independent causes of action against the Issuer and the Guarantors, shall apply irrespective of any waiver or extension granted by any Holder or the Trustee or either of them from time to time and shall continue in full force and effect notwithstanding any judgment or order or the filing of any proof of claim in the winding-up of the Issuer or the Guarantors for a liquidated sum in respect of amounts due hereunder (other than under Subsection (b)(ii) above) or under any such judgment or order. Any such deficiency as aforesaid shall be deemed to constitute a loss suffered by the Holders or the Trustee, as the case may be, and no proof or evidence of any actual loss shall be required by the Issuer or the Guarantors or the liquidator or otherwise or any of them. In the case of subsection (b)(ii) above, the amount of such deficiency shall not be deemed to be reduced by any variation in rates of exchange occurring between the said final date and the date of any liquidating distribution; and

(iv) the term “rate(s) of exchange” shall mean the rate of exchange quoted by Reuters at 10:00 a.m. (New York time) for spot purchases of the Base Currency with the judgment currency other than the Base Currency referred to in Subsections (b)(i) and (b)(ii) above and includes any premiums and costs of exchange payable.

(c) In the event that on any Interest Payment Date, the Maturity Date or Redemption Date, as the case may be, in respect of the Guarantee provided by a Guarantor, any restrictions or prohibition of access to the foreign exchange market of the jurisdiction of incorporation of a Guarantor exists, such Guarantor agrees to pay all amounts payable under the Notes and such Guarantee in the currency of the Notes by means of any legal procedure existing in such jurisdiction of incorporation (except commencing legal proceedings against the relevant Central Bank), on any due date for payment under the Notes, for the purchase of the currency of such Notes. All costs and taxes payable in connection with the procedures referred to in this Section 1.14 shall be borne by the relevant Guarantor.

(d) Notwithstanding anything to the contrary contained herein, neither the Trustee nor the Principal Paying Agent shall have any liability for converting into U.S. Dollars any amount received by any Holder in a currency other than U.S. Dollars.

Section 1.15. Counterparts.

This Indenture may be executed in two or more counterparts, each of which shall be deemed to be an original, but all of which together shall constitute one and the same instrument. The words "execution," "signed," "signature," and words of like import in this Indenture or in any other certificate, agreement or document related to this Indenture shall include images of manually executed signatures transmitted by facsimile or other electronic format (including, without limitation, "pdf", "tif" or "jpg") and other electronic signatures (including, without limitation, DocuSign and AdobeSign). The use of electronic signatures and electronic records (including, without limitation, any contract or other record created, generated, sent, communicated, received, or stored by electronic means) shall be of the same legal effect, validity and enforceability as a manually executed signature or use of a paper-based recordkeeping system to the fullest extent permitted by applicable law, including, without limitation, the Federal Electronic Signatures in Global and National Commerce Act, the New York State Electronic Signatures and Records Act and any other applicable law, including, without limitation, any state law based on the Uniform Electronic Transactions Act or the Uniform Commercial Code.

Section 1.16. Force Majeure.

In no event shall the Trustee or any Agent be responsible or liable for any failure or delay in the performance of its obligations hereunder arising out of or caused by, directly or indirectly, forces beyond its control, including, without limitation, strikes, work stoppages, accidents, acts of war or terrorism, civil or military disturbances, nuclear or natural catastrophes or acts of God, and interruptions, loss or malfunctions of utilities, communications or computer (software and hardware) services; it being understood that the Trustee or such Agent shall use reasonable efforts which are consistent with accepted practices in the banking industry to resume performance as soon as practicable under the circumstances.

Section 1.17. U.S.A. PATRIOT Act.

In order to comply with the laws, rules, regulations and executive orders in effect from time to time applicable to banking institutions, including, without limitation, those relating to the funding of terrorist activities and money laundering, including Section 326 of the USA PATRIOT Act of the United States ("Applicable Law"), the Trustee and Agents are required to obtain, verify, record and update certain information relating to individuals and entities which maintain a business relationship with the Trustee and Agents. Accordingly, each of the parties agrees to provide to the Trustee and Agents, upon their request from time to time such identifying information and documentation as may be available for such party in order to enable the Trustee and Agents to comply with Applicable Law.

Section 1.18. Anti-Money Laundering, Terrorism and Economic Sanctions.

(a) The Trustee or any Agent may take and instruct any delegate to take any action which it in its sole discretion considers appropriate so as to comply with any applicable law, regulation, request of a public or regulatory authority or any internal group policy (including any "Know Your Client" and/or other compliance policy) which relates to the prevention of fraud, money laundering, terrorism or other criminal activities or the provision of financial and other services to sanctioned persons or entities. Such action may include but is not limited to the interception and investigation of transactions on the Issuer's or any Guarantor's accounts (particularly those involving the international transfer of funds) including the source of the intended recipient of funds paid into or out of the Issuer's or any Guarantor's accounts. None of the Trustee, any Agent or any delegate will be liable for any loss (whether direct or consequential and including, without limitation, loss of profit or interest) caused in whole or in part by any actions which are taken by the Trustee, any Agent or any delegate pursuant to this Section 1.18.

(b) The Issuer and each Guarantor covenants and represents, jointly and severally, that neither it nor any of their respective subsidiaries or their respective directors or officers, and, to the knowledge of the Issuer or any Guarantor, any of their affiliates are the target or subject of any sanctions enforced by the US Government, (including, without limitation, the Office of Foreign Assets Control of the US Department of the Treasury or the US Department of State), the United Nations Security Council, the European Union, Her Majesty's Treasury, or other relevant sanctions authority (collectively "Sanctions");

(c) The Issuer and each Guarantor covenants and represents, jointly and severally, that neither it nor any of their respective subsidiaries or their respective directors or officers will directly or indirectly use any repayments/reimbursements made pursuant to this Indenture, (i) to fund or facilitate any activities of or business with any person who, at the time of such funding or facilitation, is the subject or target of Sanctions, (ii) to fund or facilitate any activities of or business with any country or territory that is the target or subject of Sanctions, or (iii) in any other manner that will result in a violation of Sanctions by any Person.

Section 1.19. Effective Date.

This Indenture shall become effective on the date hereof and shall be binding upon the Issuer, the Guarantors, the Trustee, the Registrar, the Paying Agent and the Principal Paying Agent.

ARTICLE II

NOTE FORMS

Section 2.1. Forms Generally.

The Notes, the Trustee's certificates of authentication thereof and the Guarantees endorsed thereon shall be substantially in the forms set forth in this Article, with such appropriate legends, insertions, omissions, substitutions and other variations as are required or permitted by this Indenture, and may have such letters, numbers or other marks of identification and such legends or endorsements placed thereon as may be required to comply with the rules of any securities exchange or as may, consistently herewith, be determined by the officers executing such Notes or Guarantees, as the case may be, as evidenced by their execution of the Notes.

The definitive Notes and the Guarantees to be endorsed thereon shall be printed, lithographed or engraved or produced by any combination of these methods on steel engraved borders or may be produced in any other manner all as determined by the officers executing such Notes, as evidenced by their execution of such Notes or Guarantees, as the case may be.

In certain cases described elsewhere herein, the legends set forth in the first three paragraphs of Section 2.2 may be omitted from Notes issued hereunder.

Notes offered and sold in their initial distribution in reliance on Regulation S will be initially issued in the form of one or more Global Notes in fully registered form without interest coupons, substantially in the form of Note set forth in Section 2.2 and 2.3 (the "Regulation S Global Note"), which shall be registered in the name of the Depositary or its nominee and deposited with the Trustee, at its Corporate Trust Office, as custodian for the Depositary, duly executed by the Issuer and the Guarantors and authenticated by the Trustee as hereinafter provided, for credit by the Depositary to the respective accounts of the beneficial owners of the Notes represented thereby (or such other accounts as they may direct).

Notes offered and sold in their initial distribution in reliance on Rule 144A shall be issued in the form of one or more Global Notes (collectively, and, together with their Successor Notes, the “Restricted Global Note”) in fully registered form without interest coupons, substantially in the form of Note set forth in Section 2.2 and 2.3, with such applicable legends as are provided for in Section 2.2, except as otherwise permitted herein. Such Restricted Global Note shall be registered in the name of the Depositary or its nominee and deposited with the Trustee, at its Corporate Trust Office, as custodian for the Depositary, duly executed by the Issuer and the Guarantors and authenticated by the Trustee as hereinafter provided, for credit by the Depositary to the respective accounts of beneficial owners of the Notes represented thereby (or such other accounts as they may direct). The aggregate principal amount of the Restricted Global Note may be increased or decreased from time to time by adjustments made on the records of the Trustee, as custodian for the Depositary, in connection with a corresponding decrease or increase in the aggregate principal amount of the Regulation S Global Note, as hereinafter provided.

Section 2.2. Form of Face of Note.

[Include if Note is a Restricted Global Note — THIS NOTE (OR ITS PREDECESSOR) WAS ORIGINALLY ISSUED IN A TRANSACTION EXEMPT FROM REGISTRATION UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED, OR THE SECURITIES ACT, AND THIS NOTE MAY NOT BE REOFFERED, SOLD OR

OTHERWISE TRANSFERRED IN THE ABSENCE OF SUCH REGISTRATION OR AN APPLICABLE EXEMPTION THEREFROM. EACH PURCHASER OF THIS NOTE IS HEREBY NOTIFIED THAT THE SELLER OF THIS NOTE MAY BE RELYING ON THE EXEMPTION FROM THE PROVISIONS OF SECTION 5 OF THE SECURITIES ACT PROVIDED BY RULE 144A THEREUNDER. THE HOLDER OF THIS NOTE AGREES FOR THE BENEFIT OF THE ISSUER OR ANY SUBSIDIARY THAT (A) THIS NOTE MAY BE REOFFERED, RESOLD, PLEDGED OR OTHERWISE TRANSFERRED, ONLY (I) TO A PERSON WHOM THE SELLER REASONABLY BELIEVES IS A QUALIFIED INSTITUTIONAL BUYER (AS DEFINED IN RULE 144A UNDER THE SECURITIES ACT) IN A TRANSACTION MEETING THE REQUIREMENTS OF RULE 144A, (II) OUTSIDE THE UNITED STATES TO A PERSON THAT IS NOT A U.S. PERSON IN AN OFFSHORE TRANSACTION IN ACCORDANCE WITH RULE 904 UNDER THE SECURITIES ACT, (III) PURSUANT TO ANOTHER AVAILABLE EXEMPTION UNDER THE SECURITIES ACT, (IV) TO THE ISSUER OR ANY SUBSIDIARY OF THE ISSUER OR (V) PURSUANT TO AN EFFECTIVE REGISTRATION STATEMENT UNDER THE SECURITIES ACT, IN EACH OF CASES (I) THROUGH (V) IN ACCORDANCE WITH ANY APPLICABLE SECURITIES LAWS OF ANY STATE OF THE UNITED STATES; AND (B) THE HOLDER WILL, AND EACH SUBSEQUENT HOLDER IS REQUIRED TO, NOTIFY ANY PURCHASER OF THIS NOTE FROM IT OF THE RESALE RESTRICTIONS REFERRED TO IN (A) ABOVE. THIS LEGEND MAY ONLY BE REMOVED AT THE OPTION OF THE ISSUER.]

[Include if Note is a Regulation S Global Note — THIS NOTE (OR ITS PREDECESSOR) WAS ORIGINALLY ISSUED IN A TRANSACTION EXEMPT FROM REGISTRATION UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED, OR THE SECURITIES ACT, AND MAY NOT BE TRANSFERRED IN THE UNITED STATES OR TO, OR FOR THE ACCOUNT OR BENEFIT OF, ANY U.S. PERSON EXCEPT PURSUANT TO AN AVAILABLE EXEMPTION FROM THE REGISTRATION REQUIREMENTS OF THE SECURITIES ACT AND ALL APPLICABLE STATE SECURITIES LAWS. TERMS USED ABOVE HAVE THE MEANINGS GIVEN TO THEM IN REGULATION S UNDER THE SECURITIES ACT.]

Nexa Resources S.A., a validly organized public limited liability company validly organized under the laws of the Grand Duchy of Luxembourg having its registered office at 37A Avenue J.F. Kennedy, L-1855, Luxembourg, Grand Duchy of Luxembourg and registered with the *Registre de Commerce et des Sociétés* in Luxembourg under number B 185.489 (herein called the “Issuer,” which term includes any successor Person under the Indenture hereinafter referred to), for value received, hereby promises to pay to Cede & Co. or its registered assigns, the principal sum of Dollars [*include if Note is a Global Note — (or such other Principal Sum as is noted in the records of the Custodian for the Depositary as being the Principal Amount of this Regulation S Global Note/Restricted Global Note for the time being)*] on January 18, 2028, and to pay interest thereon from June 18, 2020, or from the most recent Interest Payment Date to which interest has been paid or duly provided for, semi-annually on January 18 and June 18 in each year, commencing on January 18, 2021, at the rate of 6.500% per annum, until the principal hereof is paid or made available for payment. The interest so payable, and punctually paid or duly provided for, on any Interest Payment Date will, as provided in such Indenture, be paid to the Person in whose name this Note (or one or more Predecessor Notes) is registered at the close of business on the Regular Record Date for such interest, which shall be two calendar days prior to payment (whether or not a Business Day), as the case may be, next preceding such Interest Payment Date. Any such interest not so punctually paid or duly provided for will forthwith cease to be payable to the Holder on such Regular Record Date and may either be paid to the Person in whose name this Note (or one or more Predecessor Notes) is registered at the close of business on a Special Record Date for the payment of such Defaulted Interest to be fixed by the Trustee, notice whereof shall be given to Holders of Notes not less than 10 days prior to such Special Record Date, or be paid at any time in any other lawful manner not inconsistent with the requirements of any securities exchange on which the Notes may be listed, and upon such notice as may be required by such exchange, all as more fully provided in said Indenture. In addition, the Issuer will pay to the Holder of this Note such Additional Amounts as may become payable under Section 11.9 of the Indenture.

In the case of a default in payment of principal and premium, if any, upon acceleration or repayment, interest shall be payable pursuant to the preceding paragraph on such overdue principal (and premium, if any), such interest shall be payable on demand and, if not so paid on demand, such interest shall itself bear interest at the rate per annum stated above plus 1% (to the extent that the payment of such interest shall be legally enforceable), and shall accrue from the date such principal and/or premium, as the case may be, was due and payable to the date payment of such interest has been made or duly provided for, and such interest on unpaid interest shall also be payable on demand.

Payment of the principal of (and premium, if any) and interest on this Note will be made at the Corporate Trust Office of the Trustee, at the offices of a Paying Agent, at the office or agency of the Issuer maintained for that purpose in The City of New York, New York, and at any other office or agency maintained by the Issuer for such purpose, in such coin or currency of the United States as at the time of payment is legal tender for payment of public and private debts; provided, however, that at the option of the Issuer payment of interest may be made by check mailed to the address of the Person entitled thereto as such address shall appear in the Note Register.

Reference is hereby made to the further provisions of this Note set forth on the reverse hereof, which further provisions shall for all purposes have the same effect as if set forth at this place.

Unless the certificate of authentication hereon has been executed by the Trustee referred to on the reverse hereof by manual or electronic signature, this Note shall not be entitled to any benefit under the Indenture or be valid or obligatory for any purpose.

IN WITNESS WHEREOF, the Issuer has caused this instrument to be duly executed.

Section 2.3. Form of Reverse of Note.

This Note is one of a duly authorized issue of Notes of the Issuer designated as its 6.500% Notes due 2028 (the “Notes”) issued under an Indenture, dated as of June 18, 2020 (herein called the “Indenture”), among the Issuer, the Guarantors named therein, and The Bank of New York Mellon, a New York banking corporation, as trustee (the “Trustee”), as principal paying agent (the “Principal Paying Agent” and any other paying agents to be appointed hereunder, the “Paying Agents”), as transfer agent (the “Transfer Agent”) and registrar (the “Registrar”). Reference is hereby made to the Indenture and all indentures supplemental thereto for a statement of the respective rights, limitations of rights, duties and immunities thereunder of the Issuer, the Guarantors, the Trustee, the Transfer Agent and the Notes are, and are to be, authenticated and delivered. Terms used but not defined in this Note are defined in the Indenture.

As provided in the Indenture and subject to certain limitations therein set forth, the obligations of the Issuer under the Indenture and this Note are guaranteed pursuant to the Guarantees set forth in the Indenture. Each Holder, by holding this Note, agrees to all of the terms and provisions of said Guarantees. Reference is hereby made to the Indenture for a statement of the respective rights, limitations of rights, duties and obligations thereunder of the Guarantors, the Trustee and the Holders.

The Issuer may from time to time, without the consent of the Holders of the Notes, create and issue Additional Notes having the same terms and conditions as the Notes in all respects, except that the issue date, the issue price and the first payment of interest thereon may differ; provided, however, that unless the Additional Notes are treated as part of the same “issue” of debt instruments as the original series or are issued pursuant to a “qualified reopening” of the original series, or are issued with no more than a *de minimis* amount of original issue discount, in each case for U.S. federal income tax purposes the additional notes will have a separate CUSIP, or ISIN number. Additional Notes shall be consolidated with and shall form a single series and vote together with the previously issued Notes for all purposes hereof.

If as a result of any Change of Law (as defined in the Indenture): (i) the Issuer or a Guarantor is or would be required on the next succeeding Interest Payment Date to pay any Additional Amounts referred to in Section 11.9 of the Indenture; or (ii) the issuers/borrowers of certain intercompany debt are or would be required on the next succeeding Interest Payment Date to pay Brazilian withholding taxes in excess of a general rate of 15%, or 25% in case of amounts paid to residents of countries which do not impose any income tax or which impose it at a maximum rate lower than 20% (or 17% if the relevant jurisdiction is committed to adopt international standards on tax transparency) or where the laws of that country or location impose restrictions on the disclosure of (x) shareholding composition; (y) the ownership of the investment; or (z) the beneficial ownership of income paid to non-resident persons, pursuant to Law No. 9,779, dated January 19, 1999; provided that, such requirement to pay such taxes in excess of such rate was not caused by, or otherwise the result of, whether directly or indirectly, wholly or in part, any amendment to the intercompany debt, and in either case, the payment of such excess amounts cannot be avoided by the use of any reasonable measures available to the Issuer or a Guarantor, the Notes may be repurchased, by the Issuer at the option of the Issuer or a Guarantor, in whole but not in part, upon not less than 30 nor more than 90 days' notice to the Holders, which notice will be published, at any time following such Change of Law at a repurchase price equal to the principal amount thereof, plus accrued and unpaid interest, if any, to the date fixed for repurchase.

The Issuer or a Guarantor will also pay to Holders of the Notes on the Redemption Date any Additional Amounts which are payable. Following such repurchase, the Notes will be cancelled, or remain Outstanding, at the Issuer's or a Guarantor's election. Prior to the delivery of any notice of repurchase in accordance with the foregoing, the Issuer or a Guarantor shall deliver to the Trustee and the Principal Paying Agent an Officer's Certificate stating that the Issuer or a Guarantor, as the case may be, is entitled to effect such repurchase based on an Opinion of Counsel or written advice of a qualified tax expert, that the Issuer or a Guarantor has or will, or there is a substantial probability that the Issuer or a Guarantor has or will, become obligated to pay such Additional Amounts as a result of such Change of Law. Such notice, once delivered by the Issuer or a Guarantor to the Trustee, will be irrevocable.

At any time before October 18, 2027 (which is the date that is three months prior to maturity of the notes (the "Par Call Date")), the Issuer or a Guarantor has the right to redeem the Notes, in whole or in part and from time to time, at a redemption price equal to the greater of (1) 100% of the principal amount of the Notes being redeemed and (2) the sum of the present values of the remaining scheduled payments of principal and interest on the Notes being redeemed that would be due if the Notes matured on the Par Call Date (inclusive of interest accrued to the redemption date), discounted to the Redemption Date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Treasury Rate plus 50 basis points, and in the case of clause (1) only, accrued and unpaid interest on the principal amount of the Notes being redeemed to, but excluding, such Redemption Date.

At any time on or after the Par Call Date, the Issuer or a Guarantor has the right to redeem the Notes, in whole or in part and from time to time, at a redemption price equal to 100% of the principal amount of the Notes being redeemed plus accrued and unpaid interest on the principal amount of the Notes being redeemed to, but excluding, such Redemption Date.

The Issuer, any Guarantor or any of their respective Affiliates may at any time repurchase the Notes at any price in the open market or otherwise. The Issuer, any Guarantor or any of their respective Affiliates may hold or resell the Notes it purchases or may surrender them to the Trustee or an Agent for cancellation.

[Include if Note is a Regulation S Global Note — If the holder of a beneficial interest in this Regulation S Global Note at any time wishes to transfer such interest to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Restricted Global Note, such transfer may be effected, subject to the rules and procedures of the Depositary, Euroclear and Clearstream, in each case to the extent applicable and as in effect from time to time, only in accordance with the terms of this paragraph. Upon receipt by the Trustee, as Registrar, of (A) written instructions given by or on behalf of the Depositary in accordance with the rules and procedures of the Depositary, Euroclear and Clearstream, in each case to the extent applicable and as in effect from time to time directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Restricted Global Note in a specified principal amount and to cause to be debited from another specified Agent Member's account a beneficial interest in this Regulation S Global Note in an equal principal amount; and (B) a certificate in substantially the form set forth in Exhibit B to the Indenture signed by or on behalf of the Agent Member holding such beneficial interest in this Regulation S Global Note, the Trustee, as Registrar, shall reduce the principal amount of this Regulation S Global Note and increase the principal amount of the Restricted Global Note by such specified principal amount.]

[Include if Note is a Restricted Global Note — If the holder of a beneficial interest in this Restricted Global Note wishes at any time to transfer such interest to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Regulation S Global Note, such transfer may be effected, subject to the rules and procedures of the Depositary, Euroclear and Clearstream, in each case to the extent applicable and as in effect from time to time, only in accordance with the terms of this paragraph. Upon receipt by the Trustee, as Registrar of:

(A) written instructions given by or on behalf of the Depositary in accordance with the rules and procedures of the Depositary, Euroclear and Clearstream, in each case to the extent applicable and as in effect from time to time directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Regulation S Global Note in a specified principal amount and to cause to be debited from another specified Agent Member's account a beneficial interest in the Restricted Global Note in an equal principal amount; and

(B) a certificate in substantially the form set forth in Exhibit A of the Indenture signed by or on behalf of the Agent Member holding such beneficial interest in this Restricted Global Note,

the Trustee, as Registrar, shall reduce the principal amount of this Restricted Global Note, and increase the principal amount of the Regulation S Global Note by such specified principal amount.]

The Notes do not have the benefit of any sinking fund obligations.

In the event of redemption or purchase of this Note in part only, a new Note or Notes of like tenor for the unredeemed or unpurchased portion hereof will be issued in the name of the Holder hereof upon the cancellation hereof.

If an Event of Default shall occur and be continuing, the principal of all the Notes may be declared due and payable in the manner and with the effect provided in the Indenture.

The Indenture contains provisions for defeasance at any time of (i) the entire indebtedness of this Note, or (ii) certain restrictive covenants and Events of Default with respect to this Note, in each case upon compliance with certain conditions set forth therein.

Unless the context otherwise requires, the Notes shall constitute one series for all purposes under the Indenture, including without limitation, amendments, waivers or redemption.

The Indenture permits, with certain exceptions as therein provided, the amendment thereof and the modification of the rights and obligations of the Issuer and the Guarantors and the rights of the Holders of the Notes under the Indenture at any time by the Issuer and the Trustee with the consent of the Holders of a majority in aggregate principal amount of the Notes at the time Outstanding. The Indenture also contains provisions permitting the Holders of specified percentages in aggregate principal amount of the Notes at the time Outstanding, on behalf of the Holders of all the Notes, to waive compliance by the Issuer or the Guarantors with certain provisions of the Indenture and certain past defaults under the Indenture and their consequences.

Any such consent or waiver by the Holder of this Note shall be conclusive and binding upon such Holder and upon all future Holders of this Note and of any Note issued upon the registration of transfer hereof or in exchange herefor or in lieu hereof, whether or not notation of such consent or waiver is made upon this Note.

No reference herein to the Indenture and no provision of this Note or of the Indenture shall alter or impair the obligation of the Issuer, which is absolute and unconditional, to pay the principal of (and premium, if any) and interest on this Note at the times, place and rate, and in the coin or currency, herein prescribed.

As provided in the Indenture and subject to certain limitations therein set forth, the transfer of this Note is registrable in the Note Register, upon surrender of this Note for registration of transfer at the office or agency of the Issuer in the Borough of Manhattan, The City of New York, New York, or of any of the Transfer Agents duly endorsed by, or accompanied by a written instrument of transfer in form satisfactory to the Issuer duly executed by, the Holder hereof or his attorney duly authorized in writing, and thereupon one or more new Notes, of authorized denominations and like tenor and for the same aggregate principal amount, will be issued to the designated transferee or transferees.

The Notes are issuable only in registered form without coupons in minimum denominations of U.S.\$200,000 and integral multiples of U.S.\$1,000 in excess thereof. As provided in the Indenture and subject to certain limitations therein set forth, Notes are exchangeable for a like tenor and aggregate principal amount of Notes of a different authorized denomination, as requested by the Holder surrendering the same.

No service charge shall be made for any such registration of transfer or exchange, but the Issuer or the Trustee may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection therewith.

Prior to due presentment of this Note for registration of transfer, the Issuer, the Trustee, the Transfer Agents and any agent of the Issuer or the Trustee may treat the Person in whose name this Note is registered as the owner hereof for all purposes, whether or not this Note be overdue, and none of the Issuer, the Trustee or any such agent shall be affected by notice to the contrary.

Interest on this Note shall be computed on the basis of a 360-day year of twelve 30-day months each and, in the case of an incomplete month, on the number of days elapsed based on a 30-day month.

All terms used in this Note which are defined in the Indenture shall have the meanings assigned to them in the Indenture.

THE INDENTURE, THIS NOTE AND THE GUARANTEES SHALL BE GOVERNED BY, AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF NEW YORK, without regard to conflicts of laws principles thereof. For the purposes of paragraph 2 of article 9 of the Brazilian Decree-Law No. 4,567, dated September 4, 1942, as amended, the Trustee shall be deemed the “proponent” of the transactions contemplated by the Indenture. Articles 84 through 94-8 of the Luxembourg law dated August 10, 1915 on commercial companies, as amended, which set the provisions related to the representation of the Holders of the Notes, are not applicable to the Notes or the Guarantees.

The Issuer and the Guarantors agree that any suit, action or proceeding against any of them brought by any Holder or the Trustee arising out of or based upon this Indenture, the Notes or the Guarantees may be instituted in any state or Federal court in The City of New York, New York, and waive any objection which any of them may now or hereafter have to the laying of venue of any such proceeding, and irrevocably submits to the non-exclusive jurisdiction of such courts in any suit, action or proceeding.

The Issuer may change any Paying Agent, the Registrar or Transfer Agent; provided that the Issuer will maintain an office or agency where the Notes may be presented or surrendered for payment and for registration of transfer in the Borough of Manhattan, The City of New York. Upon any such change, the Issuer shall give written notice thereof to the Trustee, the Principal Paying Agent and the Holders.

U.S. dollars are the sole currency of account and payment for all sums payable by the Issuer and the Guarantors under or in connection with the Notes, the Guarantees or the Indenture, including damages. The Issuer and the Guarantors have agreed that the provisions of Section 1.14 of the Indenture shall apply to conversion of currency in the case of the Notes, the Guarantees and the Indenture. Among other things, Section 1.14 specifies that if there is a change in the rate of exchange prevailing between the Business Day before the day on which a judgment is given or an order of enforcement is made, as the case may be (or such other date as a court shall determine), and the date of receipt of the amount due, the Issuer or the relevant Guarantor, as the case may be, will pay such additional (or, as the case may be, such lesser) amount, if any, as may be necessary so that the amount paid in the judgment currency when converted at the rate of exchange prevailing on the date of receipt will produce the amount in the Base Currency originally due.

Each of the Issuer and the Guarantors has appointed Cogency Global Inc., currently located at 122 East 42nd Street, 18th Floor, New York, NY 10168, as its authorized agent upon which process may be served in any suit, or proceeding with respect to, arising out of, or relating to, this Note, the Indenture or the Guarantees, that may be instituted in any Federal or state court in the State of New York, The City of New York, the Borough of Manhattan, or brought under Federal or state securities laws and has agreed that there shall, at all times, be at least one agent for service of process for the Issuer and the Guarantors appointed and acting in accordance with the provisions of Section 1.13 of the Indenture relating to agent for service of process. To the extent that the Issuer or the Guarantors has or hereafter may acquire any immunity from jurisdiction of any court or from any legal process (whether through service of notice, attachment prior to judgment, attachment in aid of execution, execution or otherwise) with respect to itself or its property, each of the Issuer and the Guarantors has irrevocably waived such immunity in respect of its obligations under the Indenture, this Note and the Guarantees, to the fullest extent permitted by law.

Section 2.4. Form of Trustee's Certificate of Authentication.

This is one of the Notes with the Guarantees referred to in the within-mentioned Indenture.

THE BANK OF NEW YORK MELLON *as Trustee*

ARTICLE III

THE NOTES

Section 3.1. Title and Terms.

On the Issue Date, the Trustee shall authenticate and deliver U.S.\$500,000,000 aggregate principal amount of 6.500% Notes due 2028. The Issuer may from time to time, without the consent of the Holders of the Notes, create and issue Additional Notes having the same terms and conditions as the Notes in all respects, except that the issue date, the issue price and the first payment of interest thereon may differ; provided, however, that unless the Additional Notes are treated as part of the same “issue” of debt instruments as the original series or are issued pursuant to a “qualified reopening” of the original series, or are issued with no more than a *de minimis* amount of original issue discount, in each case for U.S. federal income tax purposes the additional notes will have a separate CUSIP, or ISIN number. Additional Notes shall be consolidated with and shall form a single series and vote together with the previously issued Notes for all purposes hereof.

The Notes shall be known and designated as the “6.500% Notes due 2028” of the Issuer. The Stated Maturity of the Notes shall be January 18, 2028. The Notes shall bear interest at the rate of 6.500% per annum, from June 18, 2020 or from the most recent Interest Payment Date thereafter to which interest has been paid or duly provided for, as the case may be, payable semiannually in arrears on January 18 and June 18, commencing January 18, 2021, until the principal thereof is paid or made available for payment.

In the case of a default in payment of principal and premium, if any, upon acceleration or redemption, interest (and Additional Amounts, if any) shall be payable pursuant to the second paragraph of this Section 3.1 on such overdue principal (and premium, if any), such interest shall be payable on demand and, if not so paid on demand, such interest shall itself bear interest at the rate per annum stated in the form of security contained herein plus 1% per annum (to the extent that the payment of such interest shall be legally enforceable), and shall accrue from the date such principal and/or premium, as the case may be, was due and payable to the date payment of such interest (and Additional Amounts, if any) has been made or duly provided for, and such interest on unpaid interest shall also be payable on demand.

The principal of and premium, if any, and interest on the Notes shall be payable at the Corporate Trust Office, the office of the Paying Agents and at any other office or agency maintained by the Issuer for such purpose; provided, however, that at the option of the Issuer upon five (5) Business Days’ notice to the applicable Paying Agent, payment of interest may be made by check mailed to the address of the Person entitled thereto as such address shall appear in the Note Register.

The Notes shall be redeemable or repurchasable as provided in Article XI. The Notes shall not have the benefit of any sinking fund obligations.

The Notes shall be subject to defeasance at the option of the Issuer as provided in Article XII.

Unless the context otherwise requires, the Notes shall constitute one series for all purposes under this Indenture, including, without limitation, amendments, waivers or redemptions

Section 3.2. Denominations.

The Notes are issuable only in fully registered form, without coupons, in a minimum denomination of U.S.\$200,000 and integral multiples of U.S.\$1,000 in excess thereof.

Section 3.3. Execution, Authentication, Delivery and Dating.

The Notes shall be executed on behalf of the Issuer by an authorized signatory or authorized signatories of the Issuer. The signature of any signatory on the Notes may be manual, electronic or facsimile.

Notes bearing the manual, electronic or facsimile signatures of individuals who were at any time the proper officers of the Issuer shall bind the Issuer, notwithstanding that such individuals or any of them have ceased to hold such offices prior to the authentication and delivery of such Notes or did not hold such offices at the date of such Notes.

At any time and from time to time after the execution and delivery of this Indenture, the Issuer may deliver Notes executed by the Issuer and having endorsed (by attachment or imprint) thereon the Guarantees executed as provided in Section 14.2 by the Guarantors, to the Trustee for authentication, together with an Issuer Order for the authentication and delivery of such Notes; and the Trustee in accordance with such Issuer Order shall authenticate and deliver such Notes as in this Indenture provided and not otherwise.

Each Note shall be dated the date of its authentication.

No Note or Guarantee shall be entitled to any benefit under this Indenture or be valid or obligatory for any purpose unless there appears on such Note a certificate of authentication substantially in the form provided for herein executed by the Trustee by manual or electronic signature, and such certificate upon any Note shall be conclusive evidence, and the only evidence, that such Note has been duly authenticated and delivered hereunder and that the Guarantees referred to therein have been duly executed and delivered hereunder.

Section 3.4. Global Notes; Registration, Registration of Transfer and Exchange.

(a) *Global Notes.* The provisions of clauses (1) through (7) below shall apply only to Global Notes:

(1) each Global Note authenticated under this Indenture shall be registered in the name of the Depositary or a nominee thereof and delivered to the Depositary or a nominee thereof or custodian therefore, and each such Global Note shall constitute a single Note for all purposes of this Indenture;

(2) notwithstanding any other provision in this Indenture, no Global Note may be exchanged in whole or in part for Notes registered, and no transfer of a Global Note in whole or in part may be registered, in the name of any Person other than the Depositary or a nominee thereof unless (A) the Depositary (i) has notified the Issuer that it is unwilling or unable to continue as Depositary for such Global Note and the Issuer thereupon fails to appoint a successor Depositary or (ii) has ceased to be a clearing agency registered under the Exchange Act, (B) the Issuer, at its option, notifies the Trustee in writing that it elects to cause the issuance of the Notes in definitive registered certificated form, or (C) an Event of Default has occurred and is continuing and the Registrar has received a written request from a beneficial owner of the Notes through an Agent Member to issue its proportionate interest in the Global Note in certificated form;

(3) if any Global Note is to be exchanged for other Notes or cancelled in whole, it shall be surrendered by or on behalf of the Depositary or its nominee to the Trustee, as Registrar, for exchange or cancellation as provided in this Article III. If any Global Note is to be exchanged for other Notes or cancelled in part, or if another Note is to be exchanged in whole or in part for a beneficial interest in any Global Note, such Global Note shall be so surrendered for exchange or cancellation as provided in this Article III or, if the Trustee is acting as custodian for the Depositary or its nominee (or is party to a similar arrangement) with respect to such Global Note, the principal amount thereof shall be reduced or increased by an amount equal to the portion thereof to be so exchanged or cancelled, or the principal amount of such other Note to be so exchanged for a beneficial interest therein, as the case may be, in each case by means of an appropriate adjustment made on the records of the Trustee, whereupon the Trustee, in accordance with the Applicable Procedures, shall instruct the Depositary or its authorized representatives to make a corresponding adjustment to its records (including by crediting or debiting any Agent Member's account as necessary to reflect any transfer or exchange of a beneficial interest pursuant to Section 3.4(c)). Upon any such surrender or adjustment of a Global Note, the Trustee shall, subject to Section 3.4(a)(2) and as otherwise provided in this Article III, authenticate and deliver any Notes issuable in exchange for such Global Note (or any portion thereof) to or upon the order of, and registered in such names as may be directed by, the Depositary or its authorized representative. Upon the request of the Trustee in connection with the occurrence of any of the events specified in the preceding paragraph, the Issuer shall promptly make available to the Trustee a reasonable supply of Notes that are not in the form of Global Notes. The Trustee shall be entitled to conclusively rely upon any order, direction or request of the Depositary or its authorized representative which is given or made pursuant to this Article III if such order, direction or request is given or made in accordance with the Applicable Procedures;

(4) every Note authenticated and delivered upon registration of transfer of, or in exchange for or in lieu of, a Global Note or any portion thereof, whether pursuant to this Article III or Section 10.5 or otherwise, shall be authenticated and delivered in the form of, and shall be, a Global Note, unless such Note is registered in the name of a Person other than the Depositary or a nominee thereof;

(5) none of the Issuer, the Guarantors, the Trustee, any agent of the Trustee, any Paying Agent or the Registrar will have any responsibility or liability for any aspect of the Depositary's records (or the records of the participant of such Depositary) relating to or payments made on account of beneficial ownership interests of a Global Note or for maintaining, supervising or reviewing any records of the Depositary relating to such beneficial ownership interests;

(6) subject to the provisions in the legends required by Section 2.2 above, the registered Holder may grant proxies and otherwise authorize any Person, including Agent Members and Persons who may hold interests in Agent Members, to take any action that such Holder is entitled to take under this Indenture;

(7) except as provided in Section 3.4(a)(2) herein, neither Agent Members nor any other Person on whose behalf Agent Members may act shall have any rights under this Indenture with respect to any Global Note held on their behalf by the Depositary or under the Global Note, and the Depositary may be treated by the Issuer, the Trustee and any agent of the Issuer or the Trustee as the absolute owner of such Global Note for all purposes whatsoever. Notwithstanding the foregoing, nothing herein shall prevent the Issuer, the Guarantors, the Trustee or any agent of the Issuer or the Trustee from giving effect to any written certification, proxy or other authorization furnished by the Depositary or impair, as between the Depositary and its Agent Members, the operation of customary practices governing the exercise of the rights of a Holder of any Note.

(b) *Registration, Registration of Transfer and Exchange and Legends.* The Issuer shall cause to be kept at the Corporate Trust Office of the Trustee a register (the register maintained in such office and in any other office or agency designated pursuant to Section 11.2 being herein sometimes collectively referred to as the "Note Register") in which, subject to such reasonable regulations as they may prescribe, the Issuer shall provide for the registration of Notes and of transfers and exchanges of Notes. The Trustee is hereby appointed "Registrar" for the purpose of registering Notes and transfers and exchanges of Notes as herein provided.

Upon surrender for registration of transfer of any Note at an office or agency of the Issuer designated pursuant to Section 11.2 for such purpose in accordance with the terms hereof, the Issuer shall, subject to the other provisions of this Section 3.4, execute, and the Trustee shall, upon receipt of an Issuer Order, authenticate and deliver, in the name of the designated transferee or transferees, one or more new Notes of any authorized denominations and of a like tenor and aggregate principal amount and bearing the applicable legends set forth in Section 2.2.

Subject to Section 3.4(c), at the option of the Holder, Notes may be exchanged for other Notes of any authorized denominations and of a like tenor and aggregate principal amount and bearing the applicable legend set forth in Section 2.2, if any, each such new Note having the benefit of the Guarantees executed by the Guarantors, upon surrender of the Note to be exchanged at such office or agency. Whenever any Note is so surrendered for exchange, the Issuer shall execute, and the Trustee shall, upon receipt of an Issuer Order, authenticate and deliver, the Note which the Holder making the exchange is entitled to receive.

The Trustee shall have no obligation or duty to monitor, determine or inquire as to compliance with U.S. securities laws, including but not limited to any restrictions on transfer imposed under this Indenture or under applicable law with respect to any transfer of any interest in any Note (including any transfers between or among Agent Members or beneficial owners of interests in any Global Note) other than to require delivery of such certificates and other documentation or evidence as are expressly required by, and to do so if and when expressly required by the terms of, this Indenture, and to examine the same to determine substantial compliance solely as to form with the express requirements hereof. Neither the Trustee nor any Agent shall have any responsibility or liability for any actions taken or not taken by the Depositary.

All Notes and the Guarantees issued upon any registration of transfer or exchange of Notes shall be the valid obligations of the Issuer and the Guarantors, evidencing the same debt, and entitled to the same benefits under this Indenture, as the Notes and the Guarantees endorsed thereon, respectively, surrendered upon such registration of transfer or exchange.

Every Note presented or surrendered for registration of transfer or for exchange shall (if so required by the Issuer or the Trustee) be duly endorsed, or be accompanied by a written instrument of transfer in form satisfactory to the Issuer and the Registrar duly executed, by the Holder thereof or his attorney duly authorized in writing.

No service charge shall be made to the Holder for any registration of transfer or exchange of Notes, but the Issuer or the Trustee may require payment of a sum sufficient to cover any tax or other governmental charge that may be imposed in connection with any registration of transfer or exchange of Notes, other than exchanges pursuant to Section 3.4, 3.5 or 10.5.

The Issuer and the Registrar shall not be required (i) to issue, register the transfer of or exchange any Note during a period beginning at the opening of business 15 days before the due date for any payment of principal in respect of the Notes selected for redemption under Section 4.6 and ending at the close of business on the day of such mailing, or (ii) to register the transfer of or exchange any Note so selected for redemption in whole or in part, except the unredeemed portion of any Note being redeemed in part.

All Notes, initially issued hereunder shall, upon issuance, bear the relevant legends specified in Section 2.2, if any, to be applied to such a Note and, in the case of the legend specifically required for the Restricted Global Note, such required legend shall not be removed unless the Issuer shall have delivered to the Trustee (and the Notes Registrar, if other than the Trustee) an Issuer Order which states that such Note may be issued without such legend thereon. If such legend has been removed from a Note as provided above, no other Note issued in exchange for all or any part of such Note shall bear such legend, unless the Issuer has reasonable cause to believe that such other Note is a “restricted security” within the meaning of Rule 144 of the Notes Act and instructs the Trustee to cause a legend to appear thereon:

(c) *Certain Transfers and Exchanges.* Upon presentation for transfer or exchange of any Note at the office of the Trustee, as Registrar, located in The City of New York, accompanied by a written instrument of transfer or exchange in the form approved by the Issuer (it being understood that, until notice to the contrary is given to Holders of Notes, the Issuer shall be deemed to have approved the form of instrument of transfer or exchange, if any, printed on any Note), executed by the registered Holder, in person or by such Holder’s attorney thereunto duly authorized in writing, and upon compliance with this Section 3.4, such Note shall be transferred upon the Note Register, and a new Note shall be authenticated and issued in the name of the transferee. Notwithstanding any provision to the contrary herein or in the Notes, transfers of a Global Note, in whole or in part, and transfers of interests therein of the kind described in this Section 3.4 (c), shall only be made in accordance with this Section 3.4(c). Transfers and exchanges subject to this Section 3.4(c) shall also be subject to the other provisions of this Indenture that are not inconsistent with this Section 3.4(c).

(1) *General.* A Global Note may not be transferred, in whole or in part, to any Person other than the Depositary or a nominee thereof, and no such transfer to any such other Person may be registered; provided, however, that this clause (1) shall not prohibit any transfer of a Note that is issued in exchange for a Global Note but is not itself a Global Note. No transfer of a Note to any Person shall be effective under this Indenture or the Notes unless and until such Note has been registered in the name of such Person. Nothing in this clause (1) shall prohibit or render ineffective any transfer of a beneficial interest in a Global Note effected in accordance with the other provisions of this Section 3.4(c).

(2) *Restricted Global Note to Regulation S Global Note.* If the holder of a beneficial interest in the Restricted Global Note wishes at any time to transfer such interest to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Regulation S Global Note, such transfer may be effected, subject to the rules and procedures of the Depositary, Euroclear and Clearstream, in each case to the extent applicable and as in effect from time to time (the “Applicable Procedures”), only in accordance with this clause (2). Upon receipt by the Trustee, as Registrar, of (A) written instructions given by or on behalf of the Depositary in accordance with the Applicable Procedures directing the Trustee to credit or cause to be credited to a specified Agent Member’s account a beneficial interest in the Regulation S Global Note in a specified principal amount and to cause to be debited from another specified Agent Member’s account a beneficial interest in the Restricted Global Note in an equal principal amount and (B) a certificate in substantially the form set forth in Exhibit A signed by or on behalf of the Agent Member holding such beneficial interest in the Restricted Global Note, the Trustee, as Registrar, shall reduce the principal amount of a Restricted Global Note, and increase the principal amount of the Regulation S Global Note by such specified principal amount as provided in Section 3.4(a)(3).

(3) *Regulation S Global Note to Restricted Global Note.* If the holder of a beneficial interest in the Regulation S Global Note at any time wishes to transfer such interest to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Restricted Global Note, such transfer may be effected, subject to the Applicable Procedures, only in accordance with this clause (3). Upon receipt by the Trustee, as Registrar, of (A) written instructions given by or on behalf of the Depositary in accordance with the Applicable Procedures directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Restricted Global Note in a specified principal amount and to cause to be debited from another specified Agent Member's account a beneficial interest in the Regulation S Global Note and (B) a certificate in substantially the form set forth in Exhibit B signed by or on behalf of the Agent Member holding such beneficial interest in the Regulation S Global Note, the Trustee, as Registrar, shall reduce the principal amount of such Regulation S Global Note and increase the principal amount of the Restricted Global Note by such specified principal amount as provided in Section 3.4(a)(3).

(4) *Non-Global Restricted Note to Global Note.* If the holder of a Restricted Note (other than a Global Note) wishes at any time to transfer all or any portion of such Note to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Restricted Global Note or the Regulation S Global Note, such transfer may be effected, subject to the Applicable Procedures, only in accordance with this clause (4). Upon receipt by the Trustee, as Registrar, of (A) such Note and written instructions given by or on behalf of such Holder as provided in Section 3.4(b) directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Restricted Global Note or the Regulation S Global Note, as the case may be, in a specified principal amount equal to the principal amount of the Restricted Note (or portion thereof) to be so transferred, and (B) an appropriately completed certificate substantially in the form set forth in Exhibit C-1 hereto, if the specified account is to be credited with a beneficial interest in the Restricted Global Note, or Exhibit C-2 hereto, if the specified account is to be credited with a beneficial interest in the Regulation S Global Note, signed by or on behalf of such Holder, then the Trustee, as Registrar, shall cancel such Restricted Note (and issue a new Note in respect of any untransferred portion thereof) as provided in Section 3.4(b) and increase the principal amount of the Restricted Global Note or Regulation S Global Note, as the case may be, by the specified principal amount as provided in Section 3.4(a)(3).

(5) *Non-Global Regulation S Note to Restricted Global Note or Regulation S Global Note.* If the Holder of a Regulation S Note (other than a Global Note) wishes at any time to transfer all or any portion of such Note to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Restricted Global Note or the Regulation S Global Note, as the case may be, such transfer may be effected only in accordance with this clause (5) and subject to the Applicable Procedures. Upon receipt by the Trustee, as Registrar, of (A) such Note and written instructions given by or on behalf of such Holder as provided in Section 3.4(b) directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Restricted Global Note or the Regulation S Global Note, as the case may be, in a principal amount equal to the principal amount of the Note (or portion thereof) to be so transferred, and (B)(i) with respect to a transfer which is to be delivered in the form of a beneficial interest in the Restricted Global Note, a certificate in substantially the form set forth in Exhibit D-1, signed by or on behalf of such Holder, and (ii) with respect to a transfer which is to be delivered in the form of a beneficial interest in the Regulation S Global Note, a certificate in substantially the form set forth in Exhibit D-2, signed by or on behalf of such Holder, then the Trustee, as Registrar, shall cancel such Note (and issue a new Note in respect of any untransferred portion thereof) as provided in Section 3.4(b) and increase the principal amount of the Restricted Global Note or the Regulation S Global Note, as the case may be, by the specified principal as provided in Section 3.4(a)(3).

Section 3.5. Mutilated, Destroyed, Lost and Stolen Notes.

If any mutilated or defaced Note is surrendered to the Trustee, the Issuer shall execute and the Trustee shall, upon receipt of an Issuer Order, authenticate or cause to be authenticated and deliver in exchange therefore a new Note of like tenor and principal amount, having endorsed thereon the Guarantees executed by the Guarantors and bearing a number not contemporaneously outstanding.

If there shall be delivered to the Issuer and the Trustee (i) evidence to their satisfaction of the destruction, loss or theft of any Note and (ii) such security or indemnity as may be required by them to save each of them, the Guarantors and any agent of either of them harmless, then, in the absence of notice to the Issuer or the Trustee that such Note has been acquired by a bona fide purchaser, the Issuer shall execute and the Trustee shall, upon receipt of an Issuer Order, authenticate and deliver, in lieu of any such destroyed, lost or stolen Note, a new Note of like tenor and principal amount, having endorsed thereon the Guarantees executed by the Guarantors and bearing a number not contemporaneously outstanding.

In case any such mutilated, defaced, destroyed, lost or stolen Note has become or is about to become due and payable, the Issuer may in its discretion, instead of issuing a new Note, pay such Note.

Upon the issuance of any new Note under this Section, the Issuer may require the payment of a sum sufficient to cover any tax or other governmental charge that may be imposed in relation thereto and any other expenses (including the fees and expenses of the Trustee, its counsel, the Registrar and the Paying Agents) connected therewith.

Every new Note issued pursuant to this Section in lieu of any destroyed, defaced, lost or stolen Note, and the Guarantees endorsed thereon, shall constitute an original additional contractual obligation of the Issuer and the Guarantors, respectively, whether or not the destroyed, lost or stolen Note shall be at any time enforceable by anyone, and shall be entitled to all the benefits of this Indenture equally and proportionately with any and all other Notes and Guarantees, respectively duly issued hereunder.

The provisions of this Section are exclusive and shall preclude (to the extent lawful) all other rights and remedies with respect to the replacement or payment of mutilated, destroyed, lost or stolen Notes.

Section 3.6. Payment of Interest; Interest Rights Preserved.

Interest on any Note which is payable, and is punctually paid or duly provided for, on any Interest Payment Date shall be paid to the Person in whose name that Note (or one or more Predecessor Notes) is registered at the close of business on the Regular Record Date for such interest.

Any interest on any Note which is payable, but is not punctually paid or duly provided for, on any Interest Payment Date (herein called "Defaulted Interest") shall (a) bear interest at the rate per annum stated in the form of Note included herein, (to the extent that the payment of such interest shall be legally enforceable), and (b) forthwith cease to be payable to the Holder on the relevant Regular Record Date by virtue of having been such Holder, and such Defaulted Interest may be paid by the Issuer, at its election in each case, as provided in clause (1) or (2) below:

(1) the Issuer may elect to make payment of any Defaulted Interest to the Persons in whose names the Notes (or their respective Predecessor Notes) are registered at the close of business on a Special Record Date for the payment of such Defaulted Interest, which shall be fixed in the following manner. The Issuer shall notify the Trustee in writing of the amount of Defaulted Interest proposed to be paid on each Note and the date of the proposed payment, and at the same time the Issuer shall deposit with the Trustee an amount of money equal to the aggregate amount proposed to be paid in respect of such Defaulted Interest or shall make arrangements satisfactory to the Trustee for such deposit prior to the date of the proposed payment, such money when deposited to be held in trust for the benefit of the Persons entitled to such Defaulted Interest as in this clause provided.

Thereupon the Trustee shall fix a Special Record Date for the payment of such Defaulted Interest which shall be not more than 15 days and not less than 10 days prior to the date of the proposed payment and not less than 10 days after the receipt by the Trustee of the notice of the proposed payment. The Trustee shall promptly notify the Issuer of such Special Record Date and, in the name and at the expense of the Issuer, shall cause notice of the proposed payment of such Defaulted Interest and the Special Record Date therefore to be mailed, first- class postage prepaid, to each Holder at his address as it appears in the Note Register, not less than 10 days prior to such Special Record Date. Notice of the proposed payment of such Defaulted Interest and the Special Record Date therefore having been so mailed, such Defaulted Interest shall be paid to the Persons in whose names the Notes (or their respective Predecessor Notes) are registered at the close of business on such Special Record Date and shall no longer be payable pursuant to the following clause (2); and

(b) the Issuer may make payment of any Defaulted Interest in any other lawful manner not inconsistent with the requirements of any securities exchange on which the Notes may be listed, and upon such notice as may be required by such exchange, if, after notice given by the Issuer to the Trustee of the proposed payment pursuant to this clause, such manner of payment shall be deemed practicable by the Trustee.

Subject to the foregoing provisions of this Section, each Note delivered under this Indenture upon registration of transfer of or in exchange for or in lieu of any other Note shall carry the rights to interest accrued and unpaid, and to accrue, which were carried by such other Note.

Section 3.7. Persons Deemed Owners.

Prior to due presentment of a Note for registration of transfer and the effective registration of such transfer by the Registrar, the Issuer, the Guarantors, the Trustee and any agent of the Issuer, the Guarantors or the Trustee may treat the Person in whose name such Note is registered as the owner of such Note for the purpose of receiving payment of principal of and premium, if any, and (subject to Section 3.6) interest on such Note and for all other purposes whatsoever, whether or not such Note be overdue, and none of the Issuer, the Guarantors, the Trustee or any agent of the Issuer, the Guarantors or the Trustee shall be liable for so treating such Holder.

Section 3.8. Cancellation.

Except as provided for in Section 4.2 and 4.3, Notes surrendered for payment, redemption, registration of transfer or exchange shall, if surrendered to any Person other than the Trustee, be delivered to the Trustee and shall be promptly cancelled by it. The Issuer may at any time deliver to the Trustee for cancellation, accompanied by an Issuer Order, any Notes previously authenticated and delivered hereunder which the Issuer may have acquired in any manner whatsoever, and all Notes so delivered shall be promptly cancelled by the Trustee. No Notes shall be authenticated in lieu of or in exchange for any Notes cancelled as provided in this Section, except as expressly permitted by this Indenture. All cancelled Notes held by the Trustee shall be disposed of in accordance with its standard procedures or as directed by an Issuer Order; provided, however, that the Trustee shall not be required to destroy such Notes.

Section 3.9. Computation of Interest.

The amount of interest payable on the Notes for any interest period will be calculated by applying the rate of interest to the principal amount of such Note, on the basis of a year of 360 days consisting of 12 months of 30 days each and, in the case of an incomplete month, on the number of days elapsed based on a 30 day month provided, however, that Defaulted Interest shall be computed on the basis of a 365 or 366-day year, as the case may be, and the number of days actually elapsed.

Section 3.10. CUSIP Numbers.

The Issuer shall in issuing the Notes use CUSIP numbers, and the Trustee shall use the applicable CUSIP number in notices of redemption or exchange as a convenience to the Holders; provided, that any such notice may state that no representation is made as to the accuracy or correctness of the CUSIP number or numbers printed in the notice or on the certificates representing the Notes and that reliance may be placed only on the other identification numbers printed on the certificates representing the Notes. The Issuer shall promptly notify the Trustee in writing of any change in CUSIP numbers.

Section 3.11. Paying Agents; Discharge of Payment Obligations; Indemnity of Holders.

(a) The Issuer may from time to time appoint one or more paying agents under this Indenture and the Notes. By its execution and delivery of this Indenture, the Issuer hereby initially designates and appoints The Bank of New York Mellon, as Principal Paying Agent. Subject to Section 11.3, the Issuer or a Guarantor may act as paying agent.

(b) Unless the Issuer or a Guarantor shall be acting as paying agent as provided in Section 11.3, the Issuer shall, by 11:00 a.m. New York City time, no later than one Business Day prior to each Interest Payment Date, Redemption Date or Maturity Date on any Notes (whether on maturity, redemption or otherwise) (each, a "Payment Date"), deposit with the Principal Paying Agent in immediately available funds a sum sufficient to pay such principal, any premium, and interest when so becoming due (including any Additional Amounts). The Issuer shall request that the bank through which such payment is to be made agree to supply to the Principal Paying Agent in New York City by 11:00 a.m. (New York City time) two Business Days prior to the due date for any such payment an irrevocable confirmation (by authenticated SWIFT MT 100 Message) of its intention to make such payment. The Principal Paying Agent shall arrange with all other Paying Agents for the payment, from funds furnished by the Issuer or the Guarantors to the Principal Paying Agent pursuant to this Indenture, of the principal, and premium, if any, and interest (including Additional Amounts, if any) on the Notes and of the compensation of such Paying Agents for their services as such.

All Paying Agents will hold in trust, for the benefit of Holders or the Trustee, all money held by such Paying Agent for the payment of principal, or premium if any, of or interest on the Notes and shall notify the Trustee in writing of any default by the Issuer in making any such payment. The Issuer at any time may require a Paying Agent to pay all money held by it to the Trustee and to account for any funds disbursed by it. Upon complying with this Section 3.11 and the applicable provisions of Section 11.3, the Paying Agents shall have no further liability for the money delivered to the Trustee.

(c) Any payment to be made in respect of the Notes or the Guarantees by the Issuer or the Guarantors, as the case may be, to or to the order of any Paying Agent shall be in satisfaction *pro tanto* of the obligations of the Issuer under the Notes.

(d) Each payment in full of principal, redemption amount, Additional Amounts and/or interest payable under this Indenture in respect of any Note made by or on behalf of the Issuer to or to the order of any Paying Agent in the manner specified in this Indenture on the date due shall be valid and effective to satisfy and discharge the obligation of the Issuer to make payment of principal, redemption amount, Additional Amounts and/or interest payable under this Indenture on such date, provided, however, that the liability of any Paying Agent hereunder shall not exceed any amounts paid to it by the Issuer, or held by it, on behalf of the Holders under this Indenture; and provided further that, in the event that there is a default by the Paying Agent or the Principal Paying Agent in any payment of principal, redemption amount, Additional Amounts and/or interest in respect of any Note in accordance with this Indenture, the Issuer and the Guarantors shall pay on demand such further amounts as will result in receipt by the Holder of such amounts as would have been received by it had no such default. This obligation constitutes a separate and independent obligation from the other obligations of the Issuer under the Notes and the Guarantors under the Guarantees, shall give rise to a separate and independent cause of action, will apply irrespective of any waiver granted by the Trustee and/or any Holder of Notes and shall continue in full force and effect despite any judgment, order, claim, or proof for a liquidated amount in respect of any sum due under this Indenture, the Notes or any judgment or order.

ARTICLE IV

REDEMPTION OF NOTES

Section 4.1. Redemption for Tax Reasons.

If as a result of any Change of Law (as defined below):

(1) the Issuer or a Guarantor is or would be required on the next succeeding interest payment date to pay any Additional Amounts; or

(2) the issuers/borrowers of certain intercompany debt are or would be required on the next succeeding Interest Payment Date to pay Brazilian withholding taxes in excess of a general rate of 15%, or 25% in case of amounts paid to residents of countries which do not impose any income tax or which impose it at a maximum rate lower than 20% (or 17% if the relevant jurisdiction is committed to adopt international standards on tax transparency) or where the laws of that country or location impose restrictions on the disclosure of (x) shareholding composition; (y) the ownership of the investment; or (z) the beneficial ownership of income paid to non-resident persons, pursuant to Law No. 9,779, dated January 19, 1999; provided that, such requirement to pay such taxes in excess of such rate was not caused by, or otherwise the result of, whether directly or indirectly, wholly or in part, any amendment to the intercompany debt,

and in any such case the payment of such excess amounts cannot be avoided by the use of any reasonable measures available to the Issuer or a Guarantor, the Notes may be repurchased, by the Issuer at the option of the Issuer or a Guarantor, in whole but not in part, upon not less than 30 nor more than 90 days' notice to the Holders, which notice will be published, at any time following such Change of Law at a repurchase price equal to the principal amount thereof, plus accrued and unpaid interest, if any, to the date fixed for repurchase. The Issuer or a Guarantor will also pay to the Holders on the repurchase date any Additional Amounts which are payable. Following such repurchase, the Notes will be cancelled, or remain Outstanding, at the Issuer's or a Guarantor's election.

"Change of Law" means any change in or amendment to the laws or regulations of Luxembourg, Brazil or Peru (or of any political subdivision thereof or therein) or the adoption, amendment or modification of any resolution of the Central Bank of Luxembourg, the Central Bank of Brazil or the Central Reserve Bank of Peru (or any successor authority thereto) which becomes effective on or after the date of this Indenture (or with respect to a successor, on or after the date such successor assumes the obligations under the Notes), resulting in the Issuer or a Guarantor on a consolidated basis being required to pay amounts with respect to Taxes above in a total aggregate amount in excess of that payable immediately prior to such change or amendment.

Prior to the delivery of any notice of repurchase in accordance with the foregoing, the Issuer or a Guarantor shall deliver to the Trustee and the Principal Paying Agent an Officer's Certificate stating that the Issuer or a Guarantor, as the case may be, is entitled to effect such repurchase based on an Opinion of Counsel or written advice of a qualified tax expert, that the Issuer or a Guarantor has or will, or there is a substantial probability that the Issuer or a Guarantor has or will, become obligated to pay such excess amounts with respect to Taxes as a result of such Change of Law. Such notice, once delivered by the Issuer or a Guarantor to the Trustee, will be irrevocable.

If the Issuer or a Guarantor becomes subject at any time to any taxing jurisdiction other than Luxembourg, Brazil or Peru, references herein to Luxembourg, Brazil or Peru, as applicable, shall be construed to include such other jurisdiction.

Section 4.2. Optional Redemption.

At any time before October 18, 2027 (which is the date that is three months prior to maturity of the notes (the "Par Call Date")), the Issuer or a Guarantor has the right to redeem the Notes, in whole or in part and from time to time, at a redemption price equal to the greater of (1) 100% of the principal amount of the Notes being redeemed and (2) the sum of the present values of the remaining scheduled payments of principal and interest on the Notes being redeemed that would be due if the Notes matured on the Par Call Date (inclusive of interest accrued to the redemption date), discounted to the Redemption Date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Treasury Rate plus 50 basis points, the case of clause (1) only, accrued and unpaid interest on the principal amount of the Notes being redeemed to, but excluding, such Redemption Date.

At any time on or after the Par Call Date, the Issuer or a Guarantor has the right to redeem the Notes, in whole or in part and from time to time, at a redemption price equal to 100% of the principal amount of the Notes being redeemed plus accrued and unpaid interest on the principal amount of the Notes being redeemed to, but excluding, such Redemption Date.

The Issuer, any Guarantor or any of their respective Affiliates may at any time repurchase the Notes at any price in the open market or otherwise. The Issuer, any Guarantor or any of their respective Affiliates may hold or resell the Notes it purchases or may surrender them to the Trustee or an Agent for cancellation.

Section 4.3. Applicability of Article.

Redemption of Notes at the election of the Issuer, as permitted or required by any provision of this Indenture, shall be made in accordance with such provision and this Article.

Section 4.4. Election to Redeem; Notice to Trustee, Registrar and Paying Agent.

In the case of any redemption of Notes prior to the expiration of any restriction on such redemption provided in the terms of such Notes or elsewhere in this Indenture, the Issuer shall furnish the Trustee with an Officer's Certificate evidencing compliance with such restriction.

The Issuer shall provide notice of redemption to the Trustee, Registrar and Paying Agents at least 15 days (or such shorter period as agreed to by the Trustee) prior to when such notice of redemption shall be provided to the Holders.

Section 4.5. Notice of Redemption.

Notice of redemption pursuant to Section 4.1 and 4.2 hereof shall be given in the manner provided for in Section 1.6 hereof. The Trustee, Registrar and Paying Agent will notify the Holders at such Holder's address appearing in the Note register at least 30 but not more than 60 days prior to the Redemption Date. A notice of any redemption may, at the Issuer's or a Guarantor's discretion, be subject to one or more conditions precedent.

All notices of redemption shall state:

- (1) the Redemption Date;
- (2) the Redemption Price;
- (3) that on the Redemption Date, the Redemption Price will become due and payable upon each such Note to be redeemed and that interest thereon will cease to accrue on and after said date;
- (4) the place or places where such Notes are to be surrendered for payment of the Redemption Price;

- (5) the aggregate principal amount of Notes being redeemed;
- (6) the CUSIP number or numbers of the Notes being redeemed;
- (7) if fewer than all the outstanding Notes are to be redeemed, or if a Note is to be redeemed in part only, the identification and principal amounts at maturity of the particular Notes (or portion thereof) to be redeemed; and
- (8) that no representation is made as to the correctness or accuracy of the CUSIP numbers, if any, listed in such notice or printed on the Notes.

Section 4.6. Deposit of Redemption Price.

By 11:00 a.m. (New York City time) on the Business Day prior to any Redemption Date, the Issuer or a Guarantor shall deposit with the Principal Paying Agent (or, if the Issuer is acting as its own Paying Agent, segregate and hold in trust as provided in Section 11.3) an amount of money sufficient to pay the Redemption Price on all of the Notes which are to be repurchased on that date. In the case of a partial redemption of Notes that are represented by a Global Note, the relevant Notes will be redeemed in accordance with the rules of DTC.

Section 4.7. Notes Payable on Redemption Date.

Notice of redemption having been given as aforesaid, the Notes so to be redeemed shall, on the Redemption Date, become due and payable at the Redemption Price therein specified, and from and after such date (unless the Issuer shall default in the payment of the Redemption Price and accrued and unpaid interest) such Notes shall cease to bear interest. Upon surrender of any such Note for redemption in accordance with said notice, such Note shall be paid by the Issuer at the Redemption Price, together with accrued and unpaid interest to the Redemption Date; provided, however, that installments of interest whose Maturity Date is on or prior to the Redemption Date shall be payable to the Holders of such Notes, or one or more Predecessor Notes, registered as such at the close of business on the relevant Record Dates according to their terms and the provisions of Section 3.7.

If any Note called for redemption shall not be so paid upon surrender thereof for redemption, the principal (and premium, if any) shall, until paid, bear interest from the Redemption Date at the rate provided by the Note.

ARTICLE V

SATISFACTION AND DISCHARGE

Section 5.1. Satisfaction and Discharge of Indenture.

This Indenture shall cease to be of further effect as to all Outstanding Notes, and the Trustee, on demand of and at the expense of the Issuer, shall execute proper instruments acknowledging satisfaction and discharge of this Indenture, when

- (1) (A) all Outstanding Notes (except lost, stolen or destroyed Notes which have been replaced or paid) have been delivered to the Trustee for cancellation; or
- (B) all Outstanding Notes that have not been delivered to the Trustee for cancellation (i) have become due and payable, (ii) will become due and payable at their Stated Maturity within one year, or (iii) are to be called for redemption within one year under arrangements satisfactory to the Trustee for the giving of notice of a redemption by the Issuer or a Guarantor; and, in each case, the Issuer or a Guarantor irrevocably deposits or causes to be deposited with the Trustee or its designee as funds in trust solely for the benefit of the Holders, cash, Cash Equivalents or U.S. Government Obligations in an amount as will be sufficient without consideration of any reinvestment of interest, to pay and discharge all principal, premium and Additional Amounts, if any, and accrued and unpaid interest to the date of maturity or redemption on the Notes not delivered to the Trustee for cancellation and delivers irrevocable instructions to the Trustee to apply the deposited money toward the payment of the Notes at maturity or the redemption date, as the case may be;

- (2) the Issuer or a Guarantor has paid or caused to be paid all other sums payable hereunder;
- (3) the Issuer or a Guarantor has delivered to the Trustee an Officer's Certificate and an Opinion of Counsel, each stating that all conditions precedent herein provided for relating to the satisfaction and discharge of this Indenture have been complied with; and
- (4) the Trustee shall have received such other documents and assurances as the Trustee shall have reasonably requested.

Notwithstanding the satisfaction and discharge of this Indenture, (i) the obligations of the Issuer to the Trustee under Section 7.7 hereof, (ii) substitution of apparently mutilated, defaced, destroyed, lost or stolen Notes, (iii) rights of Holders of Notes to receive payment of principal of and premium, if any, and interest (including Additional Amounts, if any) on the Notes, (iv) rights, obligations and immunities of the Trustee under this Indenture (including, if money shall have been deposited with the Trustee pursuant to subclause (B) of clause (1) of this Section, the obligations of the Trustee under Section 5.2 hereof and the last paragraph of Section 11.3 hereof), and (v) rights of Holders of the Notes as beneficiaries of this Indenture with respect to any property deposited with the Trustee payable to all or any of them, shall survive.

Section 5.2. Application of Trust Money.

Subject to the provisions of the last paragraph of Section 11.3, all money deposited with the Trustee pursuant to Section 5.1 hereof shall be held in trust and applied by it, in accordance with the provisions of the Notes and this Indenture, to the payment, either directly or through any Paying Agent (including the Issuer or a Guarantor acting as its own Paying Agent) as the Trustee may determine, to the Persons entitled thereto, of the principal (and premium, if any) and interest for whose payment such money has been deposited with the Trustee.

ARTICLE VI

REMEDIES

Section 6.1. Events of Default.

“Event of Default,” wherever used herein, means any one of the following events (whatever the reason for such Event of Default and whether it shall be voluntary or involuntary or be effected by operation of law or pursuant to any judgment, decree or order of any court or any order, rule or regulation of any administrative or governmental body):

- (1) failure to pay any amount of principal of (or premium, if any) any Note when due;
- (2) failure to pay any interest, including Additional Amounts, if any, on any Note when due and such failure shall continue for a period of 30 days;
- (3) failure to perform any covenant or agreement of the Issuer or any Guarantor under this Indenture or the Notes and such failure remains unremedied for 60 days after the Trustee has given written notice thereof to the Issuer or any Guarantor;
- (4) failure to pay when due or, as the case may be, within any originally applicable grace period, any amount of principal and premium, if any, or interest (including Additional Amounts, if any), due under the terms of any instrument evidencing Indebtedness of the Issuer or any of its Designated Subsidiaries, or any such Indebtedness of the Issuer or any of its Designated Subsidiaries that becomes due and payable prior to its stated maturity otherwise than at the option of the issuer thereof by reason of the occurrence of an event of default howsoever described; provided that the aggregate amount of any such Indebtedness equals with respect to such Person, on a consolidated basis U.S.\$100.0 million or more (or its equivalent in other currency or currencies);
- (5) the rendering of a final judgment or judgments (not subject to appeal) for the payment of money against the Issuer or any of its Designated Subsidiaries which remains undischarged, unbonded or unstayed (and otherwise not covered by enforceable insurance policies issued by reputable and creditworthy insurance companies) for a period of 60 consecutive days after the date on which the right to appeal all such judgments has expired or, if later, the date therein specified for payment; provided that the aggregate amount of any such final judgment equals or exceeds with respect to such Person, on a consolidated basis U.S.\$100.0 million (or its equivalent in other currency or currencies);
- (6) all or substantially all of the assets of the Issuer (on a consolidated basis) shall be condemned, seized or otherwise appropriated, or custody of such property shall be assumed by any governmental authority or court or other person purporting to act under the authority of the federal government of any jurisdiction, or the Issuer shall be prevented from exercising normal control over all or substantially all of its property or revenues (on a consolidated basis), if the whole or part of such property or revenues is material to the Issuer (on a consolidated basis);

(7) (a) a secured party takes possession of all or substantially all the assets or revenues of the Issuer (on a consolidated basis) or (b) a receiver or similar officer is appointed, of all or substantially all the assets or revenues of the Issuer (on a consolidated basis);

(8) the Issuer or any Guarantor pursuant to or under or within the meaning of any Bankruptcy Law (a) commences a voluntary case or proceeding; (b) consents to the making of a Bankruptcy Order in an involuntary case or proceeding or the commencement of any case against it; (c) consents to the appointment of a custodian of it or for substantially all its property; (d) makes a general assignment for the benefit of its creditors; (e) files an answer or consent seeking reorganization or relief; (f) shall admit in writing its inability to pay its debts generally; or (g) consents to the filing of a petition in bankruptcy;

(9) a court of competent jurisdiction in any involuntary case or proceeding enters a Bankruptcy Order against the Issuer or any Guarantor, and such Bankruptcy Order remains unstayed and in effect for 60 consecutive days; and

(10) any of the Guarantees is not (or is claimed by any Guarantor not to be) in full force and effect.

If any Event of Default (other than an Event of Default described in clause (8) with respect to the Issuer or Nexa Peru) shall occur and be continuing, either (i) the Trustee or (ii) the Holders, with written notice to the Trustee, of at least 25% in aggregate principal amount of the Outstanding Notes may accelerate the maturity of all Notes; provided that, after such acceleration, but before a judgment or decree based on acceleration, the Holders of a majority in aggregate principal amount of Outstanding Notes may, as provided in Section 6.12, rescind and annul such acceleration if all Events of Default, other than the nonpayment of accelerated principal, have been cured or waived as provided in this Indenture. The Trustee shall not be deemed to have notice of any Default or Event of Default (other than a payment default) unless a Responsible Officer of the Trustee has actual knowledge thereof or unless written notice of any event which is in fact such a default is received by a Responsible Officer of the Trustee at the Corporate Trust Office of the Trustee, and such notice references the Notes and this Indenture. If an Event of Default specified in clause (8) above occurs with respect to the Issuer or Nexa Peru, the Outstanding Notes will *ipso facto* become immediately due and payable without any declaration or other act on the part of the Trustee or any Holder.

Section 6.2. Collection of Indebtedness and Suits for Enforcement by Trustee. The Issuer and the Guarantors covenant that if

(1) default is made in the payment of any interest on any Note, (including Additional Amounts, if any), when such amounts become due and payable and such default continues for a period of 30 days; or

(2) default is made in the payment of the principal of (or premium, if any, on) any Note at the Maturity thereof or, with respect to any Note to be redeemed, at the Redemption Date thereof,

the Issuer and the Guarantors (subject to the limitations provided in this Indenture) will, jointly and severally, upon demand of the Trustee, pay to it, for the benefit of the Holders of such Notes, the whole amount then due and payable on such Notes for principal (and premium, if any) and interest (including Additional Amounts, if any), and, to the extent that payment of interest on overdue amounts shall be legally enforceable, interest on any overdue principal (and premium, if any) and on any overdue interest, at the rate provided by the Notes, and, in addition thereto, such further amount as shall be sufficient to cover the costs and expenses incurred by the Trustee under this Indenture, including the reasonable compensation, expenses, disbursements and advances of the Trustee, its agents and counsel.

If the Issuer and the Guarantors fail to pay such amounts forthwith upon such demand, the Trustee, in its own name and as trustee of an express trust, may institute a judicial proceeding for the collection of the sums so due and unpaid, may prosecute such proceeding to judgment or final decree, and may enforce the same against the Issuer, the Guarantors or any other obligor upon the Notes and collect the moneys adjudged or decreed to be payable in the manner provided by law out of the property of the Issuer, the Guarantors or any other obligor upon the Notes, wherever situated.

If an Event of Default occurs and is continuing, the Trustee may in its discretion proceed to protect and enforce its rights and the rights under this Indenture of the Holders by such appropriate judicial proceedings as the Trustee shall deem most effective to protect and enforce any such rights, whether for the specific enforcement of any covenant or agreement in this Indenture or in aid of the exercise of any power granted herein including, without limitation, seeking recourse against the Issuer or the Guarantors or proceeding to enforce any other proper remedy.

Section 6.3. Trustee May File Proofs of Claim.

The Trustee may file such proofs of claim and other papers or documents as may be necessary or advisable in order to have the claims of the Trustee and the Holders allowed in any judicial proceedings relative to the Issuer, the Guarantors, their respective creditors or its property and, unless prohibited by law or applicable regulations, may vote on behalf of the Holders at their direction in any election of a trustee in bankruptcy or other Person performing similar functions, and any custodian in any such judicial proceeding is hereby authorized by each Holder to make payments to the Trustee and, in the event that the Trustee shall consent to the making of such payments directly to the Holders, to pay to the Trustee any amount due it for the reasonable compensation, expenses, disbursements and advances of the Trustee, its agents and its counsel, and any other amounts due the Trustee under Section 7.7.

Section 6.4. Trustee May Enforce Claims Without Possession of Notes.

All rights of action and claims under this Indenture or the Notes may be prosecuted and enforced by the Trustee without the possession of any of the Notes or the production thereof in any proceeding relating thereto, and any such proceeding instituted by the Trustee shall be brought in its own name as trustee of an express trust, and any recovery of judgment shall, after provision for the payment of the reasonable compensation, expenses, disbursements and advances of the Trustee, its agents and counsel, be for the ratable benefit of the Holders of the Notes in respect of which such judgment has been recovered.

Section 6.5. Application of Money Collected.

Any money collected by the Trustee pursuant to this Article shall be applied in the following order, at the date or dates fixed by the Trustee and, in case of the distribution of such money on account of principal (or premium, if any) or interest, upon presentation of the Notes and the notation thereon of the payment if only partially paid and upon surrender thereof if fully paid;

FIRST: To the payment of all amounts due to the Trustee and the Agents under this Indenture; and

SECOND: To the payment of the amounts then due and unpaid for principal of (and premium, if any) and interest on the Notes in respect of which or for the benefit of which such money has been collected, ratably, without preference or priority of any kind, according to the amounts due and payable on such Notes for principal (and premium, if any) and interest, respectively.

The Trustee, upon prior written notice to the Issuer, may fix a record date and payment date for any payment to the Holders pursuant to this Section 6.5.

Section 6.6. Limitation on Suits.

No Holder of any Note shall have any right to institute any proceeding, judicial or otherwise, with respect to this Indenture, or for the appointment of a receiver or trustee, or for any other remedy hereunder, unless:

(1) such Holder shall have previously given written notice to the Trustee of a continuing Event of Default;

(2) the Holders of at least 25% in aggregate principal amount of the Outstanding Notes shall have made written request to the Trustee to institute proceedings in respect of such Event of Default in its own name as Trustee hereunder and shall have offered to the Trustee indemnity and/or security reasonably satisfactory to the Trustee against the costs, expenses and liabilities to be incurred in compliance with such request;

(3) the Trustee for 60 days after its receipt of such notice, request and offer shall have failed to institute any such proceeding;
and

(4) no direction inconsistent with such written request shall have been given to the Trustee during such 60-day period by the Holders of a majority in principal amount of the Outstanding Notes;

it being understood and intended that no one or more Holders shall have any right in any manner whatever by virtue of, or by availing of, any provision of this Indenture or any Note or the Guarantees to affect, disturb or prejudice the rights of any other Holders, or to obtain or to seek to obtain priority or preference over any other Holders or to enforce any right under this Indenture (it being understood that the Trustee does not have an affirmative duty to ascertain whether or not such actions or forbearances are unduly prejudicial to such Holders), any Note or the Guarantees, except in the manner herein provided and for the equal and ratable benefit of all the Holders.

Section 6.7. Unconditional Right of Holders to Receive Principal, Premium and Interest.

Notwithstanding any other provision in this Indenture, the Notes or the Guarantees, the Holder of any Note shall have the right, which is absolute and unconditional, to receive payment of the principal of (and premium, if any) and (subject to Section 3.6) interest on such Note on the respective Stated Maturities expressed in such Note (or earlier Redemption Date) and to institute suit for the enforcement of any such payment, and such rights shall not be impaired without the consent of such Holder.

Section 6.8. Restoration of Rights and Remedies.

If the Trustee or any Holder has instituted any proceeding to enforce any right or remedy under this Indenture, any Note or the Guarantees, and such proceeding has been discontinued or abandoned for any reason, or has been determined adversely to the Trustee or to such Holder, then and in every such case, subject to any determination in such proceeding, the Issuer, the Guarantor, the Trustee and the Holders shall be restored severally and respectively to their former positions hereunder and thereafter all rights and remedies of the Trustee and the Holders shall continue as though no such proceeding had been instituted.

Section 6.9. Rights and Remedies Cumulative.

Except as otherwise provided with respect to the replacement or payment of mutilated, destroyed, lost or stolen Notes in the last paragraph of Section 3.5 hereof, no right or remedy herein conferred upon or reserved to the Trustee or to the Holders is intended to be exclusive of any other right or remedy, and every right and remedy shall, to the extent permitted by law, be cumulative and in addition to every other right and remedy given hereunder or now or hereafter existing at law or in equity or otherwise. The assertion or employment of any right or remedy hereunder, or otherwise, shall not prevent the concurrent assertion or employment of any other appropriate right or remedy.

Section 6.10. Delay or Omission Not Waiver.

No delay or omission of the Trustee or of any Holder of any Note to exercise any right or remedy accruing upon any Event of Default shall impair any such right or remedy or constitute a waiver of any such Event of Default or an acquiescence therein. Every right and remedy given by this Article or by law to the Trustee or to the Holders may be exercised from time to time, and as often as may be deemed expedient, by the Trustee or by the Holders, as the case may be.

Section 6.11. Control by Holders.

The Holders of a majority of the aggregate principal amount of the Outstanding Notes shall have the right to direct the time, method and place of conducting any proceeding for any remedy available to the Trustee or exercising any trust or power conferred on the Trustee, provided that:

(1) such direction shall not be in conflict with any rule of law or with this Indenture or expose the Trustee to personal liability (as determined in the sole discretion of the Trustee); and

(2) the Trustee may take any other action deemed proper by the Trustee which is not inconsistent with such direction.

The Trustee may refuse, however, to follow any direction that the Trustee, in its sole discretion, determines may be unduly prejudicial to the rights of the Holders or that may subject the Trustee to any liability, loss or expense if the Trustee determines, in its sole discretion, that it lacks satisfactory indemnification and/or security against such liability, loss or expense.

Section 6.12. Waiver of Past Defaults.

The Holders of not less than a majority in aggregate principal amount of the Outstanding Notes may by written notice to the Issuer and the Trustee waive any past default hereunder and rescind and annul any declaration of acceleration and its consequences, except a default:

(1) in the payment of the principal of (or premium, if any) or interest on any Note; or

(2) in respect of a covenant or provision hereof which under Article X cannot be modified or amended without the consent of the Holder of each Outstanding Note affected.

Upon any such waiver, such default shall cease to exist, and any Event of Default arising therefrom shall be deemed to have been cured, for every purpose of this Indenture; but no such waiver shall extend to any subsequent or other default or impair any right consequent thereon.

Section 6.13. Undertaking for Costs.

In any suit for the enforcement of any right or remedy under this Indenture or in any suit against the Trustee for any action taken or omitted by it as a Trustee, a court in its discretion may require the filing by any party litigant in the suit of an undertaking to pay the costs of the suit, and the court in its discretion may assess reasonable costs, including reasonable attorney's fees and expenses, against any party litigant in the suit, having due regard to the merits and good faith of the claims or defenses made by the party litigant. This Section 6.13 does not apply to a suit by the Trustee, a suit by a Holder pursuant to Section 6.7 hereof, or a suit by Holders of more than 10% in principal amount of the then Outstanding Notes.

ARTICLE VII

THE TRUSTEE

Section 7.1. Certain Duties and Responsibilities.

(a) Except during the continuance of an Event of Default,

(1) the Trustee undertakes to perform solely such duties and only such duties as are specifically set forth in this Indenture, and Trustee shall not be liable except for the performance of such duties; and no implied covenants or obligations shall be read into this Indenture against the Trustee; and

(2) in the absence of gross negligence on its part, the Trustee may conclusively rely, as to the truth of the statements and the correctness of the opinions expressed therein, upon certificates or opinions furnished to the Trustee and conforming to the requirements of this Indenture; but in the case of any such certificates or opinions which by any provision hereof are specifically required to be furnished to the Trustee, the Trustee shall be under a duty to examine the same to determine whether or not they conform to the form requirements of this Indenture (but need not confirm or investigate the accuracy of mathematical calculations or other facts stated therein).

(b) In case an Event of Default has occurred and is continuing, the Trustee shall exercise such of the rights and powers vested in it by this Indenture, and use the same degree of care and skill in their exercise, as a prudent person would exercise or use under the circumstances in the conduct of such person's own affairs.

(c) No provision of this Indenture shall be construed to relieve the Trustee from liability for its own grossly negligent action or its own willful misconduct, *except* that:

(1) this Subsection shall not be construed to limit the effect of Subsection (a) of this Section;

(2) the Trustee shall not be liable for any error of judgment made in good faith by a Responsible Officer or Officers of the Trustee, unless it shall be proved that the Trustee was grossly negligent in ascertaining the pertinent facts;

(3) the Trustee shall not be liable with respect to any action taken or omitted to be taken by it in good faith in accordance with the direction of the Holders of a majority in principal amount of the Outstanding Note of any series, determined as provided in Section 6.2, relating to the time, method and place of conducting any proceeding for any remedy available to the Trustee, or exercising any trust or power conferred upon the Trustee, under this Indenture with respect to the Note;

(4) no provision of this Indenture shall require the Trustee to expend or risk its own funds or otherwise incur any financial liability in the performance of any of its duties hereunder, or in the exercise of any of its rights or powers, if it shall have reasonable grounds for believing that repayment of such funds or adequate indemnity and/or security against such risk or liability is not reasonably assured to it;

(5) the Trustee shall not be liable in respect of any payment (as to the correctness of amount, entitlement to receive or any other matters relating to payment) or notice effected by the Issuer or any Paying Agent or any records maintained by any co-Note Registrar with respect to the Notes;

(6) if any party fails to deliver a notice relating to an event the fact of which, pursuant to this Indenture, requires notice to be sent to the Trustee, the Trustee may conclusively rely on its failure to receive such notice as reason to act as if no such event occurred, unless a Responsible Officer of the Trustee had actual knowledge of such event;

(7) the delivery of any information to the Trustee under this Indenture, including but not limited to any Rule 144A information, or reports to the Trustee is for informational purposes only and the receipt of such information or reports by the Trustee shall not constitute constructive notice of any information contained therein;

(8) in the absence of written investment direction from the Issuer, all cash received by the Trustee shall be placed in a non-interest bearing trust account, and in no event shall the Trustee be liable for the selection of investments or for investment losses incurred thereon or for losses incurred as a result of the liquidation of any such investment prior to its maturity date or the failure of the party directing such investments prior to its maturity date or the failure of the party directing such investment to provide timely written investment direction, and the Trustee shall have no obligation to invest or reinvest any amounts held hereunder in the absence of such written investment direction from the Issuer;

(9) in the event that the Trustee is also acting as custodian, Registrar, Paying Agent, exchange agent, bid solicitation agent or transfer agent hereunder, the rights and protections afforded to the Trustee pursuant to this Article VII shall also be afforded to such custodian, Registrar, Paying Agent, exchange agent, bid solicitation agent or transfer agent;

(10) any application by the Trustee for written instructions from the Issuer (other than with regard to any action proposed to be taken or omitted to be taken by the Trustee that affects the rights of the Holders of the Notes under this Indenture) may, at the option of the Trustee, set forth in writing any action proposed to be taken or omitted by the Trustee under this Indenture and the date on and/or after which such action shall be taken or such omission shall be effective. The Trustee shall not be liable to the Issuer for any action taken by, or omission of, the Trustee in accordance with a proposal included in such application on or after the date specified in such application (which date shall not be less than three Business Days after the date any officer that the Issuer has indicated to the Trustee should receive such application actually receives such application, unless any such officer shall have consented in writing to any earlier date), unless, prior to taking any such action (or the effective date in the case of any omission), the Trustee shall have received written instructions in accordance with this Indenture in response to such application specifying the action to be taken or omitted.

(d) Whether or not therein expressly so provided, every provision of this Indenture relating to the conduct or affecting the liability of or affording protection to the Trustee shall be subject to the provisions of this Section.

Section 7.2. Notice of Defaults.

The Trustee shall give the Holders notice of any Default ("Notice of Default") that has occurred and is continuing and of which a Responsible Officer of the Trustee has actual knowledge, within 90 days after the occurrence of such Default (but not less than 15 days after knowledge thereof). The Trustee may withhold from Holders notice of any continuing Default or Event of Default (except a Default or Event of Default relating to the payment of principal, premium, if any, or interest on, the Notes) if it determines that withholding such notice is in their interest; provided that, in the case of a default of a character specified in Section 6.1(4), no such notice to Holders shall be given until at least 30 days after the occurrence thereof.

Section 7.3. Certain Rights of Trustee and the Agents.

Subject to the provisions of Section 7.1:

(a) the Trustee and the Agents may rely conclusively and shall be protected in acting or refraining from acting upon any resolution, certificate, statement, instrument, opinion, report, notice, request, direction, consent, order, bond, debenture, note, other evidence of indebtedness or other paper or document believed by it to be genuine and to have been signed or presented by the proper party or parties;

(b) any request or direction of the Issuer mentioned herein shall be sufficiently evidenced by an Issuer Request or an Issuer Order and any resolution of the Board of Directors of the Issuer may be sufficiently evidenced by a Board Resolution;

(c) whenever in the administration of this Indenture the Trustee or an Agent shall deem it desirable that a matter be proved or established prior to taking, suffering or omitting any action hereunder, the Trustee or such Agent, as the case may be, (unless other evidence be herein specifically prescribed) may, in the absence of gross negligence on its part, rely upon an Officer's Certificate or an Opinion of Counsel;

(d) the Trustee or the Agents may consult with counsel of its selection, at the expense of the Issuer, and the advice of such counsel or any Opinion of Counsel shall be full and complete authorization and protection in respect of any action taken, suffered or omitted by it hereunder in good faith and in reliance thereon;

(e) the Trustee and each Agent shall be under no obligation to exercise any of the rights or powers vested in it by this Indenture at the request or direction of any of the Holders pursuant to this Indenture, unless such Holders shall have offered to the Trustee or such Agent, as applicable, security and/or indemnity satisfactory to it against the costs, expenses and liabilities which might be incurred by it in compliance with such request or direction satisfactory to the Trustee or such Agent, as applicable;

(f) neither the Trustee nor any Agent shall be bound to make any investigation into the facts or matters stated in any resolution, certificate, statement, instrument, report, opinion, notice, request, direction, consent, order, bond, debenture, note, other evidence of indebtedness or other paper or document, but the Trustee and each Agent, in its discretion, may make such further inquiry or investigation into such facts or matters as it may see fit, and, if the Trustee or an Agent shall determine to make such further inquiry or investigation, it shall be entitled to examine the books, records and premises of the Issuer and the Guarantor, personally or by agent or attorney at the sole cost of the Issuer and shall incur no liability or additional liability of any kind by reason of such inquiry or investigation;

(g) the Trustee and each Agent may execute any of the trusts or powers hereunder or perform any duties hereunder either directly or by or through agents or attorneys and the Trustee and each Agent shall not be responsible for any misconduct or negligence on the part, or for the supervision of, any agent or attorney appointed with due care by it hereunder;

(h) neither the Trustee nor any Agent shall be liable for any action taken, suffered or omitted by it in good faith which the Trustee or such Agent, as applicable, believed to have been authorized or within its rights or powers;

(i) neither the Trustee nor any Agent shall be charged with knowledge of any default or Event of Default with respect to the Notes, unless either (1) a Responsible Officer shall have actual knowledge of such default or Event of Default, or (2) written notice of such default or Event of Default shall have been received by a Responsible Officer of the Trustee by the Issuer, the Guarantor or by any Holder of the Notes;

(j) in no event shall the Trustee or any Agent be responsible or liable for special, indirect, punitive or consequential loss or damage of any kind whatsoever (including, but not limited to, loss of profit) irrespective of whether the Trustee or such Agent has been advised of the likelihood of such loss or damage and regardless of the form of action;

(k) the rights, privileges, protections, immunities and benefits given to the Trustee and the Agents, including, without limitation, its right to be indemnified, are extended to, and shall be enforceable by, the Trustee and the Agents in each of their capacities hereunder, and each agent, custodian and other Person employed to act hereunder;

(l) neither the Trustee nor the Agents shall be required to give any bond or surety in respect of the performance of its powers and duties hereunder;

(m) the Trustee and the Agents may request that the Issuer deliver a certificate setting forth the names of individuals and/or titles of officers authorized at such time to take specified actions pursuant to this Indenture; and

(n) the permissive rights of the Trustee enumerated herein shall not be construed as duties.

Section 7.4. Not Responsible for Recitals or Issuance of Notes.

The recitals contained herein, in the Notes and in the Guarantees endorsed thereon, except the Trustee's certificates of authentication, shall be taken as the statements of the Issuer or the Guarantors, as the case may be, and the Trustee assumes no responsibility for their correctness. The Trustee makes no representations as to the validity or sufficiency of this Indenture or the Notes. The Trustee shall not be accountable for the use or application by the Issuer of Notes or the proceeds thereof.

Section 7.5. May Hold Notes.

The Trustee, any Paying Agent or Transfer Agent, any Registrar (if other than the Trustee) or any other agent of the Issuer or the Guarantors, in its individual or any other capacity, may become the owner or pledgee of Notes and, subject to Section 7.8 and 7.12, may otherwise deal with the Issuer and the Guarantors with the same rights it would have if it were not Trustee, Paying Agent, Transfer Agent, Registrar or such other agent.

Section 7.6. Money Held in Trust.

All moneys received by the Trustee or any Paying Agent shall, until used or applied as herein provided, be held in trust for the purposes for which they were received, and need not be segregated from other funds of the Trustee or Paying Agent, except as otherwise required by law. Neither the Trustee nor any Paying Agent shall be under any liability for interest on any moneys received by it hereunder except such as it may agree in writing with the Issuer to pay thereon.

Section 7.7. Compensation and Reimbursement.

The Issuer and the Guarantors agree:

- (1) to, jointly and severally, pay to the Trustee and the Agents from time to time upon demand such compensation for all services rendered by it hereunder as shall be agreed upon in writing (which compensation shall not be limited by any provision of law in regard to the compensation of a trustee of an express trust), as such fees may be adjusted from time to time;
- (2) except as otherwise expressly provided herein, to, jointly and severally, reimburse each of the Trustee and the Agents upon its request for all reasonable expenses and disbursements incurred or made by it in accordance with any provision of this Indenture (including the reasonable compensation and the expenses and disbursements of their agents and counsel), except any such expense, disbursement or advance as may be attributable to its gross negligence or willful misconduct; and
- (3) to, jointly and severally, indemnify each the Trustee and the Agents for, and to hold each harmless against, any loss, liability, cost, damage, claim or expense (including taxes and the reasonable compensation, expenses and disbursements of its agents, accountants, experts and counsel) incurred without gross negligence or willful misconduct on its part as determined in a final judgment of a court with competent jurisdiction, arising out of or in connection with the acceptance or administration of this trust or the performance by it of its duties and obligations or the exercise of its rights hereunder, including the costs and expenses of enforcing this Indenture against the Issuer or the Guarantors, as the case may be (including, without limitation, this Section 7.7), and of defending against any claim (whether asserted by any Holder or the Issuer or the Guarantors or any other Person, as the case may be) or liability in connection with the exercise or performance of any of its powers or duties hereunder. The provisions of this Section 7.7 shall survive any termination of this Indenture and the resignation or removal of the Trustee, the Principal Paying Agent or other Paying Agent.

As security for the performance of the obligations of the Issuer or the Guarantors, as the case may be, under this Section 7.7, the Trustee shall have a lien prior to the Notes upon all property and funds held or collected by the Trustee, except funds held in trust for the payment of principal of (and premium, if any) or interest on particular Notes. The Trustee's right to receive payment of any amounts due under this Section 7.7 shall not be subordinate to any other liability or indebtedness of the Issuer or the Guarantors, as the case may be (even though the Notes may be so subordinated).

The obligation of the Issuer under this Section 7.7 shall survive the satisfaction and discharge of this Indenture and the earlier resignation or removal of the Trustee. The indemnification provided in this Section 7.7 shall extend to the officers, directors, agents and employees of the Trustee.

When the Trustee incurs expenses or renders services after an Event of Default specified in Section 6.1 occurs, the expenses and the compensation for such services are intended to constitute expenses of administration under Title 11, U.S. Code, or any similar Federal, State or analogous foreign law for the relief of debtors.

Section 7.8. Corporate Trustee Required; Eligibility.

There shall at all times be a Trustee hereunder which shall be a Person that is eligible pursuant to the Trust Indenture Act to act as such and has a combined capital and surplus of at least U.S.\$50,000,000 and its Corporate Trust Office in The City of New York, New York. If such Person publishes reports of condition at least annually, pursuant to law or to the requirements of a Federal, State, Territorial or District of Columbia supervising or examining authority, then for the purposes of this Section, the combined capital and surplus of such Person shall be deemed to be its combined capital and surplus as set forth in its most recent report of condition so published. If at any time the Trustee shall cease to be eligible in accordance with the provisions of this Section, it shall resign immediately in the manner and with the effect hereinafter specified in this Article.

Section 7.9. Resignation and Removal; Appointment of Successor.

(a) No resignation or removal of the Trustee and no appointment of a successor Trustee pursuant to this Article shall become effective until the acceptance of appointment by the successor Trustee under Section 7.10, at which time the retiring Trustee shall be fully discharged from its obligations hereunder.

(b) The Trustee and the Principal Paying Agent may resign at any time by giving written notice thereof to the Issuer. If an instrument of acceptance by a successor Trustee or Principal Paying Agent shall not have been delivered to the Trustee or Principal Paying Agent, as the case may be, within 30 days after the giving of such notice of resignation, the resigning Trustee or Principal Paying Agent may petition, at the expense of the Issuer, any court of competent jurisdiction for the appointment of a successor Trustee or Principal Paying Agent, as the case may be.

(c) The Trustee may be removed at any time by Act of the Holders of a majority in principal amount of the Outstanding Notes, delivered to the Trustee and to the Issuer. If an instrument of acceptance by a successor Trustee shall not have been delivered to the Trustee within 30 days after the giving of such notice of removal, the Issuer may petition, at its expense, any court of competent jurisdiction for the appointment of a successor Trustee.

(d) The Agents (other than the Principal Paying Agent) may resign at any time by giving written notice thereof to the Issuer. The Agents may appoint a successor Agent if the Issuer does not.

(e) So long as no Event of Default has occurred and is continuing, the Issuer may remove the Trustee or any Agent and appoint a new Trustee or Agent, as applicable, provided that such Trustee meets the eligibility requirements of Section 7.8.

(f) If at any time:

(1) the Trustee shall fail to comply with Section 7.8 after written request therefore by the Issuer or by any Holder who has been a bona fide Holder of a Note for at least six months; or

(2) the Trustee shall cease to be eligible under Section 7.8 and shall fail to resign after written request therefore by the Issuer or by any such Holder; or

(3) the Trustee shall become incapable of acting or shall be adjudged a bankrupt or insolvent or a receiver of the Trustee or of its property shall be appointed or any public officer shall take charge or control of the Trustee or of its property or affairs for the purpose of rehabilitation, conservation or liquidation, then, in any such case, (i) the Issuer by a Board Resolution may remove the Trustee, or (ii) any Holder who has been a bona fide Holder of a Note for at least six months may, on behalf of himself or herself and all others similarly situated, petition any court of competent jurisdiction for the removal of the Trustee and the appointment of a successor Trustee.

(g) If the Trustee shall resign, be removed or become incapable of acting, or if a vacancy shall occur in the office of Trustee for any cause, the Issuer, by a Board Resolution, shall promptly appoint a successor Trustee. If, within one year after such resignation, removal or incapability, or the occurrence of such vacancy, a successor Trustee shall be appointed by Act of the Holders of a majority in principal amount of the Outstanding Notes delivered to the Issuer and the retiring Trustee, the successor Trustee so appointed shall, forthwith upon its acceptance of such appointment, become the successor Trustee and supersede the successor Trustee appointed by the Issuer. If no successor Trustee shall have been so appointed by the Issuer or the Holders and accepted appointment in the manner hereinafter provided, any Holder who has been a bona fide Holder of a Note for at least six months may, on behalf of himself or herself and all others similarly situated, petition any court of competent jurisdiction at the expense of the Issuer for the appointment of a successor Trustee.

(h) The Issuer shall give notice of each resignation and each removal of the Trustee and each appointment of a successor Trustee to all Holders in the manner provided in Section 1.6. Each notice shall include the name of the successor Trustee and the address of its Corporate Trust Office at the expense of the Issuer.

Section 7.10. Acceptance of Appointment by Successor.

Every successor Trustee appointed hereunder shall execute, acknowledge and deliver to the Issuer, the Guarantors and to the retiring Trustee an instrument accepting such appointment, and thereupon the resignation or removal of the retiring Trustee shall become effective and such successor Trustee, without any further act, deed or conveyance, shall become vested with all the rights, powers, trusts and duties of the retiring Trustee; but, on request of the Issuer or the successor Trustee, such retiring Trustee shall, upon payment of its charges, execute and deliver an instrument transferring to such successor Trustee all the rights, powers and trusts of the retiring Trustee and shall duly assign, transfer and deliver to such successor Trustee all property and money held by such retiring Trustee hereunder, subject nevertheless to its Lien, if any, provided for in Section 7.7. Upon request of any such successor Trustee, the Issuer and the Guarantors shall execute any and all instruments for more fully and certainly vesting in and confirming to such successor Trustee all such rights, powers and trusts. No successor Trustee shall accept its appointment unless at the time of such acceptance such successor Trustee shall be qualified and eligible under this Article.

Section 7.11. Merger, Conversion, Consolidation or Succession to Business.

Any corporation or other entity into which the Trustee may be merged or convened or with which it may be consolidated, or any corporation or other entity resulting from any merger, conversion or consolidation to which the Trustee shall be a party, or any corporation or other entity succeeding to all or substantially all the corporate trust business of the Trustee, shall be the successor of the Trustee hereunder, provided that such corporation or other entity shall be otherwise qualified and eligible under this Article, without the execution or filing of any paper or any further act on the part of any of the parties hereto. In case any Notes shall have been authenticated, but not delivered, by the Trustee then in office, any successor by merger, conversion or consolidation to such authenticating Trustee may adopt such authentication and deliver the Notes so authenticated with the same effect as if such successor Trustee had itself authenticated such Notes.

Section 7.12. Appointment of Authenticating Agent.

The Trustee may appoint an Authenticating Agent or Agents with respect to the Notes which shall be authorized to act on behalf of the Trustee to authenticate Notes issued upon original issue and upon exchange, registration of transfer or partial redemption thereof or pursuant to Section 3.5, and Notes so authenticated shall be entitled to the benefits of this Indenture and shall be valid and obligatory for all purposes as if authenticated by the Trustee hereunder. Wherever reference is made in this Indenture to the authentication and delivery of Notes by the Trustee or the Trustee's certificate of authentication, such reference shall be deemed to include authentication and delivery on behalf of the Trustee by an Authenticating Agent and a certificate of authentication executed on behalf of the Trustee by an Authenticating Agent. Each Authenticating Agent shall be acceptable to the Issuer and shall at all times be a corporation organized and doing business under the laws of the United States, any State thereof or the District of Columbia, authorized under such laws to act as Authenticating Agent, having a combined capital and surplus of not less than U.S.\$50,000,000 and subject to supervision or examination by Federal or State authority. If such Authenticating Agent publishes reports of condition at least annually, pursuant to law or to the requirements of said supervising or examining authority, then for the purposes of this Section, the combined capital and surplus of such Authenticating Agent shall be deemed to be its combined capital and surplus as set forth in its most recent report of condition so published. If at any time an Authenticating Agent shall cease to be eligible in accordance with the provisions of this Section, such Authenticating Agent shall resign immediately in the manner and with the effect specified in this Section.

Any corporation or other entity into which an Authenticating Agent may be merged or converted or with which it may be consolidated, or any corporation or other entity resulting from any merger, conversion or consolidation to which such Authenticating Agent shall be a party, or any corporation or other entity succeeding to all or substantially all the corporate agency or corporate trust business of an Authenticating Agent, shall continue to be an Authenticating Agent, provided such corporation or other entity shall be otherwise eligible under this Section, without the execution or filing of any paper or any further act on the part of the Trustee or the Authenticating Agent.

An Authenticating Agent may resign at any time by giving written notice thereof to the Trustee and to the Issuer. The Trustee may at any time terminate the agency of an

Authenticating Agent by giving written notice thereof to such Authenticating Agent and to the Issuer. Upon receiving such a notice of resignation or upon such a termination, or in case at any time such Authenticating Agent shall cease to be eligible in accordance with the provisions of this Section, the Trustee may appoint a successor Authenticating Agent which shall be acceptable to the Issuer and shall give notice of such appointment in the manner provided in Section 1.6 to all Holders of Notes. Any successor Authenticating Agent upon acceptance of its appointment hereunder shall become vested with all the rights, powers and duties of its predecessor hereunder, with like effect as if originally named as an Authenticating Agent. No successor Authenticating Agent shall be appointed unless eligible under the provisions of this Section.

The Issuer agrees to pay to each Authenticating Agent from time to time reasonable compensation for its services under this Section.

If an appointment is made pursuant to this Section, the Notes may have endorsed thereon, in lieu of the Trustee's certificate of authentication, an alternative certificate of authentication in the following form:

"This is one of the Notes referred to in the within-mentioned Indenture.

THE BANK OF NEW YORK MELLON *as Trustee*

By: _____
as Authenticating Agent"

ARTICLE VIII

HOLDERS LISTS AND COMMUNICATIONS BY TRUSTEE AND ISSUER

Section 8.1. Issuer to Furnish Trustee; Names and Addresses of Holders.

The Issuer will furnish or cause to be furnished to the Trustee

- (a) semi-annually, not more than 15 days after each Regular Record Date, a list, in such form as the Trustee may reasonably require, of the names and addresses of the Holders as of such Regular Record Date; and
- (b) at such other times as the Trustee may request in writing, within 30 days after the receipt by the Issuer of any such request, a list of similar form and content as of a date not more than 15 days prior to the time such list is furnished;

excluding from any such list names and addresses received by the Trustee in its capacity as Registrar.

Section 8.2. Preservation of Information; Communications to Holders.

- (a) The Trustee shall preserve, in as current a form as is reasonably practicable, the names and addresses of Holders contained in the most recent list furnished to the Trustee as provided in Section 8.1 and the names and addresses of Holders received by the Trustee in its capacity as Registrar. The Trustee may destroy any list furnished to it as provided in Section 8.1 upon receipt of a new list so furnished.
- (b) If a Holder (herein referred to as an "applicant") applies in writing to the Trustee, and furnishes to the Trustee reasonable proof that each such applicant has owned a Note for a period of at least six months preceding the date of such application, and such application states that such applicant desires to communicate with other Holders with respect to their rights under this Indenture or under the Notes and is accompanied by a copy of the form of proxy or other communication which such applicant proposes to transmit, then the Trustee shall, within five Business Days after the receipt of such application, at its election, either

- (1) afford such applicant access to the information preserved at the time by the Trustee in accordance with Section 8.2(a);
- or

(2) inform such applications as to the approximate number of Holders whose names and addresses appear in the information preserved at the time by the Trustee in accordance with Section 8.2(a), as to the approximate cost of mailing to such Holders the form of proxy or other communication, if any, specified in such application.

(c) Every Holder of Notes, by receiving and holding the same, agrees with the Issuer and the Trustee that neither the Issuer nor the Trustee nor any agent of either of them shall be held accountable by reason of the disclosure of any such information as to the names and addresses of the Holders in accordance with Section 8.2(b), regardless of the source from which such information was derived, and that the Trustee shall not be held accountable by reason of mailing any material pursuant to a request made under Section 8.2(b).

ARTICLE IX

CONSOLIDATION, MERGER, CONVEYANCE, TRANSFER OR LEASE

Section 9.1. Mergers, Consolidations and Certain Sales of Assets.

So long as any of the Notes are Outstanding, neither the Issuer nor any Guarantor may, in a single transaction or a series of related transactions:

(1) unless the Issuer or such Guarantor, as applicable, is the surviving Person, consolidate with or merge into any other Person or permit any other Person to consolidate with or merge into the Issuer or such Guarantor, as applicable, (other than a consolidation or merger of a Wholly Owned Subsidiary organized under the laws of Luxembourg, Brazil, Peru, the United States or any OECD country, in each case, with or into the Issuer or such Guarantor, as applicable); or

(2) directly or indirectly, transfer, sell, lease or otherwise dispose of all or substantially all of its assets (determined on a consolidated basis of the Issuer and its Subsidiaries or the relevant Guarantor and its Subsidiaries, as applicable) to any Person (other than the Issuer or a Guarantor) (provided that the creation of a Lien on or in any of its assets shall not in and of itself constitute the transfer, sale, lease or disposition of the assets subject to the Lien),

unless the following conditions, to the extent applicable, are met:

(i) in the case of a transaction in which the Issuer or a Guarantor does not survive or in which the Issuer or a Guarantor sells, leases or otherwise disposes of all or substantially all of its assets to any other Person, the successor entity to the Issuer or such Guarantor (1) shall expressly assume, by a supplemental indenture executed and delivered to the Trustee, all of the Issuer's or such Guarantor's obligations under this Indenture and (2) shall be organized under the laws of (x) Luxembourg, Brazil, Peru or any state or political subdivision thereof, (y) the United States or any state thereof or the District of Columbia or (z) any other country if such successor entity undertakes, in such supplemental indenture, to pay such additional amounts in respect of principal (and premium, if any) and interest as may be necessary in order that the net amounts paid pursuant to the Notes after deduction or withholding of any present or future withholding taxes, levies, imposts or charges whatsoever imposed by or for the account of such country or any political subdivision or taxing authority thereof or therein shall equal the respective amounts of principal (and premium, if any) and interest specified in the Notes, subject to the same exceptions set forth under clauses (1) through (7) of Section 11.9, but replacing existing references in such clauses to the jurisdiction of incorporation of the Issuer or such Guarantor, as applicable, with references to such other country and references to the jurisdiction of incorporation of the Issuer or such Guarantor, as applicable, under Section 4.1 shall automatically be deemed to be references to such other country;

(ii) if, as a result of any such transaction, property or assets of the Issuer or such Guarantor would become subject to a Lien prohibited by Section 12.10, the Issuer or such Guarantor, as applicable, or the successor entity to the Issuer or such Guarantor, as applicable, shall have secured the Notes as described thereunder; and

(iii) the Issuer or such Guarantor, as applicable, has delivered to the Trustee an Officer's Certificate and an Opinion of Counsel, each stating that such consolidation, merger, conveyance, transfer, lease or acquisition and, if a supplemental indenture is required in connection with such transaction, such supplemental indenture complies with this covenant and that all conditions precedent provided for in this Indenture relating to such transaction have been complied with.

In the event of any transaction (other than a lease) described in and complying with the provisions of this Section 9.1 in which the Issuer or a Guarantor, as applicable, is not the surviving Person and the surviving Person assumes all the obligations of the Issuer or such Guarantor, as applicable, under this Indenture and the Notes or the Guarantee, as applicable, pursuant to a supplemental Indenture, such surviving Person shall succeed to, and be substituted for, and may exercise every right and power of, the Issuer or such Guarantor, as applicable, and the Issuer or such Guarantor, as applicable, will be discharged from its obligations under this Indenture and the Notes or the Guarantee, as applicable.

ARTICLE X

SUPPLEMENTAL INDENTURES

Section 10.1. Supplemental Indentures Without Consent of Holders.

Without the consent of any Holders, the Issuer and the Trustee, at any time and from time to time, may enter into one or more supplemental indentures hereto in form satisfactory to the Trustee, for any of the following purposes:

- (1) to evidence the succession of another Person to the Issuer or any Guarantor and the assumption by any such successor of the covenants of the Issuer or any Guarantor, as applicable, herein and in the Notes or the Guarantees, as applicable;
- (2) to add to the covenants of the Issuer for the benefit of the Holders, or to surrender any right or power herein conferred upon the Issuer;

- (3) to cure any ambiguity, defect or inconsistency or to correct a manifest error;
- (4) to provide for uncertificated Notes in addition to or in place of certificated Notes;
- (5) to comply with Section 9.1 of this Indenture;
- (6) to evidence and provide for the acceptance of an appointment by a successor trustee;
- (7) to provide for any additional guarantee of the Notes;
- (8) to secure the Notes or to confirm and evidence the release, termination or discharge of any guarantee of or Lien securing the Notes when such release, termination or discharge is permitted by this Indenture;
- (9) to provide for or confirm the issuance of Additional Notes;
- (10) to conform the provisions of this Indenture to the caption entitled "Description of the Notes" in the offering memorandum relating to the Notes; or
- (11) to make any other modification and any waiver or authorization of any breach or proposed breach of any provision of this Indenture or the Notes which is not materially prejudicial to the Holders.

Section 10.2. Supplemental Indentures with Consent of Holders.

With the consent of the Holders of not less than a majority in aggregate principal amount of the Outstanding Notes, by Act of said Holders delivered to the Issuer and the Trustee, and consistent with Section 6.13, the Issuer and the Trustee may enter into an indenture or supplemental indentures hereto for the purpose of adding any provisions to or changing in any manner or eliminating any of the provisions of this Indenture or of modifying in any manner the rights of the Holders under this Indenture; provided, however, that no such supplemental indenture shall, without the consent of the Holder of each outstanding Note affected thereby:

- (1) change the Stated Maturity of the principal of, or any installment of interest on, any Note, or reduce the principal amount thereof or the rate of interest thereon or any premium payable thereon, or change the place of payment where, or the coin or currency in which, any Note or any premium or interest thereon is payable, or impair the right to institute suit for the enforcement of any such payment on or with respect to any Note on or after the Stated Maturity thereof (or, in the case of redemption, on or after the Redemption Date),
- (2) reduce the percentage in principal amount of the Outstanding Notes, the consent of whose Holders is required for any such supplemental indenture, or the consent of whose Holders is required for any waiver (of compliance with certain provisions of this Indenture or certain defaults hereunder and their consequences) provided for in this Indenture;

(3) modify any of the provisions of this Section 10.2 or Section 6.12 or Section 11.9, except to increase any such percentage described in clause (2) above or to provide that certain other provisions of this Indenture cannot be modified or waived without the consent of the Holder of each Outstanding Note affected thereby;

(4) release any Guarantors from its obligations under its Guarantee or this Indenture, except in compliance with the terms of this Indenture.

It shall not be necessary for any Act of Holders under this Section to approve the particular form of any proposed supplemental indenture, but it shall be sufficient if such Act shall approve the substance thereof.

Section 10.3. Execution of Supplemental Indentures.

In executing, or accepting the additional trusts created by, any supplemental indenture permitted by this Article or the modifications thereby of the trusts created by this Indenture, the Trustee shall receive, and (subject to Section 7.1) shall be fully protected in conclusively relying upon, in addition to the documents required by Section 1.2, an Officer's Certificate and Opinion of Counsel stating that the execution of such supplemental indenture is authorized or permitted by this Indenture. The Trustee may, but shall not be obligated to, enter into any such supplemental indenture which affects the trustee's own rights, duties or immunities under this Indenture.

Section 10.4. Effect of Supplemental Indentures.

Upon the execution of any supplemental indenture under this Article, this Indenture shall be modified in accordance therewith, and such supplemental indenture shall form a part of this Indenture for all purposes; and every Holder of Notes theretofore or thereafter authenticated and delivered hereunder shall be bound thereby.

Section 10.5. Reference in Notes to Supplemental Indentures.

Notes authenticated and delivered after the execution of any supplemental indenture pursuant to this Article may, and shall if required by the Trustee, bear a notation in form approved by the Trustee as to any matter provided for in such supplemental indenture. If the Issuer shall so determine, new Notes so modified as to conform, in the opinion of the Issuer, to any such supplemental indenture may be prepared and executed by the Issuer and authenticated and delivered by the Trustee in exchange for Outstanding Notes.

Section 10.6. Notice to Holders.

After a supplemental indenture under this Article becomes effective, the Issuer will send to the Holders affected thereby a notice briefly describing the terms of the supplement. The Issuer will send supplemental indentures to Holders upon request. Any failure of the Issuer to send such notice, or any defect therein, will not, however, in any way impair or affect the validity of any such supplemental indenture.

ARTICLE XI

COVENANTS

Section 11.1. Payment Under the Notes.

Each of the Issuer and the Guarantors shall duly and punctually pay all amounts owed by it, and comply with all its other obligations, under the terms of the Notes, the Guarantees and this Indenture (collectively, the "Transaction Documents").

Section 11.2. Maintenance of Office or Agency.

The Issuer and the Guarantors will maintain in the Borough of Manhattan, The City of New York, New York, an office or agency where Notes may be presented or surrendered for payment, where Notes may be surrendered for registration of transfer or exchange and where notices and demands to or upon the Issuer or the Guarantors in respect of the Notes, the Guarantees and this Indenture may be served. Initially, this office will be at the Corporate Trust Office of the Trustee, unless the Issuer shall designate and maintain any other office or agency for one or more such purposes, and the Issuer and the Guarantors shall agree not to change the designation of such office without prior written notice to the Trustee and designation of a replacement office in the same general location. The Issuer will give prompt written notice to the Trustee of the location, and any change in the location, of such offices or agencies. If at any time the Issuer or the Guarantors shall fail to maintain any such required offices or agencies or shall fail to furnish the Trustee with the address thereof, such presentations, surrenders, notices and demands may be made or served at the Corporate Trust Office of the Trustee. The Issuer and the Guarantors hereby appoint the Trustee as their agent to receive all such presentations, surrenders, notices and demands.

The Issuer may also from time to time designate one or more other offices or agencies (in or outside the Borough of Manhattan, The City of New York, New York) where the Notes may be presented or surrendered for any or all such purposes and may from time to time rescind such designations (each, a "Transfer Agent"); provided, however, that no such designation or rescission shall in any manner relieve the Issuer of its obligation to maintain an office or agency in the Borough of Manhattan, The City of New York, New York. The Issuer has initially designated the offices of The Bank of New York Mellon to act as Transfer Agent. The Issuer will give prompt written notice to the Trustee of any such designation or rescission and of any change in the location of any such other office or agency.

Section 11.3. Money for Note Payments to Be Held in Trust.

If the Issuer shall at any time act as its own Paying Agent, it will, on or before each due date of the principal of (and premium, if any) or interest on any of the Notes, segregate and hold in trust for the benefit of the Persons entitled thereto a sum sufficient to pay the principal (and premium, if any) or interest so becoming due until such sums shall be paid to such Persons or otherwise disposed of as herein provided and will promptly notify the Trustee in writing of its action or failure so to act.

Whenever the Issuer shall have one or more Paying Agents, it will, prior to each due date of the principal of (and premium, if any) or interest on any Notes, deposit with the Principal Paying Agent a sum sufficient to pay the principal (and premium, if any) or interest (including Additional Amounts, if any) so becoming due, such sum to be held in trust for the benefit of the Persons entitled to such principal, premium or interest, and (unless such Paying Agent is the Trustee) the Issuer will promptly notify the Trustee in writing of its action or failure so to act.

The Issuer will cause each Paying Agent other than the Trustee and the Principal Paying Agent to execute and deliver to the Trustee an instrument in which such Paying Agent shall agree with the Trustee, subject to the provisions of this Section 11.3, that such Paying Agent will:

- (1) hold all sums held by it for the payment of the principal of (and premium, if any) or interest on Notes in trust for the benefit of the Persons entitled thereto until such sums shall be paid to such Persons or otherwise disclosed of as herein provided;
- (2) give the Trustee written notice of any default by the Issuer (or any other obligor upon the Notes) in the making of any payment of principal (and premium, if any) or interest;
- (3) at any time during the continuance of any such default, upon the written request of the Trustee, forthwith pay to the Trustee all sums so held in trust by such Paying Agent; and
- (4) acknowledge, accept and agree to comply in all respects with the provisions of this Indenture relating to the duties, rights and obligations of such Paying Agent.

The Issuer may at any time, for the purpose of obtaining the satisfaction and discharge of this Indenture or for any other purpose, pay, or by Issuer Order direct any Paying Agent to pay, to the Trustee all sums held in trust by the Issuer or such Paying Agent, such sums to be held by the Trustee upon the same trusts as those upon which such sums were held by the Issuer or such Paying Agent; and, upon such payment by any Paying Agent to the Trustee, such Paying Agent shall be released from all further liability with respect to such money.

Any money deposited with the Trustee or any Paying Agent, or then held by the Issuer, in trust for the payment of the principal of (and premium, if any) or interest on any Note and remaining unclaimed for two years after such principal (and premium, if any) or interest has become due and payable shall be paid to the Issuer on the Issuer's Request, or (if then held by the Issuer) shall be discharged from such trust; and the Holder of such Note shall thereafter, as an unsecured general creditor, look only to the Issuer for payment thereof, and all liability of the Trustee or such Paying Agent with respect to such trust money, and all liability of the Issuer as trustee thereof, shall thereupon cease.

Section 11.4. Maintenance of Corporate Existence.

The Issuer and the Guarantors shall, and shall cause each of their respective Subsidiaries to, maintain in effect its corporate existence and all registrations necessary therefore and take all actions to maintain all rights, privileges, titles to property, franchises and the like necessary or desirable in the normal conduct of its business, activities or operations provided that this covenant shall not require (i) the Issuer, the Guarantors or any of their respective Subsidiaries to maintain any such registration, right, privilege, title to property, franchise or the like or require the Issuer or the Guarantors to preserve the corporate existence of any of their respective Subsidiaries (other than a Subsidiary that is a Guarantor), if the failure to do so would not have a material adverse effect on the Issuer and its Subsidiaries taken as a whole or have a material adverse effect on the rights of the Holders or (ii) the Guarantors or the Issuer to preserve its corporate existence if it complies with the provisions of Section 9.1.

Section 11.5. Repurchases at the Option of the Holders upon Change of Control.

If a Change of Control occurs that results in a Rating Decline, each Holder will have the right to require the repurchase of all or any part (equal to U.S.\$200,000 and integral multiples of U.S.\$1,000 in excess thereof) of the Notes of that Holder pursuant to a Change of Control Offer by the Issuer or the Guarantors. No such purchase in part shall reduce the principal amount of the Notes held by any Holder to below U.S.\$200,000. In the Change of Control Offer, the Issuer or a Guarantor will offer a "Change of Control Payment" in U.S. dollars equal to 101% of the aggregate principal amount of Notes repurchased plus accrued and unpaid interest and Additional Amounts, if any, on the Notes repurchased, to the date of purchase (subject to the right of the Holders of record on the relevant Record Date to receive interest and Additional Amounts, if any, on the relevant Interest Payment Date).

Within 30 days following any Change of Control that results in a Rating Decline the Issuer or the Guarantor will make a "Change of Control Offer" by notice to each Holder of Notes in accordance with the provision set out under Section 1.6, describing the transaction or transactions that constitute the Change of Control and offering to repurchase Notes on the date specified in the notice (the "Change of Control Payment Date"), which date will be no earlier than 30 days and no later than 60 days from the date such notice is mailed, pursuant to the procedures required by this Indenture and described in such notice.

The Issuer or the applicable Guarantor will comply, to the extent applicable, with the requirements of Section 14(e)-1 of the Exchange Act and any other applicable securities laws or regulations in connection with the repurchase of Notes pursuant to this covenant. To the extent that the provisions of any applicable securities laws or regulations conflict with provisions of this covenant, the Issuer or the applicable Guarantor will comply with the applicable securities laws and regulations and will not be deemed to have breached its obligations under this covenant by virtue of its compliance with such securities laws or regulations.

On the Change of Control Payment Date, the Issuer or the applicable Guarantor will, to the extent lawful:

- (1) accept for payment all Notes or portions of Notes properly tendered pursuant to the Change of Control Offer; and
- (2) procure that the Change of Control Payment is made in respect of all Notes or portions of Notes properly tendered.

The Paying Agents will promptly mail to each Holder who properly tendered Notes the Change of Control Payment for such Notes, and the Trustee will promptly authenticate and mail (or cause to be transferred by book entry) to each Holder a new Note equal in principal amount to any unpurchased portion of the Notes surrendered, if any; provided that each new Note will be in minimum denominations of U.S.\$200,000 and integral multiples of U.S.\$1,000 in excess thereof.

The provisions described above that require the Issuer or a Guarantor to make a Change of Control Offer following a Change of Control will be applicable whether or not any other provisions of this Indenture are applicable. However, a Change of Control Offer is only required to be made in the event that a Change of Control results in a Rating Decline. Consequently, if a Change of Control were to occur which does not result in a Rating Decline, none of the Issuer and the Guarantors would be required to launch a Change of Control Offer. Except as described above with respect to a Change of Control, this Indenture does not contain provisions that permit the Holders to require that the Issuer or a Guarantor repurchase or redeem the Notes in the event of a takeover, recapitalization or similar transaction.

None of the Issuer or the Guarantors will be required to make a Change of Control Offer upon a Change of Control if (1) a third party makes the Change of Control Offer in the manner, at the times and otherwise in compliance with the requirements, set forth in this Indenture, that are applicable to a Change of Control Offer made by the Issuer or a Guarantor and such third party purchases all Notes properly tendered and not withdrawn under the Change of Control Offer or (2) a notice of redemption has been given for all outstanding Notes pursuant to this Indenture as described under Section 4.2 unless and until there is a default in payment of the applicable redemption price.

Notwithstanding anything to the contrary contained herein and subject to applicable law, a Change of Control Offer may be made in advance of a Change of Control and conditioned upon the occurrence of such Change of Control and Rating Decline if a definitive agreement is in place for the Change of Control at the time of making of the Change of Control Offer.

In the event that the Holders of not less than 90% of the aggregate principal amount of Outstanding Notes accept a Change of Control Offer and the Issuer or a Guarantor or a third party purchases all the Notes held by such holders, the Issuer or a Guarantor will have the right, on not less than 30 nor more than 60 days' prior notice to the Holders, given not more than 30 days following the purchase date pursuant to the Change of Control Offer, to redeem all of the Notes that remain outstanding following such purchase at the purchase price equal to that in the Change of Control Offer plus, to the extent not included in the purchase price, accrued and unpaid interest and additional amounts, if any, on the Notes that remain Outstanding, to, but excluding, the date of redemption.

Section 11.6. Payment of Taxes and Other Claims.

The Issuer and the Guarantors shall, and shall cause each of their respective Subsidiaries to, pay or discharge or cause to be paid or discharged before the same shall become delinquent, (i) all taxes, assessments and governmental charges levied or imposed upon the Issuer and the Guarantors or any of their respective Subsidiaries, as the case may be, and (ii) all lawful claims for labor, materials and supplies which, if unpaid, might by law become a lien upon the property of the Issuer or a Guarantor or any of their respective Subsidiaries, as the case may be; provided, however, that neither the Issuer nor any Guarantor nor any of their respective Subsidiaries shall be required to pay or discharge or cause to be paid or discharged any such tax, assessment, charge or claim whose amount, applicability or validity is being contested in good faith and, if appropriate, by appropriate legal proceedings, or where the failure to do so would not have a material adverse effect on the Issuer and its Subsidiaries taken as a whole or have a material adverse effect on the rights of the Holders.

Section 11.7. Provision of Financial Information.

The Issuer has agreed that it will furnish to the Trustee and the Holders and to any prospective purchasers of such Notes, to the extent permitted by applicable law or contractual restrictions, upon their request, the information required to be delivered pursuant to Rule 144A(d)(4) under the Securities Act; provided that the foregoing obligation will only apply to the Issuer if it ceases to be subject to and in compliance with the reporting requirements of Section 13 or 15(d) of the Exchange Act or exempt from reporting pursuant to Rule 12g3-2(b) under the Exchange Act.

Additionally, the Issuer shall provide the Trustee and the Holders, within 120 days of the end of each fiscal year and within 60 days of the end of each of the first three fiscal quarters, annual or quarterly financial statements, as applicable, in accordance with applicable GAAP and audited in the case of annual financial statements.

Notwithstanding the foregoing, if the Issuer makes available the information described above on the Issuer's or an Affiliate's website or on the Electronic Data Gathering, Analysis, and Retrieval (EDGAR) website of the SEC, the Issuer will be deemed to have satisfied the reporting requirement set forth in such applicable clause. It is understood that the Trustee shall have no responsibility to determine whether any information has been posted on such websites.

Delivery of such reports, information and documents to the Trustee is for informational purposes only and the Trustee's receipt of such reports shall not constitute constructive notice of any information contained therein or determinable from information contained therein, including the Issuer's compliance with any of its covenants hereunder (as to which the Trustee is entitled to rely exclusively on an Officer's Certificate or notice). The Trustee shall have no obligation to determine if and when the Issuer's statements or reports are publicly available and accessible electronically.

Section 11.8. Statement by Officers as to Default.

(a) The Issuer will be required to furnish to the Trustee together with the delivery (or the posting on the Issuer's or an Affiliate's website) of its annual financial statements and in any event within 120 days after the end of each such fiscal period, an Officer's Certificate stating whether or not to the best knowledge of the signer thereof none of the Issuer or any Guarantor is in default in the performance and observance of any of the terms, provisions and conditions of this Indenture and if the Issuer or any Guarantor is in default, specifying all such defaults and the nature and status thereof of which they may have knowledge.

(b) The Issuer shall deliver to the Trustee, as soon as is practicable and in any event within ten calendar days after the Issuer becomes aware of the occurrence of a Default or an Event of Default, an Officer's Certificate of the Issuer, setting forth the details of such Default or Event of Default and stating what action the Issuer, proposes to take with respect thereto. None of the Agents shall have notice of any Default or Event of Default unless a Responsible Officer of such Agent has actual knowledge thereof.

Section 11.9. Payment of Additional Amounts.

Any and all payments to a Holder of principal (and premium, if any) and interest in respect of the Notes, and any and all payments to indemnify a Holder for taxes or duties as a result of a substitution of the issuer, as provided in Section 13.1(a)(2), will be made free and clear of, and without withholding or deduction for, any and all present and future withholding taxes, duties, assessments, levies, imposts or charges ("Taxes") whatsoever imposed by or on behalf of, Luxembourg, Brazil, Peru or any political subdivision or taxing authority thereof or therein, unless such withholding or deduction is required by law. In that event, the Issuer or a Guarantor, as the case may be, shall pay such additional amounts (the "Additional Amounts") as will result in the receipt by the Holders of such amounts as would have been received by them if no such withholding or deduction had been required, except that no such Additional Amounts shall be payable in respect of any Note:

(1) held by, or by a third party on behalf of, a Holder or beneficial owner which is liable for such taxes, duties, assessments, levies, imposts or governmental charges in respect of such Note by reason of its (or a fiduciary, settlor, member or shareholder, beneficiary of, or possessor of a power over, such Holder, if such Holder is an estate, trust, partnership or corporation) having some present or former connection with Luxembourg, Brazil or Peru (including being or having been a citizen or resident of Luxembourg, Brazil or Peru or being or having been engaged in trade or business therein) other than the mere holding of such Note; or

(2) where (in the case of a payment of principal, premium, if any, or interest on the Maturity Date or date of earlier redemption) the relevant Note is surrendered for payment more than 30 days after the Relevant Date except to the extent that the relevant Holder would have been entitled to such Additional Amounts if it had surrendered the relevant Note on the last day of such period of 30 days; or

(3) if such Tax is an estate, inheritance, gift, sales, transfer or personal property tax or any similar Tax, assessment, levy, impost or governmental charge; or

(4) if such amount is (a) payable other than by withholding or deduction from a payment on such Note, or (b) required to be withheld or deducted by a Paying Agent and such Holder of a Note would have been able to avoid such withholding or deduction by presenting the relevant Note to another Paying Agent; or

(5) if such Tax, duty, assessment, levy, impost or governmental charge would not have been imposed but for the failure of such Holder to comply with applicable certification, information, documentation or other reporting requirements concerning the nationality, residence, identity or connection with Luxembourg, Brazil or Peru of the Holder or beneficial owner of such Note if (i) such compliance is required as a precondition to relief or exemption from withholding or deduction of all or part of such tax, duty, assessment, levy, impost or governmental charge and (ii) at least 30 days prior to the date on which the Issuer or a Guarantor, as the case may be, applies this clause (5), it will have notified such Holder or beneficial owner of a Note that it will be required to comply with such requirement; or

(6) if such amount to be paid with respect to a payment on a note to a Holder that is a fiduciary or partnership or other than the sole beneficial owner of such payment to the extent a beneficiary or settlor with respect to such fiduciary or a member of such partnership or a beneficial owner would not have been entitled to the additional interest had such beneficiary, settlor, member or beneficial owner been the Holder of such note; or

(7) in the case of any combination of items (1) through (6).

"Relevant Date" means whichever is the later of (a) the date on which the payment in question first becomes due and (b) if the full amount payable has not been received by the Principal Paying Agent on or prior to such due date, the date on which (the full amount having been so received) notice to that effect has been given to the Holders.

None of the Issuer, a Guarantor, the Trustee, any Paying Agent or any other person shall be required to pay any Additional Amounts with respect to any withholding or deduction imposed on or in respect of any Note pursuant to FATCA, any treaty, law, regulation or other official guidance enacted by any jurisdiction implementing FATCA, or any agreement between the Issuer and the United States or any authority thereof implementing FATCA.

The Issuer or the relevant Guarantor, as applicable, shall pay any present or future stamp, court or documentary taxes, or any other excise or property taxes, charges or similar levies which arise in any jurisdiction from the execution, delivery or registration of the Notes or any other document or instrument referred to therein, excluding any such taxes, charges or similar levies imposed by any jurisdiction outside of Luxembourg, Brazil or Peru, as applicable, except those resulting from, or required to be paid in connection with, (i) the execution in or bringing to Luxembourg, Brazil or Peru, as applicable, of the Notes or any document or instrument; (ii) the production before a court of Luxembourg, Brazil or Peru of the Notes or any document or instrument or (iii) the enforcement of the Notes or any other such document or instrument following the occurrence of any Event of Default with respect to the Notes.

References to principal or interest shall be deemed to include any Additional Amounts in respect of principal, premium, if any, or interest (as the case may be) which may be payable under the Notes.

If the Issuer or a Guarantor becomes subject at any time to any taxing jurisdiction other than Luxembourg, Brazil or Peru, references herein to Luxembourg, Brazil or Peru, as applicable, shall be construed to include such other jurisdiction.

The Trustee shall have no obligation to determine whether any Additional Amounts are owed or for the calculation thereof.

Section 11.10. Limitation on Liens.

The Issuer shall not, and shall not permit any of its Designated Subsidiaries to, Incur or suffer to exist any Lien on any of its Restricted Property to secure any Indebtedness of the Issuer or such Designated Subsidiary without making, or causing such Designated Subsidiary to make, effective provision for securing the Notes (x) equally and ratably with (or prior to) such Indebtedness as to such Restricted Property for so long as such Indebtedness will be so secured or (y) in the event such Indebtedness is Indebtedness of the Issuer or such Designated Subsidiary which is subordinate in right of payment to the Notes, prior to such Indebtedness as to any such Restricted Property for so long as such Indebtedness will be so secured.

The foregoing restrictions shall not apply to:

(1) any Lien on the inventory or receivables and related assets (other than those described in clause (3) below) securing obligations:

- (i) under any short term lines of credit, entered into in the normal course of business; or
- (ii) under any working capital facility;

(2) Liens created solely for the purpose of securing the payment of all or a part of the purchase price (or the cost of construction or improvement, and any related transaction fee and expenses) of assets or property (including Capital Stock of any Person) acquired, constructed or improved after the Issue Date; provided that (a) the aggregate principal amount of Indebtedness secured by such Liens shall not exceed the purchase price of the assets or property so acquired, constructed or improved, (b) such Liens shall not encumber any assets or property other than the assets or property so acquired, constructed or improved and other than any unimproved real property on which the property so constructed, or the improvement, is located and (c) such Lien shall attach to such assets or property within 365 days of the construction, acquisition or improvement of such assets or property; provided, further, that to the extent that the property or asset acquired is Capital Stock, and subject to the limitations in clause (c) above, the Lien also may encumber other property or assets of the Person so acquired, provided, further, that any Lien is permitted to be incurred on the Capital Stock of any Person securing any Indebtedness of that Person that is (a) non-recourse to the Issuer or the Designated Subsidiary, and (b) incurred solely for purposes of financing the acquisition, construction or improvement of any property or assets of such Person;

(3) Liens on accounts receivable and related assets in connection with any credit facility, including export or import financings and other trade transactions, or in connection with any Securitization Transaction provided that the aggregate amount of any Receivables sold or transferred in such Securitization Transaction securing Indebtedness shall not exceed (a) with respect to transactions related to revenues from exports, 80% of such Person's consolidated net sales from exports; or (b) with respect to transactions related to revenues from domestic sales, 80% of such Person's consolidated net sales in the jurisdiction in which such Person is located;

(4) Liens granted to secure borrowings from (i) *Banco Nacional de Desenvolvimento Econômico e Social-BNDES*, or any other federal, regional or state governmental development bank or credit agency, or (ii) any international or multilateral development bank, government-sponsored agency, export-import bank or official export-import credit insurer;

(5) Liens existing on the Issue Date;

(6) Liens on property or shares of Capital Stock of another Person at the time such other Person becomes a Subsidiary; provided, however, that the Liens may not extend to any other property owned by such Person;

(7) Liens on property at the time such Person or any of its Subsidiaries acquires the property, including any acquisition by means of a merger or consolidation with or into such Person or a Subsidiary of such Person; provided, however, that the Liens may not extend to any other property owned by such Person;

(8) Liens securing Indebtedness or other obligations of a Subsidiary of such Person owing to such Person or a Subsidiary of such Person;

(9) Liens in favor of surety bonds or letters of credit issued pursuant to the request of, and for the account of, such Person in the ordinary course of its business;

(10) any Lien securing obligations owed to the Peruvian Ministry of Energy and Mines or other governmental authorities incurred in the ordinary course of business, including but not limited to, mine closure plans;

(11) Liens securing obligations under hedging agreements not for speculative purposes;

(12) any Lien extending, renewing or replacing (or successive extensions, renewals or replacements of), in whole or in part, any Lien referred to in clauses (2), (4), (5), (6) or (7) above; provided that the principal amount of Indebtedness secured thereby shall not exceed the principal amount of Indebtedness so secured at the time of such extension, renewal or replacement except for any increase reflecting premiums, fees and expenses in connection with such extension, renewal or replacement, and that such extension, renewal or replacement shall be limited to all or a part of the property which secured the Lien so extended, renewed or replaced (plus improvements on such property); and

(13) Lien that do not fall within clauses (1) through (12) above and that secure Indebtedness which, exclusive of Indebtedness secured by other Liens permitted under this covenant, does not exceed an aggregate principal amount equal to 15% of Consolidated Total Assets.

For the avoidance of doubt, a Lien permitted by this Section 11.10 need not be permitted solely by reference to a single clause permitting such Lien, but may be permitted in part by such clause and in part by one or more other clauses of this covenant otherwise permitting such Lien.

Section 11.11. [Intentionally Omitted].

Section 11.12. Performance Obligations Under Other Documents.

The Issuer shall duly and punctually perform, comply with and observe all obligations and agreements to be performed by it set forth in the Transaction Documents.

Section 11.13. Compliance with Laws.

Each of the Issuer and the Guarantors shall comply, and shall cause their respective Subsidiaries to comply, at all times with all applicable laws, rules, regulations, orders and directives of any government or government agency or authority having jurisdiction over the Issuer or any Guarantors, any of their respective Subsidiaries or the business of any of them or any of the transactions contemplated herein, except where the failure to do so would not have a material adverse effect on the Issuer and its Subsidiaries taken as a whole or have a material adverse effect on the rights of the Holders.

Section 11.14. Maintenance of Government Approvals.

Each of the Issuer and the Guarantors shall, and shall cause their respective Subsidiaries to, duly obtain and maintain in full force and effect all governmental approvals, consents or licenses of any government or governmental agency or authority under the laws of Luxembourg, Brazil, Peru (including any Central Bank) or any other government or government agency having jurisdiction over the Issuer or necessary in all cases for the Guarantors and the Issuer to perform their respective obligations under the Transaction Documents or for the validity or enforceability thereof, except where the failure to do so would not have a material adverse effect on the Issuer and its Subsidiaries taken as a whole or have a material adverse effect on the rights of the Holders.

Section 11.15. [Intentionally Omitted].

Section 11.16. Maintenance of Books and Records.

Each of the Issuer and the Guarantors shall, and shall cause each of their respective Subsidiaries to, maintain books, accounts and records in all material respects in accordance with applicable GAAP, and in any case in the manner necessary to facilitate consolidation into the Guarantors' consolidated financial statements.

Section 11.17. Ranking.

The Issuer shall ensure that the Notes will constitute unsecured and unsubordinated obligations of the Issuer, and will rank at least equally to all other present and future unsecured and unsubordinated obligations of the Issuer (other than obligations preferred by statute or by operation of law). Each of the Guarantors shall ensure that its Guarantee will constitute unsecured and unsubordinated obligations of such Guarantor, and will rank at least equally to all other present and future unsecured and unsubordinated obligations of the Guarantors (other than obligations preferred by statute or by operation of law). No obligation will be considered to be senior to the Notes or the Guarantees by virtue of being secured on a first or junior priority basis.

ARTICLE XII

LEGAL DEFEASANCE AND COVENANT DEFEASANCE

Section 12.1. Option to Effect Defeasance or Covenant Defeasance.

The Issuer or a Guarantor may at its option, at any time elect to have either Section 12.2 or Section 12.3 applied to the Outstanding Notes upon compliance with the conditions set forth below in this Article XII.

Section 12.2. Defeasance and Discharge.

Upon the Issuer's or a Guarantor's exercise of the option provided in Section 12.1 applicable to this Section, the Issuer and a Guarantor shall be deemed to have been discharged from their obligations with respect to the Outstanding Notes on the date the conditions set forth below are satisfied (hereinafter, "defeasance"). For this purpose, such defeasance means that the Issuer and a Guarantor shall be deemed to have paid and discharged the entire indebtedness represented by the Outstanding Notes and to have satisfied all their other obligations under such Notes and this Indenture insofar as such Notes are concerned (and the Trustee, at the expense of the Issuer and a Guarantor, shall execute proper instruments acknowledging the same), except for the following which shall survive until otherwise terminated or discharged hereunder: (A) the rights of Holders of Outstanding Notes to receive, solely from the trust fund described in Section 12.4 and as more fully set forth in such Section, payments in respect of the principal of (and premium, if any) and interest (and Additional Amounts, if any) on such Notes when such payments are due, (B) the Issuer's and the Guarantors' obligations with respect to such Notes under Sections 3.3, 3.4, 3.5, 11.2 and 11.3, (C) the rights, powers, trusts, duties and immunities of the Trustee hereunder and (D) this Article XII. Subject to compliance with this Article XII, the Issuer and the Guarantors may exercise their option under this Section 12.2 notwithstanding the prior exercise of their option under Section 12.3.

Section 12.3. Covenant Defeasance.

Upon the Issuer or a Guarantor's exercise of the option provided in Section 12.1 applicable to this Section, (i) the Issuer and the Guarantors shall be released from their obligations under Sections 9.1 and 11.15 through 11.17, inclusive and the Guarantors shall be released from all of its obligations under the Guarantees and under Article XIII of this Indenture, and (ii) the occurrence of an event specified in Section 6.1(3) (with respect to Section 9.1 and Sections 11.15 through 11.17, inclusive) shall not be deemed to be or result in an Event of Default, on and after the date the conditions set forth below are satisfied (hereinafter, "covenant defeasance"). For this purpose, such covenant defeasance means that the Issuer and the Guarantors may omit to comply with and shall have no liability in respect of any term, condition or limitation set forth in any such Section or Article, whether directly or indirectly by reason of any reference elsewhere herein to any such Section or Article or by reason of any reference in any such Section or Article to any other provision herein or in any other document, but the remainder of this Indenture and such Notes shall be unaffected thereby.

Section 12.4. Conditions to Defeasance or Covenant Defeasance.

The following shall be the conditions to application of either Section 12.2 or Section 12.3 to the Outstanding Notes:

(1) the Issuer or a Guarantor shall irrevocably have deposited or caused to be deposited with the Trustee or its designee, in trust, for the benefit of the Holders (A) cash, (B) Cash Equivalents, (C) U.S. Government Obligations, or (D) a combination thereof, sufficient, in the written opinion of an internationally recognized firm of independent certified public accountants, investment bank or consulting firm to pay and discharge, the principal of, premium, if any, and each installment of interest (including Additional Amounts, if any) on the Notes on the Stated Maturity of such principal or installment of interest on the day on which such payments are due and payable in accordance with the terms of this Indenture and of such Notes. For this purpose, "U.S. Government Obligations" means securities that are (x) direct obligations of the United States for the payment of which its full faith and credit is pledged or (y) obligations of a Person controlled or supervised by and acting as an agency or instrumentality of the United States the payment of which is unconditionally guaranteed as a full faith and credit obligation by the United States, which, in either case, are not callable or redeemable at the option of the issuer thereof, and shall also include a depositary receipt issued by a bank (as defined in Section 3(a)(2) of the Securities Act) as custodian with respect to any such U.S. Government Obligation or a specific payment of principal of or interest on any such U.S. Government Obligation held by such custodian for the account of the Holder of such depositary receipt, provided that (except as required by law) such custodian is not authorized to make any deduction from the amount payable to the Holder of such depositary receipt from any amount received by the custodian in respect of the U.S. Government Obligation or the specific payment of principal of or interest on the U.S. Government Obligation evidenced by such depositary receipt;

(2) no Default or Event of Default shall have occurred and be continuing on the date of such deposit;

(3) the Issuer or a Guarantor shall have delivered to the Trustee an Officer's Certificate and an Opinion of Counsel, each stating that all conditions precedent provided for relating to either the defeasance under Section 12.2 or the covenant defeasance under Section 12.3 (as the case may be) have been complied with;

(4) in the case of an election under Section 12.2, the Issuer or a Guarantor shall have delivered to the Trustee an Opinion of Counsel in the United States stating that (x) the Issuer or a Guarantor has received from, or there has been published by, the Internal Revenue Service a ruling, or (y) since the date of this Indenture there has been a change in the applicable United States Federal income tax law, in either case to the effect that, and based thereon such Opinion of Counsel shall confirm that, the Holders of the Outstanding Notes will not recognize income, gain or loss for United States Federal income tax purposes as a result of such deposit, defeasance and discharge and will be subject to United States Federal income tax on the same amounts, in the same manner and at the same times as would have been the case if such deposit, defeasance and discharge had not occurred;

(5) in the case of an election under Section 12.3, the Issuer or a Guarantor shall have delivered to the Trustee an Opinion of Counsel in the United States to the effect that the Holders of the Outstanding Notes will not recognize income, gain or loss for United States Federal income tax purposes as a result of such deposit and covenant defeasance and will be subject to United States Federal income tax on the same amounts, in the same manner and at the same times as would have been the case if such covenant defeasance had not occurred.

Section 12.5. Deposited Money and U.S. Government Obligations to Be Held in Trust; Other Miscellaneous Provisions.

Subject to the provisions of the last paragraph of Section 11.3, all money and U.S. Government Obligations (including the proceeds thereof) deposited with the Trustee (or other qualifying trustee—collectively, for purposes of this Section 12.5, the “Defeasance Trustee”) pursuant to Section 12.4 in respect of the Notes shall be held in trust and applied by the Defeasance Trustee, in accordance with the provisions of such Notes and this Indenture, to the payment, either directly or through any Paying Agent (including the Issuer or a Guarantor acting as their own Paying Agent) as the Defeasance Trustee may determine, to the Holders of such Notes, of all sums due and to become due thereon in respect of principal (and premium, if any) and interest, but such money need not be segregated from other funds except to the extent required by law.

The Issuer and the Guarantors shall, jointly and severally, pay and indemnify the Defeasance Trustee against any tax, fee or other charge imposed on or assessed against the U.S. Government Obligations deposited pursuant to Section 12.4 or the principal and interest received in respect thereof other than any such tax, fee or other charge which by law is for the account of the Holders of the Outstanding Notes.

Anything in this Article to the contrary notwithstanding, the Defeasance Trustee shall deliver or pay to the Issuer from time to time upon Issuer Request any money or U.S. Government Obligations held by it as provided in Section 12.4 which, in the opinion of an internationally recognized accounting firm expressed in a written certification thereof delivered to the Defeasance Trustee, are in excess of the amount thereof which would then be required to be deposited to effect an equivalent defeasance or covenant defeasance.

Section 12.6. Reinstatement.

If the Defeasance Trustee or the Paying Agent is unable to apply any money in accordance with Section 12.2 or 12.3 by reason of any order or judgment of any court or governmental authority enjoining, restraining or otherwise prohibiting such application, then the obligations of the Issuer and the Guarantors under this Indenture, the Guarantees and the Notes, if any, shall be revived and reinstated as though no deposit had occurred pursuant to this Article until such time as the Defeasance Trustee or Paying Agent is permitted to apply all such money in accordance with Section 12.2 or 12.3; provided, however, that if the Issuer or the Guarantors makes any payment of principal of (and premium, if any) any Note following the reinstatement of such obligations, the Issuer or the Guarantors shall be subrogated to the rights of the Holders of such Notes to receive such payment from the money held by the Defeasance Trustee or the Paying Agent.

Section 12.7. Repayment to Issuer or the Guarantors.

Any money deposited with the Defeasance Trustee or any Paying Agent, or then held by the Issuer or a Guarantor, in trust for the payment of the principal of, premium, if any, or interest on any Note and remaining unclaimed for two years after such principal, and premium, if any, or interest has become due and payable shall be paid to the Issuer or the Guarantors on its written request or (if then held by the Issuer or the Guarantors) shall be discharged from such trust; and the Holder of such security shall thereafter, as a creditor, look only to the Issuer or the Guarantors for payment thereof, and all liability of the Defeasance Trustee or such Paying Agent with respect to such trust money, and all liability of the Issuer or the Guarantor as trustee thereof, shall thereupon cease; provided, however, that the Defeasance Trustee or such Paying Agent, before being required to make any such repayment, shall at the expense of the Issuer and the Guarantors cause to be published once, in *The New York Times* and *The Wall Street Journal* (national edition), notice that such money remains unclaimed and that, after a date specified therein, which shall not be less than 30 days from the date of such notification or publication, any unclaimed balance of such money then remaining will be repaid to the Issuer or the Guarantors.

ARTICLE XIII

SUBSTITUTION OF THE ISSUER

Section 13.1. Substitution of the Issuer.

Notwithstanding any other provision contained in this Indenture,

(a) the Issuer may, without the consent of the Holders of the Notes (and by subscribing for any Notes, each Holder of the Notes expressly consents to it), be replaced and substituted by (i) any Wholly Owned Subsidiary of the Issuer or (ii) any Permitted Holding Company as principal debtor (in such capacity, the “Substituted Issuer”) in respect of the Notes provided that:

(1) such documents (together, the “Issuer Substitution Documents”) shall be executed by the Substituted Issuer, the Issuer and the Trustee as may be necessary to give full effect to the substitution, including a supplemental indenture whereby (i) the Substituted Issuer assumes all Issuer’s obligations under this Indenture and the Notes and (ii) the Issuer (the “Additional Guarantor”) guarantees on an unsecured and unsubordinated basis the due and punctual payment of all amounts under this Indenture and with respect to the Notes (without limiting the generality of the foregoing) pursuant to which the Substituted Issuer shall undertake in favor of each Holder of the Notes to be bound by the terms and conditions of the Notes and the provisions of this Indenture as fully as if the Substituted Issuer had been named in the Notes and this Indenture as the principal debtor in respect of the Notes in place of the Issuer (or any previous substitute) and pursuant to which the Additional Guarantor will guarantee on an unsecured and unsubordinated basis the due and punctual payment of all amounts under this Indenture and with respect to the Notes (together, the “Substitution”);

(2) if the Substituted Issuer is incorporated, domiciled or resident in a territory other than Luxembourg, the Issuer Substitution Documents shall contain a covenant by the Substituted Issuer and/or such other provisions as may be necessary to ensure that each Holder of the Notes has the benefit of a covenant in terms corresponding to the obligations of the Issuer in respect of the payment of Additional Amounts set forth in Section 11.9 and tax repurchases in Section 4.1, with the substitution for the references to Luxembourg for references to the territory in which the Substituted Issuer is incorporated, domiciled and/or resident for taxation purposes;

(3) the Issuer Substitution Documents shall contain a covenant by the Additional Guarantor and/or such other provisions as may be necessary to ensure that each holder of the Notes has the benefit of a covenant in terms corresponding to the obligations of the Additional Guarantor as a guarantor of the Notes in respect of the payment of Additional Amounts set forth in Section 11.9 (but with references to Luxembourg as the jurisdiction of incorporation of the Additional Guarantor);

(4) if the Substituted Issuer is incorporated, domiciled or resident in a territory other than Luxembourg, the Issuer Substitution Documents shall also contain a covenant by the Substituted Issuer to indemnify and hold harmless each Holder and beneficial owner of the Notes, the Trustee, the Agents and each other against the actual amount of all taxes or duties required to be paid (including any taxes or duties imposed on the receipt of such indemnity payments) which arise by reason of a law or regulation in effect or contemplated on the effective date of the Substitution, which may be incurred or levied against such Holder or beneficial owner of the Notes as a result of the substitution and which would not have been so incurred or levied had the Substitution not been made, subject to similar exceptions set forth under Section 11.9(2) through (8), inclusive, *mutatis mutandis*; provided, that any holder making a claim with respect to such tax indemnity shall provide the Issuer with notice of such claim, along with supporting documentation, within four weeks of the announcement of the Substitution of the Substituted Issuer as issuer; provided further, that none of the Issuer (including the Substituted Issuer), the Guarantors (including the Additional Guarantor), any paying agent or any other person shall be required to indemnify any holder or beneficial owner of the notes for any taxes imposed pursuant to FATCA, any treaty, law, regulation or other official guidance enacted by any jurisdiction implementing FATCA, or any agreement between the Issuer and the United States or any authority thereof implementing FATCA;

(5) the Substituted Issuer shall have delivered, or procured the delivery to the Trustee of, an Opinion of Counsel addressed to the Substituted Issuer from a leading firm of lawyers in the country of incorporation of the Substituted Issuer, to the effect that the Issuer Substitution Documents constitute legal, valid and binding obligations of the Substituted Issuer and the Additional Guarantor;

(6) the Issuer shall have delivered, or procured the delivery to the Trustee of, an Opinion of Counsel addressed to the Issuer and the Substituted Issuer from a leading firm of New York lawyers to the effect that the Issuer Substitution Documents constitute legal, valid and binding obligations of the Substituted Issuer and the Additional Guarantor under New York law;

(7) the Issuer and the Substituted Issuer shall have appointed a process agent in the Borough of Manhattan, the City of New York to receive service of process on its behalf in relation to any legal action or proceedings arising out of or in connection with the Issuer Substitution Documents;

(8) there is no continuing Event of Default in respect of the Notes.

(b) Upon effectiveness of the substitution, the Substituted Issuer and the Issuer shall deliver to the Trustee an Officer's Certificate, executed by an authorized officer, certifying that the terms of this section have been complied with and attaching copies of all documents contemplated herein.

(c) Upon the execution of the Issuer Substitution Documents as referred to in paragraph (a)(1) above and compliance with the other conditions in paragraph (a), (1) the Substituted Issuer shall be deemed to be named in the Notes as the principal debtor in place of the Issuer (or of any previous substitute under these provisions), (2) the Additional Guarantor shall be deemed to be named as a guarantor of the Notes and (3) the Notes shall thereupon be deemed to be amended to give effect to the transactions referred to in (1) and (2). Except as set forth above, the execution of the Issuer Substitution Documents shall operate to release the Issuer (or such previous substitute as aforesaid) from all its obligations as issuer of the Notes.

(d) Not later than 10 Business Days after the execution of the Issuer Substitution Documents, the Substituted Issuer shall give notice thereof to the Holders of the Notes in accordance with the provisions described under Section 1.6.

ARTICLE XIV

GUARANTEES

Section 14.1. Guarantees.

Nexa CJM, Nexa Peru and Nexa Brazil hereby, jointly, severally, fully, absolutely and unconditionally guarantee on an unsecured basis to each Holder of a Note authenticated and delivered by the Trustee, and to the Trustee on behalf of such Holder, and for itself and the Paying Agents, the due and punctual payment of the principal of (and premium, if any) and interest (including any Additional Amounts) on such Note and all other obligations of the Issuer under this Indenture, when and as the same shall become due and payable, whether at the Stated Maturity or by acceleration, redemption, purchase or otherwise, in accordance with the terms of such Note and of this Indenture. In case of the failure of the Issuer punctually to make any such payment, each of the Guarantors hereby agrees to cause such payment to be made punctually when and as the same shall become due and payable, whether at the Stated Maturity or by acceleration, call for redemption, purchase or otherwise, and as if such payment were made by the Issuer.

The Guarantees constitute unconditional and unsubordinated obligations of each of the Guarantors that will at all times rank at least equally with all other present and future unsecured senior obligations of each such Guarantor, except for any obligations that may be preferred by provisions of law that are both mandatory and of general application.

Each of the Guarantors hereby agrees that its obligations hereunder shall be unconditional, irrespective of the validity, regularity or enforceability of any Note or this Indenture, the absence of any action to enforce the same, any release or amendment or waiver of any term of any other guarantee of, or any consent to depart from any requirement of any other guarantee, of all or any of the Notes, any waiver or consent by the Holder of any Note or by the Trustee with respect to any provisions thereof or of this Indenture, the obtaining of any judgment against the Issuer or any action to enforce the same or any other circumstances which might otherwise constitute a legal or equitable discharge or defense of a guarantor. Each of the Guarantors hereby waives notice of the acceptance of its Guarantee and of any of the obligations under this Indenture or the Notes (the "Obligations") or of the accrual thereof, and further waives presentment, protest, notice or demand. This is a continuing guarantee and is a guarantee of payment and not of collection, and each of the Guarantors waives any right to require the Holders to initiate collection proceeds or otherwise enforce payment of the Obligations or any security or other guarantee therefore before obtaining payment hereunder.

The Guarantees shall continue to be in effect or be reinstated, as the case may be, if at any time (i) any payment in respect of any of the Obligations is rescinded or must otherwise be returned by the Holders, whether by reason of the insolvency, bankruptcy, receivership, reorganization or liquidation of the Issuer or any Guarantor or any other obligor or otherwise, all as though such payment had not been made or (ii) a Substituted Issuer, as defined in Section 13.1, assumes the Issuer's obligations under the Notes pursuant to Article XIII hereof.

Each of the Guarantors hereby waives the benefits of diligence, presentment, demand of payment, any requirement that the Trustee or any of the Holders protect, secure, perfect or insure any security interest in or other Lien on any property subject thereto or exhaust any right or take any action against the Issuer or any other Person or any collateral, filing of claims with a court in the event of insolvency or bankruptcy of the Issuer, any right to require a proceeding first against the Issuer, protest or notice with respect to any Note or the indebtedness evidenced thereby and all demands whatsoever, and covenants, that these Guarantees will be discharged in respect of any Note except by complete performance of the obligations contained in such Note and in the Guarantees. Each of the Guarantors hereby agrees that, in the event of a default in payment of principal (or premium, if any) or interest on any Note, whether at its Stated Maturity or by acceleration, redemption, purchase or otherwise, legal proceedings may be instituted by the Trustee on behalf of, or by, the Holder of such Note, subject to the terms and conditions set forth in this indenture, directly against any or all of the Guarantors to enforce the Guarantees without first proceeding against the Issuer. Each of the Guarantors agrees that if, after the occurrence and during the continuance of an Event of Default, the Trustee or any of the Holders are prevented by applicable law from exercising their respective rights to accelerate the maturity of the Notes, to collect interest on the Notes or to enforce or exercise any other right or remedy with respect to the Notes, or the Trustee or the Holders are prevented from taking any action to realize on any collateral, each of the Guarantors agrees to pay to the Trustee for the account of the Holders, upon demand therefore, the amount that would otherwise have been due and payable had such rights and remedies been permitted to be exercised by the Trustee or any of the Holders.

No provision of the Guarantees, Notes or of this Indenture shall alter or impair the Guarantees of the Guarantors, of which the Guarantees are absolute and unconditional, of the due and punctual payment of the principal (and premium, if any) and interest (and Additional Amounts, if any) on the Note and the obligation under this Indenture upon which each Guarantee is endorsed.

Each of the Guarantors shall be subrogated to all rights of the Holders of the Notes upon which its Guarantee is endorsed against the Issuer in respect of any amounts paid by each of the Guarantors on account of such Note pursuant to the provisions of the Guarantees or this Indenture; provided, however, that none of the Guarantors shall be entitled to enforce or to receive any payments arising out of, or based upon, such right of subrogation until the principal of (and premium, if any) and interest (and Additional Amounts, if any) on all Notes issued hereunder shall have been paid in full.

The Guarantees shall remain in full force and effect and continue to be effective should any petition be filed by or against the Issuer for liquidation or reorganization, should the Issuer become insolvent or make an assignment for the benefit of creditors or should a receiver or trustee be appointed for all or any significant part of the Issuer's assets, and shall, to the fullest extent permitted by law, continue to be effective or be reinstated, as the case may be, if at any time payment and performance of the obligations under the Notes is, pursuant to applicable law, rescinded or reduced in amount, or must otherwise be restored or returned by any obligee on the Notes, whether as a "voidable preference," "fraudulent transfer" or otherwise, all as though such payment or performance had not been made. In the event that any payment, or any part thereof, is rescinded, reduced, restored or returned, the Notes shall, to the fullest extent permitted by law, be reinstated and deemed reduced only by such amount paid and not so rescinded, reduced, restored or returned.

Each of the Guarantors hereby irrevocably waives all benefits set forth in the following provisions of the Brazilian law: articles 333, sole paragraph, 366, 368, 827, 829, sole paragraph, 830, 834, 835, 837 and 838 of the Brazilian Civil Code and articles 130 and 794 of the Brazilian Civil Procedure Code.

No stockholder, officer, director, employer or incorporator, past, present or future, of any Guarantor, as such, shall have any personal liability under the Guarantee by reason of his, her or its status as such stockholder, officer, director, employer or incorporator.

Section 14.2. Delivery of the Guarantee.

The delivery of any Note by the Trustee, after the authentication thereof hereunder, shall constitute due delivery of the Guarantees set forth herein on behalf of the Guarantors.

Section 14.3. Release of Guarantor.

(a) Concurrently with any consolidation or merger of any of the Guarantors or any sale or conveyance of the property of any of the Guarantors as an entirety or substantially as an entirety, in each case as permitted by Section 9.1(a) hereof, and upon delivery by such Guarantor to the Trustee of an Officer's Certificate and an Opinion of Counsel to the effect that such consolidation, merger, sale or conveyance was made in accordance with Section 9.1(a) hereof, the Trustee shall execute any documents reasonably required in order to evidence the release of such Guarantor from its obligations under its Guarantee endorsed on the Notes and under this Article XIV.

(b) Concurrently with the defeasance of the Notes under Section 12.2 hereof or the covenant defeasance of the Notes under Section 12.3 hereof, each of the Guarantors shall be released from all of its obligations under its Guarantee endorsed on the Notes and under this Article XIV.

ARTICLE XV

MEETINGS OF HOLDERS OF SECURITIES

Section 15.1. Purposes for Which Meetings May Be Called.

A meeting of Holders of Notes may be called at any time and from time to time pursuant to this Article to consider any matter affecting their interests, including, if proposed by the Issuer, the modification of the terms and conditions of the Notes; provided that any modification postponing the date for payment of any interest, reducing or canceling any amount of principal or the rate of interest payable or altering the currency of payment in respect of the Notes will only be binding if passed at a meeting of Holders at which a special quorum (as set forth in Section 15.4) is present.

Section 15.2. Call, Notice and Place of Meetings.

(1) The Trustee may at any time call a meeting of Holders of Notes of any series for any purpose specified in Section 15.1, to be held at such time and at such place in the Borough of Manhattan, The City of New York as the Trustee shall determine. Notice of every meeting of Holders of Notes, setting forth the time and the place of such meeting and in general terms the action proposed to be taken at such meeting, shall be given, in the manner provided in Section 1.6, not less than 21 nor more than 180 days prior to the date fixed for the meeting.

(2) In case at any time the Issuer, pursuant to a Board Resolution, or the Holders of at least 10% in principal amount of the Outstanding Notes shall have requested the Trustee to call a meeting of the Holders of Notes for any purpose specified in Section 15.1, by written request setting forth in reasonable detail the action proposed to be taken at the meeting, and the Trustee shall not have made the first publication of the notice of such meeting within 21 days after receipt of such request or shall not thereafter proceed to cause the meeting to be held as provided herein, then the Issuer or the Holders of Notes in the amount specified above, as the case may be, may determine the time and the place in the Borough of Manhattan, The City of New York for such meeting and may call such meeting for such purposes by giving notice thereof as provided in subsection (1) of this Section.

Section 15.3. Persons Entitled to Vote at Meetings.

To be entitled to vote at any meeting of Holders of Notes, a Person shall be (i) a Holder on a record date established pursuant to Section 15.5 of one or more Outstanding Notes, or (ii) a Person appointed by an instrument in writing as proxy for a Holder or Holders of one or more Outstanding Notes by such Holder or Holders. The only Persons who shall be permitted to be present or to speak at any meeting of Holders of Notes of any series shall be the Persons entitled to vote at such meeting and their counsel, any representatives of the Trustee and its counsel and any representatives of the Issuer and its counsel.

Section 15.4. Quorum; Action.

The Persons entitled to vote a majority in principal amount of the Outstanding Notes shall constitute a “quorum” for a meeting of Holders of Notes, however, any modification postponing the date for payment of any interest, reducing or canceling any amount of principal or the rate of interest payable or altering the currency of payment in respect of the Notes will only be binding if passed at a meeting of Holders of at least 66 2/3% of the Notes (a “special quorum”). In the absence of a quorum or a special quorum, as the case may be, within 15 minutes (or such longer period not exceeding 30 minutes as the chairman may decide) of the time appointed for any such meeting, the meeting shall if convened upon the requisition of Holders be dissolved. In any other case it shall stand adjourned to the same day in the next week (or if such day is not a Business Day the next succeeding Business Day) at the same time and place. If within 15 minutes (or such longer period not exceeding 30 minutes as the chairman may decide) after the time appointed for any adjourned meeting a quorum or a special quorum, as the case may be, is not present for the transaction of any particular business, then, subject and without prejudice to the transaction of the business (if any) for which a quorum or a special quorum, as the case may be, is present, the chairman may either (with the approval of the Trustee) dissolve such meeting or adjourn the same for such period, being not less than ten calendar days (but without any maximum number of calendar days), and to such place as may be appointed by the chairman either at or subsequent to such adjourned meeting and approved by the Trustee, and the provisions of this sentence shall apply to all further adjourned such meetings.

Notice of the reconvening of any adjourned meeting shall be given as provided in Section 15.2(1), except that such notice need be given only once not less than five days prior to the date on which the meeting is scheduled to be reconvened. Notice of a reconvening of an adjourned meeting shall state expressly the percentage, as provided above, of the principal amount of the Outstanding Notes of such series which shall constitute a quorum.

Any resolution passed or decision taken at any meeting of Holders of Notes of any series duly held in accordance with this Section shall be binding on all the Holders of Notes of such series, whether or not presented or represented at the meeting. However, for the avoidance of doubt, no actions taken at such meeting shall be binding on all Holders of Notes unless such actions were approved by the minimum percentage in principal amount of the Outstanding Notes of the series as required elsewhere in this Indenture with respect to such actions.

Section 15.5. Determination of Voting Rights; Conduct and Adjournment of Meetings.

(a) Notwithstanding any other provisions of this Indenture, the Trustee may make such reasonable regulations as it may deem advisable for any meeting of Holders of Notes of a series in regard to proof of the holding of Notes of such series and the appointment of proxies and in regard to the appointment and duties of inspectors of votes, the submission and examination of proxies, certificates and other evidence of the right to vote, and such other matters concerning the conduct of the meeting as it shall deem appropriate. Except as otherwise permitted or required by any such regulations, the holding of Notes shall be proved in the manner specified in Section 1.4 and the appointment of any proxy shall be proved in the manner specified in Section 1.4. Such regulations may provide that written instruments appointing proxies, regular on their face, may be presumed valid and genuine without the proof specified in Section 1.4 or other proof.

(b) The Trustee shall, by an instrument in writing, appoint a temporary chairman of the meeting, unless the meeting shall have been called by the Issuer or by Holders of Notes as provided in Section 15.2(2), in which case the Issuer or the Holders of Notes of the series calling the meeting, as the case may be, shall in like manner appoint a temporary chairman. A permanent chairman and a permanent secretary of the meeting shall be elected by vote of the Persons entitled to vote a majority in principal amount of the Outstanding Notes of such series represented at the meeting.

(c) At any meeting each Holder of a Note of such series or proxy shall be entitled to one vote for each \$1,000 principal amount of the Outstanding Notes of such series held or represented by him or her; provided, however, that no vote shall be cast or counted at any meeting in respect of any Note challenged as not Outstanding and ruled by the chairman of the meeting to be not Outstanding. The chairman of the meeting shall have no right to vote, except as a Holder of a Note of such series or proxy.

(d) Any meeting of Holders of Notes of any series duly called pursuant to Section 15.2 at which a quorum is present may be adjourned from time to time by Persons entitled to vote a majority in principal amount of the Outstanding Notes of such series represented at the meeting, and the meeting may be held as so adjourned without further notice.

Section 15.6. Counting Votes and Recording Action of Meetings.

The vote upon any resolution submitted to any meeting of Holders of Notes of any series shall be by written ballots on which shall be subscribed the signatures of the Holders of Notes of such series or of their representatives by proxy and the principal amounts and serial numbers of the Outstanding Notes of such series held or represented by them. The permanent chairman of the meeting shall appoint two inspectors of votes who shall count all votes cast at the meeting for or against any resolution and who shall make and file with the secretary of the meeting their verified written reports in duplicate of all votes cast at the meeting. A record, at least in duplicate, of the proceedings of each meeting of Holders of Notes of any series shall be prepared by the secretary of the meeting and there shall be attached to said record the original reports of the inspectors of votes on any vote by ballot taken thereat and affidavits by one or more persons having knowledge of the facts setting forth a copy of the notice of the meeting and showing that said notice was given as provided in Section 15.2 and, if applicable, Section 15.5. Each copy shall be signed and verified by the affidavits of the permanent chairman and secretary of the meeting and one such copy shall be delivered to the Issuer, and another to the Trustee to be preserved by the Trustee, the latter to have attached thereto the ballots voted at the meeting. Any record so signed and verified shall be conclusive evidence of the matters therein stated.

IN WITNESS WHEREOF, the parties hereto have caused this Indenture to be duly executed as of the day and year first above written.

**Re: Nexa Resources S.A.
6.500% Notes due 2028 (the “Notes”)**

Reference is hereby made to the Indenture, dated as of June 18, 2020 (the “Indenture”), among Nexa Resources S.A., as Issuer, Nexa Resources Cajamarquilla S.A., Nexa Resources Perú S.A.A. and Nexa Recursos Minerais S.A., as Guarantors, and The Bank of New York Mellon, a New York banking corporation, as trustee (the “Trustee”), as principal paying agent (the “Principal Paying Agent”), as transfer agent (the “Transfer Agent”) and registrar (the “Security Registrar”). Capitalized terms used but not defined herein shall have the meanings given to them in the Indenture.

This letter relates to U.S.\$[] aggregate principal amount of Notes which are held in the form of the Restricted Global Note (CUSIP No. 65290D AA1 / ISIN No. US65290DAA19 / Common Code 219373309) with the Depositary in the name of [*insert name of transferor*] (the “Transferor”). The Transferor has requested a transfer of such beneficial interest in the Notes to a Person who will take delivery thereof in the form of an equal aggregate principal amount of Notes evidenced by the Regulation S Global Note (CUSIP No. L67359 AA4 / ISIN No. USL67359AA48 / Common Code 219373368).

In connection with such request, and in respect of such Notes, the Transferor does hereby certify that such transfer has been effected in accordance with the transfer restrictions set forth in the Notes and that:

- (A) The offer of the Notes was not made to a person in the United States; and
- (B) either:
 - (i) at the time the buy order was originated, the transferee was outside the United States or the Transferor and any person acting on its behalf reasonably believed that the transferee was outside the United States; or
 - (ii) the transaction was executed in, on or through the facilities of a designated offshore securities market and neither the Transferor nor any person acting on our behalf knows that the transaction was pre-arranged with a buyer in the United States;
- (C) no directed selling efforts have been made in contravention of the requirements of Rule 903(a)(2) or 904(a)(2) of Regulation S, as applicable; and
- (D) the transaction is not part of a plan or scheme to evade the registration requirements of the Securities Act.

We understand that this certificate is required in connection with certain securities laws of the United States. In connection therewith, if administrative or legal proceedings are commenced or threatened in connection with which this certificate is or would be relevant, we irrevocably authorize you to produce this certificate to any interested party in such proceeding. This certificate and the statements contained herein are made for your benefit and the benefit of the Issuer and the Guarantors.

**Re: Nexa Resources S.A.
6.500% Notes due 2028 (the “Notes”)**

Reference is hereby made to the Indenture, dated as of June 18, 2020 (the “Indenture”), among Nexa Resources S.A., as Issuer, Nexa Resources Cajamarquilla S.A., Nexa Resources Perú S.A.A. and Nexa Recursos Minerais S.A., as Guarantors, and The Bank of New York Mellon, a New York banking corporation, as trustee (the “Trustee”), as principal paying agent (the “Principal Paying Agent”), as transfer agent (the “Transfer Agent”) and registrar (the “Security Registrar”). Capitalized terms used but not defined herein shall have the meanings given to them in the Indenture.

This letter relates to U.S.\$[] principal amount of Notes which are evidenced by an aggregate Regulation S Global Note (CUSIP No. L67359 AA4 / ISIN No. USL67359AA48 / Common Code 219373368) and held with the Depositary through [Euroclear] [Clearstream] in the name of [insert name of transferor] (the “Transferor”). The Transferor has requested a transfer of such beneficial interest in Notes to a person that will take delivery thereof in the form of an equal principal amount of Notes evidenced by a Restricted Global Note of the same series and of like tenor as the Notes (CUSIP No. 65290D AA1 / ISIN No. US65290DAA19 / Common Code 219373309).

In connection with such request and in respect of such Notes, the Transferor does hereby certify that such transfer is being effected pursuant to and in accordance with Rule 144A under the Securities Act and, accordingly, the Transferor does hereby further certify that the Notes are being transferred to a Person that the Transferor reasonably believes is purchasing the Notes for its own account, or for one or more accounts with respect to which such person exercises sole investment discretion, and such person and each such account is a “qualified institutional buyer” within the meaning of Rule 144A, in each case in a transaction meeting the requirements of Rule 144A and in accordance with any applicable securities laws of any state of the United States.

This certificate and the statements contained herein are made for your benefit and the benefit of the Issuer and the Guarantors.

Note: This Table of Contents shall not, for any purpose, be deemed to be part of this Indenture.

THIS INDENTURE, dated as of April 9, 2024, among Nexa Resources S.A., a public limited liability company validly organized under the laws of the Grand Duchy of Luxembourg having its registered office at 37A Avenue J.F. Kennedy, L-1855, Luxembourg, Grand Duchy of Luxembourg and registered with the *Registre de Commerce et des Sociétés* in Luxembourg under number B 185.489 (the “Issuer”), Nexa Resources Cajamarquilla S.A., a corporation (*sociedad anónima*) validly organized under the laws of the Republic of Peru (“Nexa CJM”), Nexa Recursos Minerais S.A., a corporation (*sociedade anônima*) validly organized under the laws of the Federative Republic of Brazil (“Nexa Brazil”, and, together with Nexa CJM, the “Guarantors”), and The Bank of New York Mellon, a New York banking corporation, as trustee (the “Trustee”), a paying agent (the “Principal Paying Agent” and any other paying agents to be appointed hereunder, the “Paying Agents”), transfer agent (the “Transfer Agent”), and registrar (the “Registrar”) and any other paying agents to be appointed hereunder, the “Paying Agents.”

RECITALS

WHEREAS, the Issuer has duly authorized the creation of an issue of U.S.\$600,000,000 of its 6.750% Senior Unsecured Notes due 2034 (the “Initial Notes” and, together with any Additional Notes (as defined herein) issued as provided for in Section 2.3 and Section 3.1 hereof, the “Notes”) of substantially the tenor and amount hereinafter set forth, and to provide therefor the Issuer has duly authorized the execution and delivery of this Indenture.

WHEREAS, Nexa CJM and Nexa Brazil have duly authorized the execution and delivery of this Indenture to provide for their Guarantees with respect to the Notes as set forth in this Indenture.

WHEREAS, all things necessary (i) to make the Initial Notes, when executed by the Issuer and authenticated and delivered hereunder and duly issued by the Issuer, the valid obligations of the Issuer, (ii) to make the Guarantees of Nexa CJM and Nexa Brazil, when executed by Nexa CJM and Nexa Brazil and endorsed on the Notes executed, authenticated and delivered hereunder, the valid obligations of Nexa CJM and Nexa Brazil and (iii) to make this Indenture a valid agreement of the Issuer, Nexa CJM and Nexa Brazil, all in accordance with their respective terms, have been done.

NOW, THEREFORE, THIS INDENTURE WITNESSETH:

For and in consideration of the premises and the purchase of the Notes by the Holders (as defined below) thereof, it is mutually covenanted and agreed, for the equal and proportionate benefit of all Holders of the Notes, as follows:

ARTICLE I

DEFINITIONS AND OTHER PROVISIONS OF GENERAL APPLICATION

Section 1.1. Definitions.

For all purposes of this Indenture, except as otherwise expressly provided or unless the context otherwise requires:

- (1) the terms defined in this Article have the meanings assigned to them in this Article and include the plural as well as the singular;
- (2) all accounting terms not otherwise defined herein have the meanings assigned to them in accordance with GAAP (whether or not such is indicated herein);
- (3) the words “herein,” “hereof” and “hereunder” and other words of similar import refer to this Indenture as a whole and not to any particular Article, Section or other subdivision;
- (4) whenever there is mentioned in this Indenture, in any context, the payment of, or in respect of, a Redemption Price, the principal of or any premium or interest on any Note or the net proceeds received on the sale or exchange of any Notes, such mention shall be deemed to include mention of the payment of Additional Amounts to the extent that, in such context, Additional Amounts are, were or would be payable in respect thereof pursuant to this Indenture;
- (5) All references in this Indenture to “\$,” “U.S.\$,” “dollars” or “United States dollars” shall refer to the lawful currency of the United States.

“Act” when used with respect to any Holder, has the meaning specified in Section 1.4.

“Additional Amounts” has the meaning specified in Section 11.9.

“Additional Notes” means additional 6.750% Senior Unsecured Notes due 2034 issued from time to time after the Issue Date under the terms of this Indenture.

“Affiliate” of any Person means any other Person controlling or controlled by or under direct or indirect common control with such Person. For the purposes of this definition, “control,” when used with respect to any Person, means the power to direct the management and policies of such Person, directly or indirectly, whether through the ownership of voting securities, by contract or otherwise; and the terms “controlling” and “controlled” have meanings correlative to the foregoing.

“Agent Member” means any member of, or participant in, the Depositary.

“Agents” means any Paying Agent, the Registrar, the Transfer Agent and any Principal Paying Agent appointed hereunder.

“Authorized Officers” has the meaning set forth in Section 1.5.

“Bankruptcy Law” means Title 11, United States Code, Brazilian Federal Law No. 11,101, dated February 9, 2005, as amended, or any similar federal or state law relating to bankruptcy, insolvency, receivership, winding-up, suspension of payments, liquidation, reorganization or relief of debtors or the law of any other jurisdiction relating to bankruptcy, insolvency, receivership, winding-up, suspension of payments, liquidation, dissolution, *“procedimiento concursal ordinario,” “procedimiento concursal preventivo,” “procedimiento acelerado de refinanciación concursal,” “recuperação judicial,” “recuperação extrajudicial,”* reorganization or relief of debtors, the judicial proceedings referred to in article 13, items 2 to 11 of the Luxembourg law dated 19 December 2002 relating to the register of commerce and companies as well as the accounting and the annual accounts of companies, as amended, including in particular, bankruptcy (*faillite*), judicial reorganization (*réorganisation judiciaire*), suspension of payments (*sursis de paiement*) and judicial liquidation (*liquidation judiciaire*) proceedings or any amendment to, succession to or change in any such law, procedure or process.

“Bankruptcy Order” means any court order made in a proceeding pursuant to or within the meaning of any Bankruptcy Law, containing an adjudication of bankruptcy or insolvency, or providing for liquidation, receivership, winding-up, dissolution, *“procedimiento concursal ordinario,” “procedimiento concursal preventivo,” “procedimiento acelerado de refinanciación concursal,” “recuperação judicial,” “recuperação extrajudicial,”* or reorganization, or appointing a custodian of a debtor or of all or any substantial part of a debtor’s property, or providing for the staying, arrangement, adjustment or composition of Indebtedness or other relief of a debtor or in any court order made in connection with the judicial proceedings referred to in article 13, items 2 to 11 of the Luxembourg law dated 19 December 2002 relating to the register of commerce and companies as well as the accounting and the annual accounts of companies, as amended, including in particular, bankruptcy (*faillite*), controlled management (*gestion contrôlée*), suspension of payments (*sursis de paiement*), arrangement with creditors (*concordat préventif de la faillite*) and judicial liquidation (*liquidation judiciaire*) proceedings.

“Base Currency” has the meaning set forth in Section 1.14.

“Board of Directors” means the board of directors of the Issuer.

“Board Resolution” means a duly adopted resolution of the Board of Directors in full force and effect at the time of determination.

“Brazil” means the Federative Republic of Brazil and any ministry, department, authority (including the Central Bank of Brazil) or statutory corporation or other entity (including a trust), owned or controlled directly or indirectly by the Federative Republic of Brazil or any of the foregoing.

“Business Day” means each day that is not a Saturday, Sunday or other day on which banking institutions in New York, United States, Luxembourg, Grand Duchy of Luxembourg, São Paulo, Brazil or Lima, Peru are authorized or required by law to close.

“Capital Lease Obligation” of any Person means the obligation to pay rent or other payment amounts under a lease of (or other Indebtedness arrangements conveying the right to use) real or personal property of such Person which is required to be classified and accounted for as a capital lease or a liability set forth on a balance sheet of such Person in accordance with applicable GAAP. The stated maturity of such obligation shall be the date of the last payment of rent or any other amount due under such lease prior to the first date upon which such lease may be terminated by the lessee without payment of a penalty. The principal amount of such obligation shall be the capitalized amount thereof that would appear on the face of a balance sheet of such Person in accordance with applicable GAAP.

“Capital Stock” of any Person means any and all shares, interests, participations or other equivalents (however designated and whether voting or non-voting) of corporate stock or other equity participations or ownership interests, including quotas in a Brazilian limited liability quota company (*limitada*) or partnership interests, whether general or limited, of such Person.

“Cash Equivalents” means:

- (1) United States dollars, Brazilian *reais*, Peruvian *Soles*, Euros, or money in other currencies received in the ordinary course of business of the Issuer and its Subsidiaries that are readily convertible into United States dollars or Euros,
- (2) any evidence of Debt with a maturity of 180 days or less issued or directly and fully guaranteed or insured by Brazil, Peru or the United States or any agency or instrumentality thereof, provided that the full faith and credit of Brazil, Peru or the United States is pledged in support thereof,
- (3) (i) demand deposits, (ii) time deposits and certificates of deposit with maturities of one year or less from the date of acquisition, (iii) bankers’ acceptances with maturities not exceeding one year from the date of acquisition, and (iv) overnight bank deposits, in each case with any bank or trust company organized or licensed under the laws of Luxembourg, Brazil, Peru or the United States or any political subdivision or state thereof having capital, surplus and undivided profits in excess of U.S.\$500.0 million whose short-term debt is rated “A-2” or higher by S&P, “F2” or higher by Fitch or “P-2” or higher by Moody’s,
- (4) repurchase obligations with a term of not more than seven days for underlying securities of the type described in clauses (2) and (3) above entered into with any financial institution meeting the qualifications specified in clause (3) above,
- (5) commercial paper rated at least “P-1” by Moody’s, “F1” by Fitch or “A-1” by S&P and maturing within six months after the date of acquisition, and
- (6) money market funds at least 95% of the assets of which consist of investments of the type described in clauses (1) through (5) above.

“Change of Control” means that the Permitted Holders shall cease to own, directly or indirectly, at least a majority of the outstanding voting power of the Voting Stock of the Issuer and shall cease to have the power to direct or cause the direction of the management and policies of the Issuer.

“Change of Control Offer” has the meaning specified in Section 11.5.

“Change of Control Payment” has the meaning specified in Section 11.5.

“Change of Control Payment Date” has the meaning specified in Section 11.5.

“Central Bank” means (i) the Central Bank of Luxembourg, (ii) the Central Bank of Brazil and (iii) the Central Reserve Bank of Peru or, in each case, any successor entity thereto.

“Change of Law” has the meaning specified in Section 4.1.

“Clearstream” means Clearstream Banking, *société anonyme*.

“Consolidated Total Assets” means, on a consolidated basis, the Issuer’s total amount of assets, calculated based on the most recent balance sheet delivered by the Issuer to the Trustee pursuant to this Indenture, after giving pro forma effect to any acquisition or disposition of companies, divisions, lines of businesses, operations or assets by the Issuer and its Subsidiaries subsequent to such date.

“Corporate Trust Office” means the principal office of the Trustee in The City of New York, New York, at which at any particular time its corporate trust business shall be administered, which at the date hereof is located at 240 Greenwich Street, New York, New York 10286, United States, Attention: Global Corporate Trust, e-mail: gcs.specialty.glam.conv@bnymellon.com, and such other offices as the Trustee may designate from time to time.

“corporation” means a corporation, association, company, limited liability company, joint stock company or business trust.

“covenant defeasance” has the meaning specified in Section 12.3.

“Default” means an event that with the passing of time or the giving of notice or both shall constitute an Event of Default.

“Defaulted Interest” has the meaning specified in Section 3.6.

“Depository” means, with respect to the Notes issuable or issued in whole or in part in the form of one or more Global Notes, DTC for so long as it shall be a clearing agency registered under the Exchange Act, or such successor as the Issuer shall designate from time to time in an Officer’s Certificate delivered to the Trustee.

“Designated Subsidiary” means (i) each Guarantor and (ii) any other Subsidiary of the Issuer which, as of the date of the Issuer’s most recent quarterly or annual, as applicable, consolidated balance sheet, constituted 15% or more of the Consolidated Total Assets of the Issuer, after giving pro forma effect to any acquisition or disposition of companies, divisions, lines of businesses, operations or assets by the Issuer and its Subsidiaries subsequent to such date.

“Director” means a member of the Board of Directors.

“Disqualified Stock” of any Person means any Capital Stock of such Person which, by its terms (or by the terms of any security into which it is convertible or for which it is exchangeable), or upon the happening of any event, matures or is mandatorily redeemable, pursuant to a sinking fund obligation or otherwise, or is redeemable at the option of the holder thereof, in whole or in part, on or prior to the Stated Maturity of the Notes.

“DTC” means The Depository Trust Company.

“Electronic Means” means the following communications methods: e-mail, secure electronic transmission containing applicable authorization codes, passwords and/or authentication keys issued by the Trustee, or another method or system specified by the Trustee as available for use in connection with its services hereunder.

“Euroclear” means Euroclear Bank S.A./N.V., as operator of the Euroclear system or its successors.

“Event of Default” has the meaning specified in Section 6.1.

“Exchange Act” means the United States Securities Exchange Act of 1934, as amended (or any successor act), and the rules and regulations thereunder.

“Expiration Date” has the meaning set forth in Section 1.4.

“FATCA” means Sections 1471 to 1474 of the U.S. Internal Revenue Code of 1986, as amended.

“Fitch” means Fitch Rating Service, Inc. and its successors.

“GAAP” means, as elected from time to time by the Issuer, (i) generally accepted accounting principles prescribed by the laws, rules and regulations applicable in the jurisdiction of incorporation of the Issuer, (ii) International Financial Reporting Standards, or (iii) accounting practices generally accepted in the United States, in each case, as in effect from time to time.

“Global Note” means, as the context may require, any or all of the Regulation S Global Note(s) and the Restricted Global Note(s), evidencing all or part of a series of Notes which is issued to the Depositary or its nominee and is registered in the name of the Depositary or its nominee.

“guarantee” by any Person means any obligation, contingent or otherwise, of such Person guaranteeing, or having the economic effect of guaranteeing, any Indebtedness of any other Person (the **“primary obligor”**) in any manner, whether directly or indirectly, and including, without limitation, any obligation of such Person, (i) to purchase or pay (or advance or supply funds for the purchase or payment of) such Indebtedness or to purchase (or to advance or supply

funds for the purchase of) any security for the payment of such Indebtedness, (ii) to purchase property, securities or services for the purpose of assuring the holder of such Indebtedness of the payment of such Indebtedness, or (iii) to maintain working capital, equity capital or other financial statement condition or liquidity of the primary obligor so as to enable the primary obligor to pay such Indebtedness (and “guaranteed,” “guaranteeing” and “guarantor” shall have meanings correlative to the foregoing); provided that, the guarantee by any Person shall not include endorsements by such Person for collection or deposit, in either case, in the ordinary course of business; provided further that, the Incurrence by the Issuer or a Designated Subsidiary of a Lien permitted under clause (2) of Section 11.10 shall not be deemed to constitute a guarantee by the Issuer or a Designated Subsidiary of any purchase money debt of such Person secured thereby.

“Guarantee” means the guarantee by the Guarantors of the due and punctual payment of the principal (and premium, if any) and interest (including any Additional Amounts) on, the Notes and other amounts due under this Indenture.

“Guarantors” mean Nexa CJM and Nexa Brazil.

“Holder” means a Person in whose name a Note is registered on the Registrar’s books.

“Incur” means, with respect to any Indebtedness or other obligation of any Person, to create, issue, incur (by conversion, exchange or otherwise), assume, guarantee or otherwise become liable in respect of such Indebtedness or other obligation including by acquisition of Subsidiaries or the recording, as required pursuant to applicable GAAP or otherwise, of any such Indebtedness or other obligation on the balance sheet of such Person (and “Incurrence,” “Incurred,” “Incurable” and “Incurring” shall have meanings correlative to the foregoing); provided that a change in applicable GAAP that results in an obligation of such Person that exists at such time becoming Indebtedness shall not be deemed an Incurrence of such Indebtedness and that neither the accrual of interest nor the accretion of original issue discount shall be deemed an Incurrence of Indebtedness; provided further that, the Issuer may elect to treat all or any portion of revolving credit debt commitments, whether or not then outstanding, of the Issuer or a Subsidiary as being incurred from and after any date beginning the date the relevant revolving credit commitment is extended to the Issuer or a Subsidiary, as the case may be, by furnishing written notice thereof to the Trustee, and any borrowings or reborrowings by the Issuer or a Subsidiary under such commitment up to the amount of such commitment designated by the Issuer or such Subsidiary as Incurred shall not be deemed to be new Incurrences of Indebtedness by the Issuer or such Subsidiary, as the case may be.

“Indebtedness” means (without duplication), with respect to any Person, whether recourse is to all or a portion of the assets of such Person and whether or not contingent, (i) every obligation of such Person for money borrowed, (ii) every obligation of such Person evidenced by bonds, debentures, notes or other similar instruments, including any such obligations Incurred in connection with the acquisition of property, assets or businesses, (iii) every reimbursement obligation of such Person with respect to letters of credit, bankers’ acceptances or similar facilities issued for the account of such Person, (iv) every obligation of such Person issued or assumed as the deferred purchase price of property or services (including securities repurchase agreements but excluding trade accounts payable or accrued liabilities arising in the ordinary course of business which are payable on customary trade terms or which are being contested in good faith), (v) all obligations to redeem Disqualified Stock issued by such Person, (vi) every Net Obligation under Interest Rate or Currency Protection Agreements of such Person, (vii) every Capital Lease Obligation of such Person, and (viii) every obligation of the type referred to in clauses (i) through (vii) of another Person and all dividends of another Person the payment of which, in either case, such Person has guaranteed, other than with respect to clauses (iii) and (vi) above, in each case, if and to the extent any of the preceding items would appear as a liability upon the financial statements of the specified Person in accordance with applicable GAAP.

"Indenture" means this instrument as originally executed or as it may from time to time be supplemented or amended by one or more supplemental indentures hereto entered into pursuant to the applicable provisions hereof.

"Initial Notes" means the U.S.\$600,000,000 of Notes designated in the first paragraph of the Recitals.

"Instructions" has the meaning set forth in Section 1.5.

"Interest Payment Date" means each April 9 and October 9, commencing on October 9, 2024.

"Interest Rate or Currency Protection Agreement" of any Person means any forward contract, futures contract, swap, option, hedge or other financial agreement or arrangement (including, without limitation, caps, floors, collars and similar agreements) relating to, or the value of which is dependent upon, interest rates or currency exchange rates or indices.

"Investment Grade Rating" means a rating equal to or higher than (i) BBB- (or the equivalent) by S&P, (ii) Baa3 (or the equivalent) by Moody's or (iii) BBB- (or the equivalent) by Fitch.

"Issue Date" means April 9, 2024.

"Issuer" means the Person named as the "Issuer" in the first paragraph of this instrument until a successor Person shall have become such pursuant to the applicable provisions of this Indenture and thereafter "Issuer" shall mean such successor Person.

"Issuer Request" or "Issuer Order" means a written request or order signed in the name of the Issuer by an authorized signatory of the Issuer and delivered to the Trustee.

"Lien" means any mortgage, pledge, security interest, encumbrance or charge of any kind (including, without limitation, any conditional sale or other title retention agreement or lease in the nature thereof or any agreement to give any security interest).

"Luxembourg" means the Grand Duchy of Luxembourg and any ministry, department, authority (including the Central Bank of Luxembourg) or statutory corporation or other entity (including a trust), owned or controlled directly or indirectly by the Grand Duchy of Luxembourg or any of the foregoing.

"Maturity" when used with respect to any Note, means the date on which the principal of such Note becomes due and payable as therein or herein provided, whether at the Stated Maturity or by declaration of acceleration, call for redemption or otherwise.

"Maturity Date" means April 9, 2034.

"Moody's" means Moody's Investors Service, Inc. and its successors.

"Net Obligation" at any date of determination means the net amount, exclusive of any commissions or administrative fees that a Person would be obligated to pay upon the termination of an Interest Rate or Currency Protection Agreement as of such date.

"Nexa Brazil" means the Person named as "Nexa Brazil" in the first paragraph of this instrument until a successor Person shall have become such pursuant to the applicable provisions of this Indenture and thereafter "Nexa Brazil" shall mean such successor Person.

"Nexa CJM" means the Person named as "Nexa CJM" in the first paragraph of this instrument until a successor Person shall have become such pursuant to the applicable provisions of this Indenture and thereafter "Nexa CJM" shall mean such successor Person.

"Note Register" has the meaning specified in Section 3.4(b).

"Notes" has the meaning specified in the first paragraph of the Recitals.

"Notice of Default" has the meaning set forth in Section 7.2.

"OECD" means the Organization for Economic Co-operation and Development.

"Officer's Certificate" means a certificate signed by any of the following: the Chief Executive Officer, President, Chief Financial Officer or a Vice President; and delivered to the Trustee and containing the statements provided for in Section 1.2 hereof (if applicable).

"Opinion of Counsel" means a written opinion of legal counsel, who may be counsel for the Issuer or a Guarantor, containing the statements provided for in Section 1.2 in form and substance reasonably acceptable to the Trustee.

"Outstanding" when used with respect to the Notes, means, as of the date of determination, all the Notes theretofore authenticated and delivered under this Indenture (including, as of such date, all the Notes represented by Global Notes authenticated and delivered under this Indenture), except the reduced portion or portions of any Global Note, as such reduction or reductions shall have been endorsed on such Global Note by the Trustee as provided herein and, except:

- (i) the Notes theretofore cancelled by the Trustee or delivered to the Trustee for cancellation;
- (ii) the Notes for whose payment or redemption money in the necessary amount has been theretofore deposited with the Trustee or any Paying Agent (other than the Issuer) in trust or set aside and segregated in trust by the Issuer (if the Issuer shall act as its own Paying Agent) for the Holders of such Notes; provided that if such Notes are to be repurchased, notice of such repurchase has been duly given pursuant to this Indenture; and

(iii) Notes which have been issued pursuant to Section 3.5 or in exchange for or in lieu of which other Notes have been authenticated and delivered pursuant to this Indenture, other than any such Notes in respect of which there shall have been presented to the Trustee proof satisfactory to it that such Notes are held by a bona fide purchaser in whose hands such Notes are valid obligations of the Issuer;

provided, however, that in determining whether the Holders of the requisite principal amount of the Outstanding Notes have given any request, demand, authorization, direction, notice, consent or waiver hereunder, Notes owned by the Issuer or any other obligor upon the Notes or any Affiliate of the Issuer or of such other obligor shall be disregarded and deemed not to be Outstanding, except that, in determining whether the Trustee shall be protected in relying upon any such request, demand, authorization, direction, notice, consent or waiver, only Notes which a Responsible Officer of the Trustee actually knows to be so owned shall be so disregarded. Notes so owned which have been pledged in good faith may be regarded as Outstanding if the pledgee establishes to the satisfaction of the Trustee the pledgee's right so to act with respect to such Notes and that the pledgee is not the Issuer or any other obligor upon the Notes or any Affiliate of the Issuer or of such other obligor.

"Paying Agent" means any Person authorized by the Issuer to pay the principal of (and premium, if any) or interest on any Notes on behalf of the Issuer. The Issuer has initially appointed the Principal Paying Agent to act as Paying Agent.

"Payment Date" has the meaning set forth in Section 3.11(b).

"Permitted Holders" mean (i) the estate of Mr. Antonio Ermírio de Moraes and any of Mr. Ermírio Pereira de Moraes, Mrs. Maria Helena de Moraes Scripilliti and Mr. José Ermírio de Moraes Filho and any of their descendants, (ii) any Affiliate of any of the foregoing and (iii) any corporation, partnership, joint venture, association, trust, fund, unincorporated organization, or any other entity or group formed pursuant to a shareholders, control or voting agreement or similar agreement, of which any one or more of the Permitted Holders referred to in clauses (i) or (ii) hereof is a shareholder, partner, beneficiary, member or party.

"Permitted Holding Company" means any entity which owns at least 95% of the outstanding Capital Stock or other ownership interests (other than directors' qualifying shares) of the Issuer.

"Person" means any individual, corporation, partnership, joint venture, association, trust, unincorporated organization, government or agency or political subdivision thereof or any other entity.

"Peru" means the Republic of Peru and any ministry, department, authority (including the Central Reserve Bank of Peru) or statutory corporation or other entity (including a trust), owned or controlled directly or indirectly by the Republic of Peru or any of the foregoing.

"Predecessor Note" of any particular Note means every previous Note evidencing all or a portion of the same debt as that evidenced by such particular Note; and, for the purposes of this definition, any Note authenticated and delivered under Section 3.5 in exchange for or in lieu of a mutilated, destroyed, lost or stolen Note shall be deemed to evidence the same debt as the mutilated, destroyed, lost or stolen Note.

"Principal Paying Agent" means The Bank of New York Mellon, a New York banking corporation, or any successor in its capacity as Principal Paying Agent.

"Rating Agency" means each of S&P, Moody's and Fitch; provided that if two of S&P, Moody's or Fitch ceases to rate the Notes or fails to make a rating on the Notes publicly available, the Issuer will appoint at least one replacement for such Rating Agency that is a "nationally recognized statistical rating organization" within the meaning of Rule 15c3-1(c)(2)(vi)(F) under the Exchange Act.

"Rating Date" means the date which is 90 days prior to the earlier of (i) a Change of Control and (ii) public notice of the occurrence of a Change of Control or of the intention of the Permitted Holders or the Issuer to effect a Change of Control.

"Rating Decline" means the occurrence of the following on, or within 90 days after, the date of public notice of the occurrence of a Change of Control or of the intention by a Permitted Holder or the Issuer to effect a Change of Control (which period shall be extended so long as the rating of the Notes is under publicly announced consideration for possible downgrade by any of the Rating Agencies): (i) in the event the Notes are assigned an Investment Grade Rating by at least two of the Rating Agencies on the Rating Date, the rating of the Notes by at least two of the Rating Agencies shall be below an Investment Grade Rating; or (ii) in the event the Notes are rated below an Investment Grade Rating by at least two of the Rating Agencies on the Rating Date, the rating of the Notes by at least two of the Rating Agencies shall be decreased by one or more gradations (including gradations (but not outlooks) within rating categories as well as between rating categories); provided that any such Rating Decline is expressly stated by the applicable Rating Agencies to have been the result of the Change of Control. The Issuer will provide the Trustee with prompt written notice of any Rating Decline, and the Trustee shall not be deemed to have knowledge of any Rating Decline until it receives such notice.

"rate(s) of exchange" has the meaning set forth in Section 1.14.

"Receivables" means receivables, chattel paper, instruments, documents or intangibles evidencing or relating to the right to payment of money in respect of the sale of goods or services.

"Record Date" means the second Business Day immediately preceding an Interest Payment Date.

"Redemption Date" when used with respect to any Note to be redeemed, means the date fixed for such redemption by or pursuant to this Indenture.

"Redemption Price" when used with respect to any Note to be redeemed, means the price at which it is to be redeemed pursuant to this Indenture.

“Registrar” has the meaning specified in Section 3.4(b).

“Relevant Date” has the meaning specified in Section 11.9.

“Responsible Officer” means any officer within the corporate trust department of the Trustee, including any director, managing director, vice president, assistant vice president, trust officer, assistant trust officer or any other officer or assistant officer of the Trustee customarily performing functions similar to those performed by the persons who at that time shall be such officers having direct responsibility for the administration of this Indenture, and also means, with respect to a particular corporate trust matter, any other officer to whom such trust matter is referred because of his or her knowledge of and familiarity with the particular subject.

“Regulation S” means Regulation S (including any successor regulation thereto) under the Securities Act, as it may be amended from time to time.

“Regulation S Global Note” has the meaning set forth in Section 2.1

“Remaining Life” has the meaning set forth in Section 4.2.

“Restricted Global Note” has the meaning set forth in Section 2.1.

“Restricted Notes” means the Restricted Global Note and any Successor Note, other than (i) any Note issued upon a transfer or exchange for which a certificate substantially in the form set forth in (a) Exhibit A is required to be provided and is provided pursuant to Section 3.4(c)(2) or (b) Exhibit C-2 is required to be provided and is provided pursuant to Section 3.4(c)(5), (ii) any Note issued in exchange for or in lieu of any Note specified in clause (i) of this definition or any Note issued in exchange therefor or in lieu thereof, or (iii) any Note as to which the Issuer has removed and has not replaced the legend described in Section 3.4(b).

“Restricted Property” means any mineral property (including any mineral concessions, authorizations or rights in respect of minerals granted by any governmental authority), concentrate plant, manufacturing or processing plant used in connection with the processing, refining or manufacturing of metals or minerals, power plant or transmission lines of the Issuer or any Designated Subsidiary and any capital stock of any Subsidiary directly owning any such mineral property, concentrate, manufacturing or processing plant, power plant or transmission lines.

“Reuters” means Reuters Group plc, a U.K. corporation, and its successors and assigns.

“Rule 144A” means Rule 144A (including any successor regulation thereto) under the Securities Act, as it may be amended from time to time.

“S&P” means S&P Global Ratings, a business unit of Standard & Poor’s Financial Services LLC and its successors.

“SEC” means the United States Securities and Exchange Commission.

"Securities Act" means the United States Securities Act of 1933, as amended, and the rules and regulations of the SEC promulgated thereunder.

"Securitization Transaction" means a transaction in which the Issuer or a Subsidiary thereof sells or transfers an interest in Receivables (and/or any rights arising under the documentation governing or relating to such Receivables covered by such transaction, any proceeds of Receivables and any lockboxes or accounts in which such proceeds are deposited and any related assets) to a special purpose entity that issues securities payable from collections of such Receivables or other assets.

"Special Record Date" for the payment of any Defaulted Interest means a date fixed by the Trustee pursuant to Section 3.6.

"Stated Maturity" when used with respect to any Note or any installment of interest thereon, means the date specified in such Note as the date on which the principal of such Note or such installment of interest, as the case may be, is due and payable.

"Subsidiary" of any Person means (i) a corporation more than 50% of the combined voting power of the outstanding Voting Stock of which is owned, directly or indirectly, by such Person or by one or more other Subsidiaries of such Person or by such Person and one or more Subsidiaries thereof or (ii) any other Person (other than a corporation) in which such Person, or one or more other Subsidiaries of such Person or such Person and one or more other Subsidiaries thereof, directly or indirectly, has at least a majority ownership and power to direct the policies, management and affairs thereof.

"Successor Note" of any particular Note means every Note issued after, and evidencing all or a portion of the same debt as that evidenced by, such particular Note; and, for the purposes of this definition, any Note authenticated and delivered under Section 3.5 in exchange for or in lieu of a mutilated, destroyed, lost or stolen Note shall be deemed to evidence the same debt as the mutilated, destroyed, lost or stolen Note.

"Taxes" has the meaning set forth in Section 11.9.

"Transaction Documents" has the meaning set forth in Section 11.1.

"Transfer Agent" means the agent designated by the Issuer (not including the Registrar) for the registration of transfer of securities as provided in Section 11.2.

"Treasury Rate" has the meaning set forth in Section 4.2.

"Trustee" means the Person named as the "Trustee" in the first paragraph of this instrument until a successor Trustee shall have been appointed pursuant to the applicable provisions of this Indenture, and thereafter "Trustee" shall mean such successor Trustee.

"United States" means the United States of America.

"U.S. Dollar Equivalent" means, with respect to any monetary amount in a currency other than the U.S. Dollar, at any time for the determination thereof, the amount of U.S. Dollars obtained by converting such foreign currency involved in such computation into U.S. Dollars at the spot rate for the purchase of U.S. Dollars with the applicable foreign currency as quoted by Reuters at approximately 11:00 a.m. (New York time) on the date not more than two Business Days prior to such determination.

"U.S. Global Notes" has the meaning specified in Section 2.1.

"Vice President" when used with respect to the Issuer or any Guarantor, means any vice president, whether or not designated by a number or a word or words added before or after the title "vice president."

"Voting Stock" of a Person means all classes of Capital Stock of such Person then outstanding that are entitled (without regard to the occurrence of any contingency) to vote in the election of the directors of such Person, but excluding such classes of Capital Stock or other interests that are entitled, as a group in a separate cast, to appoint one director of such Person as representative of the minority shareholders.

"Wholly Owned Subsidiary" of any Person means any entity owned by such Person of which at least 95% of the outstanding Capital Stock or other ownership interests (other than directors' qualifying shares) of such entity shall at the time be owned by such Person or by one or more Wholly Owned Subsidiaries of such Person.

Section 1.2. Compliance Certificates and Opinions.

Upon any application or request by the Issuer or a Guarantor to the Trustee to take any action under any provision of this Indenture, the Issuer or such Guarantor shall furnish to the Trustee such certificates and opinions as may be required under this Indenture; provided, however, that such certificate and opinion shall not be required in the case of the initial issuance of Notes hereunder. Each such certificate or opinion, and any certificate evidencing a determination required to be made by the Issuer or a Guarantor under this Indenture, shall be given in the form of an Officer's Certificate, if to be given by an officer of the Issuer or such Guarantor, or an Opinion of Counsel, if to be given by counsel, and shall comply with the requirements set forth in this Indenture.

Every certificate or opinion with respect to compliance by or on behalf of the Issuer or a Guarantor with a condition or covenant provided for in this Indenture shall include:

- (1) a statement that each individual signing such certificate or opinion has read such covenant or condition and the definitions herein relating thereto;
- (2) a brief statement as to the nature and scope of the examination or investigation upon which the statements or opinions contained in such certificate or opinion are based;
- (3) a statement that, in the opinion of each such individual, he has made such examination or investigation as is necessary to enable him or her to express an informed opinion as to whether or not such covenant or condition has been complied with; and

(4) a statement as to whether, in the opinion of each such individual, such condition or covenant has been complied with.

Section 1.3. Form of Documents Delivered to Trustee.

In any case where several matters are required to be certified by, or covered by an opinion of, any specified Person, it is not necessary that all such matters be certified by, or covered by the opinion of, only one such Person, or that they be so certified or covered by only one document, but one such Person may certify or give an opinion with respect to some matters and one or more other such Persons as to other matters, and any such Person may certify or give an opinion as to such matters in one or several documents.

Any certificate of an officer of the Issuer or a Guarantor may be based, insofar as it relates to legal matters, upon an Opinion of Counsel submitted therewith, unless such officer knows, or in the exercise of reasonable care should know, that the opinion with respect to the matters upon which his certificate is based is erroneous. Any Opinion of Counsel may be based, insofar as it relates to factual matters, upon a certificate of an officer or officers of the Issuer or a Guarantor submitted therewith stating the information on which counsel is relying, unless such counsel knows, or in the exercise of reasonable care should know, that the certificate with respect to such matters is erroneous.

Where any Person is required to make, give or execute two or more applications, requests, consents, certificates, statements, opinions or other instruments under this Indenture, they may, but need not, be consolidated and form one instrument.

Section 1.4. Acts of Holders; Record Date.

Any request, demand, authorization, direction, notice, consent, waiver or other action provided by this Indenture to be given or taken by Holders may be embodied in and evidenced by one or more instruments of substantially similar tenor signed by such Holders in person or by an agent duly appointed in writing; and, except as herein otherwise expressly provided, such action shall become effective when such instrument or instruments are delivered to the Trustee and, where it is hereby expressly required, to the Issuer. Such instrument or instruments (and the action embodied therein and evidenced thereby) are herein sometimes referred to as the “Act” of the Holders signing such instrument or instruments. Proof of execution of any such instrument or of a writing appointing any such agent shall be sufficient for any purpose of this Indenture and (subject to Section 6.1) conclusive in favor of the Trustee and the Issuer, if made in the manner provided in this Section.

The fact and date of the execution by any Person of any such instrument or writing pursuant to this Section 1.4 may be proved by the affidavit of a witness of such execution or by a certificate of a notary public or other officer authorized by law to take acknowledgments of deeds, certifying that the individual signing such instrument or writing acknowledged to him or her the execution thereof. Where such execution is by a signer acting in a capacity other than his individual capacity, such certificate or affidavit shall also constitute sufficient proof of his authority. The fact and date of the execution of any such instrument or writing, or the authority of the Person executing the same, may also be proved in any other manner which the Trustee deems sufficient.

The ownership of Notes shall be proved by the Note Register.

Any request, demand, authorization, direction, notice, consent, waiver or other Act of the Holder of any Note shall bind every future Holder of the same Note and the Holder of every Note issued upon the registration of transfer thereof or in exchange therefor or in lieu thereof in respect of anything done, omitted or suffered to be done by the Trustee or the Issuer in reliance thereon, whether or not notation of such action is made upon such Note.

The Issuer may set any day as a Record Date for the purpose of determining the Holders of Outstanding Notes entitled to give, make or take any request, demand, authorization, direction, notice, consent, waiver or other action provided or permitted by this Indenture to be given, made or taken by Holders of Notes, provided that the Issuer may not set a Record Date for, and the provisions of this paragraph shall not apply with respect to, the giving or making of any notice, declaration, request or direction referred to in the next paragraph. If not set by the Issuer prior to the first solicitation of a Holder made by any Person in respect of any such matter referred to in the foregoing sentence, the Record Date for any such matter shall be the 30th day (or, if later, the date of the most recent list of Holders required to be provided pursuant to Section 7.1) prior to such first solicitation. If any Record Date is set pursuant to this paragraph, the Holders of Outstanding Notes on such Record Date, and no other Holders, shall be entitled to take the relevant action, whether or not such Holders remain Holders after such Record Date; provided that no such action shall be effective hereunder unless taken on or prior to the applicable Expiration Date by Holders of the requisite principal amount of Outstanding Notes on such Record Date.

The Trustee may set any day as a Record Date for the purpose of determining the Holders of Outstanding Notes entitled to join in the giving or making of (i) any Notice of Default, (ii) any declaration of acceleration referred to in Section 5.1, (iii) any request to institute proceedings referred to in Section 5.6(2) or (iv) any direction referred to in Section 5.11. If any Record Date is set pursuant to this paragraph, the Holders of Outstanding Notes on such Record Date, and no other Holders, shall be entitled to join in such notice, declaration, request or direction, whether or not such Holders remain Holders after such Record Date; provided that no such action shall be effective hereunder unless taken on or prior to the applicable Expiration Date by Holders of the requisite principal amount of Outstanding Notes on such Record Date. Nothing in this paragraph shall be construed to prevent the Trustee from (i) giving or making any notice required to be made pursuant to the Trustee's duties and obligations under this Indenture and (ii) setting a new Record Date for any action for which a Record Date has previously been set pursuant to this paragraph (whereupon the Record Date previously set shall automatically and with no action by any Person be cancelled and of no effect), and nothing in this paragraph shall be construed to render ineffective any action taken by Holders of the requisite principal amount of Outstanding Notes on the date such action is taken. Promptly after any Record Date is set pursuant to this paragraph, the Trustee, at the Issuer's expense, shall cause notice of such Record Date, the proposed action by Holders and the applicable Expiration Date to be given to the Issuer in writing and to each Holder of Notes in the manner set forth in Section 1.6.

Nothing in this paragraph shall be construed to prevent the Issuer from setting a new Record Date for any action for which a Record Date has previously been set pursuant to this paragraph (whereupon the Record Date previously set shall automatically and with no action by any Person be cancelled and of no effect), and nothing in this paragraph shall be construed to render ineffective any action taken by Holders of the requisite principal amount of Outstanding Notes on the date such action is taken. Promptly after any Record Date is set pursuant to this paragraph, the Issuer, at its own expense, shall cause notice of such Record Date, the proposed action by Holders and the applicable Expiration Date to be given to the Trustee in writing and to each Holder of Notes in the manner set forth in Section 1.6.

With respect to any Record Date set pursuant to this Section, the party hereto which sets such Record Dates may designate any day as the “Expiration Date,” and from time to time may change the Expiration Date to any earlier or later day; provided that no such change shall be effective unless notice of the proposed new Expiration Date is given to the other party hereto in writing, and to each Holder of Notes in the manner set forth in Section 1.6, on or prior to the existing Expiration Date. If an Expiration Date is not designated with respect to any Record Date set pursuant to this Section, the party hereto which set such Record Date shall be deemed to have initially designated the 180th day after such Record Date as the Expiration Date with respect thereto, subject to its right to change the Expiration Date as provided in this paragraph. Notwithstanding the foregoing, no Expiration Date shall be later than the 180th day after the applicable Record Date.

Without limiting the foregoing, a Holder entitled hereunder to take any action hereunder with regard to any particular Note may do so with regard to all or any part of the principal amount of such Note or by one or more duly appointed agents each of which may do so pursuant to such appointment with regard to all or any part of such principal amount.

Section 1.5. Notices, Etc., to Trustee, the Paying Agents and the Issuer.

Any request, demand, authorization, direction, notice, consent, waiver or Act of Holders or other document provided or permitted by this Indenture to be made upon, given or furnished to, or filed with:

(1) the Trustee or any Agent by any Holder or by the Issuer or the Guarantor shall be sufficient for every purpose hereunder if made, given, furnished or filed, in writing in English or accompanied by a certified translation to English, to or with the Trustee at The Bank of New York Mellon, 240 Greenwich Street, New York, New York 10286, United States, Attention: Global Corporate Trust, Fax: (212) 815-5630, and such other offices as the Trustee may designate from time to time or at any other address previously furnished in writing to the Holders, the Issuer by the Trustee;

(2) the Principal Paying Agent by the Trustee, the Issuer or any Holder shall be sufficient for every purpose hereunder (except as otherwise expressly provided herein) if in writing and mailed, first class postage prepaid, to the Principal Paying Agent addressed to it at 240 Greenwich Street, New York, New York 10286, United States, Attention: Global Corporate Trust, or at any other address previously furnished in writing to the Trustee by the Principal Paying Agent;

(3) the Issuer by the Trustee or by any Holder shall be sufficient for every purpose hereunder (except as otherwise expressly provided herein) if in writing and mailed, first-class postage prepaid, to the Issuer addressed to it at 37A, Avenue J.F. Kennedy, L-1855, Luxembourg, Grand Duchy of Luxembourg, Attention: José Carlos del Valle (Group Chief Financial Officer), or at any other address previously furnished in writing to the Trustee by the Issuer;

(4) Nexa CJM by the Trustee or by any Holder shall be sufficient for every purpose hereunder (except as otherwise expressly provided herein) if in writing and mailed, first-class postage prepaid, to Nexa CJM addressed to it at Carretera Central Km 9.5, desvío a Huachipa, Lurigancho-Chosica, Provincia y Departamento de Lima, Peru, Attention: José Carlos del Valle (Group Chief Financial Officer), or at any other address previously furnished in writing to the Trustee by Nexa CJM; and

(5) Nexa Brazil by the Trustee or by any Holder shall be sufficient for every purpose hereunder (except as otherwise expressly provided herein) if in writing and mailed, first-class postage prepaid, to Nexa Brazil addressed to it at Av. Engenheiro Luis Carlos Berrini, 105, São Paulo, SP 04571-010, Brazil, Attention: Rodrigo Cammarosano (Treasurer), or at any other address previously furnished in writing to the Trustee by Nexa Brazil.

The Trustee shall have the right to accept and act upon instructions, including funds transfer instructions (“Instructions”) given pursuant to this Indenture and delivered using Electronic Means; *provided, however*, that the Issuer and/or each Guarantor, as applicable, shall provide to the Trustee an incumbency certificate listing officers with the authority to provide such Instructions (“Authorized Officers”) and containing specimen signatures of such Authorized Officers, which incumbency certificate shall be amended by the Issuer and/or each Guarantor, as applicable, whenever a person is to be added or deleted from the listing. If the Issuer and/or a Guarantor, as applicable, elects to give the Trustee Instructions using Electronic Means and the Trustee in its discretion elects to act upon such Instructions, the Trustee’s understanding of such Instructions shall be deemed controlling. The Issuer and the Guarantors understand and agree that the Trustee cannot determine the identity of the actual sender of such Instructions and that the Trustee shall conclusively presume that directions that purport to have been sent by an Authorized Officer listed on the incumbency certificate provided to the Trustee have been sent by such Authorized Officer. The Issuer and the Guarantors shall be responsible for ensuring that only Authorized Officers transmit such Instructions to the Trustee and that the Issuer, the Guarantors and all Authorized Officers are solely responsible to safeguard the use and confidentiality of applicable user and authorization codes, passwords and/or authentication keys upon receipt by the Issuer and/or the Guarantors, as applicable. The Trustee shall not be liable for any losses, costs or expenses arising directly or indirectly from the Trustee’s reliance upon and compliance with such Instructions notwithstanding such directions conflict or are inconsistent with a subsequent written instruction. Each of the Issuer and each Guarantor agree: (i) to assume all risks arising out of the use of Electronic Means to submit Instructions to the Trustee, including without limitation the risk of the Trustee acting on unauthorized Instructions, and the risk of interception and misuse by third parties; (ii) that it is fully informed of the protections and risks associated with the various methods of transmitting Instructions to the Trustee and that there may be more secure methods of transmitting Instructions than the method(s) selected by the Issuer and/or the Guarantor, as applicable; (iii) that the security procedures (if any) to be followed in connection with its transmission of Instructions provide to it a commercially reasonable degree of protection in light of its particular needs and circumstances; and (iv) to notify the Trustee immediately upon learning of any compromise or unauthorized use of the security procedures.

Section 1.6. Notice to Holders; Waiver.

Where this Indenture provides for notice to Holders of any event, such notice shall be sufficiently given (unless otherwise herein expressly provided) if (i) in the case of a Global Note, in writing by electronic mail and/or by first-class mail to the Depositary, and (ii) in the case of securities other than Global Notes, in writing and mailed, first-class postage prepaid, to each Holder affected by such event, at his address as it appears in the Note Register on the Business Day immediately preceding the date of mailing, which shall be not later than the latest date (if any), and not earlier than the earliest date (if any), prescribed for the giving of such notice. In any case where notice to Holders is given by mail, neither the failure to mail such notice, nor any defect in any notice so mailed, to any particular Holder shall affect the sufficiency of such notice with respect to other Holders. Where this Indenture provides for notice in any manner, such notice may be waived in writing by the Person entitled to receive such notice, either before or after the event, and such waiver shall be the equivalent of such notice. Waivers of notice by Holders shall be filed with the Trustee, but such filing shall not be a condition precedent to the validity of any action taken in reliance upon such waiver.

In case by reason of the suspension of regular mail service or by reason of any other cause it shall be impracticable to give such notice by mail, then such notification as shall be made with the approval of the Trustee shall constitute a sufficient notification for every purpose hereunder.

Any obligation the Issuer (and the Paying Agents on its behalf) may have to publish a notice to Holders shall have been met upon delivery of the notice to the Depositary.

Section 1.7. Effect of Headings and Table of Contents.

The Article and Section headings herein and the Table of Contents are for convenience only and shall not affect the construction hereof.

Section 1.8. Successors and Assigns.

All covenants and agreements in this Indenture by each of the Issuer and the Guarantors shall bind its successors and assigns, whether so expressed or not.

Section 1.9. Separability Clause.

In case any provision in this Indenture or in the Notes or in the Guarantees shall be invalid, illegal or unenforceable, the validity, legality and enforceability of the remaining provisions of each of this Indenture, the Notes or the Guarantees shall not in any way be affected or impaired thereby.

Section 1.10. Benefits of Indenture.

Nothing in this Indenture or in the Notes, express or implied, shall give to any Person, other than the parties hereto and their successors hereunder and the Holders of Notes, any benefit or any legal or equitable right, remedy or claim under this Indenture, the Notes or the Guarantees.

Section 1.11. Governing Law.

THIS INDENTURE, THE NOTES AND THE GUARANTEES SHALL BE GOVERNED BY, AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF NEW YORK, without regard to conflicts of laws principles thereof. For the purposes of paragraph 2 of article 9 of the Brazilian Decree-Law No. 4,567, dated September 4, 1942, as amended, the Trustee shall be deemed the “proponent” of the transactions contemplated by this Indenture. Articles 470-1 through 470-19 of the Luxembourg law dated August 10, 1915 on commercial companies, as amended, which set the provisions related to the representation of the Holders of the Notes, are not applicable to the Notes or the Guarantees.

EACH OF THE PARTIES HERETO, AND EACH HOLDER BY ITS ACCEPTANCE OF A NOTE, HEREBY IRREVOCABLY WAIVES, TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, ANY AND ALL RIGHT TO TRIAL BY JURY IN ANY LEGAL PROCEEDING ARISING OUT OF OR RELATING TO THIS INDENTURE, THE NOTES OR THE TRANSACTION CONTEMPLATED HEREBY.

Section 1.12. Legal Holidays.

In any case where any Interest Payment Date, Redemption Date or Stated Maturity of any Note shall not be a Business Day, then (notwithstanding any other provision of this Indenture, the Notes or the Guarantees) payment of interest or principal (and premium, if any) need not be made on such date, but may be made on the next succeeding Business Day with the same force and effect as if made on the Interest Payment Date or Redemption Date, or at the Stated Maturity, provided that no interest shall accrue on account of such delay for the period from and after such Interest Payment Date or Redemption Date or Stated Maturity, as the case may be.

Section 1.13. Consent to Jurisdiction and Service of Process.

(a) Each of the Issuer and the Guarantors agrees that any suit, action or proceeding against it brought by any Holder or the Trustee arising out of or based upon this Indenture, the Notes or the Guarantees may be instituted in any state or Federal court in the Borough of Manhattan in The City of New York, New York, and waives any objection which it may now or hereafter have to the laying of venue of any such proceeding, and irrevocably submits to the non-exclusive jurisdiction of such courts in any suit, action or proceeding.

(b) By the execution and delivery of this Indenture or any amendment or supplement hereto, each of the Issuer and the Guarantors (i) acknowledges that it has, by separate written instrument, designated and appointed Cogency Global Inc. currently located at 122 East 42nd Street, 18th Floor, New York, NY 10168, as its authorized agent upon which process may be served in any suit, action or proceeding with respect to, arising out of, or relating to, the Notes,

this Indenture or the Guarantees, that may be instituted in any Federal or state court in the State of New York, The City of New York, the Borough of Manhattan, or brought under Federal or state securities laws or brought by the Trustee or the Paying Agent (whether in its individual capacity or in its capacity as Trustee or the Paying Agent, as the case may be, hereunder), and acknowledges that Cogency Global Inc. has accepted such designation, (ii) submits to the jurisdiction of any such court in any such suit, action or proceeding, and (iii) agrees that service of process upon Cogency Global Inc. shall be deemed in every respect effective service of process upon the Issuer and the Guarantors, as the case may be, in any such suit, action or proceeding. Each of the Issuer and the Guarantors further agrees to take any and all action, including the execution and filing of any and all such documents and instruments as may be necessary to continue such designation and appointment of Cogency Global Inc. in full force and effect so long as this Indenture shall be in full force and effect; provided that the Issuer and the Guarantors may and shall (to the extent Cogency Global Inc. ceases to be able to be served on the basis contemplated herein), by written notice to the Trustee, designate such additional or alternative agents for service of process under this Section 1.13 that (i) maintains an office located in the Borough of Manhattan, The City of New York in the State of New York, (ii) are either (x) counsel for the Issuer and the Guarantors or (y) a corporate service company which acts as agent for service of process for other persons in the ordinary course of its business and (iii) agrees to act as agent for service of process in accordance with this Section 1.13. Such notice shall identify the name of such agent for process and the address of such agent for process in the Borough of Manhattan, The City of New York, State of New York. Upon the request of any Holder, the Trustee shall deliver such information to such Holder. Notwithstanding the foregoing, there shall, at all times, be at least one agent for service of process for the Issuer and the Guarantors appointed and acting in accordance with this Section 1.13.

(c) To the extent that the Issuer or the Guarantors has or hereafter may acquire any immunity from jurisdiction of any court or from any legal process (whether through service of notice, attachment prior to judgment, attachment in aid of execution, execution or otherwise) with respect to itself or its property, each of the Issuer and the Guarantors hereby irrevocably waives such immunity in respect of its obligations under this Indenture, the Notes and the Guarantees, to the fullest extent permitted by law.

Section 1.14. Currency of Account; Conversion of Currency; Foreign Exchange Restrictions.

(a) U.S. Dollars are the sole currency of account and payment for all sums payable by the Issuer and the Guarantors under or in connection with the Notes, the Guarantees or this Indenture, including damages. Any amount received or recovered in a currency other than U.S. dollars (whether as a result of, or of the enforcement of, a judgment or order of a court of any jurisdiction, in the winding-up or dissolution of the Issuer or the Guarantors or otherwise) by any Holder of the Notes in respect of any sum expressed to be due to it from the Issuer or the Guarantors shall only constitute a discharge to the Issuer or the Guarantors, as the case may be, to the extent of the U.S. dollar amount which the recipient is able to purchase with the amount so received or recovered in that other currency on the date of that receipt or recovery (or, if it is not practicable to make that purchase on that date, on the first date on which it is practicable to do so). If that U.S. dollar amount is less than the U.S. dollar amount expressed to be due to the recipient under the Notes, the Issuer and the Guarantors shall, jointly and severally, indemnify it

against any loss sustained by it as a result as set forth in Section 1.14(b). In any event, the Issuer and the Guarantors shall, jointly and severally, indemnify the recipient against the cost of making any such purchase. For the purposes of this Section 1.14, it will be sufficient for the Holder of a Note to certify in a satisfactory manner (indicating sources of information used) that it would have suffered a loss had an actual purchase of U.S. dollars been made with the amount so received in that other currency on the date of receipt or recovery (or, if a purchase of U.S. dollars on such date had not been practicable, on the first date on which it would have been practicable, it being required that the need for a change of date be certified in the manner mentioned above). The indemnities set forth in this Section 1.14 constitute separate and independent obligations from other obligations of the Issuer and the Guarantors, shall give rise to a separate and independent cause of action, shall apply irrespective of any indulgence granted by any Holder of the Notes and shall continue in full force and effect despite any other judgment, order, claim or proof for a liquidated amount in respect of any sum due under the Notes.

(b) The Issuer and the Guarantors covenant and agree that the following provisions shall apply to conversion of currency in the case of the Notes, the Guarantees and this Indenture:

(i) (A) if for the purpose of obtaining judgment in, or enforcing the judgment of, any court in any country, it becomes necessary to convert into a currency (the "judgment currency") an amount due in any other currency (the "Base Currency"), then the conversion shall be made at the rate of exchange prevailing on the Business Day before the day on which the judgment is given or the order of enforcement is made, as the case may be (unless a court shall otherwise determine), and

(B) if there is change in the rate of exchange prevailing between the Business Day before the day on which the judgment is given or an order of enforcement is made, as the case may be (or such other date as a court shall determine), and the date of receipt of the amount due, the Issuer or the Guarantors, as the case may be, will pay such additional (or, as the case may be, such lesser) amount, if any, as may be necessary so that the amount paid in the judgment currency when converted at the rate of exchange prevailing on the date of receipt will produce the amount in the Base Currency originally due;

(ii) in the event of the winding-up of the Issuer or the Guarantors at any time while any amount or damages owing under the Notes, the Guarantees and this Indenture, or any judgment or order rendered in respect thereof, shall remain outstanding, the Issuer and the Guarantors shall, jointly and severally, indemnify and hold the Holders and the Trustee harmless against any deficiency arising or resulting from any variation in rates of exchange between (1) the date as of which the U.S. Dollar Equivalent of the amount due or contingently due under the Notes, the Guarantees and this Indenture (other than under this Subsection (b)(ii)) is calculated for the purposes of such winding-up and (2) the final date for the filing of proofs of claim in such winding-up. For the purpose of this subsection (b)(ii), the final date for the filing of proofs of claim in the winding-up of the Issuer or the Guarantors, as the case may be, shall be the date fixed by the liquidator or otherwise in accordance with the relevant provisions of applicable law as being the latest practicable date as at which liabilities of the Issuer or the Guarantors, as the case may be, may be ascertained for such winding-up prior to payment by the liquidator or otherwise in respect thereto;

(iii) the obligations contained in Subsections (a), (b)(i)(B) and (b)(ii) of this Section 1.14 shall constitute separate and independent obligations from the other obligations of the Issuer and the Guarantors under the terms of this Indenture, shall give rise to separate and independent causes of action against the Issuer and the Guarantors, shall apply irrespective of any waiver or extension granted by any Holder or the Trustee or either of them from time to time and shall continue in full force and effect notwithstanding any judgment or order or the filing of any proof of claim in the winding-up of the Issuer or the Guarantors for a liquidated sum in respect of amounts due hereunder (other than under Subsection (b)(ii) above) or under any such judgment or order. Any such deficiency as aforesaid shall be deemed to constitute a loss suffered by the Holders or the Trustee, as the case may be, and no proof or evidence of any actual loss shall be required by the Issuer or the Guarantors or the liquidator or otherwise or any of them. In the case of subsection (b)(ii) above, the amount of such deficiency shall not be deemed to be reduced by any variation in rates of exchange occurring between the said final date and the date of any liquidating distribution; and

(iv) the term “rate(s) of exchange” shall mean the rate of exchange quoted by Reuters at 10:00 a.m. (New York time) for spot purchases of the Base Currency with the judgment currency other than the Base Currency referred to in Subsections (b)(i) and (b)(ii) above and includes any premiums and costs of exchange payable.

(c) In the event that on any Interest Payment Date, the Maturity Date or Redemption Date, as the case may be, in respect of the Guarantee provided by a Guarantor, any restrictions or prohibition of access to the foreign exchange market of the jurisdiction of incorporation of a Guarantor exists, such Guarantor agrees to pay all amounts payable under the Notes and such Guarantee in the currency of the Notes by means of any legal procedure existing in such jurisdiction of incorporation (except commencing legal proceedings against the relevant Central Bank), on any due date for payment under the Notes, for the purchase of the currency of such Notes. All costs and taxes payable in connection with the procedures referred to in this Section 1.14 shall be borne by the relevant Guarantor.

(d) Notwithstanding anything to the contrary contained herein, neither the Trustee nor the Principal Paying Agent shall have any liability for converting into U.S. Dollars any amount received by any Holder in a currency other than U.S. Dollars.

Section 1.15. Counterparts.

This Indenture may be executed in two or more counterparts, each of which shall be deemed to be an original, but all of which together shall constitute one and the same instrument. The words “execution,” “signed,” “signature,” and words of like import in this Indenture or in any other certificate, agreement or document related to this Indenture shall include images of manually executed signatures transmitted by facsimile or other electronic format (including, without limitation, “pdf”, “tif” or “jpg”) and other electronic signatures (including, without

limitation, DocuSign and AdobeSign). The use of electronic signatures and electronic records (including, without limitation, any contract or other record created, generated, sent, communicated, received, or stored by electronic methods) shall be of the same legal effect, validity and enforceability as a manually executed signature or use of a paper-based recordkeeping system to the fullest extent permitted by applicable law, including, without limitation, the Federal Electronic Signatures in Global and National Commerce Act, the New York State Electronic Signatures and Records Act and any other applicable law, including, without limitation, any state law based on the Uniform Electronic Transactions Act or the Uniform Commercial Code.

Section 1.16. Force Majeure.

In no event shall the Trustee or any Agent be responsible or liable for any failure or delay in the performance of its obligations hereunder arising out of or caused by, directly or indirectly, forces beyond its control, including, without limitation, strikes, work stoppages, accidents, pandemics, epidemics, acts of war or terrorism, civil or military disturbances, nuclear or natural catastrophes or acts of God, and interruptions, loss or malfunctions of utilities, communications or computer (software and hardware) services; it being understood that the Trustee or such Agent shall use reasonable efforts which are consistent with accepted practices in the banking industry to resume performance as soon as practicable under the circumstances.

Section 1.17. U.S.A. PATRIOT Act.

In order to comply with the laws, rules, regulations and executive orders in effect from time to time applicable to banking institutions, including, without limitation, those relating to the funding of terrorist activities and money laundering, including Section 326 of the USA PATRIOT Act of the United States ("Applicable Law"), the Trustee and Agents are required to obtain, verify, record and update certain information relating to individuals and entities which maintain a business relationship with the Trustee and Agents. Accordingly, each of the parties agrees to provide to the Trustee and Agents, upon their request from time to time such identifying information and documentation as may be available for such party in order to enable the Trustee and Agents to comply with Applicable Law.

Section 1.18. Anti-Money Laundering, Terrorism and Economic Sanctions.

(a) The Trustee or any Agent may take and instruct any delegate to take any action which it in its sole discretion considers appropriate so as to comply with any applicable law, regulation, request of a public or regulatory authority or any internal group policy (including any "Know Your Client" and/or other compliance policy) which relates to the prevention of fraud, money laundering, terrorism or other criminal activities or the provision of financial and other services to sanctioned persons or entities. Such action may include but is not limited to the interception and investigation of transactions on the Issuer's or any Guarantor's accounts (particularly those involving the international transfer of funds) including the source of the intended recipient of funds paid into or out of the Issuer's or any Guarantor's accounts. None of the Trustee, any Agent or any delegate will be liable for any loss (whether direct or consequential and including, without limitation, loss of profit or interest) caused in whole or in part by any actions which are taken by the Trustee, any Agent or any delegate pursuant to this Section 1.18.

(b) The Issuer and each Guarantor covenants and represents, jointly and severally, that neither it nor any of their respective subsidiaries or their respective directors or officers, and, to the knowledge of the Issuer or any Guarantor, any of their affiliates are the target or subject of any sanctions enforced by the US Government, (including, without limitation, the Office of Foreign Assets Control of the US Department of the Treasury or the US Department of State), the United Nations Security Council, the European Union, His Majesty's Treasury, or other relevant sanctions authority (collectively "Sanctions");

(c) The Issuer and each Guarantor covenants and represents, jointly and severally, that neither it nor any of their respective subsidiaries or their respective directors or officers will directly or indirectly use any repayments/reimbursements made pursuant to this Indenture, (i) to fund or facilitate any activities of or business with any person who, at the time of such funding or facilitation, is the subject or target of Sanctions, (ii) to fund or facilitate any activities of or business with any country or territory that is the target or subject of Sanctions, or (iii) in any other manner that will result in a violation of Sanctions by any Person.

Section 1.19. FATCA Reporting.

The Issuer and each Guarantor agrees that (a) if reasonably requested by the Trustee or any of the Agents and required by FATCA, in relation to a payment made under this Indenture and the Notes issued hereunder, the Issuer or the Guarantors will provide such information if and to the extent that (i) such information is reasonably necessary for each of the Trustee and the Agents to determine that it is in compliance with FATCA as relates to the payments made under this Indenture and the Notes issued hereunder and (ii) such information is reasonably available to the Issuer or the Guarantors, as applicable with regard to the Issuer or Guarantors in relation to the requirements of FATCA that are actually imposed upon such requesting Trustee or Agent, as applicable; provided, however, that neither the Issuer nor any Guarantor shall be required to provide information that it is prohibited legally from disclosing and (b) the Trustee and each applicable Agent shall be entitled to make any withholding or deduction from payments to the extent necessary to comply with FATCA, for which the Trustee and the Agents shall have no liability. The terms of this Section 1.19 shall survive the termination of this Indenture.

Section 1.20. Effective Date.

This Indenture shall become effective on the date hereof and shall be binding upon the Issuer, the Guarantors, the Trustee, the Registrar, the Paying Agent and the Principal Paying Agent.

ARTICLE II

NOTE FORMS

Section 2.1. Forms Generally.

The Notes, the Trustee's certificates of authentication thereof and the Guarantees endorsed thereon shall be substantially in the forms set forth in this Article, with such appropriate legends, insertions, omissions, substitutions and other variations as are required or permitted by this Indenture, and may have such letters, numbers or other marks of identification and such legends or endorsements placed thereon as may be required to comply with the rules of any securities exchange or as may, consistently herewith, be determined by the officers executing such Notes or Guarantees, as the case may be, as evidenced by their execution of the Notes.

The definitive Notes and the Guarantees to be endorsed thereon shall be printed, lithographed or engraved or produced by any combination of these methods on steel engraved borders or may be produced in any other manner all as determined by the officers executing such Notes, as evidenced by their execution of such Notes or Guarantees, as the case may be.

In certain cases described elsewhere herein, the legends set forth in the first three paragraphs of Section 2.2 may be omitted from Notes issued hereunder.

Notes offered and sold in their initial distribution in reliance on Regulation S will be initially issued in the form of one or more Global Notes in fully registered form without interest coupons, substantially in the form of Note set forth in Section 2.2 and 2.3 (the "Regulation S Global Note"), which shall be registered in the name of the Depositary or its nominee and deposited with the Trustee, at its Corporate Trust Office, as custodian for the Depositary, duly executed by the Issuer and the Guarantors and authenticated by the Trustee as hereinafter provided, for credit by the Depositary to the respective accounts of the beneficial owners of the Notes represented thereby (or such other accounts as they may direct).

Notes offered and sold in their initial distribution in reliance on Rule 144A shall be issued in the form of one or more Global Notes (collectively, and, together with their Successor Notes, the "Restricted Global Note") in fully registered form without interest coupons, substantially in the form of Note set forth in Section 2.2 and 2.3, with such applicable legends as are provided for in Section 2.2, except as otherwise permitted herein. Such Restricted Global Note shall be registered in the name of the Depositary or its nominee and deposited with the Trustee, at its Corporate Trust Office, as custodian for the Depositary, duly executed by the Issuer and the Guarantors and authenticated by the Trustee as hereinafter provided, for credit by the Depositary to the respective accounts of beneficial owners of the Notes represented thereby (or such other accounts as they may direct). The aggregate principal amount of the Restricted Global Note may be increased or decreased from time to time by adjustments made on the records of the Trustee, as custodian for the Depositary, in connection with a corresponding decrease or increase in the aggregate principal amount of the Regulation S Global Note, as hereinafter provided.

Section 2.2. Form of Face of Note

[Include if Note is a Restricted Global Note — THIS NOTE (OR ITS PREDECESSOR) WAS ORIGINALLY ISSUED IN A TRANSACTION EXEMPT FROM REGISTRATION UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED, OR THE SECURITIES ACT, AND THIS NOTE MAY NOT BE REOFFERED, SOLD OR

OTHERWISE TRANSFERRED IN THE ABSENCE OF SUCH REGISTRATION OR AN APPLICABLE EXEMPTION THEREFROM. EACH PURCHASER OF THIS NOTE IS HEREBY NOTIFIED THAT THE SELLER OF THIS NOTE MAY BE RELYING ON THE EXEMPTION FROM THE PROVISIONS OF SECTION 5 OF THE SECURITIES ACT PROVIDED BY RULE 144A THEREUNDER. THE HOLDER OF THIS NOTE AGREES FOR THE BENEFIT OF THE ISSUER OR ANY SUBSIDIARY THAT (A) THIS NOTE MAY BE REOFFERED, RESOLD, PLEDGED OR OTHERWISE TRANSFERRED, ONLY (I) TO A PERSON WHOM THE SELLER REASONABLY BELIEVES IS A QUALIFIED INSTITUTIONAL BUYER (AS DEFINED IN RULE 144A UNDER THE SECURITIES ACT) IN A TRANSACTION MEETING THE REQUIREMENTS OF RULE 144A, (II) OUTSIDE THE UNITED STATES TO A PERSON THAT IS NOT A U.S. PERSON IN AN OFFSHORE TRANSACTION IN ACCORDANCE WITH RULE 904 UNDER THE SECURITIES ACT, (III) PURSUANT TO ANOTHER AVAILABLE EXEMPTION UNDER THE SECURITIES ACT, (IV) TO THE ISSUER OR ANY SUBSIDIARY OF THE ISSUER OR (V) PURSUANT TO AN EFFECTIVE REGISTRATION STATEMENT UNDER THE SECURITIES ACT, IN EACH OF CASES (I) THROUGH (V) IN ACCORDANCE WITH ANY APPLICABLE SECURITIES LAWS OF ANY STATE OF THE UNITED STATES; AND (B) THE HOLDER WILL, AND EACH SUBSEQUENT HOLDER IS REQUIRED TO, NOTIFY ANY PURCHASER OF THIS NOTE FROM IT OF THE RESALE RESTRICTIONS REFERRED TO IN (A) ABOVE. THIS LEGEND MAY ONLY BE REMOVED AT THE OPTION OF THE ISSUER.]

[Include if Note is a Regulation S Global Note — THIS NOTE (OR ITS PREDECESSOR) WAS ORIGINALLY ISSUED IN A TRANSACTION EXEMPT FROM REGISTRATION UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED, OR THE SECURITIES ACT, AND MAY NOT BE TRANSFERRED IN THE UNITED STATES OR TO, OR FOR THE ACCOUNT OR BENEFIT OF, ANY U.S. PERSON EXCEPT PURSUANT TO AN AVAILABLE EXEMPTION FROM THE REGISTRATION REQUIREMENTS OF THE SECURITIES ACT AND ALL APPLICABLE STATE SECURITIES LAWS. TERMS USED ABOVE HAVE THE MEANINGS GIVEN TO THEM IN REGULATION S UNDER THE SECURITIES ACT.]

Nexa Resources S.A., a validly organized public limited liability company validly organized under the laws of the Grand Duchy of Luxembourg having its registered office at 37A Avenue J.F. Kennedy, L-1855, Luxembourg, Grand Duchy of Luxembourg and registered with the *Registre de Commerce et des Sociétés* in Luxembourg under number B 185.489 (herein called the “Issuer,” which term includes any successor Person under the Indenture hereinafter referred to), for value received, hereby promises to pay to Cede & Co. or its registered assigns, the principal sum of Dollars [include if Note is a Global Note — (or such other Principal Sum as is noted in the records of the Custodian for the Depositary as being the Principal Amount of this Regulation S Global Note/Restricted Global Note for the time being)] on April 9, 2034, and to pay interest thereon from April 9, 2024, or from the most recent Interest Payment Date to which interest has been paid or duly provided for, semi-annually on April 9 and October 9 in each year, commencing on October 9, 2024, at the rate of 6.750% per annum, until the principal hereof is paid or made available for payment. The interest so payable, and punctually paid or duly provided for, on any Interest Payment Date will, as provided in such Indenture, be paid to the Person in whose name this Note (or one or more Predecessor Notes) is registered at the close of business on the Record Date for such interest, which shall be two calendar days prior to payment (whether or not a Business Day), as the case may be, next preceding such Interest Payment Date. Any such interest not so punctually paid or duly provided for will forthwith cease to be payable to the Holder on such Record Date and may either be paid to the Person in whose name this Note (or one or more Predecessor Notes) is registered at the close of business on a Special Record Date for the payment of such Defaulted Interest to be fixed by the Trustee, notice whereof shall be given to Holders of Notes not less than 10 days prior to such Special Record Date, or be paid at any time in any other lawful manner not inconsistent with the requirements of any securities exchange on which the Notes may be listed, and upon such notice as may be required by such exchange, all as more fully provided in said Indenture. In addition, the Issuer will pay to the Holder of this Note such Additional Amounts as may become payable under Section 11.9 of the Indenture.

In the case of a default in payment of principal and premium, if any, upon acceleration or repayment, interest shall be payable pursuant to the preceding paragraph on such overdue principal (and premium, if any), such interest shall be payable on demand and, if not so paid on demand, such interest shall itself bear interest at the rate per annum stated above plus 1% (to the extent that the payment of such interest shall be legally enforceable), and shall accrue from the date such principal and/or premium, as the case may be, was due and payable to the date payment of such interest has been made or duly provided for, and such interest on unpaid interest shall also be payable on demand.

Payment of the principal of (and premium, if any) and interest on this Note will be made at the Corporate Trust Office of the Trustee, at the offices of a Paying Agent, at the office or agency of the Issuer maintained for that purpose in The City of New York, New York, and at any other office or agency maintained by the Issuer for such purpose, in such coin or currency of the United States as at the time of payment is legal tender for payment of public and private debts; provided, however, that at the option of the Issuer payment of interest may be made by check mailed to the address of the Person entitled thereto as such address shall appear in the Note Register.

Reference is hereby made to the further provisions of this Note set forth on the reverse hereof, which further provisions shall for all purposes have the same effect as if set forth at this place.

Unless the certificate of authentication hereon has been executed by the Trustee referred to on the reverse hereof by manual or electronic signature, this Note shall not be entitled to any benefit under the Indenture or be valid or obligatory for any purpose.

IN WITNESS WHEREOF, the Issuer has caused this instrument to be duly executed.

Section 2.3. Form of Reverse of Note.

This Note is one of a duly authorized issue of Notes of the Issuer designated as its 6.750% Senior Unsecured Notes due 2034 (the “Notes”) issued under an Indenture, dated as of April 9, 2024 (herein called the “Indenture”), among the Issuer, the Guarantors named therein, and The Bank of New York Mellon, a New York banking corporation, as trustee (the “Trustee”), as principal paying agent (the “Principal Paying Agent”) and any other paying agents to be appointed hereunder, the “Paying Agents”), as transfer agent (the “Transfer Agent”) and registrar (the “Registrar”). Reference is hereby made to the Indenture and all indentures supplemental thereto for a statement of the respective rights, limitations of rights, duties and immunities thereunder of the Issuer, the Guarantors, the Trustee, the Transfer Agent and the Notes are, and are to be, authenticated and delivered. Terms used but not defined in this Note are defined in the Indenture.

As provided in the Indenture and subject to certain limitations therein set forth, the obligations of the Issuer under the Indenture and this Note are guaranteed pursuant to the Guarantees set forth in the Indenture. Each Holder, by holding this Note, agrees to all of the terms and provisions of said Guarantees. Reference is hereby made to the Indenture for a statement of the respective rights, limitations of rights, duties and obligations thereunder of the Guarantors, the Trustee and the Holders.

The Issuer may from time to time, without the consent of the Holders of the Notes, create and issue Additional Notes having the same terms and conditions as the Initial Notes in all respects, except that the issue date, the issue price and the first payment of interest thereon may differ; provided, however, that unless the Additional Notes are treated as part of the same “issue” of debt instruments as the Initial Notes or are issued pursuant to a “qualified reopening” of the Initial Notes, or are issued with less than a *de minimis* amount of original issue discount, in each case for U.S. federal income tax purposes, the Additional Notes will have a separate CUSIP or ISIN number (as applicable). Additional Notes shall be consolidated with and shall form a single series and vote together with the previously issued Notes for all purposes under the Indenture.

If as a result of any Change of Law (as defined in the Indenture): (i) the Issuer or a Guarantor is or would be required on the next succeeding Interest Payment Date to pay any Additional Amounts referred to in Section 11.9 of the Indenture in excess of the Additional Amounts that the Issuer or such Guarantor, as the case may be, would pay if payments in respect of the Notes were subject to deduction or withholding for Taxes imposed by the applicable taxing jurisdiction at the rate applicable on the Issue Date; or (ii) the issuers/borrowers of certain intercompany debt are or would be required on the next succeeding interest payment date to pay Brazilian withholding taxes in excess of a general rate of 15%, or 25% in case of amounts paid to residents of countries or locations which do not impose any income tax or which impose it at a maximum rate lower than 17% or where the laws of that country or location impose restrictions on the disclosure (x) of shareholding composition; (y) of the ownership of the investment; or (z) to the identification of the beneficial owner of income attributed to non-resident persons, pursuant to article 8 of Law No. 9,779, of January 19, 1999, and articles 24 and 24-A of Law No. 9,430, of December 27, 1996; provided that, such requirement to pay such taxes in excess of such rate was not caused by, or otherwise the result of, whether directly or indirectly, wholly or in part, any amendment to the intercompany debt, and in either case, the payment of such excess

amounts cannot be avoided by the use of any reasonable measures available to the Issuer or a Guarantor, the Notes may be redeemed, by the Issuer at the option of the Issuer or a Guarantor, in whole but not in part, upon not less than 30 nor more than 90 days' notice to the Holders, which notice will be published, at any time following such Change of Law at a Redemption Price equal to the principal amount thereof, plus accrued and unpaid interest, if any, to the date fixed for redemption. The Issuer, any Guarantor or any of their respective Affiliates will also pay to Holders of the Notes on the Redemption Date any Additional Amounts which are payable.

Following such redemption, the Notes will be cancelled, or remain Outstanding, at the Issuer's or a Guarantor's election. Prior to the delivery of any notice of redemption in accordance with the foregoing, the Issuer or a Guarantor shall deliver to the Trustee and the Agents an Officer's Certificate stating that the Issuer or a Guarantor, as the case may be, is entitled to effect such redemption based on an Opinion of Counsel or written advice of a qualified tax expert, that the Issuer or a Guarantor has or will become obligated to pay such excess amounts with respect to Taxes as a result of such Change of Law. Such notice, once delivered by the Issuer or a Guarantor to the Trustee, will be irrevocable.

At any time before January 9, 2034 (which is the date that is three months prior to maturity of the notes (the "Par Call Date")), the Issuer or a Guarantor has the right to redeem the Notes, in whole or in part and from time to time, at a Redemption Price equal to the greater of (1) 100% of the principal amount of the Notes being redeemed and (2) the sum of the present values of the remaining scheduled payments of principal and interest on the Notes being redeemed that would be due if the Notes matured on the Par Call Date (inclusive of interest accrued to the redemption date), discounted to the Redemption Date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Treasury Rate plus 40 basis points, less interest accrued to, but excluding, the Redemption Date; plus, in either case, accrued and unpaid interest on the principal amount of the Notes being redeemed and Additional Amounts, if any, to, but excluding, the Redemption Date (subject to the right of Holders of record on the relevant Record Date to receive interest due on the relevant Interest Payment Date).

At any time on or after the Par Call Date, the Issuer or a Guarantor has the right to redeem the Notes, in whole or in part and from time to time, at a Redemption Price equal to 100% of the principal amount of the Notes being redeemed plus accrued and unpaid interest on the principal amount of the Notes being redeemed to, but excluding, such Redemption Date (subject to the right of Holders of record on the relevant Record Date to receive interest due on the relevant Interest Payment Date).

The "Treasury Rate" shall be determined by the Issuer or a Guarantor after 4:15 p.m., New York City time (or after such time as yields on U.S. government securities are posted daily by the Board of Governors of the Federal Reserve System), on the third Business Day preceding the Redemption Date based upon the yield or yields for the most recent day that appear after such time on such day in the most recent statistical release published by the Board of Governors of the Federal Reserve System designated as "Selected Interest Rates (Daily) - H.15" (or any successor designation or publication) ("H.15") under the caption "U.S. government securities-Treasury constant maturities-Nominal" (or any successor caption or heading). In determining the Treasury Rate, the Issuer or a Guarantor shall select, as applicable: (i) the yield for the Treasury constant maturity on H.15 exactly equal to the period from the redemption date to the Par Call

Date (the “Remaining Life”); or (ii) if there is no such Treasury constant maturity on H.15 exactly equal to the Remaining Life, the two yields – one yield corresponding to the Treasury constant maturity on H.15 immediately shorter than and one yield corresponding to the Treasury constant maturity on H.15 immediately longer than the Remaining Life – and shall interpolate to the Par Call Date on a straight-line basis (using the actual number of days) using such yields and rounding the result to three decimal places; or (iii) if there is no such Treasury constant maturity on H.15 shorter than or longer than the Remaining Life, the yield for the single Treasury constant maturity on H.15 closest to the Remaining Life. For purposes of this paragraph, the applicable Treasury constant maturity or maturities on H.15 shall be deemed to have a maturity date equal to the relevant number of months or years, as applicable, of such Treasury constant maturity from the Redemption Date.

If on the third Business Day preceding the Redemption Date H.15 or any successor designation or publication is no longer published, the Issuer or a Guarantor shall calculate the Treasury Rate based on the rate per annum equal to the semi-annual equivalent yield to maturity at 11:00 a.m., New York City time, on the second Business Day preceding such redemption date of the United States Treasury security maturing on, or with a maturity that is closest to, the Par Call Date, as applicable. If there is no United States Treasury security maturing on the Par Call Date but there are two or more United States Treasury securities with a maturity date equally distant from the Par Call Date, one with a maturity date preceding the Par Call Date and one with a maturity date following the Par Call Date, the Issuer or a Guarantor shall select the United States Treasury security with a maturity date preceding the Par Call Date. If there are two or more United States Treasury securities maturing on the Par Call Date or two or more United States Treasury securities meeting the criteria of the preceding sentence, the Issuer or the Guarantor shall select from among these two or more United States Treasury securities the United States Treasury security that is trading closest to par based upon the average of the bid and asked prices for such United States Treasury securities at 11:00 a.m., New York City time. In determining the Treasury Rate in accordance with the terms of this paragraph, the semi-annual yield to maturity of the applicable United States Treasury security shall be based upon the average of the bid and asked prices (expressed as a percentage of principal amount) at 11:00 a.m., New York City time, of such United States Treasury security, and rounded to three decimal places.

The Issuer or a Guarantor’s actions and determinations in determining the Redemption Price shall be conclusive and binding for all purposes, absent manifest error.

The Issuer, any Guarantor or any of their respective Affiliates may at any time repurchase the Notes at any price in the open market or otherwise. The Issuer, any Guarantor or any of their respective Affiliates may hold or resell the Notes it purchases or may surrender them to the Trustee or an Agent for cancellation.

Optional Clean-up Redemption. Notwithstanding the foregoing, in connection with any tender offer for the notes (including an Offer to Purchase in connection with a Change of Control that results in a Rating Decline made in accordance with the terms of the Indenture), in the event that the Holders of not less than 85% of the aggregate principal amount of the outstanding Notes validly tender and do not validly withdraw Notes in such tender offer and the Issuer, or any other Person making such offer in lieu of the Issuer, purchases all of the Notes validly tendered and not

validly withdrawn by such Holders, then the Issuer or the Guarantor will have the right, on not less than 10 nor more than 60 days' prior notice to the Holders (with a copy to the Trustee), to redeem all of the Notes that remain outstanding at a Redemption Price equal to the purchase price paid to each other Holder in such tender offer plus, to the extent not included in the purchase price, accrued and unpaid interest and Additional Amounts, if any, on the Notes that remain outstanding, to, but excluding, the Redemption Date.

[Include if Note is a Regulation S Global Note — If the holder of a beneficial interest in this Regulation S Global Note at any time wishes to transfer such interest to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Restricted Global Note, such transfer may be effected, subject to the rules and procedures of the Depositary, Euroclear and Clearstream, in each case to the extent applicable and as in effect from time to time, only in accordance with the terms of this paragraph. Upon receipt by the Trustee, as Registrar, of (A) written instructions given by or on behalf of the Depositary in accordance with the rules and procedures of the Depositary, Euroclear and Clearstream, in each case to the extent applicable and as in effect from time to time directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Restricted Global Note in a specified principal amount and to cause to be debited from another specified Agent Member's account a beneficial interest in this Regulation S Global Note in an equal principal amount; and (B) a certificate in substantially the form set forth in Exhibit B to the Indenture signed by or on behalf of the Agent Member holding such beneficial interest in this Regulation S Global Note, the Trustee, as Registrar, shall reduce the principal amount of this Regulation S Global Note and increase the principal amount of the Restricted Global Note by such specified principal amount.]

[Include if Note is a Restricted Global Note — If the holder of a beneficial interest in this Restricted Global Note wishes at any time to transfer such interest to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Regulation S Global Note, such transfer may be effected, subject to the rules and procedures of the Depositary, Euroclear and Clearstream, in each case to the extent applicable and as in effect from time to time, only in accordance with the terms of this paragraph. Upon receipt by the Trustee, as Registrar of:

(A) written instructions given by or on behalf of the Depositary in accordance with the rules and procedures of the Depositary, Euroclear and Clearstream, in each case to the extent applicable and as in effect from time to time directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Regulation S Global Note in a specified principal amount and to cause to be debited from another specified Agent Member's account a beneficial interest in the Restricted Global Note in an equal principal amount; and

(B) a certificate in substantially the form set forth in Exhibit A of the Indenture signed by or on behalf of the Agent Member holding such beneficial interest in this Restricted Global Note,

the Trustee, as Registrar, shall reduce the principal amount of this Restricted Global Note, and increase the principal amount of the Regulation S Global Note by such specified principal amount.]

The Notes do not have the benefit of any sinking fund obligations.

In the event of redemption or purchase of this Note in part only, a new Note or Notes of like tenor for the unredeemed or unpurchased portion hereof will be issued in the name of the Holder hereof upon the cancellation hereof.

If an Event of Default shall occur and be continuing, the principal of all the Notes may be declared due and payable in the manner and with the effect provided in the Indenture.

The Indenture contains provisions for defeasance at any time of (i) the entire indebtedness of this Note, or (ii) certain restrictive covenants and Events of Default with respect to this Note, in each case upon compliance with certain conditions set forth therein.

Unless the context otherwise requires, the Notes shall constitute one series for all purposes under the Indenture, including without limitation, amendments, waivers or redemption.

The Indenture permits, with certain exceptions as therein provided, the amendment thereof and the modification of the rights and obligations of the Issuer and the Guarantors and the rights of the Holders of the Notes under the Indenture at any time by the Issuer and the Trustee with the consent of the Holders of a majority in aggregate principal amount of the Notes at the time Outstanding. The Indenture also contains provisions permitting the Holders of specified percentages in aggregate principal amount of the Notes at the time Outstanding, on behalf of the Holders of all the Notes, to waive compliance by the Issuer or the Guarantors with certain provisions of the Indenture and certain past defaults under the Indenture and their consequences.

Any such consent or waiver by the Holder of this Note shall be conclusive and binding upon such Holder and upon all future Holders of this Note and of any Note issued upon the registration of transfer hereof or in exchange herefor or in lieu hereof, whether or not notation of such consent or waiver is made upon this Note.

No reference herein to the Indenture and no provision of this Note or of the Indenture shall alter or impair the obligation of the Issuer, which is absolute and unconditional, to pay the principal of (and premium, if any) and interest on this Note at the times, place and rate, and in the coin or currency, herein prescribed.

As provided in the Indenture and subject to certain limitations therein set forth, the transfer of this Note is registrable in the Note Register, upon surrender of this Note for registration of transfer at the office or agency of the Issuer in the Borough of Manhattan, The City of New York, New York, or of any of the Transfer Agents duly endorsed by, or accompanied by a written instrument of transfer in form satisfactory to the Issuer duly executed by, the Holder hereof or his attorney duly authorized in writing, and thereupon one or more new Notes, of authorized denominations and like tenor and for the same aggregate principal amount, will be issued to the designated transferee or transferees.

The Notes are issuable only in registered form without coupons in minimum denominations of U.S.\$200,000 and integral multiples of U.S.\$1,000 in excess thereof. As provided in the Indenture and subject to certain limitations therein set forth, Notes are exchangeable for a like tenor and aggregate principal amount of Notes of a different authorized denomination, as requested by the Holder surrendering the same.

No service charge shall be made for any such registration of transfer or exchange, but the Issuer or the Trustee may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection therewith, other than for any transfer or exchange pursuant to Section 3.4, 10.5 or 11.5 of the Indenture.

Prior to due presentment of this Note for registration of transfer, the Issuer, the Trustee, the Transfer Agents and any agent of the Issuer or the Trustee may treat the Person in whose name this Note is registered as the owner hereof for all purposes, whether or not this Note be overdue, and none of the Issuer, the Trustee or any such agent shall be affected by notice to the contrary.

Interest on this Note shall be computed on the basis of a 360-day year of twelve 30-day months each and, in the case of an incomplete month, on the number of days elapsed based on a 30-day month.

All terms used in this Note which are defined in the Indenture shall have the meanings assigned to them in the Indenture.

THE INDENTURE, THIS NOTE AND THE GUARANTEES SHALL BE GOVERNED BY, AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF NEW YORK, without regard to conflicts of laws principles thereof. For the purposes of paragraph 2 of article 9 of the Brazilian Decree-Law No. 4,567, dated September 4, 1942, as amended, the Trustee shall be deemed the “proponent” of the transactions contemplated by the Indenture. Articles 84 through 94-8 of the Luxembourg law dated August 10, 1915 on commercial companies, as amended, which set the provisions related to the representation of the Holders of the Notes, are not applicable to the Notes or the Guarantees.

The Issuer and the Guarantors agree that any suit, action or proceeding against any of them brought by any Holder or the Trustee arising out of or based upon this Indenture, the Notes or the Guarantees may be instituted in any state or Federal court in The City of New York, New York, and waive any objection which any of them may now or hereafter have to the laying of venue of any such proceeding, and irrevocably submits to the non-exclusive jurisdiction of such courts in any suit, action or proceeding.

The Issuer may change any Paying Agent, the Registrar or Transfer Agent; provided that the Issuer will maintain an office or agency where the Notes may be presented or surrendered for payment and for registration of transfer in the Borough of Manhattan, The City of New York. Upon any such change, the Issuer shall give written notice thereof to the Trustee, the Principal Paying Agent and the Holders.

U.S. dollars are the sole currency of account and payment for all sums payable by the Issuer and the Guarantors under or in connection with the Notes, the Guarantees or the Indenture, including damages. The Issuer and the Guarantors have agreed that the provisions of Section 1.14 of the Indenture shall apply to conversion of currency in the case of the Notes, the Guarantees and the Indenture. Among other things, Section 1.14 specifies that if there is a

change in the rate of exchange prevailing between the Business Day before the day on which a judgment is given or an order of enforcement is made, as the case may be (or such other date as a court shall determine), and the date of receipt of the amount due, the Issuer or the relevant Guarantor, as the case may be, will pay such additional (or, as the case may be, such lesser) amount, if any, as may be necessary so that the amount paid in the judgment currency when converted at the rate of exchange prevailing on the date of receipt will produce the amount in the Base Currency originally due.

Each of the Issuer and the Guarantors has appointed Cogency Global Inc., currently located at 122 East 42nd Street, 18th Floor, New York, NY 10168, as its authorized agent upon which process may be served in any suit, or proceeding with respect to, arising out of, or relating to, this Note, the Indenture or the Guarantees, that may be instituted in any Federal or state court in the State of New York, The City of New York, the Borough of Manhattan, or brought under Federal or state securities laws and has agreed that there shall, at all times, be at least one agent for service of process for the Issuer and the Guarantors appointed and acting in accordance with the provisions of Section 1.13 of the Indenture relating to agent for service of process. To the extent that the Issuer or the Guarantors has or hereafter may acquire any immunity from jurisdiction of any court or from any legal process (whether through service of notice, attachment prior to judgment, attachment in aid of execution, execution or otherwise) with respect to itself or its property, each of the Issuer and the Guarantors has irrevocably waived such immunity in respect of its obligations under the Indenture, this Note and the Guarantees, to the fullest extent permitted by law.

Section 2.4. Form of Trustee's Certificate of Authentication.

This is one of the Notes with the Guarantees referred to in the within-mentioned Indenture.

ARTICLE III

THE NOTES

Section 3.1. Title and Terms.

On the Issue Date, the Trustee shall authenticate and deliver U.S.\$600,000,000 aggregate principal amount of 6.750% Senior Unsecured Notes due 2034. The Issuer may from time to time, without the consent of the Holders of the Notes, create and issue Additional Notes having the same terms and conditions as the Initial Notes in all respects, except that the issue date, the issue price and the first payment of interest thereon may differ; provided, however, that unless the Additional Notes are treated as part of the same “issue” of debt instruments as the Initial Notes or are issued pursuant to a “qualified reopening” of the Initial Notes, or are issued with less than a *de minimis* amount of original issue discount, in each case for U.S. federal income tax purposes, the Additional Notes will have a separate CUSIP or ISIN number (as applicable). Any Additional Notes shall be consolidated with and shall form a single series and vote together with the previously issued Notes for all purposes under this Indenture.

The Notes shall be known and designated as the “6.750% Senior Unsecured Notes due 2034” of the Issuer. The Stated Maturity of the Notes shall be April 9, 2034. The Notes shall bear interest at the rate of 6.750% per annum, from April 9, 2024 or from the most recent Interest Payment Date thereafter to which interest has been paid or duly provided for, as the case may be, payable semiannually in arrears on April 9 and October 9, commencing on October 9, 2024, until the principal thereof is paid or made available for payment.

In the case of a default in payment of principal and premium, if any, upon acceleration or redemption, interest (and Additional Amounts, if any) shall be payable pursuant to the second paragraph of this Section 3.1 on such overdue principal (and premium, if any), such interest shall be payable on demand and, if not so paid on demand, such interest shall itself bear interest at the rate per annum stated in the form of security contained herein plus 1% per annum (to the extent that the payment of such interest shall be legally enforceable), and shall accrue from the date such principal and/or premium, as the case may be, was due and payable to the date payment of such interest (and Additional Amounts, if any) has been made or duly provided for, and such interest on unpaid interest shall also be payable on demand.

The principal of and premium, if any, and interest on the Notes shall be payable at the Corporate Trust Office, the office of the Paying Agents and at any other office or agency maintained by the Issuer for such purpose; provided, however, that at the option of the Issuer upon five (5) Business Days’ notice to the applicable Paying Agent, payment of interest may be made by check mailed to the address of the Person entitled thereto as such address shall appear in the Note Register.

The Notes shall be redeemable or repurchasable as provided in Article XI. The Notes shall not have the benefit of any sinking fund obligations.

The Notes shall be subject to defeasance at the option of the Issuer as provided in Article XII.

Unless the context otherwise requires, the Notes shall constitute one series for all purposes under this Indenture, including, without limitation, amendments, waivers or redemptions

Section 3.2. Denominations.

The Notes are issuable only in fully registered form, without coupons, in a minimum denomination of U.S.\$200,000 and integral multiples of U.S.\$1,000 in excess thereof.

Section 3.3. Execution, Authentication, Delivery and Dating.

The Notes shall be executed on behalf of the Issuer by an authorized signatory or authorized signatories of the Issuer. The signature of any signatory on the Notes may be manual, electronic or facsimile.

Notes bearing the manual, electronic or facsimile signatures of individuals who were at any time the proper officers of the Issuer shall bind the Issuer, notwithstanding that such individuals or any of them have ceased to hold such offices prior to the authentication and delivery of such Notes or did not hold such offices at the date of such Notes.

At any time and from time to time after the execution and delivery of this Indenture, the Issuer may deliver Notes executed by the Issuer and having endorsed (by attachment or imprint) thereon the Guarantees executed as provided in Section 14.2 by the Guarantors, to the Trustee for authentication, together with an Issuer Order for the authentication and delivery of such Notes; and the Trustee in accordance with such Issuer Order shall authenticate and deliver such Notes as in this Indenture provided and not otherwise.

Each Note shall be dated the date of its authentication.

No Note or Guarantee shall be entitled to any benefit under this Indenture or be valid or obligatory for any purpose unless there appears on such Note a certificate of authentication substantially in the form provided for herein executed by the Trustee by manual or electronic signature, and such certificate upon any Note shall be conclusive evidence, and the only evidence, that such Note has been duly authenticated and delivered hereunder and that the Guarantees referred to therein have been duly executed and delivered hereunder.

Section 3.4. Global Notes; Registration, Registration of Transfer and Exchange.

(a) *Global Notes.* The provisions of clauses (1) through (7) below shall apply only to Global Notes:

(1) each Global Note authenticated under this Indenture shall be registered in the name of the Depositary or a nominee thereof and delivered to the Depositary or a nominee thereof or custodian therefor, and each such Global Note shall constitute a single Note for all purposes of this Indenture;

(2) notwithstanding any other provision in this Indenture, no Global Note may be exchanged in whole or in part for Notes registered, and no transfer of a Global Note in

whole or in part may be registered, in the name of any Person other than the Depositary or a nominee thereof unless (A) the Depositary (i) has notified the Issuer that it is unwilling or unable to continue as Depositary for such Global Note and the Issuer thereupon fails to appoint a successor Depositary or (ii) has ceased to be a clearing agency registered under the Exchange Act, (B) the Issuer, at its option, notifies the Trustee in writing that it elects to cause the issuance of the Notes in definitive registered certificated form, or (C) an Event of Default has occurred and is continuing and the Registrar has received a written request from a beneficial owner of the Notes through an Agent Member to issue its proportionate interest in the Global Note in certificated form;

(3) if any Global Note is to be exchanged for other Notes or cancelled in whole, it shall be surrendered by or on behalf of the Depositary or its nominee to the Trustee, as Registrar, for exchange or cancellation as provided in this Article III. If any Global Note is to be exchanged for other Notes or cancelled in part, or if another Note is to be exchanged in whole or in part for a beneficial interest in any Global Note, such Global Note shall be so surrendered for exchange or cancellation as provided in this Article III or, if the Trustee is acting as custodian for the Depositary or its nominee (or is party to a similar arrangement) with respect to such Global Note, the principal amount thereof shall be reduced or increased by an amount equal to the portion thereof to be so exchanged or cancelled, or the principal amount of such other Note to be so exchanged for a beneficial interest therein, as the case may be, in each case by means of an appropriate adjustment made on the records of the Trustee, whereupon the Trustee, in accordance with the Applicable Procedures, shall instruct the Depositary or its authorized representatives to make a corresponding adjustment to its records (including by crediting or debiting any Agent Member's account as necessary to reflect any transfer or exchange of a beneficial interest pursuant to Section 3.4(c)). Upon any such surrender or adjustment of a Global Note, the Trustee shall, subject to Section 3.4(a)(2) and as otherwise provided in this Article III, authenticate and deliver any Notes issuable in exchange for such Global Note (or any portion thereof) to or upon the order of, and registered in such names as may be directed by, the Depositary or its authorized representative. Upon the request of the Trustee in connection with the occurrence of any of the events specified in the preceding paragraph, the Issuer shall promptly make available to the Trustee a reasonable supply of Notes that are not in the form of Global Notes. The Trustee shall be entitled to conclusively rely upon any order, direction or request of the Depositary or its authorized representative which is given or made pursuant to this Article III if such order, direction or request is given or made in accordance with the Applicable Procedures;

(4) every Note authenticated and delivered upon registration of transfer of, or in exchange for or in lieu of, a Global Note or any portion thereof, whether pursuant to this Article III or Section 10.5 or otherwise, shall be authenticated and delivered in the form of, and shall be, a Global Note, unless such Note is registered in the name of a Person other than the Depositary or a nominee thereof;

(5) none of the Issuer, the Guarantors, the Trustee, any agent of the Trustee, any Paying Agent or the Registrar will have any responsibility or liability for any aspect of the Depositary's records (or the records of the participant of such Depositary) relating to or payments made on account of beneficial ownership interests of a Global Note or for maintaining, supervising or reviewing any records of the Depositary relating to such beneficial ownership interests;

(6) subject to the provisions in the legends required by Section 2.2 above, the registered Holder may grant proxies and otherwise authorize any Person, including Agent Members and Persons who may hold interests in Agent Members, to take any action that such Holder is entitled to take under this Indenture;

(7) except as provided in Section 3.4(a)(2) herein, neither Agent Members nor any other Person on whose behalf Agent Members may act shall have any rights under this Indenture with respect to any Global Note held on their behalf by the Depositary or under the Global Note, and the Depositary may be treated by the Issuer, the Trustee and any agent of the Issuer or the Trustee as the absolute owner of such Global Note for all purposes whatsoever. Notwithstanding the foregoing, nothing herein shall prevent the Issuer, the Guarantors, the Trustee or any agent of the Issuer or the Trustee from giving effect to any written certification, proxy or other authorization furnished by the Depositary or impair, as between the Depositary and its Agent Members, the operation of customary practices governing the exercise of the rights of a Holder of any Note.

(b) *Registration, Registration of Transfer and Exchange and Legends.* The Issuer shall cause to be kept at the Corporate Trust Office of the Trustee a register (the register maintained in such office and in any other office or agency designated pursuant to Section 11.2 being herein sometimes collectively referred to as the “Note Register”) in which, subject to such reasonable regulations as they may prescribe, the Issuer shall provide for the registration of Notes and of transfers and exchanges of Notes. The Trustee is hereby appointed “Registrar” for the purpose of registering Notes and transfers and exchanges of Notes as herein provided.

Upon surrender for registration of transfer of any Note at an office or agency of the Issuer designated pursuant to Section 11.2 for such purpose in accordance with the terms hereof, the Issuer shall, subject to the other provisions of this Section 3.4, execute, and the Trustee shall, upon receipt of an Issuer Order, authenticate and deliver, in the name of the designated transferee or transferees, one or more new Notes of any authorized denominations and of a like tenor and aggregate principal amount and bearing the applicable legends set forth in Section 2.2.

Subject to Section 3.4(c), at the option of the Holder, Notes may be exchanged for other Notes of any authorized denominations and of a like tenor and aggregate principal amount and bearing the applicable legend set forth in Section 2.2, if any, each such new Note having the benefit of the Guarantees executed by the Guarantors, upon surrender of the Note to be exchanged at such office or agency. Whenever any Note is so surrendered for exchange, the Issuer shall execute, and the Trustee shall, upon receipt of an Issuer Order, authenticate and deliver, the Note which the Holder making the exchange is entitled to receive.

The Trustee shall have no obligation or duty to monitor, determine or inquire as to compliance with U.S. securities laws, including but not limited to any restrictions on transfer imposed under this Indenture or under applicable law with respect to any transfer of any interest in any Note (including any transfers between or among Agent Members or beneficial owners of

interests in any Global Note) other than to require delivery of such certificates and other documentation or evidence as are expressly required by, and to do so if and when expressly required by the terms of, this Indenture, and to examine the same to determine substantial compliance solely as to form with the express requirements hereof. Neither the Trustee nor any Agent shall have any responsibility or liability for any actions taken or not taken by the Depositary.

All Notes and the Guarantees issued upon any registration of transfer or exchange of Notes shall be the valid obligations of the Issuer and the Guarantors, evidencing the same debt, and entitled to the same benefits under this Indenture, as the Notes and the Guarantees endorsed thereon, respectively, surrendered upon such registration of transfer or exchange.

Every Note presented or surrendered for registration of transfer or for exchange shall (if so required by the Issuer or the Trustee) be duly endorsed, or be accompanied by a written instrument of transfer in form satisfactory to the Issuer and the Registrar duly executed, by the Holder thereof or his attorney duly authorized in writing.

No service charge shall be made to the Holder for any registration of transfer or exchange of Notes, but the Issuer or the Trustee may require payment of a sum sufficient to cover any tax or other governmental charge that may be imposed in connection with any registration of transfer or exchange of Notes, other than any transfer or exchange pursuant to Section 3.4, Section 10.5 or Section 11.5.

The Issuer and the Registrar shall not be required (i) to issue, register the transfer of or exchange any Note during a period beginning at the opening of business 15 days before the due date for any payment of principal in respect of the Notes selected for redemption under Section 4.6 and ending at the close of business on the day of such mailing, or (ii) to register the transfer of or exchange any Note so selected for redemption in whole or in part, except the unredeemed portion of any Note being redeemed in part.

All Notes, initially issued hereunder shall, upon issuance, bear the relevant legends specified in Section 2.2, if any, to be applied to such a Note and, in the case of the legend specifically required for the Restricted Global Note, such required legend shall not be removed unless the Issuer shall have delivered to the Trustee (and the Notes Registrar, if other than the Trustee) an Issuer Order which states that such Note may be issued without such legend thereon. If such legend has been removed from a Note as provided above, no other Note issued in exchange for all or any part of such Note shall bear such legend, unless the Issuer has reasonable cause to believe that such other Note is a “restricted security” within the meaning of Rule 144 of the Notes Act and instructs the Trustee to cause a legend to appear thereon:

(c) *Certain Transfers and Exchanges.* Upon presentation for transfer or exchange of any Note at the office of the Trustee, as Registrar, located in The City of New York, accompanied by a written instrument of transfer or exchange in the form approved by the Issuer (it being understood that, until notice to the contrary is given to Holders of Notes, the Issuer shall be deemed to have approved the form of instrument of transfer or exchange, if any, printed on any Note), executed by the registered Holder, in person or by such Holder’s attorney thereunto duly authorized in writing, and upon compliance with this Section 3.4, such Note shall be

transferred upon the Note Register, and a new Note shall be authenticated and issued in the name of the transferee. Notwithstanding any provision to the contrary herein or in the Notes, transfers of a Global Note, in whole or in part, and transfers of interests therein of the kind described in this Section 3.4 (c), shall only be made in accordance with this Section 3.4(c). Transfers and exchanges subject to this Section 3.4(c) shall also be subject to the other provisions of this Indenture that are not inconsistent with this Section 3.4(c).

(1) *General.* A Global Note may not be transferred, in whole or in part, to any Person other than the Depositary or a nominee thereof, and no such transfer to any such other Person may be registered; provided, however, that this clause (1) shall not prohibit any transfer of a Note that is issued in exchange for a Global Note but is not itself a Global Note. No transfer of a Note to any Person shall be effective under this Indenture or the Notes unless and until such Note has been registered in the name of such Person. Nothing in this clause (1) shall prohibit or render ineffective any transfer of a beneficial interest in a Global Note effected in accordance with the other provisions of this Section 3.4(c).

(2) *Restricted Global Note to Regulation S Global Note.* If the holder of a beneficial interest in the Restricted Global Note wishes at any time to transfer such interest to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Regulation S Global Note, such transfer may be effected, subject to the rules and procedures of the Depositary, Euroclear and Clearstream, in each case to the extent applicable and as in effect from time to time (the "Applicable Procedures"), only in accordance with this clause (2). Upon receipt by the Trustee, as Registrar, of (A) written instructions given by or on behalf of the Depositary in accordance with the Applicable Procedures directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Regulation S Global Note in a specified principal amount and to cause to be debited from another specified Agent Member's account a beneficial interest in the Restricted Global Note in an equal principal amount and (B) a certificate in substantially the form set forth in Exhibit A signed by or on behalf of the Agent Member holding such beneficial interest in the Restricted Global Note, the Trustee, as Registrar, shall reduce the principal amount of a Restricted Global Note, and increase the principal amount of the Regulation S Global Note by such specified principal amount as provided in Section 3.4(a)(3).

(3) *Regulation S Global Note to Restricted Global Note.* If the holder of a beneficial interest in the Regulation S Global Note at any time wishes to transfer such interest to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Restricted Global Note, such transfer may be effected, subject to the Applicable Procedures, only in accordance with this clause (3). Upon receipt by the Trustee, as Registrar, of (A) written instructions given by or on behalf of the Depositary in accordance with the Applicable Procedures directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Restricted Global Note in a specified principal amount and to cause to be debited from another specified Agent Member's account a beneficial interest in the Regulation S Global Note and (B) a certificate in substantially the form set forth in Exhibit B signed by or on behalf of the Agent Member holding such beneficial interest in the Regulation S Global Note, the Trustee, as Registrar, shall reduce the principal amount of such Regulation S Global Note and increase the principal amount of the Restricted Global Note by such specified principal amount as provided in Section 3.4(a)(3).

(4) *Non-Global Restricted Note to Global Note.* If the holder of a Restricted Note (other than a Global Note) wishes at any time to transfer all or any portion of such Note to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Restricted Global Note or the Regulation S Global Note, such transfer may be effected, subject to the Applicable Procedures, only in accordance with this clause (4). Upon receipt by the Trustee, as Registrar, of (A) such Note and written instructions given by or on behalf of such Holder as provided in Section 3.4(b) directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Restricted Global Note or the Regulation S Global Note, as the case may be, in a specified principal amount equal to the principal amount of the Restricted Note (or portion thereof) to be so transferred, and (B) an appropriately completed certificate substantially in the form set forth in Exhibit C-1 hereto, if the specified account is to be credited with a beneficial interest in the Restricted Global Note, or Exhibit C-2 hereto, if the specified account is to be credited with a beneficial interest in the Regulation S Global Note, signed by or on behalf of such Holder, then the Trustee, as Registrar, shall cancel such Restricted Note (and issue a new Note in respect of any untransferred portion thereof) as provided in Section 3.4(b) and increase the principal amount of the Restricted Global Note or Regulation S Global Note, as the case may be, by the specified principal amount as provided in Section 3.4(a)(3).

(5) *Non-Global Regulation S Note to Restricted Global Note or Regulation S Global Note.* If the Holder of a Regulation S Note (other than a Global Note) wishes at any time to transfer all or any portion of such Note to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Restricted Global Note or the Regulation S Global Note, as the case may be, such transfer may be effected only in accordance with this clause (5) and subject to the Applicable Procedures. Upon receipt by the Trustee, as Registrar, of (A) such Note and written instructions given by or on behalf of such Holder as provided in Section 3.4(b) directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Restricted Global Note or the Regulation S Global Note, as the case may be, in a principal amount equal to the principal amount of the Note (or portion thereof) to be so transferred, and (B)(i) with respect to a transfer which is to be delivered in the form of a beneficial interest in the Restricted Global Note, a certificate in substantially the form set forth in Exhibit D-1, signed by or on behalf of such Holder, and (ii) with respect to a transfer which is to be delivered in the form of a beneficial interest in the Regulation S Global Note, a certificate in substantially the form set forth in Exhibit D-2, signed by or on behalf of such Holder, then the Trustee, as Registrar, shall cancel such Note (and issue a new Note in respect of any untransferred portion thereof) as provided in Section 3.4(b) and increase the principal amount of the Restricted Global Note or the Regulation S Global Note, as the case may be, by the specified principal as provided in Section 3.4(a)(3).

Section 3.5. Mutilated, Destroyed, Lost and Stolen Notes.

If any mutilated or defaced Note is surrendered to the Trustee, the Issuer shall execute and the Trustee shall, upon receipt of an Issuer Order, authenticate or cause to be authenticated and deliver in exchange therefor a new Note of like tenor and principal amount, having endorsed thereon the Guarantees executed by the Guarantors and bearing a number not contemporaneously outstanding.

If there shall be delivered to the Issuer and the Trustee (i) evidence to their satisfaction of the destruction, loss or theft of any Note and (ii) such security or indemnity as may be required by them to save each of them, the Guarantors and any agent of either of them harmless, then, in the absence of notice to the Issuer or the Trustee that such Note has been acquired by a bona fide purchaser, the Issuer shall execute and the Trustee shall, upon receipt of an Issuer Order, authenticate and deliver, in lieu of any such destroyed, lost or stolen Note, a new Note of like tenor and principal amount, having endorsed thereon the Guarantees executed by the Guarantors and bearing a number not contemporaneously outstanding.

In case any such mutilated, defaced, destroyed, lost or stolen Note has become or is about to become due and payable, the Issuer may in its discretion, instead of issuing a new Note, pay such Note.

Upon the issuance of any new Note under this Section, the Issuer may require the payment of a sum sufficient to cover any tax or other governmental charge that may be imposed in relation thereto and any other expenses (including the fees and expenses of the Trustee, its counsel, the Registrar and the Paying Agents) connected therewith.

Every new Note issued pursuant to this Section in lieu of any destroyed, defaced, lost or stolen Note, and the Guarantees endorsed thereon, shall constitute an original additional contractual obligation of the Issuer and the Guarantors, respectively, whether or not the destroyed, lost or stolen Note shall be at any time enforceable by anyone, and shall be entitled to all the benefits of this Indenture equally and proportionately with any and all other Notes and Guarantees, respectively duly issued hereunder.

The provisions of this Section are exclusive and shall preclude (to the extent lawful) all other rights and remedies with respect to the replacement or payment of mutilated, destroyed, lost or stolen Notes.

Section 3.6. Payment of Interest; Interest Rights Preserved.

Interest on any Note which is payable, and is punctually paid or duly provided for, on any Interest Payment Date shall be paid to the Person in whose name that Note (or one or more Predecessor Notes) is registered at the close of business on the Record Date for such interest.

Any interest on any Note which is payable, but is not punctually paid or duly provided for, on any Interest Payment Date (herein called "Defaulted Interest") shall (a) bear interest at the rate per annum stated in the form of Note included herein, (to the extent that the payment of such interest shall be legally enforceable), and (b) forthwith cease to be payable to the Holder on the relevant Record Date by virtue of having been such Holder, and such Defaulted Interest may be paid by the Issuer, at its election in each case, as provided in clause (1) or (2) below:

(1) the Issuer may elect to make payment of any Defaulted Interest to the Persons in whose names the Notes (or their respective Predecessor Notes) are registered at the close of business on a Special Record Date for the payment of such Defaulted Interest, which shall be fixed in the following manner. The Issuer shall notify the Trustee in writing of the amount of Defaulted Interest proposed to be paid on each Note and the date of the proposed payment, and at the same time the Issuer shall deposit with the Trustee an amount of money equal to the aggregate amount proposed to be paid in respect of such Defaulted Interest or shall make arrangements satisfactory to the Trustee for such deposit prior to the date of the proposed payment, such money when deposited to be held in trust for the benefit of the Persons entitled to such Defaulted Interest as in this clause provided.

Thereupon the Trustee shall fix a Special Record Date for the payment of such Defaulted Interest which shall be not more than 15 days and not less than 10 days prior to the date of the proposed payment and not less than 10 days after the receipt by the Trustee of the notice of the proposed payment. The Trustee shall promptly notify the Issuer of such Special Record Date and, in the name and at the expense of the Issuer, shall cause notice of the proposed payment of such Defaulted Interest and the Special Record Date therefor to be mailed, first-class postage prepaid, to each Holder at his address as it appears in the Note Register, not less than 10 days prior to such Special Record Date. Notice of the proposed payment of such Defaulted Interest and the Special Record Date therefor having been so mailed, such Defaulted Interest shall be paid to the Persons in whose names the Notes (or their respective Predecessor Notes) are registered at the close of business on such Special Record Date and shall no longer be payable pursuant to the following clause (2); and

(b) the Issuer may make payment of any Defaulted Interest in any other lawful manner not inconsistent with the requirements of any securities exchange on which the Notes may be listed, and upon such notice as may be required by such exchange, if, after notice given by the Issuer to the Trustee of the proposed payment pursuant to this clause, such manner of payment shall be deemed practicable by the Trustee.

Subject to the foregoing provisions of this Section, each Note delivered under this Indenture upon registration of transfer of or in exchange for or in lieu of any other Note shall carry the rights to interest accrued and unpaid, and to accrue, which were carried by such other Note.

Section 3.7. Persons Deemed Owners.

Prior to due presentment of a Note for registration of transfer and the effective registration of such transfer by the Registrar, the Issuer, the Guarantors, the Trustee and any agent of the Issuer, the Guarantors or the Trustee may treat the Person in whose name such Note is registered as the owner of such Note for the purpose of receiving payment of principal of and premium, if any, and (subject to Section 3.6) interest on such Note and for all other purposes whatsoever, whether or not such Note be overdue, and none of the Issuer, the Guarantors, the Trustee or any agent of the Issuer, the Guarantors or the Trustee shall be liable for so treating such Holder.

Section 3.8. Cancellation.

Except as provided for in Section 4.2 and 4.3, Notes surrendered for payment, redemption, registration of transfer or exchange shall, if surrendered to any Person other than the Trustee, be delivered to the Trustee and shall be promptly cancelled by it. The Issuer may at any time deliver to the Trustee for cancellation, accompanied by an Issuer Order, any Notes previously authenticated and delivered hereunder which the Issuer may have acquired in any manner whatsoever, and all Notes so delivered shall be promptly cancelled by the Trustee. No Notes shall be authenticated in lieu of or in exchange for any Notes cancelled as provided in this Section, except as expressly permitted by this Indenture. All cancelled Notes held by the Trustee shall be disposed of in accordance with its standard procedures or as directed by an Issuer Order; provided, however, that the Trustee shall not be required to destroy such Notes.

Section 3.9. Computation of Interest.

The amount of interest payable on the Notes for any interest period will be calculated by applying the rate of interest to the principal amount of such Note, on the basis of a year of 360 days consisting of 12 months of 30 days each and, in the case of an incomplete month, on the number of days elapsed based on a 30 day month provided, however, that Defaulted Interest shall be computed on the basis of a 365 or 366-day year, as the case may be, and the number of days actually elapsed.

Section 3.10. CUSIP Numbers.

The Issuer shall in issuing the Notes use CUSIP numbers, and the Trustee shall use the applicable CUSIP number in notices of redemption or exchange as a convenience to the Holders; provided, that any such notice may state that no representation is made as to the accuracy or correctness of the CUSIP number or numbers printed in the notice or on the certificates representing the Notes and that reliance may be placed only on the other identification numbers printed on the certificates representing the Notes. The Issuer shall promptly notify the Trustee in writing of any change in CUSIP numbers.

Section 3.11. Paying Agents; Discharge of Payment Obligations; Indemnity of Holders.

(a) The Issuer may from time to time appoint one or more paying agents under this Indenture and the Notes. By its execution and delivery of this Indenture, the Issuer hereby initially designates and appoints The Bank of New York Mellon, as Principal Paying Agent. Subject to Section 11.3, the Issuer or a Guarantor may act as paying agent.

(b) Unless the Issuer or a Guarantor shall be acting as paying agent as provided in Section 11.3, the Issuer shall, by 11:00 a.m. New York City time, no later than one Business Day prior to each Interest Payment Date, Redemption Date or Maturity Date on any Notes (whether on maturity, redemption or otherwise) (each, a "Payment Date"), deposit with the Principal Paying Agent in immediately available funds a sum sufficient to pay such principal, any

premium, and interest when so becoming due (including any Additional Amounts). The Issuer shall request that the bank through which such payment is to be made agree to supply to the Principal Paying Agent in New York City by 11:00 a.m. (New York City time) two Business Days prior to the due date for any such payment an irrevocable confirmation (by authenticated SWIFT MT 100 Message) of its intention to make such payment. The Principal Paying Agent shall arrange with all other Paying Agents for the payment, from funds furnished by the Issuer or the Guarantors to the Principal Paying Agent pursuant to this Indenture, of the principal, and premium, if any, and interest (including Additional Amounts, if any) on the Notes and of the compensation of such Paying Agents for their services as such.

All Paying Agents will hold in trust, for the benefit of Holders or the Trustee, all money held by such Paying Agent for the payment of principal, or premium if any, of or interest on the Notes and shall notify the Trustee in writing of any default by the Issuer in making any such payment. The Issuer at any time may require a Paying Agent to pay all money held by it to the Trustee and to account for any funds disbursed by it. Upon complying with this Section 3.11 and the applicable provisions of Section 11.3, the Paying Agents shall have no further liability for the money delivered to the Trustee.

(c) Any payment to be made in respect of the Notes or the Guarantees by the Issuer or the Guarantors, as the case may be, to or to the order of any Paying Agent shall be in satisfaction *pro tanto* of the obligations of the Issuer under the Notes.

(d) Each payment in full of principal, redemption amount, Additional Amounts and/or interest payable under this Indenture in respect of any Note made by or on behalf of the Issuer to or to the order of any Paying Agent in the manner specified in this Indenture on the date due shall be valid and effective to satisfy and discharge the obligation of the Issuer to make payment of principal, redemption amount, Additional Amounts and/or interest payable under this Indenture on such date, provided, however, that the liability of any Paying Agent hereunder shall not exceed any amounts paid to it by the Issuer, or held by it, on behalf of the Holders under this Indenture; and provided further that, in the event that there is a default by the Paying Agent or the Principal Paying Agent in any payment of principal, redemption amount, Additional Amounts and/or interest in respect of any Note in accordance with this Indenture, the Issuer and the Guarantors shall pay on demand such further amounts as will result in receipt by the Holder of such amounts as would have been received by it had no such default. This obligation constitutes a separate and independent obligation from the other obligations of the Issuer under the Notes and the Guarantors under the Guarantees, shall give rise to a separate and independent cause of action, will apply irrespective of any waiver granted by the Trustee and/or any Holder of Notes and shall continue in full force and effect despite any judgment, order, claim, or proof for a liquidated amount in respect of any sum due under this Indenture, the Notes or any judgment or order.

ARTICLE IV

REDEMPTION OF NOTES

Section 4.1. Redemption for Tax Reasons.

If as a result of any Change of Law (as defined below):

(1) the Issuer or a Guarantor is or would be required on the next succeeding Interest Payment Date to pay any Additional Amounts in excess of the Additional Amounts that the Issuer or such Guarantor, as the case may be, would pay if payments in respect of the Notes were subject to deduction or withholding for Taxes imposed by the applicable taxing jurisdiction at the rate applicable on the Issue Date; or

(2) the issuers/borrowers of certain intercompany debt are or would be required on the next succeeding interest payment date to pay Brazilian withholding taxes in excess of a general rate of 15%, or 25% in case of amounts paid to residents of countries or locations which do not impose any income tax or which impose it at a maximum rate lower than 17% or where the laws of that country or location impose restrictions on the disclosure (x) of shareholding composition; (y) of the ownership of the investment; or (z) to the identification of the beneficial owner of income attributed to non-resident persons, pursuant to article 8 of Law No. 9,779, of January 19, 1999, and articles 24 and 24-A of Law No. 9,430, of December 27, 1996; provided that, such requirement to pay such taxes in excess of such rate was not caused by, or otherwise the result of, whether directly or indirectly, wholly or in part, any amendment to the intercompany debt,

and in either case, the payment of such excess amounts cannot be avoided by the use of any reasonable measures available to the Issuer or a Guarantor, the Notes may be redeemed, by the Issuer at the option of the Issuer or a Guarantor, in whole but not in part, upon not less than 30 nor more than 90 days' notice to the Holders, which notice will be published, at any time following such Change of Law at a Redemption Price equal to the principal amount thereof, plus accrued and unpaid interest, if any, to the date fixed for redemption. The Issuer, any Guarantor or any of their respective Affiliates will also pay to the Holders of the Notes on the Redemption Date any Additional Amounts which are payable. Following such redemption, the Notes will be cancelled, or remain Outstanding, at the Issuer's or a Guarantor's election.

"Change of Law" means any change in or amendment to the laws or regulations of Luxembourg, Brazil or Peru (or of any political subdivision thereof or therein) or the adoption, amendment or modification of any resolution of the Central Bank of Luxembourg, the Central Bank of Brazil or the Central Reserve Bank of Peru (or any successor authority thereto) which becomes effective on or after the date of this Indenture (or with respect to a successor, on or after the date such successor assumes the obligations under the Notes), resulting in the Issuer or a Guarantor on a consolidated basis being required to pay amounts with respect to Taxes as described above in a total aggregate amount in excess of that payable immediately prior to such change or amendment.

Prior to the delivery of any notice of redemption in accordance with the foregoing, the Issuer or a Guarantor shall deliver to the Trustee and the Agents an Officer's Certificate stating that the Issuer or a Guarantor, as the case may be, is entitled to effect such redemption based on an Opinion of Counsel or written advice of a qualified tax expert, that the Issuer or a Guarantor has or will become obligated to pay such excess amounts with respect to Taxes as a result of such Change of Law. Such notice, once delivered by the Issuer or a Guarantor to the Trustee, will be irrevocable.

If the Issuer or a Guarantor becomes subject at any time to any taxing jurisdiction other than Luxembourg, Brazil or Peru, references herein to Luxembourg, Brazil or Peru, as applicable, shall be construed to include such other jurisdiction.

Section 4.2. Optional Redemption.

At any time before January 9, 2034 (which is the date that is three months prior to maturity of the notes (the "Par Call Date")), the Issuer or a Guarantor has the right to redeem the Notes, in whole or in part and from time to time, at a Redemption Price equal to the greater of (1) 100% of the principal amount of the Notes being redeemed and (2) the sum of the present values of the remaining scheduled payments of principal and interest on the Notes being redeemed that would be due if the Notes matured on the Par Call Date (inclusive of interest accrued to the redemption date), discounted to the Redemption Date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Treasury Rate plus 40 basis points, less interest accrued to, but excluding, the Redemption Date; plus, in either case, accrued and unpaid interest on the principal amount of the Notes being redeemed and Additional Amounts, if any, to, but excluding, the Redemption Date (subject to the right of Holders of record on the relevant Record Date to receive interest due on the relevant Interest Payment Date).

At any time on or after the Par Call Date, the Issuer or a Guarantor has the right to redeem the Notes, in whole or in part and from time to time, at a Redemption Price equal to 100% of the principal amount of the Notes being redeemed plus accrued and unpaid interest on the principal amount of the Notes being redeemed to, but excluding, such Redemption Date (subject to the right of Holders of record on the relevant Record Date to receive interest due on the relevant Interest Payment Date).

The "Treasury Rate" shall be determined by the Issuer or a Guarantor after 4:15 p.m., New York City time (or after such time as yields on U.S. government securities are posted daily by the Board of Governors of the Federal Reserve System), on the third Business Day preceding the Redemption Date based upon the yield or yields for the most recent day that appear after such time on such day in the most recent statistical release published by the Board of Governors of the Federal Reserve System designated as "Selected Interest Rates (Daily) - H.15" (or any successor designation or publication) ("H.15") under the caption "U.S. government securities-Treasury constant maturities-Nominal" (or any successor caption or heading). In determining the Treasury Rate, the Issuer or a Guarantor shall select, as applicable: (i) the yield for the Treasury constant maturity on H.15 exactly equal to the period from the redemption date to the Par Call Date (the "Remaining Life"); or (ii) if there is no such Treasury constant maturity on H.15 exactly equal to the Remaining Life, the two yields - one yield corresponding to the Treasury constant maturity on H.15 immediately shorter than and one yield corresponding to the Treasury

constant maturity on H.15 immediately longer than the Remaining Life - and shall interpolate to the Par Call Date on a straight-line basis (using the actual number of days) using such yields and rounding the result to three decimal places; or (iii) if there is no such Treasury constant maturity on H.15 shorter than or longer than the Remaining Life, the yield for the single Treasury constant maturity on H.15 closest to the Remaining Life. For purposes of this paragraph, the applicable Treasury constant maturity or maturities on H.15 shall be deemed to have a maturity date equal to the relevant number of months or years, as applicable, of such Treasury constant maturity from the Redemption Date.

If on the third Business Day preceding the Redemption Date H.15 or any successor designation or publication is no longer published, the Issuer or a Guarantor shall calculate the Treasury Rate based on the rate per annum equal to the semi-annual equivalent yield to maturity at 11:00 a.m., New York City time, on the second Business Day preceding such redemption date of the United States Treasury security maturing on, or with a maturity that is closest to, the Par Call Date, as applicable. If there is no United States Treasury security maturing on the Par Call Date but there are two or more United States Treasury securities with a maturity date equally distant from the Par Call Date, one with a maturity date preceding the Par Call Date and one with a maturity date following the Par Call Date, the Issuer or a Guarantor shall select the United States Treasury security with a maturity date preceding the Par Call Date. If there are two or more United States Treasury securities maturing on the Par Call Date or two or more United States Treasury securities meeting the criteria of the preceding sentence, the Issuer or the Guarantor shall select from among these two or more United States Treasury securities the United States Treasury security that is trading closest to par based upon the average of the bid and asked prices for such United States Treasury securities at 11:00 a.m., New York City time. In determining the Treasury Rate in accordance with the terms of this paragraph, the semi-annual yield to maturity of the applicable United States Treasury security shall be based upon the average of the bid and asked prices (expressed as a percentage of principal amount) at 11:00 a.m., New York City time, of such United States Treasury security, and rounded to three decimal places.

The Issuer or a Guarantor's actions and determinations in determining the Redemption Price shall be conclusive and binding for all purposes, absent manifest error.

The Issuer, any Guarantor or any of their respective Affiliates may at any time repurchase the Notes at any price in the open market or otherwise. The Issuer, any Guarantor or any of their respective Affiliates may hold or resell the Notes it purchases or may surrender them to the Trustee or an Agent for cancellation.

Optional Clean-up Redemption. Notwithstanding the foregoing, in connection with any tender offer for the notes (including an Offer to Purchase in connection with a Change of Control that results in a Rating Decline made in accordance with the terms of the Indenture), in the event that the Holders of not less than 85% of the aggregate principal amount of the outstanding Notes validly tender and do not validly withdraw Notes in such tender offer and the Issuer, or any other Person making such offer in lieu of the Issuer, purchases all of the Notes validly tendered and not validly withdrawn by such Holders, then the Issuer or the Guarantor will have the right, on not less than 10 nor more than 60 days' prior notice to the Holders (with a copy to the Trustee), to redeem all of the Notes that remain outstanding at a Redemption Price equal to the purchase price paid to each other Holder in such tender offer plus, to the extent not included in the purchase price, accrued and unpaid interest and Additional Amounts, if any, on the Notes that remain outstanding, to, but excluding, the Redemption Date.

Section 4.3. Applicability of Article.

Redemption of Notes at the election of the Issuer, as permitted or required by any provision of this Indenture, shall be made in accordance with such provision and this Article.

Section 4.4. Election to Redeem; Notice to Trustee, Registrar and Paying Agent.

In the case of any redemption of Notes prior to the expiration of any restriction on such redemption provided in the terms of such Notes or elsewhere in this Indenture, the Issuer shall furnish the Trustee with an Officer's Certificate evidencing compliance with such restriction.

The Issuer shall provide notice of redemption to the Trustee, Registrar and Paying Agents at least 15 days (or such shorter period as agreed to by the Trustee) prior to when such notice of redemption shall be provided to the Holders.

Section 4.5. Notice of Redemption.

Notice of redemption pursuant to Section 4.1 and 4.2 hereof shall be given in the manner provided for in Section 1.6 hereof. The Trustee, Registrar and Paying Agent will notify the Holders at such Holder's address appearing in the Note register at least 10 but not more than 60 days prior to the Redemption Date. A notice of any redemption may, at the Issuer's or a Guarantor's discretion, be subject to one or more conditions precedent.

All notices of redemption shall state:

- (1) the Redemption Date;
- (2) the Redemption Price;
- (3) that on the Redemption Date, the Redemption Price will become due and payable upon each such Note to be redeemed and that interest thereon will cease to accrue on and after said date;
- (4) the place or places where such Notes are to be surrendered for payment of the Redemption Price;
- (5) the aggregate principal amount of Notes being redeemed;
- (6) the CUSIP number or numbers of the Notes being redeemed;
- (7) if fewer than all the outstanding Notes are to be redeemed, or if a Note is to be redeemed in part only, the identification and principal amounts at maturity of the particular Notes (or portion thereof) to be redeemed; and

(8) that no representation is made as to the correctness or accuracy of the CUSIP numbers, if any, listed in such notice or printed on the Notes.

Section 4.6. Deposit of Redemption Price.

By 11:00 a.m. (New York City time) on the Business Day prior to any Redemption Date, the Issuer or a Guarantor shall deposit with the Principal Paying Agent (or, if the Issuer is acting as its own Paying Agent, segregate and hold in trust as provided in Section 11.3) an amount of money sufficient to pay the Redemption Price on all of the Notes which are to be repurchased on that date. In the case of a partial redemption of Notes that are represented by a Global Note, the relevant Notes will be redeemed in accordance with the rules of DTC.

Section 4.7. Notes Payable on Redemption Date.

Notice of redemption having been given as aforesaid, the Notes so to be redeemed shall, on the Redemption Date, become due and payable at the Redemption Price therein specified, and from and after such date (unless the Issuer shall default in the payment of the Redemption Price and accrued and unpaid interest) such Notes shall cease to bear interest. Upon surrender of any such Note for redemption in accordance with said notice, such Note shall be paid by the Issuer at the Redemption Price, together with accrued and unpaid interest to the Redemption Date; provided, however, that installments of interest whose Maturity Date is on or prior to the Redemption Date shall be payable to the Holders of such Notes, or one or more Predecessor Notes, registered as such at the close of business on the relevant Record Dates according to their terms and the provisions of Section 3.7.

If any Note called for redemption shall not be so paid upon surrender thereof for redemption, the principal (and premium, if any) shall, until paid, bear interest from the Redemption Date at the rate provided by the Note.

ARTICLE V

SATISFACTION AND DISCHARGE

Section 5.1. Satisfaction and Discharge of Indenture.

This Indenture shall cease to be of further effect as to all Outstanding Notes, and the Trustee, on demand of and at the expense of the Issuer, shall execute proper instruments acknowledging satisfaction and discharge of this Indenture, when

(1) (A) all Outstanding Notes (except lost, stolen or destroyed Notes which have been replaced or paid) have been delivered to the Trustee for cancellation; or

(B) all Outstanding Notes that have not been delivered to the Trustee for cancellation (i) have become due and payable, (ii) will become due and payable at their Stated Maturity within one year, or (iii) are to be called for redemption within one year under arrangements satisfactory to the Trustee for the giving of notice of a redemption by the Issuer or a Guarantor; and, in each case, the Issuer or a Guarantor irrevocably deposits or causes to be deposited with the Trustee or its designee as funds in

trust solely for the benefit of the Holders, cash, Cash Equivalents or U.S. Government Obligations in an amount as will be sufficient without consideration of any reinvestment of interest, to pay and discharge all principal, premium and Additional Amounts, if any, and accrued and unpaid interest to the date of maturity or redemption on the Notes not delivered to the Trustee for cancellation and delivers irrevocable Instructions to the Trustee to apply the deposited money toward the payment of the Notes at maturity or the redemption date, as the case may be;

(2) the Issuer or a Guarantor has paid or caused to be paid all other sums payable hereunder;

(3) the Issuer or a Guarantor has delivered to the Trustee an Officer's Certificate and an Opinion of Counsel, each stating that all conditions precedent herein provided for relating to the satisfaction and discharge of this Indenture have been complied with; and

(4) the Trustee shall have received such other documents and assurances as the Trustee shall have reasonably requested.

Notwithstanding the satisfaction and discharge of this Indenture, (i) the obligations of the Issuer to the Trustee under Section 7.7 hereof, (ii) substitution of apparently mutilated, defaced, destroyed, lost or stolen Notes, (iii) rights of Holders of Notes to receive payment of principal of and premium, if any, and interest (including Additional Amounts, if any) on the Notes, (iv) rights, obligations and immunities of the Trustee under this Indenture (including, if money shall have been deposited with the Trustee pursuant to subclause (B) of clause (1) of this Section, the obligations of the Trustee under Section 5.2 hereof and the last paragraph of Section 11.3 hereof), and (v) rights of Holders of the Notes as beneficiaries of this Indenture with respect to any property deposited with the Trustee payable to all or any of them, shall survive.

Section 5.2. Application of Trust Money.

Subject to the provisions of the last paragraph of Section 11.3, all money deposited with the Trustee pursuant to Section 5.1 hereof shall be held in trust and applied by it, in accordance with the provisions of the Notes and this Indenture, to the payment, either directly or through any Paying Agent (including the Issuer or a Guarantor acting as its own Paying Agent) as the Trustee may determine, to the Persons entitled thereto, of the principal (and premium, if any) and interest for whose payment such money has been deposited with the Trustee.

ARTICLE VI

REMEDIES

Section 6.1. Events of Default.

"Event of Default," wherever used herein, means any one of the following events (whatever the reason for such Event of Default and whether it shall be voluntary or involuntary or be effected by operation of law or pursuant to any judgment, decree or order of any court or any order, rule or regulation of any administrative or governmental body):

- (1) failure to pay any amount of principal of (or premium, if any) any Note when due and such failure shall continue for a period of three days;
- (2) failure to pay any interest, including Additional Amounts, if any, on any Note when due and such failure shall continue for a period of 30 days;
- (3) failure to perform any covenant or agreement of the Issuer or any Guarantor under this Indenture or the Notes and such failure remains unremedied for 60 days after the Trustee has given written notice thereof to the Issuer or any Guarantor;
- (4) failure to pay when due or, as the case may be, within any originally applicable grace period, any amount of principal and premium, if any, or interest (including Additional Amounts, if any), due under the terms of any instrument evidencing Indebtedness of the Issuer or any of its Designated Subsidiaries, or any such Indebtedness of the Issuer or any of its Designated Subsidiaries that becomes due and payable prior to its stated maturity otherwise than at the option of the issuer thereof by reason of the occurrence of an event of default howsoever described; provided that the aggregate amount of any such Indebtedness equals with respect to such Person, on a consolidated basis U.S.\$125.0 million or more (or its equivalent in other currency or currencies);
- (5) the rendering of a final judgment (not subject to appeal) for the payment of money against the Issuer or any of its Designated Subsidiaries which remains undischarged, unbonded or unstayed (and otherwise not covered by enforceable insurance policies issued by reputable and creditworthy insurance companies) for a period of 60 consecutive days after the date on which the right to appeal all such judgments has expired or, if later, the date therein specified for payment; provided that the aggregate amount of any such final judgment equals or exceeds with respect to such Person, on a consolidated basis U.S.\$125.0 million (or its equivalent in other currency or currencies);
- (6) all or substantially all of the assets of the Issuer (on a consolidated basis) shall be condemned, seized or otherwise appropriated, or custody of such property shall be assumed by any governmental authority or court or other person purporting to act under the authority of the federal government of any jurisdiction, or the Issuer shall be prevented from exercising normal control over all or substantially all of its property or revenues (on a consolidated basis), if the whole or part of such property or revenues is material to the Issuer (on a consolidated basis);
- (7) (a) a secured party takes possession of all or substantially all the assets or revenues of the Issuer (on a consolidated basis) or (b) a receiver or similar officer is appointed, of all or substantially all the assets or revenues of the Issuer (on a consolidated basis);
- (8) the Issuer or any Guarantor pursuant to or under or within the meaning of any Bankruptcy Law (a) commences a voluntary case or proceeding; (b) consents to the making of a Bankruptcy Order in an involuntary case or proceeding or the

commencement of any case against it; (c) consents to the appointment of a custodian of it or for substantially all its property; (d) makes a general assignment for the benefit of its creditors; (e) files an answer or consent seeking reorganization or relief; (f) shall admit in writing its inability to pay its debts generally; or (g) consents to the filing of a petition in bankruptcy;

(9) a court of competent jurisdiction in any involuntary case or proceeding enters a Bankruptcy Order against the Issuer or any Guarantor, and such Bankruptcy Order remains unstayed and in effect for 60 consecutive days; and

(10) any of the Guarantees is not (or is claimed by any Guarantor not to be) in full force and effect.

If any Event of Default shall occur and be continuing, either (i) the Trustee or (ii) the Holders, with written notice to the Trustee, of at least 25% in aggregate principal amount of the Outstanding Notes may accelerate the maturity of all Notes; provided that, after such acceleration, but before a judgment or decree based on acceleration, the Holders of a majority in aggregate principal amount of Outstanding Notes may, as provided in Section 6.12, rescind and annul such acceleration if all Events of Default, other than the nonpayment of accelerated principal, have been cured or waived as provided in this Indenture. The Trustee shall not be deemed to have notice of any Default or Event of Default (other than a payment default) unless a Responsible Officer of the Trustee has actual knowledge thereof or unless written notice of any event which is in fact such a default is received by a Responsible Officer of the Trustee at the Corporate Trust Office of the Trustee, and such notice references the Notes and this Indenture. If an Event of Default specified in clause (8) above occurs with respect to the Issuer, the Outstanding Notes will ipso facto become immediately due and payable without any declaration or other act on the part of the Trustee or any Holder.

Section 6.2. Collection of Indebtedness and Suits for Enforcement by Trustee. The Issuer and the Guarantors covenant that if

(1) default is made in the payment of any interest on any Note, (including Additional Amounts, if any), when such amounts become due and payable and such default continues for a period of 30 days; or

(2) default is made in the payment of the principal of (or premium, if any, on) any Note at the Maturity thereof or, with respect to any Note to be redeemed, at the Redemption Date thereof,

the Issuer and the Guarantors (subject to the limitations provided in this Indenture) will, jointly and severally, upon demand of the Trustee, pay to it, for the benefit of the Holders of such Notes, the whole amount then due and payable on such Notes for principal (and premium, if any) and interest (including Additional Amounts, if any), and, to the extent that payment of interest on overdue amounts shall be legally enforceable, interest on any overdue principal (and premium, if any) and on any overdue interest, at the rate provided by the Notes, and, in addition thereto, such further amount as shall be sufficient to cover the costs and expenses incurred by the Trustee

under this Indenture, including the reasonable compensation, expenses, disbursements and advances of the Trustee, its agents and counsel.

If the Issuer and the Guarantors fail to pay such amounts forthwith upon such demand, the Trustee, in its own name and as trustee of an express trust, may institute a judicial proceeding for the collection of the sums so due and unpaid, may prosecute such proceeding to judgment or final decree, and may enforce the same against the Issuer, the Guarantors or any other obligor upon the Notes and collect the moneys adjudged or decreed to be payable in the manner provided by law out of the property of the Issuer, the Guarantors or any other obligor upon the Notes, wherever situated.

If an Event of Default occurs and is continuing, the Trustee may in its discretion proceed to protect and enforce its rights and the rights under this Indenture of the Holders by such appropriate judicial proceedings as the Trustee shall deem most effective to protect and enforce any such rights, whether for the specific enforcement of any covenant or agreement in this Indenture or in aid of the exercise of any power granted herein including, without limitation, seeking recourse against the Issuer or the Guarantors or proceeding to enforce any other proper remedy.

Section 6.3. Trustee May File Proofs of Claim.

The Trustee may file such proofs of claim and other papers or documents as may be necessary or advisable in order to have the claims of the Trustee and the Holders allowed in any judicial proceedings relative to the Issuer, the Guarantors, their respective creditors or its property and, unless prohibited by law or applicable regulations, may vote on behalf of the Holders at their direction in any election of a trustee in bankruptcy or other Person performing similar functions, and any custodian in any such judicial proceeding is hereby authorized by each Holder to make payments to the Trustee and, in the event that the Trustee shall consent to the making of such payments directly to the Holders, to pay to the Trustee any amount due it for the reasonable compensation, expenses, disbursements and advances of the Trustee, its agents and its counsel, and any other amounts due the Trustee under Section 7.7.

Section 6.4. Trustee May Enforce Claims Without Possession of Notes.

All rights of action and claims under this Indenture or the Notes may be prosecuted and enforced by the Trustee without the possession of any of the Notes or the production thereof in any proceeding relating thereto, and any such proceeding instituted by the Trustee shall be brought in its own name as trustee of an express trust, and any recovery of judgment shall, after provision for the payment of the reasonable compensation, expenses, disbursements and advances of the Trustee, its agents and counsel, be for the ratable benefit of the Holders of the Notes in respect of which such judgment has been recovered.

Section 6.5. Application of Money Collected.

Any money collected by the Trustee pursuant to this Article shall be applied in the following order, at the date or dates fixed by the Trustee and, in case of the distribution of such money on account of principal (or premium, if any) or interest, upon presentation of the Notes

and the notation thereon of the payment if only partially paid and upon surrender thereof if fully paid;

FIRST: To the payment of all amounts due to the Trustee and the Agents under this Indenture; and

SECOND: To the payment of the amounts then due and unpaid for principal of (and premium, if any) and interest on the Notes in respect of which or for the benefit of which such money has been collected, ratably, without preference or priority of any kind, according to the amounts due and payable on such Notes for principal (and premium, if any) and interest, respectively.

The Trustee, upon prior written notice to the Issuer, may fix a Record Date and payment date for any payment to the Holders pursuant to this Section 6.5.

Section 6.6. Limitation on Suits.

No Holder of any Note shall have any right to institute any proceeding, judicial or otherwise, with respect to this Indenture, or for the appointment of a receiver or trustee, or for any other remedy hereunder, unless:

(1) such Holder shall have previously given written notice to the Trustee of a continuing Event of Default;

(2) the Holders of at least 25% in aggregate principal amount of the Outstanding Notes shall have made written request to the Trustee to institute proceedings in respect of such Event of Default in its own name as Trustee hereunder and shall have offered to the Trustee indemnity and/or security reasonably satisfactory to the Trustee against the costs, expenses and liabilities to be incurred in compliance with such request;

(3) the Trustee for 60 days after its receipt of such notice, request and offer shall have failed to institute any such proceeding; and

(4) no direction inconsistent with such written request shall have been given to the Trustee during such 60-day period by the Holders of a majority in principal amount of the Outstanding Notes;

it being understood and intended that no one or more Holders shall have any right in any manner whatever by virtue of, or by availing of, any provision of this Indenture or any Note or the Guarantees to affect, disturb or prejudice the rights of any other Holders, or to obtain or to seek to obtain priority or preference over any other Holders or to enforce any right under this Indenture (it being understood that the Trustee does not have an affirmative duty to ascertain whether or not such actions or forbearances are unduly prejudicial to such Holders), any Note or the Guarantees, except in the manner herein provided and for the equal and ratable benefit of all the Holders.

Section 6.7. Unconditional Right of Holders to Receive Principal, Premium and Interest.

Notwithstanding any other provision in this Indenture, the Notes or the Guarantees, the Holder of any Note shall have the right, which is absolute and unconditional, to receive payment of the principal of (and premium, if any) and (subject to Section 3.6) interest on such Note on the respective Stated Maturities expressed in such Note (or earlier Redemption Date) and to institute suit for the enforcement of any such payment, and such rights shall not be impaired without the consent of such Holder.

Section 6.8. Restoration of Rights and Remedies.

If the Trustee or any Holder has instituted any proceeding to enforce any right or remedy under this Indenture, any Note or the Guarantees, and such proceeding has been discontinued or abandoned for any reason, or has been determined adversely to the Trustee or to such Holder, then and in every such case, subject to any determination in such proceeding, the Issuer, the Guarantor, the Trustee and the Holders shall be restored severally and respectively to their former positions hereunder and thereafter all rights and remedies of the Trustee and the Holders shall continue as though no such proceeding had been instituted.

Section 6.9. Rights and Remedies Cumulative.

Except as otherwise provided with respect to the replacement or payment of mutilated, destroyed, lost or stolen Notes in the last paragraph of Section 3.5 hereof, no right or remedy herein conferred upon or reserved to the Trustee or to the Holders is intended to be exclusive of any other right or remedy, and every right and remedy shall, to the extent permitted by law, be cumulative and in addition to every other right and remedy given hereunder or now or hereafter existing at law or in equity or otherwise. The assertion or employment of any right or remedy hereunder, or otherwise, shall not prevent the concurrent assertion or employment of any other appropriate right or remedy.

Section 6.10. Delay or Omission Not Waiver.

No delay or omission of the Trustee or of any Holder of any Note to exercise any right or remedy accruing upon any Event of Default shall impair any such right or remedy or constitute a waiver of any such Event of Default or an acquiescence therein. Every right and remedy given by this Article or by law to the Trustee or to the Holders may be exercised from time to time, and as often as may be deemed expedient, by the Trustee or by the Holders, as the case may be.

Section 6.11. Control by Holders.

The Holders of a majority of the aggregate principal amount of the Outstanding Notes shall have the right to direct the time, method and place of conducting any proceeding for any remedy available to the Trustee or exercising any trust or power conferred on the Trustee, provided that:

(1) such direction shall not be in conflict with any rule of law or with this Indenture or expose the Trustee to personal liability (as determined in the sole discretion of the Trustee); and

(2) the Trustee may take any other action deemed proper by the Trustee which is not inconsistent with such direction.

The Trustee may refuse, however, to follow any direction that the Trustee, in its sole discretion, determines may be unduly prejudicial to the rights of the Holders or that may subject the Trustee to any liability, loss or expense if the Trustee determines, in its sole discretion, that it lacks satisfactory indemnification and/or security against such liability, loss or expense.

Section 6.12. Waiver of Past Defaults.

The Holders of not less than a majority in aggregate principal amount of the Outstanding Notes may by written notice to the Issuer and the Trustee waive any past default hereunder and rescind and annul any declaration of acceleration and its consequences, except a default:

(1) in the payment of the principal of (or premium, if any) or interest on any Note; or

(2) in respect of a covenant or provision hereof which under Article X cannot be modified or amended without the consent of the Holder of each Outstanding Note affected.

Upon any such waiver, such default shall cease to exist, and any Event of Default arising therefrom shall be deemed to have been cured, for every purpose of this Indenture; but no such waiver shall extend to any subsequent or other default or impair any right consequent thereon.

Section 6.13. Undertaking for Costs.

In any suit for the enforcement of any right or remedy under this Indenture or in any suit against the Trustee for any action taken or omitted by it as a Trustee, a court in its discretion may require the filing by any party litigant in the suit of an undertaking to pay the costs of the suit, and the court in its discretion may assess reasonable costs, including reasonable attorney's fees and expenses, against any party litigant in the suit, having due regard to the merits and good faith of the claims or defenses made by the party litigant. This Section 6.13 does not apply to a suit by the Trustee, a suit by a Holder pursuant to Section 6.7 hereof, or a suit by Holders of more than 10% in principal amount of the then Outstanding Notes.

ARTICLE VII

THE TRUSTEE

Section 7.1. Certain Duties and Responsibilities.

(a) Except during the continuance of an Event of Default,

(1) the Trustee undertakes to perform solely such duties and only such duties as are specifically set forth in this Indenture, and Trustee shall not be liable except for the performance of such duties; and no implied covenants or obligations shall be read into this Indenture against the Trustee; and

(2) in the absence of gross negligence on its part, the Trustee may conclusively rely, as to the truth of the statements and the correctness of the opinions expressed therein, upon certificates or opinions furnished to the Trustee and conforming to the requirements of this Indenture; but in the case of any such certificates or opinions which by any provision hereof are specifically required to be furnished to the Trustee, the Trustee shall be under a duty to examine the same to determine whether or not they conform to the form requirements of this Indenture (but need not confirm or investigate the accuracy of mathematical calculations or other facts stated therein).

(b) In case an Event of Default has occurred and is continuing, the Trustee shall exercise such of the rights and powers vested in it by this Indenture, and use the same degree of care and skill in their exercise, as a prudent person would exercise or use under the circumstances in the conduct of such person's own affairs.

(c) No provision of this Indenture shall be construed to relieve the Trustee from liability for its own grossly negligent action or its own willful misconduct, *except* that:

(1) this Subsection shall not be construed to limit the effect of Subsection (a) of this Section;

(2) the Trustee shall not be liable for any error of judgment made in good faith by a Responsible Officer or Officers of the Trustee, unless it shall be proved that the Trustee was grossly negligent in ascertaining the pertinent facts;

(3) the Trustee shall not be liable with respect to any action taken or omitted to be taken by it in good faith in accordance with the direction of the Holders of a majority in principal amount of the Outstanding Note of any series, determined as provided in Section 6.2, relating to the time, method and place of conducting any proceeding for any remedy available to the Trustee, or exercising any trust or power conferred upon the Trustee, under this Indenture with respect to the Note;

(4) no provision of this Indenture shall require the Trustee to expend or risk its own funds or otherwise incur any financial liability in the performance of any of its duties hereunder, or in the exercise of any of its rights or powers, if it shall have reasonable grounds for believing that repayment of such funds or adequate indemnity and/or security against such risk or liability is not reasonably assured to it;

(5) the Trustee shall not be liable in respect of any payment (as to the correctness of amount, entitlement to receive or any other matters relating to payment) or notice effected by the Issuer or any Paying Agent or any records maintained by any co-Note Registrar with respect to the Notes;

(6) if any party fails to deliver a notice relating to an event the fact of which, pursuant to this Indenture, requires notice to be sent to the Trustee, the Trustee may conclusively rely on its failure to receive such notice as reason to act as if no such event occurred, unless a Responsible Officer of the Trustee had actual knowledge of such event;

(7) the delivery of any information to the Trustee under this Indenture, including but not limited to any Rule 144A information, or reports to the Trustee is for informational purposes only and the receipt of such information or reports by the Trustee shall not constitute constructive notice of any information contained therein;

(8) in the absence of written investment direction from the Issuer, all cash received by the Trustee shall be placed in a non-interest bearing trust account, and in no event shall the Trustee be liable for the selection of investments or for investment losses incurred thereon or for losses incurred as a result of the liquidation of any such investment prior to its maturity date or the failure of the party directing such investments prior to its maturity date or the failure of the party directing such investment to provide timely written investment direction, and the Trustee shall have no obligation to invest or reinvest any amounts held hereunder in the absence of such written investment direction from the Issuer;

(9) in the event that the Trustee is also acting as custodian, Registrar, Paying Agent, exchange agent, bid solicitation agent or transfer agent hereunder, the rights and protections afforded to the Trustee pursuant to this Article VII shall also be afforded to such custodian, Registrar, Paying Agent, exchange agent, bid solicitation agent or transfer agent;

(10) any application by the Trustee for written instructions from the Issuer (other than with regard to any action proposed to be taken or omitted to be taken by the Trustee that affects the rights of the Holders of the Notes under this Indenture) may, at the option of the Trustee, set forth in writing any action proposed to be taken or omitted by the Trustee under this Indenture and the date on and/or after which such action shall be taken or such omission shall be effective. The Trustee shall not be liable to the Issuer for any action taken by, or omission of, the Trustee in accordance with a proposal included in such application on or after the date specified in such application (which date shall not be less than three Business Days after the date any officer that the Issuer has indicated to the Trustee should receive such application actually receives such application, unless any such officer shall have consented in writing to any earlier date), unless, prior to taking any such action (or the effective date in the case of any omission), the Trustee shall have received written instructions in accordance with this Indenture in response to such application specifying the action to be taken or omitted.

(d) Whether or not therein expressly so provided, every provision of this Indenture relating to the conduct or affecting the liability of or affording protection to the Trustee shall be subject to the provisions of this Section.

Section 7.2. Notice of Defaults.

The Trustee shall give the Holders notice of any Default ("Notice of Default") that has occurred and is continuing and of which a Responsible Officer of the Trustee has actual knowledge, within 90 days after the occurrence of such Default (but not less than 15 days after knowledge thereof). The Trustee may withhold from Holders notice of any continuing Default or Event of Default (except a Default or Event of Default relating to the payment of principal, premium, if any, or interest on, the Notes) if it determines that withholding such notice is in their interest; provided that, in the case of a default of a character specified in Section 6.1(4), no such notice to Holders shall be given until at least 30 days after the occurrence thereof.

Section 7.3. Certain Rights of Trustee and the Agents.

Subject to the provisions of Section 7.1:

(a) the Trustee and the Agents may rely conclusively and shall be protected in acting or refraining from acting upon any resolution, certificate, statement, instrument, opinion, report, notice, request, direction, consent, order, bond, debenture, note, other evidence of indebtedness or other paper or document believed by it to be genuine and to have been signed or presented by the proper party or parties;

(b) any request or direction of the Issuer mentioned herein shall be sufficiently evidenced by an Issuer Request or an Issuer Order and any resolution of the Board of Directors of the Issuer may be sufficiently evidenced by a Board Resolution;

(c) whenever in the administration of this Indenture the Trustee or an Agent shall deem it desirable that a matter be proved or established prior to taking, suffering or omitting any action hereunder, the Trustee or such Agent, as the case may be, (unless other evidence be herein specifically prescribed) may, in the absence of gross negligence on its part, rely upon an Officer's Certificate or an Opinion of Counsel;

(d) the Trustee or the Agents may consult with counsel of its selection, at the expense of the Issuer, and the advice of such counsel or any Opinion of Counsel shall be full and complete authorization and protection in respect of any action taken, suffered or omitted by it hereunder in good faith and in reliance thereon;

(e) the Trustee and each Agent shall be under no obligation to exercise any of the rights or powers vested in it by this Indenture at the request or direction of any of the Holders pursuant to this Indenture, unless such Holders shall have offered to the Trustee or such Agent, as applicable, security and/or indemnity satisfactory to it against the costs, expenses and liabilities which might be incurred by it in compliance with such request or direction satisfactory to the Trustee or such Agent, as applicable;

(f) neither the Trustee nor any Agent shall be bound to make any investigation into the facts or matters stated in any resolution, certificate, statement, instrument, report, opinion, notice, request, direction, consent, order, bond, debenture, note, other evidence of indebtedness or other paper or document, but the Trustee and each Agent, in its discretion, may make such further inquiry or investigation into such facts or matters as it may see fit, and, if the Trustee or

an Agent shall determine to make such further inquiry or investigation, it shall be entitled to examine the books, records and premises of the Issuer and the Guarantor, personally or by agent or attorney at the sole cost of the Issuer and shall incur no liability or additional liability of any kind by reason of such inquiry or investigation;

(g) the Trustee and each Agent may execute any of the trusts or powers hereunder or perform any duties hereunder either directly or by or through agents or attorneys and the Trustee and each Agent shall not be responsible for any misconduct or negligence on the part, or for the supervision of, any agent or attorney appointed with due care by it hereunder;

(h) neither the Trustee nor any Agent shall be liable for any action taken, suffered or omitted by it in good faith which the Trustee or such Agent, as applicable, believed to have been authorized or within its rights or powers;

(i) neither the Trustee nor any Agent shall be charged with knowledge of any default or Event of Default with respect to the Notes, unless either (1) a Responsible Officer shall have actual knowledge of such default or Event of Default, or (2) written notice of such default or Event of Default shall have been received by a Responsible Officer of the Trustee by the Issuer, the Guarantor or by any Holder of the Notes;

(j) in no event shall the Trustee or any Agent be responsible or liable for special, indirect, punitive or consequential loss or damage of any kind whatsoever (including, but not limited to, loss of profit) irrespective of whether the Trustee or such Agent has been advised of the likelihood of such loss or damage and regardless of the form of action;

(k) the rights, privileges, protections, immunities and benefits given to the Trustee and the Agents, including, without limitation, its right to be indemnified, are extended to, and shall be enforceable by, the Trustee and the Agents in each of their capacities hereunder, and each agent, custodian and other Person employed to act hereunder;

(l) neither the Trustee nor the Agents shall be required to give any bond or surety in respect of the performance of its powers and duties hereunder;

(m) the Trustee and the Agents may request that the Issuer deliver a certificate setting forth the names of individuals and/or titles of officers authorized at such time to take specified actions pursuant to this Indenture; and

(n) the permissive rights of the Trustee enumerated herein shall not be construed as duties.

Section 7.4. Not Responsible for Recitals or Issuance of Notes.

The recitals contained herein, in the Notes and in the Guarantees endorsed thereon, except the Trustee's certificates of authentication, shall be taken as the statements of the Issuer or the Guarantors, as the case may be, and the Trustee assumes no responsibility for their correctness. The Trustee makes no representations as to the validity or sufficiency of this Indenture or the Notes. The Trustee shall not be accountable for the use or application by the Issuer of Notes or the proceeds thereof.

Section 7.5. May Hold Notes.

The Trustee, any Paying Agent or Transfer Agent, any Registrar (if other than the Trustee) or any other agent of the Issuer or the Guarantors, in its individual or any other capacity, may become the owner or pledgee of Notes and, subject to Section 7.8 and 7.12, may otherwise deal with the Issuer and the Guarantors with the same rights it would have if it were not Trustee, Paying Agent, Transfer Agent, Registrar or such other agent.

Section 7.6. Money Held in Trust.

All moneys received by the Trustee or any Paying Agent shall, until used or applied as herein provided, be held in trust for the purposes for which they were received, and need not be segregated from other funds of the Trustee or Paying Agent, except as otherwise required by law. Neither the Trustee nor any Paying Agent shall be under any liability for interest on any moneys received by it hereunder except such as it may agree in writing with the Issuer to pay thereon.

Section 7.7. Compensation and Reimbursement.

The Issuer and the Guarantors agree:

(1) to, jointly and severally, pay to the Trustee and the Agents from time to time upon demand such compensation for all services rendered by it hereunder as shall be agreed upon in writing (which compensation shall not be limited by any provision of law in regard to the compensation of a trustee of an express trust), as such fees may be adjusted from time to time;

(2) except as otherwise expressly provided herein, to, jointly and severally, reimburse each of the Trustee and the Agents upon its request for all reasonable expenses and disbursements incurred or made by it in accordance with any provision of this Indenture (including the reasonable compensation and the expenses and disbursements of their agents and counsel), except any such expense, disbursement or advance as may be attributable to its gross negligence or willful misconduct; and

(3) to, jointly and severally, indemnify each the Trustee and the Agents for, and to hold each harmless against, any loss, liability, cost, damage, claim or expense (including taxes, other than taxes based on or measured by income, and the reasonable compensation, expenses and disbursements of its agents, accountants, experts and counsel) incurred without gross negligence or willful misconduct on its part as determined in a final judgment of a court with competent jurisdiction, arising out of or in connection with the acceptance or administration of this trust or the performance by it of its duties and obligations or the exercise of its rights hereunder, including the costs and expenses of enforcing this Indenture against the Issuer or the Guarantors, as the case may be (including, without limitation, this Section 7.7), and of defending against any claim (whether asserted by any Holder or the Issuer or the Guarantors or any other Person, as the case may be) or liability in connection with the exercise or performance of any of its powers or duties hereunder. The provisions of this Section 7.7 shall survive any termination of this Indenture and the resignation or removal of the Trustee, the Principal Paying Agent or other Paying Agent.

As security for the performance of the obligations of the Issuer or the Guarantors, as the case may be, under this Section 7.7, the Trustee shall have a lien prior to the Notes upon all property and funds held or collected by the Trustee, except funds held in trust for the payment of principal of (and premium, if any) or interest on particular Notes. The Trustee's right to receive payment of any amounts due under this Section 7.7 shall not be subordinate to any other liability or indebtedness of the Issuer or the Guarantors, as the case may be (even though the Notes may be so subordinated).

The obligation of the Issuer under this Section 7.7 shall survive the satisfaction and discharge of this Indenture and the earlier resignation or removal of the Trustee. The indemnification provided in this Section 7.7 shall extend to the officers, directors, agents and employees of the Trustee.

When the Trustee incurs expenses or renders services after an Event of Default specified in Section 6.1 occurs, the expenses and the compensation for such services are intended to constitute expenses of administration under Title 11, U.S. Code, or any similar Federal, State or analogous foreign law for the relief of debtors.

Section 7.8. Corporate Trustee Required; Eligibility.

There shall at all times be a Trustee hereunder which shall be a Person that is eligible pursuant to the Trust Indenture Act to act as such and has a combined capital and surplus of at least U.S.\$50,000,000 and its Corporate Trust Office in The City of New York, New York. If such Person publishes reports of condition at least annually, pursuant to law or to the requirements of a Federal, State, Territorial or District of Columbia supervising or examining authority, then for the purposes of this Section, the combined capital and surplus of such Person shall be deemed to be its combined capital and surplus as set forth in its most recent report of condition so published. If at any time the Trustee shall cease to be eligible in accordance with the provisions of this Section, it shall resign immediately in the manner and with the effect hereinafter specified in this Article.

Section 7.9. Resignation and Removal; Appointment of Successor.

(a) No resignation or removal of the Trustee and no appointment of a successor Trustee pursuant to this Article shall become effective until the acceptance of appointment by the successor Trustee under Section 7.10, at which time the retiring Trustee shall be fully discharged from its obligations hereunder.

(b) The Trustee and the Principal Paying Agent may resign at any time by giving written notice thereof to the Issuer. If an instrument of acceptance by a successor Trustee or Principal Paying Agent shall not have been delivered to the Trustee or Principal Paying Agent, as the case may be, within 30 days after the giving of such notice of resignation, the resigning Trustee or Principal Paying Agent may petition, at the expense of the Issuer, any court of competent jurisdiction for the appointment of a successor Trustee or Principal Paying Agent, as the case may be.

(c) The Trustee may be removed at any time by Act of the Holders of a majority in principal amount of the Outstanding Notes, delivered to the Trustee and to the Issuer. If an

instrument of acceptance by a successor Trustee shall not have been delivered to the Trustee within 30 days after the giving of such notice of removal, the Issuer may petition, at its expense, any court of competent jurisdiction for the appointment of a successor Trustee.

(d) The Agents (other than the Principal Paying Agent) may resign at any time by giving written notice thereof to the Issuer. The Agents may appoint a successor Agent if the Issuer does not.

(e) So long as no Event of Default has occurred and is continuing, the Issuer may remove the Trustee or any Agent and appoint a new Trustee or Agent, as applicable, provided that such Trustee meets the eligibility requirements of Section 7.8.

(f) If at any time:

(1) the Trustee shall fail to comply with Section 7.8 after written request therefor by the Issuer or by any Holder who has been a bona fide Holder of a Note for at least six months; or

(2) the Trustee shall cease to be eligible under Section 7.8 and shall fail to resign after written request therefor by the Issuer or by any such Holder; or

(3) the Trustee shall become incapable of acting or shall be adjudged a bankrupt or insolvent or a receiver of the Trustee or of its property shall be appointed or any public officer shall take charge or control of the Trustee or of its property or affairs for the purpose of rehabilitation, conservation or liquidation, then, in any such case, (i) the Issuer by a Board Resolution may remove the Trustee, or (ii) any Holder who has been a bona fide Holder of a Note for at least six months may, on behalf of himself or herself and all others similarly situated, petition any court of competent jurisdiction for the removal of the Trustee and the appointment of a successor Trustee.

(g) If the Trustee shall resign, be removed or become incapable of acting, or if a vacancy shall occur in the office of Trustee for any cause, the Issuer, by a Board Resolution, shall promptly appoint a successor Trustee. If, within one year after such resignation, removal or incapability, or the occurrence of such vacancy, a successor Trustee shall be appointed by Act of the Holders of a majority in principal amount of the Outstanding Notes delivered to the Issuer and the retiring Trustee, the successor Trustee so appointed shall, forthwith upon its acceptance of such appointment, become the successor Trustee and supersede the successor Trustee appointed by the Issuer. If no successor Trustee shall have been so appointed by the Issuer or the Holders and accepted appointment in the manner hereinafter provided, any Holder who has been a bona fide Holder of a Note for at least six months may, on behalf of himself or herself and all others similarly situated, petition any court of competent jurisdiction at the expense of the Issuer for the appointment of a successor Trustee.

(h) The Issuer shall give notice of each resignation and each removal of the Trustee and each appointment of a successor Trustee to all Holders in the manner provided in Section 1.6. Each notice shall include the name of the successor Trustee and the address of its Corporate Trust Office at the expense of the Issuer.

Section 7.10. Acceptance of Appointment by Successor.

Every successor Trustee appointed hereunder shall execute, acknowledge and deliver to the Issuer, the Guarantors and to the retiring Trustee an instrument accepting such appointment, and thereupon the resignation or removal of the retiring Trustee shall become effective and such successor Trustee, without any further act, deed or conveyance, shall become vested with all the rights, powers, trusts and duties of the retiring Trustee; but, on request of the Issuer or the successor Trustee, such retiring Trustee shall, upon payment of its charges, execute and deliver an instrument transferring to such successor Trustee all the rights, powers and trusts of the retiring Trustee and shall duly assign, transfer and deliver to such successor Trustee all property and money held by such retiring Trustee hereunder, subject nevertheless to its Lien, if any, provided for in Section 7.7. Upon request of any such successor Trustee, the Issuer and the Guarantors shall execute any and all instruments for more fully and certainly vesting in and confirming to such successor Trustee all such rights, powers and trusts. No successor Trustee shall accept its appointment unless at the time of such acceptance such successor Trustee shall be qualified and eligible under this Article.

Section 7.11. Merger, Conversion, Consolidation or Succession to Business.

Any corporation or other entity into which the Trustee may be merged or convened or with which it may be consolidated, or any corporation or other entity resulting from any merger, conversion or consolidation to which the Trustee shall be a party, or any corporation or other entity succeeding to all or substantially all the corporate trust business of the Trustee, shall be the successor of the Trustee hereunder, provided that such corporation or other entity shall be otherwise qualified and eligible under this Article, without the execution or filing of any paper or any further act on the part of any of the parties hereto. In case any Notes shall have been authenticated, but not delivered, by the Trustee then in office, any successor by merger, conversion or consolidation to such authenticating Trustee may adopt such authentication and deliver the Notes so authenticated with the same effect as if such successor Trustee had itself authenticated such Notes.

Section 7.12. Appointment of Authenticating Agent.

The Trustee may appoint an Authenticating Agent or Agents with respect to the Notes which shall be authorized to act on behalf of the Trustee to authenticate Notes issued upon original issue and upon exchange, registration of transfer or partial redemption thereof or pursuant to Section 3.5, and Notes so authenticated shall be entitled to the benefits of this Indenture and shall be valid and obligatory for all purposes as if authenticated by the Trustee hereunder. Wherever reference is made in this Indenture to the authentication and delivery of Notes by the Trustee or the Trustee's certificate of authentication, such reference shall be deemed to include authentication and delivery on behalf of the Trustee by an Authenticating Agent and a certificate of authentication executed on behalf of the Trustee by an Authenticating Agent. Each Authenticating Agent shall be acceptable to the Issuer and shall at all times be a corporation organized and doing business under the laws of the United States, any State thereof or the District of Columbia, authorized under such laws to act as Authenticating Agent, having a combined capital and surplus of not less than U.S.\$50,000,000 and subject to supervision or examination by Federal or State authority. If such Authenticating Agent publishes reports of

condition at least annually, pursuant to law or to the requirements of said supervising or examining authority, then for the purposes of this Section, the combined capital and surplus of such Authenticating Agent shall be deemed to be its combined capital and surplus as set forth in its most recent report of condition so published. If at any time an Authenticating Agent shall cease to be eligible in accordance with the provisions of this Section, such Authenticating Agent shall resign immediately in the manner and with the effect specified in this Section.

Any corporation or other entity into which an Authenticating Agent may be merged or converted or with which it may be consolidated, or any corporation or other entity resulting from any merger, conversion or consolidation to which such Authenticating Agent shall be a party, or any corporation or other entity succeeding to all or substantially all the corporate agency or corporate trust business of an Authenticating Agent, shall continue to be an Authenticating Agent, provided such corporation or other entity shall be otherwise eligible under this Section, without the execution or filing of any paper or any further act on the part of the Trustee or the Authenticating Agent.

An Authenticating Agent may resign at any time by giving written notice thereof to the Trustee and to the Issuer. The Trustee may at any time terminate the agency of an

Authenticating Agent by giving written notice thereof to such Authenticating Agent and to the Issuer. Upon receiving such a notice of resignation or upon such a termination, or in case at any time such Authenticating Agent shall cease to be eligible in accordance with the provisions of this Section, the Trustee may appoint a successor Authenticating Agent which shall be acceptable to the Issuer and shall give notice of such appointment in the manner provided in Section 1.6 to all Holders of Notes. Any successor Authenticating Agent upon acceptance of its appointment hereunder shall become vested with all the rights, powers and duties of its predecessor hereunder, with like effect as if originally named as an Authenticating Agent. No successor Authenticating Agent shall be appointed unless eligible under the provisions of this Section.

The Issuer agrees to pay to each Authenticating Agent from time to time reasonable compensation for its services under this Section.

If an appointment is made pursuant to this Section, the Notes may have endorsed thereon, in lieu of the Trustee's certificate of authentication, an alternative certificate of authentication in the following form:

"This is one of the Notes referred to in the within-mentioned Indenture.

THE BANK OF NEW YORK MELLON
as Trustee

By: _____
as Authenticating Agent"

ARTICLE VIII

HOLDERS LISTS AND COMMUNICATIONS BY TRUSTEE AND ISSUER

Section 8.1. Issuer to Furnish Trustee; Names and Addresses of Holders.

The Issuer will furnish or cause to be furnished to the Trustee

(a) semi-annually, not more than 15 days after each Record Date, a list, in such form as the Trustee may reasonably require, of the names and addresses of the Holders as of such Record Date; and

(b) at such other times as the Trustee may request in writing, within 30 days after the receipt by the Issuer of any such request, a list of similar form and content as of a date not more than 15 days prior to the time such list is furnished;

excluding from any such list names and addresses received by the Trustee in its capacity as Registrar.

Section 8.2. Preservation of Information; Communications to Holders.

(a) The Trustee shall preserve, in as current a form as is reasonably practicable, the names and addresses of Holders contained in the most recent list furnished to the Trustee as provided in Section 8.1 and the names and addresses of Holders received by the Trustee in its capacity as Registrar. The Trustee may destroy any list furnished to it as provided in Section 8.1 upon receipt of a new list so furnished.

(b) If a Holder (herein referred to as an “applicant”) applies in writing to the Trustee, and furnishes to the Trustee reasonable proof that each such applicant has owned a Note for a period of at least six months preceding the date of such application, and such application states that such applicant desires to communicate with other Holders with respect to their rights under this Indenture or under the Notes and is accompanied by a copy of the form of proxy or other communication which such applicant proposes to transmit, then the Trustee shall, within five Business Days after the receipt of such application, at its election, either

(1) afford such applicant access to the information preserved at the time by the Trustee in accordance with Section 8.2(a); or

(2) inform such applications as to the approximate number of Holders whose names and addresses appear in the information preserved at the time by the Trustee in accordance with Section 8.2(a), as to the approximate cost of mailing to such Holders the form of proxy or other communication, if any, specified in such application.

(c) Every Holder of Notes, by receiving and holding the same, agrees with the Issuer and the Trustee that neither the Issuer nor the Trustee nor any agent of either of them shall be held accountable by reason of the disclosure of any such information as to the names and addresses of the Holders in accordance with Section 8.2(b), regardless of the source from which

such information was derived, and that the Trustee shall not be held accountable by reason of mailing any material pursuant to a request made under Section 8.2(b).

ARTICLE IX

CONSOLIDATION, MERGER, CONVEYANCE, TRANSFER OR LEASE

Section 9.1. Mergers, Consolidations and Certain Sales of Assets.

So long as any of the Notes are Outstanding, neither the Issuer nor any Guarantor may, in a single transaction or a series of related transactions:

(1) unless the Issuer or such Guarantor, as applicable, is the surviving Person, consolidate with or merge into any other Person or permit any other Person to consolidate with or merge into the Issuer or such Guarantor, as applicable (other than a consolidation or merger of a Wholly Owned Subsidiary organized under the laws of Luxembourg, Brazil, Peru, the United States or any OECD country, in each case, with or into the Issuer or such Guarantor, as applicable); or

(2) directly or indirectly, transfer, sell, lease or otherwise dispose of all or substantially all of its assets (determined on a consolidated basis of the Issuer and its Subsidiaries or the relevant Guarantor and its Subsidiaries, as applicable) to any Person (other than the Issuer or a Guarantor) (provided that the creation of a Lien on or in any of its assets shall not in and of itself constitute the transfer, sale, lease or disposition of the assets subject to the Lien),

unless the following conditions, to the extent applicable, are met:

(i) in the case of a transaction in which the Issuer or a Guarantor does not survive or in which the Issuer or a Guarantor sells, leases or otherwise disposes of all or substantially all of its assets to any other Person, the successor entity to the Issuer or such Guarantor (1) shall expressly assume, by a supplemental indenture executed and delivered to the Trustee, all of the Issuer's or such Guarantor's obligations under this Indenture and (2) shall be organized under the laws of (x) Luxembourg, Brazil, Peru or any state or political subdivision thereof, (y) the United States or any state thereof or the District of Columbia or (z) any other country if such successor entity undertakes, in such supplemental indenture, to pay such additional amounts in respect of principal (and premium, if any) and interest as may be necessary in order that the net amounts paid pursuant to the Notes after deduction or withholding of any present or future withholding taxes, duties, assessments, levies, imposts or charges whatsoever imposed by or for the account of such country or any political subdivision or taxing authority thereof or therein shall equal the respective amounts of principal (and premium, if any) and interest specified in the Notes, subject to the same exceptions set forth under clauses (1) through (7) of Section 11.9, but replacing existing references in such clauses to the jurisdiction of incorporation of the Issuer or such Guarantor, as applicable, with references to such other country and references to the jurisdiction of incorporation of the Issuer or such

Guarantor, as applicable, under Section 4.1 shall automatically be deemed to be references to such other country;

(ii) if, as a result of any such transaction, property or assets of the Issuer or such Guarantor would become subject to a Lien prohibited by Section 12.10, the Issuer or such Guarantor, as applicable, or the successor entity to the Issuer or such Guarantor, as applicable, shall have secured the Notes as described thereunder; and

(iii) the Issuer or such Guarantor, as applicable, has delivered to the Trustee an Officer's Certificate and an Opinion of Counsel, each stating that such consolidation, merger, conveyance, transfer, lease or acquisition and, if a supplemental indenture is required in connection with such transaction, such supplemental indenture complies with this covenant and that all conditions precedent provided for in this Indenture relating to such transaction have been complied with.

In the event of any transaction (other than a lease) described in and complying with the provisions of this Section 9.1 in which the Issuer or a Guarantor, as applicable, is not the surviving Person and the surviving Person assumes all the obligations of the Issuer or such Guarantor, as applicable, under this Indenture and the Notes or the Guarantee, as applicable, pursuant to a supplemental Indenture, such surviving Person shall succeed to, and be substituted for, and may exercise every right and power of, the Issuer or such Guarantor, as applicable, and the Issuer or such Guarantor, as applicable, will be discharged from its obligations under this Indenture and the Notes or the Guarantee, as applicable.

ARTICLE X

SUPPLEMENTAL INDENTURES

Section 10.1. Supplemental Indentures Without Consent of Holders.

Without the consent of any Holders, the Issuer and the Trustee, at any time and from time to time, may enter into one or more supplemental indentures hereto in form satisfactory to the Trustee, for any of the following purposes:

- (1) to evidence the succession of another Person to the Issuer or any Guarantor and the assumption by any such successor of the covenants of the Issuer or any Guarantor, as applicable, herein and in the Notes or the Guarantees, as applicable;
- (2) to add to the covenants of the Issuer for the benefit of the Holders, or to surrender any right or power herein conferred upon the Issuer;
- (3) to cure any ambiguity, defect or inconsistency or to correct a manifest error;
- (4) to provide for uncertificated Notes in addition to or in place of certificated Notes;
- (5) to comply with Section 9.1 of this Indenture;

- (6) to evidence and provide for the acceptance of an appointment by a successor trustee;
- (7) to provide for any additional guarantee of the Notes;
- (8) to secure the Notes or to confirm and evidence the release, termination or discharge of any guarantee of or Lien securing the Notes when such release, termination or discharge is permitted by this Indenture;
- (9) to provide for or confirm the issuance of Additional Notes;
- (10) to conform the provisions of this Indenture to the caption entitled "Description of the Notes" in the offering memorandum relating to the Notes; or
- (11) to make any other modification and any waiver or authorization of any breach or proposed breach of any provision of this Indenture or the Notes which is not materially prejudicial to the Holders.

Section 10.2. Supplemental Indentures with Consent of Holders.

With the consent of the Holders of not less than a majority in aggregate principal amount of the Outstanding Notes, by Act of said Holders delivered to the Issuer and the Trustee, and consistent with Section 6.13, the Issuer and the Trustee may enter into an indenture or supplemental indentures hereto for the purpose of adding any provisions to or changing in any manner or eliminating any of the provisions of this Indenture or of modifying in any manner the rights of the Holders under this Indenture; provided, however, that no such supplemental indenture shall, without the consent of the Holder of each outstanding Note affected thereby:

- (1) change the Stated Maturity of the principal of, or any installment of interest on, any Note, or reduce the principal amount thereof or the rate of interest thereon or any premium payable thereon, or change the place of payment where, or the coin or currency in which, any Note or any premium or interest thereon is payable, or impair the right to institute suit for the enforcement of any such payment on or with respect to any Note on or after the Stated Maturity thereof (or, in the case of redemption, on or after the Redemption Date),
- (2) reduce the percentage in principal amount of the Outstanding Notes, the consent of whose Holders is required for any such supplemental indenture, or the consent of whose Holders is required for any waiver (of compliance with certain provisions of this Indenture or certain defaults hereunder and their consequences) provided for in this Indenture;
- (3) modify any of the provisions of this Section 10.2 or Section 6.12 or Section 11.9, except to increase any such percentage described in clause (2) above or to provide that certain other provisions of this Indenture cannot be modified or waived without the consent of the Holder of each Outstanding Note affected thereby;

(4) release any Guarantors from its obligations under its Guarantee or this Indenture, except in compliance with the terms of this Indenture.

It shall not be necessary for any Act of Holders under this Section to approve the particular form of any proposed supplemental indenture, but it shall be sufficient if such Act shall approve the substance thereof.

Section 10.3. Execution of Supplemental Indentures.

In executing, or accepting the additional trusts created by, any supplemental indenture permitted by this Article or the modifications thereby of the trusts created by this Indenture, the Trustee shall receive, and (subject to Section 7.1) shall be fully protected in conclusively relying upon, in addition to the documents required by Section 1.2, an Officer's Certificate and Opinion of Counsel stating that the execution of such supplemental indenture is authorized or permitted by this Indenture. The Trustee may, but shall not be obligated to, enter into any such supplemental indenture which affects the trustee's own rights, duties or immunities under this Indenture.

Section 10.4. Effect of Supplemental Indentures.

Upon the execution of any supplemental indenture under this Article, this Indenture shall be modified in accordance therewith, and such supplemental indenture shall form a part of this Indenture for all purposes; and every Holder of Notes theretofore or thereafter authenticated and delivered hereunder shall be bound thereby.

Section 10.5. Reference in Notes to Supplemental Indentures.

Notes authenticated and delivered after the execution of any supplemental indenture pursuant to this Article may, and shall if required by the Trustee, bear a notation in form approved by the Trustee as to any matter provided for in such supplemental indenture. If the Issuer shall so determine, new Notes so modified as to conform, in the opinion of the Issuer, to any such supplemental indenture may be prepared and executed by the Issuer and authenticated and delivered by the Trustee in exchange for Outstanding Notes.

Section 10.6. Notice to Holders.

After a supplemental indenture under this Article becomes effective, the Issuer will send to the Holders affected thereby a notice briefly describing the terms of the supplement. The Issuer will send supplemental indentures to Holders upon request. Any failure of the Issuer to send such notice, or any defect therein, will not, however, in any way impair or affect the validity of any such supplemental indenture.

ARTICLE XI

COVENANTS

Section 11.1. Payment Under the Notes.

Each of the Issuer and the Guarantors shall duly and punctually pay all amounts owed by it, and comply with all its other obligations, under the terms of the Notes, the Guarantees and this Indenture (collectively, the “Transaction Documents”).

Section 11.2. Maintenance of Office or Agency.

The Issuer and the Guarantors will maintain in the Borough of Manhattan, The City of New York, New York, an office or agency where Notes may be presented or surrendered for payment, where Notes may be surrendered for registration of transfer or exchange and where notices and demands to or upon the Issuer or the Guarantors in respect of the Notes, the Guarantees and this Indenture may be served. Initially, this office will be at the Corporate Trust Office of the Trustee, unless the Issuer shall designate and maintain any other office or agency for one or more such purposes, and the Issuer and the Guarantors shall agree not to change the designation of such office without prior written notice to the Trustee and designation of a replacement office in the same general location. The Issuer will give prompt written notice to the Trustee of the location, and any change in the location, of such offices or agencies. If at any time the Issuer or the Guarantors shall fail to maintain any such required offices or agencies or shall fail to furnish the Trustee with the address thereof, such presentations, surrenders, notices and demands may be made or served at the Corporate Trust Office of the Trustee. The Issuer and the Guarantors hereby appoint the Trustee as their agent to receive all such presentations, surrenders, notices and demands.

The Issuer may also from time to time designate one or more other offices or agencies (in or outside the Borough of Manhattan, The City of New York, New York) where the Notes may be presented or surrendered for any or all such purposes and may from time to time rescind such designations (each, a “Transfer Agent”); provided, however, that no such designation or rescission shall in any manner relieve the Issuer of its obligation to maintain an office or agency in the Borough of Manhattan, The City of New York, New York. The Issuer has initially designated the offices of The Bank of New York Mellon to act as Transfer Agent. The Issuer will give prompt written notice to the Trustee of any such designation or rescission and of any change in the location of any such other office or agency.

Section 11.3. Money for Note Payments to Be Held in Trust.

If the Issuer shall at any time act as its own Paying Agent, it will, on or before each due date of the principal of (and premium, if any) or interest on any of the Notes, segregate and hold in trust for the benefit of the Persons entitled thereto a sum sufficient to pay the principal (and premium, if any) or interest so becoming due until such sums shall be paid to such Persons or otherwise disposed of as herein provided and will promptly notify the Trustee in writing of its action or failure so to act.

Whenever the Issuer shall have one or more Paying Agents, it will, prior to each due date of the principal of (and premium, if any) or interest on any Notes, deposit with the Principal Paying Agent a sum sufficient to pay the principal (and premium, if any) or interest (including Additional Amounts, if any) so becoming due, such sum to be held in trust for the benefit of the Persons entitled to such principal, premium or interest, and (unless such Paying Agent is the Trustee) the Issuer will promptly notify the Trustee in writing of its action or failure so to act.

The Issuer will cause each Paying Agent other than the Trustee and the Principal Paying Agent to execute and deliver to the Trustee an instrument in which such Paying Agent shall agree with the Trustee, subject to the provisions of this Section 11.3, that such Paying Agent will:

- (1) hold all sums held by it for the payment of the principal of (and premium, if any) or interest on Notes in trust for the benefit of the Persons entitled thereto until such sums shall be paid to such Persons or otherwise disclosed of as herein provided;
- (2) give the Trustee written notice of any default by the Issuer (or any other obligor upon the Notes) in the making of any payment of principal (and premium, if any) or interest;
- (3) at any time during the continuance of any such default, upon the written request of the Trustee, forthwith pay to the Trustee all sums so held in trust by such Paying Agent; and
- (4) acknowledge, accept and agree to comply in all respects with the provisions of this Indenture relating to the duties, rights and obligations of such Paying Agent.

The Issuer may at any time, for the purpose of obtaining the satisfaction and discharge of this Indenture or for any other purpose, pay, or by Issuer Order direct any Paying Agent to pay, to the Trustee all sums held in trust by the Issuer or such Paying Agent, such sums to be held by the Trustee upon the same trusts as those upon which such sums were held by the Issuer or such Paying Agent; and, upon such payment by any Paying Agent to the Trustee, such Paying Agent shall be released from all further liability with respect to such money.

Any money deposited with the Trustee or any Paying Agent, or then held by the Issuer, in trust for the payment of the principal of (and premium, if any) or interest on any Note and remaining unclaimed for two years after such principal (and premium, if any) or interest has become due and payable shall be paid to the Issuer on the Issuer's Request, or (if then held by the Issuer) shall be discharged from such trust; and the Holder of such Note shall thereafter, as an unsecured general creditor, look only to the Issuer for payment thereof, and all liability of the Trustee or such Paying Agent with respect to such trust money, and all liability of the Issuer as trustee thereof, shall thereupon cease.

Section 11.4. Maintenance of Corporate Existence.

The Issuer and the Guarantors shall, and shall cause each of their respective Subsidiaries to, maintain in effect its corporate existence and all registrations necessary therefor and take all

actions to maintain all rights, privileges, titles to property, franchises and the like necessary or desirable in the normal conduct of its business, activities or operations provided that this covenant shall not require (i) the Issuer, the Guarantors or any of their respective Subsidiaries to maintain any such registration, right, privilege, title to property, franchise or the like or require the Issuer or the Guarantors to preserve the corporate existence of any of their respective Subsidiaries (other than a Subsidiary that is a Guarantor), if the failure to do so would not have a material adverse effect on the Issuer and its Subsidiaries taken as a whole or have a material adverse effect on the rights of the Holders or (ii) the Guarantors or the Issuer to preserve its corporate existence if it complies with the provisions of Section 9.1.

Section 11.5. Repurchases at the Option of the Holders upon Change of Control.

If a Change of Control occurs that results in a Rating Decline, each Holder will have the right to require the repurchase of all or any part (equal to U.S.\$200,000 and integral multiples of U.S.\$1,000 in excess thereof) of the Notes of that Holder pursuant to a Change of Control Offer by the Issuer or the Guarantors. No such purchase in part shall reduce the principal amount of the Notes held by any Holder to below U.S.\$200,000. In the Change of Control Offer, the Issuer or a Guarantor will offer a "Change of Control Payment" in U.S. dollars equal to 101% of the aggregate principal amount of Notes repurchased plus accrued and unpaid interest and Additional Amounts, if any, on the Notes repurchased, to the date of purchase (subject to the right of the Holders of record on the relevant Record Date to receive interest and Additional Amounts, if any, on the relevant Interest Payment Date).

Within 30 days following any Change of Control that results in a Rating Decline the Issuer or the Guarantor will make a "Change of Control Offer" by notice to each Holder of Notes in accordance with the provision set out under Section 1.6, describing the transaction or transactions that constitute the Change of Control and offering to repurchase Notes on the date specified in the notice (the "Change of Control Payment Date"), which date will be no earlier than 30 days and no later than 60 days from the date such notice is mailed, pursuant to the procedures required by this Indenture and described in such notice.

The Issuer or the applicable Guarantor will comply, to the extent applicable, with the requirements of Section 14(e)-1 of the Exchange Act and any other applicable securities laws or regulations in connection with the repurchase of Notes pursuant to this covenant. To the extent that the provisions of any applicable securities laws or regulations conflict with provisions of this covenant, the Issuer or the applicable Guarantor will comply with the applicable securities laws and regulations and will not be deemed to have breached its obligations under this covenant by virtue of its compliance with such securities laws or regulations.

On the Change of Control Payment Date, the Issuer or the applicable Guarantor will, to the extent lawful:

- (1) accept for payment all Notes or portions of Notes properly tendered pursuant to the Change of Control Offer; and
- (2) procure that the Change of Control Payment is made in respect of all Notes or portions of Notes properly tendered.

The Paying Agents will promptly mail to each Holder who properly tendered Notes the Change of Control Payment for such Notes, and the Trustee will promptly authenticate and mail (or cause to be transferred by book entry) to each Holder a new Note equal in principal amount to any unpurchased portion of the Notes surrendered, if any; provided that each new Note will be in minimum denominations of U.S.\$200,000 and integral multiples of U.S.\$1,000 in excess thereof.

The provisions described above that require the Issuer or a Guarantor to make a Change of Control Offer following a Change of Control will be applicable whether or not any other provisions of this Indenture are applicable. However, a Change of Control Offer is only required to be made in the event that a Change of Control results in a Rating Decline. Consequently, if a Change of Control were to occur which does not result in a Rating Decline, none of the Issuer and the Guarantors would be required to launch a Change of Control Offer. Except as described above with respect to a Change of Control, this Indenture does not contain provisions that permit the Holders to require that the Issuer or a Guarantor repurchase or redeem the Notes in the event of a takeover, recapitalization or similar transaction.

None of the Issuer or the Guarantors will be required to make a Change of Control Offer upon a Change of Control if (1) a third party makes the Change of Control Offer in the manner, at the times and otherwise in compliance with the requirements, set forth in this Indenture, that are applicable to a Change of Control Offer made by the Issuer or a Guarantor and such third party purchases all Notes properly tendered and not withdrawn under the Change of Control Offer or (2) a notice of redemption has been given for all outstanding Notes pursuant to this Indenture as described under Section 4.2 unless and until there is a default in payment of the applicable Redemption Price.

Notwithstanding anything to the contrary contained herein and subject to applicable law, a Change of Control Offer may be made in advance of a Change of Control and conditioned upon the occurrence of such Change of Control and Rating Decline if a definitive agreement is in place for the Change of Control at the time of making of the Change of Control Offer.

In the event that the Holders of not less than 85% of the aggregate principal amount of Outstanding Notes accept a Change of Control Offer and the Issuer or a Guarantor or a third party purchases all the Notes held by such holders, the Issuer or a Guarantor will have the right, on not less than 10 nor more than 60 days' prior notice to the Holders, given not more than 30 days following the purchase date pursuant to the Change of Control Offer, to redeem all of the Notes that remain outstanding following such purchase at the purchase price equal to that in the Change of Control Offer plus, to the extent not included in the purchase price, accrued and unpaid interest and Additional Amounts, if any, on the Notes that remain Outstanding, to, but excluding, the date of redemption.

Section 11.6. Payment of Taxes and Other Claims.

The Issuer and the Guarantors shall, and shall cause each of their respective Subsidiaries to, pay or discharge or cause to be paid or discharged before the same shall become delinquent, (i) all taxes, assessments and governmental charges levied or imposed upon the Issuer and the Guarantors or any of their respective Subsidiaries, as the case may be, and (ii) all lawful claims

for labor, materials and supplies which, if unpaid, might by law become a Lien upon the property of the Issuer or a Guarantor or any of their respective Subsidiaries, as the case may be; provided, however, that neither the Issuer nor any Guarantor nor any of their respective Subsidiaries shall be required to pay or discharge or cause to be paid or discharged any such tax, assessment, charge or claim whose amount, applicability or validity is being contested in good faith and, if appropriate, by appropriate legal proceedings, or where the failure to do so would not have a material adverse effect on the Issuer, the Guarantors and their Subsidiaries taken as a whole or have a material adverse effect on the rights of the Holders.

Section 11.7. Provision of Financial Information.

The Issuer has agreed that it will furnish to the Trustee and the Holders and to any prospective purchasers of such Notes, to the extent permitted by applicable law or contractual restrictions, upon their request, the information required to be delivered pursuant to Rule 144A(d)(4) under the Securities Act; provided that the foregoing obligation will only apply to the Issuer if it ceases to be subject to and in compliance with the reporting requirements of Section 13 or 15(d) of the Exchange Act or exempt from reporting pursuant to Rule 12g3-2(b) under the Exchange Act.

Additionally, the Issuer shall provide the Trustee and the Holders, within 120 days of the end of each fiscal year and within 60 days of the end of each of the first three fiscal quarters, annual or quarterly financial statements, as applicable, in accordance with applicable GAAP and audited in the case of annual financial statements.

Notwithstanding the foregoing, if the Issuer makes available the information described above on the Issuer's or an Affiliate's website or on the Electronic Data Gathering, Analysis, and Retrieval (EDGAR) website of the SEC, the Issuer will be deemed to have satisfied the reporting requirement set forth in such applicable clause. It is understood that the Trustee shall have no responsibility to determine whether any information has been posted on such websites.

Delivery of such reports, information and documents to the Trustee is for informational purposes only and the Trustee's receipt of such reports shall not constitute constructive notice of any information contained therein or determinable from information contained therein, including the Issuer's compliance with any of its covenants hereunder (as to which the Trustee is entitled to rely exclusively on an Officer's Certificate or notice). The Trustee shall have no obligation to determine if and when the Issuer's statements or reports are publicly available and accessible electronically.

Section 11.8. Statement by Officers as to Default.

(a) The Issuer will be required to furnish to the Trustee together with the delivery (or the posting on the Issuer's or an Affiliate's website) of its annual financial statements and in any event within 120 days after the end of each such fiscal period, an Officer's Certificate stating whether or not to the best knowledge of the signer thereof none of the Issuer or any Guarantor is in default in the performance and observance of any of the terms, provisions and conditions of this Indenture and if the Issuer or any Guarantor is in default, specifying all such defaults and the nature and status thereof of which they may have knowledge.

(b) The Issuer shall deliver to the Trustee, as soon as is practicable and in any event within ten calendar days after the Issuer becomes aware of the occurrence of a Default or an Event of Default, an Officer's Certificate of the Issuer, setting forth the details of such Default or Event of Default and stating what action the Issuer, proposes to take with respect thereto. None of the Agents shall have notice of any Default or Event of Default unless a Responsible Officer of such Agent has actual knowledge thereof.

Section 11.9. Payment of Additional Amounts.

Any and all payments to a Holder of principal (and premium, if any) and interest in respect of the Notes will be made free and clear of, and without withholding or deduction for, any and all present and future withholding taxes, duties, assessments, levies, imposts or charges ("Taxes") whatsoever imposed by or on behalf of, Luxembourg, Brazil, Peru or any political subdivision or taxing authority thereof or therein or any other jurisdiction from or through which payment on the Notes is made, unless such withholding or deduction is required by law. In that event, the Issuer or a Guarantor, as the case may be, shall pay such additional amounts (the "Additional Amounts") as will result in the receipt by the Holders of such amounts as would have been received by them if no such withholding or deduction had been required, except that no such Additional Amounts shall be payable in respect of any Note:

(1) held by, or by a third party on behalf of, a Holder or beneficial owner which is liable for such taxes, duties, assessments, levies, imposts or charges in respect of such Note by reason of its (or a fiduciary, settlor, member, shareholder or beneficiary of, or possessor of a power over, such Holder, if such Holder is an estate, trust, partnership or corporation) having some present or former connection with Luxembourg, Brazil or Peru (including being or having been a citizen or resident of Luxembourg, Brazil or Peru or being or having been engaged in trade or business therein) other than the mere holding of such Note or the enforcement of rights in respect of such Note; or

(2) where (in the case of a payment of principal, premium, if any, or interest on the Maturity Date or date of earlier redemption) the relevant Note is surrendered for payment more than 30 days after the Relevant Date except to the extent that the relevant Holder would have been entitled to such Additional Amounts if it had surrendered the relevant Note on the last day of such period of 30 days; or

(3) if such tax is an estate, inheritance, gift, sales, transfer or personal property tax or any similar tax, assessment, levy, impost or charge; or

(4) if such tax, duty, assessment, levy, impost or charge is (a) payable other than by withholding or deduction from a payment on such Note, or (b) required to be withheld or deducted by a Paying Agent and such Holder of a Note would have been able to avoid such withholding or deduction by presenting the relevant Note to another Paying Agent; or

(5) if such tax, duty, assessment, levy, impost or charge would not have been imposed but for the failure of a Holder or beneficial owner of the Note to comply with applicable certification, information, documentation or other reporting requirements

concerning the nationality, residence, identity or connection with Luxembourg, Brazil or Peru of such Holder or beneficial owner if (i) such compliance is required as a precondition to relief or exemption from withholding or deduction of all or part of such tax, duty, assessment, levy, impost or charge and (ii) at least 30 days prior to the date on which the Issuer or a Guarantor, as the case may be, applies this clause (5), it will have notified such Holder or beneficial owner that it will be required to comply with such requirement;

(6) if such tax, duty, assessment, levy, impost or charge is payable pursuant to the Luxembourg law dated December 23, 2005, as amended, introducing a domestic withholding tax on interest income for Luxembourg resident individuals (*Relibi law*); or

(7) on account of a payment on such Note that is paid to a Holder that is a fiduciary or partnership or other than the sole beneficial owner of such payment to the extent a beneficiary or settlor with respect to such fiduciary or a member of such partnership or a beneficial owner would not have been entitled to the Additional Amounts had such beneficiary, settlor, member or beneficial owner been the Holder of such note; or

(8) in the case of any combination of items (1) through (7).

"Relevant Date" means whichever is the later of (a) the date on which the payment in question first becomes due and (b) if the full amount payable has not been received by the Paying Agent on or prior to such due date, the date on which (the full amount having been so received) notice to that effect has been given to the Holders.

Notwithstanding anything to the contrary above, none of the Issuer, a Guarantor, any Paying Agent or any other Person shall be required to pay any Additional Amounts with respect to any withholding or deduction imposed on or in respect of any Note pursuant to FATCA, any treaty, law, regulation or other official guidance enacted by any jurisdiction implementing FATCA, or any agreement between the Issuer and the United States or any authority thereof implementing FATCA.

The Issuer or the relevant Guarantor, as applicable, shall pay any present or future stamp, court or documentary taxes, or any other excise or property taxes, charges or similar levies which arise in any jurisdiction from the execution, delivery or registration of the Notes, this Indenture or any other document or instrument referred to therein, excluding any such taxes, charges or similar levies imposed by any jurisdiction outside of Luxembourg, Brazil or Peru, as applicable, except those resulting from, or required to be paid in connection with, (i) the execution in or bringing to such jurisdiction of the Notes or any document or instrument; (ii) the production before a court of such jurisdiction of the Notes or any document or instrument or (iii) the enforcement of the Notes or any other such document or instrument following the occurrence of any Event of Default with respect to the Notes.

References to principal, premium, if any, or interest in this Indenture or the Notes shall be deemed to include any Additional Amounts in respect of principal, premium, if any, or interest (as the case may be) which may be payable under the Notes.

If the Issuer or a Guarantor becomes subject at any time to any taxing jurisdiction other than Luxembourg, Brazil or Peru, references herein to Luxembourg, Brazil or Peru, as applicable, shall be construed to include such other jurisdiction.

The Trustee shall have no obligation to determine whether any Additional Amounts are owed or for the calculation thereof.

Section 11.10. Limitation on Liens.

The Issuer shall not, and shall not permit any of its Designated Subsidiaries to, Incur or suffer to exist any Lien on any of its Restricted Property to secure any Indebtedness of the Issuer or such Designated Subsidiary without making, or causing such Designated Subsidiary to make, effective provision for securing the Notes (x) equally and ratably with (or prior to) such Indebtedness as to such Restricted Property for so long as such Indebtedness will be so secured or (y) in the event such Indebtedness is Indebtedness of the Issuer or such Designated Subsidiary which is subordinate in right of payment to the Notes, prior to such Indebtedness as to any such Restricted Property for so long as such Indebtedness will be so secured.

The foregoing restrictions shall not apply to:

(1) any Lien on the inventory or receivables and related assets (other than those described in clause (3) below) securing obligations:

- (i) under any short term lines of credit, entered into in the normal course of business; or
- (ii) under any working capital facility;

(2) Liens created solely for the purpose of securing the payment of all or a part of the purchase price (or the cost of construction or improvement, and any related transaction fee and expenses) of assets or property (including Capital Stock of any Person) acquired, constructed or improved after the Issue Date; provided that (a) the aggregate principal amount of Indebtedness secured by such Liens shall not exceed the purchase price of the assets or property so acquired, constructed or improved, (b) such Liens shall not encumber any assets or property other than the assets or property so acquired, constructed or improved and other than any unimproved real property on which the property so constructed, or the improvement, is located and (c) such Lien shall attach to such assets or property within 365 days of the construction, acquisition or improvement of such assets or property; provided, further, that to the extent that the property or asset acquired is Capital Stock, and subject to the limitations in clause (c) above, the Lien also may encumber other property or assets of the Person so acquired, provided, further, that any Lien is permitted to be incurred on the Capital Stock of any Person securing any Indebtedness of that Person that is (a) non-recourse to the Issuer or the Designated Subsidiary, and (b) incurred solely for purposes of financing the acquisition, construction or improvement of any property or assets of such Person;

(3) Liens on accounts receivable and related assets in connection with any credit facility, including export or import financings and other trade transactions, or in

connection with any Securitization Transaction provided that the aggregate amount of any Receivables sold or transferred in such Securitization Transaction securing Indebtedness shall not exceed (a) with respect to transactions related to revenues from exports, 80% of such Person's consolidated net sales from exports; or (b) with respect to transactions related to revenues from domestic sales, 80% of such Person's consolidated net sales in the jurisdiction in which such Person is located;

(4) Liens granted to secure borrowings from (i) *Banco Nacional de Desenvolvimento Econômico e Social-BNDES*, or any other federal, regional or state governmental development bank or credit agency, or (ii) any international or multilateral development bank, government-sponsored agency, export-import bank or official export-import credit insurer;

(5) Liens existing on the Issue Date;

(6) Liens on property or shares of Capital Stock of another Person at the time such other Person becomes a Subsidiary; provided, however, that the Liens may not extend to any other property owned by such Person;

(7) Liens on property at the time such Person or any of its Subsidiaries acquires the property, including any acquisition by means of a merger or consolidation with or into such Person or a Subsidiary of such Person; provided, however, that the Liens may not extend to any other property owned by such Person;

(8) Liens securing Indebtedness or other obligations of a Subsidiary of such Person owing to such Person or a Subsidiary of such Person;

(9) Liens in favor of surety bonds or letters of credit issued pursuant to the request of, and for the account of, such Person in the ordinary course of its business;

(10) any Lien securing obligations owed under applicable Peruvian laws to the Peruvian Ministry of Energy and Mines or other governmental authorities incurred in the ordinary course of business, including but not limited to, mine closure plans;

(11) Liens securing obligations under hedging agreements not for speculative purposes;

(12) any Lien extending, renewing or replacing (or successive extensions, renewals or replacements of), in whole or in part, any Lien referred to in clauses (2), (4), (5), (6) or (7) above; provided that the principal amount of Indebtedness secured thereby shall not exceed the principal amount of Indebtedness so secured at the time of such extension, renewal or replacement except for any increase reflecting premiums, fees and expenses in connection with such extension, renewal or replacement, and that such extension, renewal or replacement shall be limited to all or a part of the property which secured the Lien so extended, renewed or replaced (plus improvements on such property); and

(13) Lien that do not fall within clauses (1) through (12) above and that secure Indebtedness which, exclusive of Indebtedness secured by other Liens permitted under this covenant, does not exceed an aggregate principal amount equal to 20% of Consolidated Total Assets.

For the avoidance of doubt, a Lien permitted by this Section 11.10 need not be permitted solely by reference to a single clause permitting such Lien, but may be permitted in part by such clause and in part by one or more other clauses of this covenant otherwise permitting such Lien.

Section 11.11. [Intentionally Omitted].

Section 11.12. Performance Obligations Under Other Documents.

The Issuer shall duly and punctually perform, comply with and observe all obligations and agreements to be performed by it set forth in the Transaction Documents.

Section 11.13. Compliance with Laws.

Each of the Issuer and the Guarantors shall comply, and shall cause their respective Subsidiaries to comply, at all times with all applicable laws, rules, regulations, orders and directives of any government or government agency or authority having jurisdiction over the Issuer or any Guarantors, any of their respective Subsidiaries or the business of any of them or any of the transactions contemplated herein, except where the failure to do so would not have a material adverse effect on the Issuer and its Subsidiaries taken as a whole or have a material adverse effect on the rights of the Holders.

Section 11.14. Maintenance of Government Approvals.

Each of the Issuer and the Guarantors shall, and shall cause their respective Subsidiaries to, duly obtain and maintain in full force and effect all governmental approvals, consents or licenses of any government or governmental agency or authority under the laws of Luxembourg, Brazil, Peru (including any Central Bank) or any other government or government agency having jurisdiction over the Issuer or necessary in all cases for the Guarantors and the Issuer to perform their respective obligations under the Transaction Documents or for the validity or enforceability thereof, except where the failure to do so would not have a material adverse effect on the Issuer and its Subsidiaries taken as a whole or have a material adverse effect on the rights of the Holders.

Section 11.15. [Intentionally Omitted].

Section 11.16. Maintenance of Books and Records.

Each of the Issuer and the Guarantors shall, and shall cause each of their respective Subsidiaries to, maintain books, accounts and records in all material respects in accordance with applicable GAAP, and in any case in the manner necessary to facilitate consolidation into the Guarantors' consolidated financial statements.

Section 11.17. Ranking.

The Issuer shall ensure that the Notes will constitute senior unsecured and unsubordinated obligations of the Issuer, and will rank at least equally to all other present and future senior unsecured and unsubordinated obligations of the Issuer (other than obligations preferred by statute or by operation of law). Each of the Guarantors shall ensure that its Guarantee will constitute senior unsecured and unsubordinated obligations of such Guarantor, and will rank at least equally to all other present and future senior unsecured and unsubordinated obligations of the Guarantors (other than obligations preferred by statute or by operation of law). No obligation will be considered to be senior to the Notes or the Guarantees by virtue of being secured on a first or junior priority basis.

ARTICLE XII

LEGAL DEFEASANCE AND COVENANT DEFEASANCE

Section 12.1. Option to Effect Defeasance or Covenant Defeasance.

The Issuer or a Guarantor may at its option, at any time elect to have either Section 12.2 or Section 12.3 applied to the Outstanding Notes upon compliance with the conditions set forth below in this Article XII.

Section 12.2. Defeasance and Discharge.

Upon the Issuer's or a Guarantor's exercise of the option provided in Section 12.1 applicable to this Section, the Issuer and a Guarantor shall be deemed to have been discharged from their obligations with respect to the Outstanding Notes on the date the conditions set forth below are satisfied (hereinafter, "defeasance"). For this purpose, such defeasance means that the Issuer and a Guarantor shall be deemed to have paid and discharged the entire indebtedness represented by the Outstanding Notes and to have satisfied all their other obligations under such Notes and this Indenture insofar as such Notes are concerned (and the Trustee, at the expense of the Issuer and a Guarantor, shall execute proper instruments acknowledging the same), except for the following which shall survive until otherwise terminated or discharged hereunder: (A) the rights of Holders of Outstanding Notes to receive, solely from the trust fund described in Section 12.4 and as more fully set forth in such Section, payments in respect of the principal of (and premium, if any) and interest (and Additional Amounts, if any) on such Notes when such payments are due, (B) the Issuer's and the Guarantors' obligations with respect to such Notes under Sections 3.3, 3.4, 3.5, 11.2 and 11.3, (C) the rights, powers, trusts, duties and immunities of the Trustee hereunder and (D) this Article XII. Subject to compliance with this Article XII, the Issuer and the Guarantors may exercise their option under this Section 12.2 notwithstanding the prior exercise of their option under Section 12.3.

Section 12.3. Covenant Defeasance.

Upon the Issuer or a Guarantor's exercise of the option provided in Section 12.1 applicable to this Section, (i) the Issuer and the Guarantors shall be released from their obligations under Sections Section 9.1 and 11.15 through 11.17, inclusive and the Guarantors shall be released from all of its obligations under the Guarantees and under Article XIII of this Indenture, and (ii) the occurrence of an event specified in Section 6.1(3) (with respect to Section 9.1 and Sections 11.15 through 11.17, inclusive) shall not be deemed to be or result in an Event of Default, on and after the date the conditions set forth below are satisfied (hereinafter, "covenant defeasance"). For this purpose, such covenant defeasance means that the Issuer and the Guarantors may omit to comply with and shall have no liability in respect of any term, condition or limitation set forth in any such Section or Article, whether directly or indirectly by reason of any reference elsewhere herein to any such Section or Article or by reason of any reference in any such Section or Article to any other provision herein or in any other document, but the remainder of this Indenture and such Notes shall be unaffected thereby.

Section 12.4. Conditions to Defeasance or Covenant Defeasance.

The following shall be the conditions to application of either Section 12.2 or Section 12.3 to the Outstanding Notes:

(1) the Issuer or a Guarantor shall irrevocably have deposited or caused to be deposited with the Trustee or its designee, in trust, for the benefit of the Holders (A) cash, (B) Cash Equivalents, (C) U.S. Government Obligations, or (D) a combination thereof, sufficient, in the written opinion of an internationally recognized firm of independent certified public accountants, investment bank or consulting firm to pay and discharge, the principal of, premium, if any, and each installment of interest (including Additional Amounts, if any) on the Notes on the Stated Maturity of such principal or installment of interest on the day on which such payments are due and payable in accordance with the terms of this Indenture and of such Notes. For this purpose, "U.S. Government Obligations" means securities that are (x) direct obligations of the United States for the payment of which its full faith and credit is pledged or (y) obligations of a Person controlled or supervised by and acting as an agency or instrumentality of the United States the payment of which is unconditionally guaranteed as a full faith and credit obligation by the United States, which, in either case, are not callable or redeemable at the option of the issuer thereof, and shall also include a depositary receipt issued by a bank (as defined in Section 3(a)(2) of the Securities Act) as custodian with respect to any such U.S. Government Obligation or a specific payment of principal of or interest on any such U.S. Government Obligation held by such custodian for the account of the Holder of such depositary receipt, provided that (except as required by law) such custodian is not authorized to make any deduction from the amount payable to the Holder of such depositary receipt from any amount received by the custodian in respect of the U.S. Government Obligation or the specific payment of principal of or interest on the U.S. Government Obligation evidenced by such depositary receipt;

(2) no Default or Event of Default shall have occurred and be continuing on the date of such deposit;

(3) the Issuer or a Guarantor shall have delivered to the Trustee an Officer's Certificate and an Opinion of Counsel, each stating that all conditions precedent provided for relating to either the defeasance under Section 12.2 or the covenant defeasance under Section 12.3 (as the case may be) have been complied with;

(4) in the case of an election under Section 12.2, the Issuer or a Guarantor shall have delivered to the Trustee an Opinion of Counsel from counsel in the United States stating that (x) the Issuer or a Guarantor has received from, or there has been published by, the Internal Revenue Service a ruling, or (y) since the date of this Indenture there has been a change in the applicable United States Federal income tax law, in either case to the effect that, and based thereon such Opinion of Counsel shall confirm that, the beneficial owners of the Outstanding Notes will not recognize income, gain or loss for United States Federal income tax purposes as a result of such deposit, defeasance and discharge and will be subject to United States Federal income tax on the same amounts, in the same manner and at the same times as would have been the case if such deposit, defeasance and discharge had not occurred; and

(5) in the case of an election under Section 12.3, the Issuer or a Guarantor shall have delivered to the Trustee an Opinion of Counsel from counsel in the United States to the effect that the beneficial owners of the Outstanding Notes will not recognize income, gain or loss for United States Federal income tax purposes as a result of such deposit and covenant defeasance and will be subject to United States Federal income tax on the same amounts, in the same manner and at the same times as would have been the case if such covenant defeasance had not occurred.

Section 12.5. Deposited Money and U.S. Government Obligations to Be Held in Trust; Other Miscellaneous Provisions.

Subject to the provisions of the last paragraph of Section 11.3, all money and U.S. Government Obligations (including the proceeds thereof) deposited with the Trustee (or other qualifying trustee—collectively, for purposes of this Section 12.5, the “Defeasance Trustee”) pursuant to Section 12.4 in respect of the Notes shall be held in trust and applied by the Defeasance Trustee, in accordance with the provisions of such Notes and this Indenture, to the payment, either directly or through any Paying Agent (including the Issuer or a Guarantor acting as their own Paying Agent) as the Defeasance Trustee may determine, to the Holders of such Notes, of all sums due and to become due thereon in respect of principal (and premium, if any) and interest, but such money need not be segregated from other funds except to the extent required by law.

The Issuer and the Guarantors shall, jointly and severally, pay and indemnify the Defeasance Trustee against any tax, fee or other charge imposed on or assessed against the U.S. Government Obligations deposited pursuant to Section 12.4 or the principal and interest received in respect thereof other than any such tax, fee or other charge which by law is for the account of the Holders of the Outstanding Notes.

Anything in this Article to the contrary notwithstanding, the Defeasance Trustee shall deliver or pay to the Issuer from time to time upon Issuer Request any money or U.S. Government Obligations held by it as provided in Section 12.4 which, in the opinion of an internationally recognized accounting firm expressed in a written certification thereof delivered to the Defeasance Trustee, are in excess of the amount thereof which would then be required to be deposited to effect an equivalent defeasance or covenant defeasance.

Section 12.6. Reinstatement.

If the Defeasance Trustee or the Paying Agent is unable to apply any money in accordance with Section 12.2 or 12.3 by reason of any order or judgment of any court or governmental authority enjoining, restraining or otherwise prohibiting such application, then the obligations of the Issuer and the Guarantors under this Indenture, the Guarantees and the Notes, if any, shall be revived and reinstated as though no deposit had occurred pursuant to this Article until such time as the Defeasance Trustee or Paying Agent is permitted to apply all such money in accordance with Section 12.2 or 12.3; provided, however, that if the Issuer or the Guarantors makes any payment of principal of (and premium, if any) any Note following the reinstatement of such obligations, the Issuer or the Guarantors shall be subrogated to the rights of the Holders of such Notes to receive such payment from the money held by the Defeasance Trustee or the Paying Agent.

Section 12.7. Repayment to Issuer or the Guarantors.

Any money deposited with the Defeasance Trustee or any Paying Agent, or then held by the Issuer or a Guarantor, in trust for the payment of the principal of, premium, if any, or interest on any Note and remaining unclaimed for two years after such principal, and premium, if any, or interest has become due and payable shall be paid to the Issuer or the Guarantors on its written request or (if then held by the Issuer or the Guarantors) shall be discharged from such trust; and the Holder of such security shall thereafter, as a creditor, look only to the Issuer or the Guarantors for payment thereof, and all liability of the Defeasance Trustee or such Paying Agent with respect to such trust money, and all liability of the Issuer or the Guarantor as trustee thereof, shall thereupon cease; provided, however, that the Defeasance Trustee or such Paying Agent, before being required to make any such repayment, shall at the expense of the Issuer and the Guarantors cause to be published once, in *The New York Times* and *The Wall Street Journal* (national edition), notice that such money remains unclaimed and that, after a date specified therein, which shall not be less than 30 days from the date of such notification or publication, any unclaimed balance of such money then remaining will be repaid to the Issuer or the Guarantors.

ARTICLE XIII

SUBSTITUTION OF THE ISSUER

Section 13.1. Substitution of the Issuer.

Notwithstanding any other provision contained in this Indenture,

(a) the Issuer may, without the consent of the Holders of the Notes (and by subscribing for any Notes, each Holder of the Notes expressly consents to it), be replaced and substituted by (i) any Wholly Owned Subsidiary of the Issuer or (ii) any Permitted Holding Company as principal debtor (in such capacity, the "Substituted Issuer") in respect of the Notes provided that:

(1) such documents (together, the "Issuer Substitution Documents") shall be executed by the Substituted Issuer, the Issuer and the Trustee as may be necessary to give

full effect to the substitution, including a supplemental indenture whereby (i) the Substituted Issuer assumes all of the Issuer's obligations under this Indenture and the Notes and (ii) the Issuer (the "Additional Guarantor") guarantees on an unsecured and unsubordinated basis the due and punctual payment of all amounts under this Indenture and with respect to the Notes (without limiting the generality of the foregoing) pursuant to which the Substituted Issuer shall undertake in favor of each Holder of the Notes to be bound by the terms and conditions of the Notes and the provisions of this Indenture as fully as if the Substituted Issuer had been named in the Notes and this Indenture as the principal debtor in respect of the Notes in place of the Issuer (or any previous substitute) and pursuant to which the Additional Guarantor will guarantee on an unsecured and unsubordinated basis the due and punctual payment of all amounts under this Indenture and with respect to the Notes (together, the "Substitution");

(2) if the Substituted Issuer is organized in a jurisdiction other than Luxembourg, the Issuer Substitution Documents shall contain a covenant by the Substituted Issuer and/or such other provisions as may be necessary to ensure that each Holder of the Notes has the benefit of a covenant in terms corresponding to the obligations of the Issuer in respect of the payment of Additional Amounts set forth in Section 11.9, and the Substituted Issuer will have a corresponding right of tax redemption set forth in Section 4.1, with the substitution in each case for the references to Luxembourg for references to the jurisdiction in which the Substituted Issuer is organized;

(3) if the Substituted Issuer is organized in a jurisdiction other than Luxembourg, the Issuer Substitution Documents shall contain a covenant by the Additional Guarantor and/or such other provisions as may be necessary to ensure that each Holder of the Notes has the benefit of a covenant in terms corresponding to the obligations of the Additional Guarantor as a guarantor of the Notes in respect of the payment of Additional Amounts set forth in Section 11.9 (but with references to Luxembourg as the jurisdiction of incorporation of the Additional Guarantor);

(4) if the Substituted Issuer is organized in a jurisdiction other than Luxembourg, the Issuer Substitution Documents shall also contain a covenant by the Substituted Issuer to indemnify each Holder and beneficial owner of the Notes, the Trustee and the Agents against all taxes or duties which arise by reason of a law or regulation in effect or contemplated on the effective date of the Substitution, which may be incurred or levied against such Holder or beneficial owner of the Notes or Trustee or Agent as a result of the Substitution and which would not have been so incurred or levied had the Substitution not been made, subject to similar exceptions set forth under clauses (1) through (7) of Section 11.9, *mutatis mutandis*; provided, that any Holder or beneficial owner of the Notes making a claim with respect to such tax indemnity shall provide the Issuer and the Substituted Issuer with notice of such claim, along with supporting documentation, within four weeks of the announcement of the Substitution of the Substituted Issuer as issuer; provided, further, that none of the Issuer (including the Substituted Issuer), the Guarantors (including the Additional Guarantor), any Paying Agent or any other Person shall be required to indemnify any Holder or beneficial owner of the Notes for any taxes imposed pursuant to FATCA, any treaty, law, regulation or

other official guidance enacted by any jurisdiction implementing FATCA, or any agreement between the Issuer or the Substituted Issuer and the United States or any authority thereof implementing FATCA;

(5) the Substituted Issuer shall have delivered, or procured the delivery to the Trustee of, an Opinion of Counsel addressed to the Substituted Issuer from a leading firm of lawyers in the country of incorporation of the Substituted Issuer, to the effect that the Issuer Substitution Documents constitute legal, valid and binding obligations of the Substituted Issuer and the Additional Guarantor;

(6) the Issuer shall have delivered, or procured the delivery to the Trustee of, an Opinion of Counsel addressed to the Issuer and the Substituted Issuer from a leading firm of New York lawyers to the effect that the Issuer Substitution Documents constitute legal, valid and binding obligations of the Substituted Issuer and the Additional Guarantor under New York law;

(7) the Issuer and the Substituted Issuer shall have appointed a process agent in the Borough of Manhattan, the City of New York to receive service of process on its behalf in relation to any legal action or proceedings arising out of or in connection with the Issuer Substitution Documents;

(8) there is no continuing Event of Default in respect of the Notes.

(b) Upon effectiveness of the substitution, the Substituted Issuer and the Issuer shall deliver to the Trustee an Officer's Certificate, executed by an Authorized Officer, certifying that the terms of this section have been complied with and attaching copies of all documents contemplated herein.

(c) Upon the execution of the Issuer Substitution Documents as referred to in paragraph (a)(1) above and compliance with the other conditions in paragraph (a), (1) the Substituted Issuer shall be deemed to be named in the Notes as the principal debtor in place of the Issuer (or of any previous substitute under these provisions), (2) the Additional Guarantor shall be deemed to be named as a guarantor of the Notes and (3) the Notes shall thereupon be deemed to be amended to give effect to the transactions referred to in (1) and (2). Except as set forth above, the execution of the Issuer Substitution Documents shall operate to release the Issuer (or such previous substitute as aforesaid) from all its obligations as issuer of the Notes.

(d) Not later than 10 Business Days after the execution of the Issuer Substitution Documents, the Substituted Issuer shall give notice thereof to the Holders of the Notes in accordance with the provisions described under Section 1.6.

ARTICLE XIV

GUARANTEES

Section 14.1. Guarantees.

Nexa CJM and Nexa Brazil hereby, jointly, severally, fully, absolutely and unconditionally guarantee on an unsecured basis to each Holder of a Note authenticated and delivered by the Trustee, and to the Trustee on behalf of such Holder, and for itself and the Paying Agents, the due and punctual payment of the principal of (and premium, if any) and interest (including any Additional Amounts) on such Note and all other obligations of the Issuer under this Indenture, when and as the same shall become due and payable, whether at the Stated Maturity or by acceleration, redemption, purchase or otherwise, in accordance with the terms of such Note and of this Indenture. In case of the failure of the Issuer punctually to make any such payment, each of the Guarantors hereby agrees to cause such payment to be made punctually when and as the same shall become due and payable, whether at the Stated Maturity or by acceleration, call for redemption, purchase or otherwise, and as if such payment were made by the Issuer.

The Guarantees constitute unconditional and unsubordinated obligations of each of the Guarantors that will at all times rank at least equally with all other present and future unsecured senior obligations of each such Guarantor, except for any obligations that may be preferred by provisions of law that are both mandatory and of general application.

Each of the Guarantors hereby agrees that its obligations hereunder shall be unconditional, irrespective of the validity, regularity or enforceability of any Note or this Indenture, the absence of any action to enforce the same, any release or amendment or waiver of any term of any other guarantee of, or any consent to depart from any requirement of any other guarantee, of all or any of the Notes, any waiver or consent by the Holder of any Note or by the Trustee with respect to any provisions thereof or of this Indenture, the obtaining of any judgment against the Issuer or any action to enforce the same or any other circumstances which might otherwise constitute a legal or equitable discharge or defense of a guarantor. Each of the Guarantors hereby waives notice of the acceptance of its Guarantee and of any of the obligations under this Indenture or the Notes (the “Obligations”) or of the accrual thereof, and further waives presentment, protest, notice or demand. This is a continuing guarantee and is a guarantee of payment and not of collection, and each of the Guarantors waives any right to require the Holders to initiate collection proceeds or otherwise enforce payment of the Obligations or any security or other guarantee therefor before obtaining payment hereunder.

The Guarantees shall continue to be in effect or be reinstated, as the case may be, if at any time (i) any payment in respect of any of the Obligations is rescinded or must otherwise be returned by the Holders, whether by reason of the insolvency, bankruptcy, receivership, reorganization or liquidation of the Issuer or any Guarantor or any other obligor or otherwise, all as though such payment had not been made or (ii) a Substituted Issuer, as defined in Section 13.1, assumes the Issuer’s obligations under the Notes pursuant to Article XIII hereof.

Each of the Guarantors hereby waives the benefits of diligence, presentment, demand of payment, any requirement that the Trustee or any of the Holders protect, secure, perfect or insure any security interest in or other Lien on any property subject thereto or exhaust any right or take any action against the Issuer or any other Person or any collateral, filing of claims with a court in the event of insolvency or bankruptcy of the Issuer, any right to require a proceeding first against the Issuer, protest or notice with respect to any Note or the indebtedness evidenced thereby and all demands whatsoever, and covenants, that these Guarantees will be discharged in respect of

any Note except by complete performance of the obligations contained in such Note and in the Guarantees. Each of the Guarantors hereby agrees that, in the event of a default in payment of principal (or premium, if any) or interest on any Note, whether at its Stated Maturity or by acceleration, redemption, purchase or otherwise, legal proceedings may be instituted by the Trustee on behalf of, or by, the Holder of such Note, subject to the terms and conditions set forth in this indenture, directly against any or all of the Guarantors to enforce the Guarantees without first proceeding against the Issuer. Each of the Guarantors agrees that if, after the occurrence and during the continuance of an Event of Default, the Trustee or any of the Holders are prevented by applicable law from exercising their respective rights to accelerate the maturity of the Notes, to collect interest on the Notes or to enforce or exercise any other right or remedy with respect to the Notes, or the Trustee or the Holders are prevented from taking any action to realize on any collateral, each of the Guarantors agrees to pay to the Trustee for the account of the Holders, upon demand therefor, the amount that would otherwise have been due and payable had such rights and remedies been permitted to be exercised by the Trustee or any of the Holders.

No provision of the Guarantees, Notes or of this Indenture shall alter or impair the Guarantees of the Guarantors, of which the Guarantees are absolute and unconditional, of the due and punctual payment of the principal (and premium, if any) and interest (and Additional Amounts, if any) on the Note and the obligation under this Indenture upon which each Guarantee is endorsed.

Each of the Guarantors shall be subrogated to all rights of the Holders of the Notes upon which its Guarantee is endorsed against the Issuer in respect of any amounts paid by each of the Guarantors on account of such Note pursuant to the provisions of the Guarantees or this Indenture; provided, however, that none of the Guarantors shall be entitled to enforce or to receive any payments arising out of, or based upon, such right of subrogation until the principal of (and premium, if any) and interest (and Additional Amounts, if any) on all Notes issued hereunder shall have been paid in full.

The Guarantees shall remain in full force and effect and continue to be effective should any petition be filed by or against the Issuer for liquidation or reorganization, should the Issuer become insolvent or make an assignment for the benefit of creditors or should a receiver or trustee be appointed for all or any significant part of the Issuer's assets, and shall, to the fullest extent permitted by law, continue to be effective or be reinstated, as the case may be, if at any time payment and performance of the obligations under the Notes is, pursuant to applicable law, rescinded or reduced in amount, or must otherwise be restored or returned by any obligee on the Notes, whether as a "voidable preference," "fraudulent transfer" or otherwise, all as though such payment or performance had not been made. In the event that any payment, or any part thereof, is rescinded, reduced, restored or returned, the Notes shall, to the fullest extent permitted by law, be reinstated and deemed reduced only by such amount paid and not so rescinded, reduced, restored or returned.

Each of the Guarantors hereby irrevocably waives all benefits set forth in the following provisions of the Brazilian law: articles 333, sole paragraph, 366, 368, 827, 829, sole paragraph, 830, 834, 835, 837 and 838 of the Brazilian Civil Code and articles 130 and 794 of the Brazilian Civil Procedure Code.

No stockholder, officer, director, employer or incorporator, past, present or future, of any Guarantor, as such, shall have any personal liability under the Guarantee by reason of his, her or its status as such stockholder, officer, director, employer or incorporator.

Section 14.2. Delivery of the Guarantee.

The delivery of any Note by the Trustee, after the authentication thereof hereunder, shall constitute due delivery of the Guarantees set forth herein on behalf of the Guarantors.

Section 14.3. Release of Guarantor.

(a) Concurrently with any consolidation or merger of any of the Guarantors or any sale or conveyance of the property of any of the Guarantors as an entirety or substantially as an entirety, in each case as permitted by Section 9.1(a) hereof, and upon delivery by such Guarantor to the Trustee of an Officer's Certificate and an Opinion of Counsel to the effect that such consolidation, merger, sale or conveyance was made in accordance with Section 9.1(a) hereof, the Trustee shall execute any documents reasonably required in order to evidence the release of such Guarantor from its obligations under its Guarantee endorsed on the Notes and under this Article XIV.

(b) Concurrently with the defeasance of the Notes under Section 12.2 hereof or the covenant defeasance of the Notes under Section 12.3 hereof, each of the Guarantors shall be released from all of its obligations under its Guarantee endorsed on the Notes and under this Article XIV.

ARTICLE XV

MEETINGS OF HOLDERS OF SECURITIES

Section 15.1. Purposes for Which Meetings May Be Called.

A meeting of Holders of Notes may be called at any time and from time to time pursuant to this Article to consider any matter affecting their interests, including, if proposed by the Issuer, the modification of the terms and conditions of the Notes; provided that any modification postponing the date for payment of any interest, reducing or canceling any amount of principal or the rate of interest payable or altering the currency of payment in respect of the Notes will only be binding if passed at a meeting of Holders at which a special quorum (as set forth in Section 15.4) is present.

Section 15.2. Call, Notice and Place of Meetings.

(1) The Trustee may at any time call a meeting of Holders of Notes of any series for any purpose specified in Section 15.1, to be held at such time and at such place in the Borough of Manhattan, The City of New York as the Trustee shall determine. Notice of every meeting of Holders of Notes, setting forth the time and the place of such meeting and in general terms the action proposed to be taken at such meeting, shall be given, in the manner provided in Section 1.6, not less than 21 nor more than 180 days prior to the date fixed for the meeting.

(2) In case at any time the Issuer, pursuant to a Board Resolution, or the Holders of at least 10% in principal amount of the Outstanding Notes shall have requested the Trustee to call a meeting of the Holders of Notes for any purpose specified in Section 15.1, by written request setting forth in reasonable detail the action proposed to be taken at the meeting, and the Trustee shall not have made the first publication of the notice of such meeting within 21 days after receipt of such request or shall not thereafter proceed to cause the meeting to be held as provided herein, then the Issuer or the Holders of Notes in the amount specified above, as the case may be, may determine the time and the place in the Borough of Manhattan, The City of New York for such meeting and may call such meeting for such purposes by giving notice thereof as provided in subsection (1) of this Section.

Section 15.3. Persons Entitled to Vote at Meetings.

To be entitled to vote at any meeting of Holders of Notes, a Person shall be (i) a Holder on a Record Date established pursuant to Section 15.5 of one or more Outstanding Notes, or (ii) a Person appointed by an instrument in writing as proxy for a Holder or Holders of one or more Outstanding Notes by such Holder or Holders. The only Persons who shall be permitted to be present or to speak at any meeting of Holders of Notes of any series shall be the Persons entitled to vote at such meeting and their counsel, any representatives of the Trustee and its counsel and any representatives of the Issuer and its counsel.

Section 15.4. Quorum; Action.

The Persons entitled to vote a majority in principal amount of the Outstanding Notes shall constitute a “quorum” for a meeting of Holders of Notes, however, any modification postponing the date for payment of any interest, reducing or canceling any amount of principal or the rate of interest payable or altering the currency of payment in respect of the Notes will only be binding if passed at a meeting of Holders of at least 66 ⅔% of the Notes (a “special quorum”). In the absence of a quorum or a special quorum, as the case may be, within 15 minutes (or such longer period not exceeding 30 minutes as the chairman may decide) of the time appointed for any such meeting, the meeting shall if convened upon the requisition of Holders be dissolved. In any other case it shall stand adjourned to the same day in the next week (or if such day is not a Business Day the next succeeding Business Day) at the same time and place. If within 15 minutes (or such longer period not exceeding 30 minutes as the chairman may decide) after the time appointed for any adjourned meeting a quorum or a special quorum, as the case may be, is not present for the transaction of any particular business, then, subject and without prejudice to the transaction of the business (if any) for which a quorum or a special quorum, as the case may be, is present, the chairman may either (with the approval of the Trustee) dissolve such meeting or adjourn the same for such period, being not less than ten calendar days (but without any maximum number of calendar days), and to such place as may be appointed by the chairman either at or subsequent to such adjourned meeting and approved by the Trustee, and the provisions of this sentence shall apply to all further adjourned such meetings.

Notice of the reconvening of any adjourned meeting shall be given as provided in Section 15.2(1), except that such notice need be given only once not less than five days prior to the date on which the meeting is scheduled to be reconvened. Notice of a reconvening of an adjourned

meeting shall state expressly the percentage, as provided above, of the principal amount of the Outstanding Notes of such series which shall constitute a quorum.

Any resolution passed or decision taken at any meeting of Holders of Notes of any series duly held in accordance with this Section shall be binding on all the Holders of Notes of such series, whether or not presented or represented at the meeting. However, for the avoidance of doubt, no actions taken at such meeting shall be binding on all Holders of Notes unless such actions were approved by the minimum percentage in principal amount of the Outstanding Notes of the series as required elsewhere in this Indenture with respect to such actions.

Section 15.5. Determination of Voting Rights; Conduct and Adjournment of Meetings.

(a) Notwithstanding any other provisions of this Indenture, the Trustee may make such reasonable regulations as it may deem advisable for any meeting of Holders of Notes of a series in regard to proof of the holding of Notes of such series and the appointment of proxies and in regard to the appointment and duties of inspectors of votes, the submission and examination of proxies, certificates and other evidence of the right to vote, and such other matters concerning the conduct of the meeting as it shall deem appropriate. Except as otherwise permitted or required by any such regulations, the holding of Notes shall be proved in the manner specified in Section 1.4 and the appointment of any proxy shall be proved in the manner specified in Section 1.4. Such regulations may provide that written instruments appointing proxies, regular on their face, may be presumed valid and genuine without the proof specified in Section 1.4 or other proof.

(b) The Trustee shall, by an instrument in writing, appoint a temporary chairman of the meeting, unless the meeting shall have been called by the Issuer or by Holders of Notes as provided in Section 15.2(2), in which case the Issuer or the Holders of Notes of the series calling the meeting, as the case may be, shall in like manner appoint a temporary chairman. A permanent chairman and a permanent secretary of the meeting shall be elected by vote of the Persons entitled to vote a majority in principal amount of the Outstanding Notes of such series represented at the meeting.

(c) At any meeting each Holder of a Note of such series or proxy shall be entitled to one vote for each \$1,000 principal amount of the Outstanding Notes of such series held or represented by him or her; provided, however, that no vote shall be cast or counted at any meeting in respect of any Note challenged as not Outstanding and ruled by the chairman of the meeting to be not Outstanding. The chairman of the meeting shall have no right to vote, except as a Holder of a Note of such series or proxy.

(d) Any meeting of Holders of Notes of any series duly called pursuant to Section 15.2 at which a quorum is present may be adjourned from time to time by Persons entitled to vote a majority in principal amount of the Outstanding Notes of such series represented at the meeting, and the meeting may be held as so adjourned without further notice.

Section 15.6. Counting Votes and Recording Action of Meetings.

The vote upon any resolution submitted to any meeting of Holders of Notes of any series shall be by written ballots on which shall be subscribed the signatures of the Holders of Notes of

such series or of their representatives by proxy and the principal amounts and serial numbers of the Outstanding Notes of such series held or represented by them. The permanent chairman of the meeting shall appoint two inspectors of votes who shall count all votes cast at the meeting for or against any resolution and who shall make and file with the secretary of the meeting their verified written reports in duplicate of all votes cast at the meeting. A record, at least in duplicate, of the proceedings of each meeting of Holders of Notes of any series shall be prepared by the secretary of the meeting and there shall be attached to said record the original reports of the inspectors of votes on any vote by ballot taken thereat and affidavits by one or more persons having knowledge of the facts setting forth a copy of the notice of the meeting and showing that said notice was given as provided in Section 15.2 and, if applicable, Section 15.5. Each copy shall be signed and verified by the affidavits of the permanent chairman and secretary of the meeting and one such copy shall be delivered to the Issuer, and another to the Trustee to be preserved by the Trustee, the latter to have attached thereto the ballots voted at the meeting. Any record so signed and verified shall be conclusive evidence of the matters therein stated.

IN WITNESS WHEREOF, the parties hereto have caused this Indenture to be duly executed as of the day and year first above written.

Re: Nexa Resources S.A.

6.750% Senior Unsecured Notes due 2034 (the “Notes”)

Reference is hereby made to the Indenture, dated as of April 9, 2024 (the “Indenture”), among Nexa Resources S.A., as Issuer, Nexa Resources Cajamarquilla S.A. and Nexa Recursos Minerais S.A., as Guarantors, and The Bank of New York Mellon, a New York banking corporation, as trustee (the “Trustee”), as principal paying agent (the “Principal Paying Agent”), as transfer agent (the “Transfer Agent”) and registrar (the “Security Registrar”). Capitalized terms used but not defined herein shall have the meanings given to them in the Indenture.

This letter relates to U.S.\$[] aggregate principal amount of Notes which are held in the form of the Restricted Global Note (CUSIP No. 65290DAB9 / ISIN No. US65290DAB91 / Common Code 279741005) with the Depositary in the name of [insert name of transferor] (the “Transferor”). The Transferor has requested a transfer of such beneficial interest in the Notes to a Person who will take delivery thereof in the form of an equal aggregate principal amount of Notes evidenced by the Regulation S Global Note (CUSIP No. L67359AB2 / ISIN No. USL67359AB21 / Common Code 279741226).

In connection with such request, and in respect of such Notes, the Transferor does hereby certify that such transfer has been effected in accordance with the transfer restrictions set forth in the Notes and that:

- (A) The offer of the Notes was not made to a person in the United States; and
 - (B) either:
 - (i) at the time the buy order was originated, the transferee was outside the United States or the Transferor and any person acting on its behalf reasonably believed that the transferee was outside the United States; or
 - (ii) the transaction was executed in, on or through the facilities of a designated offshore securities market and neither the Transferor nor any person acting on our behalf knows that the transaction was pre-arranged with a buyer in the United States;
-

(C) no directed selling efforts have been made in contravention of the requirements of Rule 903(a)(2) or 904(a)(2) of Regulation S, as applicable; and

(D) the transaction is not part of a plan or scheme to evade the registration requirements of the Securities Act.

We understand that this certificate is required in connection with certain securities laws of the United States. In connection therewith, if administrative or legal proceedings are commenced or threatened in connection with which this certificate is or would be relevant, we irrevocably authorize you to produce this certificate to any interested party in such proceeding. This certificate and the statements contained herein are made for your benefit and the benefit of the Issuer and the Guarantors.

Re: Nexa Resources S.A.

6.750% Senior Unsecured Notes due 2034 (the “Notes”)

Reference is hereby made to the Indenture, dated as of April 9, 2024 (the “Indenture”), among Nexa Resources S.A., as Issuer, Nexa Resources Cajamarquilla S.A. and Nexa Recursos Minerais S.A., as Guarantors, and The Bank of New York Mellon, a New York banking corporation, as trustee (the “Trustee”), as principal paying agent (the “Principal Paying Agent”), as transfer agent (the “Transfer Agent”) and registrar (the “Security Registrar”). Capitalized terms used but not defined herein shall have the meanings given to them in the Indenture.

This letter relates to U.S.\$[] principal amount of Notes which are evidenced by an aggregate Regulation S Global Note (CUSIP No. L67359AB2 / ISIN No. USL67359AB21 / Common Code 279741226) and held with the Depositary through [Euroclear] [Clearstream] in the name of [*insert name of transferor*] (the “Transferor”). The Transferor has requested a transfer of such beneficial interest in Notes to a person that will take delivery thereof in the form of an equal principal amount of Notes evidenced by a Restricted Global Note of the same series and of like tenor as the Notes (CUSIP No. 65290DAB9 / ISIN No. US65290DAB91 / Common Code 279741005).

In connection with such request and in respect of such Notes, the Transferor does hereby certify that such transfer is being effected pursuant to and in accordance with Rule 144A under the Securities Act and, accordingly, the Transferor does hereby further certify that the Notes are being transferred to a Person that the Transferor reasonably believes is purchasing the Notes for its own account, or for one or more accounts with respect to which such person exercises sole investment discretion, and such person and each such account is a “qualified institutional buyer” within the meaning of Rule 144A, in each case in a transaction meeting the requirements of Rule 144A and in accordance with any applicable securities laws of any state of the United States.

This certificate and the statements contained herein are made for your benefit and the benefit of the Issuer and the Guarantors.

Note: This Table of Contents shall not, for any purpose, be deemed to be part of this Indenture.

THIS INDENTURE, dated as of April 8, 2025, among Nexa Resources S.A., a public limited liability company validly organized under the laws of the Grand Duchy of Luxembourg having its registered office at 37A Avenue J.F. Kennedy, L-1855, Luxembourg, Grand Duchy of Luxembourg and registered with the *Registre de Commerce et des Sociétés* in Luxembourg under number B 185.489 (the “Issuer”), Nexa Resources Cajamarquilla S.A., a corporation (*sociedad anónima*) validly organized under the laws of the Republic of Peru (“Nexa CJM”), Nexa Recursos Minerais S.A., a corporation (*sociedade anônima*) validly organized under the laws of the Federative Republic of Brazil (“Nexa Brazil”, and, together with Nexa CJM, the “Guarantors”), and The Bank of New York Mellon, a New York banking corporation, as trustee (the “Trustee”), a paying agent (the “Principal Paying Agent” and any other paying agents to be appointed hereunder, the “Paying Agents”), transfer agent (the “Transfer Agent”), and registrar (the “Registrar”) and any other paying agents to be appointed hereunder, the “Paying Agents.”

RECITALS

WHEREAS, the Issuer has duly authorized the creation of an issue of U.S.\$500,000,000 of its 6.600% Senior Unsecured Notes due 2037 (the “Initial Notes” and, together with any Additional Notes (as defined herein) issued as provided for in Section 2.3 and Section 3.1 hereof, the “Notes”) of substantially the tenor and amount hereinafter set forth, and to provide therefor the Issuer has duly authorized the execution and delivery of this Indenture.

WHEREAS, Nexa CJM and Nexa Brazil have duly authorized the execution and delivery of this Indenture to provide for their Guarantees with respect to the Notes as set forth in this Indenture.

WHEREAS, all things necessary (i) to make the Initial Notes, when executed by the Issuer and authenticated and delivered hereunder and duly issued by the Issuer, the valid obligations of the Issuer, (ii) to make the Guarantees of Nexa CJM and Nexa Brazil, when executed by Nexa CJM and Nexa Brazil and endorsed on the Notes executed, authenticated and delivered hereunder, the valid obligations of Nexa CJM and Nexa Brazil and (iii) to make this Indenture a valid agreement of the Issuer, Nexa CJM and Nexa Brazil, all in accordance with their respective terms, have been done.

NOW, THEREFORE, THIS INDENTURE WITNESSETH:

For and in consideration of the premises and the purchase of the Notes by the Holders (as defined below) thereof, it is mutually covenanted and agreed, for the equal and proportionate benefit of all Holders of the Notes, as follows:

ARTICLE I

DEFINITIONS AND OTHER PROVISIONS OF GENERAL APPLICATION

Section 1.1. Definitions.

For all purposes of this Indenture, except as otherwise expressly provided or unless the context otherwise requires:

- (1) the terms defined in this Article have the meanings assigned to them in this Article and include the plural as well as the singular;
- (2) all accounting terms not otherwise defined herein have the meanings assigned to them in accordance with GAAP (whether or not such is indicated herein);
- (3) the words “herein,” “hereof” and “hereunder” and other words of similar import refer to this Indenture as a whole and not to any particular Article, Section or other subdivision;
- (4) whenever there is mentioned in this Indenture, in any context, the payment of, or in respect of, a Redemption Price, the principal of or any premium or interest on any Note or the net proceeds received on the sale or exchange of any Notes, such mention shall be deemed to include mention of the payment of Additional Amounts to the extent that, in such context, Additional Amounts are, were or would be payable in respect thereof pursuant to this Indenture;
- (5) All references in this Indenture to “\$,” “U.S.\$,” “dollars” or “United States dollars” shall refer to the lawful currency of the United States.

“Act” when used with respect to any Holder, has the meaning specified in Section 1.4.

“Additional Amounts” has the meaning specified in Section 11.9.

“Additional Notes” means additional 6.600% Senior Unsecured Notes due 2037 issued from time to time after the Issue Date under the terms of this Indenture.

“Affiliate” of any Person means any other Person controlling or controlled by or under direct or indirect common control with such Person. For the purposes of this definition, “control,” when used with respect to any Person, means the power to direct the management and policies of such Person, directly or indirectly, whether through the ownership of voting securities, by contract or otherwise; and the terms “controlling” and “controlled” have meanings correlative to the foregoing.

“Agent Member” means any member of, or participant in, the Depositary.

“Agents” means any Paying Agent, the Registrar, the Transfer Agent and any Principal Paying Agent appointed hereunder.

“Authorized Officers” has the meaning set forth in Section 1.5.

“Bankruptcy Law” means Title 11, United States Code, Brazilian Federal Law No. 11,101, dated February 9, 2005, as amended, Peruvian Insolvency Law (Law No. 27,809), as amended, or any similar federal or state law relating to bankruptcy, insolvency, receivership, winding-up, suspension of payments, liquidation, reorganization or relief of debtors or the law of any other jurisdiction relating to bankruptcy, insolvency, receivership, winding-up, suspension of payments, liquidation, dissolution, *“procedimiento concursal ordinario,” “procedimiento concursal preventivo,” “procedimiento acelerado de refinanciación concursal,” “recuperação judicial,” “recuperação extrajudicial,”* reorganization or relief of debtors, the judicial proceedings referred to in article 13, items 2 to 11 of the Luxembourg law dated 19 December 2002 relating to the register of commerce and companies as well as the accounting and the annual accounts of companies, as amended, including in particular, bankruptcy (*faillite*), judicial reorganization (*réorganisation judiciaire*), suspension of payments (*sursis de paiement*) and judicial liquidation (*liquidation judiciaire*) proceedings or any amendment to, succession to or change in any such law, procedure or process.

“Bankruptcy Order” means any court order made in a proceeding pursuant to or within the meaning of any Bankruptcy Law, containing an adjudication of bankruptcy or insolvency, or providing for liquidation, receivership, winding-up, dissolution, *“procedimiento concursal ordinario,” “procedimiento concursal preventivo,” “procedimiento acelerado de refinanciación concursal,” “recuperação judicial,” “recuperação extrajudicial,”* or reorganization, or appointing a custodian of a debtor or of all or any substantial part of a debtor’s property, or providing for the staying, arrangement, adjustment or composition of Indebtedness or other relief of a debtor or in any court order made in connection with the judicial proceedings referred to in article 13, items 2 to 11 of the Luxembourg law dated 19 December 2002 relating to the register of commerce and companies as well as the accounting and the annual accounts of companies, as amended, including in particular, bankruptcy (*faillite*), judicial reorganization (*réorganisation judiciaire*), suspension of payments (*sursis de paiement*) and judicial liquidation (*liquidation judiciaire*) proceedings.

“Base Currency” has the meaning set forth in Section 1.14.

“Board of Directors” means the board of directors of the Issuer.

“Board Resolution” means a duly adopted resolution of the Board of Directors in full force and effect at the time of determination.

“Brazil” means the Federative Republic of Brazil and any ministry, department, authority (including the Central Bank of Brazil) or statutory corporation or other entity (including a trust), owned or controlled directly or indirectly by the Federative Republic of Brazil or any of the foregoing.

“Business Day” means each day that is not a Saturday, Sunday or other day on which banking institutions in New York, United States, Luxembourg, Grand Duchy of Luxembourg, São Paulo, Brazil or Lima, Peru are authorized or required by law to close.

“Capital Lease Obligation” of any Person means the obligation to pay rent or other payment amounts under a lease of (or other Indebtedness arrangements conveying the right to use) real or personal property of such Person which is required to be classified and accounted for as a capital lease or a liability set forth on a balance sheet of such Person in accordance with applicable GAAP. The stated maturity of such obligation shall be the date of the last payment of rent or any other amount due under such lease prior to the first date upon which such lease may be terminated by the lessee without payment of a penalty. The principal amount of such obligation shall be the capitalized amount thereof that would appear on the face of a balance sheet of such Person in accordance with applicable GAAP.

“Capital Stock” of any Person means any and all shares, interests, participations or other equivalents (however designated and whether voting or non-voting) of corporate stock or other equity participations or ownership interests, including quotas in a Brazilian limited liability quota company (*limitada*) or partnership interests, whether general or limited, of such Person.

“Cash Equivalents” means:

- (1) United States dollars, Brazilian *reais*, Peruvian *Soles*, Euros, or money in other currencies received in the ordinary course of business of the Issuer and its Subsidiaries that are readily convertible into United States dollars or Euros,
- (2) any evidence of Debt with a maturity of 180 days or less issued or directly and fully guaranteed or insured by Brazil, Peru or the United States or any agency or instrumentality thereof, provided that the full faith and credit of Brazil, Peru or the United States is pledged in support thereof,
- (3) (i) demand deposits, (ii) time deposits and certificates of deposit with maturities of one year or less from the date of acquisition, (iii) bankers’ acceptances with maturities not exceeding one year from the date of acquisition, and (iv) overnight bank deposits, in each case with any bank or trust company organized or licensed under the laws of Luxembourg, Brazil, Peru or the United States or any political subdivision or state thereof having capital, surplus and undivided profits in excess of U.S.\$500.0 million whose short-term debt is rated “A-2” or higher by S&P, “F2” or higher by Fitch or “P-2” or higher by Moody’s,
- (4) repurchase obligations with a term of not more than seven days for underlying securities of the type described in clauses (2) and (3) above entered into with any financial institution meeting the qualifications specified in clause (3) above,
- (5) commercial paper rated at least “P-1” by Moody’s, “F1” by Fitch or “A-1” by S&P and maturing within six months after the date of acquisition, and
- (6) money market funds at least 95% of the assets of which consist of investments of the type described in clauses (1) through (5) above.

“Change of Control” means that the Permitted Holders shall cease to own, directly or indirectly, at least a majority of the outstanding voting power of the Voting Stock of the Issuer

and shall cease to have the power to direct or cause the direction of the management and policies of the Issuer.

“Change of Control Offer” has the meaning specified in Section 11.5.

“Change of Control Payment” has the meaning specified in Section 11.5.

“Change of Control Payment Date” has the meaning specified in Section 11.5.

“Central Bank” means (i) the Central Bank of Luxembourg, (ii) the Central Bank of Brazil and (iii) the Central Reserve Bank of Peru or, in each case, any successor entity thereto.

“Change of Law” has the meaning specified in Section 4.1.

“Clearstream” means Clearstream Banking, *société anonyme*.

“Consolidated Total Assets” means, on a consolidated basis, the Issuer’s total amount of assets, calculated based on the most recent balance sheet delivered by the Issuer to the Trustee pursuant to this Indenture, after giving pro forma effect to any acquisition or disposition of companies, divisions, lines of businesses, operations or assets by the Issuer and its Subsidiaries subsequent to such date.

“Corporate Trust Office” means the principal office of the Trustee in The City of New York, New York, at which at any particular time its corporate trust business shall be administered, which at the date hereof is located at 240 Greenwich Street, New York, New York 10286, United States, Attention: Global Corporate Trust, e-mail: gcs.specialty.glam.conv@bny.com, and such other offices as the Trustee may designate from time to time.

“corporation” means a corporation, association, company, limited liability company, joint stock company or business trust.

“covenant defeasance” has the meaning specified in Section 12.3.

“Default” means an event that with the passing of time or the giving of notice or both shall constitute an Event of Default.

“Defaulted Interest” has the meaning specified in Section 3.6.

“Depository” means, with respect to the Notes issuable or issued in whole or in part in the form of one or more Global Notes, DTC for so long as it shall be a clearing agency registered under the Exchange Act, or such successor as the Issuer shall designate from time to time in an Officer’s Certificate delivered to the Trustee.

“Designated Subsidiary” means (i) each Guarantor and (ii) any other Subsidiary of the Issuer which, as of the date of the Issuer’s most recent quarterly or annual, as applicable, consolidated balance sheet, constituted 15% or more of the Consolidated Total Assets of the Issuer, after giving pro forma effect to any acquisition or disposition of companies, divisions,

lines of businesses, operations or assets by the Issuer and its Subsidiaries subsequent to such date.

“Director” means a member of the Board of Directors.

“Disqualified Stock” of any Person means any Capital Stock of such Person which, by its terms (or by the terms of any security into which it is convertible or for which it is exchangeable), or upon the happening of any event, matures or is mandatorily redeemable, pursuant to a sinking fund obligation or otherwise, or is redeemable at the option of the holder thereof, in whole or in part, on or prior to the Stated Maturity of the Notes.

“DTC” means The Depository Trust Company.

“Electronic Means” means the following communications methods: e-mail, secure electronic transmission containing applicable authorization codes, passwords and/or authentication keys issued by the Trustee, or another method or system specified by the Trustee as available for use in connection with its services hereunder.

“Euroclear” means Euroclear Bank S.A./N.V., as operator of the Euroclear system or its successors.

“Event of Default” has the meaning specified in Section 6.1.

“Exchange Act” means the United States Securities Exchange Act of 1934, as amended (or any successor act), and the rules and regulations thereunder.

“Expiration Date” has the meaning set forth in Section 1.4.

“FATCA” means Sections 1471 to 1474 of the U.S. Internal Revenue Code of 1986, as amended.

“Fitch” means Fitch Rating Service, Inc. and its successors.

“GAAP” means, as elected from time to time by the Issuer, (i) generally accepted accounting principles prescribed by the laws, rules and regulations applicable in the jurisdiction of incorporation of the Issuer, (ii) International Financial Reporting Standards, or (iii) accounting practices generally accepted in the United States, in each case, as in effect from time to time.

“Global Note” means, as the context may require, any or all of the Regulation S Global Note(s) and the Restricted Global Note(s), evidencing all or part of a series of Notes which is issued to the Depositary or its nominee and is registered in the name of the Depositary or its nominee.

“guarantee” by any Person means any obligation, contingent or otherwise, of such Person guaranteeing, or having the economic effect of guaranteeing, any Indebtedness of any other Person (the “primary obligor”) in any manner, whether directly or indirectly, and including, without limitation, any obligation of such Person, (i) to purchase or pay (or advance or supply funds for the purchase or payment of) such Indebtedness or to purchase (or to advance or supply

funds for the purchase of) any security for the payment of such Indebtedness, (ii) to purchase property, securities or services for the purpose of assuring the holder of such Indebtedness of the payment of such Indebtedness, or (iii) to maintain working capital, equity capital or other financial statement condition or liquidity of the primary obligor so as to enable the primary obligor to pay such Indebtedness (and “guaranteed,” “guaranteeing” and “guarantor” shall have meanings correlative to the foregoing); provided that, the guarantee by any Person shall not include endorsements by such Person for collection or deposit, in either case, in the ordinary course of business; provided further that, the Incurrence by the Issuer or a Designated Subsidiary of a Lien permitted under clause (2) of Section 11.10 shall not be deemed to constitute a guarantee by the Issuer or a Designated Subsidiary of any purchase money debt of such Person secured thereby.

“Guarantee” means the guarantee by the Guarantors of the due and punctual payment of the principal (and premium, if any) and interest (including any Additional Amounts) on, the Notes and other amounts due under this Indenture.

“Guarantors” mean Nexa CJM and Nexa Brazil.

“Holder” means a Person in whose name a Note is registered on the Registrar’s books.

“Incur” means, with respect to any Indebtedness or other obligation of any Person, to create, issue, incur (by conversion, exchange or otherwise), assume, guarantee or otherwise become liable in respect of such Indebtedness or other obligation including by acquisition of Subsidiaries or the recording, as required pursuant to applicable GAAP or otherwise, of any such Indebtedness or other obligation on the balance sheet of such Person (and “Incurrence,” “Incurred,” “Incurable” and “Incurring” shall have meanings correlative to the foregoing); provided that a change in applicable GAAP that results in an obligation of such Person that exists at such time becoming Indebtedness shall not be deemed an Incurrence of such Indebtedness and that neither the accrual of interest nor the accretion of original issue discount shall be deemed an Incurrence of Indebtedness; provided further that, the Issuer may elect to treat all or any portion of revolving credit debt commitments, whether or not then outstanding, of the Issuer or a Subsidiary as being incurred from and after any date beginning the date the relevant revolving credit commitment is extended to the Issuer or a Subsidiary, as the case may be, by furnishing written notice thereof to the Trustee, and any borrowings or reborrowings by the Issuer or a Subsidiary under such commitment up to the amount of such commitment designated by the Issuer or such Subsidiary as Incurred shall not be deemed to be new Incurrences of Indebtedness by the Issuer or such Subsidiary, as the case may be.

“Indebtedness” means (without duplication), with respect to any Person, whether recourse is to all or a portion of the assets of such Person and whether or not contingent, (i) every obligation of such Person for money borrowed, (ii) every obligation of such Person evidenced by bonds, debentures, notes or other similar instruments, including any such obligations Incurred in connection with the acquisition of property, assets or businesses, (iii) every reimbursement obligation of such Person with respect to letters of credit, bankers’ acceptances or similar facilities issued for the account of such Person, (iv) every obligation of such Person issued or assumed as the deferred purchase price of property or services (including securities repurchase agreements but excluding trade accounts payable or accrued liabilities arising in the ordinary

course of business which are payable on customary trade terms or which are being contested in good faith), (v) all obligations to redeem Disqualified Stock issued by such Person, (vi) every Net Obligation under Interest Rate or Currency Protection Agreements of such Person, (vii) every Capital Lease Obligation of such Person, and (viii) every obligation of the type referred to in clauses (i) through (vii) of another Person and all dividends of another Person the payment of which, in either case, such Person has guaranteed, other than with respect to clauses (iii) and (vi) above, in each case, if and to the extent any of the preceding items would appear as a liability upon the financial statements of the specified Person in accordance with applicable GAAP.

“Indenture” means this instrument as originally executed or as it may from time to time be supplemented or amended by one or more supplemental indentures hereto entered into pursuant to the applicable provisions hereof.

“Initial Notes” means the U.S.\$500,000,000 of Notes designated in the first paragraph of the Recitals.

“Instructions” has the meaning set forth in Section 1.5.

“Interest Payment Date” means each April 8 and October 8, commencing on October 8, 2025.

“Interest Rate or Currency Protection Agreement” of any Person means any forward contract, futures contract, swap, option, hedge or other financial agreement or arrangement (including, without limitation, caps, floors, collars and similar agreements) relating to, or the value of which is dependent upon, interest rates or currency exchange rates or indices.

“Investment Grade Rating” means a rating equal to or higher than (i) BBB- (or the equivalent) by S&P, (ii) Baa3 (or the equivalent) by Moody’s or (iii) BBB- (or the equivalent) by Fitch.

“Issue Date” means April 8, 2025.

“Issuer” means the Person named as the “Issuer” in the first paragraph of this instrument until a successor Person shall have become such pursuant to the applicable provisions of this Indenture and thereafter “Issuer” shall mean such successor Person.

“Issuer Request” or “Issuer Order” means a written request or order signed in the name of the Issuer by an authorized signatory of the Issuer and delivered to the Trustee.

“Lien” means any mortgage, pledge, security interest, encumbrance or charge of any kind (including, without limitation, any conditional sale or other title retention agreement or lease in the nature thereof or any agreement to give any security interest).

“Luxembourg” means the Grand Duchy of Luxembourg and any ministry, department, authority (including the Central Bank of Luxembourg) or statutory corporation or other entity (including a trust), owned or controlled directly or indirectly by the Grand Duchy of Luxembourg or any of the foregoing.

"Maturity" when used with respect to any Note, means the date on which the principal of such Note becomes due and payable as therein or herein provided, whether at the Stated Maturity or by declaration of acceleration, call for redemption or otherwise.

"Maturity Date" means April 8, 2037.

"Moody's" means Moody's Investors Service, Inc. and its successors.

"Net Obligation" at any date of determination means the net amount, exclusive of any commissions or administrative fees that a Person would be obligated to pay upon the termination of an Interest Rate or Currency Protection Agreement as of such date.

"Nexa Brazil" means the Person named as "Nexa Brazil" in the first paragraph of this instrument until a successor Person shall have become such pursuant to the applicable provisions of this Indenture and thereafter "Nexa Brazil" shall mean such successor Person.

"Nexa CJM" means the Person named as "Nexa CJM" in the first paragraph of this instrument until a successor Person shall have become such pursuant to the applicable provisions of this Indenture and thereafter "Nexa CJM" shall mean such successor Person.

"Note Register" has the meaning specified in Section 3.4(b).

"Notes" has the meaning specified in the first paragraph of the Recitals.

"Notice of Default" has the meaning set forth in Section 7.2.

"OECD" means the Organization for Economic Co-operation and Development.

"Officer's Certificate" means a certificate signed by any of the following: the Chief Executive Officer, President, Chief Financial Officer or a Vice President; and delivered to the Trustee and containing the statements provided for in Section 1.2 hereof (if applicable).

"Opinion of Counsel" means a written opinion of legal counsel, who may be counsel for the Issuer or a Guarantor, containing the statements provided for in Section 1.2 in form and substance reasonably acceptable to the Trustee.

"Outstanding" when used with respect to the Notes, means, as of the date of determination, all the Notes theretofore authenticated and delivered under this Indenture (including, as of such date, all the Notes represented by Global Notes authenticated and delivered under this Indenture), except the reduced portion or portions of any Global Note, as such reduction or reductions shall have been endorsed on such Global Note by the Trustee as provided herein and, except:

- (i) the Notes theretofore cancelled by the Trustee or delivered to the Trustee for cancellation;
- (ii) the Notes for whose payment or redemption money in the necessary amount has been theretofore deposited with the Trustee or any Paying Agent (other than

the Issuer) in trust or set aside and segregated in trust by the Issuer (if the Issuer shall act as its own Paying Agent) for the Holders of such Notes; provided that if such Notes are to be repurchased, notice of such repurchase has been duly given pursuant to this Indenture; and

(iii) Notes which have been issued pursuant to Section 3.5 or in exchange for or in lieu of which other Notes have been authenticated and delivered pursuant to this Indenture, other than any such Notes in respect of which there shall have been presented to the Trustee proof satisfactory to it that such Notes are held by a bona fide purchaser in whose hands such Notes are valid obligations of the Issuer;

provided, however, that in determining whether the Holders of the requisite principal amount of the Outstanding Notes have given any request, demand, authorization, direction, notice, consent or waiver hereunder, Notes owned by the Issuer or any other obligor upon the Notes or any Affiliate of the Issuer or of such other obligor shall be disregarded and deemed not to be Outstanding, except that, in determining whether the Trustee shall be protected in relying upon any such request, demand, authorization, direction, notice, consent or waiver, only Notes which a Responsible Officer of the Trustee actually knows to be so owned shall be so disregarded. Notes so owned which have been pledged in good faith may be regarded as Outstanding if the pledgee establishes to the satisfaction of the Trustee the pledgee's right so to act with respect to such Notes and that the pledgee is not the Issuer or any other obligor upon the Notes or any Affiliate of the Issuer or of such other obligor.

"Paying Agent" means any Person authorized by the Issuer to pay the principal of (and premium, if any) or interest on any Notes on behalf of the Issuer. The Issuer has initially appointed the Principal Paying Agent to act as Paying Agent.

"Payment Date" has the meaning set forth in Section 3.11(b).

"Permitted Holders" mean (i) the estate of Mr. Antonio Ermírio de Moraes and any of Mr. Ermírio Pereira de Moraes, Mrs. Maria Helena de Moraes Scripilliti and Mr. José Ermírio de Moraes Filho and any of their descendants, (ii) any Affiliate of any of the foregoing and (iii) any corporation, partnership, joint venture, association, trust, fund, unincorporated organization, or any other entity or group formed pursuant to a shareholders, control or voting agreement or similar agreement, of which any one or more of the Permitted Holders referred to in clauses (i) or (ii) hereof is a shareholder, partner, beneficiary, member or party.

"Permitted Holding Company" means any entity which owns at least 95% of the outstanding Capital Stock or other ownership interests (other than directors' qualifying shares) of the Issuer.

"Person" means any individual, corporation, partnership, joint venture, association, trust, unincorporated organization, government or agency or political subdivision thereof or any other entity.

"Peru" means the Republic of Peru and any ministry, department, authority (including the Central Reserve Bank of Peru) or statutory corporation or other entity (including a trust), owned or controlled directly or indirectly by the Republic of Peru or any of the foregoing.

"Predecessor Note" of any particular Note means every previous Note evidencing all or a portion of the same debt as that evidenced by such particular Note; and, for the purposes of this definition, any Note authenticated and delivered under Section 3.5 in exchange for or in lieu of a mutilated, destroyed, lost or stolen Note shall be deemed to evidence the same debt as the mutilated, destroyed, lost or stolen Note.

"Principal Paying Agent" means The Bank of New York Mellon, a New York banking corporation, or any successor in its capacity as Principal Paying Agent.

"Rating Agency" means each of S&P, Moody's and Fitch; provided that if two of S&P, Moody's or Fitch cease to rate the Notes or fail to make a rating on the Notes publicly available, the Issuer will appoint at least one replacement for such Rating Agency that is a "nationally recognized statistical rating organization" within the meaning of Rule 15c3-1(c)(2)(vi)(F) under the Exchange Act.

"Rating Date" means the date which is 90 days prior to the earlier of (i) a Change of Control and (ii) public notice of the occurrence of a Change of Control or of the intention of the Permitted Holders or the Issuer to effect a Change of Control.

"Rating Decline" means the occurrence of the following on, or within 90 days after, the date of public notice of the occurrence of a Change of Control or of the intention by a Permitted Holder or the Issuer to effect a Change of Control (which period shall be extended so long as the rating of the Notes is under publicly announced consideration for possible downgrade by any of the Rating Agencies): (i) in the event the Notes are assigned an Investment Grade Rating by at least two of the Rating Agencies on the Rating Date, the rating of the Notes by at least two of the Rating Agencies shall be below an Investment Grade Rating; or (ii) in the event the Notes are rated below an Investment Grade Rating by at least two of the Rating Agencies on the Rating Date, the rating of the Notes by at least two of the Rating Agencies shall be decreased by one or more gradations (including gradations (but not outlooks) within rating categories as well as between rating categories); provided that any such Rating Decline is expressly stated by the applicable Rating Agencies to have been the result of the Change of Control. The Issuer will provide the Trustee with prompt written notice of any Rating Decline, and the Trustee shall not be deemed to have knowledge of any Rating Decline until it receives such notice.

"rate(s) of exchange" has the meaning set forth in Section 1.14.

"Receivables" means receivables, chattel paper, instruments, documents or intangibles evidencing or relating to the right to payment of money in respect of the sale of goods or services.

"Record Date" means the second Business Day immediately preceding an Interest Payment Date.

"Redemption Date" when used with respect to any Note to be redeemed, means the date fixed for such redemption by or pursuant to this Indenture.

"Redemption Price" when used with respect to any Note to be redeemed, means the price at which it is to be redeemed pursuant to this Indenture.

“Registrar” has the meaning specified in Section 3.4(b).

“Relevant Date” has the meaning specified in Section 11.9.

“Responsible Officer” means any officer within the corporate trust department of the Trustee, including any director, managing director, vice president, assistant vice president, trust officer, assistant trust officer or any other officer or assistant officer of the Trustee customarily performing functions similar to those performed by the persons who at that time shall be such officers having direct responsibility for the administration of this Indenture, and also means, with respect to a particular corporate trust matter, any other officer to whom such trust matter is referred because of his or her knowledge of and familiarity with the particular subject.

“Regulation S” means Regulation S (including any successor regulation thereto) under the Securities Act, as it may be amended from time to time.

“Regulation S Global Note” has the meaning set forth in Section 2.1

“Remaining Life” has the meaning set forth in Section 4.2.

“Restricted Global Note” has the meaning set forth in Section 2.1.

“Restricted Notes” means the Restricted Global Note and any Successor Note, other than (i) any Note issued upon a transfer or exchange for which a certificate substantially in the form set forth in (a) Exhibit A is required to be provided and is provided pursuant to Section 3.4(c)(2) or (b) Exhibit C-2 is required to be provided and is provided pursuant to Section 3.4(c)(5), (ii) any Note issued in exchange for or in lieu of any Note specified in clause (i) of this definition or any Note issued in exchange therefor or in lieu thereof, or (iii) any Note as to which the Issuer has removed and has not replaced the legend described in Section 3.4(b).

“Restricted Property” means any mineral property (including any mineral concessions, authorizations or rights in respect of minerals granted by any governmental authority), concentrate plant, manufacturing or processing plant used in connection with the processing, refining or manufacturing of metals or minerals, power plant or transmission lines of the Issuer or any Designated Subsidiary and any capital stock of any Subsidiary directly owning any such mineral property, concentrate, manufacturing or processing plant, power plant or transmission lines.

“Reuters” means Reuters Group plc, a U.K. corporation, and its successors and assigns.

“Rule 144A” means Rule 144A (including any successor regulation thereto) under the Securities Act, as it may be amended from time to time.

“S&P” means S&P Global Ratings, a business unit of Standard & Poor’s Financial Services LLC and its successors.

“SEC” means the United States Securities and Exchange Commission.

“Securities Act” means the United States Securities Act of 1933, as amended, and the rules and regulations of the SEC promulgated thereunder.

“Securitization Transaction” means a transaction in which the Issuer or a Subsidiary thereof sells or transfers an interest in Receivables (and/or any rights arising under the documentation governing or relating to such Receivables covered by such transaction, any proceeds of Receivables and any lockboxes or accounts in which such proceeds are deposited and any related assets) to a special purpose entity that issues securities payable from collections of such Receivables or other assets.

“Special Record Date” for the payment of any Defaulted Interest means a date fixed by the Trustee pursuant to Section 3.6.

“Stated Maturity” when used with respect to any Note or any installment of interest thereon, means the date specified in such Note as the date on which the principal of such Note or such installment of interest, as the case may be, is due and payable.

“Subsidiary” of any Person means (i) a corporation more than 50% of the combined voting power of the outstanding Voting Stock of which is owned, directly or indirectly, by such Person or by one or more other Subsidiaries of such Person or by such Person and one or more Subsidiaries thereof or (ii) any other Person (other than a corporation) in which such Person, or one or more other Subsidiaries of such Person or such Person and one or more other Subsidiaries thereof, directly or indirectly, has at least a majority ownership and power to direct the policies, management and affairs thereof.

“Successor Note” of any particular Note means every Note issued after, and evidencing all or a portion of the same debt as that evidenced by, such particular Note; and, for the purposes of this definition, any Note authenticated and delivered under Section 3.5 in exchange for or in lieu of a mutilated, destroyed, lost or stolen Note shall be deemed to evidence the same debt as the mutilated, destroyed, lost or stolen Note.

“Taxes” has the meaning set forth in Section 11.9.

“Transaction Documents” has the meaning set forth in Section 11.1.

“Transfer Agent” means the agent designated by the Issuer (not including the Registrar) for the registration of transfer of securities as provided in Section 11.2.

“Treasury Rate” has the meaning set forth in Section 4.2.

“Trustee” means the Person named as the “Trustee” in the first paragraph of this instrument until a successor Trustee shall have been appointed pursuant to the applicable provisions of this Indenture, and thereafter “Trustee” shall mean such successor Trustee.

“United States” means the United States of America.

“U.S. Dollar Equivalent” means, with respect to any monetary amount in a currency other than the U.S. Dollar, at any time for the determination thereof, the amount of U.S. Dollars

obtained by converting such foreign currency involved in such computation into U.S. Dollars at the spot rate for the purchase of U.S. Dollars with the applicable foreign currency as quoted by Reuters at approximately 11:00 a.m. (New York time) on the date not more than two Business Days prior to such determination.

"U.S. Global Notes" has the meaning specified in Section 2.1.

"Vice President" when used with respect to the Issuer or any Guarantor, means any vice president, whether or not designated by a number or a word or words added before or after the title "vice president."

"Voting Stock" of a Person means all classes of Capital Stock of such Person then outstanding that are entitled (without regard to the occurrence of any contingency) to vote in the election of the directors of such Person, but excluding such classes of Capital Stock or other interests that are entitled, as a group in a separate cast, to appoint one director of such Person as representative of the minority shareholders.

"Wholly Owned Subsidiary" of any Person means any entity owned by such Person of which at least 95% of the outstanding Capital Stock or other ownership interests (other than directors' qualifying shares) of such entity shall at the time be owned by such Person or by one or more Wholly Owned Subsidiaries of such Person.

Section 1.2. Compliance Certificates and Opinions.

Upon any application or request by the Issuer or a Guarantor to the Trustee to take any action under any provision of this Indenture, the Issuer or such Guarantor shall furnish to the Trustee such certificates and opinions as may be required under this Indenture; provided, however, that such certificate and opinion shall not be required in the case of the initial issuance of Notes hereunder. Each such certificate or opinion, and any certificate evidencing a determination required to be made by the Issuer or a Guarantor under this Indenture, shall be given in the form of an Officer's Certificate, if to be given by an officer of the Issuer or such Guarantor, or an Opinion of Counsel, if to be given by counsel, and shall comply with the requirements set forth in this Indenture.

Every certificate or opinion with respect to compliance by or on behalf of the Issuer or a Guarantor with a condition or covenant provided for in this Indenture shall include:

- (1) a statement that each individual signing such certificate or opinion has read such covenant or condition and the definitions herein relating thereto;
- (2) a brief statement as to the nature and scope of the examination or investigation upon which the statements or opinions contained in such certificate or opinion are based;
- (3) a statement that, in the opinion of each such individual, he has made such examination or investigation as is necessary to enable him or her to express an informed opinion as to whether or not such covenant or condition has been complied with; and

(4) a statement as to whether, in the opinion of each such individual, such condition or covenant has been complied with.

Section 1.3. Form of Documents Delivered to Trustee.

In any case where several matters are required to be certified by, or covered by an opinion of, any specified Person, it is not necessary that all such matters be certified by, or covered by the opinion of, only one such Person, or that they be so certified or covered by only one document, but one such Person may certify or give an opinion with respect to some matters and one or more other such Persons as to other matters, and any such Person may certify or give an opinion as to such matters in one or several documents.

Any certificate of an officer of the Issuer or a Guarantor may be based, insofar as it relates to legal matters, upon an Opinion of Counsel submitted therewith, unless such officer knows, or in the exercise of reasonable care should know, that the opinion with respect to the matters upon which his certificate is based is erroneous. Any Opinion of Counsel may be based, insofar as it relates to factual matters, upon a certificate of an officer or officers of the Issuer or a Guarantor submitted therewith stating the information on which counsel is relying, unless such counsel knows, or in the exercise of reasonable care should know, that the certificate with respect to such matters is erroneous.

Where any Person is required to make, give or execute two or more applications, requests, consents, certificates, statements, opinions or other instruments under this Indenture, they may, but need not, be consolidated and form one instrument.

Section 1.4. Acts of Holders; Record Date.

Any request, demand, authorization, direction, notice, consent, waiver or other action provided by this Indenture to be given or taken by Holders may be embodied in and evidenced by one or more instruments of substantially similar tenor signed by such Holders in person or by an agent duly appointed in writing; and, except as herein otherwise expressly provided, such action shall become effective when such instrument or instruments are delivered to the Trustee and, where it is hereby expressly required, to the Issuer. Such instrument or instruments (and the action embodied therein and evidenced thereby) are herein sometimes referred to as the “Act” of the Holders signing such instrument or instruments. Proof of execution of any such instrument or of a writing appointing any such agent shall be sufficient for any purpose of this Indenture and (subject to Section 6.1) conclusive in favor of the Trustee and the Issuer, if made in the manner provided in this Section.

The fact and date of the execution by any Person of any such instrument or writing pursuant to this Section 1.4 may be proved by the affidavit of a witness of such execution or by a certificate of a notary public or other officer authorized by law to take acknowledgments of deeds, certifying that the individual signing such instrument or writing acknowledged to him or her the execution thereof. Where such execution is by a signer acting in a capacity other than his individual capacity, such certificate or affidavit shall also constitute sufficient proof of his authority. The fact and date of the execution of any such instrument or writing, or the authority

of the Person executing the same, may also be proved in any other manner which the Trustee deems sufficient.

The ownership of Notes shall be proved by the Note Register.

Any request, demand, authorization, direction, notice, consent, waiver or other Act of the Holder of any Note shall bind every future Holder of the same Note and the Holder of every Note issued upon the registration of transfer thereof or in exchange therefor or in lieu thereof in respect of anything done, omitted or suffered to be done by the Trustee or the Issuer in reliance thereon, whether or not notation of such action is made upon such Note.

The Issuer may set any day as a Record Date for the purpose of determining the Holders of Outstanding Notes entitled to give, make or take any request, demand, authorization, direction, notice, consent, waiver or other action provided or permitted by this Indenture to be given, made or taken by Holders of Notes, provided that the Issuer may not set a Record Date for, and the provisions of this paragraph shall not apply with respect to, the giving or making of any notice, declaration, request or direction referred to in the next paragraph. If not set by the Issuer prior to the first solicitation of a Holder made by any Person in respect of any such matter referred to in the foregoing sentence, the Record Date for any such matter shall be the 30th day (or, if later, the date of the most recent list of Holders required to be provided pursuant to Section 7.1) prior to such first solicitation. If any Record Date is set pursuant to this paragraph, the Holders of Outstanding Notes on such Record Date, and no other Holders, shall be entitled to take the relevant action, whether or not such Holders remain Holders after such Record Date; provided that no such action shall be effective hereunder unless taken on or prior to the applicable Expiration Date by Holders of the requisite principal amount of Outstanding Notes on such Record Date.

The Trustee may set any day as a Record Date for the purpose of determining the Holders of Outstanding Notes entitled to join in the giving or making of (i) any Notice of Default, (ii) any declaration of acceleration referred to in Section 5.1, (iii) any request to institute proceedings referred to in Section 5.6(2) or (iv) any direction referred to in Section 5.11. If any Record Date is set pursuant to this paragraph, the Holders of Outstanding Notes on such Record Date, and no other Holders, shall be entitled to join in such notice, declaration, request or direction, whether or not such Holders remain Holders after such Record Date; provided that no such action shall be effective hereunder unless taken on or prior to the applicable Expiration Date by Holders of the requisite principal amount of Outstanding Notes on such Record Date. Nothing in this paragraph shall be construed to prevent the Trustee from (i) giving or making any notice required to be made pursuant to the Trustee's duties and obligations under this Indenture and (ii) setting a new Record Date for any action for which a Record Date has previously been set pursuant to this paragraph (whereupon the Record Date previously set shall automatically and with no action by any Person be cancelled and of no effect), and nothing in this paragraph shall be construed to render ineffective any action taken by Holders of the requisite principal amount of Outstanding Notes on the date such action is taken. Promptly after any Record Date is set pursuant to this paragraph, the Trustee, at the Issuer's expense, shall cause notice of such Record Date, the proposed action by Holders and the applicable Expiration Date to be given to the Issuer in writing and to each Holder of Notes in the manner set forth in Section 1.6.

Nothing in this paragraph shall be construed to prevent the Issuer from setting a new Record Date for any action for which a Record Date has previously been set pursuant to this paragraph (whereupon the Record Date previously set shall automatically and with no action by any Person be cancelled and of no effect), and nothing in this paragraph shall be construed to render ineffective any action taken by Holders of the requisite principal amount of Outstanding Notes on the date such action is taken. Promptly after any Record Date is set pursuant to this paragraph, the Issuer, at its own expense, shall cause notice of such Record Date, the proposed action by Holders and the applicable Expiration Date to be given to the Trustee in writing and to each Holder of Notes in the manner set forth in Section 1.6.

With respect to any Record Date set pursuant to this Section, the party hereto which sets such Record Dates may designate any day as the “Expiration Date,” and from time to time may change the Expiration Date to any earlier or later day; provided that no such change shall be effective unless notice of the proposed new Expiration Date is given to the other party hereto in writing, and to each Holder of Notes in the manner set forth in Section 1.6, on or prior to the existing Expiration Date. If an Expiration Date is not designated with respect to any Record Date set pursuant to this Section, the party hereto which set such Record Date shall be deemed to have initially designated the 180th day after such Record Date as the Expiration Date with respect thereto, subject to its right to change the Expiration Date as provided in this paragraph. Notwithstanding the foregoing, no Expiration Date shall be later than the 180th day after the applicable Record Date.

Without limiting the foregoing, a Holder entitled hereunder to take any action hereunder with regard to any particular Note may do so with regard to all or any part of the principal amount of such Note or by one or more duly appointed agents each of which may do so pursuant to such appointment with regard to all or any part of such principal amount.

Section 1.5. Notices, Etc., to Trustee, the Paying Agents and the Issuer.

Any request, demand, authorization, direction, notice, consent, waiver or Act of Holders or other document provided or permitted by this Indenture to be made upon, given or furnished to, or filed with:

(1) the Trustee or any Agent by any Holder or by the Issuer or the Guarantor shall be sufficient for every purpose hereunder if made, given, furnished or filed, in writing in English or accompanied by a certified translation to English, to or with the Trustee at The Bank of New York Mellon, 240 Greenwich Street, New York, New York 10286, United States, Attention: Global Corporate Trust, Fax: (212) 815-5630, and such other offices as the Trustee may designate from time to time or at any other address previously furnished in writing to the Holders, the Issuer by the Trustee;

(2) the Principal Paying Agent by the Trustee, the Issuer or any Holder shall be sufficient for every purpose hereunder (except as otherwise expressly provided herein) if in writing and mailed, first class postage prepaid, to the Principal Paying Agent addressed to it at 240 Greenwich Street, New York, New York 10286, United States, Attention: Global Corporate Trust, or at any other address previously furnished in writing to the Trustee by the Principal Paying Agent;

(3) the Issuer by the Trustee or by any Holder shall be sufficient for every purpose hereunder (except as otherwise expressly provided herein) if in writing and mailed, first-class postage prepaid, to the Issuer addressed to it at 37A, Avenue J.F. Kennedy, L-1855, Luxembourg, Grand Duchy of Luxembourg, Attention: José Carlos del Valle (Group Chief Financial Officer), or at any other address previously furnished in writing to the Trustee by the Issuer;

(4) Nexa CJM by the Trustee or by any Holder shall be sufficient for every purpose hereunder (except as otherwise expressly provided herein) if in writing and mailed, first-class postage prepaid, to Nexa CJM addressed to it at Carretera Central Km 9.5, desvío a Huachipa, Lurigancho-Chosica, Provincia y Departamento de Lima, Peru, Attention: José Carlos del Valle (Group Chief Financial Officer), or at any other address previously furnished in writing to the Trustee by Nexa CJM; and

(5) Nexa Brazil by the Trustee or by any Holder shall be sufficient for every purpose hereunder (except as otherwise expressly provided herein) if in writing and mailed, first-class postage prepaid, to Nexa Brazil addressed to it at Av. Engenheiro Luis Carlos Berrini, 105, São Paulo, SP 04571-010, Brazil, Attention: Rodrigo Cammarosano (Treasurer), or at any other address previously furnished in writing to the Trustee by Nexa Brazil.

The Trustee shall have the right to accept and act upon instructions, including funds transfer instructions ("Instructions") given pursuant to this Indenture and delivered using Electronic Means; *provided, however*, that the Issuer and/or each Guarantor, as applicable, shall provide to the Trustee an incumbency certificate listing officers with the authority to provide such Instructions ("Authorized Officers") and containing specimen signatures of such Authorized Officers, which incumbency certificate shall be amended by the Issuer and/or each Guarantor, as applicable, whenever a person is to be added or deleted from the listing. If the Issuer and/or a Guarantor, as applicable, elects to give the Trustee Instructions using Electronic Means and the Trustee in its discretion elects to act upon such Instructions, the Trustee's understanding of such Instructions shall be deemed controlling. The Issuer and the Guarantors understand and agree that the Trustee cannot determine the identity of the actual sender of such Instructions and that the Trustee shall conclusively presume that directions that purport to have been sent by an Authorized Officer listed on the incumbency certificate provided to the Trustee have been sent by such Authorized Officer. The Issuer and the Guarantors shall be responsible for ensuring that only Authorized Officers transmit such Instructions to the Trustee and that the Issuer, the Guarantors and all Authorized Officers are solely responsible to safeguard the use and confidentiality of applicable user and authorization codes, passwords and/or authentication keys upon receipt by the Issuer and/or the Guarantors, as applicable. The Trustee shall not be liable for any losses, costs or expenses arising directly or indirectly from the Trustee's reliance upon and compliance with such Instructions notwithstanding such directions conflict or are inconsistent with a subsequent written instruction. Each of the Issuer and each Guarantor agree: (i) to assume all risks arising out of the use of Electronic Means to submit Instructions to the Trustee, including without limitation the risk of the Trustee acting on unauthorized Instructions, and the risk of interception and misuse by third parties; (ii) that it is fully informed of the protections and risks associated with the various methods of transmitting Instructions to the Trustee and that there may be more secure methods of transmitting Instructions than the

method(s) selected by the Issuer and/or the Guarantor, as applicable; (iii) that the security procedures (if any) to be followed in connection with its transmission of Instructions provide to it a commercially reasonable degree of protection in light of its particular needs and circumstances; and (iv) to notify the Trustee immediately upon learning of any compromise or unauthorized use of the security procedures.

Section 1.6. Notice to Holders; Waiver.

Where this Indenture provides for notice to Holders of any event, such notice shall be sufficiently given (unless otherwise herein expressly provided) if (i) in the case of a Global Note, in writing by electronic mail and/or by first-class mail to the Depositary, and (ii) in the case of securities other than Global Notes, in writing and mailed, first-class postage prepaid, to each Holder affected by such event, at his address as it appears in the Note Register on the Business Day immediately preceding the date of mailing, which shall be not later than the latest date (if any), and not earlier than the earliest date (if any), prescribed for the giving of such notice. In any case where notice to Holders is given by mail, neither the failure to mail such notice, nor any defect in any notice so mailed, to any particular Holder shall affect the sufficiency of such notice with respect to other Holders. Where this Indenture provides for notice in any manner, such notice may be waived in writing by the Person entitled to receive such notice, either before or after the event, and such waiver shall be the equivalent of such notice. Waivers of notice by Holders shall be filed with the Trustee, but such filing shall not be a condition precedent to the validity of any action taken in reliance upon such waiver.

In case by reason of the suspension of regular mail service or by reason of any other cause it shall be impracticable to give such notice by mail, then such notification as shall be made with the approval of the Trustee shall constitute a sufficient notification for every purpose hereunder.

Any obligation the Issuer (and the Paying Agents on its behalf) may have to publish a notice to Holders shall have been met upon delivery of the notice to the Depositary.

Section 1.7. Effect of Headings and Table of Contents.

The Article and Section headings herein and the Table of Contents are for convenience only and shall not affect the construction hereof.

Section 1.8. Successors and Assigns.

All covenants and agreements in this Indenture by each of the Issuer and the Guarantors shall bind its successors and assigns, whether so expressed or not.

Section 1.9. Separability Clause.

In case any provision in this Indenture or in the Notes or in the Guarantees shall be invalid, illegal or unenforceable, the validity, legality and enforceability of the remaining provisions of each of this Indenture, the Notes or the Guarantees shall not in any way be affected or impaired thereby.

Section 1.10. Benefits of Indenture.

Nothing in this Indenture or in the Notes, express or implied, shall give to any Person, other than the parties hereto and their successors hereunder and the Holders of Notes, any benefit or any legal or equitable right, remedy or claim under this Indenture, the Notes or the Guarantees.

Section 1.11. Governing Law.

THIS INDENTURE, THE NOTES AND THE GUARANTEES SHALL BE GOVERNED BY, AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF NEW YORK, without regard to conflicts of laws principles thereof. For the purposes of paragraph 2 of article 9 of the Brazilian Decree-Law No. 4,567, dated September 4, 1942, as amended, the Trustee shall be deemed the “proponent” of the transactions contemplated by this Indenture. Articles 470-1 through 470-19 of the Luxembourg law dated August 10, 1915 on commercial companies, as amended, which set the provisions related to the representation of the Holders of the Notes, are not applicable to the Notes or the Guarantees.

EACH OF THE PARTIES HERETO, AND EACH HOLDER BY ITS ACCEPTANCE OF A NOTE, HEREBY IRREVOCABLY WAIVES, TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, ANY AND ALL RIGHT TO TRIAL BY JURY IN ANY LEGAL PROCEEDING ARISING OUT OF OR RELATING TO THIS INDENTURE, THE NOTES OR THE TRANSACTION CONTEMPLATED HEREBY.

Section 1.12. Legal Holidays.

In any case where any Interest Payment Date, Redemption Date or Stated Maturity of any Note shall not be a Business Day, then (notwithstanding any other provision of this Indenture, the Notes or the Guarantees) payment of interest or principal (and premium, if any) need not be made on such date, but may be made on the next succeeding Business Day with the same force and effect as if made on the Interest Payment Date or Redemption Date, or at the Stated Maturity, provided that no interest shall accrue on account of such delay for the period from and after such Interest Payment Date or Redemption Date or Stated Maturity, as the case may be.

Section 1.13. Consent to Jurisdiction and Service of Process.

(a) Each of the Issuer and the Guarantors agrees that any suit, action or proceeding against it brought by any Holder or the Trustee arising out of or based upon this Indenture, the Notes or the Guarantees may be instituted in any state or Federal court in the Borough of Manhattan in The City of New York, New York, and waives any objection which it may now or hereafter have to the laying of venue of any such proceeding, and irrevocably submits to the non-exclusive jurisdiction of such courts in any suit, action or proceeding.

(b) By the execution and delivery of this Indenture or any amendment or supplement hereto, each of the Issuer and the Guarantors (i) acknowledges that it has, by separate written instrument, designated and appointed Cogency Global Inc. currently located at 122 East 42nd Street, 18th Floor, New York, NY 10168, as its authorized agent upon which process may be served in any suit, action or proceeding with respect to, arising out of, or relating to, the Notes,

this Indenture or the Guarantees, that may be instituted in any Federal or state court in the State of New York, The City of New York, the Borough of Manhattan, or brought under Federal or state securities laws or brought by the Trustee or the Paying Agent (whether in its individual capacity or in its capacity as Trustee or the Paying Agent, as the case may be, hereunder), and acknowledges that Cogency Global Inc. has accepted such designation, (ii) submits to the jurisdiction of any such court in any such suit, action or proceeding, and (iii) agrees that service of process upon Cogency Global Inc. shall be deemed in every respect effective service of process upon the Issuer and the Guarantors, as the case may be, in any such suit, action or proceeding. Each of the Issuer and the Guarantors further agrees to take any and all action, including the execution and filing of any and all such documents and instruments as may be necessary to continue such designation and appointment of Cogency Global Inc. in full force and effect so long as this Indenture shall be in full force and effect; provided that the Issuer and the Guarantors may and shall (to the extent Cogency Global Inc. ceases to be able to be served on the basis contemplated herein), by written notice to the Trustee, designate such additional or alternative agents for service of process under this Section 1.13 that (i) maintains an office located in the Borough of Manhattan, The City of New York in the State of New York, (ii) are either (x) counsel for the Issuer and the Guarantors or (y) a corporate service company which acts as agent for service of process for other persons in the ordinary course of its business and (iii) agrees to act as agent for service of process in accordance with this Section 1.13. Such notice shall identify the name of such agent for process and the address of such agent for process in the Borough of Manhattan, The City of New York, State of New York. Upon the request of any Holder, the Trustee shall deliver such information to such Holder. Notwithstanding the foregoing, there shall, at all times, be at least one agent for service of process for the Issuer and the Guarantors appointed and acting in accordance with this Section 1.13.

(c) To the extent that the Issuer or the Guarantors has or hereafter may acquire any immunity from jurisdiction of any court or from any legal process (whether through service of notice, attachment prior to judgment, attachment in aid of execution, execution or otherwise) with respect to itself or its property, each of the Issuer and the Guarantors hereby irrevocably waives such immunity in respect of its obligations under this Indenture, the Notes and the Guarantees, to the fullest extent permitted by law.

Section 1.14. Currency of Account; Conversion of Currency; Foreign Exchange Restrictions.

(a) U.S. Dollars are the sole currency of account and payment for all sums payable by the Issuer and the Guarantors under or in connection with the Notes, the Guarantees or this Indenture, including damages. Any amount received or recovered in a currency other than U.S. dollars (whether as a result of, or of the enforcement of, a judgment or order of a court of any jurisdiction, in the winding-up or dissolution of the Issuer or the Guarantors or otherwise) by any Holder of the Notes in respect of any sum expressed to be due to it from the Issuer or the Guarantors shall only constitute a discharge to the Issuer or the Guarantors, as the case may be, to the extent of the U.S. dollar amount which the recipient is able to purchase with the amount so received or recovered in that other currency on the date of that receipt or recovery (or, if it is not practicable to make that purchase on that date, on the first date on which it is practicable to do so). If that U.S. dollar amount is less than the U.S. dollar amount expressed to be due to the recipient under the Notes, the Issuer and the Guarantors shall, jointly and severally, indemnify it

against any loss sustained by it as a result as set forth in Section 1.14(b). In any event, the Issuer and the Guarantors shall, jointly and severally, indemnify the recipient against the cost of making any such purchase. For the purposes of this Section 1.14, it will be sufficient for the Holder of a Note to certify in a satisfactory manner (indicating sources of information used) that it would have suffered a loss had an actual purchase of U.S. dollars been made with the amount so received in that other currency on the date of receipt or recovery (or, if a purchase of U.S. dollars on such date had not been practicable, on the first date on which it would have been practicable, it being required that the need for a change of date be certified in the manner mentioned above). The indemnities set forth in this Section 1.14 constitute separate and independent obligations from other obligations of the Issuer and the Guarantors, shall give rise to a separate and independent cause of action, shall apply irrespective of any indulgence granted by any Holder of the Notes and shall continue in full force and effect despite any other judgment, order, claim or proof for a liquidated amount in respect of any sum due under the Notes.

(b) The Issuer and the Guarantors covenant and agree that the following provisions shall apply to conversion of currency in the case of the Notes, the Guarantees and this Indenture:

(i) (A) if for the purpose of obtaining judgment in, or enforcing the judgment of, any court in any country, it becomes necessary to convert into a currency (the "judgment currency") an amount due in any other currency (the "Base Currency"), then the conversion shall be made at the rate of exchange prevailing on the Business Day before the day on which the judgment is given or the order of enforcement is made, as the case may be (unless a court shall otherwise determine), and

(B) if there is change in the rate of exchange prevailing between the Business Day before the day on which the judgment is given or an order of enforcement is made, as the case may be (or such other date as a court shall determine), and the date of receipt of the amount due, the Issuer or the Guarantors, as the case may be, will pay such additional (or, as the case may be, such lesser) amount, if any, as may be necessary so that the amount paid in the judgment currency when converted at the rate of exchange prevailing on the date of receipt will produce the amount in the Base Currency originally due;

(ii) in the event of the winding-up of the Issuer or the Guarantors at any time while any amount or damages owing under the Notes, the Guarantees and this Indenture, or any judgment or order rendered in respect thereof, shall remain outstanding, the Issuer and the Guarantors shall, jointly and severally, indemnify and hold the Holders and the Trustee harmless against any deficiency arising or resulting from any variation in rates of exchange between (1) the date as of which the U.S. Dollar Equivalent of the amount due or contingently due under the Notes, the Guarantees and this Indenture (other than under this Subsection (b)(ii)) is calculated for the purposes of such winding-up and (2) the final date for the filing of proofs of claim in such winding-up. For the purpose of this subsection (b)(ii), the final date for the filing of proofs of claim in the winding-up of the Issuer or the Guarantors, as the case may be, shall be the date fixed by the liquidator or otherwise in accordance with the relevant provisions of applicable law as being the latest practicable date as at which liabilities of the Issuer or the Guarantors, as the case

may be, may be ascertained for such winding-up prior to payment by the liquidator or otherwise in respect thereto;

(iii) the obligations contained in Subsections (a), (b)(i)(B) and (b)(ii) of this Section 1.14 shall constitute separate and independent obligations from the other obligations of the Issuer and the Guarantors under the terms of this Indenture, shall give rise to separate and independent causes of action against the Issuer and the Guarantors, shall apply irrespective of any waiver or extension granted by any Holder or the Trustee or either of them from time to time and shall continue in full force and effect notwithstanding any judgment or order or the filing of any proof of claim in the winding-up of the Issuer or the Guarantors for a liquidated sum in respect of amounts due hereunder (other than under Subsection (b)(ii) above) or under any such judgment or order. Any such deficiency as aforesaid shall be deemed to constitute a loss suffered by the Holders or the Trustee, as the case may be, and no proof or evidence of any actual loss shall be required by the Issuer or the Guarantors or the liquidator or otherwise or any of them. In the case of subsection (b)(ii) above, the amount of such deficiency shall not be deemed to be reduced by any variation in rates of exchange occurring between the said final date and the date of any liquidating distribution; and

(iv) the term “rate(s) of exchange” shall mean the rate of exchange quoted by Reuters at 10:00 a.m. (New York time) for spot purchases of the Base Currency with the judgment currency other than the Base Currency referred to in Subsections (b)(i) and (b)(ii) above and includes any premiums and costs of exchange payable.

(c) In the event that on any Interest Payment Date, the Maturity Date or Redemption Date, as the case may be, in respect of the Guarantee provided by a Guarantor, any restrictions or prohibition of access to the foreign exchange market of the jurisdiction of incorporation of a Guarantor exists, such Guarantor agrees to pay all amounts payable under the Notes and such Guarantee in the currency of the Notes by means of any legal procedure existing in such jurisdiction of incorporation (except commencing legal proceedings against the relevant Central Bank), on any due date for payment under the Notes, for the purchase of the currency of such Notes. All costs and taxes payable in connection with the procedures referred to in this Section 1.14 shall be borne by the relevant Guarantor.

(d) Notwithstanding anything to the contrary contained herein, neither the Trustee nor the Principal Paying Agent shall have any liability for converting into U.S. Dollars any amount received by any Holder in a currency other than U.S. Dollars.

Section 1.15. Counterparts.

This Indenture may be executed in two or more counterparts, each of which shall be deemed to be an original, but all of which together shall constitute one and the same instrument. The words “execution,” signed,” “signature,” and words of like import in this Indenture or in any other certificate, agreement or document related to this Indenture shall include images of manually executed signatures transmitted by facsimile or other electronic format (including, without limitation, “pdf”, “tif” or “jpg”) and other electronic signatures (including, without

limitation, DocuSign and AdobeSign). The use of electronic signatures and electronic records (including, without limitation, any contract or other record created, generated, sent, communicated, received, or stored by electronic methods) shall be of the same legal effect, validity and enforceability as a manually executed signature or use of a paper-based recordkeeping system to the fullest extent permitted by applicable law, including, without limitation, the Federal Electronic Signatures in Global and National Commerce Act, the New York State Electronic Signatures and Records Act and any other applicable law, including, without limitation, any state law based on the Uniform Electronic Transactions Act or the Uniform Commercial Code.

Section 1.16. Force Majeure.

In no event shall the Trustee or any Agent be responsible or liable for any failure or delay in the performance of its obligations hereunder arising out of or caused by, directly or indirectly, forces beyond its control, including, without limitation, strikes, work stoppages, accidents, pandemics, epidemics, acts of war or terrorism, civil or military disturbances, nuclear or natural catastrophes or acts of God, and interruptions, loss or malfunctions of utilities, communications or computer (software and hardware) services; it being understood that the Trustee or such Agent shall use reasonable efforts which are consistent with accepted practices in the banking industry to resume performance as soon as practicable under the circumstances.

Section 1.17. U.S.A. PATRIOT Act.

In order to comply with the laws, rules, regulations and executive orders in effect from time to time applicable to banking institutions, including, without limitation, those relating to the funding of terrorist activities and money laundering, including Section 326 of the USA PATRIOT Act of the United States ("Applicable Law"), the Trustee and Agents are required to obtain, verify, record and update certain information relating to individuals and entities which maintain a business relationship with the Trustee and Agents. Accordingly, each of the parties agrees to provide to the Trustee and Agents, upon their request from time to time such identifying information and documentation as may be available for such party in order to enable the Trustee and Agents to comply with Applicable Law.

Section 1.18. Anti-Money Laundering, Terrorism and Economic Sanctions.

(a) The Trustee or any Agent may take and instruct any delegate to take any action which it in its sole discretion considers appropriate so as to comply with any applicable law, regulation, request of a public or regulatory authority or any internal group policy (including any "Know Your Client" and/or other compliance policy) which relates to the prevention of fraud, money laundering, terrorism or other criminal activities or the provision of financial and other services to sanctioned persons or entities. Such action may include but is not limited to the interception and investigation of transactions on the Issuer's or any Guarantor's accounts (particularly those involving the international transfer of funds) including the source of the intended recipient of funds paid into or out of the Issuer's or any Guarantor's accounts. None of the Trustee, any Agent or any delegate will be liable for any loss (whether direct or consequential and including, without limitation, loss of profit or interest) caused in whole or in

part by any actions which are taken by the Trustee, any Agent or any delegate pursuant to this Section 1.18.

(b) The Issuer and each Guarantor covenants and represents, jointly and severally, that neither it nor any of their respective subsidiaries or their respective directors or officers, and, to the knowledge of the Issuer or any Guarantor, any of their affiliates are the target or subject of any sanctions enforced by the US Government, (including, without limitation, the Office of Foreign Assets Control of the US Department of the Treasury or the US Department of State), the United Nations Security Council, the European Union, His Majesty's Treasury, or other relevant sanctions authority (collectively "Sanctions");

(c) The Issuer and each Guarantor covenants and represents, jointly and severally, that neither it nor any of their respective subsidiaries or their respective directors or officers will directly or indirectly use any repayments/reimbursements made pursuant to this Indenture, (i) to fund or facilitate any activities of or business with any person who, at the time of such funding or facilitation, is the subject or target of Sanctions, (ii) to fund or facilitate any activities of or business with any country or territory that is the target or subject of Sanctions, or (iii) in any other manner that will result in a violation of Sanctions by any Person.

Section 1.19. FATCA Reporting.

The Issuer and each Guarantor agrees that (a) if reasonably requested by the Trustee or any of the Agents and required by FATCA, in relation to a payment made under this Indenture and the Notes issued hereunder, the Issuer or the Guarantors will provide such information if and to the extent that (i) such information is reasonably necessary for each of the Trustee and the Agents to determine that it is in compliance with FATCA as relates to the payments made under this Indenture and the Notes issued hereunder and (ii) such information is reasonably available to the Issuer or the Guarantors, as applicable with regard to the Issuer or Guarantors in relation to the requirements of FATCA that are actually imposed upon such requesting Trustee or Agent, as applicable; provided, however, that neither the Issuer nor any Guarantor shall be required to provide information that it is prohibited legally from disclosing and (b) the Trustee and each applicable Agent shall be entitled to make any withholding or deduction from payments to the extent necessary to comply with FATCA, for which the Trustee and the Agents shall have no liability. The terms of this Section 1.19 shall survive the termination of this Indenture.

Section 1.20. Effective Date.

This Indenture shall become effective on the date hereof and shall be binding upon the Issuer, the Guarantors, the Trustee, the Registrar, the Paying Agent and the Principal Paying Agent.

ARTICLE II

NOTE FORMS

Section 2.1. Forms Generally.

The Notes, the Trustee's certificates of authentication thereof and the Guarantees endorsed thereon shall be substantially in the forms set forth in this Article, with such appropriate legends, insertions, omissions, substitutions and other variations as are required or permitted by this Indenture, and may have such letters, numbers or other marks of identification and such legends or endorsements placed thereon as may be required to comply with the rules of any securities exchange or as may, consistently herewith, be determined by the officers executing such Notes or Guarantees, as the case may be, as evidenced by their execution of the Notes.

The definitive Notes and the Guarantees to be endorsed thereon shall be printed, lithographed or engraved or produced by any combination of these methods on steel engraved borders or may be produced in any other manner all as determined by the officers executing such Notes, as evidenced by their execution of such Notes or Guarantees, as the case may be.

In certain cases described elsewhere herein, the legends set forth in the first three paragraphs of Section 2.2 may be omitted from Notes issued hereunder.

Notes offered and sold in their initial distribution in reliance on Regulation S will be initially issued in the form of one or more Global Notes in fully registered form without interest coupons, substantially in the form of Note set forth in Section 2.2 and 2.3 (the "Regulation S Global Note"), which shall be registered in the name of the Depositary or its nominee and deposited with the Trustee, at its Corporate Trust Office, as custodian for the Depositary, duly executed by the Issuer and the Guarantors and authenticated by the Trustee as hereinafter provided, for credit by the Depositary to the respective accounts of the beneficial owners of the Notes represented thereby (or such other accounts as they may direct).

Notes offered and sold in their initial distribution in reliance on Rule 144A shall be issued in the form of one or more Global Notes (collectively, and, together with their Successor Notes, the "Restricted Global Note") in fully registered form without interest coupons, substantially in the form of Note set forth in Section 2.2 and 2.3, with such applicable legends as are provided for in Section 2.2, except as otherwise permitted herein. Such Restricted Global Note shall be registered in the name of the Depositary or its nominee and deposited with the Trustee, at its Corporate Trust Office, as custodian for the Depositary, duly executed by the Issuer and the Guarantors and authenticated by the Trustee as hereinafter provided, for credit by the Depositary to the respective accounts of beneficial owners of the Notes represented thereby (or such other accounts as they may direct). The aggregate principal amount of the Restricted Global Note may be increased or decreased from time to time by adjustments made on the records of the Trustee, as custodian for the Depositary, in connection with a corresponding decrease or increase in the aggregate principal amount of the Regulation S Global Note, as hereinafter provided.

Section 2.2. Form of Face of Note.

[Include if Note is a Restricted Global Note — THIS NOTE (OR ITS PREDECESSOR) WAS ORIGINALLY ISSUED IN A TRANSACTION EXEMPT FROM REGISTRATION UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED, OR THE SECURITIES ACT, AND THIS NOTE MAY NOT BE REOFFERED, SOLD OR

OTHERWISE TRANSFERRED IN THE ABSENCE OF SUCH REGISTRATION OR AN APPLICABLE EXEMPTION THEREFROM. EACH PURCHASER OF THIS NOTE IS HEREBY NOTIFIED THAT THE SELLER OF THIS NOTE MAY BE RELYING ON THE EXEMPTION FROM THE PROVISIONS OF SECTION 5 OF THE SECURITIES ACT PROVIDED BY RULE 144A THEREUNDER. THE HOLDER OF THIS NOTE AGREES FOR THE BENEFIT OF THE ISSUER OR ANY SUBSIDIARY THAT (A) THIS NOTE MAY BE REOFFERED, RESOLD, PLEDGED OR OTHERWISE TRANSFERRED, ONLY (I) TO A PERSON WHOM THE SELLER REASONABLY BELIEVES IS A QUALIFIED INSTITUTIONAL BUYER (AS DEFINED IN RULE 144A UNDER THE SECURITIES ACT) IN A TRANSACTION MEETING THE REQUIREMENTS OF RULE 144A, (II) OUTSIDE THE UNITED STATES TO A PERSON THAT IS NOT A U.S. PERSON IN AN OFFSHORE TRANSACTION IN ACCORDANCE WITH RULE 904 UNDER THE SECURITIES ACT, (III) PURSUANT TO ANOTHER AVAILABLE EXEMPTION UNDER THE SECURITIES ACT, (IV) TO THE ISSUER OR ANY SUBSIDIARY OF THE ISSUER OR (V) PURSUANT TO AN EFFECTIVE REGISTRATION STATEMENT UNDER THE SECURITIES ACT, IN EACH OF CASES (I) THROUGH (V) IN ACCORDANCE WITH ANY APPLICABLE SECURITIES LAWS OF ANY STATE OF THE UNITED STATES; AND (B) THE HOLDER WILL, AND EACH SUBSEQUENT HOLDER IS REQUIRED TO, NOTIFY ANY PURCHASER OF THIS NOTE FROM IT OF THE RESALE RESTRICTIONS REFERRED TO IN (A) ABOVE. THIS LEGEND MAY ONLY BE REMOVED AT THE OPTION OF THE ISSUER.]

[Include if Note is a Regulation S Global Note — THIS NOTE (OR ITS PREDECESSOR) WAS ORIGINALLY ISSUED IN A TRANSACTION EXEMPT FROM REGISTRATION UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED, OR THE SECURITIES ACT, AND MAY NOT BE TRANSFERRED IN THE UNITED STATES OR TO, OR FOR THE ACCOUNT OR BENEFIT OF, ANY U.S. PERSON EXCEPT PURSUANT TO AN AVAILABLE EXEMPTION FROM THE REGISTRATION REQUIREMENTS OF THE SECURITIES ACT AND ALL APPLICABLE STATE SECURITIES LAWS. TERMS USED ABOVE HAVE THE MEANINGS GIVEN TO THEM IN REGULATION S UNDER THE SECURITIES ACT.]

Nexa Resources S.A., a validly organized public limited liability company validly organized under the laws of the Grand Duchy of Luxembourg having its registered office at 37A Avenue J.F. Kennedy, L-1855, Luxembourg, Grand Duchy of Luxembourg and registered with the *Registre de Commerce et des Sociétés* in Luxembourg under number B 185.489 (herein called the “Issuer,” which term includes any successor Person under the Indenture hereinafter referred to), for value received, hereby promises to pay to Cede & Co. or its registered assigns, the principal sum of Dollars [include if Note is a Global Note — (or such other Principal Sum as is noted in the records of the Custodian for the Depositary as being the Principal Amount of this Regulation S Global Note/Restricted Global Note for the time being)] on April 8, 2037, and to pay interest thereon from April 8, 2025, or from the most recent Interest Payment Date to which interest has been paid or duly provided for, semi-annually on April 8 and October 8 in each year, commencing on October 8, 2025, at the rate of 6.600% per annum, until the principal hereof is paid or made available for payment. The interest so payable, and punctually paid or duly provided for, on any Interest Payment Date will, as provided in such Indenture, be paid to the Person in whose name this Note (or one or more Predecessor Notes) is registered at the close of business on the Record Date for such interest, which shall be two calendar days prior to payment (whether or not a Business Day), as the case may be, next preceding such Interest Payment Date. Any such interest not so punctually paid or duly provided for will forthwith cease to be payable to the Holder on such Record Date and may either be paid to the Person in whose name this Note (or one or more Predecessor Notes) is registered at the close of business on a Special Record Date for the payment of such Defaulted Interest to be fixed by the Trustee, notice whereof shall be given to Holders of Notes not less than 10 days prior to such Special Record Date, or be paid at any time in any other lawful manner not inconsistent with the requirements of any securities exchange on which the Notes may be listed, and upon such notice as may be required by such exchange, all as more fully provided in said Indenture. In addition, the Issuer will pay to the

Holder of this Note such Additional Amounts as may become payable under Section 11.9 of the Indenture.

In the case of a default in payment of principal and premium, if any, upon acceleration or repayment, interest shall be payable pursuant to the preceding paragraph on such overdue principal (and premium, if any), such interest shall be payable on demand and, if not so paid on demand, such interest shall itself bear interest at the rate per annum stated above plus 1% (to the extent that the payment of such interest shall be legally enforceable), and shall accrue from the date such principal and/or premium, as the case may be, was due and payable to the date payment of such interest has been made or duly provided for, and such interest on unpaid interest shall also be payable on demand.

Payment of the principal of (and premium, if any) and interest on this Note will be made at the Corporate Trust Office of the Trustee, at the offices of a Paying Agent, at the office or agency of the Issuer maintained for that purpose in The City of New York, New York, and at any other office or agency maintained by the Issuer for such purpose, in such coin or currency of the United States as at the time of payment is legal tender for payment of public and private debts; provided, however, that at the option of the Issuer payment of interest may be made by check mailed to the address of the Person entitled thereto as such address shall appear in the Note Register.

Reference is hereby made to the further provisions of this Note set forth on the reverse hereof, which further provisions shall for all purposes have the same effect as if set forth at this place.

Unless the certificate of authentication hereon has been executed by the Trustee referred to on the reverse hereof by manual or electronic signature, this Note shall not be entitled to any benefit under the Indenture or be valid or obligatory for any purpose.

IN WITNESS WHEREOF, the Issuer has caused this instrument to be duly executed.

Section 2.3. Form of Reverse of Note.

This Note is one of a duly authorized issue of Notes of the Issuer designated as its 6.600% Senior Unsecured Notes due 2037 (the “Notes”) issued under an Indenture, dated as of April 8, 2025 (herein called the “Indenture”), among the Issuer, the Guarantors named therein, and The Bank of New York Mellon, a New York banking corporation, as trustee (the “Trustee”), as principal paying agent (the “Principal Paying Agent”) and any other paying agents to be appointed hereunder, the “Paying Agents”), as transfer agent (the “Transfer Agent”) and registrar (the “Registrar”). Reference is hereby made to the Indenture and all indentures supplemental thereto for a statement of the respective rights, limitations of rights, duties and immunities thereunder of the Issuer, the Guarantors, the Trustee, the Transfer Agent and the Notes are, and are to be, authenticated and delivered. Terms used but not defined in this Note are defined in the Indenture.

As provided in the Indenture and subject to certain limitations therein set forth, the obligations of the Issuer under the Indenture and this Note are guaranteed pursuant to the Guarantees set forth in the Indenture. Each Holder, by holding this Note, agrees to all of the terms and provisions of said Guarantees. Reference is hereby made to the Indenture for a statement of the respective rights, limitations of rights, duties and obligations thereunder of the Guarantors, the Trustee and the Holders.

The Issuer may from time to time, without the consent of the Holders of the Notes, create and issue Additional Notes having the same terms and conditions as the Initial Notes in all respects, except that the issue date, the issue price and the first payment of interest thereon may differ; provided, however, that unless the Additional Notes are treated as part of the same “issue” of debt instruments as the Initial Notes or are issued pursuant to a “qualified reopening” of the Initial Notes, or are issued with less than a *de minimis* amount of original issue discount, in each case for U.S. federal income tax purposes, the Additional Notes will have a separate CUSIP or ISIN number (as applicable). Additional Notes shall be consolidated with and shall form a single series and vote together with the previously issued Notes for all purposes under the Indenture.

If as a result of any Change of Law (as defined in the Indenture): (i) the Issuer or a Guarantor is or would be required on the next succeeding Interest Payment Date to pay any Additional Amounts referred to in Section 11.9 of the Indenture in excess of the Additional Amounts that the Issuer or such Guarantor, as the case may be, would pay if payments in respect of the Notes were subject to deduction or withholding for Taxes imposed by the applicable taxing jurisdiction at the rate applicable on the Issue Date; or (ii) the issuers/borrowers of certain intercompany debt are or would be required on the next succeeding interest payment date to pay Brazilian withholding taxes in excess of a general rate of 15%, or 25% in case of amounts paid to residents of countries or locations which do not impose any income tax or which impose it at a maximum rate lower than 17% or where the laws of that country or location impose restrictions on the disclosure (x) of shareholding composition; (y) of the ownership of the investment; or (z) to the identification of the beneficial owner of income attributed to non-resident persons, pursuant to article 8 of Brazilian Law No. 9,779, of January 19, 1999, and articles 24 and 24-A of Brazilian Law No. 9,430, of December 27, 1996; provided that, such requirement to pay such taxes in excess of such rate was not caused by, or otherwise the result of, whether directly or indirectly, wholly or in part, any amendment to the intercompany debt, and in either case, the

payment of such excess amounts cannot be avoided by the use of any reasonable measures available to the Issuer or a Guarantor, the Notes may be redeemed, by the Issuer at the option of the Issuer or a Guarantor, in whole but not in part, upon not less than 30 nor more than 90 days' notice to the Holders, which notice will be published, at any time following such Change of Law at a Redemption Price equal to the principal amount thereof, plus accrued and unpaid interest, if any, to the date fixed for redemption. The Issuer, any Guarantor or any of their respective Affiliates will also pay to Holders of the Notes on the Redemption Date any Additional Amounts which are payable.

Following such redemption, the Notes will be cancelled, or remain Outstanding, at the Issuer's or a Guarantor's election. Prior to the delivery of any notice of redemption in accordance with the foregoing, the Issuer or a Guarantor shall deliver to the Trustee and the Agents an Officer's Certificate stating that the Issuer or a Guarantor, as the case may be, is entitled to effect such redemption based on an Opinion of Counsel or written advice of a qualified tax expert, that the Issuer or a Guarantor has or will become obligated to pay such excess amounts with respect to Taxes as a result of such Change of Law. Such notice, once delivered by the Issuer or a Guarantor to the Trustee, will be irrevocable.

At any time before January 8, 2037 (which is the date that is three months prior to maturity of the notes (the "Par Call Date")), the Issuer or a Guarantor has the right to redeem the Notes, in whole or in part and from time to time, at a Redemption Price equal to the greater of (1) 100% of the principal amount of the Notes being redeemed and (2) the sum of the present values of the remaining scheduled payments of principal and interest on the Notes being redeemed that would be due if the Notes matured on the Par Call Date (inclusive of interest accrued to the redemption date), discounted to the Redemption Date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Treasury Rate plus 40 basis points, less interest accrued to, but excluding, the Redemption Date; plus, in either case, accrued and unpaid interest on the principal amount of the Notes being redeemed and Additional Amounts, if any, to, but excluding, the Redemption Date (subject to the right of Holders of record on the relevant Record Date to receive interest due on the relevant Interest Payment Date).

At any time on or after the Par Call Date, the Issuer or a Guarantor has the right to redeem the Notes, in whole or in part and from time to time, at a Redemption Price equal to 100% of the principal amount of the Notes being redeemed plus accrued and unpaid interest on the principal amount of the Notes being redeemed to, but excluding, such Redemption Date (subject to the right of Holders of record on the relevant Record Date to receive interest due on the relevant Interest Payment Date).

The "Treasury Rate" shall be determined by the Issuer or a Guarantor after 4:15 p.m., New York City time (or after such time as yields on U.S. government securities are posted daily by the Board of Governors of the Federal Reserve System), on the third Business Day preceding the Redemption Date based upon the yield or yields for the most recent day that appear after such time on such day in the most recent statistical release published by the Board of Governors of the Federal Reserve System designated as "Selected Interest Rates (Daily) - H.15" (or any successor designation or publication) ("H.15") under the caption "U.S. government securities-Treasury constant maturities-Nominal" (or any successor caption or heading). In determining the Treasury Rate, the Issuer or a Guarantor shall select, as applicable: (i) the yield for the Treasury

constant maturity on H.15 exactly equal to the period from the redemption date to the Par Call Date (the “Remaining Life”); or (ii) if there is no such Treasury constant maturity on H.15 exactly equal to the Remaining Life, the two yields – one yield corresponding to the Treasury constant maturity on H.15 immediately shorter than and one yield corresponding to the Treasury constant maturity on H.15 immediately longer than the Remaining Life – and shall interpolate to the Par Call Date on a straight-line basis (using the actual number of days) using such yields and rounding the result to three decimal places; or (iii) if there is no such Treasury constant maturity on H.15 shorter than or longer than the Remaining Life, the yield for the single Treasury constant maturity on H.15 closest to the Remaining Life. For purposes of this paragraph, the applicable Treasury constant maturity or maturities on H.15 shall be deemed to have a maturity date equal to the relevant number of months or years, as applicable, of such Treasury constant maturity from the Redemption Date.

If on the third Business Day preceding the Redemption Date H.15 or any successor designation or publication is no longer published, the Issuer or a Guarantor shall calculate the Treasury Rate based on the rate per annum equal to the semi-annual equivalent yield to maturity at 11:00 a.m., New York City time, on the second Business Day preceding such redemption date of the United States Treasury security maturing on, or with a maturity that is closest to, the Par Call Date, as applicable. If there is no United States Treasury security maturing on the Par Call Date but there are two or more United States Treasury securities with a maturity date equally distant from the Par Call Date, one with a maturity date preceding the Par Call Date and one with a maturity date following the Par Call Date, the Issuer or a Guarantor shall select the United States Treasury security with a maturity date preceding the Par Call Date. If there are two or more United States Treasury securities maturing on the Par Call Date or two or more United States Treasury securities meeting the criteria of the preceding sentence, the Issuer or the Guarantor shall select from among these two or more United States Treasury securities the United States Treasury security that is trading closest to par based upon the average of the bid and asked prices for such United States Treasury securities at 11:00 a.m., New York City time. In determining the Treasury Rate in accordance with the terms of this paragraph, the semi-annual yield to maturity of the applicable United States Treasury security shall be based upon the average of the bid and asked prices (expressed as a percentage of principal amount) at 11:00 a.m., New York City time, of such United States Treasury security, and rounded to three decimal places.

The Issuer or a Guarantor’s actions and determinations in determining the Redemption Price shall be conclusive and binding for all purposes, absent manifest error.

The Issuer, any Guarantor or any of their respective Affiliates may at any time repurchase the Notes at any price in the open market or otherwise. The Issuer, any Guarantor or any of their respective Affiliates may hold or resell the Notes it purchases or may surrender them to the Trustee or an Agent for cancellation.

Optional Clean-up Redemption. Notwithstanding the foregoing, in connection with any tender offer for the notes (including an Offer to Purchase in connection with a Change of Control that results in a Rating Decline made in accordance with the terms of the Indenture), in the event that the Holders of not less than 85% of the aggregate principal amount of the outstanding Notes validly tender and do not validly withdraw Notes in such tender offer and the Issuer, or any other

Person making such offer in lieu of the Issuer, purchases all of the Notes validly tendered and not validly withdrawn by such Holders, then the Issuer or the Guarantor will have the right, on not less than 10 nor more than 60 days' prior notice to the Holders (with a copy to the Trustee), to redeem all of the Notes that remain outstanding at a Redemption Price equal to the purchase price paid to each other Holder in such tender offer plus, to the extent not included in the purchase price, accrued and unpaid interest and Additional Amounts, if any, on the Notes that remain outstanding, to, but excluding, the Redemption Date.

[Include if Note is a Regulation S Global Note — If the holder of a beneficial interest in this Regulation S Global Note at any time wishes to transfer such interest to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Restricted Global Note, such transfer may be effected, subject to the rules and procedures of the Depositary, Euroclear and Clearstream, in each case to the extent applicable and as in effect from time to time, only in accordance with the terms of this paragraph. Upon receipt by the Trustee, as Registrar, of (A) written instructions given by or on behalf of the Depositary in accordance with the rules and procedures of the Depositary, Euroclear and Clearstream, in each case to the extent applicable and as in effect from time to time directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Restricted Global Note in a specified principal amount and to cause to be debited from another specified Agent Member's account a beneficial interest in this Regulation S Global Note in an equal principal amount; and (B) a certificate in substantially the form set forth in Exhibit B to the Indenture signed by or on behalf of the Agent Member holding such beneficial interest in this Regulation S Global Note, the Trustee, as Registrar, shall reduce the principal amount of this Regulation S Global Note and increase the principal amount of the Restricted Global Note by such specified principal amount.]

[Include if Note is a Restricted Global Note — If the holder of a beneficial interest in this Restricted Global Note wishes at any time to transfer such interest to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Regulation S Global Note, such transfer may be effected, subject to the rules and procedures of the Depositary, Euroclear and Clearstream, in each case to the extent applicable and as in effect from time to time, only in accordance with the terms of this paragraph. Upon receipt by the Trustee, as Registrar of:

(A) written instructions given by or on behalf of the Depositary in accordance with the rules and procedures of the Depositary, Euroclear and Clearstream, in each case to the extent applicable and as in effect from time to time directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Regulation S Global Note in a specified principal amount and to cause to be debited from another specified Agent Member's account a beneficial interest in the Restricted Global Note in an equal principal amount; and

(B) a certificate in substantially the form set forth in Exhibit A of the Indenture signed by or on behalf of the Agent Member holding such beneficial interest in this Restricted Global Note,

the Trustee, as Registrar, shall reduce the principal amount of this Restricted Global Note, and increase the principal amount of the Regulation S Global Note by such specified principal amount.]

The Notes do not have the benefit of any sinking fund obligations.

In the event of redemption or purchase of this Note in part only, a new Note or Notes of like tenor for the unredeemed or unpurchased portion hereof will be issued in the name of the Holder hereof upon the cancellation hereof.

If an Event of Default shall occur and be continuing, the principal of all the Notes may be declared due and payable in the manner and with the effect provided in the Indenture.

The Indenture contains provisions for defeasance at any time of (i) the entire indebtedness of this Note, or (ii) certain restrictive covenants and Events of Default with respect to this Note, in each case upon compliance with certain conditions set forth therein.

Unless the context otherwise requires, the Notes shall constitute one series for all purposes under the Indenture, including without limitation, amendments, waivers or redemption.

The Indenture permits, with certain exceptions as therein provided, the amendment thereof and the modification of the rights and obligations of the Issuer and the Guarantors and the rights of the Holders of the Notes under the Indenture at any time by the Issuer and the Trustee with the consent of the Holders of a majority in aggregate principal amount of the Notes at the time Outstanding. The Indenture also contains provisions permitting the Holders of specified percentages in aggregate principal amount of the Notes at the time Outstanding, on behalf of the Holders of all the Notes, to waive compliance by the Issuer or the Guarantors with certain provisions of the Indenture and certain past defaults under the Indenture and their consequences.

Any such consent or waiver by the Holder of this Note shall be conclusive and binding upon such Holder and upon all future Holders of this Note and of any Note issued upon the registration of transfer hereof or in exchange herefor or in lieu hereof, whether or not notation of such consent or waiver is made upon this Note.

No reference herein to the Indenture and no provision of this Note or of the Indenture shall alter or impair the obligation of the Issuer, which is absolute and unconditional, to pay the principal of (and premium, if any) and interest on this Note at the times, place and rate, and in the coin or currency, herein prescribed.

As provided in the Indenture and subject to certain limitations therein set forth, the transfer of this Note is registrable in the Note Register, upon surrender of this Note for registration of transfer at the office or agency of the Issuer in the Borough of Manhattan, The City of New York, New York, or of any of the Transfer Agents duly endorsed by, or accompanied by a written instrument of transfer in form satisfactory to the Issuer duly executed by, the Holder hereof or his attorney duly authorized in writing, and thereupon one or more new Notes, of authorized denominations and like tenor and for the same aggregate principal amount, will be issued to the designated transferee or transferees.

The Notes are issuable only in registered form without coupons in minimum denominations of U.S.\$200,000 and integral multiples of U.S.\$1,000 in excess thereof. As provided in the Indenture and subject to certain limitations therein set forth, Notes are exchangeable for a like tenor and aggregate principal amount of Notes of a different authorized denomination, as requested by the Holder surrendering the same.

No service charge shall be made for any such registration of transfer or exchange, but the Issuer or the Trustee may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection therewith, other than for any transfer or exchange pursuant to Section 3.4, 10.5 or 11.5 of the Indenture.

Prior to due presentment of this Note for registration of transfer, the Issuer, the Trustee, the Transfer Agents and any agent of the Issuer or the Trustee may treat the Person in whose name this Note is registered as the owner hereof for all purposes, whether or not this Note be overdue, and none of the Issuer, the Trustee or any such agent shall be affected by notice to the contrary.

Interest on this Note shall be computed on the basis of a 360-day year of twelve 30-day months each and, in the case of an incomplete month, on the number of days elapsed based on a 30-day month.

All terms used in this Note which are defined in the Indenture shall have the meanings assigned to them in the Indenture.

THE INDENTURE, THIS NOTE AND THE GUARANTEES SHALL BE GOVERNED BY, AND CONSTRUED IN ACCORDANCE WITH, THE LAWS OF THE STATE OF NEW YORK, without regard to conflicts of laws principles thereof. For the purposes of paragraph 2 of article 9 of the Brazilian Decree-Law No. 4,567, dated September 4, 1942, as amended, the Trustee shall be deemed the “proponent” of the transactions contemplated by the Indenture. Articles 84 through 94-8 of the Luxembourg law dated August 10, 1915 on commercial companies, as amended, which set the provisions related to the representation of the Holders of the Notes, are not applicable to the Notes or the Guarantees.

The Issuer and the Guarantors agree that any suit, action or proceeding against any of them brought by any Holder or the Trustee arising out of or based upon this Indenture, the Notes or the Guarantees may be instituted in any state or Federal court in The City of New York, New York, and waive any objection which any of them may now or hereafter have to the laying of venue of any such proceeding, and irrevocably submits to the non-exclusive jurisdiction of such courts in any suit, action or proceeding.

The Issuer may change any Paying Agent, the Registrar or Transfer Agent; provided that the Issuer will maintain an office or agency where the Notes may be presented or surrendered for payment and for registration of transfer in the Borough of Manhattan, The City of New York. Upon any such change, the Issuer shall give written notice thereof to the Trustee, the Principal Paying Agent and the Holders.

U.S. dollars are the sole currency of account and payment for all sums payable by the Issuer and the Guarantors under or in connection with the Notes, the Guarantees or the Indenture,

including damages. The Issuer and the Guarantors have agreed that the provisions of Section 1.14 of the Indenture shall apply to conversion of currency in the case of the Notes, the Guarantees and the Indenture. Among other things, Section 1.14 specifies that if there is a change in the rate of exchange prevailing between the Business Day before the day on which a judgment is given or an order of enforcement is made, as the case may be (or such other date as a court shall determine), and the date of receipt of the amount due, the Issuer or the relevant Guarantor, as the case may be, will pay such additional (or, as the case may be, such lesser) amount, if any, as may be necessary so that the amount paid in the judgment currency when converted at the rate of exchange prevailing on the date of receipt will produce the amount in the Base Currency originally due.

Each of the Issuer and the Guarantors has appointed Cogency Global Inc., currently located at 122 East 42nd Street, 18th Floor, New York, NY 10168, as its authorized agent upon which process may be served in any suit, or proceeding with respect to, arising out of, or relating to, this Note, the Indenture or the Guarantees, that may be instituted in any Federal or state court in the State of New York, The City of New York, the Borough of Manhattan, or brought under Federal or state securities laws and has agreed that there shall, at all times, be at least one agent for service of process for the Issuer and the Guarantors appointed and acting in accordance with the provisions of Section 1.13 of the Indenture relating to agent for service of process. To the extent that the Issuer or the Guarantors has or hereafter may acquire any immunity from jurisdiction of any court or from any legal process (whether through service of notice, attachment prior to judgment, attachment in aid of execution, execution or otherwise) with respect to itself or its property, each of the Issuer and the Guarantors has irrevocably waived such immunity in respect of its obligations under the Indenture, this Note and the Guarantees, to the fullest extent permitted by law.

Section 2.4. Form of Trustee's Certificate of Authentication.

This is one of the Notes with the Guarantees referred to in the within-mentioned Indenture.

ARTICLE III

THE NOTES

Section 3.1. Title and Terms.

On the Issue Date, the Trustee shall authenticate and deliver U.S.\$500,000,000 aggregate principal amount of 6.600% Senior Unsecured Notes due 2037. The Issuer may from time to time, without the consent of the Holders of the Notes, create and issue Additional Notes having the same terms and conditions as the Initial Notes in all respects, except that the issue date, the issue price and the first payment of interest thereon may differ; provided, however, that unless the Additional Notes are treated as part of the same “issue” of debt instruments as the Initial Notes or are issued pursuant to a “qualified reopening” of the Initial Notes, or are issued with less than a *de minimis* amount of original issue discount, in each case for U.S. federal income tax purposes, the Additional Notes will have a separate CUSIP or ISIN number (as applicable). Any Additional Notes shall be consolidated with and shall form a single series and vote together with the previously issued Notes for all purposes under this Indenture.

The Notes shall be known and designated as the “6.600% Senior Unsecured Notes due 2037” of the Issuer. The Stated Maturity of the Notes shall be April 8, 2037. The Notes shall bear interest at the rate of 6.600% per annum, from April 9, 2024 or from the most recent Interest Payment Date thereafter to which interest has been paid or duly provided for, as the case may be, payable semi-annually in arrears on April 8 and October 8, commencing on October 8, 2025, until the principal thereof is paid or made available for payment.

In the case of a default in payment of principal and premium, if any, upon acceleration or redemption, interest (and Additional Amounts, if any) shall be payable pursuant to the second paragraph of this Section 3.1 on such overdue principal (and premium, if any), such interest shall be payable on demand and, if not so paid on demand, such interest shall itself bear interest at the rate per annum stated in the form of security contained herein plus 1% per annum (to the extent that the payment of such interest shall be legally enforceable), and shall accrue from the date such principal and/or premium, as the case may be, was due and payable to the date payment of such interest (and Additional Amounts, if any) has been made or duly provided for, and such interest on unpaid interest shall also be payable on demand.

The principal of and premium, if any, and interest on the Notes shall be payable at the Corporate Trust Office, the office of the Paying Agents and at any other office or agency maintained by the Issuer for such purpose; provided, however, that at the option of the Issuer upon five (5) Business Days’ notice to the applicable Paying Agent, payment of interest may be made by check mailed to the address of the Person entitled thereto as such address shall appear in the Note Register.

The Notes shall be redeemable or repurchasable as provided in Article XI. The Notes shall not have the benefit of any sinking fund obligations.

The Notes shall be subject to defeasance at the option of the Issuer as provided in Article XII.

Unless the context otherwise requires, the Notes shall constitute one series for all purposes under this Indenture, including, without limitation, amendments, waivers or redemptions

Section 3.2. Denominations.

The Notes are issuable only in fully registered form, without coupons, in a minimum denomination of U.S.\$200,000 and integral multiples of U.S.\$1,000 in excess thereof.

Section 3.3. Execution, Authentication, Delivery and Dating.

The Notes shall be executed on behalf of the Issuer by an authorized signatory or authorized signatories of the Issuer. The signature of any signatory on the Notes may be manual, electronic or facsimile.

Notes bearing the manual, electronic or facsimile signatures of individuals who were at any time the proper officers of the Issuer shall bind the Issuer, notwithstanding that such individuals or any of them have ceased to hold such offices prior to the authentication and delivery of such Notes or did not hold such offices at the date of such Notes.

At any time and from time to time after the execution and delivery of this Indenture, the Issuer may deliver Notes executed by the Issuer and having endorsed (by attachment or imprint) thereon the Guarantees executed as provided in Section 14.2 by the Guarantors, to the Trustee for authentication, together with an Issuer Order for the authentication and delivery of such Notes; and the Trustee in accordance with such Issuer Order shall authenticate and deliver such Notes as in this Indenture provided and not otherwise.

Each Note shall be dated the date of its authentication.

No Note or Guarantee shall be entitled to any benefit under this Indenture or be valid or obligatory for any purpose unless there appears on such Note a certificate of authentication substantially in the form provided for herein executed by the Trustee by manual or electronic signature, and such certificate upon any Note shall be conclusive evidence, and the only evidence, that such Note has been duly authenticated and delivered hereunder and that the Guarantees referred to therein have been duly executed and delivered hereunder.

Section 3.4. Global Notes; Registration, Registration of Transfer and Exchange.

(a) *Global Notes.* The provisions of clauses (1) through (7) below shall apply only to Global Notes:

(1) each Global Note authenticated under this Indenture shall be registered in the name of the Depositary or a nominee thereof and delivered to the Depositary or a nominee thereof or custodian therefor, and each such Global Note shall constitute a single Note for all purposes of this Indenture;

(2) notwithstanding any other provision in this Indenture, no Global Note may be exchanged in whole or in part for Notes registered, and no transfer of a Global Note in

whole or in part may be registered, in the name of any Person other than the Depositary or a nominee thereof unless (A) the Depositary (i) has notified the Issuer that it is unwilling or unable to continue as Depositary for such Global Note and the Issuer thereupon fails to appoint a successor Depositary or (ii) has ceased to be a clearing agency registered under the Exchange Act, (B) the Issuer, at its option, notifies the Trustee in writing that it elects to cause the issuance of the Notes in definitive registered certificated form, or (C) an Event of Default has occurred and is continuing and the Registrar has received a written request from a beneficial owner of the Notes through an Agent Member to issue its proportionate interest in the Global Note in certificated form;

(3) if any Global Note is to be exchanged for other Notes or cancelled in whole, it shall be surrendered by or on behalf of the Depositary or its nominee to the Trustee, as Registrar, for exchange or cancellation as provided in this Article III. If any Global Note is to be exchanged for other Notes or cancelled in part, or if another Note is to be exchanged in whole or in part for a beneficial interest in any Global Note, such Global Note shall be so surrendered for exchange or cancellation as provided in this Article III or, if the Trustee is acting as custodian for the Depositary or its nominee (or is party to a similar arrangement) with respect to such Global Note, the principal amount thereof shall be reduced or increased by an amount equal to the portion thereof to be so exchanged or cancelled, or the principal amount of such other Note to be so exchanged for a beneficial interest therein, as the case may be, in each case by means of an appropriate adjustment made on the records of the Trustee, whereupon the Trustee, in accordance with the Applicable Procedures, shall instruct the Depositary or its authorized representatives to make a corresponding adjustment to its records (including by crediting or debiting any Agent Member's account as necessary to reflect any transfer or exchange of a beneficial interest pursuant to Section 3.4(c)). Upon any such surrender or adjustment of a Global Note, the Trustee shall, subject to Section 3.4(a)(2) and as otherwise provided in this Article III, authenticate and deliver any Notes issuable in exchange for such Global Note (or any portion thereof) to or upon the order of, and registered in such names as may be directed by, the Depositary or its authorized representative. Upon the request of the Trustee in connection with the occurrence of any of the events specified in the preceding paragraph, the Issuer shall promptly make available to the Trustee a reasonable supply of Notes that are not in the form of Global Notes. The Trustee shall be entitled to conclusively rely upon any order, direction or request of the Depositary or its authorized representative which is given or made pursuant to this Article III if such order, direction or request is given or made in accordance with the Applicable Procedures;

(4) every Note authenticated and delivered upon registration of transfer of, or in exchange for or in lieu of, a Global Note or any portion thereof, whether pursuant to this Article III or Section 10.5 or otherwise, shall be authenticated and delivered in the form of, and shall be, a Global Note, unless such Note is registered in the name of a Person other than the Depositary or a nominee thereof;

(5) none of the Issuer, the Guarantors, the Trustee, any agent of the Trustee, any Paying Agent or the Registrar will have any responsibility or liability for any aspect of the Depositary's records (or the records of the participant of such Depositary) relating

to or payments made on account of beneficial ownership interests of a Global Note or for maintaining, supervising or reviewing any records of the Depositary relating to such beneficial ownership interests;

(6) subject to the provisions in the legends required by Section 2.2 above, the registered Holder may grant proxies and otherwise authorize any Person, including Agent Members and Persons who may hold interests in Agent Members, to take any action that such Holder is entitled to take under this Indenture;

(7) except as provided in Section 3.4(a)(2) herein, neither Agent Members nor any other Person on whose behalf Agent Members may act shall have any rights under this Indenture with respect to any Global Note held on their behalf by the Depositary or under the Global Note, and the Depositary may be treated by the Issuer, the Trustee and any agent of the Issuer or the Trustee as the absolute owner of such Global Note for all purposes whatsoever. Notwithstanding the foregoing, nothing herein shall prevent the Issuer, the Guarantors, the Trustee or any agent of the Issuer or the Trustee from giving effect to any written certification, proxy or other authorization furnished by the Depositary or impair, as between the Depositary and its Agent Members, the operation of customary practices governing the exercise of the rights of a Holder of any Note.

(b) *Registration, Registration of Transfer and Exchange and Legends.* The Issuer shall cause to be kept at the Corporate Trust Office of the Trustee a register (the register maintained in such office and in any other office or agency designated pursuant to Section 11.2 being herein sometimes collectively referred to as the “Note Register”) in which, subject to such reasonable regulations as they may prescribe, the Issuer shall provide for the registration of Notes and of transfers and exchanges of Notes. The Trustee is hereby appointed “Registrar” for the purpose of registering Notes and transfers and exchanges of Notes as herein provided.

Upon surrender for registration of transfer of any Note at an office or agency of the Issuer designated pursuant to Section 11.2 for such purpose in accordance with the terms hereof, the Issuer shall, subject to the other provisions of this Section 3.4, execute, and the Trustee shall, upon receipt of an Issuer Order, authenticate and deliver, in the name of the designated transferee or transferees, one or more new Notes of any authorized denominations and of a like tenor and aggregate principal amount and bearing the applicable legends set forth in Section 2.2.

Subject to Section 3.4(c), at the option of the Holder, Notes may be exchanged for other Notes of any authorized denominations and of a like tenor and aggregate principal amount and bearing the applicable legend set forth in Section 2.2, if any, each such new Note having the benefit of the Guarantees executed by the Guarantors, upon surrender of the Note to be exchanged at such office or agency. Whenever any Note is so surrendered for exchange, the Issuer shall execute, and the Trustee shall, upon receipt of an Issuer Order, authenticate and deliver, the Note which the Holder making the exchange is entitled to receive.

The Trustee shall have no obligation or duty to monitor, determine or inquire as to compliance with U.S. securities laws, including but not limited to any restrictions on transfer imposed under this Indenture or under applicable law with respect to any transfer of any interest in any Note (including any transfers between or among Agent Members or beneficial owners of

interests in any Global Note) other than to require delivery of such certificates and other documentation or evidence as are expressly required by, and to do so if and when expressly required by the terms of, this Indenture, and to examine the same to determine substantial compliance solely as to form with the express requirements hereof. Neither the Trustee nor any Agent shall have any responsibility or liability for any actions taken or not taken by the Depositary.

All Notes and the Guarantees issued upon any registration of transfer or exchange of Notes shall be the valid obligations of the Issuer and the Guarantors, evidencing the same debt, and entitled to the same benefits under this Indenture, as the Notes and the Guarantees endorsed thereon, respectively, surrendered upon such registration of transfer or exchange.

Every Note presented or surrendered for registration of transfer or for exchange shall (if so required by the Issuer or the Trustee) be duly endorsed, or be accompanied by a written instrument of transfer in form satisfactory to the Issuer and the Registrar duly executed, by the Holder thereof or his attorney duly authorized in writing.

No service charge shall be made to the Holder for any registration of transfer or exchange of Notes, but the Issuer or the Trustee may require payment of a sum sufficient to cover any tax or other governmental charge that may be imposed in connection with any registration of transfer or exchange of Notes, other than any transfer or exchange pursuant to Section 3.4, Section 10.5 or Section 11.5.

The Issuer and the Registrar shall not be required (i) to issue, register the transfer of or exchange any Note during a period beginning at the opening of business 15 days before the due date for any payment of principal in respect of the Notes selected for redemption under Section 4.6 and ending at the close of business on the day of such mailing, or (ii) to register the transfer of or exchange any Note so selected for redemption in whole or in part, except the unredeemed portion of any Note being redeemed in part.

All Notes, initially issued hereunder shall, upon issuance, bear the relevant legends specified in Section 2.2, if any, to be applied to such a Note and, in the case of the legend specifically required for the Restricted Global Note, such required legend shall not be removed unless the Issuer shall have delivered to the Trustee (and the Notes Registrar, if other than the Trustee) an Issuer Order which states that such Note may be issued without such legend thereon. If such legend has been removed from a Note as provided above, no other Note issued in exchange for all or any part of such Note shall bear such legend, unless the Issuer has reasonable cause to believe that such other Note is a “restricted security” within the meaning of Rule 144 of the Notes Act and instructs the Trustee to cause a legend to appear thereon:

(c) *Certain Transfers and Exchanges.* Upon presentation for transfer or exchange of any Note at the office of the Trustee, as Registrar, located in The City of New York, accompanied by a written instrument of transfer or exchange in the form approved by the Issuer (it being understood that, until notice to the contrary is given to Holders of Notes, the Issuer shall be deemed to have approved the form of instrument of transfer or exchange, if any, printed on any Note), executed by the registered Holder, in person or by such Holder’s attorney thereunto duly authorized in writing, and upon compliance with this Section 3.4, such Note shall be

transferred upon the Note Register, and a new Note shall be authenticated and issued in the name of the transferee. Notwithstanding any provision to the contrary herein or in the Notes, transfers of a Global Note, in whole or in part, and transfers of interests therein of the kind described in this Section 3.4 (c), shall only be made in accordance with this Section 3.4(c). Transfers and exchanges subject to this Section 3.4(c) shall also be subject to the other provisions of this Indenture that are not inconsistent with this Section 3.4(c).

(1) *General.* A Global Note may not be transferred, in whole or in part, to any Person other than the Depositary or a nominee thereof, and no such transfer to any such other Person may be registered; provided, however, that this clause (1) shall not prohibit any transfer of a Note that is issued in exchange for a Global Note but is not itself a Global Note. No transfer of a Note to any Person shall be effective under this Indenture or the Notes unless and until such Note has been registered in the name of such Person. Nothing in this clause (1) shall prohibit or render ineffective any transfer of a beneficial interest in a Global Note effected in accordance with the other provisions of this Section 3.4(c).

(2) *Restricted Global Note to Regulation S Global Note.* If the holder of a beneficial interest in the Restricted Global Note wishes at any time to transfer such interest to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Regulation S Global Note, such transfer may be effected, subject to the rules and procedures of the Depositary, Euroclear and Clearstream, in each case to the extent applicable and as in effect from time to time (the "Applicable Procedures"), only in accordance with this clause (2). Upon receipt by the Trustee, as Registrar, of (A) written instructions given by or on behalf of the Depositary in accordance with the Applicable Procedures directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Regulation S Global Note in a specified principal amount and to cause to be debited from another specified Agent Member's account a beneficial interest in the Restricted Global Note in an equal principal amount and (B) a certificate in substantially the form set forth in Exhibit A signed by or on behalf of the Agent Member holding such beneficial interest in the Restricted Global Note, the Trustee, as Registrar, shall reduce the principal amount of a Restricted Global Note, and increase the principal amount of the Regulation S Global Note by such specified principal amount as provided in Section 3.4(a)(3).

(3) *Regulation S Global Note to Restricted Global Note.* If the holder of a beneficial interest in the Regulation S Global Note at any time wishes to transfer such interest to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Restricted Global Note, such transfer may be effected, subject to the Applicable Procedures, only in accordance with this clause (3). Upon receipt by the Trustee, as Registrar, of (A) written instructions given by or on behalf of the Depositary in accordance with the Applicable Procedures directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Restricted Global Note in a specified principal amount and to cause to be debited from another specified Agent Member's account a beneficial interest in the Regulation S Global Note and (B) a certificate in substantially the form set forth in Exhibit B signed by or on behalf of the Agent Member holding such beneficial interest in the Regulation S Global Note,

the Trustee, as Registrar, shall reduce the principal amount of such Regulation S Global Note and increase the principal amount of the Restricted Global Note by such specified principal amount as provided in Section 3.4(a)(3).

(4) *Non-Global Restricted Note to Global Note.* If the holder of a Restricted Note (other than a Global Note) wishes at any time to transfer all or any portion of such Note to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Restricted Global Note or the Regulation S Global Note, such transfer may be effected, subject to the Applicable Procedures, only in accordance with this clause (4). Upon receipt by the Trustee, as Registrar, of (A) such Note and written instructions given by or on behalf of such Holder as provided in Section 3.4(b) directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Restricted Global Note or the Regulation S Global Note, as the case may be, in a specified principal amount equal to the principal amount of the Restricted Note (or portion thereof) to be so transferred, and (B) an appropriately completed certificate substantially in the form set forth in Exhibit C-1 hereto, if the specified account is to be credited with a beneficial interest in the Restricted Global Note, or Exhibit C-2 hereto, if the specified account is to be credited with a beneficial interest in the Regulation S Global Note, signed by or on behalf of such Holder, then the Trustee, as Registrar, shall cancel such Restricted Note (and issue a new Note in respect of any untransferred portion thereof) as provided in Section 3.4(b) and increase the principal amount of the Restricted Global Note or Regulation S Global Note, as the case may be, by the specified principal amount as provided in Section 3.4(a)(3).

(5) *Non-Global Regulation S Note to Restricted Global Note or Regulation S Global Note.* If the Holder of a Regulation S Note (other than a Global Note) wishes at any time to transfer all or any portion of such Note to a Person who wishes to take delivery thereof in the form of a beneficial interest in the Restricted Global Note or the Regulation S Global Note, as the case may be, such transfer may be effected only in accordance with this clause (5) and subject to the Applicable Procedures. Upon receipt by the Trustee, as Registrar, of (A) such Note and written instructions given by or on behalf of such Holder as provided in Section 3.4(b) directing the Trustee to credit or cause to be credited to a specified Agent Member's account a beneficial interest in the Restricted Global Note or the Regulation S Global Note, as the case may be, in a principal amount equal to the principal amount of the Note (or portion thereof) to be so transferred, and (B)(i) with respect to a transfer which is to be delivered in the form of a beneficial interest in the Restricted Global Note, a certificate in substantially the form set forth in Exhibit D-1, signed by or on behalf of such Holder, and (ii) with respect to a transfer which is to be delivered in the form of a beneficial interest in the Regulation S Global Note, a certificate in substantially the form set forth in Exhibit D-2, signed by or on behalf of such Holder, then the Trustee, as Registrar, shall cancel such Note (and issue a new Note in respect of any untransferred portion thereof) as provided in Section 3.4(b) and increase the principal amount of the Restricted Global Note or the Regulation S Global Note, as the case may be, by the specified principal as provided in Section 3.4(a)(3).

Section 3.5.

Mutilated, Destroyed, Lost and Stolen Notes.

If any mutilated or defaced Note is surrendered to the Trustee, the Issuer shall execute and the Trustee shall, upon receipt of an Issuer Order, authenticate or cause to be authenticated and deliver in exchange therefor a new Note of like tenor and principal amount, having endorsed thereon the Guarantees executed by the Guarantors and bearing a number not contemporaneously outstanding.

If there shall be delivered to the Issuer and the Trustee (i) evidence to their satisfaction of the destruction, loss or theft of any Note and (ii) such security or indemnity as may be required by them to save each of them, the Guarantors and any agent of either of them harmless, then, in the absence of notice to the Issuer or the Trustee that such Note has been acquired by a bona fide purchaser, the Issuer shall execute and the Trustee shall, upon receipt of an Issuer Order, authenticate and deliver, in lieu of any such destroyed, lost or stolen Note, a new Note of like tenor and principal amount, having endorsed thereon the Guarantees executed by the Guarantors and bearing a number not contemporaneously outstanding.

In case any such mutilated, defaced, destroyed, lost or stolen Note has become or is about to become due and payable, the Issuer may in its discretion, instead of issuing a new Note, pay such Note.

Upon the issuance of any new Note under this Section, the Issuer may require the payment of a sum sufficient to cover any tax or other governmental charge that may be imposed in relation thereto and any other expenses (including the fees and expenses of the Trustee, its counsel, the Registrar and the Paying Agents) connected therewith.

Every new Note issued pursuant to this Section in lieu of any destroyed, defaced, lost or stolen Note, and the Guarantees endorsed thereon, shall constitute an original additional contractual obligation of the Issuer and the Guarantors, respectively, whether or not the destroyed, lost or stolen Note shall be at any time enforceable by anyone, and shall be entitled to all the benefits of this Indenture equally and proportionately with any and all other Notes and Guarantees, respectively duly issued hereunder.

The provisions of this Section are exclusive and shall preclude (to the extent lawful) all other rights and remedies with respect to the replacement or payment of mutilated, destroyed, lost or stolen Notes.

Section 3.6. Payment of Interest; Interest Rights Preserved.

Interest on any Note which is payable, and is punctually paid or duly provided for, on any Interest Payment Date shall be paid to the Person in whose name that Note (or one or more Predecessor Notes) is registered at the close of business on the Record Date for such interest.

Any interest on any Note which is payable, but is not punctually paid or duly provided for, on any Interest Payment Date (herein called "Defaulted Interest") shall (a) bear interest at the rate per annum stated in the form of Note included herein, (to the extent that the payment of such interest shall be legally enforceable), and (b) forthwith cease to be payable to the Holder on the

relevant Record Date by virtue of having been such Holder, and such Defaulted Interest may be paid by the Issuer, at its election in each case, as provided in clause (1) or (2) below:

(1) the Issuer may elect to make payment of any Defaulted Interest to the Persons in whose names the Notes (or their respective Predecessor Notes) are registered at the close of business on a Special Record Date for the payment of such Defaulted Interest, which shall be fixed in the following manner. The Issuer shall notify the Trustee in writing of the amount of Defaulted Interest proposed to be paid on each Note and the date of the proposed payment, and at the same time the Issuer shall deposit with the Trustee an amount of money equal to the aggregate amount proposed to be paid in respect of such Defaulted Interest or shall make arrangements satisfactory to the Trustee for such deposit prior to the date of the proposed payment, such money when deposited to be held in trust for the benefit of the Persons entitled to such Defaulted Interest as in this clause provided.

Thereupon the Trustee shall fix a Special Record Date for the payment of such Defaulted Interest which shall be not more than 15 days and not less than 10 days prior to the date of the proposed payment and not less than 10 days after the receipt by the Trustee of the notice of the proposed payment. The Trustee shall promptly notify the Issuer of such Special Record Date and, in the name and at the expense of the Issuer, shall cause notice of the proposed payment of such Defaulted Interest and the Special Record Date therefor to be mailed, first-class postage prepaid, to each Holder at his address as it appears in the Note Register, not less than 10 days prior to such Special Record Date. Notice of the proposed payment of such Defaulted Interest and the Special Record Date therefor having been so mailed, such Defaulted Interest shall be paid to the Persons in whose names the Notes (or their respective Predecessor Notes) are registered at the close of business on such Special Record Date and shall no longer be payable pursuant to the following clause (2); and

(b) the Issuer may make payment of any Defaulted Interest in any other lawful manner not inconsistent with the requirements of any securities exchange on which the Notes may be listed, and upon such notice as may be required by such exchange, if, after notice given by the Issuer to the Trustee of the proposed payment pursuant to this clause, such manner of payment shall be deemed practicable by the Trustee.

Subject to the foregoing provisions of this Section, each Note delivered under this Indenture upon registration of transfer of or in exchange for or in lieu of any other Note shall carry the rights to interest accrued and unpaid, and to accrue, which were carried by such other Note.

Section 3.7. Persons Deemed Owners.

Prior to due presentment of a Note for registration of transfer and the effective registration of such transfer by the Registrar, the Issuer, the Guarantors, the Trustee and any agent of the Issuer, the Guarantors or the Trustee may treat the Person in whose name such Note is registered as the owner of such Note for the purpose of receiving payment of principal of and premium, if any, and (subject to Section 3.6) interest on such Note and for all other purposes

whatsoever, whether or not such Note be overdue, and none of the Issuer, the Guarantors, the Trustee or any agent of the Issuer, the Guarantors or the Trustee shall be liable for so treating such Holder.

Section 3.8. Cancellation.

Except as provided for in Section 4.2 and 4.3, Notes surrendered for payment, redemption, registration of transfer or exchange shall, if surrendered to any Person other than the Trustee, be delivered to the Trustee and shall be promptly cancelled by it. The Issuer may at any time deliver to the Trustee for cancellation, accompanied by an Issuer Order, any Notes previously authenticated and delivered hereunder which the Issuer may have acquired in any manner whatsoever, and all Notes so delivered shall be promptly cancelled by the Trustee. No Notes shall be authenticated in lieu of or in exchange for any Notes cancelled as provided in this Section, except as expressly permitted by this Indenture. All cancelled Notes held by the Trustee shall be disposed of in accordance with its standard procedures or as directed by an Issuer Order; provided, however, that the Trustee shall not be required to destroy such Notes.

Section 3.9. Computation of Interest.

The amount of interest payable on the Notes for any interest period will be calculated by applying the rate of interest to the principal amount of such Note, on the basis of a year of 360 days consisting of 12 months of 30 days each and, in the case of an incomplete month, on the number of days elapsed based on a 30 day month provided, however, that Defaulted Interest shall be computed on the basis of a 365 or 366-day year, as the case may be, and the number of days actually elapsed.

Section 3.10. CUSIP Numbers.

The Issuer shall in issuing the Notes use CUSIP numbers, and the Trustee shall use the applicable CUSIP number in notices of redemption or exchange as a convenience to the Holders; provided, that any such notice may state that no representation is made as to the accuracy or correctness of the CUSIP number or numbers printed in the notice or on the certificates representing the Notes and that reliance may be placed only on the other identification numbers printed on the certificates representing the Notes. The Issuer shall promptly notify the Trustee in writing of any change in CUSIP numbers.

Section 3.11. Paying Agents; Discharge of Payment Obligations; Indemnity of Holders.

(a) The Issuer may from time to time appoint one or more paying agents under this Indenture and the Notes. By its execution and delivery of this Indenture, the Issuer hereby initially designates and appoints The Bank of New York Mellon, as Principal Paying Agent. Subject to Section 11.3, the Issuer or a Guarantor may act as paying agent.

(b) Unless the Issuer or a Guarantor shall be acting as paying agent as provided in Section 11.3, the Issuer shall, by 11:00 a.m. New York City time, no later than one Business Day prior to each Interest Payment Date, Redemption Date or Maturity Date on any Notes (whether on maturity, redemption or otherwise) (each, a "Payment Date"), deposit with the Principal Paying Agent in immediately available funds a sum sufficient to pay such principal, any

premium, and interest when so becoming due (including any Additional Amounts). The Issuer shall request that the bank through which such payment is to be made agree to supply to the Principal Paying Agent in New York City by 11:00 a.m. (New York City time) two Business Days prior to the due date for any such payment an irrevocable confirmation (by authenticated SWIFT MT 100 Message) of its intention to make such payment. The Principal Paying Agent shall arrange with all other Paying Agents for the payment, from funds furnished by the Issuer or the Guarantors to the Principal Paying Agent pursuant to this Indenture, of the principal, and premium, if any, and interest (including Additional Amounts, if any) on the Notes and of the compensation of such Paying Agents for their services as such.

All Paying Agents will hold in trust, for the benefit of Holders or the Trustee, all money held by such Paying Agent for the payment of principal, or premium if any, of or interest on the Notes and shall notify the Trustee in writing of any default by the Issuer in making any such payment. The Issuer at any time may require a Paying Agent to pay all money held by it to the Trustee and to account for any funds disbursed by it. Upon complying with this Section 3.11 and the applicable provisions of Section 11.3, the Paying Agents shall have no further liability for the money delivered to the Trustee.

(c) Any payment to be made in respect of the Notes or the Guarantees by the Issuer or the Guarantors, as the case may be, to or to the order of any Paying Agent shall be in satisfaction *pro tanto* of the obligations of the Issuer under the Notes.

(d) Each payment in full of principal, redemption amount, Additional Amounts and/or interest payable under this Indenture in respect of any Note made by or on behalf of the Issuer to or to the order of any Paying Agent in the manner specified in this Indenture on the date due shall be valid and effective to satisfy and discharge the obligation of the Issuer to make payment of principal, redemption amount, Additional Amounts and/or interest payable under this Indenture on such date, provided, however, that the liability of any Paying Agent hereunder shall not exceed any amounts paid to it by the Issuer, or held by it, on behalf of the Holders under this Indenture; and provided further that, in the event that there is a default by the Paying Agent or the Principal Paying Agent in any payment of principal, redemption amount, Additional Amounts and/or interest in respect of any Note in accordance with this Indenture, the Issuer and the Guarantors shall pay on demand such further amounts as will result in receipt by the Holder of such amounts as would have been received by it had no such default. This obligation constitutes a separate and independent obligation from the other obligations of the Issuer under the Notes and the Guarantors under the Guarantees, shall give rise to a separate and independent cause of action, will apply irrespective of any waiver granted by the Trustee and/or any Holder of Notes and shall continue in full force and effect despite any judgment, order, claim, or proof for a liquidated amount in respect of any sum due under this Indenture, the Notes or any judgment or order.

ARTICLE IV

REDEMPTION OF NOTES

Section 4.1. Redemption for Tax Reasons.

If as a result of any Change of Law (as defined below):

- (1) the Issuer or a Guarantor is or would be required on the next succeeding Interest Payment Date to pay any Additional Amounts in excess of the Additional Amounts that the Issuer or such Guarantor, as the case may be, would pay if payments in respect of the Notes were subject to deduction or withholding for Taxes imposed by the applicable taxing jurisdiction at the rate applicable on the Issue Date; or
- (2) the issuers/borrowers of certain intercompany debt are or would be required on the next succeeding interest payment date to pay Brazilian withholding taxes in excess of a general rate of 15%, or 25% in case of amounts paid to residents of countries or locations which do not impose any income tax or which impose it at a maximum rate lower than 17% or where the laws of that country or location impose restrictions on the disclosure (x) of shareholding composition; (y) of the ownership of the investment; or (z) to the identification of the beneficial owner of income attributed to non-resident persons, pursuant to article 8 of Brazilian Law No. 9,779, of January 19, 1999, and articles 24 and 24-A of Brazilian Law No. 9,430, of December 27, 1996; provided that, such requirement to pay such taxes in excess of such rate was not caused by, or otherwise the result of, whether directly or indirectly, wholly or in part, any amendment to the intercompany debt,

and in either case, the payment of such excess amounts cannot be avoided by the use of any reasonable measures available to the Issuer or a Guarantor, the Notes may be redeemed, by the Issuer at the option of the Issuer or a Guarantor, in whole but not in part, upon not less than 30 nor more than 90 days' notice to the Holders, which notice will be published, at any time following such Change of Law at a Redemption Price equal to the principal amount thereof, plus accrued and unpaid interest, if any, to the date fixed for redemption. The Issuer, any Guarantor or any of their respective Affiliates will also pay to the Holders of the Notes on the Redemption Date any Additional Amounts which are payable. Following such redemption, the Notes will be cancelled, or remain Outstanding, at the Issuer's or a Guarantor's election.

"Change of Law" means any change in or amendment to the laws or regulations of Luxembourg, Brazil or Peru (or of any political subdivision thereof or therein) or the adoption, amendment or modification of any resolution of the Central Bank of Luxembourg, the Central Bank of Brazil or the Central Reserve Bank of Peru (or any successor authority thereto) which becomes effective on or after the date of this Indenture (or with respect to a successor, on or after the date such successor assumes the obligations under the Notes), resulting in the Issuer or a Guarantor on a consolidated basis being required to pay amounts with respect to Taxes as described above in a total aggregate amount in excess of that payable immediately prior to such change or amendment.

Prior to the delivery of any notice of redemption in accordance with the foregoing, the Issuer or a Guarantor shall deliver to the Trustee and the Agents an Officer's Certificate stating that the Issuer or a Guarantor, as the case may be, is entitled to effect such redemption based on an Opinion of Counsel or written advice of a qualified tax expert, that the Issuer or a Guarantor has or will become obligated to pay such excess amounts with respect to Taxes as a result of such Change of Law. Such notice, once delivered by the Issuer or a Guarantor to the Trustee, will be irrevocable.

If the Issuer or a Guarantor becomes subject at any time to any taxing jurisdiction other than Luxembourg, Brazil or Peru, references herein to Luxembourg, Brazil or Peru, as applicable, shall be construed to include such other jurisdiction.

Section 4.2. Optional Redemption.

At any time before January 8, 2037 (which is the date that is three months prior to maturity of the notes (the "Par Call Date")), the Issuer or a Guarantor has the right to redeem the Notes, in whole or in part and from time to time, at a Redemption Price equal to the greater of (1) 100% of the principal amount of the Notes being redeemed and (2) the sum of the present values of the remaining scheduled payments of principal and interest on the Notes being redeemed that would be due if the Notes matured on the Par Call Date (inclusive of interest accrued to the redemption date), discounted to the Redemption Date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Treasury Rate plus 40 basis points, less interest accrued to, but excluding, the Redemption Date; plus, in either case, accrued and unpaid interest on the principal amount of the Notes being redeemed and Additional Amounts, if any, to, but excluding, the Redemption Date (subject to the right of Holders of record on the relevant Record Date to receive interest due on the relevant Interest Payment Date).

At any time on or after the Par Call Date, the Issuer or a Guarantor has the right to redeem the Notes, in whole or in part and from time to time, at a Redemption Price equal to 100% of the principal amount of the Notes being redeemed plus accrued and unpaid interest on the principal amount of the Notes being redeemed to, but excluding, such Redemption Date (subject to the right of Holders of record on the relevant Record Date to receive interest due on the relevant Interest Payment Date).

The "Treasury Rate" shall be determined by the Issuer or a Guarantor after 4:15 p.m., New York City time (or after such time as yields on U.S. government securities are posted daily by the Board of Governors of the Federal Reserve System), on the third Business Day preceding the Redemption Date based upon the yield or yields for the most recent day that appear after such time on such day in the most recent statistical release published by the Board of Governors of the Federal Reserve System designated as "Selected Interest Rates (Daily) - H.15" (or any successor designation or publication) ("H.15") under the caption "U.S. government securities-Treasury constant maturities-Nominal" (or any successor caption or heading). In determining the Treasury Rate, the Issuer or a Guarantor shall select, as applicable: (i) the yield for the Treasury constant maturity on H.15 exactly equal to the period from the redemption date to the Par Call Date (the "Remaining Life"); or (ii) if there is no such Treasury constant maturity on H.15 exactly equal to the Remaining Life, the two yields - one yield corresponding to the Treasury constant maturity on H.15 immediately shorter than and one yield corresponding to the Treasury

constant maturity on H.15 immediately longer than the Remaining Life - and shall interpolate to the Par Call Date on a straight-line basis (using the actual number of days) using such yields and rounding the result to three decimal places; or (iii) if there is no such Treasury constant maturity on H.15 shorter than or longer than the Remaining Life, the yield for the single Treasury constant maturity on H.15 closest to the Remaining Life. For purposes of this paragraph, the applicable Treasury constant maturity or maturities on H.15 shall be deemed to have a maturity date equal to the relevant number of months or years, as applicable, of such Treasury constant maturity from the Redemption Date.

If on the third Business Day preceding the Redemption Date H.15 or any successor designation or publication is no longer published, the Issuer or a Guarantor shall calculate the Treasury Rate based on the rate per annum equal to the semi-annual equivalent yield to maturity at 11:00 a.m., New York City time, on the second Business Day preceding such redemption date of the United States Treasury security maturing on, or with a maturity that is closest to, the Par Call Date, as applicable. If there is no United States Treasury security maturing on the Par Call Date but there are two or more United States Treasury securities with a maturity date equally distant from the Par Call Date, one with a maturity date preceding the Par Call Date and one with a maturity date following the Par Call Date, the Issuer or a Guarantor shall select the United States Treasury security with a maturity date preceding the Par Call Date. If there are two or more United States Treasury securities maturing on the Par Call Date or two or more United States Treasury securities meeting the criteria of the preceding sentence, the Issuer or the Guarantor shall select from among these two or more United States Treasury securities the United States Treasury security that is trading closest to par based upon the average of the bid and asked prices for such United States Treasury securities at 11:00 a.m., New York City time. In determining the Treasury Rate in accordance with the terms of this paragraph, the semi-annual yield to maturity of the applicable United States Treasury security shall be based upon the average of the bid and asked prices (expressed as a percentage of principal amount) at 11:00 a.m., New York City time, of such United States Treasury security, and rounded to three decimal places.

The Issuer or a Guarantor's actions and determinations in determining the Redemption Price shall be conclusive and binding for all purposes, absent manifest error.

The Issuer, any Guarantor or any of their respective Affiliates may at any time repurchase the Notes at any price in the open market or otherwise. The Issuer, any Guarantor or any of their respective Affiliates may hold or resell the Notes it purchases or may surrender them to the Trustee or an Agent for cancellation.

Optional Clean-up Redemption. Notwithstanding the foregoing, in connection with any tender offer for the notes (including an Offer to Purchase in connection with a Change of Control that results in a Rating Decline made in accordance with the terms of the Indenture), in the event that the Holders of not less than 85% of the aggregate principal amount of the outstanding Notes validly tender and do not validly withdraw Notes in such tender offer and the Issuer, or any other Person making such offer in lieu of the Issuer, purchases all of the Notes validly tendered and not validly withdrawn by such Holders, then the Issuer or the Guarantor will have the right, on not less than 10 nor more than 60 days' prior notice to the Holders (with a copy to the Trustee), to redeem all of the Notes that remain outstanding at a Redemption Price equal to the purchase

price paid to each other Holder in such tender offer plus, to the extent not included in the purchase price, accrued and unpaid interest and Additional Amounts, if any, on the Notes that remain outstanding, to, but excluding, the Redemption Date.

Section 4.3. Applicability of Article.

Redemption of Notes at the election of the Issuer, as permitted or required by any provision of this Indenture, shall be made in accordance with such provision and this Article.

Section 4.4. Election to Redeem; Notice to Trustee, Registrar and Paying Agent.

In the case of any redemption of Notes prior to the expiration of any restriction on such redemption provided in the terms of such Notes or elsewhere in this Indenture, the Issuer shall furnish the Trustee with an Officer's Certificate evidencing compliance with such restriction.

The Issuer shall provide notice of redemption to the Trustee, Registrar and Paying Agents at least 15 days (or such shorter period as agreed to by the Trustee) prior to when such notice of redemption shall be provided to the Holders.

Section 4.5. Notice of Redemption.

Notice of redemption pursuant to Section 4.1 and 4.2 hereof shall be given in the manner provided for in Section 1.6 hereof. The Trustee, Registrar and Paying Agent will notify the Holders at such Holder's address appearing in the Note register at least 10 but not more than 60 days prior to the Redemption Date. A notice of any redemption may, at the Issuer's or a Guarantor's discretion, be subject to one or more conditions precedent.

All notices of redemption shall state:

- (1) the Redemption Date;
- (2) the Redemption Price;
- (3) that on the Redemption Date, the Redemption Price will become due and payable upon each such Note to be redeemed and that interest thereon will cease to accrue on and after said date;
- (4) the place or places where such Notes are to be surrendered for payment of the Redemption Price;
- (5) the aggregate principal amount of Notes being redeemed;
- (6) the CUSIP number or numbers of the Notes being redeemed;
- (7) if fewer than all the outstanding Notes are to be redeemed, or if a Note is to be redeemed in part only, the identification and principal amounts at maturity of the particular Notes (or portion thereof) to be redeemed; and

(8) that no representation is made as to the correctness or accuracy of the CUSIP numbers, if any, listed in such notice or printed on the Notes.

Section 4.6. Deposit of Redemption Price.

By 11:00 a.m. (New York City time) on the Business Day prior to any Redemption Date, the Issuer or a Guarantor shall deposit with the Principal Paying Agent (or, if the Issuer is acting as its own Paying Agent, segregate and hold in trust as provided in Section 11.3) an amount of money sufficient to pay the Redemption Price on all of the Notes which are to be repurchased on that date. In the case of a partial redemption of Notes that are represented by a Global Note, the relevant Notes will be redeemed in accordance with the rules of DTC.

Section 4.7. Notes Payable on Redemption Date.

Notice of redemption having been given as aforesaid, the Notes so to be redeemed shall, on the Redemption Date, become due and payable at the Redemption Price therein specified, and from and after such date (unless the Issuer shall default in the payment of the Redemption Price and accrued and unpaid interest) such Notes shall cease to bear interest. Upon surrender of any such Note for redemption in accordance with said notice, such Note shall be paid by the Issuer at the Redemption Price, together with accrued and unpaid interest to the Redemption Date; provided, however, that installments of interest whose Maturity Date is on or prior to the Redemption Date shall be payable to the Holders of such Notes, or one or more Predecessor Notes, registered as such at the close of business on the relevant Record Dates according to their terms and the provisions of Section 3.7.

If any Note called for redemption shall not be so paid upon surrender thereof for redemption, the principal (and premium, if any) shall, until paid, bear interest from the Redemption Date at the rate provided by the Note.

ARTICLE V

SATISFACTION AND DISCHARGE

Section 5.1. Satisfaction and Discharge of Indenture.

This Indenture shall cease to be of further effect as to all Outstanding Notes, and the Trustee, on demand of and at the expense of the Issuer, shall execute proper instruments acknowledging satisfaction and discharge of this Indenture, when

(1) (A) all Outstanding Notes (except lost, stolen or destroyed Notes which have been replaced or paid) have been delivered to the Trustee for cancellation; or

(B) all Outstanding Notes that have not been delivered to the Trustee for cancellation (i) have become due and payable, (ii) will become due and payable at their Stated Maturity within one year, or (iii) are to be called for redemption within one year under arrangements satisfactory to the Trustee for the giving of notice of a redemption by the Issuer or a Guarantor; and, in each case, the Issuer or a Guarantor irrevocably deposits or causes to be deposited with the Trustee or its designee as funds in

trust solely for the benefit of the Holders, cash, Cash Equivalents or U.S. Government Obligations in an amount as will be sufficient without consideration of any reinvestment of interest, to pay and discharge all principal, premium and Additional Amounts, if any, and accrued and unpaid interest to the date of maturity or redemption on the Notes not delivered to the Trustee for cancellation and delivers irrevocable Instructions to the Trustee to apply the deposited money toward the payment of the Notes at maturity or the redemption date, as the case may be;

(2) the Issuer or a Guarantor has paid or caused to be paid all other sums payable hereunder;

(3) the Issuer or a Guarantor has delivered to the Trustee an Officer's Certificate and an Opinion of Counsel, each stating that all conditions precedent herein provided for relating to the satisfaction and discharge of this Indenture have been complied with; and

(4) the Trustee shall have received such other documents and assurances as the Trustee shall have reasonably requested.

Notwithstanding the satisfaction and discharge of this Indenture, (i) the obligations of the Issuer to the Trustee under Section 7.7 hereof, (ii) substitution of apparently mutilated, defaced, destroyed, lost or stolen Notes, (iii) rights of Holders of Notes to receive payment of principal of and premium, if any, and interest (including Additional Amounts, if any) on the Notes, (iv) rights, obligations and immunities of the Trustee under this Indenture (including, if money shall have been deposited with the Trustee pursuant to subclause (B) of clause (1) of this Section, the obligations of the Trustee under Section 5.2 hereof and the last paragraph of Section 11.3 hereof), and (v) rights of Holders of the Notes as beneficiaries of this Indenture with respect to any property deposited with the Trustee payable to all or any of them, shall survive.

Section 5.2. Application of Trust Money.

Subject to the provisions of the last paragraph of Section 11.3, all money deposited with the Trustee pursuant to Section 5.1 hereof shall be held in trust and applied by it, in accordance with the provisions of the Notes and this Indenture, to the payment, either directly or through any Paying Agent (including the Issuer or a Guarantor acting as its own Paying Agent) as the Trustee may determine, to the Persons entitled thereto, of the principal (and premium, if any) and interest for whose payment such money has been deposited with the Trustee.

ARTICLE VI

REMEDIES

Section 6.1. Events of Default.

"Event of Default," wherever used herein, means any one of the following events (whatever the reason for such Event of Default and whether it shall be voluntary or involuntary or be effected by operation of law or pursuant to any judgment, decree or order of any court or any order, rule or regulation of any administrative or governmental body):

- (1) failure to pay any amount of principal of (or premium, if any) any Note when due and such failure shall continue for a period of three days;
- (2) failure to pay any interest, including Additional Amounts, if any, on any Note when due and such failure shall continue for a period of 30 days;
- (3) failure to perform any covenant or agreement of the Issuer or any Guarantor under this Indenture or the Notes and such failure remains unremedied for 60 days after the Trustee has given written notice thereof to the Issuer or any Guarantor;
- (4) failure to pay when due or, as the case may be, within any originally applicable grace period, any amount of principal and premium, if any, or interest (including Additional Amounts, if any), due under the terms of any instrument evidencing Indebtedness of the Issuer or any of its Designated Subsidiaries, or any such Indebtedness of the Issuer or any of its Designated Subsidiaries that becomes due and payable prior to its stated maturity otherwise than at the option of the issuer thereof by reason of the occurrence of an event of default howsoever described; provided that the aggregate amount of any such Indebtedness equals with respect to such Person, on a consolidated basis U.S.\$125.0 million or more (or its equivalent in other currency or currencies);
- (5) the rendering of a final judgment (not subject to appeal) for the payment of money against the Issuer or any of its Designated Subsidiaries which remains undischarged, unbonded or unstayed (and otherwise not covered by enforceable insurance policies issued by reputable and creditworthy insurance companies) for a period of 60 consecutive days after the date on which the right to appeal all such judgments has expired or, if later, the date therein specified for payment; provided that the aggregate amount of any such final judgment equals or exceeds with respect to such Person, on a consolidated basis U.S.\$125.0 million (or its equivalent in other currency or currencies);
- (6) all or substantially all of the assets of the Issuer (on a consolidated basis) shall be condemned, seized or otherwise appropriated, or custody of such property shall be assumed by any governmental authority or court or other person purporting to act under the authority of the federal government of any jurisdiction, or the Issuer shall be prevented from exercising normal control over all or substantially all of its property or revenues (on a consolidated basis), if the whole or part of such property or revenues is material to the Issuer (on a consolidated basis);
- (7) (a) a secured party takes possession of all or substantially all the assets or revenues of the Issuer (on a consolidated basis) or (b) a receiver or similar officer is appointed, of all or substantially all the assets or revenues of the Issuer (on a consolidated basis);
- (8) the Issuer or any Guarantor pursuant to or under or within the meaning of any Bankruptcy Law (a) commences a voluntary case or proceeding; (b) consents to the making of a Bankruptcy Order in an involuntary case or proceeding or the

commencement of any case against it; (c) consents to the appointment of a custodian of it or for substantially all its property; (d) makes a general assignment for the benefit of its creditors; (e) files an answer or consent seeking reorganization or relief; (f) shall admit in writing its inability to pay its debts generally; or (g) consents to the filing of a petition in bankruptcy;

(9) a court of competent jurisdiction in any involuntary case or proceeding enters a Bankruptcy Order against the Issuer or any Guarantor, and such Bankruptcy Order remains unstayed and in effect for 60 consecutive days; and

(10) any of the Guarantees is not (or is claimed by any Guarantor not to be) in full force and effect.

If any Event of Default shall occur and be continuing, either (i) the Trustee or (ii) the Holders, with written notice to the Trustee, of at least 25% in aggregate principal amount of the Outstanding Notes may accelerate the maturity of all Notes; provided that, after such acceleration, but before a judgment or decree based on acceleration, the Holders of a majority in aggregate principal amount of Outstanding Notes may, as provided in Section 6.12, rescind and annul such acceleration if all Events of Default, other than the nonpayment of accelerated principal, have been cured or waived as provided in this Indenture. The Trustee shall not be deemed to have notice of any Default or Event of Default (other than a payment default) unless a Responsible Officer of the Trustee has actual knowledge thereof or unless written notice of any event which is in fact such a default is received by a Responsible Officer of the Trustee at the Corporate Trust Office of the Trustee, and such notice references the Notes and this Indenture. If an Event of Default specified in clause (8) above occurs with respect to the Issuer, the Outstanding Notes will ipso facto become immediately due and payable without any declaration or other act on the part of the Trustee or any Holder.

Section 6.2. Collection of Indebtedness and Suits for Enforcement by Trustee. The Issuer and the Guarantors covenant that if

(1) default is made in the payment of any interest on any Note, (including Additional Amounts, if any), when such amounts become due and payable and such default continues for a period of 30 days; or

(2) default is made in the payment of the principal of (or premium, if any, on) any Note at the Maturity thereof or, with respect to any Note to be redeemed, at the Redemption Date thereof,

the Issuer and the Guarantors (subject to the limitations provided in this Indenture) will, jointly and severally, upon demand of the Trustee, pay to it, for the benefit of the Holders of such Notes, the whole amount then due and payable on such Notes for principal (and premium, if any) and interest (including Additional Amounts, if any), and, to the extent that payment of interest on overdue amounts shall be legally enforceable, interest on any overdue principal (and premium, if any) and on any overdue interest, at the rate provided by the Notes, and, in addition thereto, such further amount as shall be sufficient to cover the costs and expenses incurred by the Trustee

under this Indenture, including the reasonable compensation, expenses, disbursements and advances of the Trustee, its agents and counsel.

If the Issuer and the Guarantors fail to pay such amounts forthwith upon such demand, the Trustee, in its own name and as trustee of an express trust, may institute a judicial proceeding for the collection of the sums so due and unpaid, may prosecute such proceeding to judgment or final decree, and may enforce the same against the Issuer, the Guarantors or any other obligor upon the Notes and collect the moneys adjudged or decreed to be payable in the manner provided by law out of the property of the Issuer, the Guarantors or any other obligor upon the Notes, wherever situated.

If an Event of Default occurs and is continuing, the Trustee may in its discretion proceed to protect and enforce its rights and the rights under this Indenture of the Holders by such appropriate judicial proceedings as the Trustee shall deem most effective to protect and enforce any such rights, whether for the specific enforcement of any covenant or agreement in this Indenture or in aid of the exercise of any power granted herein including, without limitation, seeking recourse against the Issuer or the Guarantors or proceeding to enforce any other proper remedy.

Section 6.3. Trustee May File Proofs of Claim.

The Trustee may file such proofs of claim and other papers or documents as may be necessary or advisable in order to have the claims of the Trustee and the Holders allowed in any judicial proceedings relative to the Issuer, the Guarantors, their respective creditors or its property and, unless prohibited by law or applicable regulations, may vote on behalf of the Holders at their direction in any election of a trustee in bankruptcy or other Person performing similar functions, and any custodian in any such judicial proceeding is hereby authorized by each Holder to make payments to the Trustee and, in the event that the Trustee shall consent to the making of such payments directly to the Holders, to pay to the Trustee any amount due it for the reasonable compensation, expenses, disbursements and advances of the Trustee, its agents and its counsel, and any other amounts due the Trustee under Section 7.7.

Section 6.4. Trustee May Enforce Claims Without Possession of Notes.

All rights of action and claims under this Indenture or the Notes may be prosecuted and enforced by the Trustee without the possession of any of the Notes or the production thereof in any proceeding relating thereto, and any such proceeding instituted by the Trustee shall be brought in its own name as trustee of an express trust, and any recovery of judgment shall, after provision for the payment of the reasonable compensation, expenses, disbursements and advances of the Trustee, its agents and counsel, be for the ratable benefit of the Holders of the Notes in respect of which such judgment has been recovered.

Section 6.5. Application of Money Collected.

Any money collected by the Trustee pursuant to this Article shall be applied in the following order, at the date or dates fixed by the Trustee and, in case of the distribution of such money on account of principal (or premium, if any) or interest, upon presentation of the Notes

and the notation thereon of the payment if only partially paid and upon surrender thereof if fully paid;

FIRST: To the payment of all amounts due to the Trustee and the Agents under this Indenture; and

SECOND: To the payment of the amounts then due and unpaid for principal of (and premium, if any) and interest on the Notes in respect of which or for the benefit of which such money has been collected, ratably, without preference or priority of any kind, according to the amounts due and payable on such Notes for principal (and premium, if any) and interest, respectively.

The Trustee, upon prior written notice to the Issuer, may fix a Record Date and payment date for any payment to the Holders pursuant to this Section 6.5.

Section 6.6. Limitation on Suits.

No Holder of any Note shall have any right to institute any proceeding, judicial or otherwise, with respect to this Indenture, or for the appointment of a receiver or trustee, or for any other remedy hereunder, unless:

(1) such Holder shall have previously given written notice to the Trustee of a continuing Event of Default;

(2) the Holders of at least 25% in aggregate principal amount of the Outstanding Notes shall have made written request to the Trustee to institute proceedings in respect of such Event of Default in its own name as Trustee hereunder and shall have offered to the Trustee indemnity and/or security reasonably satisfactory to the Trustee against the costs, expenses and liabilities to be incurred in compliance with such request;

(3) the Trustee for 60 days after its receipt of such notice, request and offer shall have failed to institute any such proceeding; and

(4) no direction inconsistent with such written request shall have been given to the Trustee during such 60-day period by the Holders of a majority in principal amount of the Outstanding Notes;

it being understood and intended that no one or more Holders shall have any right in any manner whatever by virtue of, or by availing of, any provision of this Indenture or any Note or the Guarantees to affect, disturb or prejudice the rights of any other Holders, or to obtain or to seek to obtain priority or preference over any other Holders or to enforce any right under this Indenture (it being understood that the Trustee does not have an affirmative duty to ascertain whether or not such actions or forbearances are unduly prejudicial to such Holders), any Note or the Guarantees, except in the manner herein provided and for the equal and ratable benefit of all the Holders.

Section 6.7.

Unconditional Right of Holders to Receive Principal, Premium and Interest.

Notwithstanding any other provision in this Indenture, the Notes or the Guarantees, the Holder of any Note shall have the right, which is absolute and unconditional, to receive payment of the principal of (and premium, if any) and (subject to Section 3.6) interest on such Note on the respective Stated Maturities expressed in such Note (or earlier Redemption Date) and to institute suit for the enforcement of any such payment, and such rights shall not be impaired without the consent of such Holder.

Section 6.8. Restoration of Rights and Remedies.

If the Trustee or any Holder has instituted any proceeding to enforce any right or remedy under this Indenture, any Note or the Guarantees, and such proceeding has been discontinued or abandoned for any reason, or has been determined adversely to the Trustee or to such Holder, then and in every such case, subject to any determination in such proceeding, the Issuer, the Guarantor, the Trustee and the Holders shall be restored severally and respectively to their former positions hereunder and thereafter all rights and remedies of the Trustee and the Holders shall continue as though no such proceeding had been instituted.

Section 6.9. Rights and Remedies Cumulative.

Except as otherwise provided with respect to the replacement or payment of mutilated, destroyed, lost or stolen Notes in the last paragraph of Section 3.5 hereof, no right or remedy herein conferred upon or reserved to the Trustee or to the Holders is intended to be exclusive of any other right or remedy, and every right and remedy shall, to the extent permitted by law, be cumulative and in addition to every other right and remedy given hereunder or now or hereafter existing at law or in equity or otherwise. The assertion or employment of any right or remedy hereunder, or otherwise, shall not prevent the concurrent assertion or employment of any other appropriate right or remedy.

Section 6.10. Delay or Omission Not Waiver.

No delay or omission of the Trustee or of any Holder of any Note to exercise any right or remedy accruing upon any Event of Default shall impair any such right or remedy or constitute a waiver of any such Event of Default or an acquiescence therein. Every right and remedy given by this Article or by law to the Trustee or to the Holders may be exercised from time to time, and as often as may be deemed expedient, by the Trustee or by the Holders, as the case may be.

Section 6.11. Control by Holders.

The Holders of a majority of the aggregate principal amount of the Outstanding Notes shall have the right to direct the time, method and place of conducting any proceeding for any remedy available to the Trustee or exercising any trust or power conferred on the Trustee, provided that:

(1) such direction shall not be in conflict with any rule of law or with this Indenture or expose the Trustee to personal liability (as determined in the sole discretion of the Trustee); and

(2) the Trustee may take any other action deemed proper by the Trustee which is not inconsistent with such direction.

The Trustee may refuse, however, to follow any direction that the Trustee, in its sole discretion, determines may be unduly prejudicial to the rights of the Holders or that may subject the Trustee to any liability, loss or expense if the Trustee determines, in its sole discretion, that it lacks satisfactory indemnification and/or security against such liability, loss or expense.

Section 6.12. Waiver of Past Defaults.

The Holders of not less than a majority in aggregate principal amount of the Outstanding Notes may by written notice to the Issuer and the Trustee waive any past default hereunder and rescind and annul any declaration of acceleration and its consequences, except a default:

(1) in the payment of the principal of (or premium, if any) or interest on any Note; or

(2) in respect of a covenant or provision hereof which under Article X cannot be modified or amended without the consent of the Holder of each Outstanding Note affected.

Upon any such waiver, such default shall cease to exist, and any Event of Default arising therefrom shall be deemed to have been cured, for every purpose of this Indenture; but no such waiver shall extend to any subsequent or other default or impair any right consequent thereon.

Section 6.13. Undertaking for Costs.

In any suit for the enforcement of any right or remedy under this Indenture or in any suit against the Trustee for any action taken or omitted by it as a Trustee, a court in its discretion may require the filing by any party litigant in the suit of an undertaking to pay the costs of the suit, and the court in its discretion may assess reasonable costs, including reasonable attorney's fees and expenses, against any party litigant in the suit, having due regard to the merits and good faith of the claims or defenses made by the party litigant. This Section 6.13 does not apply to a suit by the Trustee, a suit by a Holder pursuant to Section 6.7 hereof, or a suit by Holders of more than 10% in principal amount of the then Outstanding Notes.

ARTICLE VII

THE TRUSTEE

Section 7.1. Certain Duties and Responsibilities.

(a) Except during the continuance of an Event of Default,

(1) the Trustee undertakes to perform solely such duties and only such duties as are specifically set forth in this Indenture, and Trustee shall not be liable except for the performance of such duties; and no implied covenants or obligations shall be read into this Indenture against the Trustee; and

(2) in the absence of gross negligence on its part, the Trustee may conclusively rely, as to the truth of the statements and the correctness of the opinions expressed therein, upon certificates or opinions furnished to the Trustee and conforming to the requirements of this Indenture; but in the case of any such certificates or opinions which by any provision hereof are specifically required to be furnished to the Trustee, the Trustee shall be under a duty to examine the same to determine whether or not they conform to the form requirements of this Indenture (but need not confirm or investigate the accuracy of mathematical calculations or other facts stated therein).

(b) In case an Event of Default has occurred and is continuing, the Trustee shall exercise such of the rights and powers vested in it by this Indenture, and use the same degree of care and skill in their exercise, as a prudent person would exercise or use under the circumstances in the conduct of such person's own affairs.

(c) No provision of this Indenture shall be construed to relieve the Trustee from liability for its own grossly negligent action or its own willful misconduct, *except* that:

(1) this Subsection shall not be construed to limit the effect of Subsection (a) of this Section;

(2) the Trustee shall not be liable for any error of judgment made in good faith by a Responsible Officer or Officers of the Trustee, unless it shall be proved that the Trustee was grossly negligent in ascertaining the pertinent facts;

(3) the Trustee shall not be liable with respect to any action taken or omitted to be taken by it in good faith in accordance with the direction of the Holders of a majority in principal amount of the Outstanding Note of any series, determined as provided in Section 6.2, relating to the time, method and place of conducting any proceeding for any remedy available to the Trustee, or exercising any trust or power conferred upon the Trustee, under this Indenture with respect to the Note;

(4) no provision of this Indenture shall require the Trustee to expend or risk its own funds or otherwise incur any financial liability in the performance of any of its duties hereunder, or in the exercise of any of its rights or powers, if it shall have reasonable grounds for believing that repayment of such funds or adequate indemnity and/or security against such risk or liability is not reasonably assured to it;

(5) the Trustee shall not be liable in respect of any payment (as to the correctness of amount, entitlement to receive or any other matters relating to payment) or notice effected by the Issuer or any Paying Agent or any records maintained by any co-Note Registrar with respect to the Notes;

(6) if any party fails to deliver a notice relating to an event the fact of which, pursuant to this Indenture, requires notice to be sent to the Trustee, the Trustee may conclusively rely on its failure to receive such notice as reason to act as if no such event occurred, unless a Responsible Officer of the Trustee had actual knowledge of such event;

(7) the delivery of any information to the Trustee under this Indenture, including but not limited to any Rule 144A information, or reports to the Trustee is for informational purposes only and the receipt of such information or reports by the Trustee shall not constitute constructive notice of any information contained therein;

(8) in the absence of written investment direction from the Issuer, all cash received by the Trustee shall be placed in a non-interest bearing trust account, and in no event shall the Trustee be liable for the selection of investments or for investment losses incurred thereon or for losses incurred as a result of the liquidation of any such investment prior to its maturity date or the failure of the party directing such investments prior to its maturity date or the failure of the party directing such investment to provide timely written investment direction, and the Trustee shall have no obligation to invest or reinvest any amounts held hereunder in the absence of such written investment direction from the Issuer;

(9) in the event that the Trustee is also acting as custodian, Registrar, Paying Agent, exchange agent, bid solicitation agent or transfer agent hereunder, the rights and protections afforded to the Trustee pursuant to this Article VII shall also be afforded to such custodian, Registrar, Paying Agent, exchange agent, bid solicitation agent or transfer agent;

(10) any application by the Trustee for written instructions from the Issuer (other than with regard to any action proposed to be taken or omitted to be taken by the Trustee that affects the rights of the Holders of the Notes under this Indenture) may, at the option of the Trustee, set forth in writing any action proposed to be taken or omitted by the Trustee under this Indenture and the date on and/or after which such action shall be taken or such omission shall be effective. The Trustee shall not be liable to the Issuer for any action taken by, or omission of, the Trustee in accordance with a proposal included in such application on or after the date specified in such application (which date shall not be less than three Business Days after the date any officer that the Issuer has indicated to the Trustee should receive such application actually receives such application, unless any such officer shall have consented in writing to any earlier date), unless, prior to taking any such action (or the effective date in the case of any omission), the Trustee shall have received written instructions in accordance with this Indenture in response to such application specifying the action to be taken or omitted.

(d) Whether or not therein expressly so provided, every provision of this Indenture relating to the conduct or affecting the liability of or affording protection to the Trustee shall be subject to the provisions of this Section.

Section 7.2.

Notice of Defaults.

The Trustee shall give the Holders notice of any Default ("Notice of Default") that has occurred and is continuing and of which a Responsible Officer of the Trustee has actual knowledge, within 90 days after the occurrence of such Default (but not less than 15 days after knowledge thereof). The Trustee may withhold from Holders notice of any continuing Default or Event of Default (except a Default or Event of Default relating to the payment of principal, premium, if any, or interest on, the Notes) if it determines that withholding such notice is in their interest; provided that, in the case of a default of a character specified in Section 6.1(4), no such notice to Holders shall be given until at least 30 days after the occurrence thereof.

Section 7.3. Certain Rights of Trustee and the Agents.

Subject to the provisions of Section 7.1:

(a) the Trustee and the Agents may rely conclusively and shall be protected in acting or refraining from acting upon any resolution, certificate, statement, instrument, opinion, report, notice, request, direction, consent, order, bond, debenture, note, other evidence of indebtedness or other paper or document believed by it to be genuine and to have been signed or presented by the proper party or parties;

(b) any request or direction of the Issuer mentioned herein shall be sufficiently evidenced by an Issuer Request or an Issuer Order and any resolution of the Board of Directors of the Issuer may be sufficiently evidenced by a Board Resolution;

(c) whenever in the administration of this Indenture the Trustee or an Agent shall deem it desirable that a matter be proved or established prior to taking, suffering or omitting any action hereunder, the Trustee or such Agent, as the case may be, (unless other evidence be herein specifically prescribed) may, in the absence of gross negligence on its part, rely upon an Officer's Certificate or an Opinion of Counsel;

(d) the Trustee or the Agents may consult with counsel of its selection, at the expense of the Issuer, and the advice of such counsel or any Opinion of Counsel shall be full and complete authorization and protection in respect of any action taken, suffered or omitted by it hereunder in good faith and in reliance thereon;

(e) the Trustee and each Agent shall be under no obligation to exercise any of the rights or powers vested in it by this Indenture at the request or direction of any of the Holders pursuant to this Indenture, unless such Holders shall have offered to the Trustee or such Agent, as applicable, security and/or indemnity satisfactory to it against the costs, expenses and liabilities which might be incurred by it in compliance with such request or direction satisfactory to the Trustee or such Agent, as applicable;

(f) neither the Trustee nor any Agent shall be bound to make any investigation into the facts or matters stated in any resolution, certificate, statement, instrument, report, opinion, notice, request, direction, consent, order, bond, debenture, note, other evidence of indebtedness or other paper or document, but the Trustee and each Agent, in its discretion, may make such further inquiry or investigation into such facts or matters as it may see fit, and, if the Trustee or

an Agent shall determine to make such further inquiry or investigation, it shall be entitled to examine the books, records and premises of the Issuer and the Guarantor, personally or by agent or attorney at the sole cost of the Issuer and shall incur no liability or additional liability of any kind by reason of such inquiry or investigation;

(g) the Trustee and each Agent may execute any of the trusts or powers hereunder or perform any duties hereunder either directly or by or through agents or attorneys and the Trustee and each Agent shall not be responsible for any misconduct or negligence on the part, or for the supervision of, any agent or attorney appointed with due care by it hereunder;

(h) neither the Trustee nor any Agent shall be liable for any action taken, suffered or omitted by it in good faith which the Trustee or such Agent, as applicable, believed to have been authorized or within its rights or powers;

(i) neither the Trustee nor any Agent shall be charged with knowledge of any default or Event of Default with respect to the Notes, unless either (1) a Responsible Officer shall have actual knowledge of such default or Event of Default, or (2) written notice of such default or Event of Default shall have been received by a Responsible Officer of the Trustee by the Issuer, the Guarantor or by any Holder of the Notes;

(j) in no event shall the Trustee or any Agent be responsible or liable for special, indirect, punitive or consequential loss or damage of any kind whatsoever (including, but not limited to, loss of profit) irrespective of whether the Trustee or such Agent has been advised of the likelihood of such loss or damage and regardless of the form of action;

(k) the rights, privileges, protections, immunities and benefits given to the Trustee and the Agents, including, without limitation, its right to be indemnified, are extended to, and shall be enforceable by, the Trustee and the Agents in each of their capacities hereunder, and each agent, custodian and other Person employed to act hereunder;

(l) neither the Trustee nor the Agents shall be required to give any bond or surety in respect of the performance of its powers and duties hereunder;

(m) the Trustee and the Agents may request that the Issuer deliver a certificate setting forth the names of individuals and/or titles of officers authorized at such time to take specified actions pursuant to this Indenture; and

(n) the permissive rights of the Trustee enumerated herein shall not be construed as duties.

Section 7.4. Not Responsible for Recitals or Issuance of Notes.

The recitals contained herein, in the Notes and in the Guarantees endorsed thereon, except the Trustee's certificates of authentication, shall be taken as the statements of the Issuer or the Guarantors, as the case may be, and the Trustee assumes no responsibility for their correctness. The Trustee makes no representations as to the validity or sufficiency of this Indenture or the Notes. The Trustee shall not be accountable for the use or application by the Issuer of Notes or the proceeds thereof.

Section 7.5.

May Hold Notes.

The Trustee, any Paying Agent or Transfer Agent, any Registrar (if other than the Trustee) or any other agent of the Issuer or the Guarantors, in its individual or any other capacity, may become the owner or pledgee of Notes and, subject to Section 7.8 and 7.12, may otherwise deal with the Issuer and the Guarantors with the same rights it would have if it were not Trustee, Paying Agent, Transfer Agent, Registrar or such other agent.

Section 7.6. Money Held in Trust.

All moneys received by the Trustee or any Paying Agent shall, until used or applied as herein provided, be held in trust for the purposes for which they were received, and need not be segregated from other funds of the Trustee or Paying Agent, except as otherwise required by law. Neither the Trustee nor any Paying Agent shall be under any liability for interest on any moneys received by it hereunder except such as it may agree in writing with the Issuer to pay thereon.

Section 7.7. Compensation and Reimbursement.

The Issuer and the Guarantors agree:

(1) to, jointly and severally, pay to the Trustee and the Agents from time to time upon demand such compensation for all services rendered by it hereunder as shall be agreed upon in writing (which compensation shall not be limited by any provision of law in regard to the compensation of a trustee of an express trust), as such fees may be adjusted from time to time;

(2) except as otherwise expressly provided herein, to, jointly and severally, reimburse each of the Trustee and the Agents upon its request for all reasonable expenses and disbursements incurred or made by it in accordance with any provision of this Indenture (including the reasonable compensation and the expenses and disbursements of their agents and counsel), except any such expense, disbursement or advance as may be attributable to its gross negligence or willful misconduct; and

(3) to, jointly and severally, indemnify each the Trustee and the Agents for, and to hold each harmless against, any loss, liability, cost, damage, claim or expense (including taxes, other than taxes based on or measured by income, and the reasonable compensation, expenses and disbursements of its agents, accountants, experts and counsel) incurred without gross negligence or willful misconduct on its part as determined in a final judgment of a court with competent jurisdiction, arising out of or in connection with the acceptance or administration of this trust or the performance by it of its duties and obligations or the exercise of its rights hereunder, including the costs and expenses of enforcing this Indenture against the Issuer or the Guarantors, as the case may be (including, without limitation, this Section 7.7), and of defending against any claim (whether asserted by any Holder or the Issuer or the Guarantors or any other Person, as the case may be) or liability in connection with the exercise or performance of any of its powers or duties hereunder. The provisions of this Section 7.7 shall survive any termination of this Indenture and the resignation or removal of the Trustee, the Principal Paying Agent or other Paying Agent.

As security for the performance of the obligations of the Issuer or the Guarantors, as the case may be, under this Section 7.7, the Trustee shall have a lien prior to the Notes upon all property and funds held or collected by the Trustee, except funds held in trust for the payment of principal of (and premium, if any) or interest on particular Notes. The Trustee's right to receive payment of any amounts due under this Section 7.7 shall not be subordinate to any other liability or indebtedness of the Issuer or the Guarantors, as the case may be (even though the Notes may be so subordinated).

The obligation of the Issuer under this Section 7.7 shall survive the satisfaction and discharge of this Indenture and the earlier resignation or removal of the Trustee. The indemnification provided in this Section 7.7 shall extend to the officers, directors, agents and employees of the Trustee.

When the Trustee incurs expenses or renders services after an Event of Default specified in Section 6.1 occurs, the expenses and the compensation for such services are intended to constitute expenses of administration under Title 11, U.S. Code, or any similar Federal, State or analogous foreign law for the relief of debtors.

Section 7.8. Corporate Trustee Required; Eligibility.

There shall at all times be a Trustee hereunder which shall be a Person that is eligible pursuant to the Trust Indenture Act to act as such and has a combined capital and surplus of at least U.S.\$50,000,000 and its Corporate Trust Office in The City of New York, New York. If such Person publishes reports of condition at least annually, pursuant to law or to the requirements of a Federal, State, Territorial or District of Columbia supervising or examining authority, then for the purposes of this Section, the combined capital and surplus of such Person shall be deemed to be its combined capital and surplus as set forth in its most recent report of condition so published. If at any time the Trustee shall cease to be eligible in accordance with the provisions of this Section, it shall resign immediately in the manner and with the effect hereinafter specified in this Article.

Section 7.9. Resignation and Removal; Appointment of Successor.

(a) No resignation or removal of the Trustee and no appointment of a successor Trustee pursuant to this Article shall become effective until the acceptance of appointment by the successor Trustee under Section 7.10, at which time the retiring Trustee shall be fully discharged from its obligations hereunder.

(b) The Trustee and the Principal Paying Agent may resign at any time by giving written notice thereof to the Issuer. If an instrument of acceptance by a successor Trustee or Principal Paying Agent shall not have been delivered to the Trustee or Principal Paying Agent, as the case may be, within 30 days after the giving of such notice of resignation, the resigning Trustee or Principal Paying Agent may petition, at the expense of the Issuer, any court of competent jurisdiction for the appointment of a successor Trustee or Principal Paying Agent, as the case may be.

(c) The Trustee may be removed at any time by Act of the Holders of a majority in principal amount of the Outstanding Notes, delivered to the Trustee and to the Issuer. If an

instrument of acceptance by a successor Trustee shall not have been delivered to the Trustee within 30 days after the giving of such notice of removal, the Issuer may petition, at its expense, any court of competent jurisdiction for the appointment of a successor Trustee.

(d) The Agents (other than the Principal Paying Agent) may resign at any time by giving written notice thereof to the Issuer. The Agents may appoint a successor Agent if the Issuer does not.

(e) So long as no Event of Default has occurred and is continuing, the Issuer may remove the Trustee or any Agent and appoint a new Trustee or Agent, as applicable, provided that such Trustee meets the eligibility requirements of Section 7.8.

(f) If at any time:

(1) the Trustee shall fail to comply with Section 7.8 after written request therefor by the Issuer or by any Holder who has been a bona fide Holder of a Note for at least six months; or

(2) the Trustee shall cease to be eligible under Section 7.8 and shall fail to resign after written request therefor by the Issuer or by any such Holder; or

(3) the Trustee shall become incapable of acting or shall be adjudged a bankrupt or insolvent or a receiver of the Trustee or of its property shall be appointed or any public officer shall take charge or control of the Trustee or of its property or affairs for the purpose of rehabilitation, conservation or liquidation, then, in any such case, (i) the Issuer by a Board Resolution may remove the Trustee, or (ii) any Holder who has been a bona fide Holder of a Note for at least six months may, on behalf of himself or herself and all others similarly situated, petition any court of competent jurisdiction for the removal of the Trustee and the appointment of a successor Trustee.

(g) If the Trustee shall resign, be removed or become incapable of acting, or if a vacancy shall occur in the office of Trustee for any cause, the Issuer, by a Board Resolution, shall promptly appoint a successor Trustee. If, within one year after such resignation, removal or incapability, or the occurrence of such vacancy, a successor Trustee shall be appointed by Act of the Holders of a majority in principal amount of the Outstanding Notes delivered to the Issuer and the retiring Trustee, the successor Trustee so appointed shall, forthwith upon its acceptance of such appointment, become the successor Trustee and supersede the successor Trustee appointed by the Issuer. If no successor Trustee shall have been so appointed by the Issuer or the Holders and accepted appointment in the manner hereinafter provided, any Holder who has been a bona fide Holder of a Note for at least six months may, on behalf of himself or herself and all others similarly situated, petition any court of competent jurisdiction at the expense of the Issuer for the appointment of a successor Trustee.

(h) The Issuer shall give notice of each resignation and each removal of the Trustee and each appointment of a successor Trustee to all Holders in the manner provided in Section 1.6. Each notice shall include the name of the successor Trustee and the address of its Corporate Trust Office at the expense of the Issuer.

Section 7.10.

Acceptance of Appointment by Successor.

Every successor Trustee appointed hereunder shall execute, acknowledge and deliver to the Issuer, the Guarantors and to the retiring Trustee an instrument accepting such appointment, and thereupon the resignation or removal of the retiring Trustee shall become effective and such successor Trustee, without any further act, deed or conveyance, shall become vested with all the rights, powers, trusts and duties of the retiring Trustee; but, on request of the Issuer or the successor Trustee, such retiring Trustee shall, upon payment of its charges, execute and deliver an instrument transferring to such successor Trustee all the rights, powers and trusts of the retiring Trustee and shall duly assign, transfer and deliver to such successor Trustee all property and money held by such retiring Trustee hereunder, subject nevertheless to its Lien, if any, provided for in Section 7.7. Upon request of any such successor Trustee, the Issuer and the Guarantors shall execute any and all instruments for more fully and certainly vesting in and confirming to such successor Trustee all such rights, powers and trusts. No successor Trustee shall accept its appointment unless at the time of such acceptance such successor Trustee shall be qualified and eligible under this Article.

Section 7.11. Merger, Conversion, Consolidation or Succession to Business.

Any corporation or other entity into which the Trustee may be merged or convened or with which it may be consolidated, or any corporation or other entity resulting from any merger, conversion or consolidation to which the Trustee shall be a party, or any corporation or other entity succeeding to all or substantially all the corporate trust business of the Trustee, shall be the successor of the Trustee hereunder, provided that such corporation or other entity shall be otherwise qualified and eligible under this Article, without the execution or filing of any paper or any further act on the part of any of the parties hereto. In case any Notes shall have been authenticated, but not delivered, by the Trustee then in office, any successor by merger, conversion or consolidation to such authenticating Trustee may adopt such authentication and deliver the Notes so authenticated with the same effect as if such successor Trustee had itself authenticated such Notes.

Section 7.12. Appointment of Authenticating Agent.

The Trustee may appoint an Authenticating Agent or Agents with respect to the Notes which shall be authorized to act on behalf of the Trustee to authenticate Notes issued upon original issue and upon exchange, registration of transfer or partial redemption thereof or pursuant to Section 3.5, and Notes so authenticated shall be entitled to the benefits of this Indenture and shall be valid and obligatory for all purposes as if authenticated by the Trustee hereunder. Wherever reference is made in this Indenture to the authentication and delivery of Notes by the Trustee or the Trustee's certificate of authentication, such reference shall be deemed to include authentication and delivery on behalf of the Trustee by an Authenticating Agent and a certificate of authentication executed on behalf of the Trustee by an Authenticating Agent. Each Authenticating Agent shall be acceptable to the Issuer and shall at all times be a corporation organized and doing business under the laws of the United States, any State thereof or the District of Columbia, authorized under such laws to act as Authenticating Agent, having a combined capital and surplus of not less than U.S.\$50,000,000 and subject to supervision or examination by Federal or State authority. If such Authenticating Agent publishes reports of

condition at least annually, pursuant to law or to the requirements of said supervising or examining authority, then for the purposes of this Section, the combined capital and surplus of such Authenticating Agent shall be deemed to be its combined capital and surplus as set forth in its most recent report of condition so published. If at any time an Authenticating Agent shall cease to be eligible in accordance with the provisions of this Section, such Authenticating Agent shall resign immediately in the manner and with the effect specified in this Section.

Any corporation or other entity into which an Authenticating Agent may be merged or converted or with which it may be consolidated, or any corporation or other entity resulting from any merger, conversion or consolidation to which such Authenticating Agent shall be a party, or any corporation or other entity succeeding to all or substantially all the corporate agency or corporate trust business of an Authenticating Agent, shall continue to be an Authenticating Agent, provided such corporation or other entity shall be otherwise eligible under this Section, without the execution or filing of any paper or any further act on the part of the Trustee or the Authenticating Agent.

An Authenticating Agent may resign at any time by giving written notice thereof to the Trustee and to the Issuer. The Trustee may at any time terminate the agency of an

Authenticating Agent by giving written notice thereof to such Authenticating Agent and to the Issuer. Upon receiving such a notice of resignation or upon such a termination, or in case at any time such Authenticating Agent shall cease to be eligible in accordance with the provisions of this Section, the Trustee may appoint a successor Authenticating Agent which shall be acceptable to the Issuer and shall give notice of such appointment in the manner provided in Section 1.6 to all Holders of Notes. Any successor Authenticating Agent upon acceptance of its appointment hereunder shall become vested with all the rights, powers and duties of its predecessor hereunder, with like effect as if originally named as an Authenticating Agent. No successor Authenticating Agent shall be appointed unless eligible under the provisions of this Section.

The Issuer agrees to pay to each Authenticating Agent from time to time reasonable compensation for its services under this Section.

If an appointment is made pursuant to this Section, the Notes may have endorsed thereon, in lieu of the Trustee's certificate of authentication, an alternative certificate of authentication in the following form:

"This is one of the Notes referred to in the within-mentioned Indenture.

THE BANK OF NEW YORK MELLON

as Trustee

By:

as Authenticating Agent

ARTICLE VIII

HOLDERS LISTS AND COMMUNICATIONS BY TRUSTEE AND ISSUER

Section 8.1. Issuer to Furnish Trustee; Names and Addresses of Holders.

The Issuer will furnish or cause to be furnished to the Trustee

(a) semi-annually, not more than 15 days after each Record Date, a list, in such form as the Trustee may reasonably require, of the names and addresses of the Holders as of such Record Date; and

(b) at such other times as the Trustee may request in writing, within 30 days after the receipt by the Issuer of any such request, a list of similar form and content as of a date not more than 15 days prior to the time such list is furnished;

excluding from any such list names and addresses received by the Trustee in its capacity as Registrar.

Section 8.2. Preservation of Information; Communications to Holders.

(a) The Trustee shall preserve, in as current a form as is reasonably practicable, the names and addresses of Holders contained in the most recent list furnished to the Trustee as provided in Section 8.1 and the names and addresses of Holders received by the Trustee in its capacity as Registrar. The Trustee may destroy any list furnished to it as provided in Section 8.1 upon receipt of a new list so furnished.

(b) If a Holder (herein referred to as an “applicant”) applies in writing to the Trustee, and furnishes to the Trustee reasonable proof that each such applicant has owned a Note for a period of at least six months preceding the date of such application, and such application states that such applicant desires to communicate with other Holders with respect to their rights under this Indenture or under the Notes and is accompanied by a copy of the form of proxy or other communication which such applicant proposes to transmit, then the Trustee shall, within five Business Days after the receipt of such application, at its election, either

(1) afford such applicant access to the information preserved at the time by the Trustee in accordance with Section 8.2(a); or

(2) inform such applications as to the approximate number of Holders whose names and addresses appear in the information preserved at the time by the Trustee in accordance with Section 8.2(a), as to the approximate cost of mailing to such Holders the form of proxy or other communication, if any, specified in such application.

(c) Every Holder of Notes, by receiving and holding the same, agrees with the Issuer and the Trustee that neither the Issuer nor the Trustee nor any agent of either of them shall be held accountable by reason of the disclosure of any such information as to the names and addresses of the Holders in accordance with Section 8.2(b), regardless of the source from which

such information was derived, and that the Trustee shall not be held accountable by reason of mailing any material pursuant to a request made under Section 8.2(b).

ARTICLE IX

CONSOLIDATION, MERGER, CONVEYANCE, TRANSFER OR LEASE

Section 9.1. Mergers, Consolidations and Certain Sales of Assets.

So long as any of the Notes are Outstanding, neither the Issuer nor any Guarantor may, in a single transaction or a series of related transactions:

(1) unless the Issuer or such Guarantor, as applicable, is the surviving Person, consolidate with or merge into any other Person or permit any other Person to consolidate with or merge into the Issuer or such Guarantor, as applicable (other than a consolidation or merger of a Wholly Owned Subsidiary organized under the laws of Luxembourg, Brazil, Peru, the United States or any OECD country, in each case, with or into the Issuer or such Guarantor, as applicable); or

(2) directly or indirectly, transfer, sell, lease or otherwise dispose of all or substantially all of its assets (determined on a consolidated basis of the Issuer and its Subsidiaries or the relevant Guarantor and its Subsidiaries, as applicable) to any Person (other than the Issuer or a Guarantor) (provided that the creation of a Lien on or in any of its assets shall not in and of itself constitute the transfer, sale, lease or disposition of the assets subject to the Lien),

unless the following conditions, to the extent applicable, are met:

(i) in the case of a transaction in which the Issuer or a Guarantor does not survive or in which the Issuer or a Guarantor sells, leases or otherwise disposes of all or substantially all of its assets to any other Person, the successor entity to the Issuer or such Guarantor (1) shall expressly assume, by a supplemental indenture executed and delivered to the Trustee, all of the Issuer's or such Guarantor's obligations under this Indenture and (2) shall be organized under the laws of (x) Luxembourg, Brazil, Peru or any state or political subdivision thereof, (y) the United States or any state thereof or the District of Columbia or (z) any other country if such successor entity undertakes, in such supplemental indenture, to pay such additional amounts in respect of principal (and premium, if any) and interest as may be necessary in order that the net amounts paid pursuant to the Notes after deduction or withholding of any present or future withholding taxes, duties, assessments, levies, imposts or charges whatsoever imposed by or for the account of such country or any political subdivision or taxing authority thereof or therein shall equal the respective amounts of principal (and premium, if any) and interest specified in the Notes, subject to the same exceptions set forth under clauses (1) through (7) of Section 11.9, but replacing existing references in such clauses to the jurisdiction of incorporation of the Issuer or such Guarantor, as applicable, with references to such other country and references to the jurisdiction of incorporation of the Issuer or such

Guarantor, as applicable, under Section 4.1 shall automatically be deemed to be references to such other country;

(ii) if, as a result of any such transaction, property or assets of the Issuer or such Guarantor would become subject to a Lien prohibited by Section 12.10, the Issuer or such Guarantor, as applicable, or the successor entity to the Issuer or such Guarantor, as applicable, shall have secured the Notes as described thereunder; and

(iii) the Issuer or such Guarantor, as applicable, has delivered to the Trustee an Officer's Certificate and an Opinion of Counsel, each stating that such consolidation, merger, conveyance, transfer, lease or acquisition and, if a supplemental indenture is required in connection with such transaction, such supplemental indenture complies with this covenant and that all conditions precedent provided for in this Indenture relating to such transaction have been complied with.

In the event of any transaction (other than a lease) described in and complying with the provisions of this Section 9.1 in which the Issuer or a Guarantor, as applicable, is not the surviving Person and the surviving Person assumes all the obligations of the Issuer or such Guarantor, as applicable, under this Indenture and the Notes or the Guarantee, as applicable, pursuant to a supplemental Indenture, such surviving Person shall succeed to, and be substituted for, and may exercise every right and power of, the Issuer or such Guarantor, as applicable, and the Issuer or such Guarantor, as applicable, will be discharged from its obligations under this Indenture and the Notes or the Guarantee, as applicable.

ARTICLE X

SUPPLEMENTAL INDENTURES

Section 10.1. Supplemental Indentures Without Consent of Holders.

Without the consent of any Holders, the Issuer and the Trustee, at any time and from time to time, may enter into one or more supplemental indentures hereto in form satisfactory to the Trustee, for any of the following purposes:

- (1) to evidence the succession of another Person to the Issuer or any Guarantor and the assumption by any such successor of the covenants of the Issuer or any Guarantor, as applicable, herein and in the Notes or the Guarantees, as applicable;
- (2) to add to the covenants of the Issuer for the benefit of the Holders, or to surrender any right or power herein conferred upon the Issuer;
- (3) to cure any ambiguity, defect or inconsistency or to correct a manifest error;
- (4) to provide for uncertificated Notes in addition to or in place of certificated Notes;
- (5) to comply with Section 9.1 of this Indenture;

- (6) to evidence and provide for the acceptance of an appointment by a successor trustee;
- (7) to provide for any additional guarantee of the Notes;
- (8) to secure the Notes or to confirm and evidence the release, termination or discharge of any guarantee of or Lien securing the Notes when such release, termination or discharge is permitted by this Indenture;
- (9) to provide for or confirm the issuance of Additional Notes;
- (10) to conform the provisions of this Indenture to the caption entitled "Description of the Notes" in the offering memorandum relating to the Notes; or
- (11) to make any other modification and any waiver or authorization of any breach or proposed breach of any provision of this Indenture or the Notes which is not materially prejudicial to the Holders.

Section 10.2. Supplemental Indentures with Consent of Holders.

With the consent of the Holders of not less than a majority in aggregate principal amount of the Outstanding Notes, by Act of said Holders delivered to the Issuer and the Trustee, and consistent with Section 6.13, the Issuer and the Trustee may enter into an indenture or supplemental indentures hereto for the purpose of adding any provisions to or changing in any manner or eliminating any of the provisions of this Indenture or of modifying in any manner the rights of the Holders under this Indenture; provided, however, that no such supplemental indenture shall, without the consent of the Holder of each outstanding Note affected thereby:

- (1) change the Stated Maturity of the principal of, or any installment of interest on, any Note, or reduce the principal amount thereof or the rate of interest thereon or any premium payable thereon, or change the place of payment where, or the coin or currency in which, any Note or any premium or interest thereon is payable, or impair the right to institute suit for the enforcement of any such payment on or with respect to any Note on or after the Stated Maturity thereof (or, in the case of redemption, on or after the Redemption Date),
- (2) reduce the percentage in principal amount of the Outstanding Notes, the consent of whose Holders is required for any such supplemental indenture, or the consent of whose Holders is required for any waiver (of compliance with certain provisions of this Indenture or certain defaults hereunder and their consequences) provided for in this Indenture;
- (3) modify any of the provisions of this Section 10.2 or Section 6.12 or Section 11.9, except to increase any such percentage described in clause (2) above or to provide that certain other provisions of this Indenture cannot be modified or waived without the consent of the Holder of each Outstanding Note affected thereby;

(4) release any Guarantors from its obligations under its Guarantee or this Indenture, except in compliance with the terms of this Indenture.

It shall not be necessary for any Act of Holders under this Section to approve the particular form of any proposed supplemental indenture, but it shall be sufficient if such Act shall approve the substance thereof.

Section 10.3. Execution of Supplemental Indentures.

In executing, or accepting the additional trusts created by, any supplemental indenture permitted by this Article or the modifications thereby of the trusts created by this Indenture, the Trustee shall receive, and (subject to Section 7.1) shall be fully protected in conclusively relying upon, in addition to the documents required by Section 1.2, an Officer's Certificate and Opinion of Counsel stating that the execution of such supplemental indenture is authorized or permitted by this Indenture. The Trustee may, but shall not be obligated to, enter into any such supplemental indenture which affects the trustee's own rights, duties or immunities under this Indenture.

Section 10.4. Effect of Supplemental Indentures.

Upon the execution of any supplemental indenture under this Article, this Indenture shall be modified in accordance therewith, and such supplemental indenture shall form a part of this Indenture for all purposes; and every Holder of Notes theretofore or thereafter authenticated and delivered hereunder shall be bound thereby.

Section 10.5. Reference in Notes to Supplemental Indentures.

Notes authenticated and delivered after the execution of any supplemental indenture pursuant to this Article may, and shall if required by the Trustee, bear a notation in form approved by the Trustee as to any matter provided for in such supplemental indenture. If the Issuer shall so determine, new Notes so modified as to conform, in the opinion of the Issuer, to any such supplemental indenture may be prepared and executed by the Issuer and authenticated and delivered by the Trustee in exchange for Outstanding Notes.

Section 10.6. Notice to Holders.

After a supplemental indenture under this Article becomes effective, the Issuer will send to the Holders affected thereby a notice briefly describing the terms of the supplement. The Issuer will send supplemental indentures to Holders upon request. Any failure of the Issuer to send such notice, or any defect therein, will not, however, in any way impair or affect the validity of any such supplemental indenture.

ARTICLE XI
COVENANTS

Section 11.1. Payment Under the Notes.

Each of the Issuer and the Guarantors shall duly and punctually pay all amounts owed by it, and comply with all its other obligations, under the terms of the Notes, the Guarantees and this Indenture (collectively, the “Transaction Documents”).

Section 11.2. Maintenance of Office or Agency.

The Issuer and the Guarantors will maintain in the Borough of Manhattan, The City of New York, New York, an office or agency where Notes may be presented or surrendered for payment, where Notes may be surrendered for registration of transfer or exchange and where notices and demands to or upon the Issuer or the Guarantors in respect of the Notes, the Guarantees and this Indenture may be served. Initially, this office will be at the Corporate Trust Office of the Trustee, unless the Issuer shall designate and maintain any other office or agency for one or more such purposes, and the Issuer and the Guarantors shall agree not to change the designation of such office without prior written notice to the Trustee and designation of a replacement office in the same general location. The Issuer will give prompt written notice to the Trustee of the location, and any change in the location, of such offices or agencies. If at any time the Issuer or the Guarantors shall fail to maintain any such required offices or agencies or shall fail to furnish the Trustee with the address thereof, such presentations, surrenders, notices and demands may be made or served at the Corporate Trust Office of the Trustee. The Issuer and the Guarantors hereby appoint the Trustee as their agent to receive all such presentations, surrenders, notices and demands.

The Issuer may also from time to time designate one or more other offices or agencies (in or outside the Borough of Manhattan, The City of New York, New York) where the Notes may be presented or surrendered for any or all such purposes and may from time to time rescind such designations (each, a “Transfer Agent”); provided, however, that no such designation or rescission shall in any manner relieve the Issuer of its obligation to maintain an office or agency in the Borough of Manhattan, The City of New York, New York. The Issuer has initially designated the offices of The Bank of New York Mellon to act as Transfer Agent. The Issuer will give prompt written notice to the Trustee of any such designation or rescission and of any change in the location of any such other office or agency.

Section 11.3. Money for Note Payments to Be Held in Trust.

If the Issuer shall at any time act as its own Paying Agent, it will, on or before each due date of the principal of (and premium, if any) or interest on any of the Notes, segregate and hold in trust for the benefit of the Persons entitled thereto a sum sufficient to pay the principal (and premium, if any) or interest so becoming due until such sums shall be paid to such Persons or otherwise disposed of as herein provided and will promptly notify the Trustee in writing of its action or failure so to act.

Whenever the Issuer shall have one or more Paying Agents, it will, prior to each due date of the principal of (and premium, if any) or interest on any Notes, deposit with the Principal Paying Agent a sum sufficient to pay the principal (and premium, if any) or interest (including Additional Amounts, if any) so becoming due, such sum to be held in trust for the benefit of the Persons entitled to such principal, premium or interest, and (unless such Paying Agent is the Trustee) the Issuer will promptly notify the Trustee in writing of its action or failure so to act.

The Issuer will cause each Paying Agent other than the Trustee and the Principal Paying Agent to execute and deliver to the Trustee an instrument in which such Paying Agent shall agree with the Trustee, subject to the provisions of this Section 11.3, that such Paying Agent will:

- (1) hold all sums held by it for the payment of the principal of (and premium, if any) or interest on Notes in trust for the benefit of the Persons entitled thereto until such sums shall be paid to such Persons or otherwise disclosed of as herein provided;
- (2) give the Trustee written notice of any default by the Issuer (or any other obligor upon the Notes) in the making of any payment of principal (and premium, if any) or interest;
- (3) at any time during the continuance of any such default, upon the written request of the Trustee, forthwith pay to the Trustee all sums so held in trust by such Paying Agent; and
- (4) acknowledge, accept and agree to comply in all respects with the provisions of this Indenture relating to the duties, rights and obligations of such Paying Agent.

The Issuer may at any time, for the purpose of obtaining the satisfaction and discharge of this Indenture or for any other purpose, pay, or by Issuer Order direct any Paying Agent to pay, to the Trustee all sums held in trust by the Issuer or such Paying Agent, such sums to be held by the Trustee upon the same trusts as those upon which such sums were held by the Issuer or such Paying Agent; and, upon such payment by any Paying Agent to the Trustee, such Paying Agent shall be released from all further liability with respect to such money.

Any money deposited with the Trustee or any Paying Agent, or then held by the Issuer, in trust for the payment of the principal of (and premium, if any) or interest on any Note and remaining unclaimed for two years after such principal (and premium, if any) or interest has become due and payable shall be paid to the Issuer on the Issuer's Request, or (if then held by the Issuer) shall be discharged from such trust; and the Holder of such Note shall thereafter, as an unsecured general creditor, look only to the Issuer for payment thereof, and all liability of the Trustee or such Paying Agent with respect to such trust money, and all liability of the Issuer as trustee thereof, shall thereupon cease.

Section 11.4. Maintenance of Corporate Existence.

The Issuer and the Guarantors shall, and shall cause each of their respective Subsidiaries to, maintain in effect its corporate existence and all registrations necessary therefor and take all

actions to maintain all rights, privileges, titles to property, franchises and the like necessary or desirable in the normal conduct of its business, activities or operations provided that this covenant shall not require (i) the Issuer, the Guarantors or any of their respective Subsidiaries to maintain any such registration, right, privilege, title to property, franchise or the like or require the Issuer or the Guarantors to preserve the corporate existence of any of their respective Subsidiaries (other than a Subsidiary that is a Guarantor), if the failure to do so would not have a material adverse effect on the Issuer and its Subsidiaries taken as a whole or have a material adverse effect on the rights of the Holders or (ii) the Guarantors or the Issuer to preserve its corporate existence if it complies with the provisions of Section 9.1.

Section 11.5. Repurchases at the Option of the Holders upon Change of Control.

If a Change of Control occurs that results in a Rating Decline, each Holder will have the right to require the repurchase of all or any part (equal to U.S.\$200,000 and integral multiples of U.S.\$1,000 in excess thereof) of the Notes of that Holder pursuant to a Change of Control Offer by the Issuer or the Guarantors. No such purchase in part shall reduce the principal amount of the Notes held by any Holder to below U.S.\$200,000. In the Change of Control Offer, the Issuer or a Guarantor will offer a "Change of Control Payment" in U.S. dollars equal to 101% of the aggregate principal amount of Notes repurchased plus accrued and unpaid interest and Additional Amounts, if any, on the Notes repurchased, to the date of purchase (subject to the right of the Holders of record on the relevant Record Date to receive interest and Additional Amounts, if any, on the relevant Interest Payment Date).

Within 30 days following any Change of Control that results in a Rating Decline the Issuer or the Guarantor will make a "Change of Control Offer" by notice to each Holder of Notes in accordance with the provision set out under Section 1.6, describing the transaction or transactions that constitute the Change of Control and offering to repurchase Notes on the date specified in the notice (the "Change of Control Payment Date"), which date will be no earlier than 30 days and no later than 60 days from the date such notice is mailed, pursuant to the procedures required by this Indenture and described in such notice.

The Issuer or the applicable Guarantor will comply, to the extent applicable, with the requirements of Section 14(e)-1 of the Exchange Act and any other applicable securities laws or regulations in connection with the repurchase of Notes pursuant to this covenant. To the extent that the provisions of any applicable securities laws or regulations conflict with provisions of this covenant, the Issuer or the applicable Guarantor will comply with the applicable securities laws and regulations and will not be deemed to have breached its obligations under this covenant by virtue of its compliance with such securities laws or regulations.

On the Change of Control Payment Date, the Issuer or the applicable Guarantor will, to the extent lawful:

- (1) accept for payment all Notes or portions of Notes properly tendered pursuant to the Change of Control Offer; and
- (2) procure that the Change of Control Payment is made in respect of all Notes or portions of Notes properly tendered.

The Paying Agents will promptly mail to each Holder who properly tendered Notes the Change of Control Payment for such Notes, and the Trustee will promptly authenticate and mail (or cause to be transferred by book entry) to each Holder a new Note equal in principal amount to any unpurchased portion of the Notes surrendered, if any; provided that each new Note will be in minimum denominations of U.S.\$200,000 and integral multiples of U.S.\$1,000 in excess thereof.

The provisions described above that require the Issuer or a Guarantor to make a Change of Control Offer following a Change of Control will be applicable whether or not any other provisions of this Indenture are applicable. However, a Change of Control Offer is only required to be made in the event that a Change of Control results in a Rating Decline. Consequently, if a Change of Control were to occur which does not result in a Rating Decline, none of the Issuer and the Guarantors would be required to launch a Change of Control Offer. Except as described above with respect to a Change of Control, this Indenture does not contain provisions that permit the Holders to require that the Issuer or a Guarantor repurchase or redeem the Notes in the event of a takeover, recapitalization or similar transaction.

None of the Issuer or the Guarantors will be required to make a Change of Control Offer upon a Change of Control if (1) a third party makes the Change of Control Offer in the manner, at the times and otherwise in compliance with the requirements, set forth in this Indenture, that are applicable to a Change of Control Offer made by the Issuer or a Guarantor and such third party purchases all Notes properly tendered and not withdrawn under the Change of Control Offer or (2) a notice of redemption has been given for all outstanding Notes pursuant to this Indenture as described under Section 4.2 unless and until there is a default in payment of the applicable Redemption Price.

Notwithstanding anything to the contrary contained herein and subject to applicable law, a Change of Control Offer may be made in advance of a Change of Control and conditioned upon the occurrence of such Change of Control and Rating Decline if a definitive agreement is in place for the Change of Control at the time of making of the Change of Control Offer.

In the event that the Holders of not less than 85% of the aggregate principal amount of Outstanding Notes accept a Change of Control Offer and the Issuer or a Guarantor or a third party purchases all the Notes held by such holders, the Issuer or a Guarantor will have the right, on not less than 10 nor more than 60 days' prior notice to the Holders, given not more than 30 days following the purchase date pursuant to the Change of Control Offer, to redeem all of the Notes that remain outstanding following such purchase at the purchase price equal to that in the Change of Control Offer plus, to the extent not included in the purchase price, accrued and unpaid interest and Additional Amounts, if any, on the Notes that remain Outstanding, to, but excluding, the date of redemption.

Section 11.6. Payment of Taxes and Other Claims.

The Issuer and the Guarantors shall, and shall cause each of their respective Subsidiaries to, pay or discharge or cause to be paid or discharged before the same shall become delinquent, (i) all taxes, assessments and governmental charges levied or imposed upon the Issuer and the Guarantors or any of their respective Subsidiaries, as the case may be, and (ii) all lawful claims

for labor, materials and supplies which, if unpaid, might by law become a Lien upon the property of the Issuer or a Guarantor or any of their respective Subsidiaries, as the case may be; provided, however, that neither the Issuer nor any Guarantor nor any of their respective Subsidiaries shall be required to pay or discharge or cause to be paid or discharged any such tax, assessment, charge or claim whose amount, applicability or validity is being contested in good faith and, if appropriate, by appropriate legal proceedings, or where the failure to do so would not have a material adverse effect on the Issuer, the Guarantors and their Subsidiaries taken as a whole or have a material adverse effect on the rights of the Holders.

Section 11.7. Provision of Financial Information.

The Issuer has agreed that it will furnish to the Trustee and the Holders and to any prospective purchasers of such Notes, to the extent permitted by applicable law or contractual restrictions, upon their request, the information required to be delivered pursuant to Rule 144A(d)(4) under the Securities Act; provided that the foregoing obligation will only apply to the Issuer if it ceases to be subject to and in compliance with the reporting requirements of Section 13 or 15(d) of the Exchange Act or exempt from reporting pursuant to Rule 12g3-2(b) under the Exchange Act.

Additionally, the Issuer shall provide the Trustee and the Holders, within 120 days of the end of each fiscal year and within 60 days of the end of each of the first three fiscal quarters, annual or quarterly financial statements, as applicable, in accordance with applicable GAAP and audited in the case of annual financial statements.

Notwithstanding the foregoing, if the Issuer makes available the information described above on the Issuer's or an Affiliate's website or on the Electronic Data Gathering, Analysis, and Retrieval (EDGAR) website of the SEC, the Issuer will be deemed to have satisfied the reporting requirement set forth in such applicable clause. It is understood that the Trustee shall have no responsibility to determine whether any information has been posted on such websites.

Delivery of such reports, information and documents to the Trustee is for informational purposes only and the Trustee's receipt of such reports shall not constitute constructive notice of any information contained therein or determinable from information contained therein, including the Issuer's compliance with any of its covenants hereunder (as to which the Trustee is entitled to rely exclusively on an Officer's Certificate or notice). The Trustee shall have no obligation to determine if and when the Issuer's statements or reports are publicly available and accessible electronically.

Section 11.8. Statement by Officers as to Default.

(a) The Issuer will be required to furnish to the Trustee together with the delivery (or the posting on the Issuer's or an Affiliate's website) of its annual financial statements and in any event within 120 days after the end of each such fiscal period, an Officer's Certificate stating whether or not to the best knowledge of the signer thereof none of the Issuer or any Guarantor is in default in the performance and observance of any of the terms, provisions and conditions of this Indenture and if the Issuer or any Guarantor is in default, specifying all such defaults and the nature and status thereof of which they may have knowledge.

(b) The Issuer shall deliver to the Trustee, as soon as is practicable and in any event within ten calendar days after the Issuer becomes aware of the occurrence of a Default or an Event of Default, an Officer's Certificate of the Issuer, setting forth the details of such Default or Event of Default and stating what action the Issuer, proposes to take with respect thereto. None of the Agents shall have notice of any Default or Event of Default unless a Responsible Officer of such Agent has actual knowledge thereof.

Section 11.9. Payment of Additional Amounts.

Any and all payments to a Holder of principal (and premium, if any) and interest in respect of the Notes will be made free and clear of, and without withholding or deduction for, any and all present and future withholding taxes, duties, assessments, levies, imposts or charges ("Taxes") whatsoever imposed by or on behalf of, Luxembourg, Brazil, Peru or any political subdivision or taxing authority thereof or therein or any other jurisdiction from or through which payment on the Notes is made, unless such withholding or deduction is required by law. In that event, the Issuer or a Guarantor, as the case may be, shall pay such additional amounts (the "Additional Amounts") as will result in the receipt by the Holders of such amounts as would have been received by them if no such withholding or deduction had been required, except that no such Additional Amounts shall be payable in respect of any Note:

(1) held by, or by a third party on behalf of, a Holder or beneficial owner which is liable for such taxes, duties, assessments, levies, imposts or charges in respect of such Note by reason of its (or a fiduciary, settlor, member, shareholder or beneficiary of, or possessor of a power over, such Holder, if such Holder is an estate, trust, partnership or corporation) having some present or former connection with Luxembourg, Brazil or Peru (including being or having been a citizen or resident of Luxembourg, Brazil or Peru or being or having been engaged in trade or business therein) other than the mere holding of such Note or the enforcement of rights in respect of such Note; or

(2) where (in the case of a payment of principal, premium, if any, or interest on the Maturity Date or date of earlier redemption) the relevant Note is surrendered for payment more than 30 days after the Relevant Date except to the extent that the relevant Holder would have been entitled to such Additional Amounts if it had surrendered the relevant Note on the last day of such period of 30 days; or

(3) if such tax is an estate, inheritance, gift, sales, transfer or personal property tax or any similar tax, assessment, levy, impost or charge; or

(4) if such tax, duty, assessment, levy, impost or charge is (a) payable other than by withholding or deduction from a payment on such Note, or (b) required to be withheld or deducted by a Paying Agent and such Holder of a Note would have been able to avoid such withholding or deduction by presenting the relevant Note to another Paying Agent; or

(5) if such tax, duty, assessment, levy, impost or charge would not have been imposed but for the failure of a Holder or beneficial owner of the Note to comply with applicable certification, information, documentation or other reporting requirements

concerning the nationality, residence, identity or connection with Luxembourg, Brazil or Peru of such Holder or beneficial owner if (i) such compliance is required as a precondition to relief or exemption from withholding or deduction of all or part of such tax, duty, assessment, levy, impost or charge and (ii) at least 30 days prior to the date on which the Issuer or a Guarantor, as the case may be, applies this clause (5), it will have notified such Holder or beneficial owner that it will be required to comply with such requirement;

(6) if such tax, duty, assessment, levy, impost or charge is payable pursuant to the Luxembourg law dated December 23, 2005, as amended, introducing a domestic withholding tax on interest income for Luxembourg resident individuals (*Relibi law*); or

(7) on account of a payment on such Note that is paid to a Holder that is a fiduciary or partnership or other than the sole beneficial owner of such payment to the extent a beneficiary or settlor with respect to such fiduciary or a member of such partnership or a beneficial owner would not have been entitled to the Additional Amounts had such beneficiary, settlor, member or beneficial owner been the Holder of such note; or

(8) in the case of any combination of items (1) through (7).

"Relevant Date" means whichever is the later of (a) the date on which the payment in question first becomes due and (b) if the full amount payable has not been received by the Paying Agent on or prior to such due date, the date on which (the full amount having been so received) notice to that effect has been given to the Holders.

Notwithstanding anything to the contrary above, none of the Issuer, a Guarantor, any Paying Agent or any other Person shall be required to pay any Additional Amounts with respect to any withholding or deduction imposed on or in respect of any Note pursuant to FATCA, any treaty, law, regulation or other official guidance enacted by any jurisdiction implementing FATCA, or any agreement between the Issuer and the United States or any authority thereof implementing FATCA.

The Issuer or the relevant Guarantor, as applicable, shall pay any present or future stamp, court or documentary taxes, or any other excise or property taxes, charges or similar levies which arise in any jurisdiction from the execution, delivery or registration of the Notes, this Indenture or any other document or instrument referred to therein, excluding any such taxes, charges or similar levies imposed by any jurisdiction outside of Luxembourg, Brazil or Peru, as applicable, except those resulting from, or required to be paid in connection with, (i) the execution in or bringing to such jurisdiction of the Notes or any document or instrument; (ii) the production before a court of such jurisdiction of the Notes or any document or instrument or (iii) the enforcement of the Notes or any other such document or instrument following the occurrence of any Event of Default with respect to the Notes.

References to principal, premium, if any, or interest in this Indenture or the Notes shall be deemed to include any Additional Amounts in respect of principal, premium, if any, or interest (as the case may be) which may be payable under the Notes.

If the Issuer or a Guarantor becomes subject at any time to any taxing jurisdiction other than Luxembourg, Brazil or Peru, references herein to Luxembourg, Brazil or Peru, as applicable, shall be construed to include such other jurisdiction.

The Trustee shall have no obligation to determine whether any Additional Amounts are owed or for the calculation thereof.

Section 11.10. Limitation on Liens.

The Issuer shall not, and shall not permit any of its Designated Subsidiaries to, Incur or suffer to exist any Lien on any of its Restricted Property to secure any Indebtedness of the Issuer or such Designated Subsidiary without making, or causing such Designated Subsidiary to make, effective provision for securing the Notes (x) equally and ratably with (or prior to) such Indebtedness as to such Restricted Property for so long as such Indebtedness will be so secured or (y) in the event such Indebtedness is Indebtedness of the Issuer or such Designated Subsidiary which is subordinate in right of payment to the Notes, prior to such Indebtedness as to any such Restricted Property for so long as such Indebtedness will be so secured.

The foregoing restrictions shall not apply to:

(1) any Lien on the inventory or receivables and related assets (other than those described in clause (3) below) securing obligations:

- (i) under any short term lines of credit, entered into in the normal course of business; or
- (ii) under any working capital facility;

(2) Liens created solely for the purpose of securing the payment of all or a part of the purchase price (or the cost of construction or improvement, and any related transaction fee and expenses) of assets or property (including Capital Stock of any Person) acquired, constructed or improved after the Issue Date; provided that (a) the aggregate principal amount of Indebtedness secured by such Liens shall not exceed the purchase price of the assets or property so acquired, constructed or improved, (b) such Liens shall not encumber any assets or property other than the assets or property so acquired, constructed or improved and other than any unimproved real property on which the property so constructed, or the improvement, is located and (c) such Lien shall attach to such assets or property within 365 days of the construction, acquisition or improvement of such assets or property; provided, further, that to the extent that the property or asset acquired is Capital Stock, and subject to the limitations in clause (c) above, the Lien also may encumber other property or assets of the Person so acquired, provided, further, that any Lien is permitted to be incurred on the Capital Stock of any Person securing any Indebtedness of that Person that is (a) non-recourse to the Issuer or the Designated Subsidiary, and (b) incurred solely for purposes of financing the acquisition, construction or improvement of any property or assets of such Person;

(3) Liens on accounts receivable and related assets in connection with any credit facility, including export or import financings and other trade transactions, or in

connection with any Securitization Transaction provided that the aggregate amount of any Receivables sold or transferred in such Securitization Transaction securing Indebtedness shall not exceed (a) with respect to transactions related to revenues from exports, 80% of such Person's consolidated net sales from exports; or (b) with respect to transactions related to revenues from domestic sales, 80% of such Person's consolidated net sales in the jurisdiction in which such Person is located;

(4) Liens granted to secure borrowings from (i) *Banco Nacional de Desenvolvimento Econômico e Social-BNDES*, or any other federal, regional or state governmental development bank or credit agency, or (ii) any international or multilateral development bank, government-sponsored agency, export-import bank or official export-import credit insurer;

(5) Liens existing on the Issue Date;

(6) Liens on property or shares of Capital Stock of another Person at the time such other Person becomes a Subsidiary; provided, however, that the Liens may not extend to any other property owned by such Person;

(7) Liens on property at the time such Person or any of its Subsidiaries acquires the property, including any acquisition by means of a merger or consolidation with or into such Person or a Subsidiary of such Person; provided, however, that the Liens may not extend to any other property owned by such Person;

(8) Liens securing Indebtedness or other obligations of a Subsidiary of such Person owing to such Person or a Subsidiary of such Person;

(9) Liens in favor of surety bonds or letters of credit issued pursuant to the request of, and for the account of, such Person in the ordinary course of its business;

(10) any Lien securing obligations owed under applicable Peruvian laws to the Peruvian Ministry of Energy and Mines or other governmental authorities incurred in the ordinary course of business, including but not limited to, mine closure plans;

(11) Liens securing obligations under hedging agreements not for speculative purposes;

(12) any Lien extending, renewing or replacing (or successive extensions, renewals or replacements of), in whole or in part, any Lien referred to in clauses (2), (4), (5), (6) or (7) above; provided that the principal amount of Indebtedness secured thereby shall not exceed the principal amount of Indebtedness so secured at the time of such extension, renewal or replacement except for any increase reflecting premiums, fees and expenses in connection with such extension, renewal or replacement, and that such extension, renewal or replacement shall be limited to all or a part of the property which secured the Lien so extended, renewed or replaced (plus improvements on such property); and

(13) Lien that do not fall within clauses (1) through (12) above and that secure Indebtedness which, exclusive of Indebtedness secured by other Liens permitted under this covenant, does not exceed an aggregate principal amount equal to 20% of Consolidated Total Assets.

For the avoidance of doubt, a Lien permitted by this Section 11.10 need not be permitted solely by reference to a single clause permitting such Lien, but may be permitted in part by such clause and in part by one or more other clauses of this covenant otherwise permitting such Lien.

Section 11.11. [Intentionally Omitted].

Section 11.12. Performance Obligations Under Other Documents.

The Issuer shall duly and punctually perform, comply with and observe all obligations and agreements to be performed by it set forth in the Transaction Documents.

Section 11.13. Compliance with Laws.

Each of the Issuer and the Guarantors shall comply, and shall cause their respective Subsidiaries to comply, at all times with all applicable laws, rules, regulations, orders and directives of any government or government agency or authority having jurisdiction over the Issuer or any Guarantors, any of their respective Subsidiaries or the business of any of them or any of the transactions contemplated herein, except where the failure to do so would not have a material adverse effect on the Issuer and its Subsidiaries taken as a whole or have a material adverse effect on the rights of the Holders.

Section 11.14. Maintenance of Government Approvals.

Each of the Issuer and the Guarantors shall, and shall cause their respective Subsidiaries to, duly obtain and maintain in full force and effect all governmental approvals, consents or licenses of any government or governmental agency or authority under the laws of Luxembourg, Brazil, Peru (including any Central Bank) or any other government or government agency having jurisdiction over the Issuer or necessary in all cases for the Guarantors and the Issuer to perform their respective obligations under the Transaction Documents or for the validity or enforceability thereof, except where the failure to do so would not have a material adverse effect on the Issuer and its Subsidiaries taken as a whole or have a material adverse effect on the rights of the Holders.

Section 11.15. [Intentionally Omitted].

Section 11.16. Maintenance of Books and Records.

Each of the Issuer and the Guarantors shall, and shall cause each of their respective Subsidiaries to, maintain books, accounts and records in all material respects in accordance with applicable GAAP, and in any case in the manner necessary to facilitate consolidation into the Guarantors' consolidated financial statements.

Section 11.17. Ranking.

The Issuer shall ensure that the Notes will constitute senior unsecured and unsubordinated obligations of the Issuer, and will rank at least equally to all other present and future senior unsecured and unsubordinated obligations of the Issuer (other than obligations preferred by statute or by operation of law). Each of the Guarantors shall ensure that its Guarantee will constitute senior unsecured and unsubordinated obligations of such Guarantor, and will rank at least equally to all other present and future senior unsecured and unsubordinated obligations of the Guarantors (other than obligations preferred by statute or by operation of law). No obligation will be considered to be senior to the Notes or the Guarantees by virtue of being secured on a first or junior priority basis.

ARTICLE XII

LEGAL DEFEASANCE AND COVENANT DEFEASANCE

Section 12.1. Option to Effect Defeasance or Covenant Defeasance.

The Issuer or a Guarantor may at its option, at any time elect to have either Section 12.2 or Section 12.3 applied to the Outstanding Notes upon compliance with the conditions set forth below in this Article XII.

Section 12.2. Defeasance and Discharge.

Upon the Issuer's or a Guarantor's exercise of the option provided in Section 12.1 applicable to this Section, the Issuer and a Guarantor shall be deemed to have been discharged from their obligations with respect to the Outstanding Notes on the date the conditions set forth below are satisfied (hereinafter, "defeasance"). For this purpose, such defeasance means that the Issuer and a Guarantor shall be deemed to have paid and discharged the entire indebtedness represented by the Outstanding Notes and to have satisfied all their other obligations under such Notes and this Indenture insofar as such Notes are concerned (and the Trustee, at the expense of the Issuer and a Guarantor, shall execute proper instruments acknowledging the same), except for the following which shall survive until otherwise terminated or discharged hereunder: (A) the rights of Holders of Outstanding Notes to receive, solely from the trust fund described in Section 12.4 and as more fully set forth in such Section, payments in respect of the principal of (and premium, if any) and interest (and Additional Amounts, if any) on such Notes when such payments are due, (B) the Issuer's and the Guarantors' obligations with respect to such Notes under Sections 3.3, 3.4, 3.5, 11.2 and 11.3, (C) the rights, powers, trusts, duties and immunities of the Trustee hereunder and (D) this Article XII. Subject to compliance with this Article XII, the Issuer and the Guarantors may exercise their option under this Section 12.2 notwithstanding the prior exercise of their option under Section 12.3.

Section 12.3. Covenant Defeasance.

Upon the Issuer or a Guarantor's exercise of the option provided in Section 12.1 applicable to this Section, (i) the Issuer and the Guarantors shall be released from their obligations under Sections Section 9.1 and 11.15 through 11.17, inclusive and the Guarantors shall be released from all of its obligations under the Guarantees and under Article XIII of this Indenture, and (ii) the occurrence of an event specified in Section 6.1(3) (with respect to Section 9.1 and Sections 11.15 through 11.17, inclusive) shall not be deemed to be or result in an Event of Default, on and after the date the conditions set forth below are satisfied (hereinafter, "covenant defeasance"). For this purpose, such covenant defeasance means that the Issuer and the Guarantors may omit to comply with and shall have no liability in respect of any term, condition or limitation set forth in any such Section or Article, whether directly or indirectly by reason of any reference elsewhere herein to any such Section or Article or by reason of any reference in any such Section or Article to any other provision herein or in any other document, but the remainder of this Indenture and such Notes shall be unaffected thereby.

Section 12.4. Conditions to Defeasance or Covenant Defeasance.

The following shall be the conditions to application of either Section 12.2 or Section 12.3 to the Outstanding Notes:

(1) the Issuer or a Guarantor shall irrevocably have deposited or caused to be deposited with the Trustee or its designee, in trust, for the benefit of the Holders (A) cash, (B) Cash Equivalents, (C) U.S. Government Obligations, or (D) a combination thereof, sufficient, in the written opinion of an internationally recognized firm of independent certified public accountants, investment bank or consulting firm to pay and discharge, the principal of, premium, if any, and each installment of interest (including Additional Amounts, if any) on the Notes on the Stated Maturity of such principal or installment of interest on the day on which such payments are due and payable in accordance with the terms of this Indenture and of such Notes. For this purpose, "U.S. Government Obligations" means securities that are (x) direct obligations of the United States for the payment of which its full faith and credit is pledged or (y) obligations of a Person controlled or supervised by and acting as an agency or instrumentality of the United States the payment of which is unconditionally guaranteed as a full faith and credit obligation by the United States, which, in either case, are not callable or redeemable at the option of the issuer thereof, and shall also include a depositary receipt issued by a bank (as defined in Section 3(a)(2) of the Securities Act) as custodian with respect to any such U.S. Government Obligation or a specific payment of principal of or interest on any such U.S. Government Obligation held by such custodian for the account of the Holder of such depositary receipt, provided that (except as required by law) such custodian is not authorized to make any deduction from the amount payable to the Holder of such depositary receipt from any amount received by the custodian in respect of the U.S. Government Obligation or the specific payment of principal of or interest on the U.S. Government Obligation evidenced by such depositary receipt;

(2) no Default or Event of Default shall have occurred and be continuing on the date of such deposit;

(3) the Issuer or a Guarantor shall have delivered to the Trustee an Officer's Certificate and an Opinion

of Counsel, each stating that all conditions precedent provided for relating to either the defeasance under Section 12.2 or the covenant defeasance under Section 12.3 (as the case may be) have been complied with;

(4) in the case of an election under Section 12.2, the Issuer or a Guarantor shall have delivered to the Trustee an Opinion of Counsel from counsel in the United States stating that (x) the Issuer or a Guarantor has received from, or there has been published by, the Internal Revenue Service a ruling, or (y) since the date of this Indenture there has been a change in the applicable United States Federal income tax law, in either case to the effect that, and based thereon such Opinion of Counsel shall confirm that, the beneficial owners of the Outstanding Notes will not recognize income, gain or loss for United States Federal income tax purposes as a result of such deposit, defeasance and discharge and will be subject to United States Federal income tax on the same amounts, in the same manner and at the same times as would have been the case if such deposit, defeasance and discharge had not occurred; and

(5) in the case of an election under Section 12.3, the Issuer or a Guarantor shall have delivered to the Trustee an Opinion of Counsel from counsel in the United States to the effect that the beneficial owners of the Outstanding Notes will not recognize income, gain or loss for United States Federal income tax purposes as a result of such deposit and covenant defeasance and will be subject to United States Federal income tax on the same amounts, in the same manner and at the same times as would have been the case if such covenant defeasance had not occurred.

Section 12.5. Deposited Money and U.S. Government Obligations to Be Held in Trust; Other Miscellaneous Provisions.

Subject to the provisions of the last paragraph of Section 11.3, all money and U.S. Government Obligations (including the proceeds thereof) deposited with the Trustee (or other qualifying trustee—collectively, for purposes of this Section 12.5, the “Defeasance Trustee”) pursuant to Section 12.4 in respect of the Notes shall be held in trust and applied by the Defeasance Trustee, in accordance with the provisions of such Notes and this Indenture, to the payment, either directly or through any Paying Agent (including the Issuer or a Guarantor acting as their own Paying Agent) as the Defeasance Trustee may determine, to the Holders of such Notes, of all sums due and to become due thereon in respect of principal (and premium, if any) and interest, but such money need not be segregated from other funds except to the extent required by law.

The Issuer and the Guarantors shall, jointly and severally, pay and indemnify the Defeasance Trustee against any tax, fee or other charge imposed on or assessed against the U.S. Government Obligations deposited pursuant to Section 12.4 or the principal and interest received in respect thereof other than any such tax, fee or other charge which by law is for the account of the Holders of the Outstanding Notes.

Anything in this Article to the contrary notwithstanding, the Defeasance Trustee shall deliver or pay to the Issuer from time to time upon Issuer Request any money or U.S. Government Obligations held by it as provided in Section 12.4 which, in the opinion of an internationally recognized accounting firm expressed in a written certification thereof delivered to the Defeasance Trustee, are in excess of the amount thereof which would then be required to be deposited to effect an equivalent defeasance or covenant defeasance.

Section 12.6.

Reinstatement.

If the Defeasance Trustee or the Paying Agent is unable to apply any money in accordance with Section 12.2 or 12.3 by reason of any order or judgment of any court or governmental authority enjoining, restraining or otherwise prohibiting such application, then the obligations of the Issuer and the Guarantors under this Indenture, the Guarantees and the Notes, if any, shall be revived and reinstated as though no deposit had occurred pursuant to this Article until such time as the Defeasance Trustee or Paying Agent is permitted to apply all such money in accordance with Section 12.2 or 12.3; provided, however, that if the Issuer or the Guarantors makes any payment of principal of (and premium, if any) any Note following the reinstatement of such obligations, the Issuer or the Guarantors shall be subrogated to the rights of the Holders of such Notes to receive such payment from the money held by the Defeasance Trustee or the Paying Agent.

Section 12.7. Repayment to Issuer or the Guarantors.

Any money deposited with the Defeasance Trustee or any Paying Agent, or then held by the Issuer or a Guarantor, in trust for the payment of the principal of, premium, if any, or interest on any Note and remaining unclaimed for two years after such principal, and premium, if any, or interest has become due and payable shall be paid to the Issuer or the Guarantors on its written request or (if then held by the Issuer or the Guarantors) shall be discharged from such trust; and the Holder of such security shall thereafter, as a creditor, look only to the Issuer or the Guarantors for payment thereof, and all liability of the Defeasance Trustee or such Paying Agent with respect to such trust money, and all liability of the Issuer or the Guarantor as trustee thereof, shall thereupon cease; provided, however, that the Defeasance Trustee or such Paying Agent, before being required to make any such repayment, shall at the expense of the Issuer and the Guarantors cause to be published once, in *The New York Times* and *The Wall Street Journal* (national edition), notice that such money remains unclaimed and that, after a date specified therein, which shall not be less than 30 days from the date of such notification or publication, any unclaimed balance of such money then remaining will be repaid to the Issuer or the Guarantors.

ARTICLE XIII

SUBSTITUTION OF THE ISSUER

Section 13.1. Substitution of the Issuer.

Notwithstanding any other provision contained in this Indenture,

(a) the Issuer may, without the consent of the Holders of the Notes (and by subscribing for any Notes, each Holder of the Notes expressly consents to it), be replaced and substituted by (i) any Wholly Owned Subsidiary of the Issuer or (ii) any Permitted Holding Company as principal debtor (in such capacity, the “Substituted Issuer”) in respect of the Notes provided that:

(1) such documents (together, the “Issuer Substitution Documents”) shall be executed by the Substituted Issuer, the Issuer and the Trustee as may be necessary to give

full effect to the substitution, including a supplemental indenture whereby (i) the Substituted Issuer assumes all of the Issuer's obligations under this Indenture and the Notes and (ii) the Issuer (the "Additional Guarantor") guarantees on an unsecured and unsubordinated basis the due and punctual payment of all amounts under this Indenture and with respect to the Notes (without limiting the generality of the foregoing) pursuant to which the Substituted Issuer shall undertake in favor of each Holder of the Notes to be bound by the terms and conditions of the Notes and the provisions of this Indenture as fully as if the Substituted Issuer had been named in the Notes and this Indenture as the principal debtor in respect of the Notes in place of the Issuer (or any previous substitute) and pursuant to which the Additional Guarantor will guarantee on an unsecured and unsubordinated basis the due and punctual payment of all amounts under this Indenture and with respect to the Notes (together, the "Substitution");

(2) if the Substituted Issuer is organized in a jurisdiction other than Luxembourg, the Issuer Substitution Documents shall contain a covenant by the Substituted Issuer and/or such other provisions as may be necessary to ensure that each Holder of the Notes has the benefit of a covenant in terms corresponding to the obligations of the Issuer in respect of the payment of Additional Amounts set forth in Section 11.9, and the Substituted Issuer will have a corresponding right of tax redemption set forth in Section 4.1, with the substitution in each case for the references to Luxembourg for references to the jurisdiction in which the Substituted Issuer is organized;

(3) if the Substituted Issuer is organized in a jurisdiction other than Luxembourg, the Issuer Substitution Documents shall contain a covenant by the Additional Guarantor and/or such other provisions as may be necessary to ensure that each Holder of the Notes has the benefit of a covenant in terms corresponding to the obligations of the Additional Guarantor as a guarantor of the Notes in respect of the payment of Additional Amounts set forth in Section 11.9 (but with references to Luxembourg as the jurisdiction of incorporation of the Additional Guarantor);

(4) if the Substituted Issuer is organized in a jurisdiction other than Luxembourg, the Issuer Substitution Documents shall also contain a covenant by the Substituted Issuer to indemnify each Holder and beneficial owner of the Notes, the Trustee and the Agents against all taxes or duties which arise by reason of a law or regulation in effect or contemplated on the effective date of the Substitution, which may be incurred or levied against such Holder or beneficial owner of the Notes or Trustee or Agent as a result of the Substitution and which would not have been so incurred or levied had the Substitution not been made, subject to similar exceptions set forth under clauses (1) through (7) of Section 11.9, *mutatis mutandis*; provided, that any Holder or beneficial owner of the Notes making a claim with respect to such tax indemnity shall provide the Issuer and the Substituted Issuer with notice of such claim, along with supporting documentation, within four weeks of the announcement of the Substitution of the Substituted Issuer as issuer; provided, further, that none of the Issuer (including the Substituted Issuer), the Guarantors (including the Additional Guarantor), any Paying Agent or any other Person shall be required to indemnify any Holder or beneficial owner of the Notes for any taxes imposed pursuant to FATCA, any treaty, law, regulation or

other official guidance enacted by any jurisdiction implementing FATCA, or any agreement between the Issuer or the Substituted Issuer and the United States or any authority thereof implementing FATCA;

(5) the Substituted Issuer shall have delivered, or procured the delivery to the Trustee of, an Opinion of Counsel addressed to the Substituted Issuer from a leading firm of lawyers in the country of incorporation of the Substituted Issuer, to the effect that the Issuer Substitution Documents constitute legal, valid and binding obligations of the Substituted Issuer and the Additional Guarantor;

(6) the Issuer shall have delivered, or procured the delivery to the Trustee of, an Opinion of Counsel addressed to the Issuer and the Substituted Issuer from a leading firm of New York lawyers to the effect that the Issuer Substitution Documents constitute legal, valid and binding obligations of the Substituted Issuer and the Additional Guarantor under New York law;

(7) the Issuer and the Substituted Issuer shall have appointed a process agent in the Borough of Manhattan, the City of New York to receive service of process on its behalf in relation to any legal action or proceedings arising out of or in connection with the Issuer Substitution Documents;

(8) there is no continuing Event of Default in respect of the Notes.

(b) Upon effectiveness of the substitution, the Substituted Issuer and the Issuer shall deliver to the Trustee an Officer's Certificate, executed by an Authorized Officer, certifying that the terms of this section have been complied with and attaching copies of all documents contemplated herein.

(c) Upon the execution of the Issuer Substitution Documents as referred to in paragraph (a)(1) above and compliance with the other conditions in paragraph (a), (1) the Substituted Issuer shall be deemed to be named in the Notes as the principal debtor in place of the Issuer (or of any previous substitute under these provisions), (2) the Additional Guarantor shall be deemed to be named as a guarantor of the Notes and (3) the Notes shall thereupon be deemed to be amended to give effect to the transactions referred to in (1) and (2). Except as set forth above, the execution of the Issuer Substitution Documents shall operate to release the Issuer (or such previous substitute as aforesaid) from all its obligations as issuer of the Notes.

(d) Not later than 10 Business Days after the execution of the Issuer Substitution Documents, the Substituted Issuer shall give notice thereof to the Holders of the Notes in accordance with the provisions described under Section 1.6.

ARTICLE XIV

GUARANTEES

Section 14.1. Guarantees.

Nexa CJM and Nexa Brazil hereby, jointly, severally, fully, absolutely and unconditionally guarantee on an unsecured basis to each Holder of a Note authenticated and delivered by the Trustee, and to the Trustee on behalf of such Holder, and for itself and the Paying Agents, the due and punctual payment of the principal of (and premium, if any) and interest (including any Additional Amounts) on such Note and all other obligations of the Issuer under this Indenture, when and as the same shall become due and payable, whether at the Stated Maturity or by acceleration, redemption, purchase or otherwise, in accordance with the terms of such Note and of this Indenture. In case of the failure of the Issuer punctually to make any such payment, each of the Guarantors hereby agrees to cause such payment to be made punctually when and as the same shall become due and payable, whether at the Stated Maturity or by acceleration, call for redemption, purchase or otherwise, and as if such payment were made by the Issuer.

The Guarantees constitute unconditional and unsubordinated obligations of each of the Guarantors that will at all times rank at least equally with all other present and future unsecured senior obligations of each such Guarantor, except for any obligations that may be preferred by provisions of law that are both mandatory and of general application.

Each of the Guarantors hereby agrees that its obligations hereunder shall be unconditional, irrespective of the validity, regularity or enforceability of any Note or this Indenture, the absence of any action to enforce the same, any release or amendment or waiver of any term of any other guarantee of, or any consent to depart from any requirement of any other guarantee, of all or any of the Notes, any waiver or consent by the Holder of any Note or by the Trustee with respect to any provisions thereof or of this Indenture, the obtaining of any judgment against the Issuer or any action to enforce the same or any other circumstances which might otherwise constitute a legal or equitable discharge or defense of a guarantor. Each of the Guarantors hereby waives notice of the acceptance of its Guarantee and of any of the obligations under this Indenture or the Notes (the “Obligations”) or of the accrual thereof, and further waives presentment, protest, notice or demand. This is a continuing guarantee and is a guarantee of payment and not of collection, and each of the Guarantors waives any right to require the Holders to initiate collection proceeds or otherwise enforce payment of the Obligations or any security or other guarantee therefor before obtaining payment hereunder.

The Guarantees shall continue to be in effect or be reinstated, as the case may be, if at any time (i) any payment in respect of any of the Obligations is rescinded or must otherwise be returned by the Holders, whether by reason of the insolvency, bankruptcy, receivership, reorganization or liquidation of the Issuer or any Guarantor or any other obligor or otherwise, all as though such payment had not been made or (ii) a Substituted Issuer, as defined in Section 13.1, assumes the Issuer’s obligations under the Notes pursuant to Article XIII hereof.

Each of the Guarantors hereby waives the benefits of diligence, presentment, demand of payment, any requirement that the Trustee or any of the Holders protect, secure, perfect or insure any security interest in or other Lien on any property subject thereto or exhaust any right or take any action against the Issuer or any other Person or any collateral, filing of claims with a court in the event of insolvency or bankruptcy of the Issuer, any right to require a proceeding first against the Issuer, protest or notice with respect to any Note or the indebtedness evidenced thereby and all demands whatsoever, and covenants, that these Guarantees will be discharged in respect of

any Note except by complete performance of the obligations contained in such Note and in the Guarantees. Each of the Guarantors hereby agrees that, in the event of a default in payment of principal (or premium, if any) or interest on any Note, whether at its Stated Maturity or by acceleration, redemption, purchase or otherwise, legal proceedings may be instituted by the Trustee on behalf of, or by, the Holder of such Note, subject to the terms and conditions set forth in this indenture, directly against any or all of the Guarantors to enforce the Guarantees without first proceeding against the Issuer. Each of the Guarantors agrees that if, after the occurrence and during the continuance of an Event of Default, the Trustee or any of the Holders are prevented by applicable law from exercising their respective rights to accelerate the maturity of the Notes, to collect interest on the Notes or to enforce or exercise any other right or remedy with respect to the Notes, or the Trustee or the Holders are prevented from taking any action to realize on any collateral, each of the Guarantors agrees to pay to the Trustee for the account of the Holders, upon demand therefor, the amount that would otherwise have been due and payable had such rights and remedies been permitted to be exercised by the Trustee or any of the Holders.

No provision of the Guarantees, Notes or of this Indenture shall alter or impair the Guarantees of the Guarantors, of which the Guarantees are absolute and unconditional, of the due and punctual payment of the principal (and premium, if any) and interest (and Additional Amounts, if any) on the Note and the obligation under this Indenture upon which each Guarantee is endorsed.

Each of the Guarantors shall be subrogated to all rights of the Holders of the Notes upon which its Guarantee is endorsed against the Issuer in respect of any amounts paid by each of the Guarantors on account of such Note pursuant to the provisions of the Guarantees or this Indenture; provided, however, that none of the Guarantors shall be entitled to enforce or to receive any payments arising out of, or based upon, such right of subrogation until the principal of (and premium, if any) and interest (and Additional Amounts, if any) on all Notes issued hereunder shall have been paid in full.

The Guarantees shall remain in full force and effect and continue to be effective should any petition be filed by or against the Issuer for liquidation or reorganization, should the Issuer become insolvent or make an assignment for the benefit of creditors or should a receiver or trustee be appointed for all or any significant part of the Issuer's assets, and shall, to the fullest extent permitted by law, continue to be effective or be reinstated, as the case may be, if at any time payment and performance of the obligations under the Notes is, pursuant to applicable law, rescinded or reduced in amount, or must otherwise be restored or returned by any obligee on the Notes, whether as a "voidable preference," "fraudulent transfer" or otherwise, all as though such payment or performance had not been made. In the event that any payment, or any part thereof, is rescinded, reduced, restored or returned, the Notes shall, to the fullest extent permitted by law, be reinstated and deemed reduced only by such amount paid and not so rescinded, reduced, restored or returned.

Each of the Guarantors, as applicable, hereby irrevocably waives all benefits set forth in the following provisions of the Brazilian law: articles 333, sole paragraph, 366, 368, 827, 829, sole paragraph, 830, 834, 835, 837 and 838 of the Brazilian Civil Code and articles 130 and 794 of the Brazilian Civil Procedure Code.

No stockholder, officer, director, employer or incorporator, past, present or future, of any Guarantor, as such, shall have any personal liability under the Guarantee by reason of his, her or its status as such stockholder, officer, director, employer or incorporator.

Section 14.2. Delivery of the Guarantee.

The delivery of any Note by the Trustee, after the authentication thereof hereunder, shall constitute due delivery of the Guarantees set forth herein on behalf of the Guarantors.

Section 14.3. Release of Guarantor.

(a) Concurrently with any consolidation or merger of any of the Guarantors or any sale or conveyance of the property of any of the Guarantors as an entirety or substantially as an entirety, in each case as permitted by Section 9.1(a) hereof, and upon delivery by such Guarantor to the Trustee of an Officer's Certificate and an Opinion of Counsel to the effect that such consolidation, merger, sale or conveyance was made in accordance with Section 9.1(a) hereof, the Trustee shall execute any documents reasonably required in order to evidence the release of such Guarantor from its obligations under its Guarantee endorsed on the Notes and under this Article XIV.

(b) Concurrently with the defeasance of the Notes under Section 12.2 hereof or the covenant defeasance of the Notes under Section 12.3 hereof, each of the Guarantors shall be released from all of its obligations under its Guarantee endorsed on the Notes and under this Article XIV.

ARTICLE XV

MEETINGS OF HOLDERS OF SECURITIES

Section 15.1. Purposes for Which Meetings May Be Called.

A meeting of Holders of Notes may be called at any time and from time to time pursuant to this Article to consider any matter affecting their interests, including, if proposed by the Issuer, the modification of the terms and conditions of the Notes; provided that any modification postponing the date for payment of any interest, reducing or canceling any amount of principal or the rate of interest payable or altering the currency of payment in respect of the Notes will only be binding if passed at a meeting of Holders at which a special quorum (as set forth in Section 15.4) is present.

Section 15.2. Call, Notice and Place of Meetings.

(1) The Trustee may at any time call a meeting of Holders of Notes of any series for any purpose specified in Section 15.1, to be held at such time and at such place in the Borough of Manhattan, The City of New York as the Trustee shall determine. Notice of every meeting of Holders of Notes, setting forth the time and the place of such meeting and in general terms the action proposed to be taken at such meeting, shall be given, in the manner provided in Section 1.6, not less than 21 nor more than 180 days prior to the date fixed for the meeting.

(2) In case at any time the Issuer, pursuant to a Board Resolution, or the Holders of at least 10% in principal amount of the Outstanding Notes shall have requested the Trustee to call a meeting of the Holders of Notes for any purpose specified in Section 15.1, by written request setting forth in reasonable detail the action proposed to be taken at the meeting, and the Trustee shall not have made the first publication of the notice of such meeting within 21 days after receipt of such request or shall not thereafter proceed to cause the meeting to be held as provided herein, then the Issuer or the Holders of Notes in the amount specified above, as the case may be, may determine the time and the place in the Borough of Manhattan, The City of New York for such meeting and may call such meeting for such purposes by giving notice thereof as provided in subsection (1) of this Section.

Section 15.3. Persons Entitled to Vote at Meetings.

To be entitled to vote at any meeting of Holders of Notes, a Person shall be (i) a Holder on a Record Date established pursuant to Section 15.5 of one or more Outstanding Notes, or (ii) a Person appointed by an instrument in writing as proxy for a Holder or Holders of one or more Outstanding Notes by such Holder or Holders. The only Persons who shall be permitted to be present or to speak at any meeting of Holders of Notes of any series shall be the Persons entitled to vote at such meeting and their counsel, any representatives of the Trustee and its counsel and any representatives of the Issuer and its counsel.

Section 15.4. Quorum; Action.

The Persons entitled to vote a majority in principal amount of the Outstanding Notes shall constitute a “quorum” for a meeting of Holders of Notes, however, any modification postponing the date for payment of any interest, reducing or canceling any amount of principal or the rate of interest payable or altering the currency of payment in respect of the Notes will only be binding if passed at a meeting of Holders of at least 66 $\frac{2}{3}$ % of the Notes (a “special quorum”). In the absence of a quorum or a special quorum, as the case may be, within 15 minutes (or such longer period not exceeding 30 minutes as the chairman may decide) of the time appointed for any such meeting, the meeting shall if convened upon the requisition of Holders be dissolved. In any other case it shall stand adjourned to the same day in the next week (or if such day is not a Business Day the next succeeding Business Day) at the same time and place. If within 15 minutes (or such longer period not exceeding 30 minutes as the chairman may decide) after the time appointed for any adjourned meeting a quorum or a special quorum, as the case may be, is not present for the transaction of any particular business, then, subject and without prejudice to the transaction of the business (if any) for which a quorum or a special quorum, as the case may be, is present, the chairman may either (with the approval of the Trustee) dissolve such meeting or adjourn the same for such period, being not less than ten calendar days (but without any maximum number of calendar days), and to such place as may be appointed by the chairman either at or subsequent to such adjourned meeting and approved by the Trustee, and the provisions of this sentence shall apply to all further adjourned such meetings.

Notice of the reconvening of any adjourned meeting shall be given as provided in Section 15.2(1), except that such notice need be given only once not less than five days prior to the date on which the meeting is scheduled to be reconvened. Notice of a reconvening of an adjourned

meeting shall state expressly the percentage, as provided above, of the principal amount of the Outstanding Notes of such series which shall constitute a quorum.

Any resolution passed or decision taken at any meeting of Holders of Notes of any series duly held in accordance with this Section shall be binding on all the Holders of Notes of such series, whether or not presented or represented at the meeting. However, for the avoidance of doubt, no actions taken at such meeting shall be binding on all Holders of Notes unless such actions were approved by the minimum percentage in principal amount of the Outstanding Notes of the series as required elsewhere in this Indenture with respect to such actions.

Section 15.5. Determination of Voting Rights; Conduct and Adjournment of Meetings.

(a) Notwithstanding any other provisions of this Indenture, the Trustee may make such reasonable regulations as it may deem advisable for any meeting of Holders of Notes of a series in regard to proof of the holding of Notes of such series and the appointment of proxies and in regard to the appointment and duties of inspectors of votes, the submission and examination of proxies, certificates and other evidence of the right to vote, and such other matters concerning the conduct of the meeting as it shall deem appropriate. Except as otherwise permitted or required by any such regulations, the holding of Notes shall be proved in the manner specified in Section 1.4 and the appointment of any proxy shall be proved in the manner specified in Section 1.4. Such regulations may provide that written instruments appointing proxies, regular on their face, may be presumed valid and genuine without the proof specified in Section 1.4 or other proof.

(b) The Trustee shall, by an instrument in writing, appoint a temporary chairman of the meeting, unless the meeting shall have been called by the Issuer or by Holders of Notes as provided in Section 15.2(2), in which case the Issuer or the Holders of Notes of the series calling the meeting, as the case may be, shall in like manner appoint a temporary chairman. A permanent chairman and a permanent secretary of the meeting shall be elected by vote of the Persons entitled to vote a majority in principal amount of the Outstanding Notes of such series represented at the meeting.

(c) At any meeting each Holder of a Note of such series or proxy shall be entitled to one vote for each \$1,000 principal amount of the Outstanding Notes of such series held or represented by him or her; provided, however, that no vote shall be cast or counted at any meeting in respect of any Note challenged as not Outstanding and ruled by the chairman of the meeting to be not Outstanding. The chairman of the meeting shall have no right to vote, except as a Holder of a Note of such series or proxy.

(d) Any meeting of Holders of Notes of any series duly called pursuant to Section 15.2 at which a quorum is present may be adjourned from time to time by Persons entitled to vote a majority in principal amount of the Outstanding Notes of such series represented at the meeting, and the meeting may be held as so adjourned without further notice.

Section 15.6. Counting Votes and Recording Action of Meetings.

The vote upon any resolution submitted to any meeting of Holders of Notes of any series shall be by written ballots on which shall be subscribed the signatures of the Holders of Notes of

such series or of their representatives by proxy and the principal amounts and serial numbers of the Outstanding Notes of such series held or represented by them. The permanent chairman of the meeting shall appoint two inspectors of votes who shall count all votes cast at the meeting for or against any resolution and who shall make and file with the secretary of the meeting their verified written reports in duplicate of all votes cast at the meeting. A record, at least in duplicate, of the proceedings of each meeting of Holders of Notes of any series shall be prepared by the secretary of the meeting and there shall be attached to said record the original reports of the inspectors of votes on any vote by ballot taken thereat and affidavits by one or more persons having knowledge of the facts setting forth a copy of the notice of the meeting and showing that said notice was given as provided in Section 15.2 and, if applicable, Section 15.5. Each copy shall be signed and verified by the affidavits of the permanent chairman and secretary of the meeting and one such copy shall be delivered to the Issuer, and another to the Trustee to be preserved by the Trustee, the latter to have attached thereto the ballots voted at the meeting. Any record so signed and verified shall be conclusive evidence of the matters therein stated.

IN WITNESS WHEREOF, the parties hereto have caused this Indenture to be duly executed as of the day and year first above written.

**Re: Nexa Resources S.A.
6.600% Senior Unsecured Notes due 2037 (the “Notes”)**

Reference is hereby made to the Indenture, dated as of April 8, 2025 (the “Indenture”), among Nexa Resources S.A., as Issuer, Nexa Resources Cajamarquilla S.A. and Nexa Recursos Minerais S.A., as Guarantors, and The Bank of New York Mellon, a New York banking corporation, as trustee (the “Trustee”), as principal paying agent (the “Principal Paying Agent”), as transfer agent (the “Transfer Agent”) and registrar (the “Security Registrar”). Capitalized terms used but not defined herein shall have the meanings given to them in the Indenture.

This letter relates to U.S.\$[] aggregate principal amount of Notes which are held in the form of the Restricted Global Note (CUSIP No. 65290D AC7 / ISIN No. US65290DAC74) with the Depositary in the name of [*insert name of transferor*] (the “Transferor”). The Transferor has requested a transfer of such beneficial interest in the Notes to a Person who will take delivery thereof in the form of an equal aggregate principal amount of Notes evidenced by the Regulation S Global Note (CUSIP No. L67359 AC0 / ISIN No. USL67359AC04).

In connection with such request, and in respect of such Notes, the Transferor does hereby certify that such transfer has been effected in accordance with the transfer restrictions set forth in the Notes and that:

- (A) The offer of the Notes was not made to a person in the United States; and
 - (B) either:
 - (i) at the time the buy order was originated, the transferee was outside the United States or the Transferor and any person acting on its behalf reasonably believed that the transferee was outside the United States; or
 - (ii) the transaction was executed in, on or through the facilities of a designated offshore securities market and neither the Transferor nor any person acting on our behalf knows that the transaction was pre-arranged with a buyer in the United States;
-

(C) no directed selling efforts have been made in contravention of the requirements of Rule 903(a)(2) or 904(a)(2) of Regulation S, as applicable; and

(D) the transaction is not part of a plan or scheme to evade the registration requirements of the Securities Act.

We understand that this certificate is required in connection with certain securities laws of the United States. In connection therewith, if administrative or legal proceedings are commenced or threatened in connection with which this certificate is or would be relevant, we irrevocably authorize you to produce this certificate to any interested party in such proceeding. This certificate and the statements contained herein are made for your benefit and the benefit of the Issuer and the Guarantors.

**Re: Nexa Resources S.A.
6.600% Senior Unsecured Notes due 2037 (the “Notes”)**

Reference is hereby made to the Indenture, dated as of April 8, 2025 (the “Indenture”), among Nexa Resources S.A., as Issuer, Nexa Resources Cajamarquilla S.A. and Nexa Recursos Minerais S.A., as Guarantors, and The Bank of New York Mellon, a New York banking corporation, as trustee (the “Trustee”), as principal paying agent (the “Principal Paying Agent”), as transfer agent (the “Transfer Agent”) and registrar (the “Security Registrar”). Capitalized terms used but not defined herein shall have the meanings given to them in the Indenture.

This letter relates to U.S.\$[] principal amount of Notes which are evidenced by an aggregate Regulation S Global Note (CUSIP No. L67359 AC0 / ISIN No. USL67359AC04) and held with the Depositary through [Euroclear] [Clearstream] in the name of [*insert name of transferor*] (the “Transferor”). The Transferor has requested a transfer of such beneficial interest in Notes to a person that will take delivery thereof in the form of an equal principal amount of Notes evidenced by a Restricted Global Note of the same series and of like tenor as the Notes (CUSIP No. 65290D AC7 / ISIN No. US65290DAC74).

In connection with such request and in respect of such Notes, the Transferor does hereby certify that such transfer is being effected pursuant to and in accordance with Rule 144A under the Securities Act and, accordingly, the Transferor does hereby further certify that the Notes are being transferred to a Person that the Transferor reasonably believes is purchasing the Notes for its own account, or for one or more accounts with respect to which such person exercises sole investment discretion, and such person and each such account is a “qualified institutional buyer” within the meaning of Rule 144A, in each case in a transaction meeting the requirements of Rule 144A and in accordance with any applicable securities laws of any state of the United States.

This certificate and the statements contained herein are made for your benefit and the benefit of the Issuer and the Guarantors.

DESCRIPTION OF THE REGISTRANT’S SECURITIES REGISTERED PURSUANT TO SECTION 12 OF THE SECURITIES EXCHANGE ACT OF 1934

As of December 31, 2025, Nexa Resources S.A. (“Nexa Resources,” “we,” “us,” and “our”) had one class of securities registered under Section 12 of the Securities Exchange Act of 1934, as amended: our common shares.

Description of Common Shares

The following description of our common shares is a summary and does not purport to be complete. It is subject to and qualified in its entirety by reference to our amended and restated articles of association, which is incorporated as an exhibit to our most recent Annual Report on Form 20-F, the Luxembourg law of August 10, 1915, on commercial companies, as amended (the “1915 Law”), and by any other applicable Luxembourg corporate law. We encourage you to read our articles of association, the 1915 Law, and applicable provisions of Luxembourg law for additional information.

Share capital

As of December 31, 2025, our issued share capital was US\$132,438,611 represented by 132,438,611 common shares fully paid, with par value of US\$1.00 per share. In addition to our issued share capital, we have an authorized share capital of US\$231,924,819, represented by 231,924,819 common shares. Our common shares are publicly traded in the United States on the New York Stock Exchange (or NYSE), under the ticker symbol NEXA.

Changes to our share capital are decided by our shareholders or, pursuant to our articles of association, by our board of directors within the limits of the authorized share capital. Our shareholders may at any time at a shareholders’ meeting decide to increase or decrease our share capital. Such resolution must satisfy the quorum and majority requirements that apply to an amendment of the articles of association, as described below. No shareholder is liable to make any further contribution to our share capital other than with respect to shares held by such shareholder that are not fully paid-up.

Distributions

Pursuant to our articles of association, the general meeting of shareholders may approve dividends and the board of directors may declare interim dividends, in each case to the extent permitted by Luxembourg law. Under Luxembourg law, dividends are determined by a simple majority vote at a general shareholders’ meeting based on the recommendation of our board of directors. Pursuant to our articles of association, the board of directors may also declare distributions to our shareholders in the form of reimbursement of share premium to the extent permitted by Luxembourg law.

Each common share entitles the holder to participate equally in any distributions, if and when declared by the general meeting of shareholders or, in the case of interim dividends or reimbursements of share premium, the board of directors, out of funds legally available for such purposes. Dividends and other distributions on our common shares will be declared and paid in U.S. dollars. Declared and unpaid distributions held by us for the account of the shareholders shall not bear interest. Under Luxembourg law, claims for unpaid distributions will lapse in our favor five years after the date such distribution has been declared.

We and our subsidiaries are subject to certain legal requirements that may affect our ability to pay dividends or other distributions. Distributions to shareholders (including in the form of dividends or reimbursement of share premium) may only be made from amounts available for distribution in accordance with Luxembourg law, determined based on our standalone statutory accounts prepared under Luxembourg GAAP. Under Luxembourg law, the amount of a distribution paid to shareholders (including in the form of dividends or reimbursement of share premium) may not exceed the amount of the profits at the end of the last financial year plus any profits carried forward and any amounts drawn from reserves that are available for that purpose, less any losses carried forward and sums to be placed in reserve in accordance with Luxembourg law or our articles of association. Furthermore, no distributions (including in the form of dividends or reimbursement of share premium) may be made if at the end of the last financial year the net assets as set out in the standalone statutory accounts prepared under Luxembourg GAAP are, or following such a distribution would become, less than the amount of the subscribed share capital plus the non-distributable reserves.

Distributions in the form of dividends may only be made from net profits and profits carried forward, whereas distributions in the form of share premium reimbursements may only be made from available share premium.

Luxembourg law also requires at least 5.0% of our net profits per year to be allocated to the creation of a legal reserve until such reserve has reached an amount equal to 10.0% of our issued share capital. If the legal reserve subsequently falls below the 10.0% threshold, at least 5.0% of net profits again must be allocated toward the reserve. The legal reserve is not available for distribution.

Voting rights

There are no restrictions on the rights of Luxembourg or non-Luxembourg residents to vote our shares. All of our shareholders, including our public shareholders, hold common shares with identical voting rights, preferences and privileges. Each common share entitles the shareholder to attend a general meeting of shareholders in person or by proxy, to address the general meeting of shareholders and to vote. Each common share entitles the holder to one vote at the general meeting of shareholders.

General meeting of shareholders

In accordance with Luxembourg law and our articles of association, any regularly constituted general meeting of our shareholders has the power to order, carry out or ratify acts relating to our operations to the extent that such decisions are the domain of the shareholders and not the board of directors.

Our annual general meeting of shareholders shall be held at our registered office, or at such other place in Luxembourg as may be specified in the notice of the meeting, within six months after the end of the relevant financial year. Except as otherwise specified in our articles of association, resolutions at a general meeting of shareholders are adopted by a simple majority of shares present or represented and voting at such meeting.

A shareholder entitled to vote may act at any general meeting of shareholders by appointing another person (who need not be a shareholder) as his proxy, which proxy shall be in writing and comply with such requirements as determined by our board with respect to the attendance to the general meeting, and proxy forms in order to enable shareholders to exercise their right to vote. All proxies must be received by us (or our agents) no later than the day determined by our board of directors.

The board of directors may also decide to allow shareholders to vote by correspondence by means of a proxy form providing for a positive or negative vote or an abstention on each agenda item. The conditions for voting by correspondence are set out in the articles of association and in the convening notice.

The board of directors may decide to arrange for shareholders to be able to participate in the general meeting by conference call, video conference or similar means of communication, whereby (i) the shareholders attending the meeting can be identified, (ii) all persons participating in the meeting can hear and speak to each other, (iii) the transmission of the meeting is performed on an ongoing basis and (iv) the shareholders can properly deliberate without the need for them to appoint a proxyholder who would be physically present at the meeting.

Appointment and term limits of members of our board of directors

In accordance with our articles of association and the 1915 Law, the members of our board of directors are elected by a resolution of a general meeting of shareholders adopted with a simple majority of the votes validly cast, regardless of the portion of capital represented at such general meeting. Votes are cast for or against each nominee proposed for election to the board and cast votes shall not include votes attaching to shares for which the shareholder has not participated in the vote, has abstained or has returned a blank or invalid vote.

Our directors are appointed for a mandate of a two-years term and may be reelected. Members of our board of directors may be removed at any time, with or without cause, by a resolution adopted at a general meeting of our shareholders. Under Luxembourg law, in the case of a vacancy of the office of a director appointed by the general meeting of shareholders, the remaining directors may fill the vacancy on a provisional basis. In these circumstances, the following general meeting of shareholders shall make the final appointment of the director.

Issuance of shares and preferential subscription rights

Our shares may be issued pursuant to a resolution of the general meeting of shareholders. The general meeting of shareholders may also delegate the authority to issue shares to the board of directors for a renewable period of five years. The board of directors has been authorized to issue up to 231,924,819 common shares. Such authorization will expire five years after the date of publication in the Luxembourg legal gazette (*Recueil Electronique des Sociétés et Associations*) of the minutes of the general meeting of shareholders held on May 8, 2025 (unless amended or extended by the general meeting of shareholders).

Each holder of shares has preferential subscription rights to subscribe for any issue of shares pro rata to the aggregate amount of such holder's existing holding of the shares. Each shareholder shall, however, have no preferential subscription right on shares issued for a contribution in kind.

Preferential subscription rights may be restricted or excluded by a resolution of the general meeting of shareholders, or by the board of directors if the shareholders so delegate. The general meeting of shareholders has delegated to the board of directors the power to cancel or limit the preferential subscription rights of the shareholders when issuing new shares, so long as the issuance of new shares is carried out through a public offering.

If we decide to issue new shares in the future and do not exclude the preferential subscription rights of existing shareholders, we will publish the decision by placing an announcement in the Luxembourg official journal *Recueil Electronique des Sociétés et Associations* and in a newspaper published in Luxembourg. The announcement will specify the period in which the preferential subscription rights may be exercised. Such period may not be shorter than 14 days from the publication of the offer. The announcement will also specify details regarding the procedure for exercise of the preferential subscription rights. Under Luxembourg law preferential subscription rights are transferable and tradable property rights.

Repurchase of shares

Nexa Resources is prohibited by the 1915 Law from subscribing for its own shares. Nexa Resources may, however, repurchase its own shares or have another person repurchase shares on its behalf, subject to certain conditions, including:

- prior authorization of the general meeting of shareholders setting out the terms and conditions of the proposed repurchase, including the maximum number of shares to be repurchased, the duration of the period for which the authorization is given (which may not exceed five years) and the minimum and maximum consideration per share;
- the repurchase may not reduce the net assets of Nexa Resources on a non-consolidated basis to a level below the aggregate of the issued share capital and the reserves that Nexa Resources must maintain pursuant to the 1915 Law or our articles of association;
- only fully paid-up shares may be repurchased; and
- the acquisition offer is made on the same terms and conditions to all the shareholders who are in the same position; however, listed companies may repurchase their own shares on the stock exchange without making an acquisition offer to the shareholders.

As of December 31, 2025, there were no authorized share buyback programs.

Form and transfer of shares

Our shares are issued in registered form only and are freely transferable. Luxembourg law does not impose any limitations on the rights of Luxembourg or non-Luxembourg residents to hold or vote our shares.

Under Luxembourg law, the ownership of registered shares is generally evidenced by the inscription of the name of the shareholder, the number of shares held by him or her in the shareholders' register, which is maintained at our registered office. Each transfer of shares is made by a written declaration of transfer recorded in our shareholders' register, dated and signed by the transferor and the transferee or by their duly appointed agent. We may accept and

enter into its shareholders' register any transfer based on an agreement between the transferor and the transferee provided a true and complete copy of the agreement is provided to us.
